In a remarkable leading article, the *Newer Vremya* of January 13 endeavours to prove that at the present moment Japan has far greater need of peace than Russia. The leading Russian journal finds that the anxiety for the restoration of peace which is displayed by the Press of England and America, in contradistinction to that of other countries, raises an involuntary doubt as to whether all is really as well with Japan as it is stated to be in the accounts given by her well-wishers. "How are we to explain the fact that the United States and England, whose trade, industry, and shipping derive such enormous profits from the war, are beginning to feel weary of it even before the belligerents themselves? Is it not because peace is necessary, desirable? Because in England and America it is beginning to be admitted that in the further course of the war the military successes of Japan are likely to be reduced to their true significance?"

The *Ninno Vremya* thinks that further light may be thrown on the situation by comparing with these Anglo-American appeals for peace the utterances of "some of the serious organs of the Slav, French, and German Press." To this end the *Politik* of Prague, and the *Journal des Debats* are quoted; the former as maintaining that owing to Russia's unreadiness "Japan has hitherto been fighting with a third-class Power, so to speak, and yet has been unable to profit by the advantage of this position;" the latter as arguing that Admiral Rojdestvensky has every prospect of successfully encountering Admiral Togo. Finally, the views of the *Hamburg Nachrichten* are reproduced at considerable length, and special emphasis is laid on the statement of the German journal that "We consider ourselves bound in justice to declare that the whole course of the military operations up to the present time is such as does not admit of any doubt with regard to Russia's final successful issue from the war."

The *Novoe Vremya* concludes by saying that "all this, when taken together, shows that abroad people are not so blinded by the successes of Japan as many might imagine," and by expressing the hope that in the future it may be possible to repeat the boast of Suworoff that for 75,000 men lost by the enemy Russia had not lost a thousand.

No illustrations could be more eloquent as to the great divergence of views that exists in Russia. Since these opinions appeared in print there can be no doubt that the peace party has gained strength. As to the Prague journal's comment that Japan has hitherto been unable to profit by the advantage of Russia's unreadiness, it is hardly worth refuting, nor are the *Hamburger Nachrichten's* opinions much more convincing. But two points may be noticed. One is that Japan, neither by

speech nor pen, has hitherto afforded the slightest intimation of anxiety to make peace. Not in the columns of her press have pacific voices been heard. The other is that the *Novoe Vremya* seems to forget or ignore the very marked division of the world into two camps with regard to this war. There is the Anglo-Saxon camp, which sympathizes with Japan and would be glad to see her gallant fight crowned with the reward of peace; there is the camp in which are grouped nearly all the Powers of the European continent, who, since they desire Russia to win, are opposed to any peace leaving the victory with Japan. That is the true explanation of the difference in tone between the two sections, the fanciful theory of the *Novoe Vremya* notwithstanding.

#### BULLET-PROOF ARMOUR.

A trial took place on the forenoon of March 1st, at the Omori shooting range, of a bullet-proof coat and an impervious shield invented by Messrs. T. Nakanishi and T. Asano, engineers in the employment of Mr. C. Matsui, gun and ammunition dealer, Owari-cho, Kyobashi, Tokyo. Some fifty persons were present to witness the trial, among them being the Siamese Minister and his Secretary, Count Omura, formerly lord paramount of Hizen Province, Viscount Ijuin, an official of the Imperial Household, etc. The visitors were received by Mr. Matsui, who thanked them for their presence and then conducted them to the proving ground, where a breast-plate and a movable shield were tried, both being of practically the same construction. They each consisted of a couple of thin steel plates each 2 millimetres thick but separated by a stuffing of a substance suggestive of snake-gourd fibre stiffened with tar or asphaltum—the whole presenting a thickness of about 3 inches and being covered with a thin flannel-like cloth. The weight of the breast-plate is a fraction of 10 lbs.; the weight of the shield must of course differ according to its size. The trials were made on ranges of 100 metres, 75 metres and 28 metres, the actual proofs consisting of two rounds at each distance, though visitors were allowed to fire numerous shots at the objects. The weapon of attack was the 1897 Japanese rifle, known as the *San-ju-nun-shiki*, which is now in use by the Japanese armies, firing a projectile of 7-mill. diameter. At 100 and 75 metres the bullets penetrated the first plate and piercing the stuffing went to pieces on the second or inner plate. At 25 metres matters were little better except that the inner plate was forced inwards and rendered concave at the point of impact. The quality of the armour was much applauded but the weight was demurred to. Even the inventors admitted that the coat could not well be carried by infantry and that the chief purpose of both coat and shield is to protect engineers and pioneers in cutting wire-entanglements and removing other obstructions. It has to be noted that the two inventors had invented a bullet-proof coat before the Japan-China war but in this case the weight problem proved insuperable and they have since had to modify their designs.

#### NOTES ON CURRENT EVENTS.

The *Nippon* publishes an appreciation of Russian officers by Major-General Koizumi, now lying sick in the hospital at Kokura. A great deal is said by the Japanese General to the magnificent appearance of the Russian officers, their splendid costume, their

social amenities and their distinguished ways. But when their profession as fighting leaders comes in question, General Koizumi has conceived a very poor opinion of them. He does not admit that they are as incompetent as their own men, who have been taken prisoners, allege. His verdict is that up to the moment of commencing an attack they show sufficient resolution and some ability. But thereafter they are of small account. To adapt themselves to circumstances appears to be their last idea. In retreat they are first, and in moments of crisis they show no resources of leadership. These can not be the men that Skobeloff commanded. A change must have come over the Russian officer since his day. One would not imagine at present that war or the direction of fighting units was the business of these officers. On the contrary their main occupations in life seem to be eating, drinking, gaming and frequenting the company of women. They are spoken of as able captains when in trenches or behind fortifications. General Koizumi ridicules that kind of competence. Any one can develop it, he says. To stand at bay behind cover is an elementary instinct which all can display. It is in the open field that the officer's qualities come into real play, and in the open field the Russian officer has not inspired respect during this war.

The following paragraph appears in the *Japan Herald*:-

We have been waiting patiently to hear that the authorities have taken proceedings against the *Mail* for a paragraph which appeared in its columns on the 14th inst, referring to the loss of a transport. The news contained in the paragraph was not reported in any other paper—Japanese or foreign—the reason being that it was of the nature of prohibited news. Such being the case, it appears to us extraordinary, firstly that the paragraph should ever have appeared in the *Mail*, which has several times applauded itself for the docility with which it obeys the official instructions, and secondly that the authorities should have passed over such a gross breach of the regulations. Of course any question of favouritism is out of the question in official circles, but to an outsider it would appear that the offences for which the *Kobe Herald* was punished twice were no greater than that committed by the *Mail* in its issue of the 14th inst.

The italics are added by us. If the *Japan Herald* consults the *Chuo Shimbun* of the 13th of February it will find the story of the *Musashino Maru* told there in a *Moji* despatch. Hence the italicized statement is erroneous.

It is reported that the steamer *Yedo Maru* (1724 tons), the property of an Osaka merchant, has run ashore on the island known as "Encounter Rock" and has sustained considerable injury.

We read in the *Kokumin Shimbun* that out of the 25 destroyers spoken of recently as to be added to the Japanese fleet, eleven are actually on the stocks and will be very soon completed. Among the rest some have not yet been commenced, but the materials for the whole have been obtained, and the work of putting them together can not take long. Our contemporary believes that all will be finished by August or September.

It was remarked in connexion with the Boxer campaign and Germany's claims for indemnification on account of her outlays, that either her methods of military finance must differ from those of England, for example, or the provision she makes for her soldiers must be remarkably munificent. We are reminded of the incident by the following figures elicited in the Reichstag:-

In reply to a number of questions, Dr. Stuebel stated that the strength of the German troops engag-

ed in suppressing the native rising in South-West Africa amounted up to the present in all to 519 officers, 154 officials, and 11,668 men, together with 54 field-guns and 16 machine-guns. The expenditure up to the end of December amounted to over 42,000,000 marks (over £2,100,000), and for this year the cost per man, not including expense of transport, had been estimated at 4,000 marks (£200), or at the rate of 11 marks (11s.) per man per day. The total casualties up to date amounted to 1,041 officers and men, of whom 752 were killed in action or died of disease or from other cause, while the wounded and injured numbered 289 officers and men.

Eleven shillings per man per day, independently of transport expenses. Observe how that would work out in the present war. Assuming that Japan has 400,000, all told, beyond the seas, the cost, without transport, would be 2½ million yen daily, or between 60 and 70 millions per month.

Two Russian officers have been making foolish attempts to escape. Their names are given as Lieutenant Alexander Mirsky, of the First Regiment of Gossack cavalry, and naval cadet Tsikautseff of the *Rurik*. They essayed several times to break out of their place of confinement at Matsuyama, and in consequence they have been condemned to imprisonment. The place where they are to undergo punishment is the Kosuge Jail, near Senju, and they arrived in Tokyo a few days ago under escort. It would seem that some of the Russian officers ignore the conditions existing in Japan. A little more knowledge would teach them how futile these attempts to escape must be. Could they succeed in reaching one of the treaty ports there would be some chance of achieving their purpose, but all the places chosen for their confinement are sufficiently removed from foreign settlements to render recapture certain before the interval can be negotiated.

The *New York Sun* has the following with reference to the marriage of Captain Pershing, the new Military Attaché of the United States in Tokyo:-

Washington, January 26.

The wedding of Miss Helen Frances Warren, daughter of Senator Warren of Wyoming, and Capt. John J. Pershing of the General Staff, U. S. A., occurred to-day at noon in the Church of the Epiphany, the Rev. Randolph H. McKim performing the ceremony. The church was filled to overflowing with guests, the President and Mrs. Roosevelt and Miss Alice Roosevelt heading the list, which included the Cabinet members, Diplomatic Corps, Senators and Representatives and their families. A wedding breakfast with 300 guests followed the ceremony in the ballroom of the New Willard Hotel.

The maid of honour was Miss Anne Decker Orr of Pittsburg, and the best man was Judge Chase Magoon. The ushers were Gen. Grozier, Capt. Joseph T. Grebbs, Capt. Sidney A. Gloman, Capt. A. W. Butts, Capt. Kirkpatrick, Capt. Haan and Capt. Lassiter, of the Army, Lieut. Commander Gibbons, Lieut.-Commander Long, Lieut. Bulmer and Lieut. Bristol of the Navy, and Major Charles L. McCawley of the Marine Corps.

Capt. and Mrs. Pershing left Washington on an afternoon train on their way to Tokio, the bridegroom having been assigned to the American Legation there as military attaché.

A short time ago there was published in Tokyo a telegram running thus:-

"It is supposed that the reason for this new attitude on the part of Germany is to be found in the utterances of Secretary Hay who is reported to have recently said that unless Germany changes her policy with regard to China war between Great Britain and Germany will hardly be avoidable."

It now appears that these alleged utterances of Secretary Hay have been made the subject of an official conversation between the German Ambassador in Washington and Secretary Hay. The latter emphatically denied the whole story, and expressed his desire that it should be contradicted in the most unequivocal manner. The *Kokumin Shimbun*, which was the first to publish the

original telegram in Japan, now gives the contradiction.

Now that the actual facts as to last year's rice-crop are ascertained, the yield seems to have been quite exceptional. The Department of Agriculture and Commerce publishes figures showing that the crop was 4,928,699 *koku* larger than that for 1903, or 10.6 per cent.; and 9,105,061 *koku*, or 21.5 per cent. above the average yield. This very remarkable result was due mainly to climatic conditions, but in part also to skilful precautions against the ravages of insects. The following are the figures for the past 10 years:—

	Koku.
1895 .....	39,660,798
1896 .....	36,240,351
1897 .....	33,039,293
1898 .....	47,387,666
1899 .....	39,698,258
1900 .....	41,466,422
1901 .....	46,914,434
1902 .....	36,932,666
1903 .....	46,473,208
1904 .....	51,401,997
Average yield .....	42,296,936

It was the *Jiji Shimpō's* pictorial correspondent, Mr. Takashima, that painted the picture on the now historical kite which was sent up by the Japanese to inform the Russian Army of the fall of Port Arthur. The picture represented Stoessel and Nogi shaking hands, and underneath written in the Russian language, was the legend:—"Port Arthur has fallen. On the morning of the happy new year we have the honour to announce this with hearty greetings." The hearty greetings alluded, of course, to the sketch on the kite. It was subsequently learned from prisoners that the kite fell into the hands of a Russian Lieutenant at Liuchangtun. Affixed to the tail was a letter written in French, the contents of which are not mentioned.

Japanese journals tell of quite a big consignment of cigarettes sent from Egypt to Japan in recognition of the latter country's unbroken line of successes in the war. The K. and E. Malacino Company are the donors. They have sent, through the Tobacco Monopoly Bureau, 2,000 boxes of cigarettes to Admiral Yamamoto, 2,000 to Admiral Togo and 19,600 to the *Juppeibu* (office for the relief of soldiers and sailors). The cigarettes for Baron Yamamoto and Admiral Togo have the names of those officers printed on the paper. Of course there has been a very courteous message of acknowledgement.

#### PORT ARTHUR.

Correspondence from Port Arthur indicates that the organization of the administration has proceeded apace and that the two towns, old and new, are rapidly assuming their normal appearance. Many fine buildings have been found virtually intact and the Japanese officers are housed much more magnificently than they would be in their own country. At Dairen, also, everything is prosperous. In fact the degree of prosperity attained there is spoken of as quite remarkable. But in the midst of all these flourishing conditions some terrible evidences of the cost at which the fortress was won are still apparent, especially in the neighbourhood of Panlungshan, where many corpses of Japanese soldiers lie still unburied. These men fell last summer in the first great assault. Nothing remains of them now but their uniforms and their bones.

As to the ships of war, the correspon-

dence merely says that considerable investigation will still be required before pronouncing any definite opinion, and such investigation can not be made until the weather becomes a little warmer. But, so far as can be seen, there are excellent hopes of raising and utilizing several of the vessels.

One of the great needs of the garrison and the inhabitants appears to be want of drinking water. Most of the wells are frozen, and the water-works have not been repaired as yet.

#### FOOTBALL.

There was a game of Association football on Saturday afternoon, the prospective Interport attack playing upon one side and the defence upon the other. The full teams were:—

WHITES.		COLOURS.	
E. Powys	goal	S. W. Argent	
W. S. Moss	backs	N. G. Maitland	
A. E. Cooper		F. G. Correa	
T. W. Kilby		H. Y. Irwine	
A. W. S. Austen	½ backs	W. J. White	
A. Kingdon		G. N. Fairhurst	
A. W. Read		J. F. Drummond	
V. A. Hearne		O. Strome	
W. B. White	forwards	H. W. Kilby	
J. E. Drummond		K. van R. Smith	
L. Stornebrink		J. M. Mollison	

The Whites played up well in the first part of the game, but were unable to score, though attacking strongly. The Colours soon showed up to better advantage and Strome put through the first goal. Shortly after, from a scrimmage in front of goal, White equalised. From this time Whites gradually weakened, and Colours led at half-time by two goals to one. The play in the second half was exceedingly one-sided, Colours having things all their own way, and finally coming out victors by 7 goals to 1. The goals were scored by Strome (4), H. Kilby (2), van Smith (1), W. B. White (1).

The prospective Interport attack showed very good form after they once got going, though just at the start their play was ragged. The passing of the forward line was fairly accurate and the shooting much better than usual; while the halves played excellently, W. J. White especially showing up well. The prospective Interport backs, playing for the losing side, did not appear to great advantage. Their tackling was weak and their kicking was of a very poor order. Of course, they were up against a strong combination, but even allowing for this it is to be hoped their play will show more judgment when the Kobe visitors are in the field.

We have been informed that the team to represent the V. C. & A. C. against the K. R. & A. C. on Saturday, 11th March, has been selected and will be as follows:—

Goal.....	E. Powys Jr.
Backs .....	W. S. Moss.
	A. E. Cooper.
	W. B. Mason.
½ Backs .....	W. J. White.
	D. Weed.
	J. F. Drummond.
	O. Strome.
Forwards.....	H. W. Kilby.
	K. van R. Smith.
	J. M. Mollison.
Referee .....	Mr. C. T. Mayes.

#### RUSSIAN PRISONERS.

According to official investigations up to Feb. 23rd, Russian prisoners in Japan now total:—

	Officers.		Non-Commissioned Officers and Men.	
Fukuchiyama .....	—	1,101		
Ninoshima .....	4	2,534		
Matsuyama .....	341	3,701		
Osaka .....	—	23,906		
Osato .....	—	1,957		
Himeji .....	—	2,185		
Nagoya .....	112	1,109		
Fukuoka .....	—	999		
Shidzuoka .....	60	60		
Marugame .....	—	350		

#### YOKOHAMA LITERARY SOCIETY.

The Yokohama Literary Society held its 301st meeting on the evening of the Feb. 24 at the Van Schaick Hall. The lecturer was the Rev. Geo. Wallace, of Tokyo, who took for his subject, "Some familiar words and phrases." Needless to say he handled his theme with considerable ability, introducing many a witty story and telling allusion in illustration, and holding the amused and interested attention of his audience to the close. He was cordially thanked, and then the following musical programme was given.

Piano Solo .....	"A Fantasy" .....	Vincent.
	Mr. W. KARL VINCENT.	
Song .....	"Stances" .....	A. Flegier.
	Miss MECKE.	
Cello Solo .....	"Romance Sans Parole" .....	Davidoff
	Mr. SALINGER.	
Song .....	"The Lighthouse-keeper" .....	Molloy.
	Mr. L. D. TERN.	
Songs .....	"Tra-la-la" .....	Sullivan.
	"Oh, lucky Jim" .....	Mr. HUGH HORNE.

In the course of the evening the President announced that the season would probably close on April 14th, as the last regular date fell this year on Good Friday. The following three papers had been arranged for:—Friday, March 10th, "From Shinagawa to the Loochoos in the early Seventies," Mr. J. P. Mollison; Friday, March 24th, "Memories of some English Cathedrals," (illustrated) Mrs. A. Bellamy Brown; Friday, April 7th, "Rest," Dr. Neil Gordon Munro.

#### DEATH OF MR. TANAKA.

Mr. H. Tanaka, the well-known iron importer and prominent trader in electrical machinery in Tokyo, died on Feb. 23rd. The deceased was 61 years of age, and was the seventh son of a dry goods dealer named S. Kaneko, residing in Kurume. In his youth he was adopted by Mr. Tanaka, chief engineer of the rifle and gun factory established by the feudal Lord of the Saga clan, and he was employed there as an assistant. After the Restoration, he removed to Tokyo where he established an iron works on a small scale. Under the instructions of the Department of Industrial Affairs (now abolished), he succeeded in making some telegraphic apparatus and after this was patronized by the Department till 1876, when his business was greatly enlarged. For some years he was employed by the Department as an engineer but resigned in 1882, after which he established a factory at Shibaura, near Shimbashi, which was the origin of the Shibaura Iron works, the dingy brick buildings, so familiar to passengers by Shimbashi trains. In this factory, he commenced to make several varieties of mines and torpedoes at the order of the Army and Navy. In 1886, he proceeded to America where he investigated electrical matters, and on his return home he devoted much time to developing apparatus for the telephone and the electric light.

#### PATENTS PROTEST.

In the Patents Bureau, a decision, according to the *Official Gazette* of March 2nd, has been delivered on a protest lodged by Mr. C. Weinberger, No. 46, Yokohama, against the Crown Cork Company, of London. The contention of Mr. Weinberger was that his Crown Cork was registered in 1892 in England and America and since then it was imported into this country and became well known to the public. On the other hand a similar Crown Cork of the Crown Cork Company was registered in 1898 in Japan, and consequently the registry made by the London firm should be erased. The protest was rejected on the ground that the registry of the goods in dispute was not made by Mr. Weinberger in the Japanese Government office concerned, and that he did not give evidence showing that the goods had been familiar to the public in Japan since 1892.

## PEACE OR TRUCE.

THE accounts published yesterday morning with regard to the internal condition of Russia suggest that although official secrecy is observed, the pacific disposition attributed by rumour to the St. Petersburg Government is not wholly imaginary. Unless the telegrams err inconceivably, events have taken the course predicted some time ago by close observers, who detected that the representatives of absolutism in Russia had allowed the revolutionary movement to develop momentum which their strength no longer sufficed to check. This may mean, probably does mean, that the St. Petersburg Government will soon come forward with peace proposals, though we are persuaded that up to the evening of the 24th instant no such proposals nor any suggestion of them had reached Tokyo officially, and that no indication of any kind had been given on Japan's side. Still peace seems to be in the air whether it materialize or not, and Japan may possibly be on the verge of having to take the most momentous step in her whole history, past or future. If she is indeed about to be approached, then her fate as a sovereign nation depends on the acumen and resolution she displays at this juncture. Probably it will occur to her first to consider the question whether the system of absolutism in Russia is doomed or whether it will survive. If it be doomed, if representative institutions are to succeed the oligarchy, then the future may seem to contain comparatively few germs of uneasiness, and Japan may perhaps be inclined to accept terms of settlement such as would not deprive her of any expansive potentialities in East Asia. But if by terminating the war and recalling its troops the Russian autocracy can obtain for itself a new lease of life, then assuredly Japan must exact such terms as will secure her against any renewal of this terrible struggle. This question, we say, may interest her much and may influence her decision. But we trust not. We trust that, without regard to what an unforeseeable future may have in store, she will formulate and unflinchingly adhere to such demands as shall protect her from future molestation. It is not a truce she wants but peace—peace solid and permanent. Russia is beaten. There can be no mistake about that. She has lost Manchuria. Her troops still hold Mukden, it is true, and still hold the regions northward of it, but everything that invests Manchuria with the least material value in Russia's eyes has been taken from her and can not be taken back unless she recover the command of the sea, a contingency too remote to be worth considering. So long as the Port Arthur Squadron was in existence the possibility of a coalition between it and the Baltic fleet constituted a really serious menace; but with the Port Arthur Squadron absolutely removed from the arena, Japan is mistress of the situation and may dictate terms. There is not one of us that does not

long for peace, but every friend of this country must feel that if a mere truce is to be patched up, if instead of laying down their arms and entering upon an age of genuine tranquillity, the combatants are to prepare for a renewal of the struggle, then it were incomparably better for Japan to carry on the present war one year more, or two years more, or three years more. Against Russia's resources those of this country weigh very little in the balance. Russia, according to credible reports, has already arranged with great American ship-builders to establish dockyards within her empire, and if she sets to work on such lines, she can equip herself in ten years' time with a fleet of war-ships too overwhelming for Japan to think of facing. Simultaneously she can double the Trans-Asian Railway, and prepare it for the transport of troops on a colossal scale. That such would be her programme were any foothold left to her in the Far East, is as sure as that she is a great Power unable tamely to brook defeat and sufficiently careful of her prestige in Asia not to reconcile herself to any lasting loss of it. Whether Japan is to be condemned to a petty existence within narrow limits, or whether she is to expand, with the added necessity of devoting the gains of her development to unproductive warlike purposes, the result is much the same for her. It is imperative, therefore, that there should not be left to Russia in the Far East any foundation for future edifices of aggression. Her three avenues of access—the railway, the Amur and the Ocean—must be closed to her except for peaceful purposes. She must have no naval base on the Pacific coast. She must be denied any foothold in Manchuria, or the tenure of any fortress within the Three Eastern Provinces of the Chinese Empire. These are the broad outlines. There may be differences of opinion as to details, but the basic principle must be to deprive Russia of future opportunities for renewing the aggressive programme which she has hitherto pursued in Eastern Asia without any regard for the rights of others and without any respect for her own engagements.

## FRANCE'S NAVAL PROGRAMME.

IT is natural that Japanese attention should have been attracted by the newly announced programme of the French Government to build 20 large war-vessels during the next twelve years, to establish two naval bases in the Far East and to construct another dock at Saigon. In discussing this signal plan, Tokyo journals do not announce any distinct belief that France intends to arm against Japan. But one can easily see that they hold that opinion. As how indeed could they avoid holding it? They have before them the utterance of prominent French politicians in the Chamber of Deputies and they have before them the forged despatch sent to the *Echo de Paris* by some unscrupulous Russian or Russo-phil, and credited by many perhaps a majority of

the French, in spite of internal evidences of falsehood and in spite of explicit denials. As to this document we may remark *en passant* that it is one of the examples of Christian Russia's method of carrying on the campaign. During all the years of the world's familiarity with the story of the Pharisee and the Sadducee, the nations professing the Nazarene's creed have been too often heard thanking God that they are not as other men are. That is their favourite form of self-praise when they confront the East. But it may be doubted whether the tendency was ever more conspicuously displayed than it has been by Russia's lovers and friends since this war began. Their constant cry has been "we are Christians." See how immeasurably we excel those pagans. All righteous men must espouse our cause." And as evidences of their Christianity they resort to falsehood, forgery and barbarity. There are as good Christians in Russia as in any part of the world. There are as true gentlemen. Perhaps these and those constitute the bulk of the population. But what things have been most *en evidence* since this struggle commenced have been the declarations of leading Russian journals that the Japanese must be exterminated as one exterminates vermin; have been the preachings of Russian religionists that the Japanese are to be crushed as pagans; have been the appreciations of Russian publicists that the Japanese are yellow-monkeys; have been the lying charges of politicians that the Japanese are inspired by a policy of blamable aggression; have been the deceptive despatches of officers who claimed victory when they had been broken and defeated. That is not a Christian spectacle, but it is offered by a nation loudly professing Christianity. The Japanese see how much they are suspected. They may be unwilling to admit the disagreeable truth, but they cannot blink it. So in France's preparations they detect a sinister shadow of distrust, and we fear that even France's best friends must detect it also. But Japanese journals pass over this phase of the matter very lightly. They trust in time to show France how baseless any such apprehensions must be, and they decline to credit her with them permanently. They suggest, however, that she should not be surprised if something suspicious is read into her own doings by Eastern Asia. What are these great naval preparations for? That their sphere of operation is the Far East becomes quite clear when the two new naval bases in Indo-China are considered and the new dock at Saigon. Are they defensive preparations or are they offensive? Are they to resist aggression or are they to further aggression? Since, by hypothesis, they do not belong to the former category, then it follows that they do belong to the latter. So the shadows of M. JULES FERRY and Admiral COURBET are to be once more projected over the East-Asian field, and once more is practical effect to be given to the doctrine that the duty of each generation of

a nation is to bequeath to its children a larger estate than it received from its own fathers. China, perhaps the Pescadores, perhaps Formosa, may be affected by this amplifying process, and thus France and her great armament themselves assume the character that some of her publicists have been attributing to Japan.

That is the interpretation suggested as a not unfair rendering of current events. But the *Asahi Shimbun*, which is the mouthpiece of the exposition, does not pretend to believe it. The object is merely to suggest to France that when she reads sinister designs into the doings of others, her own book may be found to invite a similar construction. There is one thing which, for our own part, we would suggest to the writer in the *Asahi* and to his fellow-countrymen, namely, that Japan is still a mystery in the eyes of a large part of Europe. Even to French vision she presents the spectacle of a Power hitherto a negligible quantity which has suddenly given evidence of immense belligerent capacities. What assurance have the French, what assurance can they possibly have, that the appetite for acquisition will not come to Japan by eating, as it has invariably come to other States, and if it comes would there be safety for the unprotected East-Asian colonies of any Western Power? The old order of things having been signally changed by Japan's wholly unlooked for displays of prowess, Occidental States must adapt themselves to the altered conditions. It really appears to us that this reflection accounts quite adequately for France's present actions. She is merely about to do in the Far East what she has been doing for ages in Europe, what England has been doing, what Germany has been doing; that is to say, arming in proportion to the potentialities of neighbouring States. One of the inevitable results of this formidable struggle in Manchuria will be to extend to East Asia the same rivalry of defensive and offensive preparations that absorbs so much attention, energy and material in the Occident. France takes the lead. She is the first to give practical recognition to the altered situation, not because her suspicions are keener than those of others, but because, after Russia, she has the largest imperial interests. Indo-China is virtually her only possession in the Orient. She regards it with almost religious solicitude and will take no risks as to its security. We shall see Germany following suite ere long, and we should see England doing the same were she not otherwise guaranteed. It is all in the natural sequence of events, and nothing can be fairly charged against France because she takes the initiative.

#### THE OPERATIONS IN MANCHURIA.

It is thought by Japanese journals that the battle which has just been fought at Chinghoching (or Tsinghochin) preludes a great general movement by the Japanese.

The Russians seem to have made the place the main stronghold upon which their extreme left rested. Originally they had pushed farther east, namely, to Hanchang, which is some 23 miles south-east of Chinghoching. But being driven from Hanchang by the Japanese, they fell back upon Chinghoching, and there entrenched themselves very strongly, gradually receiving re-inforcements until their number reached from twenty to thirty thousand. They also organized a detached force of cavalry and infantry which had its base at Machwantsz, whence it threatened to turn the Japanese right. Reference to the map is necessary to comprehend the situation. If the reader will consult the map published by us on December 22nd and put his finger on Taling and Hanchang, he will have located the positions of the Russian left and the Japanese right respectively. Then if he traces the course of the road running due north from Hanchang, he will find that having reached Weitszku, it trends westward, leading to Kintauku and thence to Machwantsz, whence it eventually emerges at Fushun, a distance of 40 miles from Machwantsz. From Taling another road leads northwards to Fushun, and the distance between these two places is much the same as the distance between Machwantsz and Fushun. The base of the Russian left being at Taling and his detached force at Machwantsz, the Japanese had to advance against both of these places simultaneously. Turning to the official reports, we learn that between the 19th and the 22nd, one of their forces moved up the road leading due north from Hanchang, and occupied, first, Weitszku and subsequently Kintouku (or Kintoku as some write it) which is about 5 miles south of Machwantsz. The other force moved along the Taitsz river north-westward from Hanchang, and, having occupied the left (southern) bank effectively, prepared to attack Taling. The attack was delivered on the 23rd and continued throughout the 24th with results known to our readers, namely, the complete defeat of the Russians, who retired northward in disorder, having burned Chinghoching. The point to which this retreat was made is Chiupingtai (not shown on our map), 19 miles northward of Taling. There the Russians have another entrenched position which they are now doubtless holding. Their field hospital, it will have been observed, is at Santunglu, about 4 miles northward of the Taling crest, but the probability is that they have abandoned that position and withdrawn completely to Chiupingtai, where they are 27 miles from Fushun. It may be assumed that there is communication between the two roads, namely, the Taling-Fushun road and the Hanchang-Fushun road. The Japanese seem to be advancing by both of these against Fushun, and the Russians appear to be defending both roads, their position on the Hanchang-Fushun route being Machwantsz (40 miles from Fushun) and their position on the

Taling-Fushun road Chiupingtai (27 miles from Fushun).

The most striking point about these operations is their locality. It was against the Japanese left that the Russians struck with all their available force at the end of January. There at Heikautai GRIPENBERG and KAULBARS made their debut upon the stage with disastrous results for themselves. There can be no doubt that they struck in anticipation of the advent of Nogi's army from Port Arthur, an army larger than any of the three already confronting them, since it consisted of 4 Divisions, whereas OKU, NOZU and KUROKI have only three each. Was it a mistake on the part of KUROPATKIN to conceive that NOGI and his veterans might be looked for on the banks of the Hun? Should he have looked for them on the right of the Japanese line in the Hanchang region? We can not answer these questions. Nothing seems less probable than that the Port Arthur army should have made the long detour to Hanchang in the depth of winter. Yet it is certain that while the Russians were making their most strenuous dispositions for defence in the Valley of the Hun, the Japanese were preparing to deliver their first stroke on the upper waters of the Taitsz, that is to say, precisely at the opposite end of the long lines extending over some 80 miles. The Russians had 16 battalions in position at Chinghoching, and another considerable force at Machwantsz. To assemble a force sufficient for assuming the offensive against these strongly fortified and naturally difficult positions must have been no slight task, and to equip it so that it could devote two whole days and a night to the attack of the Russian stronghold at Taling, the first day being marked by a heavy snow-storm, without losing a single man by frost-bite, must have been a still more arduous undertaking. We judge now that Fushun is the objective of the Japanese turning movement, and that this advance on their right will be quickly followed by movements on the centre and left. If the Fushun enterprise is to take the character of an outflanking operation, it must be allowed to reach the neighbourhood of maturity before assaults are delivered along the rest of the line, but we may reasonably conclude that the long anticipated battle is now on the verge of commencing.

#### RUSSIA'S PLAINTS.

It is difficult to know what Russia's latest accusation means. We have not had any news of the Japanese getting in the rear of the Russians on the west of the railway. On the contrary, that is exactly what the Russians themselves have been doing. That is what MISCHENKO did in the beginning of January, when he rode down the right bank of the Liao to attack Niuchwang and Haicheng, and that is exactly what the Russian cavalry did a few days ago when they actually made Tienchwangtai their basis for operations against the railway between Haicheng

and Tashichiao and against Yinkow itself. With these facts staring the world in the face, it must be pronounced a most consummate piece of assurance on the part of the St. Petersburg Government to prefer such a charge as that now attributed to them. Japan, from the outset, declared her intention, declared it most explicitly, not of unconditionally respecting China's neutrality, but of respecting it in precisely the same degree as Russia should respect it. The Japanese were not so fatuous as to bind themselves by a hard and fast promise to submit to restrictions which their enemy ignored. Therefore from the moment that MISCHENKO made his January raid down the west bank of the Liao, the Japanese army ceased to be under any obligation to respect the neutrality of that region. Indeed their hands had been freed long previously by the conduct of the Russians, for these, under the pressure of commissariat necessities, have for months back been drawing supplies profusely from Hsinmintun and the country westward of it, and have been sending troops thither for purposes of requisition and escort. Thus it is nothing short of an insolent farce that Russia should now address such a circular to the Powers. Why does she do it and what have the Japanese done? One question is as perplexing as the other. Some days ago news reached Tokyo *via* Peking that a body of Hunghutsz under the leadership of Japanese had destroyed several miles of the railway and broken down bridges northward of Tiehling. Possibly that is what Russia alludes to. The Hunghutsz have long been a thorn in her side, and finding them defy her control she is perhaps essaying to make capital out of them. But if Japanese adventurers choose to join the Hunghutsz and fight against their country's enemy, that is an incident entirely beyond the purview of neutral obligations. The men act at their own risk and their country can not be held responsible for them, above all by a Power whose troops have openly used these very Hunghutsz in their campaign against the Japanese. Indeed it seems scarcely credible that Russia should find in such an incident material for a circular note to the Powers. And this brings us to consider her motive. All of us reckon among our school-day experiences the case of the under-boy in the fight who, the more things went against him, grew the more vociferous in his appeals to the umpire and his complaints about foul play. Truly it seems that Russia has fallen into some such tremulous and whining mood. Apparently she clutches at every resource that presents any chance of respite from the ills overtaking her. Could she alarm the Powers sufficiently about China's neutrality to induce them to interfere in its behalf, a most welcome court of arbitration would be created with an anti-Japanese bias from the outset. It is not pleasant to suspect a great Power of any trickery so contemptible, but if any other reasonable hypothesis presents itself, we fail to detect it. From the very first Russia comes into court with

exceedingly soiled hands. This war had its origin in the fact that she flagrantly ignored China's sovereignty throughout the whole of Manchuria, and now we hear her clamouring to the nations about some academical breach of China's neutrality in the same regions. She cuts a very sorry figure. So long as her protests were addressed to China, there was room to suppose them informed by a purpose which had at least the merit of audacity, the purpose of indemnifying herself at China's expense in the sequel of the war. But when she carries her complaints to the tribunal of the Powers, she is plainly seeking to enlist their sympathies against Japan. The manoeuvre will have no success, we imagine. It will not weigh with England and America, assuredly, and we doubt whether even Germany, strong as are her political reasons for placating Russia, will be moved. Russia has got to take her beating or lay down her arms. 'Tis of no use her going around from court to court showing her scars and complaining of the unfair fighting of the "big boy" whom she set out with the intention of exterminating as one exterminates vermin. If her appeals to the Christianity whose tenets her own practices so greatly dishonour, and her attempts to make capital out of racial prejudices which she herself so glaringly displays, were futile, so too will be this last outcry. The nations are not going to help her off her Procrustean bed.

#### THE IMPERIAL DIET.

##### HOUSE OF PEERS.

SATURDAY, FEBRUARY 25.

The House met at the usual hour, and proceeded at once to the Order of the Day after hearing a report by the Chairman of the Petitions Committee, who said that, subsequently to the date of his last report, 58 petitions had been examined, of which 16 were recommended for submission to the Government, 6 were presented for the information of the House and 36 were rejected. Five Bills (2 being Government measures) were then committed to special committees.

The House then considered the Lower Chamber's amendments of the Bill relating to Trusts for lending money on security, and decided to adopt them without a conference of the Houses.

The following Government Bills were then read a second time and passed.—

1. The Bill for amending the Law of the House (i.e. limiting its establishment of members.) Baron Senge moved that this Bill be amended. His proposal was that instead of fixing the superior limit for each elective order of the nobles—namely, 17 Counts, 70 Viscounts and 56 Barons—the limit should take the form of the combined total, 143, since otherwise the system of balance would be impaired. Mr. Miura supported this amendment. He pointed out that when the Law of the House was first enacted, the three Orders comprised only 233 names whereas their number had now swelled to 364, and as this expansion might be continuous, it was essential to impose some limit for the number of members returned by the Orders. The Government was right, therefore, so far as concerned the principle of the measure, but the method proposed was defective, and Baron Senge's amendment would correct the defect. Professor Hozumi pointed out that the amendment would open the door to an abuse; namely, that with the two limits, one of number (143) and one of ratio (one-fifth of the total), each Order would of course claim its due proportion, and that if one Order happened to be conspicuously more numerous than the others, such Order would return

an undue share of representatives. After some further discussion an open ballot was taken when 129 voted for Baron Senge's amendment and 128 for the Government Bill. Otherwise the measure was passed unchanged.

2. The Bill for extending the period of the Governor-General of Taiwan's legislative authority.

4. The Bill for granting municipal powers to communities of Japanese in foreign countries.

Five private Bills sent up from the Lower Chamber then came up for their second readings. One was passed; three were rejected and one was postponed. These measures were of no special importance.

Ten Government Bills sent up from the Lower House seeking post-facto approval of disbursements in excess of the Budgetary items, were next passed without debate.

The Settled Accounts for 1900, 1901 and 1902 were then taken. The two last were passed, but the first was sent back for further inquiries, and the House having dealt with a number of petitions, rose at 4 p.m.

##### HOUSE OF REPRESENTATIVES.

The House met at 1.15 p.m. After various reports the President announced that the Government's Answers to several Questions had been received. The most important of these were:—

1. The Answer to Mr. Hanai's Question with reference to the site of the Surugadai Greek Cathedral. This reply was that even after diplomatic relations with a country had been broken off, the international usage was to preserve intact that country's legation and all things appertaining to the latter. Therefore the site of the Greek Church being, in effect, part of the Russian Legation lands, its tenure was not disturbed.

2. The Answer to Mr. Mochizuki's Question as to what steps had been taken with reference to violations of their neutral obligations by Powers allowing the Baltic Fleet to coal in their waters. To this the Government replied that negotiations had at once been opened with the countries concerned, but that the time for publishing the results had not yet come.

3. The Answer to Mr. Sato Torajiro's Question with regard to the Nagamori scheme of reclamation in Korea. The Question, it will be remembered, suggested that the Japanese Government had been the real parents of this scheme, and that its abandonment did not conduce to Japan's prestige. The Government replied that the matter was still in course of negotiation and no definite statement could yet be made.

4. The Answer to Mr. Ogawa's Question with regard to the Government's procedure in the matter of the acts of violence committed by Russian sailors interned at Shanghai. The reply was that the Government had immediately impressed upon China the necessity of limiting the area of liberty granted to these interned men and taking measures to punish their infractions. This matter was now under discussion by China and Russia.

Speeches were then delivered by members presenting Interpellations. One of these was a vague query by Mr. Matsumoto Kumpei, who, pointing out how plainly the people of the United States had evinced their sympathy with Japan in the present war, alike morally in expressions of good-will and materially in lending money, and how evidently they desired the closest relations with Japan as Japan did with them, desired to know what measures the Government contemplated or was taking to bring about such *rapprochement*.

Another Interpellation, introduced by Mr. Tachikawa, related to the repressive measures adopted by the Government towards socialist newspapers—as the *Heimin*, the *Akebono* and the *Shinshakai*—and towards meetings of socialists. Even Russia suffered a Tostoi. Could not Japan venture to allow socialistic doctrine a hearing of any kind?

Eight Government Bills were then passed through their second and third readings; namely (1) The Railway Mortgage Bill; (2) Bill relating to the operations of Japanese Banks in Foreign Countries; (3) Bill for extending the Functions of the Industrial Bank of Japan; (4) Bill for

extending the Functions of the Colonial Bank of Hokkaido; (5) Bill relating to the Forging and Uttering of Coins in Taiwan; (6) Bill for amending the Law of Registration; (7) Bill relating to the Diplomas of Medical Students in Private Schools; and (8) Bill relating to Cadet Families of Holders of Titles of Nobility.

The Private Bill sent down from the Upper House relating to extending the system of navigation encouragement to a volunteer fleet was then favourably reported by the Special Committee. The Chairman of Committee added that the Committee had insisted on the necessity of the vessels being new and of the best quality, and the Government had endorsed that view.

A member said that he understood that purchases of old ships were being made from America. To this Mr. Mochizuki replied that, as he understood, two vessels of 12,000 tons and 18 knots speed had been bought and would be placed on the American line.

Mr. Shimada Saburo opposed the measure. He said that he approved of it in principle, but that he objected to the Bill in its present form, and he based his objection on the consideration that the Navigation Encouragement Law needed radical amendment and therefore, pending such amendment, its application should not be extended.

Mr. Otsu contended that whatever amendment the Navigation Encouragement Law might undergo, its provisions would apply to ships such as those contemplated for the Volunteer Fleet, and that in view of the situation at present, the rejection of this Bill would be most unfortunate.

The closure having been applied, a show of hands was taken and the President declared the Bill passed, but an objection led to a ballot, when 97 voted for the Bill and 110 against it. Mr. Shimada had thus the satisfaction of successfully obstructing a movement in which all patriotic Japanese are interested.

The House was then asked to express its opinion as to the Upper Chamber's Amendments of the private Bill for the better prevention of banknotes' forgery by Japanese subjects in foreign countries. The amendments were accepted.

Four private Bills were then dealt with, one being rejected, one passed and two postponed.

Seven Representations came up for discussion and were all adopted for presentation to the Government.

The House rose at 5 p.m.

#### HOUSE OF PEERS.

The House met at the usual hour on Monday, and would have committed to a Special Committee the Government Bill for amending the Registration Law, but the Minister of Finance asked that the Bill be taken at once as this was the closing day of the session. This was done and the Bill passed. The House then passed, as amended by the Lower House, the Government Bill for extending the system of pensions &c., to Japanese teachers in Japanese schools abroad; the Bill for coöperating to give effect to the rulings of foreign tribunals of justice; and the Government Bill for amending the Tax Collection Law.

Of 4 private Bills sent up from the Lower House 3 were thrown out and one (for amending the Registration Law) was amended and passed. (The amendments were subsequently endorsed by the Lower House).

This ended the business on the Order, but a motion was made and adopted to consider Three Bills sent up from the Lower House and one presented in the Upper House. The Lower House's Bills were all passed; one relating to the jurisdiction of the Hakodate Appeal Court; one relating to the jurisdiction of the Fujiyeda Local Court; and one relating to extending the time for giving effect to penal sentences. The Upper House's Bill related to an amendment of the manner of dealing with house property of Tokyo City. This was passed by the Peers, and in the afternoon by the Lower House.

Three items of the Settled Accounts for 1900 were then considered. These had been postponed for fuller examination, and the House now decided that the Government's procedure had been improper in each case. Two of the items related to mere errors of judgment; one was con-

nected with outlays in excess of the Budget on account of the Wakamatsu Foundry.

Viscount Hotta then introduced a Representation declaring that in giving the contract for the Asahi-gawa Barracks without putting it up to open tender, the Government had violated the Law of Finance.

This led to some discussion and to minute explanations by the Government Delegates. Finally a closed ballot was taken when 89 voted for the Representation and 106 against it.

The report of the Petitions Committee having been received, the President asked the House to entrust to him authority to act as its representative during the pending period of adjournment in all matters of condolence, congratulation and approval connected with the Army or Navy. The House assented and rose at 3.30 p.m.

#### HOUSE OF REPRESENTATIVES.

The House met at the usual hour.

Mr. Hanai Takuzo presented another question relating to the site of the Greek Church on Surugadai. He claimed that in answering his previous question the Government had ignored its real gist.

Mr. Tsunematsu moved that the House at once consider the Bill sent down from the Peers for amending the manner of dealing with Tokyo City's house property. Consent was given and the Bill was passed. The same course was pursued with regard to the Peers' amendments of the Lower House's Registration Law.

The Order of the Day was then resumed. The first business was the settled accounts for 1901 and 1902. Mr. Kurizuka, on behalf of the Settled Accounts Committee, reported that in the accounts for 1901 the Committee had found 46 improper items and 36 violations of the Laws of Finance. In the accounts for 1902, they had found 30 improper items and 26 violations of the Law. He cited several of these, the principal being the payment on account of the Asahi-gawa Barracks. With reference to this last the Committee saw no course except to address the Throne, and an address had therefore been drafted, which he now read.

Before discussing these accounts the House asked for the attendance of the Ministers concerned and took a recess until the latter appeared. There had been much confusion about the statements of the Delegates and the Ministers, and General Terauchi, in reply to questions, now explained that at first the report of a committee of examination showing the work of construction to be defective and costly, had been accepted, and on the faith of it certain admissions had been made by the Government Delegates in the House. But fuller investigation had shown that the work was neither inferior nor expensive, and therefore the previous admissions had been withdrawn. In so far as concerned the blunder of momentarily endorsing a mistaken report, he and those concerned acknowledged their responsibility towards their Sovereign.

The House adopted the Committee's Report with regard to the Settled Accounts for both years; in other words, endorsed the Committee's strictures.

The President then asked the House whether it would debate the Address to the Throne. Mr. Junichiro contended that the Address had been read explicitly for purposes of reference only and that in such a character it could not come up for discussion. Other members disputed this. The President said that in his opinion the chairman of the Settled Accounts Committee had exceeded his powers in bringing forward an Address to the Throne, and therefore he (the President) asked the House to decide whether it would or would not discuss the Address. Mr. Ooka Ikuzo contended that the proper subject of discussion was whether or no the Chairman had exceeded his powers. Some confusion ensued. Finally the President called for a show hands as to whether the Address should be discussed, and having declared that the motion was lost, was about to proceed to the next item, when several of the independent members left their seats and approached the rostrum in an endeavour to obtain a hearing. The President, seeing that his ruling had not been audible, called for another show of

hands, when only 55 voted for discussing the Address. This ended the incident.

The report of the Chairman of the Petitions Committee having been received, the President addressed the House previous to adjournment. Having alluded to the very important national crisis amid which the House had sat this session, he gave the usual statistics. There had been 22 sittings of the House and 48 days sittings of special committees; 194 bills had come up for discussion and all but 2 or 3 had been disposed of. He need scarcely remind them that the most vital of these measures had been those relating to war finances and to measures for facilitating the country's industrial and commercial development. He noted as a matter for profound satisfaction that the two Houses had cordially coöperated in all this legislation. Alluding then to the figures as to increased taxes and war loans, the former totalling 140 million yen annually, the latter 1,000 millions, he declared that the story of the past showed clearly that no anxiety whatever need be entertained for the future, and that the nation's resources and its patriotism might be fully trusted. He alluded in eloquent terms to the grand devotion of the country's soldiers and sailors who forget their own lives and their families to serve their Sovereign and the State. With these on the one side and a united nation on the other, nothing was wanted to complete the entity except such representatives of the people as the House had shown themselves to be. Very different was the condition of their foe, writhing under a despotic government and struggling vainly for freedom. They might justly feel happy and content with their own lot. But the end had still to be achieved. It was still far distant. That it would be successfully attained if the nation preserved its present spirit, admitted of no doubt.

The House rose amid cheers at 3 p.m.

The Diet was prorogued on the 28th of February. At 11 a.m. the members of both Houses assembled in the Upper Chamber and the Prime Minister read the following Message from the Emperor:—

"We hereby declare the Imperial Diet prorogued to-day, and we approve the diligence shown by you in discussing urgent and important measures, and the zeal you have shown in discharging your functions of consent so as to accord with Our wishes."

This Message was then handed by the Prime Minister to the President of the Upper House and the ceremony terminated.

The Emperor invited to the detached palace at Kasumigaseki on the 1st instant, the Ministers of State, the Presidents and Vice-Presidents of the two Houses of the Diet and the Government Delegates. His Majesty was not present, being represented by Prince Yamashina, who delivered a brief message, expressing the Imperial appreciation of the labours of the Houses. Each of those present received a silver cup with the Imperial chrysanthemum engraved on it.

#### SHIPPING DISASTERS.

At 7 p.m. on February 28th, the steamer *Chitose Maru* (400 tons) and the *Sapporo Maru* (1,595 tons) collided at the entrance of Hakodate harbour. The former sustained severe damage on the starboard side near the engine-room, and sank after some ten minutes. Her crew were saved. The *iji* says that at the time of the accident, heavy snow was falling so that no object could be distinguished even at a short distance.

The *Asahi* has a telegram from Yamagata that a sailing vessel with two Russians among the crew ran ashore on the morning of March near the village of Atsumi. She carried white cotton cloth to be used as bandages and other military stores. It is said that she reached the land after drifting about in a storm, and it is believed that she was on her way to Vladivostok.

## THE TRUCE OF THE BEAR.

Yearly, with tent and rifle, our careless white men  
 By the pass called Mutianee, to shoot in the  
 vale below.  
 Yearly by Mutianee he follows our white men  
 in—  
 Matun, the old blind beggar, bandaged from  
 brow to chin.  
 Eyeless, noseless, and lipless—toothless, broken  
 of speech,  
 Seeking a dole at the doorway he mumbles his  
 tale to each!  
 Over and over the story, ending as he began:  
 'Make ye no truce with Adam-zad—the Bear  
 that walks like a man!  
 'There was a flint in my musket—pricked and  
 primed was the pan,  
 When I went hunting Adam-zad—the Bear that  
 stands like a man.  
 I looked my last on the timber, I looked my last  
 on the snow,  
 When I went hunting Adam-zad fifty summers  
 ago!  
 'I knew his times and his seasons, as he knew  
 mine, that fed  
 By night in the ripened maizefield and robbed  
 my house of bread;  
 I knew his strength and cunning, as he knew  
 mine, that crept  
 At dawn to the crowded goat-pens and plundered  
 while I slept.  
 'Up from his stony playground—down from his  
 well-dugged lair—  
 Out on the naked ridges ran Adam-zad the Bear;  
 Groaning, grunting, and roaring, heavy with  
 stolen meals,  
 Two long marches to northward, and I was at his  
 heels!  
 'Two full marches to northward, at the fall of  
 the second night,  
 I came on mine enemy Adam-zad all panting  
 from his flight.  
 There was a charge in the musket—pricked and  
 primed was the pan—  
 My finger crooked on the trigger when he reared  
 up like a man.  
 'Horrible, hairy, human, with paws like hands in  
 prayer,  
 Making his supplication rose Adam-zad the Bear!  
 I looked at the swaying shoulders, at the paunch's  
 swag and swing,  
 And my heart was touched with pity for the  
 monstrous, pleading thing.  
 'Touched with pity and wonder, I did not fire  
 then...  
 I have looked no more on women—I have walked  
 no more with men.  
 Nearer he tottered and nearer, with paws like  
 hands that pray—  
 From brow to jaw that steel-shod paw, it ripped  
 my face away!  
 'Sadden, silent, and savage, searing as flame the  
 blow—  
 Faceless I fell before his feet, fifty summers ago.  
 I heard him grunt and chuckle—I heard him pass  
 to his den,  
 He left me blind to the darkened years and the  
 little mercy of men.  
 'Now ye go down in the morning with guns of  
 the newer style,  
 That load (I have felt) in the middle and range  
 (I have heard) a mile?  
 Luck to the white man's rifle, that shoots so fast  
 and true,  
 But—pay, and I lift my bandage and show what  
 the Bear can do!  
 (Flesh like slag in the furnace, knobbed and  
 withered and grey—  
 Matun, the old blind beggar, he gives good worth  
 for his pay.)  
 'Rouse him at noon in the bushes, follow and  
 press him hard—  
 Not for his ragings and roarings flinch ye from  
 Adam-zad.

'But (pay, and I put back the bandage) this is  
 the time to fear,  
 When he stands up like a tired man, tottering  
 near and near;  
 When he stands up as pleading, in wavering,  
 man-brute guise,  
 When he veils the hate and cunning of the little,  
 swinish eyes;  
 'When he shows as seeking quarter, with paws  
 like hands in prayer,  
 That is the time of peril—the time of the Truce  
 of the Bear!  
 Eyeless, noseless, and lipless, asking a dole at  
 the door,  
 Matun, the old blind beggar, he tells it o'er and  
 o'er;  
 Fumbling and feeling the rifles, warming his  
 hands at the flame,  
 Hearing our careless white men talk of the mor-  
 row's game;  
 Over and over the story, ending as he began:—  
 'There is no truce with Adam-zad, the Bear that  
 looks like a man;'

RUDYARD KIPLING.

## ORGAN RECITAL AT CHRIST CHURCH.

There was a large attendance at Christ  
 Church on the occasion of the Organ Recital on  
 Wednesday evening. The usual evensong  
 service was followed by the items arrang-  
 ed for recital, Mr. Hugh Horne being organist,  
 and the soloists being Mesdames Walter and  
 Payne. In the solo, "For ever with the  
 Lord" (Gounod) Mrs. Jas. Walter was most  
 successful, and Mrs. Payne was specially effective  
 with her solo "O, rest in the Lord" (Mendels-  
 sohn). The whole programme was greatly ap-  
 preciated. We give the numbers below:—

1. Solo....."For ever with the Lord".....Gounod.  
Mrs. Walter.
2. ....Offertoire No. 4 in G.....Lefebure-Wely.
3. Solo....."O Thou that tellest good  
tidings in Zion".....Handel.  
Mrs. Payne.
4. ....Offertoire in E. Flat.....Dubois.
5. Solo....."Crossing the Bar".....A. H. Behrend,  
Mrs. Walter.
6. Suite V. No. 3 in F Minor.....Widor.
7. "Holy, Holy, Holy, Lord God Almighty."
8. ....(a). Ases Tod.....Grieg.  
(b). Nocturne No. 2.....Chopin.
9. Solo....."O, rest in the Lord".....Mendelssohn.  
Mrs. Payne.
10. ....Toccata in F.....Widor.

YOKOHAMA AND TOKYO FOREIGN RESI-  
DENTS ASSOCIATION FOR THE RELIEF  
OF SUFFERERS BY THE WAR.

The Executive Committee acknowledge with  
 thanks receipt of the following further sums:—

	Yen.
Amount already acknowledged .....	30,447.35
Offertories of Christ Church .....	100.00
Offertories of Christ Church .....	100.00
Bennett, Daniel & Co., 2nd Instalment ...	250.00
H. M. Arnould .....	50.00
Geo. S. Ball.....	24.37
James S. de Benneville .....	50.00
Total.....	31,021.72

Yokohama, 24th February, 1905.

## N. R. C.

The drawing for the China subscription ponies  
 which have arrived to the order of the N. R. C.  
 took place on Thursday at Messrs. Durand's, with  
 the following result:—

## THE LAW COURTS.

CLAIM AGAINST THE MINISTER FOR  
FINANCE.

K. Tominaga, a contractor residing at Iwai-  
 cho, Nagoya, has lodged an action in the Tokyo  
 District Court against Baron Sone, Minister of  
 State for Finance. According to the complaint,  
 the plaintiff established the Nagoya Tobacco  
 Factory under instructions of the Government  
 authorities for yen 5,600. Of this amount, only  
 yen 800 was paid, the remainder being left over.

## OHARA v. WRIGHT.

In the Yokohama Local Court, the hearing of  
 a case instituted by T. Ohara against Mr. W. N.  
 Wright, the proprietor of the Wright's Hotel,  
 No. 49, Yokohama, claiming yen 18.25, began  
 on Feb. 28th.

Defendant was represented by Mr. Ideura.  
 Plaintiff stated that under instructions from Mr.  
 Wright, he laid a concrete floor on Dec.  
 31st last in a stable at Yamato-cho, Negishi,  
 and he also did similar work on Jan. 4th  
 at the front of the building. Plaintiff supplied  
 gravel and sand and employed the necessary  
 number of workmen and Mr. Wright himself sup-  
 plied seven small bags of inferior cement. The cost  
 of the materials supplied by plaintiff and the wages  
 of the workmen employed amounted to yen 18.25.  
 Defendant did not pay the sum, though plaintiff  
 had asked him several times. Plaintiff further  
 said that defendant had asked him to make a  
 reduction in the bill.

Defendant's Counsel, submitted that the work  
 done by plaintiff was imperfect and that Mr.  
 Wright was willing to pay the amount when the  
 work was completed. Counsel asked the  
 Court to appoint an expert to investigate the  
 work done by plaintiff. The Court granted the  
 request and adjourned the hearing.

## CLAIM FOR DAMAGE.

The hearing of a case lodged by Mr. F. Retz  
 against the Shimoda Construction Co. claiming  
 yen 3,911, was brought up again on March 2nd  
 in the Yokohama District Court before Judge  
 Nakanishi.

Plaintiff's Counsel stated that the statement  
 given by Mr. Z. Miyazaki, an expert in Tokyo,  
 who investigated on Jan. 9th the construction of  
 the buildings erected by the defendants under the  
 instructions of plaintiff, was very vague and there  
 was no definite opinion given as to the defective  
 parts of the works which were really in dispute  
 between the parties. Counsel asked the Court to  
 summon two other experts—one foreigner and  
 one Japanese—for the same purpose.

Defendants' Counsel said that his clients were  
 willing to call further experts to make investiga-  
 tion as to their work, the result of which must  
 be favourable to the contractors. Counsel, how-  
 ever, asked the Court to appoint a foreigner in  
 Tokyo as expert, but not in Yokohama as some  
 of the foreign architects do not favour the defend-  
 ant by reason of competition in business. He  
 recommended Mr. J. Conder to the Court.

The Court decided to call two experts, one to  
 be a foreigner if possible. The Court, after  
 addressing a few questions to plaintiff's Counsel as  
 to his evidence, adjourned the case till March  
 17th.

## FIRES.

At 3.30 p.m. on Feb. 23rd, fire broke out at  
 Kurofune-cho, Asakusa, Tokyo, burning down 4  
 houses and damaging 10.

A fatal fire occurred on the night of Feb. 22rd,  
 in the village of Nagai, Miura, not far from  
 Uruga, destroying 12 houses. Four persons  
 were killed.

Fire was discovered about 4.50 on Friday  
 morning to have broken out in the stove occupied  
 by Mr. Martin at No. 55, Yokohama. The  
 flames had begun in some shelves and burned up  
 to the second storey. The Satsuma-cho Fire  
 Department soon subdued the outbreak with little  
 damage to property. Supt. Morgan reports that  
 the cause is unknown.

## WHEN THE STARS COME OUT.

I walked, one Sabbath Day, my chamber strait,  
While sank December's sun to early rest,  
And Fuji, High Priest clad in purple stole,  
Said Vesper Prayer of evening sacrifice  
For all the bowing hills and kneeling plains.

Across my chamber flowed there streams of  
gold,

The Imponderable treasure which the Sun  
Pours on all worlds with unimpoverished hand.  
The plain robed Seers upon my narrow shelves,  
And modest Poets in their daintier garb,  
Stood forth in momentary splendour decked;  
While pictured faces in my Hall of Hush,  
And o'er my desk in cheerful concord ranged,  
Smiled down at me and bade me heart's content.

But when I would make answer to their cheer  
My eyes looked forth across the Misty Seas  
To where some hailed the East all red with Dawn  
While I beheld the slow down dying Day;  
My soul looked up beyond the Evening Sky,  
The boundless Sea of Light, beyond the heights  
Where the Seven Planets weave their sacred dance,  
Beyond the Great Stars and the Milky Way,  
And saw some walking with white feet with Him  
Who is the Lord of Spirits and of Stars.

And as they called from out the Purple Past,  
And from the Happy Homes of Over-Seas,  
And from the Holy Paradise of God,  
I heard them singing in a Silver Choir,  
As birds of many names in woods of spring;  
And what each Voice and the full Chorus spake  
Was:

"That sweet Purple Past is not so far,  
These lands so distant, tho' beyond the Seas,  
This Paradise of God so white and high,  
But Morn and Even, or in this wide Noon  
That ever shines upon the Hills of Heaven,  
We hold you still in the warm Heart of Love,  
And would within the chambers of your soul  
Our names may dwell, as in your Study strait  
Find room our faces. Tho' about us sit  
The sweet Home Circles where we talked with  
you,

Or by us walk and talk the Blessed Saints,  
Each circle lacks your face to make it whole,  
And these White Hills will be twice Paradise  
When you shall tread the Banks of Asphodel;  
For hearts of Heaven have room for friends of  
Earth."

Like the High Priest of Israel Fuji stood,  
In gold and crimson glory, and arose  
A shining mist like Prayers of all the Saints;  
And lifting with the kneeling world my soul  
In humble supplication to the Lord,  
I prayed, in pleadings brief and worshipful,  
What otherwhere in many words is sung.

\* \* \*

'Twas thus I prayed, in simple words and meet  
To lift beyond the Holy Stars to God,  
And my Petition, set illuminate  
With tender hues of Fancy, and such blooms  
As grew along the hedgerows of the mind,  
I have laid up for a Memorial,  
To keep their Names before me day and night,  
To keep my Prayer before Him night and day,  
'That thus thro' Prayer, and thus by Memory,  
I may be true to Near and Far-and Those  
Who died and are alive forevermore.

And when I ceased, behold, the Evening  
Star

Blazed in the faint glow binding Fuji's brow  
Like a great jewel in his royal crown  
Who is both King and Priest to all the land;  
And in the Azure Dome that roofs the World  
The Wardens of God's Tent had lit the lamps  
Which men call Stars, and the Night Wind began  
To chant the Vesper Hymn that follows Prayer.

And while it rose and fell, and Memory's  
touch

Upon the harp invisible, which God  
Hath hung within the Portal of the Soul,  
On Sorrow's trembling chord, and Love's, was  
laid,

Amid the growing shadows there arose  
Another strain, a little Lullaby,  
Which Doris sang the Babe upon her knee:

"Swing, Lily, swing;  
Swing to the Songs of Spring,  
Songs of love that the bluebirds sing,

White Dove of Peace with folded wing.

Swing, Lily, swing;

Swing, sweet Lily, swing.

"Smile, Lily, smile;

Smile till thy winsome guile

Lighens the shadows that gather and pile,

My Lotus more dainty than blows on the Nile.

Smile, Lily, smile;

Smile, sweet Lily, smile.

"Glow, Lily, glow,

Star on the blue below,

Heart of gold on bosom of snow,

Heart of gold on the silver flow.

Glow, Lily, glow;

Glow, sweet Lily, glow.

"Stay, Lily, stay,

Moored to the common clay;

Child of the Light on the earth astray;

Balm of the night and bloom of the day;

Stay, Lily, stay;

Stay, sweet Lily, stay.

"Rest, Lily, rest;

Rest on the silver breast

Of the pool, like white winged bird on its nest,

While the opal shadows fall cool from the west.

Rest, Lily, rest;

Rest, sweet Lily, rest.

"Sleep, Lily, sleep;

Moored in slumber deep;

Lulled by the song of the winds from the steep,

Watched by the Stars that vigil keep;

Sleep, Lily, Sleep.

Sleep, sweet Lily, Sleep.

"Dream, Lily, dream;

Rocked on the flow of the stream,

Like a Fairy Bark twixt shadow and gleam

Drifting out to the morning beam.

Dream, Lily, dream;

Dream, sweet Lily, dream.

"Wake, Lily, wake;

The morn blushes red on the lake,

The linnets are telling their love in the brake.

Waken again for Love's sweet sake.

Wake, Lily, wake;

Wake, sweet Lily, wake."

And while she sang, behold, the Star of Eve  
Was set in a great Lily all of Gold  
Like the chaste Chalice of the Holy Grail;  
And, lo, where blossomed out the Milky Way  
Were beds of lilies all of snowy white,  
And One, like a White Lily, walking there.  
And thro' the Hush and thro' the Whisper stole  
The childish treble of my Mignonette,  
Singing beside the ruddy gleaming hearth,  
Singing at Doris' knee her Evensong,—  
And on their faces the Red Roses shone,—

"Great Shepherd of the Shining Stars,  
The sweet sky flock Thy pastures hold,  
Let down for me Sleep's dusky bars,  
And give me safety in Thy Fold.

"O Thou Who walk'st the Lilies by  
And cool'st their cheeks with silver dew,  
The blessed dews of Sleep may I  
Receive, and watch Thou by me too.

"For Mother kind, for Father dear,  
For all I love, to Thee I pray;  
Be near to them, to me be near,  
Till Morning sends the Stars away.

"Till Morning's smiles the Lilies wake,  
And blush the darling Roses nigh,  
Keep me, I pray, for Jesus' sake,  
Or if I live, or if I die."

And on their faces the Red Roses shone  
That blew in Eden, when the world was young.  
And on my heart there lay the Light of God.

C. K. H.

Yokohama.

## FOREIGN MUSIC IN SENDAI.

(COMMUNICATED.)

We have heard it disparagingly remarked of the  
Japanese that they are very ambitious. But has  
not ambition acted as an incentive to all the  
successful nations of the West? The desire to

excel in everything attempted, this excellent  
quality has characterized modern Japanese in an  
eminent degree and it shows itself in their amuse-  
ments as well as in the serious business of life.  
Many of our recreations were quite new to them  
until very recently. Yet they have acquired  
them very easily and have often displayed pro-  
ficiency that has astonished Europeans and  
Americans. They are good cyclists; they are  
first class baseball players; they have produced  
tennis players that are above the average of our  
players; in aquatic sports and in ordinary athletic  
sports they are gradually reaching a higher and  
higher standard. When we come to foreign  
music, the difficulties that have to be overcome  
by Japanese are so numerous and so formidable  
that it would not astonish us were they to fight  
shy of it altogether. But this is not their way.  
They have tackled it with spirit, perseverance  
and method, and though success is still a long,  
long way off in the case of the great majority of  
the young men and women who have taken up  
the study, yet one cannot but admire the steady  
application shown by the attendants at the various  
musical schools throughout the country. In Sen-  
dai the earnest study of foreign music by Japanese  
began less than three years ago, when the Second  
High School formed a Musical Association. The  
movement was cordially supported by the foreign  
residents of Sendai, who assisted as far as they  
were able to do at the first concerts given.  
Naturally these first converts were very weak  
affairs, and it appears that no one was more con-  
scious of this than the Japanese students them-  
selves. They felt that the very best that their  
most skilful performers could accomplish was  
very poor. So with the view of letting Sendai  
residents hear what real foreign music was like,  
about a month ago the Association resolved to  
summon 18 orchestral performers from Tokyo.  
The Meiji Ongakkai was applied to and readily  
responded to the call, and so it came about that  
last Saturday and Sunday two first class  
concerts were given in the large school  
Lecture Hall, each of them being attended  
by at least 800 persons. Professor W. Dubraveich,  
in addition to acting as conductor and leading  
violinist in the orchestral pieces, gave several  
delightful violin solos, and accompanied the chief  
Japanese violinist, Mr. Ono Tadamoto, on the  
piano with great effect. As a band conductor  
Professor Dubraveich's tremendous keenness and  
energy fairly astounded the audience, most  
of whom had never witnessed anything like it  
before. Among many beautiful pieces rendered  
by the band Bach's *Cyano*, Heed's *New Era*,  
and the *Donan Wellen Waiber*, by Ivanovici  
took the palm, and next to these came  
*Sturm*, a Gallop by Bile, and Tovan's Waltz  
called *Our Wedding Day*. Happily for the  
foreign listeners, who consisted of the whole of  
the Sendai foreign community, little time was  
devoted to Japanese music; one duet on the  
*Shakuhachi* (an instrument that derives its name  
from its length, 1 ft., 8 in.) and the violin at each  
concert by Messrs. J. Omura and T. Ono being  
the only Japanese pieces given, with the exception  
of an orchestral rendering of *Bansai*. For the  
way the Sendai Musical Association has gone  
ahead much credit is undoubtedly due to Mr.  
Miyoshi, the Sub-Director of the Second High  
School, who has spared no labour or thought to  
make the movement a success. This grand  
musical *tour de force* cost, we are told, nearly  
500 yen. Admission was by tickets, which were  
sold at 20 sen and 50 sen each according to class.  
Then a large number of donations were made by  
the leading residents of Sendai; so that it is  
anticipated that the proceeds will more than  
cover the expense involved. In an affair of this  
kind the impetus given to the study of music  
has to be considered. This will most certainly  
be very great. The venture was considered  
to be a bold one, perhaps an over-bold one,  
by certain local critics. But in music as in  
other things it is a case of "Nothing venture,  
nothing win," and the lovers of music in  
Sendai were, we take it, well advised when  
they determined to let the Sendai residents  
hear for themselves what Japanese musicians  
could do under able foreign superintendence. To  
use Jean Paul's similes, they now have some

motion of that "poetry of the air," of that "invisible dance" of which music consists. Not a few foreigners present no doubt felt the truth of Auerbach's beautiful remark: "Music washes away from the soul the dust of everyday life."

### RAILWAY MORTGAGE LAW.

(AS REVISED AND PASSED BY THE DIET).

TRANSLATED BY J. E. DE BECKER.

#### CHAPTER I.

##### GENERAL PROVISIONS.

1.—The word *Company* in this law means a limited private joint-stock railroad company, the capital of which is divided by shares.

2.—For the purpose of making it the subject of a right of mortgage, a company may form a railroad estate in respect to either the whole or a portion of their railroad.

A thing belonging to one railroad estate cannot at the same time belong to another railroad estate.

A railroad estate shall be deemed as one thing.

A railroad estate ceases to exist when the mortgage is extinguished.

3.—A railroad estate is formed by the following things belonging to the owner of a railroad estate:

(1) A railroad track, other land used for the railroad, the structures thereon, and the tools, implements, plant and machinery appertaining thereto.

(2) Workshops, warehouses, electrical power plant central stations, transformer sub-stations, electrical distributing sub-stations, offices, houses, the land on which they stand, and the tools, implements, plant and machinery appertaining thereto.

(3) Structures connected with water used by a railroad, the land on which they stand, and the tools, implements, plant and machinery appertaining thereto.

(4) Structures necessary for communications, signals, and the transmission of electricity used by a railroad, and the land on which they stand; also the tools, implements, plant and machinery appertaining thereto.

(5) Superficies created over the immovable property of other persons for the purpose of owning or using the structures mentioned in the four preceding sub-clauses, registered leases, and easements for the lands mentioned in the four preceding sub-clauses.

(6) Rolling stock, and the tools, implements, plant and machinery, appertaining thereto.

(7) Materials and tools, implements, plant and machinery necessary for the maintenance of the line.

4.—A railroad estate cannot be the subject of any rights *in rem* except those of ownership and mortgage; neither can it be made the subject of attachment, provisional attachment, or provisional disposition.

Things appertaining to a railroad estate cannot be made the subject of any right *in rem* other than a right of ownership, neither can they be made the subject of attachment, provisional attachment, or provisional disposition.

Should the things which are to belong to a railroad estate form the subject of a right *in rem* other than a right of ownership, or of attachment, provisional attachment, or provisional disposition, or should an immovable which is to belong to a railroad estate be the subject of a right of lease, the company may not form a railroad estate. Provided that the above rule does not apply where no registration exists in respect to the rights concerning immovables.

5.—The creation or alteration of a right of mortgage will acquire validity upon permission being given by the proper authorities, after upwards of one-fourth of the whole share capital of the company has been paid up and a resolution passed in the same manner as is required in the case of alteration of a company contract.

6.—The amount of the loan for which a railroad estate is to be mortgaged must not exceed, when added to the amount of any debentures, the

total amount of money which has been paid up on shares. Provided that in a case where the mortgage is contracted for on account of the repayment of old debts, the amount of such old debts are not to be calculated.

7.—In making application for sanction for the creation of a right of mortgage, the deed of mortgage and an inventory of the railroad estate shall be handed in. Provided that in the case of issuing debentures upon security, the deed of trust takes the place of a deed of mortgage. In the deed of mortgage shall be inserted the following:—

(1). Designation of the line belonging to the railroad estate;

(2). Names and domiciles of the mortgagee, the debtor, and the owner of the railroad estate;

(3). Rank of the right of mortgage;

(4). Amount of loan, and manner and time of repayment;

(5). Rate of interest, and manner and time of payment thereof. No agreement which will change the matters mentioned in a deed of mortgage or a deed of trust shall acquire validity unless sanctioned by the proper authorities.

8.—When an application for sanction to create a right of mortgage has been made, the proper authorities shall forthwith issue a public notification, in the *Official Gazette*, that any person who holds a right mentioned in paragraph 3 of article 4 in respect to the things which are to belong to the railroad estate, or any creditor in an attachment, a provisional attachment or a provisional disposition, shall declare the same within a fixed period of time. Provided that such period of time shall not be less than one month.

Even prior to the application for sanction of the creation of a right of mortgage being lodged, the proper authorities may, upon the application of the company, issue the public notification mentioned in the preceding paragraph. In this case, should no application for sanction of the creation of a right of mortgage have been made within six months after the public notification, such public notification will become null and void.

Where a company make the application mentioned in the preceding paragraph, an inventory of the railroad estate shall be handed in.

9.—When the public notification mentioned in paragraph 2 of the preceding article has been made, or when application for sanction of the creation of a right of mortgage has been made, things which are to belong to the railroad estate cannot be alienated (transferred).

10.—After the public notification mentioned in article 8 has been made, adjudication cannot be granted in respect to a right concerning immovables which are to belong to the railroad estate, while the public notification mentioned in paragraph 2 of the same article remains in force, or while the application for sanction of the right of mortgage is not dismissed, or while such sanction remains in force.

The provisions of the preceding paragraph apply *mutatis mutandis* to the case of auction concerning movables.

11.—When sanction *re* the creation of a right of mortgage has been given, things appertaining to the railroad and mentioned in article 3, belong to the railroad estate as a natural consequence. The same applies to things which have newly become the property of the owner of the railroad estate after the creation of the right of mortgage.

With regard to the things mentioned in the preceding paragraph, should there be any rights mentioned in paragraph 3 of article 4, the registration of those concerning immovables will become null and void, those concerning movables will be regarded as non-existent, and attachment, provisional attachment, or provisional disposition will become null and void. Provided that the above rule does not apply where the sanction for the creation of the right of mortgage has become null and void.

In the case of the preceding paragraph, persons having a right mentioned in paragraph 3 of article 4, or a creditor in attachment, provisional attach-

ment, or provisional disposition may claim damages against the owner of the railroad estate. Provided that the above rule does not apply to creditors who have made no declaration within the specified period of time, in respect to the things relative to which the public notification mentioned in article 8 has been given, nor to persons who, after the expiration of the specified period of time, have applied for registration, acquired rights *in rem* other than the right of ownership in respect to movables, or who have made attachment, provisional attachment or provisional disposition.

12.—Where the public notification mentioned in paragraph 2 of article 8 has become null and void, where the creation of a right of mortgage has not been sanctioned, or where such sanction has become null and void, the proper authorities shall forthwith issue a public notification in the *Official Gazette*.

13.—Where no application is made for the registration of the creation of a right of mortgage within two months from the time sanction was given for the creation of such right of mortgage, the sanction given will become null and void.

14.—A right of mortgage will become valid even prior to the right of claim coming to existence.

15.—Acquisition, loss or alteration of a right of mortgage, or transfer of a right of ownership of a railroad estate, cannot be set up against third parties unless registered.

16.—Where rights of mortgage have been created in respect to one and the same railroad estate in order to secure several claims, the ranks of such rights of mortgage will be determined by the priority of the registrations.

17.—A mortgagee may, in preference to other creditors, obtain satisfaction of his claim from the railroad estate.

18.—A mortgagee may exercise his right in respect to the whole of the railroad estate until his claim be fully satisfied.

19.—The right of mortgage can be exercised against monies or other things which are receivable by the company on account of the alienation (transfer), lending, extinguishment, or damage of the railroad estate or any things belonging thereto. Provided, however, that the mortgagee must effect attachment prior to the payment or delivery of such money or things.

20.—Where a company intends to alienate (transfer), lease or mortgage their railroad estate, to entrust (to others) the management of the business concerning the railroad estate, to alter the line, to suspend the business in respect to the whole or a portion of the line or to dispose of things belonging to the railroad estate, the mortgagee shall be notified that should he have any objection thereto, such objection shall be made within a fixed period of time. Provided that the period of time shall not be less than two months.

Where the mortgagee has raised objection within the period of time specified in the preceding paragraph, the company shall apply for the decision of the proper authorities. This decision is final and conclusive.

Where the mortgagee has his domicile in a foreign country the period of time specified in paragraph 1 shall not be less than four months.

The provisions of the article do not apply where the mortgagee has previously given his consent.

21.—Where a company has applied for sanction in regard to a change of the manner of the work relating to their railroad estate, should it be apprehended that such change will conspicuously reduce the value of the railroad estate, the proper authorities shall cause the company to notify the mortgagee that if he has any objection, it shall be stated.

The provisions of the preceding article are applicable *mutatis mutandis* to the case of the preceding paragraph.

22.—In the case of the railroad charter becoming null and void, or of its being cancelled, the mortgagee may exercise his rights.

Where a right of mortgage is to be executed in accordance with the provisions of the preceding paragraph, the mortgagee shall take steps within six months from the day on which the charter has become null and void or has been cancelled.

The charter is regarded as being existent during the period of time mentioned in the preceding paragraph and up to the conclusion of the execution of the right of mortgage.

23.—Where a creditor possesses, as security for one and the same right of claim, rights of mortgage over several railroad estates, should the proceeds of such several estates be distributable at one and the same time, the burden on account of the right of claim is to be divided in proportion to the respective value of each of such railroad estates.

Should the proceeds of only one of the railroad estates be distributable, the mortgagee may obtain satisfaction of the whole of his claim out of such proceeds. In such case, the mortgagee standing next in rank may exercise his right of mortgagee in substitution of the former mortgagee up to the limit of the amount which might have been paid to the former mortgagee out of the proceeds of other railroad estates in accordance with the provisions of the preceding paragraphs.

24.—In the case of a person who exercises the right of mortgage by virtue of a substitute according to the provisions of the preceding article, such substitute may be entered in the registration of the right of mortgage.

25.—A mortgagee may obtain satisfaction of his claim by other properties in so far only as he has not been satisfied with the proceeds of the railroad estate.

The provisions of the preceding paragraph do not apply where the proceeds of other properties are to be distributed prior to the distribution of the proceeds of the railroad estate. Provided, however, that other creditors may demand the amount of money (which is to be paid to the mortgagee) be deposited so as to cause the mortgagee to receive satisfaction of his claim in accordance with the provisions of the preceding paragraph.

26.—Where the Government has purchased the railroad and articles appertaining thereto, if a period of twenty years, or the years during which no repayment of the principal of the loan is to be made have elapsed, the mortgage can be paid off; provided at least one year's previous notice be given.

#### CHAPTER II.

##### REGISTRATION.

27.—The proper authorities will keep a Railroad Registration Book for making registrations in respect to railroad estates.

The Railroad Registration Book will be provided with a folio for each and every railroad estate.

28.—Registration is made upon the application of the parties concerned except in such cases where it is specially otherwise provided in this law.

29.—The following papers shall be annexed to applications for the registration of the creation of a right of mortgage :—

(1). Deed relative to the creation of the right of mortgage;

(2). Inventory of the railroad estate.

The parties concerned may refer the document mentioned in clause 2 of the preceding paragraph to the inventory of the railroad estate attached to the application for sanction to create the right of mortgage.

The document mentioned in clause 1 of paragraph 1 is not required to be affixed to an application for the registration of the creation of a junior right of mortgage.

30.—A registration of the creation of a right of mortgage is effected by making the following entries in the Railroad Registration Book :—

(1). Matters mentioned in Clauses 1 to 5, inclusive of paragraph 2 of article 7;

(2). Conditions upon which the railroad charter has been granted;

(3). That the right of mortgage has been created;

(4). Date of sanction of the creation of the right of mortgage;

(5). Date of registration.

The matters mentioned in clause 1 of paragraph 1 of article 7, and clause 2 of preceding paragraph are not required to be registered relative to a right of mortgage of a junior rank.

31.—Should any change occur in matters registered, or any of the registered matters cease to exist, the parties concerned shall, without delay, apply for the registration of such change or extinguishment.

In the document of application mentioned in the preceding paragraph shall be stated the cause of the change or extinguishment, and papers proving such fact shall be affixed to the application.

Where the change or extinguishment has been caused in accordance with an order or sanction of the proper authorities, the certificate mentioned in the preceding paragraph is not required to be affixed to the application.

32.—Where a right of mortgage has been created over several railroad estates in order to secure one and the same right of claim, all the other railroad estates shall be designated in the folio of each one of the railroad estates, and the fact that the latter forms the subject of the right of mortgage together with the former, shall be entered therein.

Should any change or extinguishment relative to other railroad estates necessitate alteration of the entries mentioned in the preceding paragraph, such alteration shall be entered; and should the registration of an extinguishment relative to other railroad estates require no entries such as mentioned in the preceding paragraph such entries shall be cancelled.

33.—When the creation of a right of mortgage has been registered in the Railroad Mortgage Registration Book, the entries in the inventory of the railroad estate acquire the same validity as the registration.

34.—Should any alteration have occurred in the matters entered in the inventory of a railroad estate, or should any of such matters have ceased to exist, the company shall send in a report to that effect without delay.

The report mentioned in the preceding paragraph will acquire the validity mentioned in the preceding article by being affixed to the inventory of the railroad estate.

35.—Should the whole of the registration of the right of mortgage made in one folio have been cancelled, such folio shall be closed by the proper authorities.

36.—In the following cases the proper authorities shall send notice thereof to the registration office having jurisdiction; provided, however, that in the case of clause 2 notice shall only be sent to the fresh registration office having jurisdiction :—

(1) Where the creation of a right of mortgage of the first order has been registered;

(2) When a fresh right regarding immovables has been added to the railroad estate;

(3) When the folio of a railroad estate has been closed.

In the case of clause 1 or 3 of the preceding paragraph, the proper authorities shall forthwith insert a public notification thereof in the *Official Gazette*.

37.—When a registration officer is in receipt of the notice mentioned in clause 1 or 2 of the preceding article, no registration of a right *in rem* other than right of ownership, nor of right of lease, or of attachment, provisional attachment or provisional disposition, can be made in respect to things belonging to the owner of the railroad estate until the notice mentioned in clause 3 has been received. Provided, however, that the above rule does not apply where it is clearly shown by a certificate of the proper authorities that the things forming the subject of the right *in rem* other than a right of ownership, of a right of lease, or of an attachment, provisional attachment or provisional disposition, do not belong to the railroad estate.

38.—Any person may apply for a perusal of the Railroad Mortgage Registration Book and the inventory of the railroad estate, or may, upon the payment of a fee, apply for the delivery of a copy or extract of the Railroad Mortgage Registration Book.

The forwarding of a copy or extract of the Railroad Mortgage Registration Book can be applied for by paying the postage in addition to the fee.

39.—The preparation of the Railroad Mortgage Registration Book, the form of the inventory of the railroad estate, and regulations relating to

the particulars of the registration are determined by the Minister of State concerned.

#### CHAPTER III.

##### COMPULSORY SALE BY AUCTION AND COMPULSORY ADMINISTRATION.

40.—The execution of a right of mortgage against a railroad estate is effected by way of either compulsory sale by auction or compulsory administration.

The mortgagee may, in the exercise of his own discretion, enforce execution by carrying out either one of the measures mentioned in the preceding paragraph, or both of such methods concurrently.

41.—A deed of mortgage, or a deed of trust and any agreement altering matters mentioned in such deed, are, in connection with execution, regarded as an executory title (*saimu meigi*) drawn up by a notary public, provided that the executory exemplification (*shikkō-ryoku aru seihon*) thereof be given by an official belonging to the proper authorities.

42.—With regard to execution, the Local Court having jurisdiction over the place where the company holding the railroad estate have their head office is exclusively competent.

43.—Application for execution shall be made in writing.

Applications shall contain the following matters, and shall be signed and sealed by the applicant or his representative :—

(1). The trade-names and the seats of the head-offices of the indebted company and of the company holding the railroad estate;

(2). Designation of the railroad estate which is to be sold by auction;

(3). Facts forming the cause of the auction

(4). Date;

(5). Court.

The application shall be accompanied by a copy of the Railroad Mortgage Registration Book in addition to the executory exemplification; provided that where a compulsory administration has already been commenced, no copy of the Railroad Mortgage Registration Book shall be required.

44.—Application for a compulsory sale by auction can be withdrawn until the hearing for the confirmation of the sale by auction only when the purchaser by auction gives consent thereto.

45.—The commencement of the auction proceedings is instituted by means of a rule (*ketter*).

The rule ordering the commencement of the proceedings shall contain the name and domicile of the applicant and the matters mentioned in clauses 1 to 4 of paragraph 2 of article 43, and shall be signed and sealed by the judge who has rendered the ruling.

46.—When the Court has ruled the commencement of the auction proceedings, the proper authorities shall forthwith be requested to register the application for auction in the Railroad Mortgage Registration Book.

Should the proper authorities have been requested as specified in the preceding paragraph, registration shall immediately be made, and the fact shall be notified to the Court.

47.—Where a Court has issued a rule ordering the commencement of auction proceedings, a public notification shall be inserted in the *Official Gazette* to the effect that the Government or public administrative authorities governing taxes and other public imposts shall, within a fixed period of time, send in a statement of the existence or non-existence of any right against the owner of the railroad estate, and of the limits of such right.

48.—The Court shall, upon hearing the opinion of the proper Government authorities, appoint an expert and order him to estimate the value of the railroad estate which is to be put up to auction; and the value thus estimated shall be made the lowest (reserve) price of the sale by auction.

49.—The Court shall fix a time for the auction, and a public notification thereof shall be inserted in the *Official Gazette*.

The public notification specified in the preceding paragraph shall contain the following :—

(1) Designation of the railroad estate to be put to auction;

(2) Place and time of auction, and the time at which the tenders are to be closed;

(3) The lowest reserve price of the sale by auction;

(4) Place and time for adjudication;

(5) Place where the execution records can be perused.

50.—Where persons who are not engaged in the railroad business intend to bid, seven or more persons intending promoting the formation of a company having for its object the acquiring of the business of the railroad which is to be put up to auction must combine together.

Persons bidding in accordance with the provisions of the preceding paragraph are jointly and severally responsible in relation to the bidding.

51.—Persons bidding in accordance with the provisions of paragraph 1 of the preceding article shall make a deposit either in cash or by valuable securities, of an amount corresponding to five hundredths (5%) of the lowest (reserve) price of the sale by auction, as security, at the time of bidding. Where the mortgagee is among the bidders, the provisions of the preceding paragraph do not apply so far only as the amount of his claim corresponds to upwards of five hundredths of the lowest reserve price of the sale by auction.

52.—Auction is carried out by tenders.

53.—The court shall open the sealed tenders in the presence of the bidders.

Should there be upwards of two tenders of the same value regarding which adjudication is to be made, the court shall order such bidders to make fresh tenders forthwith.

If, even after the fresh tenders, there are still bids of the same value, the court shall forthwith determine the highest bidder by means of drawing lots.

54.—Tenders which have been made by persons who may not participate in the bidding are null and void.

55.—Where, at the time of auction, no tenders are made, no admissible tenders are made, or no tenders reaching the lowest (reserve) price of the sale by auction, the court shall, *ex officio*, appoint a fresh time for the auction.

In the case of the preceding paragraph the court may, upon hearing the opinion of an expert, reduce the lowest price of the sale by auction.

56.—No tenders can be either altered or cancelled.

Tenders will become null and void in cases where a rule ordering adjudication to a person other than the bidders who have made such tenders has become final and conclusive, where a rule refusing adjudication has become final and conclusive, or where the auction proceedings have been closed without making adjudication.

57.—The court shall designate the name of the bidder offering the highest price and the value of his bid, and notify the conclusion of the auction.

58.—The court shall draw up a protocol concerning the auction which shall include the following details:—

(1). Designation of the railroad estate which has been put to the auction;

(2). Designation of the applicant for the auction;

(3). Times of making and opening tenders;

(4). The amounts of all the bids, and the names and domiciles of the bidders, or the fact that no tenders were made; the fact that no tenders were made; or no tenders reaching the lowest (reserve) price of the sale by auction, and that the steps mentioned in paragraphs 2 and 3 of article 53 have been taken;

(5). The time at which the conclusion of the auction has been notified, the name of the bidder offering the highest price, and the amount of his bid.

59.—The court shall cause the debtor, the owner of the railroad estate, the mortgagee, and the bidder, to make statements relative to the adjudication.

60.—The debtor, the owner of the railroad estate, the mortgagee, or the bidder, may raise objection in respect to the adjudication only where the application for the compulsory sale by auction has been withdrawn, or the execution

has been cancelled, or where the auction has been carried out in violation of the provisions of articles 48 to 54 or article 57.

61.—Where an objection is considered proper, if a fresh auction is to be admitted, the court shall, *ex officio*, fix a time for the auction.

With the exception of the case where a time for auction is fixed in accordance with the provisions of the preceding paragraph, the confirmation or refusal of the adjudication shall be pronounced by a rule.

62.—Persons who have raised objections in respect to the adjudication may enter an immediate protest against the rule ordering adjudication only where there is the ground mentioned in article 60.

Persons who have appeared at the time of adjudication but not raised any objection in respect to the adjudication may enter an immediate protest against the rule refusing adjudication only where there is no ground for refusing the adjudication.

The protest has the force of suspending the execution.

63.—The court shall draw up a protocol concerning adjudication.

64.—Should the rule granting adjudication have become final and conclusive, the court shall forward to the proper authorities a copy of the rule.

65.—The purchase money in regard to the auction shall be paid to the court within one week from the day on which the rule granting adjudication has become final and conclusive, or with regard to the persons who are required to obtain a formal charter, from the day on which such formal charter has been obtained. Provided that in the case of the creditor being the successful bidder, he may deduct the amount of money he is to receive out of the purchase money, and it suffices for him to pay only the balance.

66.—When the purchase money has been paid the right concerning the railroad estate put up to the auction is conveyed to the successful bidders, or, if the successful bidders have participated in the auction in accordance with paragraph 1 of article 50, to the company promoted by such bidders.

The right of mortgage will cease to exist when the right concerning the railroad estate is conveyed in accordance with the provisions of the preceding paragraph.

67.—Where a formal charter is not granted, or where no application is made for a formal charter within the period of time specified in article 73, or where the purchase money is not paid within the period of time specified in article 65, the court shall, *ex officio*, cancel the rule granting adjudication and fix a fresh time for auction.

Where the rule granting adjudication has been cancelled in accordance with the preceding paragraph, the formal charter is regarded as cancelled.

The bidder to whom adjudication is made may not participate in the fresh auction, and he is liable to make compensation for the shortage (if the purchase money in the fresh auction is less than original purchase money) and costs of the proceeding.

68.—The court shall deduct in turn the costs of the proceedings, taxes, and other public imposts out of the purchase money in the auction; the balance remaining being distributed among the mortgagees according to the rank of the respective rights of mortgage. Any further balance shall be delivered to the owner of the railroad estate.

In the case of the preceding paragraph, the court shall notify the Government authorities concerned of the fact, and request them to cancel the registration of the application for auction.

Should the Government authorities concerned receive the request mentioned in the preceding paragraph, they shall take the following steps:—

(1) To cancel the registration made in accordance with paragraph 2 of article 46 and the registration of the right of mortgage.

(2) To notify the registration office having jurisdiction of the fact that a rule granting adjudication has been rendered, and request them to register the right concerning immovables acquired by the successful bidders or a

company promoted by such successful bidders, and to cancel the registration which has become null and void in accordance with paragraph 2 of article 11.

69.—Where an auction proceeding has been closed without making adjudication, the court shall notify the proper government authorities thereof, and request them to cancel the registration of the application for auction.

Should the proper authorities be in receipt of the request mentioned in the preceding paragraph, the registration made in accordance with paragraph 2 of article 46 shall be cancelled.

70.—Where, even after the time for auction has been opened twice or more, there are no tenders, or no admissible tenders, or no tenders which reach the lowest (reserve) price for the sale, the court may put up each separate individual property belonging to the railroad estate which was put up to auction only where the consent of the mortgagee has been obtained.

In the case of the preceding paragraph the court may, upon hearing the mortgagee, make partition of the things belonging to the railroad estate and put such divided things up to auction.

71.—With regard to the auction mentioned in the preceding article, the provisions of articles 48, 49, 52 to 56, paragraphs 1 and 3 of article 67 and articles 68 and 69 apply *mutatis mutandis*.

A bidder shall, at the same time of his bidding, deposit the amount of money corresponding to five hundredths (5 per cent.) of the lowest (reserve) price of the sale either in cash or by valuable securities.

72.—The successful bidders who have participated in the auction in accordance with paragraph 1 of article 50 shall become promoters and form a company.

73.—The company promoted by the successful bidders, or the company who are the successful bidders, shall apply for a formal charter within three months from the day on which adjudication has become final and conclusive.

74.—Where the company promoted by the successful bidders apply for a formal charter the following papers shall be attached to the application:—

(8) Articles of association;

(2). Where the promoters have undertaken the whole of the shares, a copy of the report returned by the inspector to the court, and a copy of the rule rendered by the court upon hearing the report of the inspector;

(3). Where subscriptions for shares are invited, a copy of the instruments of subscription, the gist of the report rendered by the promoters, directors, auditors or inspectors, at the general meeting for organisation, and the gist of the transactions at the general meeting for organisation, and of resolutions passed.

75.—In the case of a company who are the successful bidders applying for a formal charter, it shall be done in accordance with a resolution passed in the same manner as in the case of alteration of articles of association.

Application for a formal charter shall be made at the same time with application for sanction of a resolution altering articles of association.

76.—When an application is made according to the preceding three articles the proper authorities shall issue a formal charter.

77.—A formal charter will become valid when the purchase-money in auction has been paid by the company.

When the formal charter has become valid, the company succeed to the rights and obligations appertaining to the original charter.

78.—With regard to the compulsory administration, the provisions of article 43 and articles 45 to 47 apply *mutatis mutandis*.

79.—When a rule ordering the commencement of a compulsory administration has become final and conclusive, the court shall forward a copy of the rule to the proper authorities.

80.—Should a copy of the rule mentioned in the preceding article have been received, the proper authorities shall appoint one or more administrators; provided that the applicant for the compulsory administrators may recommend suitable persons.

A commercial company may become administrators.

81.—The proper authorities shall supervise the administrators, give instructions in regard to the manner of administration and fix the amount of remuneration to be given to the administrators.

With regard to the matters mentioned in the preceding paragraph, the proper authorities may hear the opinion of the debtor, the owner of the railroad estate, the mortgagee and experts.

The proper authorities may order security to be deposited by an administrator, or revoke the appointment of an administrator.

82.—When the proper authorities have either appointed or revoked the appointment of an administrator, the fact shall be notified to the debtor, the owner of the railroad estate, the mortgagee and the court.

83.—When the owner of the railroad estate has been notified of the appointment of an administrator, the railroad estate shall forthwith be delivered to the administrator.

The administrator may demand of the owner of the railroad estate the delivery of papers and other things necessary for the administration.

Should the owner of the railroad estate have not effected the delivery mentioned in the preceding two paragraphs, the court shall, upon application of the administrator, order a bailiff to effect such delivery.

84.—The applicant for a compulsory administration shall, upon the demand of the administrator, disburse the expenses of the administration.

85.—An administrator shall perform all acts of legal procedure or otherwise necessary for the administration or the raising profits of the railroad estate.

86.—An administrator has the responsibility of a director *vis-a-vis* the Government authorities in regard to the administration of the railroad estate.

87.—The administrator shall, at the end of each business year, deduct from the revenue in turn the expenses of the administration, remuneration of the administrator, taxes and other public imposts, the balance remaining being paid to the mortgagee.

88.—The administrator shall hand in a report of the accounts to the proper authorities at the end of each business year.

The proper authorities shall forward to the debtor, owner of the railroad estate, and the mortgagee, a copy of the report of the accounts mentioned in the preceding paragraph, and demand of them that should they have any objection thereto, such objection shall be declared within a fixed period of time.

Persons who have not sent in any objections within the period of time specified in the preceding paragraph are regarded to have admitted the accounts.

Should any one lodge an objection, the proper authorities will decide it after hearing the administrator; this decision is final and conclusive.

89.—The administrator may not deliver the amount to be distributed to the mortgagee unless the period of time mentioned in paragraph 2 of the preceding article has elapsed, or until after the decision mentioned in paragraph 4 of the preceding article has been given.

When the administrator has delivered the amount which is to be distributed, the name of the mortgagee and the amount distributed to him shall be notified to the proper authorities and the court.

90.—The cancellation of a compulsory administration is made by a rule of a court.

When the mortgagee who has applied for a compulsory administration has obtained satisfaction of his claim, the court shall order the cancellation of the compulsory administration.

In a case where the applicant for the compulsory administration fails to make disbursement of the expenses of the administration the court may, upon application of the administrator, order the cancellation of the compulsory administration.

91.—With regard to the case of paragraph 2 of the preceding article, the provisions of paragraphs 2 and 3 of article 68 apply *mutatis mutandis*.

With the exception of the case of the preceding paragraph, the provisions of article 69 apply *mutatis mutandis* to the cancellation of a compulsory administration.

#### CHAPTER IV. PENAL PROVISIONS.

92.—In the following cases, a director or an administrator is dealt with by the imposition of a fine of not less than *yen* 10 and not exceeding *yen* 1000:—

(1). Where the decisions specified in this law are not duly observed;

(2). Where the provisions of article 9 are infringed;

(3). Where the notices mentioned in articles 20 or 21 are not given;

(4). Where fraudulent application is made in regard to registrations, or where no application is made for the registration mentioned in article 31, or where fraudulent entries are made in the inventory of a railroad estate;

(5). Where the report mentioned in article 34 is not rendered, or a fraudulent report is rendered;

(6). Where the order of the proper authorities regarding the manner of the administration is infringed;

(7). Where no report of the account mentioned in article 88 is handed in, or where a fraudulent report is made;

(8). Where the amount to be distributed is not delivered, or where the amount to be distributed is delivered in violation of the provisions of article 87 or paragraph 1 of article 89;

(9). Where the notice mentioned in paragraph 2 of article 89 is not made.

93.—The provisions of articles 206 to 208 of the Law of Procedure relating to non-contentious matters apply *mutatis mutandis* to the fine specified in the preceding paragraph.

#### SUPPLEMENTARY PROVISIONS.

The day on which this Law will become operative shall be determined by Imperial Ordinance.

#### NEWS OF THE WEEK.

At 11 p.m. on Feb. 28th, a severe shock of earthquake was felt at Sabae.

A telegram from Ujina reports that 325 Russian prisoners are expected to arrive there from the front.

The Doko-kwai, a political party, held a general meeting on Feb. 28th in the tea-house Kwagetsu, Tokyo, and decided to wind up.

During twelve months ended February, the gold output from mines throughout the Empire and Formosa was estimated at twelve million *yen*.

Five Russians crippled with wounds have been released at Matsuyama. They embarked by the French mail steamer *Caledonien* from Kobe for home.

The British steamer *Bengloe*, which has just arrived from Shanghai, reports that her former commander, Capt. H. W. Bee, was left in Shanghai suffering from a serious attack of small-pox. Capt. Bee has the sympathy of a large circle of friends, who hope for his speedy recovery. He is well-known in Yokohama, having been on the N.Y.K. Shanghai run, during the past year. The ship is now under the command of Capt. Watson, formerly chief officer.

During January, the export of raw silk from Yokohama was as follows:—

	Quantity. Kin.	Value. Yen.
Hoso.....	42,529	427,039
Futo.....	481,289	4,783,485
Re-reels.....	73,262	690,629
Sundries.....	26,565	242,059
Noshi.....	249,264	293,992
Kibiso.....	506,926	496,450

COMPARISON WITH EXPORT IN JANUARY, 1904.

	Quantity. Kin.	Value. Yen.
Decrease.....	775,451	1,270,150
do.....	758,144	127,401
Increase.....	223,923	73,245
do.....	73,245	

#### CORRESPONDENCE.

##### "THE TRUCE OF THE BEAR."

(TO THE EDITOR OF THE "JAPAN MAIL")

SIR,—I am proud to acknowledge the apparent existence of a brain-wave between my humble self and the talented Editor of the *Japan Daily Mail*.

I must have taken down my cherished volume of R. Kipling's poems, about the same time that he (the Editor) did, and, for the same reason.

The Japanese are victors—as yet! But if they copy the usual ways and manners of the too-magnanimous British and love and cherish their vanquished foe—then—suddenly—they will find that they are no longer victors!

"When he shows as seeking quarter with paws like hands in prayer."

"That is the time of peril—the time of the Truce of the Bear!"

Will no foreigner—a good Japanese scholar—attempt the translation (in verse) of Kipling's poem in order that the Japanese may read, mark and learn the prophetic warning for themselves?

I know an Englishman living on the Bluff, Yokohama, who *could* do it well; but alas! "it's too much for him!" While I, who certainly *would*—cannot! What offers?

Faithfully yours,

GERTRUDE A. S. DAVIS-ALLEN

Bluff, Yokohama, Feb. 25th, 1905.

P. S.—It is interesting—just now—to read Seton-Merriman's novel "The Vultures."

##### "THE SLEEPING BEAUTY."

(TO THE EDITOR OF THE "JAPAN MAIL")

SIR,—In asking you to be good enough to publish the Accounts of "The Sleeping Beauty" performances I should also be glad if you would allow me space to correct the impression that the play was put on for the benefit of the Red Cross Society. This is not so; we advertised that the *Net Proceeds* would be given to the Society, in other words, after paying expenses, any surplus would be handed over to them, but the play has not been produced on a charity basis. We have to acknowledge the kindness of the Yokohama newspapers, all of which have made a reduction in their advertising rates, otherwise no concessions in price whatever have been made or asked for on the plea of charity.

My very heartiest thanks are due to all those who have given time and trouble and helped in so many different ways to make "The Sleeping Beauty" a success.

I remain, Dear Sir, Yours, truly,

WINIFRED DINSDALE.

#### "SLEEPING BEAUTY" ENTERTAINMENT ACCOUNT.

RECEIPTS.

Examined and found correct.

C. B. STEDMAN.

#### THE BALTIC FLEET.

(TO THE EDITOR OF THE "JAPAN MAIL")

SIR,—Your statements in to-day's paper regarding the "Baltic fleet" are inexact and too openly malevolent to be allowed to pass without protest.

They are not more dictated by love of concord than they were when you wrote on Spain or Germany.

It is very easy to say that without France the Baltic fleet never could have come to the Far East, but I think you would find it more difficult to prove.

In fact, between the 42 steamers captured by the Japanese Navy since the outbreak of this war, a very few were French!

Enclosing my card, I beg to remain, Dear Sir, yours faithfully,

Yokohama, February 28th.

FRENCH.

## TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

## THE NORTH SEA COMMISSION.

London, February 23.

The North Sea Commission has completed its enquiry and the report will probably be published on Saturday.

## MASSACRES AT BAKU.

A laconic Baku telegram states that all the offices there are closed and the streets are filled with corpses.

## SUPPLIES FOR THE BALTIC FLEET.

A French steamer has landed a quantity of stores and dynamite for the Russian warships, principally at Jibouti and Diego Suarez.

## PEACE REPORTS.

Japanese bonds rose  $1\frac{1}{4}$  upon the publication of peace reports.

It appears certain that Russia has not actually proposed terms, but yesterday's telegram is regarded as reflecting the views of an increasingly influential peace party in Russia.

Baron Suyematsu pronounces the terms preposterous and says they would leave Russia the gainer.

## THE NORTH SEA COMMISSION'S FINDING.

A VICTORY FOR RUSSIA.

London, February 24.

The papers are surprised and disappointed at the finding of the North Sea Commission, which does not discuss the question of the presence or absence of torpedo-boats, but declares that Admiral Rojdestvensky might legitimately have believed that his squadron was in danger. He was entitled, in the circumstances, to act as he did. The finding takes note of Russia's undertaking to indemnify the victims. The press describes the finding as a diplomatic victory for Russia.

## POLAND ISOLATED.

Owing to the railway strikes Poland has been cut off from Germany and Austria. The terminus of the railway from Vienna in Warsaw has been occupied by troops.

## FRENCH NEW NAVAL PROGRAMME.

The French Minister of Marine has announced in the Chamber of Deputies a proposed new naval programme including the construction of 24 large warships involving an annual expenditure of  $4\frac{3}{4}$  millions sterling till 1917. Two bases could be established in Indo-China, and a second dock at Saigon was essential.

## MUCH BLOODSHED IN THE CAUCASUS.

Later.

Alarming reports of the condition in the Caucasus, especially at Batoum and Baku, have reached St. Petersburg. Communication is severed. No details have been received, but the reports agree that there has been much bloodshed.

## THE DISTURBED CAUCASUS.

London, February 24.

It is reported at Constantinople that the situation at Batoum and Poti (Black Sea ports) is so serious that a portion of the Black Sea Fleet has bombarded the Poti strikers, all of whom are Georgians, their number being forty thousand.

## SPREAD OF THE RUSSIAN STRIKES.

The railway strike is spreading widely. Fresh strikes are constantly occurring in all parts of Russia.

## SIMPLON TUNNEL COMPLETED.

London, February 25.

The Simplon Tunnel was pierced yesterday, being the completion of six years' work.

## POLAND'S ISOLATION.

Communication between St. Petersburg and Warsaw is now interrupted by the strike. The latter city, which is seething with every dangerous element, is thus completely isolated. The local police force is now threatening to strike. Troops occupy the gas-works.

## A DESPERATE BATTLE.

London, February 26.

Despatches received in St. Petersburg state that the Japanese attack on Berneseff Hill on the night of the 23rd February was repulsed. The Japanese renewed the attack yesterday, when the Russians were forced to retire. A desperate battle is proceeding along the whole front. The result is as yet undecided.

## A BRIDGE BLOWN UP.

General Sakharoff reports that the railway bridge in the vicinity of Haicheng has been blown-up, causing an interruption in the Japanese line of communications.

## SIBERIAN DISCONTENT.

St. Petersburg press dispatches state that the whole of the eastern districts of Siberia are now in a like condition to the Caucasus, which virtually (vitality?) affects Russia.

## NEW TIBETAN MINISTER.

Tong Shaoji, the Tibetan commissioner, has been appointed Minister to London.

## THE THIRD BALTIC SQUADRON.

Later.

The Third Baltic squadron has passed the Straits of Dover.

## "THE FROSTY CAUCASUS."

The whole of the Caucasus is in a state of anarchy. There appears to be a general strike movement of a semi-revolutionary character which is directed by a secret committee in St. Petersburg, and this is supplemented by ferocious racial feuds which are producing horrible atrocities.

## RUSSIAN RAILWAY STRIKES.

London, February 27.

A workman on the railway has been shot at Tchita, on the Siberian Railway.

The strikers demand the cessation of the War.

## A NATIONAL ASSEMBLY TO BE CONVOKED.

The Czar has directed steps to be taken with a view to summoning a representative assembly and to draft a constitution giving large measures of representative government.

A meeting of Ministers is discussing the steps to be taken to give the Czar's decision practical force.

## ROYAL VISIT TO INDIA.

It is officially announced that the Prince and Princess of Wales will visit India in November.

## RUSSIAN TROOPS DELAYED.

London, February 28.

The *Times*' St. Petersburg correspondent says that the transport of troops for the front has been greatly delayed all the winter. None of the re-inforcements despatched in December will reach Kuropatkin before April.

## THE LAST BATTLE.

Later.

Accounts of the fighting in Manchuria are of the most meagre description. They simply show another undecided position. The news from Russian sources indicates

that there was an engagement at Vereseneff, which was the beginning of a great battle forming part of the general Japanese movement against the Russian left flank.

Vereseneff is one of the strongest of several fortified heights of the Thinhocheng position; situated on the south slope of the Tailing range, 18 miles S. W. of Shinking and barring the way of the passes leading to Fushun, where Kuropatkin has his centre.

## RUSSIAN INTERNAL AFFAIRS.

Reuter's agent in St. Petersburg telegraphs that to ensure the railway service, the Government ordered all the railwaymen in the empire to be treated as strictly subject to martial law.

Reuter's Warsaw correspondent wires that every policeman is now accompanied by a soldier and that authorities fear a police strike.

## TO VIEW THE WAR.

Prince Frederick Leopold of Prussia has started for the Far East via Genoa.

## MORE RUSSIAN CHARGES.

London, March 1.

Russia, in a circular note to the Powers, declares that the Japanese have violated Chinese neutrality by appearing in the rear of the Russian Army at the west of the railway.

## THE TROUBLES IN POLAND.

Reuter's agent in Warsaw telegraphs that the peasants in Poland, incited by the Socialists, are joining the strike movement. This is a most serious development of the situation as seven-tenths of the population are peasants.

## JAPANESE CAPTURE TAILING.

London, March 2.

The Japanese have captured the Tailing Pass which has the same important bearing in relation to Mukden as the Motienling had to Liaoyang.

## THE OFFICERS OF THE "LENA."

It is stated in St. Petersburg that the officers of the Russian converted cruiser *Lena* (dismantled at San Francisco) have been ordered to return to San Francisco. They have been reduced a step in rank.

## SIR EWEN CAMERON RESIGNS.

Later.

Sir Ewen Cameron has resigned from the London management of the Hongkong and Shanghai Banking Corporation.

## STOESSEL A POPULAR HERO.

General Stoessel is the popular hero of the hour at Moscow. His hotel is besieged by crowds. He lunched with the Grand-duchess Sergius yesterday. Afterwards, replying to an address of welcome from a municipal deputation, he declared that it was his duty to surrender Port Arthur to avoid a massacre as the Japanese had captured all the important forts. General Stoessel started in the evening for St. Petersburg.

## THE ANGLO-JAPANESE ALLIANCE.

Sir Edward Grey, one of the prominent leaders of the Liberal party, speaking at Cheltenham, said that the successors of the present British Government would carry out all the obligations of the Japanese alliance.

## MARTIAL LAW IN POLAND.

Later.

Martial law has been proclaimed throughout Poland.

## FIGHTING ON THE SHAHO.

Russian and Japanese telegrams report sharp fighting in the vicinity of the Shaho railway bridge. Both sides claim the advantage.

## THE SHAHO DISTRICT.

(Received at the Military Head Quarters on the afternoon of the 23rd February.)

On the afternoon of the 22nd our positions were occasionally bombarded by the enemy's artillery from the north-east of Shahotun, from the east of Sufangtai and from Wangkiakukiatz (about 2½ miles north of Sanglantsz).

On the same day at about 4 p.m. 15 of the enemy's scouts, wearing Chinese costume, approached from Nienyupao to within about 500 metres of Tutaitz, on the north, and were driven back by our troops. The enemy had 6 casualties (including one officer). We did not suffer.

At about 8 p.m. a detachment of the enemy's scouts approached on the south of Hwangchli, and at the same time about a company of his infantry came to within some 200 metres of Paotszyin (some 5 miles westward of Linshingpau) but, being fired upon by our men, retired.

Last night at about 1 a.m., the enemy's heavy guns at Paohsiangtun (about 2½ miles north-west of Litajentun) cannonaded the east of Yapatai.

(Received at the Military Head Quarters on the afternoon of the 24th February.)

At about 9 a.m. on the 24th instant the enemy set fire to Tsen-sungmupautsz (about 1¼ miles eastward of Waitaushan) and retired to Kukiatai (about 1¼ miles eastward of Tsen-sungmupautsz).

At midnight last night (23rd-24th) about a company of the enemy's infantry approached Mamachieh (about 5 miles west of Yangkiawopeng) but they were repulsed.

This (24th) forenoon a party of the enemy, apparently an officer's reconnaissance, approached Tutaitz on the north. They were driven back with a loss of two men.

This afternoon (24th) the enemy's heavy guns bombarded Litajentun from Paohsiangtun, and his field-pieces at Rhtaitz cannonaded Chenchiehpaui.

(Received at the Military Head Quarters on the 25th February.)

On the night of the 24th about a battalion of the enemy attacked Houkiatun (about 1¼ miles north-west of Waitaushan), and a force of uncertain strength attacked the hills at Tungkiasen (about 4 miles north-west of Waitaushan) but both were repulsed.

(Received at the Military Head Quarters on the afternoon of the 26th February.)

About 24 guns of the enemy's bombarded Tungkiasen from Liuhsingtatsz (about 2½ miles north of Titishan).

[Titishan is on the left of Kuroki's Army.—Ed. / J.]

Yesterday (25th) a company of the enemy attacked from the east of the main-road but was repulsed.

The enemy's artillery at Wanpaoshan cannonaded Yaotun and his guns at Hanchingpau fired upon Lamutun and the railway bridge. To-day the weather is bad, being stormy and wet.

(Received at the Military Head Quarters on the afternoon of the 27th February.)

Eastward of the main road the enemy's artillery occasionally fired on our positions from Wanpaoshan, Shahopan and Sufangtai. Also about a company of his infantry in front of Lamutun opened a disorderly fire from its position.

Westward of the main road during the night of the 26th February one or two companies of the enemy attacked Wankiyuan-tsz, Paotszyen, Yapapatai and Hsiaoshatsz but were repulsed.

The enemy at Heilitun (about 2½ miles

north-east of Litajentun) and at Kinshantai (about 1¼ miles west of Litajentun) has begun again to entrench. His infantry in the vicinity of Pehtaitz and Hsiaoshutsz (about 2½ miles west of Pehtaitz) constantly fire in a random manner. His artillery also occasionally bombarded Chenchiehpaui.

(Received at the Military Head Quarters on the afternoon of the 28th February.)

To-day from 4 a.m. the enemy opened fire from Tungkaushan and the height northward of Tangkiatun but we did not reply.

On the night of the 27th, the enemy's field-guns at Sufangtai and his heavy guns at Wenshingpau concentrated their fire on our outposts near the railway bridge, and at about 11 p.m. some 5 companies of his infantry advancing along both sides of the railway, made an enveloping attack. A part of his force charged into our trenches and a violent hand-to-hand fight took place. Our outpost resisted stubbornly, and at 3 a.m. this attack was completely repulsed. The enemy left some 50 or 60 dead, and we took some prisoners and spoils.

Also at Wenkiyuan-tsz, Sankiatz and Yapatai the enemy made attacks with one or two companies at each place, but all were repulsed.

(Received at the Military Head Quarters, Feb. 25th.)

## BATTLE OF CHINGHOCHING.

From the 19th to the 22nd of February a force of our troops occupied Weitszku, Kintuku and a place on the left bank of the Taitz, pushing close to the enemy. On the 23rd we attacked the enemy near Chinghoching (about 30 miles east of Penhsihu). From the morning of this day heavy snow fell, and objects could not be distinguished. In addition to the ground being precipitous, the ice on the Taitz was beginning to melt and the movements of the troops were greatly impeded. But at noon our leading line got within from 500 metres to 1,000 metres of the enemy and opened a fierce attack. The enemy had not only the advantage of a steep position but also had devoted months to fortifying strongly in several lines, and he showed his usual obstinacy in defence. The position could not be easily taken and the attack had to be continued from dawn on the 24th. At about 10 a.m. on that day our troops came to close quarters and hand-grenades were used. The enemy resisted desperately but the brave determination of our men attacking in front and the fury of our flank attack proved too much for him and at 6 p.m. we occupied the place.

The enemy who opposed us had about 16 battalions and some 20 guns. He abandoned Chinghoching and retreated northward in confusion. He left about 150 dead and lost 24 prisoners. We took 3 machine guns, some 200 rifles, and about 100,000 rounds of small arm ammunition. The Chinese say that the enemy carried away about 1,000 killed and wounded. His loss seems to have been heavy. We had no men whatever frost-bitten.

(Received by the *Asahi Shimbun* from its Correspondent at the front (Mr. Ikeda) and sent across the Hanchang military wires on the 27th February.)

The enemy held a semi-permanently fortified position from the south of Tsinghoching to the east of Hsiaotientsz. On the 23rd of February the left wing of \* \* \* Army attacked this position from the south-west and the right wing from the east. By 1 p.m. the enemy had been driven north, and his position captured. His force numbered 17,000 and he had 2,000 killed and wounded. Our casualties were small.

(From \* \* \* correspondent, 26th February.)

On the 23rd at a place from 30 to 32 miles north of Samachi we came into collision with a body of the enemy, and after a fight captured his strong position at Tsinghoching.

(Received at the Military Head Quarters on the 2nd inst.)

## CHINGHOCHING DISTRICT.

Since the capture of Chinghoching our troops in the Kingking district are driving the enemy northward.

The spoils taken by us at Chinghoching were 300 *koku* of beans, 50 bean cakes, about 50 *koku* of millet and 10 *koku* of coarse salt.

## PENHSIHU DISTRICT.

Our troops in the Penhsihu district are gradually driving the enemy from Tsen-Sukiahatsz (about 10 miles north-east of Penhsihu), Pengyenling (about 6 miles north-west of Tsen-Sukiahatsz) and from Pajilchi (about 4 miles west of Tsengyenling), and are pushing him to the north.

## SHAHO DISTRICT.

In the Shaho direction our troops have occupied Sungmupautsz and Yaochienlutun. The enemy had a large number of field-pieces, and heavy guns in position on the east and west of the railway, from whence he bombarded us.

(RECEIVED AT THE FOREIGN OFFICE.)

## RUSSIAN WARSHIPS.

A Lloyd's telegram says:—One Russian battle-ship and 4 cruisers passed the Straits of Dover steering westward on the morning of the 25th.

## THE WARSAW STRIKES.

Reuter telegraphs from Warsaw on the 24th:—The strike has spread to all the Warsaw section of the St. Petersburg-Warsaw Railway.

A telegram from Warsaw to St. Petersburg says:—The strike is general along the Warsaw and Brest-Litovsk line. The telegraph office and its neighbourhood in Warsaw have been wrecked.

The men are on strike on all the Saratoff lines. Also, the employees on the Moscow-Kazan railway have struck.

## CHINESE OFFICIALS.

Wei Kwangtau, Viceroy of Min-che, retires from office. The former Governor of Shensi, Yun Sung, who was recently appointed President of the Board of Finance, succeeds him. Pending Yun's arrival at his new post, General Sung is to discharge the Viceregal duties. These things were announced by Imperial Proclamation on the 24th of February.

## THE RUSSIAN STRIKES.

A Wolff's telegram from Chita (a town on the Siberian Railway east of Lake Baikal) says:—

The workmen in the workshops attached to the Railway have struck. Their principal demand is that the war must cease. They are suspected of intending to wreck the railway and the locomotives and a strong military guard has consequently been posted at the station.

The service of trains has ceased for some days back between Moscow and Warsaw and other localities. Military trains, however, are passing, it is said.

A Reuter's telegram says that the demands of the employees on the Warsaw-Wilna Railway having been granted in full, the service of trains was recommenced on the 25th of February. The service on the Moscow-Kieff line was resumed on the 24th.

The Times correspondent in St. Peters-

burg, telegraphing on the 26th of February, says that a sense of the necessity of transporting reinforcements to Manchuria has induced the Russian Government to accede to the demands of the strikers on the railways as an urgency measure. On the one hand the Government has made these concessions; on the other, it has applied martial law to all the lines, and the workmen are all under military rules now.

#### THE THIRD SQUADRON.

A Lloyd's telegram says that 4 Russian war-ships and 3 transports passed Start Point on the 26th of March.

#### FROM GENERAL KUROPATKIN.

General Kuropatkin reports:—On the 25th of February at 5 a.m. the Japanese occupied Chinkcheung (evidently the "Tsinghoching" of the *Asahi's* report). Our losses on the 24th are not clearly ascertained but the wounded now in the Sanlungyu field hospital number 12 officers and about 300 men. The ratio of killed was very large.

On the morning of the 25th a battalion of the enemy's infantry advanced towards the Papiling Pass, which is about 8 versts south-west of Sanlungyu. On the evening of that day his van drew near to the Pass which was held by us.

#### THE BALTIC COMMISSION.

The Commission connected with the North-Sea affair came to a decision on the 25th of February and issued a report of which the following is the gist:—

1. Considering that a state of war existed and that in his capacity as commanding officer Admiral Rojestvensky was in a position where he had no resource except to pay attention to the warnings reaching him from various quarters, it was not extravagant on his part to order his subordinate officers to make preparations for opening fire.
2. The British fishing vessels were showing all the regulation lights and were engaged in carrying on their business of fishing in accordance with the regular rules.
3. No report of any danger was made to the Main Squadron of Admiral Rojestvensky's Fleet by the Detached Squadron which had been sent ahead.
4. Admiral Rojestvensky must bear the responsibility of his conduct in opening fire and of the results to the fishing boats.
5. The fishing boats did not make any hostile demonstration nor was there any evidence of the presence of torpedo-boats. The opening of fire was improper.
6. The period of firing was needlessly long. But we consider it established that Admiral Rojestvensky did everything in his power to prevent the firing upon vessels recognised to be fishing boats.
7. It being clear that his ships were not in any danger such as required him to decide that nothing could be done except to continue his original course, this Commission thinks it regrettable that Admiral Rojestvensky, when passing Calais, did not report to a neighbouring country the necessity of succouring the fishing boats which had been fired on.
8. In making this report the Commission clearly affirms that it has no intention of reflecting on the courage or morale of the Russian Admiral and his Fleet.

(Received at the Naval Head Quarters.)

#### FURTHER PRIZES.

On the 24th instant a Japanese war-ship captured the German steamer *Severus* (3,307 tons) bound for Vladivostock with a cargo of 3,900 tons of Cardiff coal.

The German steamer *Romulus* (2,640 tons), laden with 3,500 tons of Cardiff coal for Vladivostock, was seized by a Japanese war-ship on the 25th instant.

(RECEIVED IN TOKYO.)

#### THE THIRD SQUADRON.

According to news reaching a trustworthy quarter, the Third Pacific Squadron of Russia passed the Straits of Dover on the 25th of February at 9 a.m.

#### LITERARY GOSSIP.

We are glad to see that Messrs. Kelly & Walsh have received a fresh supply of Mr. Putnam Weale's "Manchu and Muscovite." It is one of the most illuminating books of the day.

It is confidently asserted in Rome that, while Mdme. Crispi has been amusing the Government with litigation "for possession of her late husband's papers," she has all the time had in her own possession enough of them to fill a volume of the dead statesman's memoirs, which is now being printed abroad, safe from intervention by the Italian Government. The volume, it is stated by one who claims to have seen certain proof sheets of it, is divided into three parts, and contains, besides unpublished letters to Mazzini, Garibaldi, Victor Emmanuel II., and Gladstone, details of Crispi's life as a refugee in London, and documents by living men who had relations with Crispi, who himself furnishes an introduction, written during the closing months of his life.

The new volume of Coventry Patmore's "Angel in the House," and other early poems by him, which Mr. John Lane is adding to his Muses Library, has an introduction from the pen of Mrs. Meynell, the well-known essayist and writer of haunting verse.

There seems to be no finality to the discovery of rare or "non-existent" books. A remarkable case in point is presented in the discovery, in Sweden, of an almost perfect quarto edition of Shakespeare's "Titus Andronicus." No copy of this quarto was known to exist; indeed, the very entry of its existence in the "Transcript of the Registers of Stationers" had been deemed spurious. This entry is now justified by the book itself. It is believed that this precious volume will come to London.

The death of Miss Frances Power Cobbe in April 1904 has led her friend Miss Blanche Atkinson to issue a new edition (Swan Sonnenschein) of Miss Cobbe's "Life," as told by herself, and originally published some years ago. There are revisions by the author, but the chief interest in the added matter of the present volume is to be found in Miss Atkinson's introduction. She gives a delightful sketch of Miss Cobbe's home life, which, in spite of gloomy happenings towards its closing years—such as the death of her beloved friend Mary Lloyd, and a preposterous charge of cruelty to animals—always afforded a lesson in brightness, endurance, and persistence to those who were fortunate enough to be admitted to her intimacy. In the magic circle of her friends there was not one who did not love her—for what she was and for what she had done in more good causes than one.

Spelling reform would seem to be the invention of a malign spirit, bent on sport at the expense of human learning. Professors, grown grey in sober study, are helpless in the hands of this elf, and cut orthographic capers at which plainer mortals can only stand amazed. These reflections are suggested by the project laid by Prof. Meyer, acting under the direction of the Minister of Public Instruction, before the Academy, for the simplification of French orthography. It may be said at once that the shocked Immortals will have none of the scheme, of which the following are only a few specimens: "Homme" becomes "home," "temps" becomes "tans," "femme" becomes "fame." As the secretary of the Institute of France observed with a smile, there seems to be no pressing need for the French language to tear itself up from its own roots in a whirlwind of phoneticism like this.

The "slump" in poetry in England is attributed by Mr. John Lane, the London publisher, to, first, the disgrace of Oscar Wilde, on whose account Mr. Lane thinks a rough-and-ready public condemned all poets and poetry; second, the defection of Mr. John Davidson and Mr. Stephen Phillips to the theatre; third, the succession of wars—first in Cuba, then in South Africa, then in the Far East—which has deflected the

public taste towards the poetry of action—of what Mr. Lane calls the "Kipling-Henley-Newbolt" school.

Mr. David Fraser, one of the special correspondents of *The Times* in the war, has written an account of his experiences, which Messrs. Methuen will publish under the title of "The Far Eastern War." The author relates how he installed the wireless telegraphy station at Weihai-wei, and took part in the events of which the *Haimun* was the centre. It was from this vessel that Mr. Fraser witnessed the landing of Kuroki's army both at Chemulpo and Chinnampo. Then, leaving the *Haimun*, he accompanied the Japanese First Army during its victorious march northward; was present at the passage of the Yalu, the fighting at Motienling, and finally witnessed Kuroki's unsuccessful attempt to cut off the Russian retreat from Liaoyang.

#### REGULATIONS FOR THE ENFORCEMENT OF THE EXTRAORDINARY SPECIAL TAX LAW.

(IMPERIAL ORDINANCE NO. 1, PROMULGATED THE 31ST DECEMBER, 1904.)

Amendment of the regulations for the enforcement of the Extraordinary Special Tax Law are follows:—

No. 2 of Art. 1:—In case joint stock companies or joint stock limited partnerships are to present to the taxation office within which jurisdiction they are located, an account of its profit and loss according to Art. 3 of the regulation for the enforcement of the income tax law, they must report the maximum number of its share-holders and members during the years in which it has carried on business.

No. 3 of Art. 1:—A dealer in medicines shall report, until the 15th of January of each year, to the competent taxation office the total sum of the price of medicines used for each prescription which he compounded or dispensed during the preceding year.

No. 4 of Art. 1:—The transit tax shall be collected at the same time as when the fare of railway, electric car or steamer is paid.

No. 5 of Art. 1:—Any person who is engaging in the business of railway, electric car or steamer shall pay the transit tax to the local treasury together with a statement as the payment and a written account, but when he has received permission from the taxation office where his head office is situated he shall be allowed to pay the tax to the treasury where such head office is situated.

When the transit tax on the Governmental railway is paid into the treasury the written account herein before referred to may be omitted.

Art. 2:—The words "woollen textiles or kerosene oil" mentioned in Art. 2, shall be erased and the word "textiles" substituted therefore and the following two paragraphs shall be added thereto.

If any one who has a selling place (or store) wishes to sell the textiles, he shall fix his business place and be shall make a report to the local taxation office.

If any one who has no fixed business place or store wishes to deal in textiles he shall report such fact to the local taxation office within whose jurisdiction he has his domicile.

The words "woollen textiles or kerosene oil" mentioned in the articles of 3rd, 5th, 10th, 18th, 19th, 21st and 22nd shall be erased and the word "textiles" substituted therefore.

The words "woollen textiles or kerosene oil" mentioned in article 4, shall be erased and the word "textiles" substituted therefore the following two paragraphs shall be added thereto.

Whenever a dealer in textiles who has a selling place (or store) wishes to remove such place he shall make a report to the local taxation office within which jurisdiction he has removed to. Whenever a dealer in textiles who has no selling place (or store) has removed his domicile he shall report its facts to the local tax office within which jurisdiction he has removed to.

The words "a manufacturer of woollen textiles or of kerosene oil" mentioned in articles 7 shall be erased and the words "a manufacturer or dealer of textiles" shall be substituted therefor.

Art. 8:—When a manufacturer or dealer in textiles shall cease to manufacture or deal in textiles he shall report its fact to the local taxation office.

Art. 9:—When a person desires to obtain the exemption of the consumption tax on textiles which are to be exported abroad or on textiles which are to be exported abroad after certain work has been done to the same he must obtain the consent of the local taxation office when he receives or transfers the textiles from the manufactory.

If the local taxation office has recognized there is

no necessity for supervision on the manufactory textiles are manufactured only with the purpose to be exported abroad, the said office may permit the manufactory to be exempted from obtaining the consent mentioned in the foregoing paragraph.

It is the same when the local taxation office has recognized there is no necessity for supervision on the manufactory where textiles are manufactured only to be exported abroad after certain work has been done to the same or in the ware-house where each textiles are stored.

In the case of the foregoing 2 paragraphs when the local taxation office has appointed the condition about the transportation, the storage and other matters of the textiles or goods made thereof, the consumption tax shall not be exempted unless that condition has been fulfilled.

No. 2 of Art. 9.—In case of exporting abroad the textiles or goods made from textiles on which the consumption tax has been already imposed, if any one receives a certificate of examination from the custom house on the goods to be so exported and makes an application stating that the consumption tax has been already paid by cash or stamps on such textiles or textile of which material the goods have been so made then and in that case the amount so paid as or for consumption tax shall be refunded but no such application shall be required in the case of the textiles on which the stamp of consumption tax is affixed.

Art. 11.—In case a consent is to be obtained or seal of exemption of tax to be received from the Government to the No. 1 of Art. 8 of the extraordinary special tax law such consent or seal of exemption of tax must be claimed by a person concerned in the relative taxation office. The regulation of Art. 9, paragraph 3, shall be applied correspondingly in the case of the foregoing paragraph.

Art. 12.—Except in case of Art. 6 and 7 of Art. 8 in the extraordinary special tax law any one who wishes to take out woollen textiles from a manufactory shall make an application of such fact together with the price of such textiles.

Art. 12.—2 In cases where stamps are pasted on textiles except woollen textiles, the price of the textiles shall be mentioned and a suitable stamp shall be posted thereon. And the figures on the stamp and on the face of the textiles shall be jointly cancelled by a seal. But the person who uses of stamp may connect by sewing a slip of paper to a textile with a thread without a knot, and mention the price on the slip of paper, and affix the proper stamps at the place where the slip of paper is connected with the textile, and deface from the figures of the stamps so connected.

Art. 12.—3 Any person who is intending to pay tax according to the provisional clause of paragraph 2 of Art. 7 in the tax law shall make an application as to the fact to the local taxation office before the transportation of the textiles. In this case the local taxation office shall affix a card showing the payment of tax to a paper attached to the textiles or shall stamp the seal of the payment of the tax on the textiles.

The words "this ordinance" mentioned in Art. 14 shall be crossed and words "Extraordinary special tax law" substituted therefor.

Art. 17.—2 In case it is necessary to add certain work to the textiles to which stamps are already affixed or to textiles which have been stamped with the amount of tax paid, when such person has received a consent after an application to the local taxation office he may ask new stamps to be given instead of former ones or a seal of the stamps of the payment of tax.

Art. 17.—3 When any one who sells textiles as a piece of the goods on which there is stamped the payment of the tax he shall cut the textile if possible from such a part not marked with a stamp or seal. If there is a necessity to cut a part to which a stamp or a seal has been affixed he shall keep the stamps or a part of the textile having a seal and shall present the same to the local taxation office each month and receive a renoucement of them.

## SUPPLEMENT.

This Ordinance shall come into force on the day of issue.

An application according to No. 3 of Art. 1, shall be made within 15 days after the enforcement of this ordinance for only the 38th year of Meiji. In case of making a declaration or an application or to have a seal with the payment of the tax according to the supplement of the law No. 1, in 38th year to Meiji, such request shall be made to the local taxation office.

## LATEST SHIPPING.

## ARRIVALS.

*Rhenania*, German steamer, 4,056, Behrens, 24th Feb.,—Hamburg via ports, and Kobe, 22nd Feb., General.—C. Illies & Co.

*Ganges*, British steamer, 2,721, W. Sibbald, 24th Feb.,—Muran, Coal.—Hokkaido Tanko Kaisha.

*Stentor*, British steamer, 4,308, Chas. Jackson, 25th Feb.,—Liverpool via ports, General.—Butterfield & Swire.

*Princess Alice*, German steamer, 6,271, P. Wetlin, 26th Feb.,—Hamburg and Bremen via ports, and Kobe, 25th Feb., Mails and General.—H. Ahrens & Co., Nachf.

*China*, American steamer, 3,186, D. E. Friele, 26th Feb.,—Hongkong via ports, and Kobe, 25th Feb., Mails and General.—P. M. S.S. Co.

*Relades*, American steamer, 2,932, F. G. Purrington, 26th Feb.,—Victoria, B.C., and Tacoma, Wash., Mails and General.—Dodwell & Co., Ltd.

*Athenian*, British steamer, 2,440, S. Robinson, 27th Feb.,—Vancouver, B.C., Mails and General.—C. P. R. Co.

*Patroclus*, British steamer, 3,548, E. G. Dickens, 28th Feb.,—Liverpool via ports, General.—Butterfield & Swire.

*Eastern*, British steamer, 2,272, Ellis, 28th Feb.,—Australia via ports, General.—Comes & Co.

*Arabia*, German steamer, 2,858, Metzenthin, 28th Feb.,—Hongkong via ports, Mails and General.—P. & A. S.S. Co.

*Bengalee*, British steamer, 1,933, Watson, 1st March, —Shanghai via ports, Mails and General.—Nippon Yusen Kaisha.

*Scandia*, German steamer, 3,135, Von Doehren, 1st March, —Hamburg via ports, and Manila, 20th Feb., General.—C. Illies & Co.

*Poschan*, German steamer, 1,799, P. Lemke, 1st March, —Kobe, 27th Feb., General.—Simon Evers & Co.

*Daini Tatsu Maru*, Japanese steamer, 3,146, 1st March, —Kobe, General.—Nippon Yusen Kaisha.

*Ithaka*, German steamer, 1,450, Eckhorn, 1st March, —Hamburg via ports, and Hongkong, 21st Feb., General.—C. Illies & Co.

*Henley*, British steamer, 1,469, Turner, 1st March, —Sasebo, Ballast.—Samuel Samuel & Co.

*Japan*, British steamer, 2,798, E. P. Martin, 1st March, —London via ports, General.—P. & O. S.N. Co.

*Breconshire*, British steamer, 2,323, G. E. Elliott, 2nd March, —Rangoon via Kuchinotsu, Rice.—Dodwell & Co., Ltd.

*Macduff*, British steamer, 1,882, John B. Muir, 2nd March, —Liverpool via ports, and Kobe, 28th Feb., General.—Dodwell & Co., Ltd.

*Quarta*, German steamer, 2,146, Madsen, 2nd Mar., —Formosa, General.—Osaka Shosen Kaisha.

*Oceanien*, French steamer, 2,104, Oliver, 2nd March, —Marseilles via ports, and Kobe, 1st March, Mails and General.—M. M. S.S. Co.

## DEPARTURES.

*Babelsberg*, German steamer, 1,378, H. Wendt, 24th Feb., —Kobe, Sugar.—Osaka Shosen Kaisha.

*Rainershire*, British steamer, 1,889, J. M. P. Haffner, 24th Feb., —Mojji, Ballast.—Samuel Samuel & Co.

*Highlander*, British steamer, 1,595, W. Dawson, 24th Feb., —Otaru, Ballast.—Taninichi.

*Dutwich*, British steamer, 2,111, F. Dudley, 25th Feb., —Nagasaki, General.—Yokobama Coal Co.

*Caledonian*, French steamer, 2,100, Gregory, 25th Feb., —Marseilles via ports, Mails and General.—M. M. S.S. Co.

*Prinz Sigismund*, German steamer, 1,844, D. Lenz, 25th Feb., —Brisbane and Sydney via ports, Mails and General.—H. Ahrens & Co., Nachf.

*Tjmahi*, Dutch steamer, 2,476, N. V. W. Jurriaanse, 25th Feb., —Macassar via ports, General.—Ed. L. van Nierop & Co.

*Tweeddale*, British steamer, 2,874, Milne, 26th Feb., —Taketo, Rice.—Mitsui Bussan Kaisha.

*Athenian*, British steamer, 2,440, S. Robinson, 28th Feb., —Hongkong via ports, Mails and General.—C. P. R. Co.

*China*, American steamer, 3,186, D. E. Friele, 28th Feb., —San Francisco via Honolulu, Mails and General.—P. M. S.S. Co.

*Patroclus*, British steamer, 3,548, E. G. Dickens, 1st March, —Marseilles and Liverpool via ports, General.—Butterfield & Swire.

## LATEST COMMERCIAL.

## IMPORTS.

Yokohama, February 24.

There is no change in the Yarn market and business in Grey and White Shirtings has been on a small scale. Some orders have been placed for Velvets, Cotton Sateens and Victoria Lawns but the upward tendency of prices in Manchester obstructs business in the two last-mentioned classes of Cottons. There has been a fair movement in Woollens and Mixtures, arrivals being taken up briskly and some forward business transacted.

## COTTON PIECE GOODS.

White Shirting—{ 40 yds. 36 in. }	PER YARD.
{ 50 yds. 36 in. }	0.10 to 0.18
Grey Shirting—8 1/2 lb. 38 1/2 yds. 39 inches V.	PER PIECE.
Grey Shirting—9 lb. 38 1/2 yds. 45 inches	1.50 to 4.40
Prints—Assorted, 24 yards, 30 inches...	2.80 to 4.10

Cotton Italians and Sateens... 0.20 to 0.30

## WOOLLENS.

Flannels ...	PER YARD.
Italian Cloth, 32 in. ...	0.35 to 0.50
Mousseline de Laine,—Crape, 24 yards, 30 inches...	0.16 to 0.22
Cloths—Pilots, 54 to 56 inches ...	0.50 to 1.00
Cloths—Presidents, 51 to 65 inches ...	0.90 to 1.00
Cloths—Union, 54 to 56 inches ...	0.50 to 1.00
Blankets—Scarlet and Green, 3 to 5 lb per lb ...	0.60 to 0.66

Velvets—Black, 35 yards, 22 inches ... 9.80 to 10.80

Victoria Lawns, 12 yards, 42-3 inches... 0.90 to 1.80

Turkey Reds—2.8 to 3.0 lb 24-25 yards, 30 inches... 1.90 to 2.25

Turkey Reds—3.8 to 5 lb, 24-25 yards, 32 inches ... 2.50 to 3.65

## COTTON YARN.

Nos. 16/24, Singles ...	Y.	Nominal
Nos. 28/32, Singles ...	—	—
Nos. 36/42, Singles ...	—	—

American Middling...	25.50 to 26.00
Indian Broach...	23.50 to 24.00
Chinese ...	25.00 to 27.00

## METALS.

This market remains quiet and the business done has been inconsiderable.

Round and square 1/2 inch and upward...	PER PIECE.
Iron Plates, assorted ...	4.10 to 4.30
Sheet Iron... ..	4.35 to 4.65
Galvanised iron sheets ...	4.70 to 6.95
Wire Nails, assorted ...	10.00 to 10.95
Tin Plates, per box... ..	6.85 to 7.15
Pig Iron, No. 3 ...	7.40 to 7.65
Hoop iron (3/4 to 1 1/2 inch) ...	2.40
...	5.00 to 5.50

## KEROSENE.

The Kerosene market is dull and prices are tending downwards.

American ...	\$1.13
Russian ...	2.95 to 2.98
Tangkai ...	2.80

## SUGAR.

Quietness prevails in the Sugar market; both in imported Refined and Raw matters are at a standstill. Demand is limited by the high prices which are due to the heavy taxes. At the auction of Tokyo Refinery Sugar on Feb. 26, some 3,400 piculs were sold at an advance of 3 sen per picul.

Brown Takao ...	PER PICUL.
Brown Manila ...	Y. 10.80 to 11.80
Brown Daifong ...	10.80 to 11.80
Brown Canton ...	9.10 to 9.60
White Java and Penang ...	10.00 to 12.50
White Refined... ..	13.40 to 14.40
...	15.40 to 18.00

## INDIGO.

Still nothing moving.

Java, Medium to best...	PER PICUL.
Calcutta, Medium to best ...	210.00 to 260.00
Madras (Kierph), Medium to best ...	140.00 to 220.00
Madras (Dry Leaf), Medium to best ...	100.00 to 140.00

## EXPORTS.

## RAW SILK.

At the close prices are easier; stocks are of poor quality and desirable silk scanty. Spring dealings have begun to appear.

## SAVE YOUR HAIR

With Shampoos of Cuticura Soap and Light Dressings of Cuticura.

This treatment at once stops falling hair, removes crusts, scales, and dandruff, soothes irritated, itching surfaces, stimulates hair follicles, supplies the roots with energy and nourishment, and makes the hair grow upon a sweet, wholesome, healthy scalp when all else fails.

## MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, and for all the purposes of the toilet, as well as by millions of women in the form of washes for ulcerative weaknesses, and many sanative, antiseptic purposes which readily suggest themselves to women and mothers.

## COMPLETE TREATMENT FOR EVERY HUMOUR.

Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales, and soften the thickened cuticle; CUTICURA OINTMENT, to instantly allay itching, inflammation, and irritation, and soothe and heal; and CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. A SINGLE SET IS often sufficient to cure the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, with loss of hair, when all else fails. Sold throughout the world. Australian Depot: E. Towse & Co., Sydney. British Depot: 17-28, Charterhouse Sq., London. French Depot: 8 Rue de la Paix, Paris. POTTER DRUG AND CHEM. CORP., Sole Props., Boston, U. S. A.

**CUTICURA RESOLVENT PILLS** (Chocolate Coated) are a new, tasteless, odorless, economical substitute for the celebrated Blood Purifier, as well as for all other blood purifiers and humors cures. Put up in screw-cap pocket vials, containing 60 doses. CUTICURA PILLS are alterative, antiseptic, tonic, digestive, and the purest, sweetest, most successful and economical of blood and skin purifiers, humor cures, and tonic-digestives.

"FAIS CE QUE DOIS: ADVIENNE QUI POURRA!"

## NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, MARCH 11TH, 1905.

## MARRIAGE.

**McCLURE-BAKER.**—On March 4th, 1905, at the Catholic Church, Yokohama, EVELYN MARY JOSEPHINE, daughter of Thomas Summers Baker, of the Hongkong and Shanghai Banking Corporation, to ADAM JOHNSTONE McCCLURE, fourth son of William McClure, J.P., of Clairmont, Lockerbie, Dumfriesshire, Scotland.—Home papers please copy.

## SUMMARY OF NEWS.

THE son of Prince Yamashina who was born on Feb. 25th has been named Fujimaro.

THE construction of the Seoul-Wiju Railway being almost completed, traffic will be opened next month.

TWENTY dead rats infected with plague were found on March 2nd at Tomioka-Monzen-cho, Fukagawa, Tokyo.

FIFTY-ONE mechanical mines picked up at the entrance of Port Arthur were brought on March 6th to Shimonoseki.

MR. CONGER, American Minister at Peking, left Nagasaki on March 7th for Shanghai. He has been transferred to Mexico.

LIEUTENANT C. TERADA, formerly member of the Lower House, is reported to have been killed at a recent battle on the Shaho.

THE British steamer *King Robert*, with 5,360 tons of Cardiff coal, arrived on March 2nd at Nagasaki via the Cape of Good Hope.

A GERMAN midshipman at Kiaochow has been attacked and wounded by a Russian bluejacket, one of the prisoners of war detained there. The

culprit was arrested and subsequently sentenced to four years' imprisonment.

ON March 6th, the steamer *Frankfurt* arrived at Kiaochow with a thousand German soldiers who are to take the place of the present garrison.

GYOKUHODO, a prominent furniture shop in Tokyo, has received an order from the Sultan of Turkey to supply a variety of Japanese goods.

THE Russians in the sequel of ten days' fighting have retreated before a general advance of the Japanese army, and Mukden has been occupied.

DURING February, the income of the Seoul-Fusan Railway was yen 1,700 per day while expenditure was yen 2,200 per day on the average.

THE construction of a telephone line between Tokyo and Sasebo being completed, service will be opened shortly. The fee is believed to be yen 3 per 5 minutes.

MR. K. YAMANE, Director of the Aomori Forestry Bureau, was arrested on March 8th on suspicion of having accepted bribes from merchants dealing with the office.

ON the evening of March 4th, a small steamer collided with a ferry-boat at Kawaguchi, in Osaka. The latter capsized and eighty-nine passengers were drowned.

A GENERAL meeting of the Ladies' Patriotic Society will be held on April 2nd. There are 35,277 special members; 250,692 ordinary members; and 27,913 honorary members.

A RUSSIAN soldier who is detained at Nagoya has been punished with three months' imprisonment with hard labour on a charge of having stolen a coat belonging to one of his comrades.

A CHINESE seaman belonging to the British steamer *Schuydell*, now in Nagasaki harbour, accidentally fell into an empty water tank on the vessel on Tuesday and succumbed to his injuries.

BARON OZAWA, Vice-President of the Japan Red Cross Society, will leave Tokyo on March 9th by the noon train on his way to the front. He wishes to inspect nursing operations in the field hospitals.

COMMANDER NISHIGAKI arrived on March 3rd at Kure from the front and immediately went into hospital. According to the *Hochi* of Feb. 26th he was vice-commander of the cruiser *Ishikushima*.

It is reported by Tokyo journals that the Emperor has decorated Lieut.-General Sir Ian Hamilton with the First Class of the Sacred Treasure. Sir Ian is now on his way home having left Tokyo on March 4th.

THE *Jiji* reports that money paid to the families of officers and men killed at the front now amounts to some nine million yen. This sum, however, does not include pensions to families or to crippled officers and men.

THE *Jiji* has a telegram from Nagasaki that the Russian transport *Sungari* left there at 2 p.m. on March 4th flying the Japanese transport flag. This vessel was sunk at Chemulpo together with the *Varyag* by the squadron under Admiral Uryu, and was refloated by the Mitsu Bishi Co.

ABOUT 9.30 p.m. on March 7th, Paotun (51) keeper of a Chinese restaurant, at Nigiwai-cho, Yokohama, died after sustaining severe injuries on the head by falling from the projecting roof of the residence of a Chinese matting dealer, Chingkan, No. 191. It appears that the dead man and ten other Chinamen were gambling in an

upstairs room of the house when a Kagacho policeman appeared. The gamblers escaped by the roof projecting beneath a window and connecting with another building, but the dead man missed his footing and fell to the pavement beneath.

A RUSSIAN prisoner at Nagoya died on March 4th from lung disease. A number of Russians arrived at Ujina from the front and on the evening of March 4th, 80 removed to Toyohashi and 100 to Shidzuoka. Major-General Elmann, who was at Port Arthur, and is now in Nagoya is reported to be suffering from a severe cold.

PRINCESS KAN-IN, President of the Ladies' Patriotic Society, recently proceeded to the Palace and explained to the Empress the work of the society. Her Majesty, it is said, was gratified with the labours of the ladies to provide comfort for the men at the front and for relieving poor families and asked the president to continue her patriotic services.

MR. MINAKAMI, President of the Yokohama Customs, announces that the construction of the sheds on the reclamation along the foreshore of Kaigan-dori being about completed, landing of iron, railway materials and other similar goods will be permitted from April 1st. Such cargo will be removed by the Bankoku bridge connecting with Bashamichi.

ON the morning of March 7th, U. Ito (49) a carpenter, murdered Kin Matsukura (29) by inflicting severe injuries with a hatchet. The affair took place in the compound of the packing department, Ishikawajima, Tokyo, belonging to the military food stuffs and fodder supplying bureau. The culprit was arrested at the scene. Jealousy was the cause.

T. HIROSAWA, a farmer residing at Maebashi, who was sentenced to death in the Maebashi District Court on a charge of having murdered, on the night of Oct. 14 last, Shidzu Haruta, a female servant in a restaurant of that city, was executed on March 6th in Ichigaya Prison, Tokyo, in the presence of Public Procurator Teraya of the Tokyo District Court.

LIEUTENANT COUNT NAMBU, of the Cavalry, was killed on March 4th at a battle on the Shaho. He was 24 years of age. He graduated June, 1903, from the Military College and was appointed ensign. After the outbreak of the war, he was attached to the Imperial Body Guards and participated in several fights. He was promoted Lieutenant before the Shaho battle for conspicuous merit. The young officer was the first son of the late Count Nambu Toshiyuki, Feudal Lord of Morioka, Rikuchu province, before the Restoration. The family dates back to A.D. 859.

UNDER the authority of the Hakodate Local Court, the Russian steamer *Progress* will be sold by auction on March 20th, the upset price being yen 72,000. This steamer, on the morning of Oct. 29th, 1903, collided with the Nippon Yusen Kaisha's steamer *Tokai Maru* (1,120 tons gross) off Yokoshi, 15 miles distant from Hakodate, and the latter immediately sank with some 150 of her 200 passengers and the crew. The Japanese shipping company lodged a claim in the Hakodate District Court against Messrs Howell and Co., agents of the Russian ship, and the latter filed a counterclaim. Later, a decision, was given in favour of the Nippon Yusen Kaisha. On the other hand the Russian vessel underwent repairs in the yard of the Hakodate Dock Co, but the Russian owner did not pay the charges. Mr. N. Sonoda, President of the Dock Company, presented a petition in the Local Court for permission to sell the ship in order to recover the repairing bill, and his petition was granted.

## NEWS FROM THE FRONT.

The *Asahi* gives a statement made by a Japanese—at least we presume him to be a Japanese—who recently visited Tiehling and Mukden to take notes. He says that the railway Station at Tiehling is some 1¼ miles west of the town and that in its neighbourhood there are a number of fine Russian buildings, reminding one strongly of Liaoyang. The defences on the south-west consist of forts along the river's bank, having a T-shaped trace; and on the east 30 guns are mounted on eminences. When this informant visited the town there were only 4000 Russians in garrison, but doubtless the number has since been increased. At Mukden the strongest point of the fortifications is due south of the city at Hunhopu, on the southern bank of the Hun. Thence, stretching east and west, are 5 well constructed and well armed forts, those on the west extending to the Changtan road, and being supplemented by many lines of trenches and gun positions.

The same informant alleges that beyond all question the officers commanding the Chinese forces in Hsinmintan and Tienchwangtai, as well as the local officials at Sansaho (a place immediately north of Niuchwang where the three rivers meet) are in the pay of the Russians, and that clear proof has been obtained of their having furnished guides when Mischenko's cavalry made its January raid. It is expected that some steps of a punitive nature will be taken in their case.

Statements of Russian non-commissioned officers taken prisoners at Chinghoching bear the semblance of veracity. They say that the Russians, believing the strong point of the Japanese to be mountain fighting, and thinking therefore that Oyama would plan his advance so as to take advantage of the hilly country eastward of Mukden, determined to concentrate heavy forces there, and to assume the offensive instead of waiting to be attacked, as the former course would have the advantage of surprising the enemy. But the Japanese had unexpectedly taken the initiative and had captured Chinghoching, driving the Russians northward. They say also that, believing the weak point of the Japanese to be flat-land fighting, Kuropatkin determined to deliver a powerful assault against their left in the region between the Shaho and the Hun. This assault should have synchronized with a similar attack against the Japanese right, but it had been found impossible to carry out the programme in its entirety, and thus the battle of Heikautai stood isolated.

It is now stated that the total number of Japanese who suffered from frost-bite in the Battle of Heikautai was 1,116; namely, 74 in the Nishijima Division, 473 in the Kigoshi Division and 569 in the Tachimi Division. This is regarded as a very favourable showing in view of the terrible cold to which the troops were exposed by day and by night, and in view of the length of the exposure. There were no really serious cases, and altogether the record goes to show that campaigning in a Manchurian winter is not so destructive as had been believed.

Major-General Tanabe, who was wounded in the Battle of Heikautai, has returned to Hiroshima and is in hospital there. Interviewed by a representative of the *Hochi Shimbun*, he says that he was posted at a place some 300 metres from Sumapau—where, as our readers will remember, the

bloodiest combat took place—when a bullet struck his knee. He was able to continue in command until night, but he had then to enter the field-hospital, where he barely escaped having his leg cut off. His view is that had he been in the place of the Russian commanders who attempted to envelop the Japanese at Sumapau, he would have made a wider detour, that is to say, would have pushed further south, and would thus have placed himself completely on the rear of the objective, compelling the Japanese to face about in order to meet his attack. He confirms the often repeated statement that the Russian weakness is in officers. The men fight with desperate obstinacy but their leadership is radically bad, and the Major-General alleges that the lessons of this war teach more forcibly than ever the necessity of educating officers thoroughly. He mentions that 1834 Russian corpses were buried in one place after Heikautai, and that the Japanese took 24,488 rifles and 400,000 rounds of small-arm ammunition.

Lieutenant-General Iseji, who commands the Guard Division Depot in Tokyo, has lost his son in the fighting now going on. Various statements, all obviously conjectural, are made as to the Japanese casualties. Yokohama has a story that General Nogi is killed, which is a curious effort of the news-mongers' imagination seeing that we do not even know whether General Nogi's troops are actually engaged. The *Official Gazette* of the 9th instant published a list of 18 officers killed and 108 wounded. But that can only be an installment. Considering that this engagement virtually consists of seven battles, in each of which fully a hundred thousand troops are engaged, it is only too much to be feared that the total list of casualties will be appalling.

It is stated in Tokyo that a rough estimate puts the Russian casualties at about one hundred thousand, up to the 8th instant. This estimate is based on the fact that the dead left by the enemy in front of Oku's army alone total 8,000.

## KOREA.

It is inferred from the state of affairs in Songchin that the Russians had from 1700 to 1,800 troopers there before their recent determination to withdraw across the Tumen. They still send scouting parties into Korean territory, and apparently they receive every assistance from Koreans who are in their pay. This adds considerably to the difficulties of the Japanese both for reconnoitering and for attacking purposes. Evidently the Japanese force has pushed north as far as Songchin, and the Russians have evacuated their last outpost in this region, namely, Kyongsong. The Russians, during their stay in Songchin, destroyed all the Japanese houses there, 600 buildings in all.

It is telegraphed that a trial trip was to be made yesterday over the Fusan-Masampho line. This is a military railway but it will doubtless become a permanent line. Masampho is the finest harbour in southern Korea. It has long, and doubtless justly, been believed to be a goal of Russian ambition in the Far East.

It is stated that the Japanese Representative and the Representatives of England and the United States are to have simultaneous audience of the Emperor of Korea. The idea is that the audience refers to the project of cooperation in mining concessions lately formulated.

## DR. TAKAGI KENKAN.

Very wide satisfaction will be given by the announcement that Dr. Takagi Kenkan, of the Navy, has been raised to the rank of Baron in consideration of his long and valuable services. Dr. Takagi is almost as well known to foreigners as to his own nationals and we add our voice to the numerous congratulations he will receive on account of his well-deserved promotion.

It is related of the newly created Baron that to his researches and recommendations is due the virtual disappearance of *kakke* from the Japanese Navy. Originally this disease was a dreadful scourge. It threatened almost to incapacitate the service, as the following figures show:—

	Total Number of Patients.	Number per 1,000.
1878.....	1,485	328
1879.....	1,978	389
1880.....	1,725	348
1881.....	1,163	351
1882.....	1,929	404
1883.....	1,236	231

It was when things reached this stage that Dr. Takagi recommended a new system of diet, and his recommendations were carried out in 1883, the result being, as we have said, the almost complete disappearance of the disease. Dr. Takagi was then rewarded with the Second Class of the Rising Sun, and he is now raised to the rank of Baron.

It is impossible not to recall, in this context, the name of the late Dr. William Anderson, who was the first to advise a change of diet as a means of checking *kakke*. Dr. Anderson left Japan in 1878, after 4 years' service at the Naval Hospital.

## DEATH OF VISCOUNTESS TANAKA.

With much regret we announce the death of Viscountess Tanaka, wife of the Minister of State of the Imperial Household Department. The Viscountess expired on the 3rd instant at her residence in Ichibancho, Kojimachi-ku, Tokyo. The funeral will take place on the 7th instant, the cortege leaving the residence of the deceased at 1 p.m. and proceeding to the Gokoku-ji in the Koishikawa suburb, where the *Shinto* ceremony of burial will be performed at 2.30 in the afternoon.

The deceased lady was only in her fifty-ninth year. The malady which ultimately proved fatal had made its appearance in 1895, after the China-Japan war, but not until the past few weeks did it develop really serious symptoms. Viscountess Tanaka's life was an eminent example of the high qualities that grace so many Japanese ladies. Self had no existence in her list of motives. She made duty, benevolence and sympathy her constant guides, and she leaves a beautiful memory.

The funeral of Viscountess Tanaka took place on Tuesday afternoon. At exactly 1 p.m., the hour announced, the cortege left the official residence of the Minister of the Imperial Household and proceeded thence to Gokoku-ji in the Koishikawa suburb of Tokyo. An immense number of mourners accompanied the bier and a still greater number proceeded in advance to the temple. All officialdom and semi-officialdom seemed to be present, as well as many leading members of the commercial and industrial classes, and the foreign community was represented by the whole *Corps Diplomatique*, and a great majority of the private residents, including numerous ladies. It was an eloquent tribute of respect and affection to the deceased lady.

## THE BALTIC FLEET.

Saturday, March 4.

According to a telegram received at the Foreign Office in Tokyo, the *Novoye Vremya* publishes the following from Kronstadt:—The following ships, which form the Fourth Pacific Squadron, have commenced to arm:—

Battle-ships—*Slava* and *Alexander II*.  
Cruisers—*Pamiat Azova*, *Admiral Korniloff*,  
*Aziya*, *Abrek* and *Voi voda*.  
Destroyers 2 and transports 2.

The *Slava* is a new vessel of 13,516 tons. The *Alexander II* was built in 1887 and displaces 9,900 tons. The *Pamiat Azova* was commissioned in 1888 and her size is 6,700 tons. The *Admiral Korniloff* (5,000 tons) was built in 1887. The *Aziya* (built in 1874) displaces 2,490 tons; the *Abrek* (1896) displaces 534 tons, and the *Voi voda* (1892) displaces 400 tons.

The despatch of a Fourth Squadron to re-inforce Admiral Rojestvensky sounds a formidable proceeding, but loses much of its imposing character when we observe that the so-called "Fourth Squadron" is really only a remnant of the Third Squadron. The latter, as detailed originally, included the *Slava*, the *Alexander II*, the *Pamiat Azova*, the *Admiral Korniloff*, and the *Abrek*. Thus this Fourth Squadron is reduced in reality to the *Aziya* (2,490 tons), a cruiser 30 years old (originally the *Columbus*, built at Philadelphia), and the *Voi voda*, a torpedo gun-vessel of 400 tons. A notable addition forsooth! An air of men-in-buckram begins to envelop this Baltic Fleet.

On the 19th of January *The Times* published information "on good authority" that the Baltic Fleet was to leave Madagascar, and having loitered for 3 months in the Indian Ocean and elsewhere, was then to continue its voyage eastward. The comments of *The Times* on this new development were:—

The interesting information which we are able to publish this morning in regard to probable future movements of the Baltic Fleet seems to show that the Tsar, who for many days has halted between the clamour of those who would take any risk rather than acknowledge the failure of their daring enterprise and the advice which has been tendered to him from many quarters to recall Admiral Rojestvensky, has at last decided, as the bent of his mind made it probable he would decide, on a middle course. Whatever may be thought of the wisdom of this decision, it would appear that it will at least have the result of getting the Russians clear of Madagascar, and it may therefore be taken as manifesting some degree of consideration for Russia's ally, who has been placed in an extremely difficult and delicate situation by the continued presence of a large belligerent force in waters which all responsible Frenchmen would wish to regard as strictly neutral. Admiral Rojestvensky, according to our information, no longer contemplates the immediate prosecution of his voyage to the Far East, though, on leaving Madagascar, he may proceed in an easterly direction. His intention would appear to be to cruise in the Indian Ocean, though without extending his cruise into its eastern waters, and, above all things, he will avoid the East Indian Archipelago and the Japanese cruisers which may be lurking there. A cruise of this kind presents obvious difficulties even in the fine weather, and if, as the evidence seems to show, three months are to elapse before the Russian Admiral makes any attempt to reach Far Eastern waters, some kind of temporary base is a necessity to him. Unless some submarine volcano provides him with a ready-made island-harbour, it is difficult to know where he will turn. The Indian Ocean is studded with islands, it is true; but those which could be of any service whatever to a fleet of warships are already appropriated, and the same difficulty would arise which has already been experienced in so acute a form on the coast of Madagascar. Among these islands are three groups—the Laccadives, the Maldives, and the Chagos Islands—which belong to Great Britain. In ordinary times communication with these islands is maintained at comparatively rare intervals, and their defence is not a problem which often troubles a British Government; but, if Admiral Rojestvensky is to cruise at large in the Indian Ocean for three months, it is to be hoped that the Admiralty will take some measures

to secure these outlying possessions from an unsolicited visit from the sea-worn armada of Russia.

Wednesday, March 8.

The Military Critic of *The Times*, writing on January 19th, made the following interesting remarks:—

The House of Romanoff, in the person of the Grand Dukes, has steadily evaded the calls of duty during the war. These titled magnates, adorned with resplendent uniforms ablaze with decorations won on the soft carpets of St. Petersburg salons, have incurred—doubtless without their knowledge—the derision of soldiers of the armies of the world. There was once a great man of whom it was truly said that he was first in peace, first in war, and first in the hearts of his fellow-countrymen, nor has there ever been fought a great war up to the present time in which the Princes of the reigning houses, and many of the leading figures in great democracies, have not been the first at the post of danger. His Imperial Majesty, and all his House save two young cadets who paid a flying visit to Manchuria and speedily returned, have not led their people in this war, and by their abstention have forfeited all claim to consideration as soldiers. While seven Princes of the Imperial House of Japan have shared the dangers and hardships of the war by land and sea, the much larger number of Grand Dukes have stayed in their palaces and have only distinguished themselves by the zeal they have shown to despatch ikon-laden peasants to fight their battles and by the precipitate manner in which they have hastened to ruin the reputations of those who have borne the burden and heat of the day. Aristocracy, forsooth! May the fates save us from such decadents! It will be an ill day for the peace of the world if the miserable example of the House of Romanoff finds imitators among those who stand as the leaders of the people.

The demands for peace which issue from such quarters as Washington and Berne have met with the fate that might have been anticipated. They are taken as evidence that Japan is weakening and that her friends desire to save her from her impending doom. As that was the narrow, puerile, and bigoted view to take of the sentiment of the world, it became a mathematical certainty that it would represent the settled conviction of the Russian censor. There is, unfortunately, nothing to be gained by such well-intentioned efforts, and the heart of Pharaoh is not likely to be softened save by a further instalment of those plagues which have visibly shaken the Imperial confidence and must still be trusted to destroy it.

The statements regarding the course taken by the division of the Baltic Fleet which were made in this column on January 9 have since been corroborated by telegrams from Mauritius. The Russian Government has shown scant consideration for its ally in causing its warships to dally for so long in French waters, and it is greatly to be hoped that the information we publish this morning may prove to be correct, and that France may be speedily relieved from a situation which is fast becoming intolerable. We must, from one point of view, congratulate Russia and her ally upon the secrecy observed at Jibuti and Diego Suarez, where the telegraph and cable offices have been carefully shut down, to the great advantage of the Russian cause. Secrecy of this character is indispensable for the success of naval operations, and, had similar hold been taken of our telegraph offices at Gibraltar and elsewhere three months ago by British authorities, we should, perhaps, have been spared an exhibition which was discreditable to our foresight, and might have been, had war ensued, highly detrimental to our success.

The preparations made in Japan to give the Baltic Fleet a warm and hearty reception have not distracted the naval staff at Tokyo from their secondary objective—namely, the watch upon Vladivostok. Hitherto this watch has been ineffective, and some 25 ships at least have recently slipped into that port unharmed. The recent capture of the British steamers *Leithington* and *Roseley* bodes ill for the 50 or 60 steamers, mostly British and insured at Lloyd's at premiums of 25 to 35 guineas per cent., which are bound for the same port, and it is not surprising that rates for re-insurance have risen to 50 guineas, nor that they should rise still higher. "Underwriter" declares, in a letter we published yesterday, that the deepest sympathy will be felt for the "unfortunate owner," and he expects that something of the same feeling may be extended to the underwriters at Lloyd's who appear destined to suffer a loss of £140,000, if the Courts of Japan declare these ships good prize. He is sanguine. If owners, for the sake of lucre, assist the cause of the enemy of our ally, and if underwriters, for the same object, finance them, they have no right to complain of the losses that fall upon them. They should consider that for every 10,000 tons of cargo delivered at Vladivostok, 50 more military trains full of troops are placed at the disposal of the Russian staff for despatch to the army of Manchuria, and that all this implies longer continuance of the war and greater

loss to Japan. Far from sympathizing with owners and underwriters, most people will think that these losses serve them right, and the writer, certainly, will venture to express his opinion that a premium of 50 guineas fails to express, in terms of commerce, the military risk incurred in the continuance of this discreditable trade.

Thursday, March 7.

*The Outlook* of February 11th writes thus:

A question of vital importance in the naval strategy of the war, but one to which little attention seems to have been given, is, How long will France permit Admiral Rojestvensky's squadron to use Madagascar as a rendezvous and base of supplies? Some weeks ago it was announced that the Baltic fleet would return home, but it has not done so, and, on the contrary, last week brought the news that a reinforcement has sailed from a French port on the northern coast of Africa to meet the rest of the fleet in Madagascar. Apparently Admiral Rojestvensky has used the ports of Madagascar just as he pleased and for many weeks. The situation is humorously expressed by *Punch* in a cartoon which represents the Governor of Madagascar as anxious to bid farewell to Admiral Rojestvensky and saying to him, "Must you stay? Can't you go?"

It is all very well to treat this matter lightly; to speak of the exceedingly embarrassing position in which France is placed towards her ally, and to ask what great matter it makes after all whether the Baltic Fleet is granted or refused the hospitality of French ports. It makes just this matter, that had that hospitality been withheld, or, rather, had it not been extended beyond the universally recognised limits of fair neutrality, the Baltic Fleet never could have come East at all. Never for one moment. Let any one sit down and consider the problem calmly for five minutes, and he will inevitably arrive at the conviction that without the privilege of making a naval base at some port en route the Baltic Fleet never could have come to Japanese waters. It is by the assistance of France and by nothing else that this Fleet is enabled to carry out its programme, and since all professional experts are agreed that in recovering the command of the sea lies Russia's sole hope of retrieving the situation, the immense responsibility France is incurring becomes evident. We know what England had to pay for suffering one cruiser to emerge from her ports with the object of preying upon American commerce in the War of the Secession. But here we have a case of a whole Russian fleet emerging from a French port to attack Japan. We are fully sensible of France's delicate situation, but there is such a thing as justice, there is such a thing as obligation towards a State with which she is on peaceful and friendly terms, and most assuredly intangible considerations of sentiment should not be allowed to outweigh justice and public obligation.

## THE OSAKA PRISONERS.

Among the 6,149 Russian prisoners in the Takaishi quarter of Osaka, a disturbance took place on the 3rd instant at 5 p.m. Several bodies of about 200 men each, emerging from their quarters, began to sing songs in chorus and to smash down the fences as well as such outbuildings as lent themselves to easy destruction. This disturbance is said to have been fomented by non-commissioned officers. It was not completely quelled until 9 p.m., and the accounts do not say whether any casualties were incurred in restoring order.

In the sequel of the disturbance caused by Russian prisoners at Osaka, as described in our last issue, 25 men, including one non-commissioned officer, have been told off for court martial, and are now lying in the cells.

## CAPTURED STEAMERS.

It appears that the *Severus* was caught in the ice. On the morning of the 23rd February, while en route for Vladivostok with a cargo of 3,900 tons of Cardiff coal, she was pursued in the Shibetoro Sea, but both pursuer and pursued found themselves unable to move owing to the drift ice. They passed the night in that helpless condition, but on the morning of the 24th the Japanese managed to capture the steamer. She had sustained some damage, but it did not interfere with her voyage to Yokosuka.

As for the *Romulus*—like the *Severus* a German steamer—she was one of two vessels sighted at dawn on the 26th of February en route westward through the Tsugaru Straits. It was clearly ascertained on visiting her that she was bound for Vladivostok with 3,500 tons of Cardiff coal. Therefore she was seized, and 3 officers with 24 men having been put on board, she was ordered to proceed to Yokosuka. While passing Uruppu she received such injury from drift ice that she began to leak, taking in 20 tons in an hour. Her crew held on their course, pumping vigorously, but on the 1st instant it became impossible for her to proceed, and she had to be finally beached.

It is stated in Tokyo on good authority that a foreign steamer is ice-bound at a point some six nautical miles north of Rurui Cape which is on the north coast of Mitagiri Island. The vessel is thought to be the American steamer *Tacoma*, which has not yet emerged from her embarrassing situation.

An extraordinary statement was published in Tokyo on the 3rd, to the effect that an American steamer, the *Tacoma*, bound for Shanghai from Seattle, had encountered a storm which drove her to pass the Soya Strait, whereafter she was caught in floating ice and carried eastward to Kunajiri. This wonderful route may be intelligible to seamen but to us it is an enigma. We suspect the *Tacoma* to be a steamer reported by the *Kokumin Shimbun* to have been captured at Atoyaya-zaki in Kunajiri on the 27th of February. She is described as an American steamer bound for Vladivostok and carrying 1800 tons of beef.

It is stated on trustworthy information that two more steamers have been captured; namely the British steamer *Eashy Abbey* (2,963 tons) bound for Vladivostok with 4,000 tons of Cardiff coal; and the Swedish steamer *Vegga* (2,562 tons), bound for the same place with a cargo of coal the amount of which is not stated.

Two or three days ago news reached Tokyo of a sailing vessel or a boat, having two Russians on board, which had drifted to the neighbourhood of Sakata in Yamagata prefecture. We now read in Tokyo journals that on the 1st instant a steamer of from 4,000 to 5,000 tons, engaged in carrying contraband to Vladivostok, sustained some injury and had to be beached on the Yamagata coast. A telegram to the authorities alleges that there are some Russians on board. Presumably this vessel may be identified with the sailing ship or boat mentioned in the previous news.

Singapore telegraphs that of 5 steamers which left that port some time ago carrying contraband to Vladivostok, 3 have not since been heard of. There is another rumour to the effect that 6 steamers engaged in this trade have been unable to pass the Soya Straits owing to floating ice and have all put back to Saigon. These numbers sound somewhat exaggerated. The total of steamers captured by Japanese war-ships en route for Vladivostok since the 11th of

January in now 18. That in itself is a big figure for a period of less than two months, and we know that several managed to make their way through. Yet now we hear of no less than eleven others. Evidently there must be some hyperbole or Vladivostok is provisioning itself with extreme industry.

The crew—35, including two Russians and various other nationalities—of the German steamer *Severus* which is under examination at Yokosuka, were brought, on March 9th, to Yokohama and were released at the Kencho in the presence of the consuls concerned.

The ship was captured on Feb. 24th on her way to Vladivostok carrying some 3,920 tons of Cardiff coal.

## WAR CORRESPONDENCE.

Mr. Thomas F. Millard, writing in *Scribner's Magazine* for January, contends strongly that the war correspondent is a necessity, inasmuch as the whole world is more or less interested in every war fought and has consequently a right to be kept informed as to its incidents. "The time has passed," says Mr. Millard, "when any nation or combination of nations should be permitted to draw the curtain before the eyes of civilization and fight a war behind it. Such action is morally indefensible, and a nation which commits it gives a *casus belli* to humanity." It is much to be wished that the time had also passed when such shallow rhetoric could be trusted to stir the pulses of any thinking men, but unhappily it still seems to find an appreciative audience, especially in the United States. At all events Mr. Millard's plea does not advantage any correspondent except the historian. On behalf of the historical correspondent there is much to be said—the historical correspondent who is not allowed to send telegrams; who may not place before the public snap-shot accounts of battles concerning which his knowledge is altogether fragmentary, and who is forbidden to assert constructively on his own behalf expert skill superior to that of the generals in command. But the other kind of correspondent, the man of sensations, romances and self-display,—he ought certainly to be tabooed. Mr. Millard goes on to say:—

In this connection I recall a conversation I had recently with a Russian staff officer who... did not consider it worth while in conversing with an American newspaper man to advance the shallow pretense of preservation of military secrets. I might have reminded him, had it been advisable, that it was easy to have telegraph communication with the outside world by the Chinese telegraph lines, and could have told him what perhaps he did not know, that it was quite possible to send telegrams direct from Mukden to any point in the world, including Japan, without the Russian military authorities knowing anything about it. I had been in Mukden but a few weeks before I was approached by a Chinese who offered, for a consideration, to send any messages for me to Peking without the knowledge of the Russian authorities, guaranteeing that they would reach their destination within three hours after I handed them to him. He also proposed to provide me with copies of all telegrams received or sent over the Chinese wire between Mukden and Peking. Knowing that the Russians had soldiers and operators in the office of the Chinese Telegraph company, with orders to send no messages that were not stamped by the censor, I expressed doubt of his ability to deliver the goods. He invited me to make a test. I wrote a short private telegram and gave it to him. Within two hours he brought me a reply which carried on its face convincing proof of its authenticity. I did not question him further, and did not take advantage of his offer, as I considered myself bound by my pledge not to send any letters or telegrams without the knowledge of the censor.

But what I could do a Japanese spy could do, and I have no doubt did do. Even had the Russian authorities entirely suppressed the operation of this wire, it is only thirty-five miles to Simnintun, across the Liao river, in the neutral zone, from where runs a censor-free wire to all parts of the world. Every

day hundreds of Chinese pass to and fro between Mukden and Simnintun, and any effective espionage over them is so out of the question that it is not even seriously attempted. Correspondents with the Russian army could have reached a free wire at any time within a few hours at most, and it is perhaps worth recording that none of them thought of violating his obligation as long as he remained attached to the army, although he well knew that what he was prevented from doing was being done by Japanese agents almost every day, whose messages have to travel only a few miles to Shanhaikwan to be in the hands of Japanese diplomatic and military officers.

This revelation by Mr. Millard has a significance which he does not seem to appreciate. If these secret facilities for sending uncensored telegrams existed, is not the conclusion quite plain that the only safe course for commanding officers is to exclude from the field all persons interested in utilizing such facilities? Mr. Millard did not utilize them. But there was nothing to restrain him except that intangible thing called a sense of honour, and can he, or can any one else, frankly assert that such a restraint would have been operative in the case of all the correspondents who accompanied the Japanese armies last year?

## MR. OZAKI YUKIO.

Every student of Japanese current history is familiar with the name of Mr. Ozaki Yukio, now mayor of Tokyo and formerly one of the most brilliant leaders of the Progressists, from whose ranks he subsequently passed into those of the *Seiyu-kai*, and then drifted into complete independence. Mr. Ozaki is well known for his advocacy of a Russo-Japanese alliance, and we observe that his old predilection colours some utterances which he has allowed to appear in the columns of the *Fiji Shimpu*. The Russo-phil party in Japan is a small coterie. It never had appreciable influence except for a brief period when Russia was clothed with the magnificence of the comparatively unknown. Mr. Ozaki's tone does not suggest that this particular section of Japanese publicists is very vigorous, but his remarks are none the less extremely interesting. The fate of Manchuria, should the war end in Russia's defeat, is the subject he discusses. Japan can not keep Manchuria. The burden would be too heavy even if she had the inclination. She can not hand it back unconditionally to China who is no better able to protect it now than she was five years ago, and who shows no sign of being able. Neither can she consent that the Three Provinces should continue as of old to be the object of Russian ambition. Nothing remains then but to effect some arrangement which will furnish guarantees for the security of this vast territory under China's rule. Mr. Ozaki considers that the value of the Anglo-Japanese alliance will be tested when this question comes up for practical discussion. Unless England takes a resolute part in the arrangement, no satisfactory issue can be looked for. It is here that his Russo-phil disposition makes itself apparent. No settlement, he says in effect, can stifle Russian aspirations. Her face has been turned towards the Sea of Japan and the Gulf of Pechili for a century. She may be temporarily checked in her natural struggle towards an outlet on the Pacific, but she can not be permanently restrained, and the question then arises, is there no course except a futile attempt to restrain her. Mr. Ozaki does not answer the question. He adroitly leaves his readers to ponder on a reply, letting them, however, perceive plainly enough that what he himself would advocate is a friendly understanding with Russia.

## CAPTAIN KLADO.

Captain Klado, who rose to eminence—or notoriety we should now say—in connexion with his discovery of two phantom torpedo-boats in the North Sea, ought not perhaps to be taken very seriously. Yet we can not but admire the assiduity and adroitness shown by him in utilizing the interval between the Dogger-Bank incident and the finding of the North Sea Tribunal. In that brief space of time he took extraordinary advantage of his sudden appearance on the public stage and succeeded in posing as one of the clear-headed. We are not at all sure that he does not deserve these titles. His articles and utterances have shown a perspicacious conception of the military and naval situation, and though it is now proved that he does not know the visible difference between a torpedo-boat and a fishing smack, he has certainly won a prominent place in the world's eyes. His latest utterances, which we quote from the Russian Correspondents of *The Times*, are very interesting:—

Captain Klado contributes to the *Novoe Vremya* of January 15 another of the uncompromising articles on the naval situation which have already attracted so much attention. It is apparently the first of a new series, and is characterized by the same unflinching determination to look unpleasant facts full in the face which was so noticeable in his former letters.

The rumours that Admiral Rozhdestvensky would return, says Captain Klado, or would delay his voyage until he could be joined by the third Pacific squadron are based on the erroneous assumption that the Baltic Fleet expected to use Port Arthur as a base, and fail to take into account the difficulties which would be involved by adopting either the one or the other of these courses. "To wait at Madagascar is impossible. The French have already done everything that they could do without transgressing the limits of benevolent neutrality." A return "would involve the necessity of organizing afresh the vast and complicated scheme of coal supply during a second voyage round Africa, and the abandonment of the arrangements already made for the voyage across the Indian Ocean. It appears to me that the return of the fleet would be equivalent to the conclusion of the war, and in present circumstances that is unthinkable. No, the die is cast, and we must drain our cup to the dregs. We must help the second Pacific squadron by every means at our disposal; we must display all the energy of which we are capable in order to compensate for the weakness which was not prevented at its departure—but there can be no going back. I repeat—that would mean the end of the war. It cannot be denied that a fleet which is divided is weaker when alone than when there is another half behind it even at a great distance. We have only ourselves to thank for the position in which we are placed, and there is no way out of it; we must take the consequences of our mistakes. We should have been glad, indeed, to have the assurance of success, but we have no more than a hope. . . . All we can do, therefore, is to foresee the possibility of failure now, and at once to make energetic preparations for counteracting its consequences."

The nature of these preparations Captain Klado proposes to discuss in detail in a further article.

Continuing his review of the requirements of the naval and military situation, in the *Novoe Vremya* of January 16, Captain Klado urges that at the present moment particular attention should be directed to the defences of Vladivostok. Having regard to the paramount importance attached by the Japanese to the frustration of Russia's hopes of regaining the command of the sea, the possibility of a determined attack upon her last naval base in Far Eastern waters cannot be ignored. It would be unwise to assume that all the necessary precautions have already been taken, especially if it is remembered that the Siberian Railway has been strained to its utmost capacity in order to provide for the needs of the Manchurian army. The completion of the dry docks which were under construction when the war began should be taken in hand without delay, for without them the second Pacific squadron, even after a successful engagement, will be unable to repair its injuries with the necessary speed and thoroughness. Of equal importance is the question of thorough preparation for the establishment, at the shortest notice, of a flying base at any spot which Admiral Rozhdestvensky may select; for it is essential that, in the event of a partial success he should be in a

position to press home his advantage before the Japanese have had time to recover. The torpedo-boats and submarines which were unable to accompany the Baltic Fleet should be sent by rail to Vladivostok and put together again on arriving at the port. Finally, care should be taken to provide the fortress with an efficient apparatus for communicating by wireless telegraphy with Khabarovsk and Kharbin in case of its being isolated by the Japanese.

These measures presuppose the concentration of Vladivostok of an immense quantity of stores and material and of a large number of skilled workmen. Under the conditions at present enforced by the Ministry of War, however, the railway is unequal to the task, since all claims are subordinated to those of the army. Captain Klado contends that a true appreciation of the requirements of the situation demands that, until the conditions which he enumerates have been satisfied, the claims of Vladivostok should take precedence even of those of the army, and should be made a first charge upon the railway. This, he admits, would involve a very considerable sacrifice, but it is a sacrifice which ought to be made.

Captain Klado is wrong about the Baltic Fleet, and in a sense *The Times* is wrong, also. There is not the slightest compunction in Russia's conscience as to the abuse to which she subjects the hospitality of her ally's ports. We have her vociferating loudly about imaginary neglect of neutral obligations on China's part and imaginary infractions of Chinese neutrality by Japan, yet all the while she herself is violating French neutrality in the most flagrant and unblushing manner. The rumours circulated in January that the Baltic Fleet was to leave Madagascar at once on a three months' cruise in the Indian Ocean and elsewhere, preparatory to resuming its voyage to the Far East, were all moonshine. They may have been intended to afford some temporary relief of mind to France, who must be sorely perplexed between her chivalrous feeling towards her ally and her tormenting consciousness that by permitting Diego Suarez to be used as a Russian naval base, she has in effect become a belligerent and is openly fighting on Russia's side. But the pretended departure from Madagascar and the feigned cruise in the Indian Ocean ultimately took the form of another indefinite delay at Diego Suarez where Rojestvensky now is, and where he must all along have intended to remain since men and stores have since been carried thither for him by French Mail steamers receiving subsidies from the French Government. We ourselves believe that Russia, in spreading abroad the rumour of an Indian Ocean cruise, was not influenced by any sentiment of compunction towards France, but was essaying one of her proverbial ruses, her object this time being to throw Japan off the scent, and perhaps to lure the Japanese Fleet to go in search of Rojestvensky. However that may be, Klado was wrong. The Baltic Fleet did wait at Madagascar and is waiting there now, and it is an interesting fact that this prominent Russian naval officer has placed on public record that by allowing it so to wait France has "transgressed the limits of benevolent neutrality."

We must say, *en passant*, that the exceedingly gentle tone of the English press about this Madagascar business astonishes us. No Englishman wants to say a word against France. That is comprehensible. But just think what a clamour there would have been had Madagascar been a German possession!

Captain Klado thinks that until the conditions enumerated by him are satisfied—namely, the dry docks completed; the torpedo-craft and submarines which were unable to accompany the Baltic fleet, sent thither by rail; wireless telegraphic apparatus provided, and an immense quantity of stores

and material as well as a large number of skilled workmen collected—until these things are done, the claims of Vladivostok should take precedence of even those of the army. These things are not done, then, it would seem. And the latest news we had was that Vladivostok was being depleted of troops to feed Kuropatkin.

## THE TSAR'S MANIFESTO.

The latest manifesto of the Tsar is an astounding production. His Majesty asks his subjects to regard him as the champion of the peaceful development of Christian countries for many centuries to come. He would have the world imagine that in this iniquitous war he is fighting the battle of Christian civilization. No claim could be more despicable and more deceitful. This war, so far as Russia is concerned, can not be called anything but a war prefaced by broken engagements, precipitated by open theft, and having for purpose the aggrandisement of one country at the expense of all others. Such is the example which His Majesty holds up to our eyes as the peaceful development of Christian nations—peaceful because it takes the form of armed aggression; Christian because its premises are chicanery and falsehood and its consequences massacre and bloodshed. What right has the Tsar of Russia to disgrace the creed of the Occident by setting himself up as its exponent? He of all sovereigns on the face of the globe is least qualified to speak of peaceful development along Christian lines, since, for the sake of maintaining his own despotic autocracy, he withholds from his subjects the blessings of freedom and self-government which are essentially the outcome of Christian teaching; perpetuates a system degraded by the most shocking cruelties, and seeks by methods than which history shows nothing more merciless to incorporate alien races into the mass of his down-trodden people. The wonder is that the Christian world tamely allows itself to be parodied by such a despot. Who can pretend to be surprised hereafter when he finds that the East appraises the Christian civilization of the West at the value openly assigned to it by this Sovereign of all the Russias; assigned without protest on the part of the true Christians who are thus discredited? It is a very invertebrate kind of Christianity that tacitly allows itself to be thus disgraced.

## VLADIVOSTOCK.

The master of a British steamer, the *Darian* (?), which reached Moji on the 2nd instant, having carried a cargo of Cardiff coal to Vladivostok through the Tsugaru Straits, is represented as saying that about one half of the troops hitherto in garrison at Vladivostok have been withdrawn to the Shaho to succour Kuropatkin. The Russian General, according to this authority, knowing that the Japanese were receiving re-inforcements and that an attack was inevitable, addressed to St. Petersburg urgent demands for more men, but his requisitions could not be complied with owing to many unforeseen causes. Hence there was nothing for it but to make a heavy draft upon Vladivostok. The remnant of the garrison there is much dispirited.

It is hard to take this story *au pied de la lettre*. Twenty thousand men more or less could not make much difference to Kuropatkin and might make all the difference in the world to Vladivostok.

## CHINA.

Japanese newspapers comment in amused terms on the fact that the Russians have been driven out of Hsinmintun, that some of them were taken prisoners there, and that a quantity of food-stuffs collected by them in the town fell into Japanese hands. It is now incontrovertibly proved that all the while they were sending circulars round the world complaining of imaginary Japanese infractions of Chinese neutrality, the Russians were themselves in possession of a base of supplies guarded by their own troops within the West-Liao region. This story will at least give the world something to laugh at.

The Waiwupu is said to have addressed to the local officials concerned instructions in the sense that as the Russian Minister in Peking has complained of attempts made by the Japanese to enlist the services of Hung-hutsz in Mongolia and Manchuria, and as such enlistments would be breaches of neutrality, care must be taken to prevent them. The word which we translate "enlist" (*hennin*) implies the enrolment of these Hung-hutsz in Japanese ranks, a likely performance in sooth! Surely the officials of the Waiwupu must have thrust their solemn tongues into their cheeks when they issued these instructions. For do they not remember vividly how, when Japan complained that Chinese regulars accompanied Mischenko on his January raid, Peking eluded responsibility by pleading that they were not regulars but Hung-hutsz. One or the other they certainly were, and even if the benefit of the doubt be given to Russia, still how sadly comical do these protests of Mr. Lessar's become when he complains about imaginary enlistments of Hung-hutsz by the Japanese! There is not a molecule of solid ground whereon Russia can poise herself any longer for the purpose of this hypocritical attitude-nizing. After Hsinmintun and Niuchwang she had better try to descend into the atmosphere of at least reticence.

It has been emphatically denied that the German Authorities preferred any demand for the withdrawal of Chinese troops from any part of Shantung. Truly there seems to have been a deliberate attempt in recent days to bring odium on Germany's head by piling up false accusations. Germany has a great deal to shoulder under the best of circumstances, and the task will be intolerable if malicious newsmongers apply themselves to discredit her.

A military line has been laid from Antung, on the northern bank of the Yalu, to Lien-shankwan, near the Motien Pass. The distance is 75 miles. This line was opened to traffic on the 11th of last month, but we hear of it only now. Its uses become very evident when we say that Lien-shankwan is only 21 miles from Penhsihu, in other words, from the right of the Japanese position on the Shaho.

The report of the Green Island Cement Co., Ltd., for 1904 shows a divisible balance of \$345,055, after writing off \$101,840 for depreciation. It is proposed to place \$50,000 to reserve, pay a dividend of 20 per cent, and carry forward the balance, \$95,055. The addition to the reserve fund raises that fund to \$400,000.

The *South China Morning Post* says that Mr. Jamieson is sanguine that the French cruiser *Sully* can be refloated.

The accounts of the China Fire Insurance Co., Ltd., show a balance of profit for 1903 of \$236,374. It is proposed to pay a dividend and

bonus of \$7 per share, equal to 35 per cent, add \$92,364 to extra reserve, and distribute \$4,010 as a bonus to office staff. The balance at credit of working account at the close of 1904 was \$260,374.

A private letter from Peking, which the *North China Daily News* prints among its Notes on Native Affairs, states that the high officials in the Capital have only lately begun to recognise what has been patent to every one else outside Peking, that, with the close of the present war, China will have to pass through a grave crisis threatening the very foundations of her independence and integrity, and that to avert anarchy and chaos the forces of the Empire must be well armed and prepared for emergencies and immediate service. In view of this, we learn, that there is now evident a feverish anxiety among Manchu Civil and Military officials in the Capital properly to arm the various Banner Corps organisations, Manchu as well as Mongol and Chinese (Hanchun) Bannermen, quartered in Peking and its immediate vicinity. Up to the middle of February, the authorities have succeeded in providing some twenty-eight battalions of Bannermen with either Mannlicher or Mauser magazine rifles, not counting a force of some 7,000 Manchus who have been equipped with these modern rifles since 1902. But it is stated on reliable authority that at least 30,000 more magazine rifles are needed to arm these Banner Corps under mention, without which the defences of the capital would not be anywhere complete, and instructions have accordingly been telegraphed to the small-arms factories in the Yangtze provinces to lose no time in making the rifles needed, whilst contracts are being made with foreign arms manufacturing companies for the immediate supply of many thousands more. Finally, it must be understood that the Banner troops under mention are only those who have been selected during the past eighteen months to form the nucleus of a foreign-modelled army for the protection of Peking, and that if all the Banner Corps organisations (Manchu, Mongol and Hanchun, or Chinese) which are in existence be properly enrolled and armed, at least half a million more magazine rifles will be needed. As far as can be learned it is intended at present to have the Banner regiments prepared for immediate service, that is to say, by the middle of the coming summer, and they will amount to nearly 450,000 of all arms. It must also be understood that neither Viceroy Yuan Shih-k'ai's nor General Ma Yu-kun's foreign modelled forces are included in the foregoing. Of these latter, who of course are all of Chinese descent, there are according to reliable information, about 25,000 really useful and properly equipped men with good officers over them. Besides these there are some 85,000 men of inferior discipline but good quality, and partially armed with modern weapons, only waiting to be properly trained and officered like their better-drilled comrades.

The St. George's Society of Shanghai has decided that "natives of the Principality of Wales are eligible as members of the St. George's Society." This applies to Colonials of Welsh parentage also.

The Empress Dowager sent her personal congratulations and presents to Sir Robert Hart on his 70th birthday, Prince Ching and other nobles and high officials following suit.

A man was beheaded in Nanking during March on the public execution ground under orders of Viceroy Chou Fu. It appears that the doomed man was a scribe attached to the viceregal yamen, who somehow managed to get possession of the Viceroy's official seal. This he used on an order officially appointing a certain friend of his, for consideration of Tls. 20,000, head of one of the most lucrative bureaux near Nanking; all this, of course, without the Viceroy's or any of his confidential Secretaries' knowledge. The man who was deposed from the bureau came to Nanking and tried to get back the post by offering some one a large bribe. The Viceroy was then approached with a request for the post, in consequence of which the whole thing came out and the man who had been victimised Tls. 20,000

has had "to whistle" for his lost money. The Viceroy was greatly enraged at the theft of his official seal, and calling before him the culprit scribe, he put a few questions to him, and then ordered the man to summary execution. It is long since Nanking has seen such prompt punishment.

It is reported at Tientsin that a foreign merchant has petitioned for the right to run an electric tramway to Machiapu from Peking, and from there to Tunchow.

In one of the junks coming from Port Arthur an infant was born, the poor mother being landed in Chefoo in sorry plight after her terrible journey.

Foreign capital to the extent of Tls. 2,000,000 has been offered the Kiangsi people for the Kiu-kiang-Nanshang railway, but it is declined, although the people find themselves unable to raise the required sum in native circles. They pride themselves, says the *Tientsin Times*, on the fact that so far there is no foreign capital employed in their province.

The *Shanghai Mercury* understands that the Russians are about to start a newspaper in Hong-kong.

## ONE OF STOESSEL'S ORDERS.

(COMMUNICATED.)

Among the Russian effects found by the Japanese at Port Arthur are a number of "Orders of the Day" issued by General Stoessel and published in the official section of the *Novi Krai*. One of them relates to the American War correspondent, Col. Emerson, and sheds further light on the severity of the Russian press censorship in time of war: We reproduce it verbatim:—

September 16 (new style 29) 1904. No. 663. Yesterday, September 15th (new style 28th) there arrived from Chefoo in a little boat two correspondents of foreign newspapers,—one American and one Frenchman. As their boat appeared in distress and there was no one with them they were suffered to land without having obtained the required authorization of the Commandant of the Fortress,—General Smymoff, and without careful scrutiny of their papers. They gave their names as Edwin Edwinovitch Emerson and Marcel Smet Van Lerberge and admitted that they had seen military service, one (Emerson) as a colonel of volunteer cavalry in South America, now honorably retired, the other as lieutenant of infantry in the French army, now with the reserves. They carried official passports from their respective countries, properly vised by our Embassies at Washington and Paris. Col. Emerson's passport showed endorsements of a Japanese consular officer of New York, and of our General Staff at Liaoyang and again at Mukden. In addition to this Col. Emerson carried personal letters of introduction from Count Cassini at Washington and from Capt. Eddikine of the General Staff now stationed at Shanhaikwan. But neither correspondent had any official paper of authorization from our General Staff permitting him to serve as an accredited war correspondent with our forces.

They came to Port Arthur, they said, to see with their own eyes whether we are already eating dirt, as some of their newspapers at home assert, or, whether we are living a life of wine, women and song, as has been related by another American newspaper. After having examined these gentlemen personally I issued orders to the Chief of Staff to have them kept under his supervision for twenty-four hours, to take note of their papers and of their actions while within the fortress, after which, at his discretion, they shall be removed from Port Arthur, since they have no valid authorization to remain here. In every other respect they were to be hospitably entertained.

Orders are herewith issued to the authorities of the port, under no circumstances in the future to allow persons to come within the fortress without specific authorization from the Commandant of the Fortress, or, it goes without saying, without an equally valid permission from myself. No such authorization shall be given without previous examination of the papers and effects of persons who may arrive at this port hereafter. I request the Commandant of the Fortress to take the proper steps for carrying out this order.

Commander of the Outer Fortifications of Kwantung,

General Aide-de-Camp STOESSEL.

### THE BRUTALITY OF THE RUSSIANS AT MUKDEN.

Japanese journals contain circumstantial accounts of the incredibly brutal conduct of the Russians in Mukden on the 3rd of February, when they led around the whole town of Mukden in the guise of criminals 160 Japanese soldiers—including two officers—taken prisoners by them in the battle of Heikautai. These unfortunate men arrived at the railway station in the forenoon and were then formed into two ranks and marched off through the town. The march commenced at half-past 10 a.m. and lasted, with a brief interval at noon, until sunset, by which time the procession had returned to its starting point, the railway station. At the head rode a Russian officer, who is said to have frequently turned in his saddle and cautioned the men to move slowly—to *man man* as the Chinese onlookers describe it—and in the rear were two other Russian officers, while on either side marched an escort of Russian soldiers who constantly called out to the crowd to observe the results of Russian victories. About one half of the Japanese prisoners had warm clothing; the rest were without any such protection. As the time happened to coincide with the Chinese New Year the streets were crowded, and the Russians thus secured an ample audience to view this abominable cruelty. Our readers will agree with us that no language can adequately condemn the perpetration of such a savagery. Better things might be reasonably expected of North-American Indians. We are precluded from doubting the truth of the shocking story, for not only are the details most circumstantial, but the whole route followed is described from point to point. War is a brutalizing occupation. It has never failed to excite among those engaged some display of the elementary passions which lie latent in many bosoms, and in that fact some kind of excuse may be found for individual acts of cruelty. But this Mukden business took place under the auspices of Russian officers. It was a deliberately planned affair and it must have had the sanction of men high in command. It disgraces the Russian army permanently; disgraces them more than a thousand of the worst defeats could disgrace them. And these are the soldiers whose Imperial ruler is posing before the world as the champion of the peaceful development of Christian nations.

### ENCOURAGEMENT OF THE EXPORT TRADE.

The leaders of the *Seiyun-kai* have of late been devoting attention to the question of devising some system which shall have the effect of encouraging the export trade. They are said to have consulted with the officials concerned, with the Bank of Japan, with the Specie Bank, with the Nippon Yusen Kaisha, with the various guilds interested in major staples of export, and with influential men, the result being a draft of proposals which they hope ultimately to see reduced to a working basis. The *Kokumin Shinbun* gives the outlines of the project thus:—

#### FINANCIAL MATTERS.

- I.—To prevent violent fluctuations of exchange.
- II.—To provide facilities for bills connected with the import of raw materials for manufactured exports.
- III.—To make arrangements for silver loans at important harbours in China.
- IV.—To complete the banking organizations in Manchuria and Korea.
- V.—To make financial arrangements with regard to the transport of exports from the place of production to the port of shipment.

#### TRANSPORT MATTERS.

- I.—Reductions by the Government in the freight of exports or their materials carried by rail.
- II.—The adoption by all private railways of the rates of freight fixed by the Government according to the above clause.
- III.—Fixing the processes of transport arrangements on State lines.
- IV.—Opening for exports new routes, direct routes and connexions.
- V.—Reducing the maritime freights in home and foreign waters for exports.

#### GUILD MATTERS.

- I.—Establishment of guilds in special circumstances only.

### THE GERMAN RED CROSS SOCIETY.

The physicians and nurses of the German Red Cross Society sent out to establish a branch in Tokyo for the sake of Japanese soldiers, were entertained at the German Legation on the evening of the 4th instant. We are indebted to Baron Ishikuro for an account published by Japanese journals. There were present at the banquet about 50 guests, including the new comers: a number of Japanese officers headed by the Minister of State for War; several representatives of the Japanese Red Cross Society; Dr. Baelz, and Mr. Mosle, who has most generously placed his Awoyama residence at the disposal of the Society for hospital purposes. Baron Ishikuro speaks of the tactful and tasteful arrangements that characterized the banquet, and of the happily worded speeches delivered by Count Arco Valley and General Terauchi. He mentions also that his own acquaintance with Count Arco was first made 19 years ago when a meeting of representatives of the Red Cross Societies of the world took place at Karlsruhe. Already the Count showed keen interest in the objects of this noble charity.

### NOTES ON CURRENT EVENTS.

Japanese journals justly ridicule Russia's latest circular. It is a case, they say, of the proverbial brazen face of the bandit. So long as Russia sees her account in violating China's neutrality, she violates it without compunction. But from the moment when this occasion no longer presents itself, she begins to cry out about others violating it. Her diplomacy can scarcely be admired. The more it is exercised the clumsier it shows itself. The *Jiji* thinks that Japan is not sufficiently explicit and emphatic. It would have the Government formulate its charges more plainly and circumstantially against Russia. We can not say that such counsel commends itself to our judgment. One of the traits that we find specially admirable in Japan's conduct of this war is her self-restraint. Lying on her official table there is a pile of evidence convicting the Russian soldiery of brutalities which, were even a small fraction of them chargeable against an Oriental army, would throw all Europe into a fever of exalted indignation. Japan has confined herself to the baldest statement of these facts. She has made no attempt to convert them into a basis of public appeal against her enemy. By and bye her fine reticence will be appreciated at its true worth. And so it is in the case of these Russian circulars. Let Russia prefer her plaints *ubi et orbi*. If she can not take her punishment in manly silence, the more the pity for her sake. It is not for Japan to follow her example, or to give factitious importance to her outcry by echoing it back.

We notice that no attempt is made to identify the incident which the Russian circular describes; namely, the emergence of Japanese on the west of the railway in rear

of the Russian armies. When and where did it happen? We trust that it is true, and on a big scale too, but the Russians alone seem to be cognisant of the affair.

It is stated that the Japanese Government has received from the Governments of the Argentine and Chili republics the most positive official assurances that no truth whatever should be placed in the persistent rumours of their sale of war-ships to Russia, and that neither directly nor indirectly will any such transaction take place.

Lieut. Gilgenheim, brother of Captain Gilgenheim who was murdered by the Chinese pirates, arrived at Dairen on the 26th of February, having come from Europe in search of his brother. Japanese naval officers went out to meet him in the Bay and recounted all the facts to him. Subsequently he proceeded to Port Arthur to learn what he could about Captain Gilgenheim during the latter's stay at the fortress. His intention was to go thence to Chefoo, but there being no suitable steamer, the Japanese placed a torpedo-boat at his disposal. Naturally he was much gratified by this courtesy.

It is stated that inasmuch Gilgenheim as the murder of Captain Gilgenheim took place within the limits of the blockade declared by the Japanese, the Chinese Government has refused to be held responsible for the incident. That is a very curious point of international law.

General Hamilton, in company with Sir Claude MacDonald, was received in audience by the Emperor and Empress on the 2nd instant, preparatory to his final departure from the capital, which took place the following day. We read in Japanese newspapers that when Sir Ian Hamilton was about to leave the front, General Baron Kuroki gave a farewell banquet in his honour. The British General, replying to the toast of his health, said that probably General Kuroki's modesty prevented him from knowing how celebrated he had become, but Sir Ian assured him that the name of "Kuroki" was known all over the world, and that if the General should visit England, he would find himself kept busy with newspaper interviews and hand-shakings.

We observe that Mr. Alfred Curtis, editor and proprietor of the *Kobe Herald*, has been elected a Fellow of the Institute of Journalists. We congratulate him on the honour, which is certainly well merited.

Japanese securities have declined on the London market, as the following figures show:—

Four per-cents .....	£85.75. 6d. (2/6 fall).
War Bonds .....	£101.15. 3d. (5/1 fall).
Five per-cents .....	£99.55. 6d. (10/3 fall).
Six per-cents .....	£103.15. 0d. (unchanged).
New Six per-cents .....	£101.01. 0d. (10/ fall).

This decline is doubtless due, first, to the fact that the Vice-Governor of the Bank of Japan has gone West, obviously to raise a new foreign loan, and secondly, to the silencing of the peace rumours. Meanwhile Russian securities have fallen £1 in London and 1.75 francs in Paris.

The Rev. A. A. MacKenzie, M.A., D.Sc., is to become Chaplain of All Saints Church, Kobe. Except for a few details this matter was settled some months ago. Dr. MacKenzie, who is one of the teachers in the Peers' School, Tokyo, will complete his present engagement in that institution, and the Rev. T. S. Tyng will continue his valuable services in All Saints, for some time to

come. The congregation have just made great efforts to improve the financial position of the Chaplain, and have succeeded most admirably.

In addition to a patent of nobility the Emperor has conferred the First Class Order of the Sacred Treasure on Dr. Matsumoto. The distinguished physician's illness has taken a turn for the better, but as he is a very old man there is still much anxiety. Baron Matsumoto may be said to be the father of foreign medicine in Japan.

Representatives of the Merchant and Manufacturer's Union held a convivial meeting at the Seiyoken in Ueyo on the 5th inst. Baron Sone, Minister of State for Finance, Mr. Sakatani, Vice Minister, the Governor and Mayor of Tokyo, and other guests were present, the convives totalling some 500. After listening to various speeches the meeting passed a resolution in the sense that as Japan was winning victory after victory in the present war, the restoration of peace was probably not far distant, and in view of that fact it would be necessary for merchants and manufacturers to place the organization of their union on a more assured basis. A committee was appointed for the purpose. Baron Sone, in his speech, dwelt upon the desirability of circulating the bonds of the State loans as widely as possible through the empire and among the middle-lower classes, so as to promote the growth of an effective spirit of economy.

The following letter, which appears in *Bradstreet's* of January 14th, has much interest at the present moment:—

SIR.—Russia is the greatest oil-producing country in the world, and its influence in the oil markets of the world will tend to increase as the Russians begin to develop the new oil deposits on the island of Saghalien, near the east Siberian coast. The vast oil deposits of Saghalien have been known to the Russians for some time, but owing to the remoteness of this colony, to the small population, and to the absence of enterprise, these deposits have remained undeveloped. Now that the Far East is attracting the interest of the whole world, the Russians have decided to make the island profitable. The Russian Saghalien Oil Company is already being formed, and its office has been already established at Charkoff, the centre of Russia's iron and coal industry. This company will furnish the necessary fuel supply to the Russian navy on the Pacific, now that the fuel question has been pushed to the front by the refusal of the English and Japanese coal merchants to supply Russian orders for coal. In consideration of this obligation to furnish to the navy liquid fuel, the Government has given the new company a monopoly. The new concern intends to conduct a large trading business in crude oil and in kerosene and other refined products in the markets of eastern Asia. The quality of this product seems to be very high, the assays demonstrating that the oil is not inferior to American oil. The immense deposits, the development facilities and the small distance to eastern markets insure to the new products cheap prices. Therefore Saghalien oil may be a dangerous rival to the American product.

Charkoff, Russia.

N. STEINFELD.

It is reported that as one result of the war Japanese fishermen and their Norwegian employees are reaping a harvest of whales on the Chishima coast. The Russians have abandoned their share in the fisheries for very obvious reasons, and thus whereas only 46 whales fell to the Japanese share in the season ending March 1904, no less than 196 have been taken this season.

The repairs of the *Sungari* having been completed at Nagasaki, she has steamed away for Saseho. This vessel was originally said to be in quite a hopeless condition. Then, even when she had been raised and towed to Nagasaki, rumour alleged that she could not be repaired so as to render her seaworthy. But apparently these pessimistic

views have proved incorrect. As for the *Vayag*, it is understood that work is to be resumed upon her during the present month. Nothing is wanting excepting a specially powerful pump—which has been procured—and moderately warm weather, which is now at hand. It will be a satisfaction for the Japanese to add to their navy even one of the Russian Fleet.

Mr. Odagiri, Japanese Consul-General at Shanghai, has returned to Japan on leave. He says that among goods despatched from Shanghai to Chinwantau some are certainly for the Russians, but at present there is no opportunity of delivering them. The Russians interned in Shanghai have of late abandoned their custom of coming in large numbers to the settlements, and the attitude of the foreign consular bodies is strictly impartial. Since last summer the Japanese population of Shanghai has increased by about 700, and there is no little difficulty in looking after their affairs. Mr. Odagiri thinks that Japan has gained largely in China's confidence and esteem since the commencement of the war.

On the 4th instant the Tokyo City Council—we read in the *Kokumin*—adopted the municipal budget for the current year, certain amendments having been effected in the originally compiled document, the result of which amendments was a reduction of 176,379 yen out of a total expenditure of 1,845,809 yen. The income of the city will be obtained from rates levied on the basis of last year. The revenue is estimated at 1,669,429 yen; the ordinary expenditures at 1,463,731 yen, and the extraordinary at 205,699 yen. It must be confessed that for a city of 1½ millions of inhabitants an annual outlay of 1,669,430 yen is remarkably small.

The *Chicago News* has a paragraph too good not to reproduce. We reprint it, of course with all due apologies to Mr. Richard Harding Davis:—

Richard Harding Davis feels as though he could lick the Japanese with one hand tied behind his back if international courtesy did not disapprove of such performances. Mr. Davis is not about the way he was treated and grows hotter every time he thinks of it. If the thing goes on he will not need to use any steam heat this winter. When Mr. Davis first went to the Far East he was inclined to excuse the Japanese under the impression that they did not know who he was, but when they found out and still refused to let him take charge of the war, he could only conclude that their conduct placed them almost beyond the pale of good society.

Vice-Admiral Kataoka, commander-in-chief of the Third Squadron, and his staff are to leave Tokyo by the 4.30 train on the afternoon of the 22nd instant. Naturally the Admiral's destination is not mentioned.

The gentleman mentioned in Reuter's telegram on Thursday morning as having been appointed Consul-General at Yokohama is, doubtless, Mr. Henry B. Miller, American Consul-General at Newchwang, who is now in Washington on leave.

#### FORMOSAN GARRISON.

Some thousand soldiers belonging to the garrison in Formosa arrived at Yokohama, at noon of March 9th by the steamer *Tyenshin Maru*. They passed the night in private dwellings at Isezakicho and other streets adjoining, the commanding officers being provided for in the restaurant Mantetsu, near Yoshida bridge. This morning, at 8 o'clock the troops will leave for Tokyo. It is added that to-day and to-morrow more troops from the same island are expected to arrive here.

#### THE MCCLURE-BAKER WEDDING.

On Saturday was celebrated the wedding of Miss Evelyn Mary Josephine Baker, daughter of Mr. Thomas Summers Baker, of the Hongkong and Shanghai Bank, Yokohama, and Mr. Adam Johnstone McClure of Yokohama, son of Mr. William McClure, J.P., of Clairmont, Lockerbie, Dumfriesshire, Scotland. The civil ceremony took place in the morning at the British Consulate before Mr. J. Carey Hall, J.S.O., H.B.M. Consul-General, the witnesses being Messrs. P. A. Cox and S. Warming (Danish Consul). The religious ceremony was performed at the Roman Catholic Church in the afternoon, Pere F. Pettier officiating. The church, which had been beautifully decorated with flowers and foliage by Mrs. Manley, was quite filled when the service began. The bride was given away by her father. There were three bridesmaids, Miss Eldridge, Miss Muriel Lloyd Thomas, and Miss Doris Healing. The bridegroom was accompanied by Mr. P. A. Cox as best man, and by Messrs. Johnstone McClure and S. Warming as groomsmen. Messrs. J. F. Cox-Edwards, C. Gibbens, G. N. Fairhurst, and A. R. Owen acted as ushers.

The service was full choral, Mr. Home being organist, while Mr. W. Karl Vincent conducted the singing. Mrs. J. P. Mollison gave the solo "Ave Maria" (Cooper's) in her most charming fashion, Mr. Salinger rendering the cello obligato with fine effect. The quartette "In te Domine speravi" (Mendelssohn) was effectively given by Madame Lacroix, Miss Mendelson, Mr. A. E. Cooper and Mr. Stoltz.

The bride was beautifully attired in ivory-white satin in the early Victorian style, with court train. Bodice and train were trimmed with Carrickmacross lace and orange blossoms. She wore a tulle veil and carried a beautiful bouquet of white roses.

Two of the bridesmaids, Miss Eldridge and Miss Muriel Thomas, wore pink taffeta pompadour silk gowns, Directoire style, with early Victorian black bonnets and black mittens, and carried black sticks with pink posies and streamers. Their hat strings were fastened by gold pins presented by the bridegroom. Miss Doris Healing wore a pink satin frock, early Victorian, with bonnet, and carried a basket of pink hyacinths.

Mrs. Baker, the bride's mother, wore biscuit coloured *crêpe-de-chine*, trimmed with lace, a rose toque and ermine stole, and carried a bouquet of pink and yellow hyacinths.

Later in the afternoon a reception was held at the residence of the bride's parents, No. 70 Bluff, which was handsomely adorned with white blossoms. Mr. and Mrs. Baker met their guests in the reception room and Mr. and Mrs. McClure received their friends in the drawing room.

The toast of the bride was proposed by Mr. G. H. Barclay, C.M.G., Secretary of the British Legation (Sir Claude Macdonald, K.C.B., G.C.M.G., H.B.M. Minister, being unavoidably absent). In the course of his remarks Mr. Barclay adverted to the fact that the personal names of the newly wedded couple were similar to those of the first parents of mankind, but he expressed the conviction that their married life would not be disturbed by any serpent. Mr. McClure briefly acknowledged the toast and proposed the health of "The Bridesmaids," with which he coupled the name of the best man, Mr. Cox. Mr. Cox responded, referring in the course of his speech to the engagement of one of the bridesmaids. A cold collation was served in the dining room. The wedding presents, which were very handsome and costly, were on view.

Mr. and Mrs. McClure left in the afternoon for Dzushi. The bride's going-away dress was of pale blue cloth embroidered with pink roses. She wore an ermine toque with pink roses and an ermine stole and muff.

## THE MILITARY SITUATION.

March 3rd.

IT is not possible to agree with Reuter's dictum that the Taling Pass is of the same importance in relation to Mukden as Motienling was to Liaoyang. If for "Mukden" we substitute "Fushun" the statement would be tolerably accurate, but Taling does not cover any direct advance upon Mukden. It covers the advance upon Fushun, which is the main base of KUROPATKIN's left, and is a position of very great importance. Fushun, however, is some 26 miles from Mukden, and a march against the latter *via* the former would be an extensive flanking movement, whereas Motienling lies in the direct route of an army advancing against Liaoyang from the east, that is to say, by the main road from Fenghwangching.

A careful examination of the official reports seems to indicate that Chiupingtai will be the scene of the next serious engagement. The reader can easily construct a diagram that will greatly help him to appreciate the situation. Let him take a point A and from it draw two lines, one running south by west, the other due east; let him measure along the former of these lines a distance of 47 units (miles), calling the point thus found B, and along the latter a distance of 26 units (miles) calling the point thus found C. Then A is Mukden, B Liaoyang and C Fushun. Next let him draw north-east from B a line along which he measures a distance of 32 units, calling the point thus found D, and let him prolong the line to an equal distance (32 units) to E. Then D is Pehsihu and E is Chinghoching (or Taling). Now if from C he draws a line south-east 25 units long to a point F he obtains the position of Chiupingtai, which is equally distant (25 miles) from Pehsihu. We know that Chinghoching has fallen into the possession of the Japanese and that they are moving northward from it, pushing the Russians before them, that is to say, moving towards Chiupingtai. We know also that a part of Kuroki's army is moving north-east from Pehsihu, and had reached a point 12½ miles distant from it at the date of latest official advices. Consequently this force also was heading for Chiupingtai. This Chiupingtai is understood to be heavily fortified and to be garrisoned by a strong Russian army, probably fifty thousand men. Its capture would lay open the way to Fushun, and the capture of Fushun would place the Japanese right in rear of the Russian forces in the Shaho valley.

Intelligence from correspondents, which, being sent across the field wires, must be more or less credible, says that the Japanese forces, in spite of great difficulties of ground and weather, have pushed close to Chiupingtai. The Russian casualties in the engagements since this wing of the Japanese army commenced the offensive are stated to be 3,000, and the prisoners are put at 100, the captured machine guns at 10.

With regard to the operations on the left flank, we learn from the same source that Shangtsaimun has been occupied. Shangtsaimun lies considerably beyond the west bank of the Hun. It will be remembered that the battle of Heikautai ended in the Japanese left being planted at Chitaitz on the west bank of the Hun, while the Russians held the region westward and northward. Apparently the Japanese are now invading this region. That is to say, they are pushing westward and northward

from the Hun, and are consequently engaged in a turning movement on this flank also. In short they are seeking to envelop the Russians from the east and the west simultaneously.

Concerning the "sharp fighting in the vicinity of the railway bridge" reported by Reuter and said to have ended in a draw, it is of course the fighting which took place on the night of the 28th of February, when 5 companies of Russian infantry, under cover of a concentrated artillery fire, attacked the Japanese outpost at Lamutun on the railway. Inasmuch as Lamutun remains in Japanese possession, we fail to see how the engagement can be said to have been indecisive. The Russians appear to have fought with desperate valour, for they left 60 dead in the Japanese trenches. As is natural under such circumstances the casualties of the defenders were comparatively small, only from 50 to 60 killed and wounded.

There are rumours that the Japanese have actually taken Chiupingtai and are advancing upon Fushun, but we are persuaded that the Russians will not be driven from Chiupingtai without a severe struggle.

It should be observed, in order to complete the analysis of the situation, that the movements on the right do not seem to be limited to a convergence of forces from Pehsihu and Chinghoching (Taling) upon Chiupingtai. Considerable forces appear to be operating still further eastward. We know from the official reports that a body of Japanese commenced, on the 19th instant, to advance northward along the main road from Hanchang to Fushun, and that they occupied successively Weitszku and Kinkouku, and we learn from private wires that they advanced subsequently to Machwantsz, on the same road. It seems, further, from a general expression used in the official reports, that there is another column advancing from the direction of Kingking and Yungling, namely, along a road still further north. This last movement may not be in any considerable force. It may be simply of a covering nature. But its development is worth observing.

As is inevitable in such circumstances reports evidently exaggerated are reaching Tokyo. One speaks of the almost complete annihilation of a Japanese unit, and another puts the total Japanese casualties at 1,300 against 3,000 on the side of the Russians. It is useless to dwell upon these incidents pending the receipt of official intelligence.

Meanwhile we may soon look for marked activity along the whole Japanese line. The Right Army's enterprise will not be condemned to isolation as was the unhappy essay of KAULBARS and GRIFENBERG at Heikautai.

Doubtless the Japanese had been preparing this strategy for some time with all the attention to details for which they are remarkable. The result is that their troops have been able to operate in piercingly cold weather without being climatically disabled. But they must suffer greatly. Probably we have here an illustration of the favourite axiom of the Japanese soldier, namely, that for every pain he suffers himself, his enemy feels an equal pang. That is a fine thought for sustaining energy.

March 4th, a.m.

Strange rumours are published by the *Asahi Shimbun* this morning from its correspondent at Kaufontz. The first of these rumours is to the effect that on the 7th instant ten thousand Russian troops reached Laopien, which is 20 miles south of

Hsinmintun. Whence this force had come or whither it was heading the telegram does not say. A second report alleged that a Japanese force entered Hsinmintun on the morning of the 1st. Fuller intelligence is needed before we can attach credence to either of these statements. That the Russians should be found in the neighbourhood of Hsinmintun is nothing new. They have been visiting the place again and again ever since they occupied Mukden, and there is incontrovertible evidence that they have used it as a basis for obtaining supplies. But to learn that a Japanese force has at length marched into the same region would be something novel. We trust that the rumour is true. It appears to us wholly preposterous that on a plea of respecting China's neutrality Japan should exclude herself from a district to which Russia, by deliberately violating that neutrality, has constant access. Were there no military advantages in question the matter might be regarded as academical. But there is a very important military advantage, namely, that the Hsinmintun route is KUROPATKIN's chief avenue for receiving local supplies. Why should he be tamely suffered to disregard the neutrality which Russia makes such a fuss about?

It should be noted in this context that the question of Hsinmintun is becoming very imminent. Changtan, on the west bank of the Hun, Hsinmintun, on the west bank of the Liao, and Mukden, on the northern bank of the Hun, lie at the angle of a triangle almost equilateral. The longest side—the base—of the triangle is the line drawn from Changtan to Mukden, which measures 35 miles. In other words, by following the west bank of the Hun northward an army would reach Mukden after a march of 35 miles. The next longest side is that between Hsinmintun and Mukden; a distance of 32½ miles, and Mukden may be said to lie due east of Hsinmintun. Finally the shortest side is the line between Changtan and Hsinmintun, which measures only 30 miles. We know from the official report received in Tokyo on the 2nd instant that the Japanese had already occupied Changtan. The exact date of the occupation is not mentioned, but as the expression used is *sude ni teki wo gekijo seri*, we infer that the operation can not have been later than the 1st, and that it probably took place on the 28th of February. The same dispatch announced that the Russians had been driven from Sufangtai. This last place lies on the north-west of Changtan at a distance of 10 miles. It is not on the direct road from Changtan to Hsinmintun, being somewhat to the north of the latter. But these movements made it evident that the left wing of the Japanese Army is sweeping northward between the Hun and the Liao. Such a course might involve the occupation of Hsinmintun, and certainly would involve it in the event of any Russian troops being found in its vicinity. The Hun and the Liao rivers unite at a point in the vicinity of Niuchwang. Northward of the latter place their waters constantly diverge, and are 32½ miles apart at Mukden. The Japanese left is operating in the V-shaped district comprised between the two streams. If it meets with no effective check it will ultimately, so far as we can see, advance upon Mukden from the west and even from the northwest; that is to say, it will attack the Russian position from the latter's right and possibly its right-rear. Meanwhile on the other side the Japanese right is advancing upon Fushun. If it

carries that place, it will move upon Mukden direct from the east; that is to say, it will attack the Russian position from the latter's left and possibly its left rear. That seems to be the strategy of the Japanese staff. It is a highly adventurous strategy, and its success depends not merely upon the ability of the two wings to overcome the obstacles which KUROPATKIN will surely oppose to their advance, but also on the ability of the centre to hold its ground, and thus defy any Russian attempt to drive a wedge between the two wings. It will have been observed that the official report received on the 2nd spoke of a great counter-attack (*dai-gyakushu*) delivered by the Russians along the line from Chenchieh-pau to the east bank of the Hun. That was a wedge-driving attempt. A Japanese column—probably an army—is sweeping up the west bank of the Hun and the Russians made an essay to sweep down the east bank so as to sever communications between that column and the Japanese centre. It was evidently a powerful attempt since the term *dai-gyakushu* is employed, and it failed. Thus far, indeed, things have gone well with the Japanese on both sides. What inspires anxiety is the idea of campaigning in such weather as must still be prevailing.

On Saturday morning the belief in Tokyo was that the Russians had been driven from Chiupingtai and that the Japanese van was within from 15 to 17 miles of Fushun. But without official confirmation this statement must be received doubtfully. Everything pointed to a resolute Russian stand at Chiupingtai, which is the natural outpost of Fushun. It is possible, however, that Fushun itself having been very strongly fortified, no great importance is attached by the Russians to outlying positions.

It must be remembered that the fighting may be said to extend over a front of nearly 90 miles. In the centre of this immense extension active operations have not yet commenced. There both sides are so strongly entrenched and fortified that each is naturally groping for lines of least resistance on its flanks. There has been no such battle in history so far as our knowledge goes. Nothing of the kind would have been possible in the days of short-range weapons, without the employment of forces too colossal to be conceivable.

March 4th, p.m.

Since the above was written we have a further installment of news received in Tokyo on the 3rd instant. Broadly speaking it indicates that the Japanese attack is progressing favourably. Perhaps the most important item of news is that the Japanese extreme left has reached the Liao River, driving out the enemy from all the region between that and the Hun, as far as Hsinmintun which has actually been occupied and proof positive of its previous occupation by the Russians has been found in the form of a quantity of provisions and fodder stored by them there. Indeed we gather from the official report that the Russian forces had actually to be driven from this place as well as from Tamintun, which fact constitutes an interesting comment on the last circular addressed by Russia to the Powers, complaining of the non-sanctity of Chinese neutral territory. When the Government in St. Petersburg penned that circular, it did not anticipate that in less than a week the Japanese would actually be driving Russian troops from that very territory.

As to the region between the Hun and the Shaho—the region northward of Heikautai and Chenchieh-pau—no clear indications are

given: we are only told that the Japanese are breaking the enemy's defences and pushing him to the northeast; that is to say, in the direction of Mukden.

All the above movements are on the left—the Japanese left. They signify that the Japanese, on that side, are moving against Mukden from the west and the south-west. They are moving very quickly too, for on the 2nd we heard of them being at Chang-tan, and on the 3rd they are at Hsinmintun, 30 miles distant and within  $32\frac{1}{2}$  miles of Mukden.

In the centre it does not appear that any operations are in progress. The two sides are watching each other closely.

On the right one column has crowned the heights beyond the Shaho and was fighting at the date of latest advices. Further east, the Penhsihu column had pushed the enemy back to his main line of defences—presumably at Chiupengtai—and was engaging him there.

Still further east, namely in the Hsingking district, the enemy had vainly endeavoured to drive back the Japanese, but what advance, if any, the latter had made we are not told.

The sum of the matter is that the enveloping movement continues from the east and the west simultaneously. Six Japanese columns appear to be directly engaged in it. Considering the enormous extent of front over which they are operating, the task of co-ordinating their movements must be stupendous; and considering the time of year, the sufferings of the troops must demand great fortitude.

March 5th, a.m.

This morning there is no fresh intelligence. Tokyo newspapers publish telegrams from Yinkow and Tientsin which add nothing to our previous knowledge of the situation, namely, that two great flank movements are being essayed by the Japanese and that both have thus far progressed at least as well as could have been anticipated.

Much importance is attached to the occupation of Hsinmintun, which cuts off the Russians from their prolific source of supplies coming from the Kinchow direction. Thence there runs a fine road due east to Mukden, but along this road the Russians are sure to offer resolute resistance. In fact we already hear of their having sent out twenty thousand men to Laopien, which lies between Mukden and Hsinmintun. It is probable also that they have strong defences on this side, and much depends on whether the Japanese are in sufficient force to outflank these defences by a movement further north.

On the other side—the east—there is sure to be a desperate fight at Fushun. Indeed we expect to hear of a sanguinary struggle at Chiupengtai and possibly at some points on the Hangchang-Fushun road as well as on the Hsingking-Fushun road, before Fushun itself is reached. The Russians, it will be remembered, have constructed a railway between Mukden and Fushun and have made a military road from the latter to Tieling. They are thus in a position to concentrate heavy forces in the Fushun region, and already rumour speaks of their having sent the main part of their reserves in that direction.

Meanwhile there are as yet no symptoms of KUROPATKIN's moving. He has three courses to choose from. He may either remain quiescent, trusting to his wings to beat back the Japanese turning operations. Or, when these operations have developed so as to involve a very large part of the

Japanese forces, he may strike boldly at the enemy's centre. Or he may at once draw off his troops, uncover Mukden and retire upon Tieling. Apparently he has selected the second plan with all its dangers, the chief of which is that should either of his wings be driven in, it will be too late for him to extricate his troops in the centre. We are witnessing at a long distance the most momentous event of the whole war; a struggle that may leave an indelible impress on the Far East for centuries to come.

As to the forces that KUROPATKIN has at his disposal, there are great discrepancies. A German military expert—Colonel GAEDKE—says positively that, on indisputable authority, the total number of Russian troops which had reached Manchuria station up to November was 432,000. If we deduct from this force 100,000 on account of casualties, and troops not in the fighting line, it would result that the Russian General has an army of some 330,000. The *Kokumin Shinbun* gives the following detail:—

	Battalions.
Siberian First Army Corps .....	28
.. Second Army Corps .....	24
.. Third Army Corps .....	24
.. Fourth Army Corps .....	32
.. Fifth Army Corps .....	32
.. Sixth Army Corps .....	32
European Russian Tenth Army Corps .....	32
.. Seventeenth Army Corps .....	32
.. First Army Corps .....	32
.. Eighth Army Corps .....	32
.. Sixteenth Army Corps .....	32
.. Fourth Army Corps .....	32
Five Brigades of Rifles .....	40
One Brigade Moscow Picked Troops .....	8

Total, twelve Army Corps and Six Brigades, making 412 Battalions. Nominally the battalion in Russia is 1,000 strong but it may probably be taken at 800 on the average, which would make 329,600 men, and to these must be added 30,000 cavalry and 35,000 artillery with 1,500 guns, making a grand total of 394,600 of all arms. But it is not sure that the Fourth European Army corps has arrived altogether, and on that account 15,000 must be subtracted, while a similar deduction of effectives may be taken as the result of Heikautai. This would bring the available total to 364,600. On the other hand, French authorities put it at a considerably smaller figure, and perhaps the number closest to the truth is 300,000. It is not likely that any numerical inferiority exists on the Japanese side.

March 5th, p.m.

The latest official report shows that, contrary to expectation, the Russians have failed to make any effective stand at Chiupingtai. No information on that subject is directly conveyed by the report, but as Chiupingtai is 25 miles from Fushun in a southerly direction, and as the Japanese have reached Machuntau, which is on the same road—namely, the Taling-Fushun road—and only 15 miles from Fushun, it may be assumed that the Russians have been forced past Chiupingtai, and that the Japanese van was 10 miles farther north than the latter on the 3rd instant. On the other road further east, namely, that leading from Hangchang to Fushun, the Japanese advance has been equally rapid. They have reached Tita, which is 15 miles south-east of Fushun, and will be found on our map of the Hangchang region. Of the third column which is apparently operating in this quarter along the road still further east—namely, that from Hsingking (or Yungling) to Fushun—the last report says nothing.

With regard to this failure to make a resolute stand at Chiupingtai, the explanation seems to be furnished in a message sent

across the military wires on the 4th inst. by the *Asahi's* Hanchang correspondent and published by that journal in an extra on the forenoon of the 5th. This telegram says that the Russians on the Taling-Fushun road mustered about 30,000, but that they seemed to have broken down under the strain of several days' fighting, and that they were apparently in retreat.

Looking further west, namely, in the direction of the main position, it is seen from the last report that the Russians, during the night of the 3rd, made four determined attempts to recover the heights above Hou-Sunmupautsz and Tangkiatun, on the north bank of the Shaho, which the Japanese had carried on the 1st. These attempts were defeated, and we may assume that the Japanese force which moved north-east out of Penhsihu across the Shaho on the 1st inst., has established touch with the troops operating against Fushun.

In the centre the Russians continue their petty tactics—small and ineffectual attacks. They are probably feeling for an opening. KUROPATKIN may believe that the Japanese centre has been greatly weakened to furnish troops for the flanking movements on both wings, and if he can discover practical evidence of such weakening, his hope lies in a vigorous assault. The extremities of the Japanese line being 90 miles apart, there should be an opportunity to drive in a wedge somewhere. But unless KUROPATKIN hastens, he will be enveloped before he can strike even one powerful blow.

On the west of the railway we find the turning movement progressing vigorously. There are apparently three columns at work, just as there are in the Hanchang region. One column is sweeping the Russians towards the north-east in the space between the Shaho and the Hun. It has forced them back as far as the line from Shahopau (on the Mukden main-road where it crosses the Shaho) to Suhupau on the east bank of the Hun, thus driving them from all the positions held by them in that quarter subsequently to the Battle of Heikautai. Another column is pursuing exactly the same strategy on the west of the Hun in the district between that river and the Liao, and this column has advanced to a line of which the southern extremity—that resting on the Hun—is 15 miles from Mukden, and the northern extremity is 12 miles from that city. Still further west there seems to be a third column, the column that has driven the Russians from Hsinmintun and Tamintun. We hear nothing of this third column in the last report, just as we hear nothing of the Hsingking column. It is quite within the range of possibilities that the Hsinmintun column may strike at the Mukden-Tiehling railway, and the Hsingking column at the Fushun-Tiehling road. That would complete a beautiful strategical plan.

KUROPATKIN is understood to have telegraphed that he has repulsed the Japanese advance. We may be quite sure that no unfavourable news from KUROPATKIN will be given out in St. Petersburg at present. Indeed it is not too much to expect that his telegrams will all be edited with an unsparing hand.

March 6th, a.m.

This morning there are no telegrams to inform us as to the progress of events subsequently to the date of the advices on the 5th. It will have been observed that the official reports on the present occasion are somewhat reticent as to dates. The public knows only that such and such a message reached

Tokyo on such and such a day. For the rest, the reader is left to draw his own inferences as to the precise time of each particular incident. Thus the telegrams published in Tokyo on Sunday afternoon—the latest news at this moment of writing—had been received by the Headquarters Staff on the 4th instant, and we may fairly assume that they depicted the state of affairs up to the morning of the 4th. Since then there has been two days fighting—the 4th and the 5th—which must have produced a material change in the situation. The Tokyo leading journals interpret the state of affairs on the morning of the 4th just as it has been interpreted in these columns. They consider that two wide turning movements are in progress on the east and on the Heikautai side, but they do not pay attention to a feature which seems to us one of the most interesting of all the developments, namely, that Japanese columns appear to be threatening the rear of the Russian position, one from the Hsingking direction, the other from Hsinmintun. All are agreed, however, that things are progressing very favourably, and that though a terrible struggle has still to take place, the preliminaries have been thus far advantageous to the Japanese. The plain fact is that Marshal OYAMA is adopting against the enemy precisely the tactics already essayed by the latter against the Japanese, with however, two cardinal differences; the first, that whereas KUROPATKIN essayed to turn the Japanese left in January at Heikautai, OYAMA is essaying to turn the Russian left and right simultaneously in March; the second that both of OYAMA's movements are on a much wider scale than were either of KUROPATKIN's. Now, indeed, the toils have been drawn considerably closer. The cusps of the inner Japanese crescent by which Mukden was embraced on the morning of the 4th of March, namely, the western cusp at Laopien and the eastern cusp at Tita, were only 45 miles apart, whereas the two extremities of this line were 70 miles apart when the enveloping movement commenced. We speak of the "inner crescent" so as to exclude the somewhat mysterious columns advancing *via* Hsingking and Hsinmintun, about which we are left largely to conjecture. Evidently the great battle, or rather the great battles, will be fought at Fushun, at some point on the road running westward from Mukden to Hsinmintun, and probably at the bridgehead on the Hun immediately north of Shahopau. There will be a terrible list of casualties, but, on the other hand, it is not an unreasonable hope that no future battle will be on such a scale of magnitude as this.

There is some reason to believe that factors independent of strategy or tactics are handicapping KUROPATKIN. News of the domestic commotions in Russia has reached his troops and must have greatly discouraged some while inspiring others with a disinclination to continue the war. Among the officers, on the other hand, the receipt of such intelligence may have awakened a desire to save the situation at home by winning a victory abroad. It appears also, according to the statements of two Russian officers who recently came into the Japanese lines, that the troops are talking of the probability of KUROPATKIN's recall, and such gossip certainly can not tend to increase their confidence.

6th March, p.m.

The telegrams officially published in Tokyo show that up to the morning of the 5th instant no further advance had been

achieved along the two roads leading to Fushun. It will be remembered that on the 3rd the Japanese columns working on these roads had pushed the enemy back to Tita on the Hanchang-Fushun highway and to Machuntau on the Taling-Fushun road, both places being 15 miles from Fushun. Apparently the main defences of Fushun are here, and a desperate resistance is being made. KUROPATKIN's despatch forwarded by Reuter doubtless refers to this part of the field, and relates the events of the 4th instant. We may take it for granted that the so far successful resistance of the Russian troops at these points has lost nothing in the telling, but none the less the fact is that the positions had not been carried up to the morning of the fourth.

Travelling now westward, we find that after the four counter-attacks made by the Russians during the night of the 3rd against the Japanese columns which had crossed the Shaho on the immediate west of the Penhsihu-Fushun road, the Japanese resumed their forward movement on the 4th. That day, one column captured the enemy's first position; the other captured a number of redoubts along the heights. It may be recalled to our readers' recollection that the road northward from Penhsihu—on which place the extreme right of the Japanese army rested in the Battle of the Shaho—is a single line as far as Pienniulupau, whence it bifurcates, one branch running north-east to Fushun, the other westward along the northern bank of the Shaho. It is in the angle between these two roads that the operations referred to above took place. From Pienniulupau all along the banks of the Shaho eastward and westward, the hills are crowned with Russian redoubts and trenches. These defences were partially forced during the 4th and on the morning of the 5th. Between Pienniulupau and Shahopau—where the Mukden road crosses the Shaho—the distance is 18 miles, and here especially every part of the ground is occupied by Russian defences—trenches, entanglements, pit-falls and redoubts. The eastern section of these defences has now been forced.

Still further west, at a point 5 miles east of Shahopau and therefore virtually the centre of the whole position, the Japanese commenced their attack on the morning of the 5th and driving the enemy from his outer into his inner line of defences, are surrounding him there. The importance of this news is that it indicates the beginning of the central assault. The Japanese are now, therefore, pushing forward along their whole line.

On the west of the railway between the Shaho and the Hun, the advance continues. Hanchangpau has been captured. This is the point on the main railway whence Kuropatkin, for the purposes of the Heikautai turning movement, caused a secondary railway to be constructed running westward to Suhupau on the Hun. From this fact the degree of the Japanese advance in the region between the Shaho and the Hun may be inferred. The next station northward on the line, Sukiautun, is reported to be in flames, which probably means that the Russians are retreating. At any rate this Japanese advance up the railway on the west threatens to seriously compromise Kuropatkin's troops holding the line of fortifications between Shahopau and Pienniulupau.

As to the movements of the force operating between the Hun and the Liao, there is no further intelligence.

March 7th, a.m.

Correspondence from the front shows that the Russians, in the region between the Hun and the Liao, set fire to all the villages when retreating before the Japanese. That was a natural military measure, but it is terrible to think of the suffering it must have entailed upon the unfortunate inhabitants, who thus found themselves deprived of shelter in the midst of snow and ice.

From the same correspondence we learn that in the fighting on the 4th instant on the immediate west of the railway—fighting described in the official report as a vehement advance—the Japanese captured at Sufangtai several Russian mortars and machine-guns. This Sufangtai is not the place of the same name beyond the Hun on the West. It is near the railway north of the Shaho, and it had been frequently mentioned in previous despatches as an important artillery position. In fact "the field guns at Sufangtai and the heavy guns at Wenshingpau" had become quite familiar to readers of the reports. It was from these two positions that the Russians concentrated a heavy fire on Lamutun and its vicinity on the 27th of February, following it up the same night by an attack in which four companies marched down each side of the railway and actually penetrated the Japanese trenches, whence they were expelled after a long hand-to-hand conflict. It would seem that the Russians have been effectually driven from these points on the west of the railway. They are said to have lost 3,000 men in the fighting here on the 4th, whereas the Japanese had only from 500 to 600 casualties. These heavy losses were apparently due to an abortive attempt made by the Russians to sever the communications between the Japanese forces advancing northward between the Shaho and the Hun and those advancing northward between the Hun and the Liao. For this purpose the Russians struck heavily against Laishenpau, which is situated about mid-way between the railway and the Hun. They made their first effort with a regiment, their second with a brigade and their third with a division. All were repulsed, and doubtless the casualties in these futile essays were very heavy as the ground in that region affords little cover.

At present the position seems to be that whereas the Japanese enveloping movement has made excellent progress on the west, that on the east is temporarily arrested. As the events unfold themselves it becomes clear that the analyses already formed were accurate in the main. KUROPATKIN, by means of MISCHENKO's cavalry raid, by means of the desperate attack under KAULBARS and GRIFENBERG at Heikautai, and by means of subsequent Cossack strokes, essayed to create, and believed that he had created, an impression that his strength was to be devoted to an outflanking operation in that quarter, especially as the geographical conditions seemed to offer the best chance of success, and as success in that part of the field would have immediately forced the Japanese back to the Liaotung peninsula. Of course had the essay of GRIFENBERG and KAULBARS encountered less resolute resistance, the manoeuvre on the west would have been pursued for all it was worth. But its failure did not bear any character of completeness in KUROPATKIN's eyes. He immediately instructed his men between the Shaho and the Hun and between the Hun and the Liao to work vigorously at entrenchments and to maintain every

semblance of aggressive intention. Meanwhile he himself proceeded to concentrate a heavy force in the Fushun region, hoping that the Japanese would be found to have weakened themselves in that quarter for the sake of averting danger along the Hun and the Shaho. But the Japanese fully divined these projects. They made their arrangements for a nearly simultaneous advance from the east and the west; not quite simultaneous, however, for whereas their movement on the east began on the 19th of February, that on the west did not begin until the 28th. In the interval between the inception of the two operations KUROPATKIN, it was hoped, would transfer a considerable part of his forces to the east, where, instead of himself assuming the offensive, he now found his army threatened by a previous outflanking essay from the enemy's side. Apparently KUROPATKIN fell into this trap, and the result is that while the Japanese columns found themselves confronted by powerful forces on the Fushun side, they have pushed forward on the west of Mukden carrying everything before them, and, at the date of latest advices, were actually threatening the city and the railway in its rear. KUROPATKIN may still entertain hopes of smashing the Japanese centre and thus separating the two armies engaged on this widely divided limbs of the enveloping crescent. Indeed, he seems to have been feeling assiduously for a weak spot to make that essay. But in the meanwhile it is absolutely essential for him to hold Fushun, for if he loses Mukden, as seems very probable, the only line of retreat for his forces will be *via* the Fushun-Tiehling road, and even if he keeps that road open he would still have lost the railway. The situation is incalculably critical. The attainment of its object by either of the flanking forces would signify a serious disaster for KUROPATKIN. The attainment of both objects by both forces would spell something like his annihilation. Meanwhile there is no occasion to hurry the Japanese' central movement which has already commenced with good results.

March 7th, p.m.

The official reports published in Tokyo on the afternoon of the 7th are remarkable in one respect, namely their entire silence about the column operating between the Hun and the Liao; that is to say, the column which, as we learn from various quarters, is menacing the west and north of Mukden. There are doubtless good reasons for this reticence. With regard to other parts of the field we may say that six battles are in progress. Two of them are on the east, both having for objective the capture of Fushun. Of these two that on the extreme east, at Tita, does not appear to be progressing greatly. On the contrary, we are told that the Russians made a counter attack during the 6th. They were repulsed, but nothing is said as to any advance or any attacking operations by the Japanese. The movement immediately westward of the above, namely, that directed against Machuntun which may be regarded as the main outwork of Fushun, appears to be making progress. The Japanese, on the evening of the 6th, crowned some heights only 2½ miles south of the place.

The third battle is the advance along the Penhsihu-Fushun road. This advance, we imagine, has for its main object to cover the left flank of the forces attacking Fushun. The movement is overcoming the resistance of the enemy and has pushed him back to a

point about 4 miles south of the highlands occupied by the force which, on the immediate right, is attacking Fushun.

The fourth battle is on the immediate right of the railway, that is to say, at the Japanese centre. Here the Japanese are evidently not pressing the pace. It is not their game to do so. They want to let their turning movements develop and meanwhile they are contented to hold the enemy at the centre. But the Russians made a counter-attack during the night of the 5th and were, as usual, repulsed. The Russians, as we have more than once observed, would score a signal success could they force back the Japanese centre and sever the two wings. They do not, however, seem to be making any such attempt with real resolution, and probably it is now too late.

The fifth battle is on the immediate west of the railway. Here, as will be remembered by those following the reports carefully, the Japanese had pushed vigorously northward, threatening to get in rear of the Russian centre, as was pointed out in our last analysis. The Russians, apprehending this danger, are re-inforcing their troops in that quarter, and a fierce fight is in progress.

The sixth battle is beyond the Hun. Its latest phase was a futile counter-attack by a Russian division with 70 pieces of artillery. We can not identify the exact locality where this occurred, but as the Japanese in this part of the field had pushed up to positions comparatively near Mukden on the southwest, the Russian essay was evidently intended to check an advance which menaces the railway beyond the Hun.

March 8th, a.m.

This morning finds us with very little additional information. The intelligence sent by Reuter's agent from Mukden is the most unequivocal item. He speaks of a desperate attack launched by KUROPATKIN against the Japanese extreme left on the west and north-west of Mukden; but he tells us nothing of the result, and all that we may safely infer is that the Russians did not win, for as Reuter's Agent telegraphs from Mukden and is there under Russian censorship, any Russian victory would be unquestionably noted by him. Concerning this fight the Japanese official reports are silent, and we are inclined to question whether it took place so near Mukden as is represented. The Japanese left, so far as we can make out, reached Hsinmintun on the 2nd and was then 32½ miles from Mukden. No allusion as to its subsequent doings appeared in official reports until the evening of the 7th, when the public was informed that on the morning of the 6th a force of the enemy, numbering about a Division with 70 guns, made a counter attack in the direction of Tashikiao and was repulsed. This Tashikiao is on the road from Hsinmintun to Mukden. It is nearly 9 miles from Mukden and about 6½ miles from the line of railway (which runs west of the city). Assuming that the Japanese columns moved eastward from Hsinmintun on the morning of the 3rd and reached Tashikiao on the evening of the 5th, they would have marched 23½ miles in 3 days, which, though very far from being a rapid rate of progress in the case of a corps moving independently, is probably as much as could be expected in the case of a movement coördinated, as is that of the Japanese left, with the operations of other corps pushing forward against heavy opposition. For it must be remembered that a vital aim of the Japanese is to preserve touch between the numerous units of the armies forming the

immense crescent now closing in round Mukden. There is an army advancing between the Hun and the Liao on the immediate right of the Hsinmintun flanking force, and there is an army advancing between the Hun and the Shaho on the immediate right of the Hun-Liao force. All these have to guard against being forced asunder at any point by a Russian wedge, and consequently the extreme left is moving with as much circumspection as celerity. Thus on the morning of the 6th we find it at a point 9 miles north-west of Mukden, and there it received a vehement counter-attack which it repulsed. Evidently it is of cardinal necessity for KUROPATKIN to beat off this flanking army, at any rate to arrest its advance. That is elementary strategy. Apparently his first resolute attempt was made on the morning of the 6th, and we are inclined to think that the "heavy fighting" described by Reuter's correspondent as having gone on all through Sunday, was nothing more than an artillery duel, supplemented probably by skirmishes between advanced guards. The really determined attempt to check the Japanese began on Monday morning, and seems to have been a failure, though there is every reason to expect that one repulse will not by any means exhaust KUROPATKIN's means of defence in this quarter or deter him from re-organizing resistance on which so much depends. Once let the Japanese left get astride of the railway on the immediate west of Mukden and the Russians lose their principal means of transporting their troops. Tashikiao, as we have said, is only 6½ miles from the line of railway, and unless the Russian General had strong supports ready to push into the place of the Division which delivered its unsuccessful counter-attack on Monday morning, it may very well be that he has lost the railway ere now. The *Hochi Shimbun*, which has of late shown much enterprise in collecting war news, alleges that between Tashikiao and the city there is a range of heights which holds to Mukden the same strategical relation that Shusanpau held to Liaoyang. The occupation of Shusanpau sealed the fate of Liaoyang, and the occupation of the Tawan heights—so they are called—would seal the fate of Mukden. Our contemporary alleges that they have been occupied already, but it is safer to be guided solely by the official reports which placed the Japanese left still 4 miles westward of Tawan on the morning of the 6th. These details show that we are on the eve of most important news.

Those following the course of events closely will have observed that the Russian centre is also exposed to a species of out-flanking movement at the hands of the Japanese force which is advancing up the west of the railway. By this force also the railway is threatened. In fact a portion of the line has already been rendered unserviceable for the Russians, as on the 5th instant Sukiatun station was in flames. It is from Sukiatun that the auxiliary line runs westward to Suhupau on the Hun. We erred in saying that the point of junction of this line with the main road was Hanchingpau. The last official report showed that the Russians were making desperate efforts to cover this point—Sukiatun—and that they were increasing their forces there. They have two cardinal reasons for such action. One is that the branch railway to Fushun starts from the main line at a point a little north of Sukiatun, and that the loss of this junc-

tion would greatly compromise the connexion between the left and the right of KUROPATKIN's position. The other is that if the Japanese push much further north along the railway they get on the rear of KUROPATKIN's centre, which is in front of Shaho-pau. There has probably been heavy fighting here.

All accounts agree that the Fushun position is very strongly fortified. A splendid road has evidently been constructed thence to Tiehling. Lieut. TATEI, who in January performed an extraordinary reconnaissance, riding with four comrades—one of whom he lost—to within a short distance of Tiehling, describes this road as from 40 to 60 yards wide, and says that there are virtually two roads, one used for vehicles and passengers going southward (to Fushun), the other for those going northward (to Tiehling).

March 8th, p.m.

There are two facts of cardinal importance in the news published officially yesterday afternoon. One is the capture of Machuntan by the Japanese after several days of severe fighting. Machuntan is 15 miles south of Fushun on the direct road from the latter to Taling. The telegram says that the Japanese, having captured the place at 8 a.m. on the 8th, were pursuing the enemy to the north. We may assume that no new resistance will be organized by the Russians until they reach their positions at Fushun, where they are said to have two lines of trenches strengthened by redoubts.

It is not improbable that this success at Machuntan may greatly weaken the Russian defence at Tita, which, as our readers will remember, is on the road further east—the Hanchang-Fushun road—and is at the same distance from Fushun as Machuntan, namely, 15 miles.

The second fact of cardinal importance is the advance of the Japanese troops on the West bank of the Hun. They have pushed north as far as Likwanpau, which is only 4 miles westward of the railway between the Hun River and Mukden. The Russians have already made one vehement but futile attempt to check this column's progress. Unless they succeed, the railway northward of the Hun is lost to them.

March 9th, a.m.

This morning there is no fresh intelligence except that the bombardment of the Russian defences on the west and north-west of Mukden is supposed to have commenced on the 7th instant. There is no official authority for this statement; only a rumour from Yingkow, confirmed by a statement from Hsinmintun that the fall of Mukden is hourly expected there. Reuter's telegram, sent by his agent with OKU's Army, is the first intimation we have had of the nature of the fighting. The Japanese official reports are almost exasperating by their Spartan brevity. They deal in a kind of set phraseology, and only by recalling past experience is one enabled to conjecture what is involved in a protracted struggle where Japanese are the assailants. Reuter's agent—whose telegram, we may note, was known in Tokyo on Monday last—apparently refers to the troops that moved northward along the west bank of the Hun. The advance of these troops, as indicated by the official reports, did not appear to have been attended with very great difficulties. We were merely given a kind of itinerary, showing their progress from day to day, and when we last heard of them officially—on Wednesday afternoon—they had captured about "two-thirds" of

Likwanpau, thus getting to within 4 miles of the railway north of the Hun. That word "two-thirds" suggested a desperate Russian resistance and we know now from Reuter's telegram how desperate it must have been. Men's lives are being thrown away as things of no account. The Japanese are determined to win. In their present mood we doubt if any troops in the world could withstand them. It is not difficult to conjecture what scenes must have been witnessed at Machuntan and Tita where the Russians managed to hold out for many days. Meanwhile we have no intelligence of the force which marched against Mukden from the Hsinmintun direction. Incidentally we learn what all were prepared to hear, namely, that the despatch of munitions of war to the Russians via Hsinmintun has been now suspended, that quantities actually *en route* have been captured and that Tientsin merchants who were engaged in this contraband trade are confronted by heavy losses. It may be presumed, however, that they have heavy gains to fall back on. But as to the Hsinmintun column, it has disappeared for the moment from observation. We do not doubt that it will be heard of, and heard of in a very effective manner, before many hours have elapsed. At the moment, however, the aspect of the great battle seems to be that while the Japanese are forcing their way towards Mukden in the face of tremendous opposition—which they have nearly shattered—in the region between the railway and the Hun and in the region between the Hun and the Liao, thus threatening the city from the south-east, the Japanese centre is remaining comparatively quiescent and the right is pushing its enveloping movement towards Fushun. This last-named place must be held by the Russians with the utmost tenacity. So long as it is in their possession they have a line of retreat along the new road to Tiehling. We may mention here that erroneous figures are published indicating the distance between Mukden and Fushun to be only 17 or 18 miles, whereas it is really 26 miles. The point is important, as showing the distance that has to be covered by all the Russian troops on KUROPATKIN's right front before they can make good their retreat.

General DESSINO, it need scarcely be said, is publishing in Shanghai statements which assign the advantage to the Russians. There is room for such statements. They are only echoes of the telegrams sent by KUROPATKIN to St. Petersburg; telegrams accurate enough in so far as concerns the fighting on the approaches to Fushun. Up to the morning of the 8th the Russians succeeded in repulsing all Japanese attacks in that quarter, and KUROPATKIN was not without warrant for wiring optimistic views to his Government, especially as the latter is in such dire need of some comforting intelligence. The Japanese official messages have been of the most self-contained nature. No claim of victory has been made, only a bald statement of repulses inflicted or suffered and positions captured or defended.

Later.

At 9 o'clock this morning the Imperial Head Quarters published a telegram received from Marshal OYAMA during the night of the 8th-9th, saying that the enemy had commenced his retreat on the morning of the 8th instant and that all the Japanese armies were in vigorous pursuit. This then decides the question of victory and what now becomes of vital interest is the ability of the Russians to draw off

their forces. It will probably occur to our readers that the retirement of the Russians from Machuntan on the morning of the 8th was a part of the general retreat—the beginning of it, in fact. We do not think so, and for several reasons. Machuntan and Tita are the outposts of Fushun. It may be taken for granted that the service of the main line of railway is lost to the Russians. A Japanese army was within 7 miles of this railway on the north-west of Mukden 2 days before the retreat commenced, for the official reports informed us that the force which moved *via* Hsinmintun had reached Tashikiao and was fighting there on the 6th. Another Japanese force—that between the Hun and the Liao—reached Likwanpau on the 7th (at latest) and was thus within 4 miles of the railway on the south-west of Mukden. This railway then may be ruled out of the account for retreating purposes. KUROPATKIN must withdraw all his forces *via* Fushun. Now from Shahopau, his centre, to Fushun the distance is 35 miles, and since Fushun, speaking broadly, lies in a north-easterly direction from Shahopau, the Russians have to pass along the diagonal of a parallelogram while the Japanese are already posted high up on the right hand (eastern) side. That is to say, the Russians in the Shahopau region have to march a distance of 35 miles to reach Fushun whereas the Japanese, on the morning of the 8th, were directly south of Fushun and only 15 miles distant from it. Evidently therefore the Japanese right and right-centre command the lines of retreat through the district between Shahopau and Fushun. KUROPATKIN can scarcely have contemplated originally the possibility of having to withdraw an army of 300,000 *via* Fushun alone. But that necessity must have presented itself to him within the past few days as a conceivable eventuality, and simultaneously with the thought he must have appreciated the vital need of holding back the enemy as far as possible from Fushun. It will take him days to withdraw his men, and he can not do it with any semblance of order if the enemy is within striking distance. Therefore he should have clung to Machuntan and Tita with the utmost tenacity; it would not have been too much to sacrifice three or four divisions in order to prevent the Japanese from capturing these places. Consequently the abandonment of Machuntan can not be regarded as a preliminary to retreat. Rather we are inclined to regard it as an incident determining retreat. For it enables the Japanese to push on to Fushun itself, and no one need be told that with the enemy at Fushun scores of thousands of Russian troops can not defile past within two or three miles of that place in security, or anything like security. The railway to Fushun is now a vast blessing to KUROPATKIN. It is the line built by him for military purposes since he took up his position in the valleys of the Hun and Shaho, and it runs across on the south of Mukden from the main line—which may be said to have a due northerly direction—to Fushun. This railway, will carry off many officers and probably many men safely *via* Fushun. But its rolling stock must be a very limited quantity and soon the Japanese centre will strike at this road, for it lies all across the front of the Japanese position on the Shaho, and KUROPATKIN can not possibly guard it without assigning for that duty forces inconsistent with any operation of retreat. In short the Russian army is in that most unenviable strategical position of having to retreat along a line nearly parallel to the

enemy's front. KUROPATKIN has shown much skill in the art of escaping, but the circumstances under which he achieved that exploit previously were very different. We believe that he will suffer tremendous losses on this occasion, unless, indeed, his retreat commenced long before the 8th instant.

March 9th, p.m.

The more detailed accounts published in Tokyo yesterday afternoon show the enemy everywhere in retreat except at one position where he seems to be still resisting as the alternative to surrender. That position is at Likwanpau and Yangshihtun on the road which leads along the west bank of the Liao into Mukden. The official report shows that the opposite (east) bank of the Hun as far as the railway has fallen entirely into the hands of the Japanese, and since Mukden may be assumed to be now in their possession, the Russian column which lingered on the west bank of the Hun seems to have no route of retreat.

Once more we are brought into touch with the Hsinmintun force, concerning which nothing had been published officially since the 6th instant, when it reached Tashikiao, 9 miles west of Mukden. We hear of it now as having cut the railway and being in possession of three places, one (Hsiaochitun) 20 miles north-west of the city, another (Pakiatsz),  $1\frac{1}{4}$  miles north-east of the former, and a third (Sankiatsz) which is due north of Mukden. It would appear that this army contemplates moving direct upon Tielhing. From Mukden to Tielhing the distance is only 36 miles, and there is very little doubt that a bold dash would capture it before the Russians could retreat thither from Fushun.

It can not be questioned that the position of the Russians is very perilous. Rumours circulating in Tokyo put their casualties up to this time at 100,000, this estimate being based on the alleged fact that fully 8,000 dead are lying on the field in front of Oku's army alone. It is further said that on the Japanese right the pursuit is at close quarters—bayonet distance is spoken of—and that Mukden has been occupied, great stores of provisions being found there. We do not doubt that Mukden has been occupied, but we find it hard to credit that the pursuit can have assumed such features, unless in some fortuitous instance.

We have to consider the possibility that the Russians may rally at Fushun, since nothing is known as to the nature of their defences and other arrangements there. This appears to be a most remote possibility. The pressing need of the Russians is to recover effective touch with the railway. The loss of the railway cuts them off from all supplies except those carried by cart along the Tielhing-Fushun road, and unless preparations of a most elaborate nature have been made with a view to this contingency of such a radical change of communications, a dire state of affairs has probably arisen already. KUROPATKIN has never previously suffered this calamity. He has always hitherto been enabled to retreat along the line of railway, thus maintaining ability not only to transport his most important impedimenta, but also to reinforce his army and carry off his wounded. But he has now been driven from the railway to a point 26 miles eastward, and to recover touch with the line he must get with all speed from that point to Tielhing, which is 32 miles from Fushun. Evidently there is a prospect that the Hsinmintun army may anticipate him in reaching Tielhing. We do not know whether it is an army strong

enough to make such an essay but its present movements suggest the purpose, and the feat, if accomplished, would be the *coup* of the war. At any rate with this army hovering on the west of the Fushun-Tielhing road, KUROPATKIN must not linger at Fushun. All the celerity of which he is capable will be required. For if we conceive a triangle having for base the line from Mukden to Tielhing (35 miles) and for apex Fushun, its Mukden-Fushun and Tielhing-Fushun legs being 26 miles and 32 miles long respectively, then we may say that whereas to reach Tielhing KUROPATKIN has to travel along the two legs, the Hsinmintun army can reach the same goal by travelling along the base only. But there is only conjecture to suggest that the Hsinmintun army has Tielhing for objective. We sincerely hope that it has and we sincerely hope that it will get there in advance of KUROPATKIN. Then indeed the Russians would be in a disastrous dilemma.

#### THE VON SYBURG—KAYSER WEDDING.

The wedding took place on Tuesday at the Union Church, of Mr. Friedrich von Syburg, German Consul-General, and Miss Marie Kayser. The civil ceremony was performed by Count Arco-Valley in Tokyo on Monday.

On Tuesday the Union Church was filled by friends of the bride and bridegroom. Mrs. von Syburg entered the Church on the arm of her husband, followed by Dr. Matthiolius with Miss Anna Meyer, Governor Sufu and Mrs. Abegg, and Count Arco-Valley and Mrs. Bengen.

Dr. Haas performed the ceremony.

The musical portion of the service, in compliment to the marked musical activities of the bride, was very ornate. Mr. W. Karl Vincent was at the organ, and the bridal train entered to the strains of Lohengrin's Wedding March. The anthem, "Thy God is my God" (Wolff) was sung by a large choir consisting of Miss Kayser's old pupils, Mrs. J. P. Mollison taking the solo parts. Later Mrs. W. T. Payne sang the Largo from Handel's "Xerxes," with violin obligato by Mr. Junker. Mr. Junker also played two violin solos, an Andante and a Cantabile by Tartini. At the conclusion of the ceremony the happy pair left the sacred building to the strains of Mendelssohn's Wedding March.

A reception was afterwards held at the Oriental Palace Hotel, which was largely attended by the friends of the newly-wedded couple.

#### FIRES.

A telegram from Fukushima reports that fire broke out on March 2nd in the dwelling of a wealthy farmer named B. Tasaku, Yasuhara-machi, in the district of Date, destroying the building and some others adjoining. Tasaku and his son were killed.

On the morning of the same day, an outbreak of fire occurred in the Buddhist temple, Gyokunji, situated at the village of Shimohara, near Nagoya. An old female servant and two young priests were killed. There is a suspicion that a person or persons, murdered the priests and then set fire to the building. The rector of the temple is absent at the front on military service.

Fire broke out at 10.30 p.m. on March 3rd at Hanasaki-cho, near the Yokohama railway station burning down two godowns and a shed. Negligence was the cause.

On the morning of March 3rd, fire broke out at Moji destroying five thousand balls of charcoal which had been bought by K. Sugita, of Osaka, for the military authorities. The cause is believed to be incendiarism.

On March 8th, fire broke out at the village of Karita in Miyagi prefecture, burning down 84 buildings including the village office.

## MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

In our last Summary we referred to the publication of an elaborate work on Buddhism by Dr. Anezaki. The book now lies before us, and we proceed to give some account of its nature and scope. As is indicated by its title, 現身佛と法身佛, *Genshin Butsu to Hoshin Butsu*, it aims at giving a history of the life of Shaka Muni and a history of the religion which he founded. The title may be roughly translated, "The Actual Buddha and the Ideal Buddha," that is, Buddha as history has described him and Buddha as the imagination and veneration of his disciples and their descendants have painted him. The book covers 267 large-sized pages. Elaborate lists of Sansrit, Pali, and other sacred writings and authorities on all the various questions discussed and doctrines stated are given and the extent to which these numerous works have been rendered into Chinese is shown. In his opening chapter, when stating the objects of investigation, Dr. Anezaki makes the following remarks:—Religion is one of the products of civilised humanity. Its development depends principally on two factors—one being the character of its founder and the other the intelligence of early devotees. But of these two character is by far the more important. Upon it all doctrine is founded, in it the most implicit faith is placed. It has power to inspire humanity with new aims, new energy, new ideals. In the case of the greatest religions of the world, Buddhism and Christianity, the characters of Buddha and Christ have in all times and in all countries constituted the one undying force. These characters have ever appealed to man's highest instincts, and it has been owing to their influence that, despite all the divisions which have marked the history of the two creeds, they have both survived to this day.

Dr. Anezaki's work is divided into 7 chapters, the titles of which give some idea of the scope of the work. Here they are: Chap. I. The Questions to be Investigated. Chap. II. Buddha's Self-Consciousness. Chap. III. Buddha's Conversion and the attitude of his disciples towards him. Chap. IV. Buddha's entrance into Nirvana, and the opening of the question of the nature of Buddha. Chap. V. The faith of Buddha's disciples after his absorption in Nirvana. Chap. VI. Symbolical teaching bearing on Buddha's Character and the growth of sacred tradition around his name. Chap. VII. The oneness of Buddha and Law. In this chapter Dr. Anezaki shows how Buddha embodied in himself the higher laws that govern the universe. By law the author says he means truth. All the deeper truths that concern man and his place in the order of things were embodied in the ideal Buddha. It is safe to say that no work of the same kind on Buddhism has been published in Japan. Dr. Anezaki prepared himself for the task of writing this book by making a thorough study of all the principal Western treatises on Buddhism. Mr. Albert J. Edmonds, a member of the Oriental Society of Philadelphia, has published a book entitled "Buddhist and Christian Gospels, now first compared from the Originals—Being Gospel Parallels from Pali Texts." To this work Dr. Anezaki has supplied notes and comments from the Chinese Buddhist Tripitaka. Dr. Anezaki sees many points of similarity between Buddhism and Christianity, and he is of opinion that as the world progresses highly educated men will blend all that is noblest in both creeds and thus form an ethical ideal that will commend itself to the civilized world as worthy of acceptance on account of its own intrinsic merit.

To the *Seikyō Shimpō* (Greek Church), Mr. K. Yamada, contributes an article entitled "A Word to Wealthy Gentlemen in our Church." He begins by condemning the vulgar practice of measuring men by the amount of money they possess. He says that a certain Protestant pastor once

sneeringly observed to him that there were not many wealthy men in the Japanese branch of the Greek church; as though this, supposing it to be true, were a drawback. For a person who professes to be a real Christian to talk in this way is certainly very surprising, says Mr. Yamada; for there is no such equalizer of men's positions in the world as true Christianity. According to it there are neither rich nor poor, bond nor free—but all are one in Christ. A church is not worthy of high esteem because it attracts wealthy men, nor is it to be despised if most of its members are poor. But as a matter of fact the majority of our Christians are by no means to be classed as indigent persons. It is true that as yet we have no Iwasakis, Mitsuis or Shibusawas in our Church, but the majority of our converts make a comfortable living by the businesses in which they are engaged. Most of them belong to the middle classes; though there are not a few who may be ranked as distinctly above the middle classes; and among these some have given land and some large sums of money to the church. We are not among those who regard the donors of large amounts of money to the church with any special veneration. If all Christians give according to their means, the man who subscribes his thousand yen is no more worthy of esteem than the man who gives his ten. It would seem by the remarks one hears now and again that even within the church there are money-worshippers—people who think that a long purse is of itself a title to honour and esteem. Such notions are worldly and we have no sympathy with them.

There are occasions, however, when considerable sums of money are required in a hurry for urgent purposes. This is the case just at present. It is well known that our Church has founded a Society called the Horyō Shinkō Iankai (慰安會). The Captives' Religious Comfort Society. The Russians who are prisoners in this country are members of our Church and as such have a special claim on our sympathy and help, and with a view to afford this help the Society has been founded. Its work in past months has been reported in the pages of this magazine. But at the present moment the Society finds its resources quite inadequate to meet the increased demand on them. The fall of Port Arthur was the means of enormously increasing the number of prisoners sent to this country. According to official reports the increase consists of over 23,000 efficient and about 15,000 invalids. Such an influx of prisoners has involved a larger expenditure on the part of the Society than it was prepared to make. This situation furnishes a rare opportunity for our well-to-do converts to come forward with liberal gifts. We must never forget that it is to the Russian people that we are indebted for all the benefits that Christianity has conferred upon us. They are our parents as it were in things spiritual. Let us not be slow in showing our gratitude by supplying Russian captives with all the temporal comforts they need and by helping them to keep their hold on the faith in which they were brought up. The reports of the work carried on by the above-named Society cover many pages of the *Seikyō Shimpō*. Full statistics are given of the number of Russians stationed at various places and the provision that is being made for them. Greek Church pastors have been despatched to these localities and they are giving their whole time to the organization of a system of relief and charity. Of course many of the prisoners have little money and they are said to lack not a few of the ordinary comforts of life.

In the latest number of the *Seikyō Shimpō* the Rev. K. Ishikawa, the editor, in reviewing the characteristics of the present age, says that Japan can hardly be said to have passed the stage of chivalry, military hero-worship, and the like. To this, in the history of nations succeeds an age of poetic imagination when the exploits of great heroes are immortalized, in verse. This is followed by a worship of science and all the wonders it reveals; which has a tendency to concentrate men's minds too exclusively on material objects and ends. Being the only country in existence which after assimilating all that is best in Oriental civilisation has commenced in right earnest to make her own

the strongest elements of the Western system of civilisation, Japan occupies a unique position in the world of thought, and has grand opportunities for creating an original type of character. But in order to do this, she needs to imbibe more thoroughly the spirit of Western civilisation. The nation is still too emotional and it lacks the power to appreciate at their full value great ideas. When we ask what is the secret of the wide influence exercised by modern western fiction and poetry, we find it to be the noble thoughts to which these forms of literature give full expression. Japan needs to cultivate the worship of great ideas. When she begins to appreciate high ideals of all sorts, religion will at once enter on a new era.

In the same number of the magazine from which the above is taken Mr. K. Yamada writes on the growing "Self-Consciousness of the Nation." His opinion is that it is not self-consciousness of a high type, that it is satisfied with low ideals and with material benefits. The whole tone of the article is pessimistic.

Writing on "The Ways and Spirit of Churches" the *Fukui Shimpō* (Presbyterian) says: Every household, every institution, every organized body of men and women has its own special prevailing spirit and peculiarities, against which no person joining these bodies is altogether proof. The spirit of an Association is breathed in as unconsciously as the atmosphere each one of us inhales. Men unknowingly assimilate themselves to their surroundings. This is realized so much in England that we are told that young men do not go to Oxford or Cambridge in order to study so much as to be impregnated with the spirit and noble sentiments prevailing at those great Universities. It is the same with churches. Men enter churches with no other object than to place themselves in contact with what they take to be an elevating, ennobling and refining spirit. The value of a church does not consist in the beauty and stability of the buildings used for worship, nor in the eloquence of its ministers, nor in the superiority of its choir and musical instruments, but in the spirit that pervades its assemblies. We read that in America certain religious bodies are making desperate efforts to attract audiences by turning churches into sacred concert halls. No greater mistake could be made. In Japan also there is far too great a tendency among our churches to adopt worldly methods for attracting people, such as advertising discourses on Socialism, the *Bushido*, and the like. There is no objection of course to these subjects being treated in the pulpit, but to adopt newspaper advertising methods in trying to bring Christianity to the notice of people is to vulgarize the sacred religion of Christ and to act contrary to its spirit. We are averse to the practice of imitating the ways of the world adopted by some churches. The model set by the Apostles of Christ in carrying on Christian work, with all its beautiful simplicity and straightforwardness, seems to us far more worthy of imitation than many modern substitutes. . . . To keep up the high spiritual tone of a Church is what is to be desired above all other things. This cannot be done by the pastor only, nor by the Church officers. It can only be accomplished by the maintenance of a high level of sentiment and aspiration among the bulk of Church members. The spirit of a Church and the process of the formation of that spirit may be compared to the production of new chemical substances of great utility by the combination of certain elements which apart were unproductive.

The *Fukui Shimpō* relates the following story concerning the late Count Fukushima. The tale originally appeared in one of the Tōkyō dailies. When the Dai Nihon Kyōkai (協會) was founded by Doctors Motora, Ueda, Inoue, Takayama and Kimura, they succeeded in getting Count Fukushima to accept the post of President of the Society. It was not an office that he much relished, but he found it difficult to refuse. On one occasion, however, his lack of sympathy with the religious views of the founders of the Society was

emphasized in a remarkable manner. At one of the meetings the subject of religion was introduced, and one of the speakers ridiculed the notion that the soul is immortal. Whereupon Count Fukushima suddenly rose and said, *Kakaru seki ni oru koto wa gomcn kōmuru. Watakushi wa shinde kara reikon no funetsu wo ome ni kakeru.* "I beg to be excused from remaining here any longer. After my death I shall show you that the soul is immortal." Thus saying, he left the meeting.

Mr. Ebina Danjō has from time to time written much in favour of more union among Protestants and the *Fukin Shimpō* in a recent number quotes the following from one of the *Shinjin* articles on this subject. There is not the slightest doubt that the original Japanese founders of the various Protestant Churches set out with the intention of breaking down the sectarian fences that separate Christians from each other. But as a matter of fact they have not succeeded in doing this. Is it because they have ceased to think it desirable? Not at all. They desire it as much to-day as ever, but there are circumstances which have proved too strong for them. Articles of belief, forms of church government, ceremonies, and the like, have been allowed to divide Christians who are one at heart. Even the Evangelical Alliance has ruined its prospects of success by extreme narrow-mindedness and exclusiveness. To the regret of all concerned, it has of late shown an utter lack of energy. We are sorry to have to say that the foreign missionaries are largely to blame for the perpetuation in this country of the historical divisions of Protestant Christendom. There are a few missionaries who deplore the existing state of things, but the majority of them are opposed to change. There has been a great deal of commotion all over Japan in connection with the arrival in this country of Bishop Harris. He has in public speeches repeatedly told us that he sympathizes with the nation in most things. What attitude does he intend to adopt to this great question of the union of Japanese and Korean Protestants? Is he resolved to break down the narrow sectarianism and to base Christianity on the broad foundation of humanity, or will he keep to the old lines? If he does the latter, no doubt Japanese and Korean Methodists will be awed by his Episcopal authority and probably lack the spirit required for attacking the narrow-minded policy hitherto pursued.

The *Koye* (Roman Catholic) discusses the position of woman in Christian countries as compared with her position here under the title *Dansō jōhi to Jōson Dampō* (Male-worship and Female-worship). Some Japanese have asserted, says the *Koye*, that if men are honoured and women despised in this country, in the West men are despised and women honoured. But the latter is certainly not the case in most Western countries. Mr. Kuroiwa asserted not long ago in the *Rikugō Zasshi* that the Western exaltation of women was derived from the Spartans. To this explanation the *Koye* objects, asserting that Western women owe their present position to Christianity\* in the main and tracing back the high rank occupied by woman to the veneration felt for the mother of Christ in the early years of Christianity. But this observation is qualified in a second article entitled "Christianity and the Position of Women," in which the *Koye* admits that various influences, some of them non-Christian, contributed in former times to the improvement of the position of women. But it goes on to observe that even in ancient Sparta and ancient Rome the destruction of female infants was allowed and widely practised. Christianity put a stop to this by teaching that the souls of girls as well as boys are of priceless value and will live for ever. But even to-day there are in Western countries many laws and customs having reference to women

\* The *Koye* fails to take note of the fact that in no two Christian countries is the position of woman precisely alike. There is the widest difference between the wife of a German Christian and that of an American Christian. The position assigned to woman by St. Paul differs materially from the rank she occupies in the United States to-day—(WRITER OF SUMMARY).

that are anything but Christian in spirit. But compared with the Japanese method of treating women, that followed in Christian countries is in our opinion, reasonable, observes the *Koye*, and hence all persons who desire to improve Japanese society should pay special attention to this question.

Under the title *Akamon no Uchisoto*, the *Koye* publishes a number of news items respecting the Imperial University professors. Among them we find the following: A certain popular professor in lecturing on Art. 243 of the Penal Code observed the other day that there is no country in the world that has so few believers and so many objects of worship as Japan. Here the latter greatly exceeded the former. The same professor observed that the attitude of the compilers of the penal code to the native creeds was by no means one of veneration or even intelligent appreciation, or some of the laws would have been omitted. The very fact that Arts. 263 and 426 condemn the pollution of shrines and acts of disrespect to images, etc., shows that these acts are sufficiently common to be legislated against. The truth is that in many country places the most shameful disrespect is shown habitually to objects of worship; they being placed close to manure heaps or still worse places. The professor referred to above one day observed that Japan has to thank Christians for crucifixion as a form of punishment practised in old Japan.

Dr. Inoue Tetsujirō's successor in the Presidency of the College of Literature, Dr. Tsuboi, adopts precisely the same attitude to religion as that of Dr. Inoue. They both are without faith and in this are joined by a number of other professors. Some of these when discoursing of religion are wont to represent it as only fit for women, women being always principally swayed by emotion and hence easily worked on by ministers and priests who appeal to their feelings with considerable skill. This kind of talk, observes the *Koye* writer, may be frequently heard in the Tōkyō Imperial University to-day. Of course the utterers of these crudities are cognizant of the fact that Gladstone was no woman and yet was an ardent Christian. But while knowing this and many other facts of the kind it is not fashionable to dwell on them in the presence of students.

The second number of the *Kirisutokyo Kōdan* (The Christian Pulpit), it appears to us, is an improvement on the first; which we noticed last month. The sermons given and the subjects are as follows: "The Gift of God" by Rev. H. Kozaki; "Ambition and Peace of Mind," by Mr. I. Abe; "God's Time," by Dr. Motoda; "The Unjust Steward," by Dr. Iluka; "Christ as an Infant," by Rev. Y. Honda; "The Meaning of Human Life," by Dr. Vandye. In addition to a variety of other matter we find in the *Kirisutokyo Kōdan* a very thoughtful and striking review of Dr. Anezaki's work on Buddhism noticed in the early part of this Summary. In order to show the excellent tone which this review maintains throughout we make a few extracts:—The time is past for dwelling on the necessity of religion. This is admitted everywhere. The only question which presses for an answer to-day is, how to satisfy the actual religious craving of a large number of people. We need no longer say, "We have piped unto you, but ye have not danced." To-day we have only to be careful that we do not give stones to those who ask for bread. We are not pessimists from choice; but we have to confess that when we compare the internal condition of Christianity, the faith, the ideas, the capacity of Christians, with the vociferous professions they make, we are oppressed by the sense of a certain amount of hollowness. With the Buddhists there is little loud profession, but there is strong faith. This book of Dr. Anezaki's is full of deep earnestness throughout. Though the subject is Buddhism, a Christian may learn an immense amount from it. The deep truths which underlie all religion are dwelt on in a most interesting and reverent manner. Much that Dr. Anezaki writes applies to Christianity as well as to Buddhism. We have a saying, "Polish your gems with a stone from another mountain." We Christians would do well to adopt this plan in the present

case. Dr. Anezaki has by the publication of this book not only given a history of the growth of Buddhism and shown what is the secret of the hold that it has obtained on Orientalists generally, but he has supplied a new impetus to religious life and thought in this country, for which we feel unbounded gratitude to him. We trust that he may long enjoy health and strength.

Among the sermons published in this month's *Kōdan* perhaps that by Mr. I. Abe is the most interesting, showing as it does how Christian thought in Japan has changed since the days when a strictly puritan type of religion was inculcated by the early missionaries and when ambition in young men was largely suppressed. In the course of 25 years a most astonishing change has taken place in Christian ideas, says Mr. Abe,\* and the notions now prevailing respecting ambition and its relation to peace of mind when compared with those universally entertained by early Japanese Christians constitute a striking instance of the progress thought has made.

Writing of "Church Development" the *Kirisutokyo Sekai* (No. 1,118) says there is one particular in which church development has not kept pace with the general advance of thought and practice, and that is worship. Worship may be said to be still in its infancy in our churches. This is not surprising, for when we come to consider the laws that govern progress, we find that it is in the things that are easily attained that progress begins and it is only subsequently that strength is forthcoming to reach forth towards the higher qualities and graces (*Kedashi shimpō no junjō yori iyeba, yori takaki mono no hattatsu ga yori hikaku mono no sore ni okururu wa sōzen ni shite, kesshite ayashimu ni tarazu*). It is true that as to forms of worship the Church has during the last few years made considerable progress, but when we come to consider the spirit of worship it is questionable whether there has been any advance at all.† And yet the spirit of worship is of the very essence of Christianity. Without this no church can maintain real spiritual life.

The *Kirisutokyo Sekai* in its issue of Feb. 23rd prints in large type, with a translation appended, a definition of Christianity by Dr. John Watson, culled from *The Congregationalist*. We have no space for the whole confession of faith, but we quote the part which defines God and Christ's relation to him. "What is Christianity? It is to believe that at the heart of things there is a Power with a mind and a will, from whom everything has come, and by whom everything is sustained. Who is immanent in the universe, and specially inhabits the human soul; who is directing everything to moral ends, and whose character can be summed up in love. That Jesus Christ came from God and is in a sense peculiar to Him the Son of God, that He has declared the character of God to the human race, has broken the power of sin, and is the point of union between God and man." How far this represents the belief of the majority of American Congregationalists to-day we are unable to say. But it seems to have taken the fancy of the *Kumiai Kyōkai* here. The important clause "That Jesus Christ came from God and is in a sense peculiar to Him the Son of God" is translated *Iyusu Kirisuto wa Kami yori kitari, tokubetsunaru igi ni oite Kamino Ko nari*, a rendering which is by no means accurate, as there might be other sons of God of a special kind on an equality with Christ

\* *Waga kuni ni okeru Kirisutokyo shodai (初代) no shisō to konnichi no Kirisutokyoikai no shisō to wo kurabebe surimasu to, soko ni odokubeki henkwa no aru koto wo mitomemasu.*

† *Jōjutsu no gotoku to no shōhōmen ni lashō no shimpō. hattatsu arishi mo, reihai no ichiji wa ima nawa hanahada yochitaru wo manukarezu.*

‡ The late Canon Ainger in a book of sermons entitled "The Gospel and Humanity," deeply deplores the ever increasing disregard for dogma and what he calls "the decay of worship" in England. He says it means "the decay of the idea that we want something vital to our lives as spiritual beings." He also observes that men in England to-day admire Christ, but do not believe in Him. "Admiration of Christ is not faith, and therefore it is not worship."—(WRITER OF SUMMARY).

According to this, *Tokubetsu naru igi* does not give the meaning of "peculiar to Him." Instead of this *Kare no dokuyō naru igi ni oite* should have been put.\* The original, it appears to us, carefully avoids asserting the doctrine of the Divinity of Christ held by the orthodox Churches and differs on this point in no essential respect from Unitarian confessions of faith which we have read.

The *Kirisutokyo Sekai* is at present publishing a great deal of matter bearing on the origin of the Bible and is discussing various theories relating to inspiration and revelation. It quotes with approval the saying, "The Bible proves its inspiration by inspiring" and proceeds to contend that to each individual Christian the strongest proof of the superiority of the Bible to other books must come from the effect produced on his or her mind by its perusal. Under the general heading "Theology," Mr. Hino Shinsho is contributing a series of articles entitled: "The Origin of Religion." He discards the old orthodox view of Revelation, but which of the many modern views he endorses is not as yet quite plain. There are more articles on the same general subject to appear in later numbers.

\* \* \*

The *Rikugō Zasshi* as an organ of learned Christian thought has had a long and distinguished career. It has always lavoured outspokenness, liberality of sentiment and progressiveness. Its articles range over much ground on or near the borderland between religion and philosophy, and between the world of fact and the world of imagination. In the January number it announces that henceforth the main part of the magazine will be devoted to the discussion of social, historical, political and other general subjects, and that the treatment of purely learned and abstruse subjects will be confined to an appendix. The alleged reason for the change is that at the present time there is so much competition among magazines and there are so many devoted to special subjects which fail to obtain a sufficient circulation to cover expenses; so that it seems to be desirable to make a point of catering for a large number of readers rather than fill the pages of a periodical with articles that only a few scholars will peruse. So the February number of the Magazine starts with this new plan carried into execution. There are three editorials; on "Benevolence and Gratitude," "The Spirit of a Gentleman" and "Freedom of Speech." Then come three Special Contributions:—(1) An article on "Design in History" by Mr. K. Kayabara; (2) An article on the bearing of the Doctrines of the two great philosophic Schools (that of Chu-tse and that of Wang-yang-ming) on the Fortunes of the Tokugawa Government, by Mr. K. Yamada; and (3) An article on the Moral Education of Children. Then come a quantity of literary matter, reviews of books, and the like, and an Appendix consisting of Art. II. of Rev. H. Minami's Critical Investigation of the Synoptic Gospels and Art. II. of Mr. T. Nakajima's "Study of Ethics." The purely technical part of the magazine only covers about 32 pages; the other part runs to 114 pages. Under the heading of "The Tide of Thought" a number of current topics are handled in short paragraphs. The fault of most Japanese magazines and of some newspapers is over discursiveness. But there are a few organs which are beginning to imitate the short suggestive paragraph found in so many successful English and American journals. The tone of the article on "The Spirit of a Gentleman" is excellent. Among other things when writing on this subject the editor of the *Rikugō Zasshi*, Mr. R. Nakamura, says, "The gentleman is a man who can associate with the rich and the noble without growing extravagant or getting to be fond of show; who can associate with the poor without feeling ashamed; who never allows money to pervert his mind and turn him aside from the right path; he is polite to women and kind to the weak and the helpless; loyalty, great cordiality and consideration mark his intercourse with his friends; when

he finds himself surrounded by pomp and grandeur he makes a point of preserving his simplicity of mind and tastes; with him sincerity, love of truth and straightforward dealing are of more value than anything besides. But there is another quality which characterizes gentlemen of the highest type, and that is a spirit of reverence for religion itself and the religious feeling to be found in the minds of many of their fellowmen. The ideas prevalent on this subject in this country need altering. The majority of well-educated Japanese would endorse the description of a gentleman given above, but they would add that to such a person religion is quite superfluous. Religion, say they, may be all very well for silly women and uneducated people generally, but it can teach the real gentleman nothing that he does not know. But the question is, have such men ever looked into religion? Do they know what it really teaches? They profess to be learned do these fine gentlemen, but of the deeper truths that are suggested by the working of nature's laws they know nothing. Of that great Spirit that originated all things and controls all things and of our relations to Him they know nothing. So, though they may be gentlemen, to us they are by no means the highest and noblest kind of gentlemen. In the present age the tendency to vulgarity of all kinds is very strong. The love of money and display is growing apace, and there is a danger of our losing the grace, refinement, and simple ways of our ancestors. Religion, we take it, is one of the forces that may well be utilized for stemming the tide of vulgarity, and hence all true Japanese gentlemen should not only respect it when they see it practised by others, but should investigate it for themselves." The *Rikugō Zasshi* in its February number quotes an article from the *Shinkōron* (新公論) written by Mr. Fukuchi Genichirō entitled *Mimi to Kuchi wo kakeru Nipponjin* (Earless and Tongueless Japanese) in which he dwells on the slovenliness of colloquial Japanese as compared with the preciseness and lucidity of the written language—a subject to which other writers have drawn attention repeatedly, but which will bear further ventilation.

The promised reply of the Rev. K. Ishikawa to L'Abbe L. Ligneul's attack on the Greek Church is out. It covers no less than 284 pages, giving a thorough historical account, based on Eastern Church authorities, of the questions at issue between the Greek and Roman Churches. The title is *Romakyō Bembō Ron*.

#### YOKOHAMA GENERAL HOSPITAL.

The following is the report of the Committee of the General Hospital for the first quarter ending Jan. 31st last:—

The Committee begs to present the following report on the working of the Institution for the first quarter of the financial year, November, 1st, 1904, to January 31st, 1905:—

	Dr.	Cr.
To Balance brought forward.....	3,533.83	
Working expenses.....	4,987.82	
Ground Rent for 1 year.....	176.70	
Interest.....	22.06	
Repairs and Improvements.....	689.14	
Furniture.....	79.90	
By Earnings.....		5,201.64
Donations, &c. (including proceeds of Dramatic Performance).....		933.90
Balance.....		3,353.91
	9,489.45	9,489.45
BALANCE SHEET.		
	Dr.	Cr.
To Loans.....	3,552.43	
Chartered Bank.....	481.96	
Sundry Creditors.....	282.62	
By Sundry Debtors.....		940.65
Cash in hand.....		22.45
Balance.....		3,353.91
	4,317.01	4,317.01

#### RECORD OF PATIENTS.

	Room.	Ward.	Special.	Charity.	Total.
Admitted.....	38	16	6	6	66
Discharged.....	29	10	6	5	50
Deaths.....	2	0	0	0	2
Under Treatment.....	7	6	0	1	14

H. J. NEVILLE, Hon. Secretary.

#### MEN'S READING-ROOM DEBATE.

Mr. F. S. Booth presided at the debate on the question, "Resolved, that capital punishment should be abolished," held in the Y.M.R.R.A. Rooms on Wednesday evening. The attendance was not large, which necessarily reduced the number of speakers, but what was lacking in quantity was fully compensated for by the quality of the speeches.

The affirmative was ably upheld by Mr. Cyril Allen. He put forward many strong arguments in favour of the abolition of capital punishment and treated the subject from humanitarian and moral standpoints. He was supported in neat little speeches by Messrs. Bunting, Macbeth and Booth.

Mr. Nicolle introduced the negative side of the question, and had rather an uphill task in meeting some of Mr. Allen's arguments. Mr. Nicolle based his arguments on the greater deterrent effect that fear of death has in prevention of murder than the thought of mere imprisonment although it be for life. He mentioned many reasons which in his opinion made capital punishment necessary. Dr. Dearing was the only other speaker on this side. A vote taken on the merits of the question resulted in a win for the affirmative by 7 votes to 4. A vote on the merits of the argument resulted in a win for the affirmative by 6 votes to 1.

At the close of the debate Dr. Dearing intimated that the committee had been able to arrange for Mr. George Kennan to give a lecture on his adventures in Eastern Siberia, in the Public Hall on March 29th. The proceeds were to be equally divided between the Y.M.R.R.A. and the fund for relieving the families of soldiers who had fallen round Port Arthur. Admission would be 1 yen.

The proceedings terminated with a vote of thanks to the chairman.

#### THE LEPROSYPHOSPITAL AT GOTEEMBA.

We have received from the Rev. Father Joseph Bertrand a statement of accounts of the Leprosy Hospital at Goteemba, together with a most interesting report of the work which is being done at this admirable institution for one of the saddest classes in Japanese life. We need scarcely remind our readers that we are at all times willing to receive subscriptions on behalf of Father Bertrand's noble work. We append his accounts:—

Tableau des Recettes et Dépenses de la Léproserie de Goteemba pendant l'année 1904.

RECETTES:	
Dons recueillis au Japon.....	554.00
" venus de divers pays étrangers.....	1874.59
" de lépreux soignés.....	332.89
Intérêts payés par la banque.....	404.10
Objets vendus.....	139.07
Total.....	3304.55
DÉPENSES:	
Honoraires et salaires d'employés.....	392.00
Nourriture, riz, &c. shōyū.....	2482.13
Chauffage, éclairage, etc.....	314.30
Ustensiles et outils divers.....	206.28
Entretien des animaux, chevaux et vaches.....	66.63
Médecines.....	57.27
Impôts et contributions.....	75.55
Imprimés et frais de poste.....	50.66
Réparations.....	278.54
Voyages.....	34.68
Total.....	3958.04

L'excédant des dépenses sur les recettes a donc été de 653 yens 49 sen. Cette somme a été prélevée sur le fonds de réserve.

The Directors of the Imperial Chinese Railways have presented Mrs. A. G. Cox, of Yinkow, with a massive silver urn suitably inscribed in recognition of the bravery displayed by her in staying at Yinkow last Summer when a collision between the belligerents was imminent. Her action in so doing buoyed up the timid Chinese employers and kept them at their posts; and in consequence there was no interference with the regular train service.—*P. and T. Times.*

\* Such a translation in the early ages of the Church would in the West have furnished material for a hundred years' controversy as to the real nature of Christ.—(WRITER OF SUMMARY).

## NEW PLAYS IN TOKYO.

(COMMUNICATED.)

At the Kabukiza two plays are now being presented to crowded houses. The performance, beginning at 2 p.m. and ending at about 6 p.m., opens with *Akoya*, an historical tragedy, and closes with a modern farce entitled *Shoku-dōraku*. Both pieces are by that most popular novelist—Gensai Murai.

*Akoya* is founded on a famous tale of Old Japan and runs thus:—Act. I. introduces us to Japan of seven or eight centuries ago when the land was rent and torn by the contest between the two clans of Minamoto and Taira. The scene opens on a skirmish in which the Taira are sent flying. *Yoshitsune* appears and, presently, at the further end of the *hanamichi*, *Kagekiyo*, the hero of the play, hurls defiance and challenge at the raging Minamoto. *Kagekiyo* is an unmatched archer and dares the gallant leader of his enemies to stand target for one arrow, announcing in a fanfaronade typical of the time, his intention of piercing the helmet of his foe. *Yoshitsune's* life is too valuable to be idly ventured in this wise; but the pride of his samurai will not allow them to pass this challenge unnoticed. So, unknown to *Kagekiyo*, another Minamoto warrior dons his leader's *kabuto* and stand forth to be shot at. The Taira shoots and vindicates his skill. He flies, while his target writhes in a death agony, but before dying intrusts his mother and sons to the care of his lord *Yoshitsune*, who promises to care for them.

The second scene is a battle between the rival factions, and the Taira are routed. After the soldiers leave the stage, two men in *kamishimo* and *hakama* appear and one chants an explanation of the scene to the samisen-accompaniment of the other, who is a past master of the art. His manual—or should I say digital?—dexterity is amazing; his playing stirs the blood even of the sluggish and makes one keen for battle.

Act. II. Scene 1, is the highway to a temple. *Akoya* and her younger sister are going thither to pray for the safety of *Kagekiyo*, the lover of the *shirabyoshi* (geisha of old), but her way is barred by a rude, brutal samurai and his soldiers; he declares that *Kagekiyo* is dead, and that, in any case, he would prevent her petitioning the gods on behalf of an enemy of his lord Yoritomo. He and his men are about to offer rough treatment to the two girls when *Shigetada*, Yoritomo's greatest general, comes along and stops them, rebuking them severely for doing violence to women, even though they sympathise with the enemy. The *shirabyoshi* thank the noble samurai and hasten to the temple; *Shigetada* and his attendants also disappear in the same direction. A ragged bundle in the background stirs and a beggar stands up and soliloquises. Suddenly he hides again and *Akoya* with her sister appears. The beggar goes up to them and begs for a coin. *Akoya* wraps up a piece of money in a screw of paper drops it into his outstretched hand. As she does so she recognises *Kagekiyo*. Love's eyes are keen but Hate's may be keener: she, therefore begs her knight to come to her house and she will disguise him as a farmer, which, though not a good disguise—for nothing can hide his dignified and soldierly carriage—is yet better than his present one. He consents.

Scene 2. Before a temple. Two gardeners sweeping and watering the courtyard against the coming of Yoritomo in procession invoke the aid of Heaven on his projected expedition into the country of the defeated Taira. *Kagekiyo* appears disguised as a farmer and bribes the two underlings to let him hide where he can get a good view of the great lord Yoritomo. Presently approaches the procession. Yoritomo with stately mien is just about to climb the temple steps when out rushes *Kagekiyo* upon him and attempts to cut him down with his sword. But no, *Shigetada* defends his master and *Kagekiyo* after some desperate fighting makes good his escape. Scene 3. *Kagekiyo* chased by Minamoto warriors does deeds of derring-do, fencing till his sword is struck from his hand, then defending himself by jujitsu till he repossesses himself of a sword, finally escapes.

Act. III—*Akoya's* music-room. The two sisters on the watch. Racked with anxiety, *Kagekiyo* steals in at night and is hidden beneath the floor of the dancing-stage. Soon Iwanaga Uji, a regular bully, rudely stalks in, *tearaji* and all. He accuses *Akoya* of knowing the whereabouts of *Kagekiyo* who is suspected of being the would-be assassin of Yoritomo. *Akoya* answers with a riddling rhyme which the bully can not fathom. Becoming enraged and ordering his soldiers to bind the *Shirabyoshi*, he threatens to extort confession by torture. Again *Shigetada* comes to the rescue and orders her to be unbound. As he is the senior in rank Iwanaga sullenly obeys. *Shigetada* then, much to the surprise of all present, asks *Akoya* to play a piece on her koto, as he has heard she is a very skilful performer. Iwanaga roughly remonstrates, insinuating also, that her beauty has seduced *Shigetada* from his duty. The latter smiles and explains that no one whose heart is agitated by crime or anxiety can play on the koto to satisfy a critical ear, and thus the koto was his instrument of torture. Iwanaga again protests but uselessly. *Akoya* meanwhile has controlled the storm within her and offers to play and sing "The Legend of the Dance" while her sister will interpret it to the eye. The story of the song is that a celestial maiden alighted on the beach of Mio-no-Matsu-hara and hanging her robe of feathers on a pine, wandered about enjoying the lovely scene. Meanwhile a fisherlad saw the feathered dress and took it home, not knowing whose or what it was. The fairy, however, saw him in the distance and following him, succeeded in persuading him to give it back to her. As a reward for his compliance she dances for him and then gradually soars into the sky and is lost in the blue.

*Akoya's* skill is so marvellous, her voice so exquisite, that her audience is enthralled; even the boorish Iwanaga is touched. *Shigetada* thanks the singer and says that on return he will excuse her from further questioning. Iwanaga gets up and stalks off in high dudgeon. *Shigetada* continues his conversation with *Akoya*, saying *Kagekiyo* is a coward to hide and let her bear all the torment and anxiety. He is on the point of departing when *Kagekiyo*, touched to the quick by his words, bursts out of his hiding place and despite *Akoya's* desperate efforts to prevent him, calls to *Shigetada* and offers to surrender if he can be assured no harm will come to the child Emperor, Antoku Tenno. *Shigetada* replies that Yoritomo is just as anxious as he is on that score and so far as he, Yoritomo, is concerned, Antoku Tenno is quite safe. *Kagekiyo* says: "I surrender—not to save my life, for to the death I am your foe—but for the sake of my Emperor." *Shigetada* is touched and though *Kagekiyo* offers his hands to be bound, only constructively binds him by throwing over *Kagekiyo's* shoulder his own belt cord. He allows his prisoner to bid adieu to his despairing love *Akoya*, *Kagekiyo* asks her for a song to cheer him on his way to the other world and she, as bravely as she can, sings in a broken voice of the glory of a warrior's death. The curtain hides the scene of farewell, with *Kagekiyo* looking longingly, wistfully back at *Akoya*, prostrate on the ground.

*Shoku-dōraku* is based on two scenes taken from the *Kui-dōraku* (Pleasures of Housekeeping) and is quite an amusing thing, especially the first scene, which opens in the living-room and kitchen of Mr. Ōhara, (Chinese ideographs read Great Plain, but the sound may be taken to mean Big Belly) a University graduate and a gourmand, in Tokyo. The living-room is quite Japanese, but the kitchen is distinguished from most native kitchens by being provided with two brightly polished gas-stoves and other foreign utensils for cookery. On account of these same stoves the usual circular stage has had to be abandoned and so the wait between the scenes is somewhat tedious occasionally, but one can slip out and visit the excellent little restaurant upstairs where foreign food is provided—for a consideration—by Mr. Murai's *cordon bleu*. This farce was arranged by the novelist to bring to the notice of the Japanese public the cleanliness and utility of gas-stoves and the other *batlerie de cuisine*, and the actors on the stage make good use of them during the progress of the scene in turning out biscuits

and omelets and other dainties for their own delectation and cream puffs for the delectation of the audience. While the female portion of the audience is intent on the kitchen side of the scene, the men are laughing the roof off in their enjoyment of Ōhara's attempts to titivate himself to please the eye of his lady-love. He is in love with a Tokyo *Ojisan*, who sets a good example to the *Ojisan* in real life by taking an interest in cooking and by not being afraid of soiling her fingers. His parents in the country have decided to marry him to his cousin and when the scene opens we learn from him that they are on their way to Tokyo to pay him a visit; hence all the bustle and confusion in his house, for he intends to give them a grand *Gochisō*. After getting himself up as sprucely as he knows how—and that isn't much—he sets off to go to the station. Before he proceeds very far he bumps into his cousin, who is a terrible specimen of the country gawk. Amusing complications ensue in his endeavour to keep his people from finding out the true state of affairs and of his heart.

Scene 2 is a garden-party and is amusing enough in its way but leads to nothing. The curtain falls and the play is over. Why? Because the playwright only wanted to give two scenes from his book which is too long to dramatise altogether.

## UNION CHURCH ORGAN RECITAL.

The excellent programme arranged by Mr. W. Karl Vincent drew a crowded congregation to Union Church on Tuesday, and the funds of the proposed new church building must have largely benefited. The proceedings opened with the Lord's prayer, followed by a prelude and fugue in C. minor from Tschirch's "A Festival Fantasia," which were excellently interpreted on the organ by Mr. Vincent. Mrs. J. Pender Mollison, who was in lovely voice, sang with charming effect "The Lord is my light," Allitsen's setting of the 27th Psalm. Then the outstanding feature of the recital was reached, the rendering of an unpublished anthem by Mr. W. Karl Vincent. It was entitled "Come ye children and hearken unto me," and the soloists were Mrs. E. C. Irwine, Miss Burdett Leach, and Mr. S. H. Somerton. The anthem opens with an exquisite theme, the words being the same as those which give a name to the composition. This was beautifully harmonised, and in slow tempo. In complete contrast a dramatic recitation and air (bass) follows, "I was glad when they said unto me, we will go into the house of the Lord." This air was then taken up by the tenors and basses, and again in full harmonised chorus, and yet again in unison with brilliant independent accompaniment. A sweetly pretty soprano solo, "O, how amiable," makes another complete change, which is followed by a fine sextette, soprano and contralto with chorus, "Blessed are they," the whole concluding with a repetition of the original theme. This spirited but most devotional composition, which was given with much feeling by all concerned, may truly be described as a perfect anthem; being indeed, one of the best we have ever had the pleasure of listening to.

Three pieces upon the organ followed: a "Fugue in C. Minor" (Bach), "Gavotte" (from Martini's 12th Sonata); and a "Berceuse" (Delbrück), in which Mr. Vincent was heard to distinct advantage. Mr. Somerton's recit. and aria from Handel's "Messiah"—"Thus saith the Lord," and "But who may abide," were very lovely, the singer being in splendid voice and in thorough harmony with his subjects. The last concerted piece was taken from Mendelssohn's well-known "Hymn of Praise"—"I waited for the Lord," in which the soloists were Mrs. E. C. Irwine, Miss Burdett Leach, Messrs. A. E. Cooper and S. H. Somerton. This went very well, the choir having evidently devoted much pains to its rehearsal. The recital concluded with the familiar but ever-welcome "War March of the Priests" from "Athalie" (Mendelssohn). Altogether it must be accounted as the most successful of the present series of Organ Recitals at Union Church. We understand that the last will be given some time during Easter week, when pourtrams of the

"Elejah" will occupy a conspicuous place on the programme.

Organ...Prelude and Fugue in C. minor...Tschirch.  
("A Festival Fantasia.")

Song..."The Lord is my light" (Psalm 27). Allitsen.  
Mrs. J. Pender Mollison.

Anthem (M.S.)..."Come ye children and  
hearken unto me"...W. K. Vincent.

Soloists—Mrs. E. C. Irwine, Miss Burdett Leach  
and Mr. S. H. Somerton.

Organ... { (a) "Fugue in C. minor".....Bach.  
(b) "Gavotte" (from 12th Sonata)Martini.  
(c) "Berceuse".....Delbruck.

Recit. & Air..... { (a) "Thus saith the Lord" Handel.  
(b) "But who may abide"...Handel.  
("The Messiah.")  
Mr. S. H. Somerton.

Anthem....."I waited for the Lord"...Mendelssohn.  
("The Hymn of Praise.")

Soloists—Mrs. E. C. Irwine, Miss Burdett Leach,  
Messrs. A. E. Cooper and S. H. Somerton.

Organ..."War March of the Priests"...Mendelssohn.  
(Athalie.)

The offertory taken at the Union Church Organ Recital on Tuesday amounted to *yen* 175.12. We might mention that the Rev. E. S. Booth in the course of the recital said that for many years the congregation of Union Church had shared the present building in the Settlement with the Japanese congregation to whom it belonged, but a feeling had arisen that the usefulness of the Church would be extended and the power of its work increased if the congregation had a building of their own. At the last annual general meeting of the Church the Trustees were authorized to start a Church building fund, and the offertory that day would be given to the new fund. Of course the project was but in embryo yet he felt sure that once it was started it would continue to grow until such time as it could crystallize and assume the form of a new church building. It might take years, but if it was consecrated with their prayers their new-born hope would eventually materialize as they desired.

#### THE AMERICAN ASIATIC ASSOCIATION.

The annual dinner of the American Asiatic Association was held on Saturday evening at the Grand Hotel, Yokohama, and proved highly successful. Mr. N. F. Smith, President of the Association, occupied the chair, and there was a large attendance.

The toast of the evening was proposed by the American Minister, Mr. L. C. Griscom, who said:

MR. PRESIDENT AND MEMBERS OF THE AMERICAN ASIATIC ASSOCIATION.—I feel myself singularly fortunate in being chosen to propose the toast of the American Asiatic Association, of which it is my good fortune to be an honorary member. The avowed purpose of your Association is such that no diplomatic official of the United States could fail to find himself in entire sympathy therewith. As I understand it your object is to foster and safeguard the trade and commercial interests of American citizens, and to secure by union and organization the advantages of sustained watchfulness and united action. With this high aim in view the Society keeps a careful guard on the right of American merchants and endeavours vigorously to oppose every measure tending to do them harm and strenuously to support any legitimate movement which would benefit their interests. It is of the greatest importance to your Association that it should maintain the closest possible relations with the Government of the United States and it is in regard to these relations that I would like to say a few words.

Your Association has had occasion within the last few years to make frequent representations to the Department of State upon matters vitally affecting your interests, and you have never yet failed to secure a warm and hearty support. I believe I am correct in saying that at least two or three of the articles contained in our new treaty with China were either entirely created or entirely remodelled in meet with the recommendations of the Association. I mention but one of the many instances in which the weight of the Association has made itself felt. Your able Secretary in New York, Mr. John Foord, has spent many months in Washington in close and confidential relationship with the Department of State, and

several excellent purposes have been accomplished. The branch of your Association which exists in China has often acted in the defense or for the protection of its members, for one case after another involving knotty problems of international law, or difficult questions connected with the intricacies of modern trade have arisen in the past years. That your Association here has had so few occasions for the exercise of its functions in respect to such matters as these is a subject for hearty congratulation. It reflects favorably not only upon the tactful and adroit manner in which your Association is conducted, but also upon the just and liberal Government whose hospitality we are all enjoying to-day.

As long as the sole function of your Society is to gather its members together once a year at a festive annual dinner you are indeed fortunate, but let me suppose that because the present work is of such a peaceful character it does not justify the continuance of the Association. It may be indeed that the mere existence of the Society without any action on its part is a source of strength to you all. Indeed if the Society did nothing more than to convene us on such occasions as this it would serve a useful purpose. It is not good for our patriotism to live too long away from America, but if our interests compel us to do so there is no better tonic than for us to gather at least once a year and give vent to our compelling Americanism. To be sure we have honored guests of other nationalities among us but they were forewarned of what they might hear and certainly it can do them no injury. It is a salutary breath of fresh American air that fills our lungs with pure ozone and enables us to face our tasks for another year with lighter hearts.

Personally I welcome any excuse to go from Tokyo to Yokohama. I had occasion at your last dinner to say that I hoped you would not allow the eighteen miles which exists between our cities to prove a wide gulf of separation. I am glad of the opportunity now to repeat that remark and I may truthfully say that in the past year and a half I have done my utmost to maintain between your Association and the American Legation an even closer relationship than exists between the Department of State and your Association in New York. I will undertake to guarantee that with your assistance these relations will be maintained in the future with the same sincere cordiality.

This occasion is very welcome because it gives an opportunity to say another word in connection with the relations between your Association and our Government. You have had an ample opportunity of witnessing the work of many diplomatic and consular officers of the United States. You doubtless know that diplomacy has a hard row to hoe. We are often lampooned in the public press of the United States as an amiable and ornamental set of gentlemen, waxing fat on munificent salaries and warming ourselves at the European social registers. Whenever there is a proposal on foot to make our service permanent this false impression does the cause much harm. Only the other day "Mr. Dooley" said that in these days of telegraphs and quick transmission of news there was very little work for the diplomatic corps to do. "In fact," he said, "it is a good deal like the boy's apple, there is nothing left but the core." There is a grain of truth in what "Mr. Dooley" says but it seems to me he fails to recognize that our labors are simply changing their direction. The real fact is that in modern times the valuable work of a diplomatist abroad is becoming less and less political and more and more commercial. An office boy can transmit dispatches of the gravest import; the newspapers can report the birth of Princes and the death of Kings. Sooner or later we must recognize that the only work which will justify our political existence will be the work we may do as the advance guard of commerce.

There is one aspect of our condition to which I would call your attention. In official life good work is often of necessity buried from sight. Governor Taft recently said that if you wish to conceal something in a place which is beyond all possibility of discovery by man, you had better publish it in the annual report of the Secretary of War. However this may be there is a vast amount of valuable work done by our diplomatists and consuls which never attains even the publicity of an annual report. It has well been said that in love and diplomacy a man may not boast of his successes. Our officials do not wish for praise but what may be asked is that whenever the occasion presents itself your Association shall be ready to testify to the utility of our diplomatic and consular services, and to urge upon our national government the vital importance of placing them upon a regular and permanent basis.

This brings us naturally to a reference to the great man to whom the Civil Service of the United States owes most. He is the man under whose guiding spirit we are working and he is the man under whose ceaseless effort and fostering care our trade in the

Far East is steadily expanding. You need hardly be told that I refer to Theodore Roosevelt, President of the United States.

Let me quote you the words of Francis B. Loomis, Assistant Secretary of State, to whom the diplomatic service of the United States owes much. They were delivered on an occasion of special interest to us all, when three months ago your Association in New York gave the most magnificent banquet in its history in honor of H.I.H. Prince Fushimi, who was visiting the United States to demonstrate the interest of His Majesty the Emperor of Japan in our great Industrial Exposition at St. Louis. What Mr. Loomis said was this:

"Between the President and the men who are doing good and honest work all over the world there is a bond of sympathy and interest. The Soldier Prince of Japan and the President of the United States when they met did not meet as strangers. Though men of different race, different education, different points of view, each instinctively and instantly recognized in the other those splendid qualities of human nature which are peculiar to no race and to no clime."

We all have vividly in our minds the events of the year which has passed since the last dinner of this Association in Yokohama and through this crisis, as throughout all the trying problems of foreign affairs which President McKinley and President Roosevelt have had to meet during the past six years, there has been at the right hand of the President a man the mention of whose name sends a thrill of admiration and enthusiasm into the heart of every true American, the man whom Lord Lansdowne described as "that great Statesman, John Hay." The annals of history have a wide and exalted place reserved for him. But if his work has been appreciated at home how much more should it be valued by those of us who, living here in the Far East, have had an opportunity to witness the active operation of his great policies. We have also seen at closer range the gruesome details of a great war and so all the more should we be able to appreciate what endless benefit might come from Mr. Hay's earnest efforts to substitute for costly and deadly wars a peaceful and honorable arbitration. We have seen him within the last few months negotiating treaties of arbitration with many of the great Powers and you will be glad to hear that when I placed before Baron Komura the President's invitation to Japan to enter into a treaty of arbitration it was accepted with alacrity. Whatever the fate of those treaties may be the cause of arbitration has been immeasurably advanced and a retrogression made difficult. The President's appeal for a second meeting of the great Peace Tribunal at The Hague was a simultaneous movement with similar ends in view. It has been cordially received throughout the world and when in due time the Convention meets its work must be of vast benefit to mankind.

During the fearful struggle which is now going on so near us the Government of the United States has scrupulously maintained the strict neutrality prescribed in the President's proclamation, but at the same time it has firmly asserted the right of our merchants to continue the pursuance of their peaceful, neutral trade with only such interference as the conditions of war necessitate and the rules of international law permit. For the past ten years our commerce has expanded with a steady and healthful growth which should stimulate us to further efforts. We must not be tempted for an instant to cease our striving and rest on our laurels, for never in the history of the world has industrial competition been keener. If we are to maintain and increase our markets in the Far East it will only be by unremitting toil and a constant exercise of our best faculties. Thanks be to Providence it is the characteristic of our race to welcome such a struggle. President Roosevelt has expressed this idea in one of his most inspired and patriotic writings. I will close by quoting his words:

"Our nation, glorious in youth and strength, looks into the future with fearless and eager eyes and rejoices, as a strong man to run a race. We do not stand in a craven mood asking to be spared the task. No! We challenge the proud privilege of doing the work that Providence allots us, and we face the coming years high of heart and resolute of faith that to our people is given the right to win such honor and renown as has never been granted to the people of mankind."

#### FOOTBALL.

A six-a-side match, the last of the season, was played between the Modern School and St. Joseph's Institute on the Y.C. & A.C. ground on Wednesday the 8th inst. A fast and well contested game left the Modern School victorious by a goal to nil. The successful six were Mollison (goal), Upton and Holmes (backs), Drummond, German and Lischof (forwards).

## YOKOHAMA CRICKET AND ATHLETIC CLUB.

The annual general meeting of members of the Yokohama Cricket and Athletic Club was held on Friday afternoon at the Cricket Pavilion, Dr. E. Wheeler, President, was in the chair and there was a fair attendance.

The Hon. Secretary, Mr. W. S. Moss, read the notice calling the meeting.

On the motion of Mr. D. H. BLAKE seconded by Mr. E. W. FRAZER the minutes of last meeting were taken as read.

The CHAIRMAN, in presenting the report and accounts, said the debit balance was a little better than at this time last year—only a little better—but they hoped to make it much better next week or so. They could say that they had no deaths during the year. He had to state that Mr. W. S. Moss found the duties of Secretary a little arduous and he wished to resign but was willing to carry on as a member of Committee. Mr. E. W. Kilby was willing to serve in his place if the meeting thought fit. Mr. White, the present Treasurer, would also like to resign, and Mr. L. D. Tebb was willing to act in his stead. He noted further that Dr. Garton was going away. Dr. Garton had attended very successfully to baseball and in his place Mr. L. McClesney was a worthy successor. In conclusion he proposed that the report and accounts be approved.

Mr. FRAZER seconded and the motion was adopted.

For President Mr. Blake proposed the re-election of Dr. Wheeler who had served the Club so well in the past and had proved himself to be the right man in the right place (applause).

Mr. W. L. MERRIMAN seconded and the proposal was adopted.

The CHAIRMAN thought he should prefer to have the views of the meeting but it was pointed out to him that his re-election was carried by acclamation.

On the motion of Mr. E. W. Maitland, seconded by Mr. N. T. Marquetti, the Vice President, Mr. D. H. Blake, was also re-elected by acclamation.

Mr. E. W. MAITLAND was unanimously elected Captain of Cricket.

The balloting then took place for six members of the Committee. While the voting was proceeding, the CHAIRMAN invited remarks.

Mr. W. L. MERRIMAN desired to know the meaning of the statement under "Baseball" to the effect that "new tactics were installed and good results can be looked for in the coming season."

The CHAIRMAN said he was sorry Dr. Garton was not present to explain, but he supposed the new Captain of Baseball would be able to report on the tactics at the end of the year.

The balloting for the Committee was announced to have resulted in the election of the following: Messrs. H. W. Kilby, L. D. Tebb, W. Y. Showler, W. S. Moss, L. McClesney and E. W. Kilby.

On the motion of Dr. Moon, who eulogised the services of Dr. Wheeler during the past year, a hearty vote of thanks was passed to the Chairman, to the retiring Secretary, Treasurer, and Auditors.

The CHAIRMAN acknowledged the vote and the proceedings terminated.

Following is the report:—

During the past year interest in the various games supported by the Club has been well maintained. Owing to the present war and the consequent absence of British and American Men-of-War very few matches have been played, but club games have been well supported and keen interest shown.

During the year 44 new members were elected and there are now 248 active members on the books of the Club.

Your Committee regret to report the departure from Yokohama of Messrs. F. E. White, S. Wheeler and Dr. W. M. Garton, who have served on the Club Committee and taken a keen interest in all Club affairs. Mr. F. E. White acted as Captain of cricket, Dr. Garton as Captain of baseball, and Mr. Wheeler was in charge of athletics. The Committee wish to record their energetic and efficient services and tender them their sincere thanks.

The thanks of the Club are due to those members who generously donated prizes in connection with various sports throughout the year, especially to Mr.

A. H. Dare for presenting a new mile challenge cup and to Mr. Tegner for presenting a baseball prize.

Your Committee have again granted the use of the Club ground to the Junior Athletic Club, and the Ladies' Hockey Club.

ACCOUNTS:—The usual abstract is appended and the Committee are glad to report that the debit balance of the Club has been reduced by yen 242.39. The details of the Accounts do not call for particular mention. Mrs. Dinsdale has kindly promised to give a performance of the "Sleeping Beauty" on the 4th of March, the net proceeds of which will be given to the Club, and it is hoped that the Members will give hearty support to this effort to place the Club's finances in a more favourable position.

GROUND REPORT:—The Turf is in rather better condition than last year, and there will not be as much returfing to be done as usual.

The pavilion has been slightly repaired. Roof mended on two occasions when leaking, and steps repaired. A new floor has also been made in the stable.

A new Gear House was erected during the year and has been found very useful for storage purposes. Fence has been repaired and painted and is now in good condition.

Cricket, Football, Baseball and Tennis Gear are also in good order and repair, and very few additions will be necessary for the coming season.

CRICKET:—It was unfortunate that, during the Season under review, several games were abandoned owing to rain, with the result that the number of matches played was considerably under the average.

Two matches were played against Tokyo, honours even, and it is hoped that this may become an annual fixture.

The Interport match took place at Kobe and resulted in a victory for the Club by 8 wickets. One of the features of the game was the plucky innings of S. Stephens, who scored 80 not out in the Kobe second innings, a really fine performance for such a young cricketer and it did much to soften the sting of defeat. The Members of the team were entertained with the well-known hospitality of the southern port.

It is to be regretted that, owing to his departure from the port, F. E. White will not be able to take part in the coming season. He has done yeoman service for the Club for many years past and it is hoped that the loss is only temporary.

The only century during the season was scored by H. W. Kilby—138 on the 9th July: he stands out as the best bat of the year and has the very fine average of 145.66.

BASEBALL:—The season proved to be very active although no ships visited this Port. Many new players participated in the games and plenty of new "timber" was developed. New tactics were installed and good results can be looked for in the coming season.

Seventeen match games were played, not including Club games, which were thoroughly enjoyed.

Two record games were played, viz., one with the Nobles School resulting in 2—0 in the Club's favour, and with Kobe 5—3 in the latter's favour.

Five prizes were offered on the 4th July in the match v. the U.S. Naval Hospital, all of which were won by Club players, viz.:—Batting: C. H. Thompson; Best play: P. Jenks; Base running: L. E. McClesney; Outfielding: C. Parker; Infielding: C. H. Thorn.

The "Tegner Baseball Prize" for points was won by W. M. Garton.

A loving cup was presented by Club members to Mr. K. Dannaher.

Mr. W. S. Stone acted as umpire and Mr. E. Mendelson as scorer during the season.

A new lot of gear was purchased and plenty of material is on hand to start the new season.

ASSOCIATION FOOTBALL:—There has been considerable interest shown in Association Football during the past season, the roll of playing members numbering more than 40, a very satisfactory condition of affairs. Again a match was played against the Tokyo Higher Normal School, and the visitors, while showing considerable improvement on their form of the previous year, were defeated by 6 goals to 1. The usual Six-a-Side competition was played on the English League system, and was won by Mr. J. M. Mollison's VI., which, with the excellent record of 4 wins and 1 drawn game, obtained nine points out of a possible ten. The winning team was:—J. Helm, P. A. Cox and N. G. Maitland, J. E. Drummond, J. M. Mollison and A. Andreis.

The annual Interport match versus the K. R. & A. C. will be played on 11th March.

The result of last season's interport game, which took place after the annual report was issued, was a draw, neither side scoring.

RUGBY FOOTBALL:—Interest in the game has been keen. Practice games have been well attended and two Club sides "Born in Japan" versus "The Rest" produced excellent games, which resulted in victories to "Born in Japan" by 17 points to 5, and 5 points to nil.

Only one match was played—the annual Interport

game versus the K. R. & A. C. The Club visited Kobe with a rather weak team, but secured a victory for the third time in succession by one goal (4 points) to nil.

A 2nd XV played the Keiojuku University on the Home Ground and secured an easy victory.

LAWN TENNIS:—The courts were well used during the summer months, and the three competitions held drew large entries, and provided some good games. The Scratch Singles, for the "Jackson Cup," was won by Mr. T. J. Chapman, the same player also winning the Handicap Singles from Scratch. In the Doubles Handicap, Messrs. P. A. Cox and S. Wheeler were victorious, after a close game in the final round against Messrs. N. G. Maitland and A. J. McClure.

ATHLETICS:—The annual Athletic Meeting was held in the Spring. The weather conditions were unfavourable, the ground being very heavy, and some of the events had to be decided in the rain. No records were broken, but quite a lot of fresh talent was discovered amongst the newer members, and a good meeting may this year be confidently expected.

Following are the accounts:—

THE HONORARY TREASURER IN ACCOUNT WITH THE YOKOHAMA CRICKET AND ATHLETIC CLUB.

ABSTRACT OF THE ACCOUNTS FOR THE YEAR TO 31ST JANUARY, 1905.

RECEIPTS.	Yen.
To Subscriptions.....	3,165.00
" Entrance Fees.....	660.00
" Rent received for Lockers.....	90.00
" Rent received from Ladies' Hockey Club.....	50.00
" Surplus on Bar Account.....	104.77
" " on Sports Account.....	156.70
" " on Tennis Tournament.....	11.00
" Sundries.....	18.00
" Balance at debit of Club at 31st January, 1905.....	2,941.75

Total ..... 7,197.22

PAYMENTS.	Yen.
By Balance from last Account.....	3,184.14
" Working Expenses.....	2,363.57
" Match Expenses.....	142.08
" Ground Rent for year to 31st March, 1905.....	410.28
" Fire Insurance.....	231.00
" Interest.....	150.35
" Gear purchased.....	697.15
" Sundries.....	18.65

Total ..... 7,197.22

Yokohama, 23rd February, 1905.

W. B. WHITE,

HON. TREASURER.

Examined and found correct,  
H. W. FORTESQUEUE,  
GEO. A. CHALMERS.

## "SLEEPING BEAUTY."

Notwithstanding the heavy rain—which later on turned to snow—there was a very good attendance at the Public Hall on Saturday evening to say farewell to "Sleeping Beauty." The extravaganza was played to a most appreciative audience, and it went with lots of "go," every one being familiar with their parts and thus acting easily and naturally. The inexhaustible Brady was better than ever. He arrived first as "A Wedding Guest"—an apt allusion to the great social event of the day which greatly tickled every one; and in his increasingly popular song "The goody-goody time," he rang in a new verse which had for burthen a tribute to the prowess of Yokohama ladies in the athletic field. Miss Lloyd Thomas, fortunately quite recovered from her recent indisposition, sang her songs very charmingly and had to repeat the last verse of "The Miser's Daughter" in answer to an insistent encore. The new sextette in the last act was excellent. Three ladies—Mrs. Dinsdale, Miss Zandie Rogers and Miss Hilaire Moss—representing the *Japan Advertiser*, the *Box of Curios* and the *Deutsche Japan Post*, danced with Mr. Ferrier, Mr. Bowden and Mr. Poole, who represented the *Japan Mail*, the *Japan Gazette* and the *Japan Herald*. Their costumes of black and white were most effective, and the dance was enthusiastically encored. One of the most amusing features of the evening was furnished by the "gallery gods," by means of an aerial railway. Along these wires throughout the evening they despatched to the stage a stream of bouquets for the ladies of their choice and toys for the men, *Sans Atouts*

in particular being the recipient of some funny gifts as tokens of the gallery's love and appreciation.

At the close of the performance Dr. Wheeler, as President of the Y. C. and A. C.—for the benefits of whose funds the performance was given—presented Mrs. Dinsdale with a lovely basket of flowers. In graceful terms he thanked her on behalf of the Club and the audience for her kindness in getting up the performance and for giving the proceeds of that evening to the Y. C. and A. C. The speaker also said their warm thanks were due to the Bijou Orchestra, to Mr. Horne, the musical director, and the *caste*. Amid hearty cheers the ladies were then presented with lovely baskets of flowers and the proceedings terminated.

#### THE LAW COURTS.

##### P. SARDA v. GRAND HOTEL.

This case in which plaintiff claims yen 3,407.16 as compensation for supervision of construction work, and the hotel counter-claims for yen 37,267.01 for damage caused by imperfect work passed by the plaintiff as architect, was brought up again on March 3rd in the Yokohama District Court before Judge Yasuda.

Plaintiff's Counsel asked the Court to summon Y. Isono, who was examined on Sept. 14th as a witness and defendant's Counsel asked the Court to appoint an expert in order to examine the imperfect work. The Court granted both requests and adjourned the hearing till March 17th.

##### CLAIM FOR RENT.

The hearing of a case in which Mr. Paul-Helm claims yen 348 from a Chinaman named Su-fang Chee, No. 119, Yokohama, began on March 6th in the Yokohama District Court before Judge Yasuda.

Plaintiff was represented by Mr. Hidaka and defendant by Mr. Fujiwara.

Plaintiff's Counsel stated that Mr. Cheong, Chinese merchant, the predecessor of Cheong-win-li, took by lease two buildings belonging to Mr. Helm, from Jan. 1st, 1898. Cheong, however, failed to pay rent during a certain time, amounting to yen 2,887 50, for which Mr. Helm lodged a claim last year. As the result, a third person was ordered to pay yen 2,625 but the balance yen 262.50 was not recognised by him on the ground that the defendant in this case occupied the buildings from July last on a sub-lease from Cheong-win-li, the rent being yen 87 per month.

Defendant's Counsel held that his client had paid to Cheong the rent due and that the Chinaman had no responsibility towards plaintiff.

Parties produced in Court their evidence after which plaintiff's counsel asked the Court to adjourn the hearing for further preparation of his evidence. The Court granted the request and decided to sit again on March 22nd.

##### CLAIM FOR RENT.

In the Yokohama District Court, the hearing of a case in which Mr. P. Helm claims yen 2,336 from Hwan Yeeche, a Chinese merchant, No. 120 Yamashita-cho, came up on March 9th before Judge Nakanishi.

Plaintiff's Counsel stated that a third person, Mr. Cheong, took by sub-lease two buildings now occupied by defendant and belonging to Mr. Helm, from July, 1898, and at the same time, the former borrowed yen 5,000 from the house-owner. The third person, Cheong, however, failed to pay the loan and the rent and Mr. Helm accordingly lodged a claim against them last year. In consequence, this third party was ordered to return to the owner the house and to pay the rent outstanding. Defendant in the present case occupied the buildings from July 9th, 1904, on another sub-lease from the third party, the rent being yen 120 per month and it ran from Sept. 25th till the execution of judgment.

Defendant's Counsel contended that his client had made a contract of lease with Cheong on condition that he held the buildings for five years, and paid rent from Oct. 3rd to Dec. 31st, 1903, and yen 2,000 in advance for a year, which com-

menced Jan. 1st, 1904; defendant therefore had no responsibility as regards plaintiff.

Plaintiff's Counsel asked the Court to adjourn the hearing for further preparation of his evidence. The Court granted the request and adjourned till March 25th.

##### ALF. KIRBY v. MRS. BRITAIN AND THE MISSES KIRBY.

Judgement was given on March 9th in the Yokohama District Court on a protest lodged by Mr. Alf. Kirby against a decision delivered in the Local Court ordering him to present settled accounts as to rent which he had received from the lessee of the premises at No. 85, Yamashita-cho, under a petition laid by Mrs. Annie Britain and the Misses Kirby. The protest was rejected with costs. The contention of Mr. Sawada, representative of the ladies, now residing in London, was that Mr. Kirby had been authorized by them to receive the rent for the property from the lessee and to remit it every month, but he had never paid it to the ladies although he had collected it.

#### CORRESPONDENCE.

##### THE RAILWAY MORTGAGE LAW.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—Last night after retiring I took up Mr. de Becker's translation of the Railway Mortgage Law, instead of my usual night-cap of Thackeray, and compared it with the original for the first ten Articles. I must sincerely compliment Mr. de Becker on his faithful translation of such a difficult document, but there are a few points which I would ask him to kindly elucidate for me, viz:

Article 1.

Is "limited joint stock company, the capital of which is divided by shares" the accepted translation of the Japanese words "Kabushiki Kaisha"?

Article 2.

Why in one place is "shometsu" translated "extinguished" and in the other "ceases to exist," and why not "by" instead of "when"?

Article 3.

Do the Japanese words "Kigu kikai" need the words "implements" and "plants." Why the "sub" before "station"?

Article 6.

Why is the word "shasai" translated "debenture"?

Article 10.

What word, if any, is used in the translation for "kyoraku"?

Apologizing to you and Mr. de Becker for the trouble.

I remain, Sir, yours faithfully.

IGNORAMUS.

Tokyo, March 4th, 1905.

Mr. J. E. de Becker writes us:—"The following explanation will perhaps answer Ignoramus and satisfy his doubts":—

ARTICLE I.

The usual translation of the word *Kabushiki-Kaisha* is "Joint Stock Company," or "Limited Company," but in translating this article I thought it well to make the translation a little more explanatory in order that no mistake should occur as to the class of Company designated.

ARTICLE II.

The idea of the last paragraph is that as soon as the mortgage has been wiped out and extinguished, the railway estate as such ceases to exist. It is not not always possible to translate the same Japanese word by the same English expression and hence the terms "extinguished" and "ceases to exist." The word "by" would be an almost exact translation of the Japanese *ni yotte*.

ARTICLE III.

The words *kigu kikai* are generally used to express the idea of tools, implements, plant and machinery, and evidently the law is intended to cover all these necessary adjuncts. There is no necessity to use the word "sub" before "station," but I followed the official translation of "The Electric Business Control Regulations" promulgated in 1897 and revised in 1902. The law evidently contemplates every class of station.

ARTICLE VI.

*Shasai* is the accepted word for "debenture" (Article 199 of the Commercial Code).

ARTICLE X.

The word *kyoraku* is not translated alone but in

combination with the word *wo yurusu kettei wo nasu koto wo edzu* and has been rendered "adjudication cannot be granted." The rendering has been made because, according to law, the Court has to render a rule accepting the price which has been offered at the auction. (See Chapter 3). The word *kyoraku* is equivalent to our English "knocked down" and the compound word *kyoraku-butsu* is the Japanese equivalent of "objects knocked down." I based my rendering on the official translation of the Code of Civil Procedure of Japan, Article 674 and other Articles.

##### ST. ANDREWS MISSION CHURCH.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—Will you kindly allow me to say for the information of those of your readers who are interested in the new mission church of St. Andrews, Yokohama, that it is to be dedicated on Sunday next, March 12th at 9.30 a.m. by the Right Rev. Bishop McKim, D. D., The presence of our friends will be very welcome and though the service will be in Japanese nearly all of it can be followed by those who bring English Prayer and Hymn-books. It would be a convenience (though not an absolute necessity) if we could know approximately the number of foreign friends who propose to be present in order to make the necessary arrangements for their accommodation. The dedicatory prayers will be followed by morning prayer and Holy Communion.

Yours faithfully,

WALTER WESTON.

##### INTERNATIONAL RED CROSS AND REFUGEE AID SOCIETY.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—The International Red Cross & Refugee Aid Society of Shanghai was formed at the beginning of the war for the purpose of looking after the natives who might be wounded during hostilities, and for the succour of distressed refugees. A large and influential committee was appointed with Sir H. S. Wilkinson as President and Dr. Timothy Richard as Hon. Secretary. The Chinese merchants in the south subscribed liberally, and early in its history the Society had hundreds of thousands of Taels in hand, the Empress Dowager alone subscribing Tls 100,000.

A branch of the Society was formed at Newchwang, and a strong Committee, foreign and Chinese, appointed, with H. B. Miller, Esq., American Consul General, as Chairman. This Committee appointed foreign representatives at various centres in the interior to work in harmony with the local Chinese officials and watch the course of events as they affected the native population, and to assist the society in making provision for the relief of distress.

Hospitals were placed at the disposal of the Committee in five places, a staff of medical men and native assistants volunteered their services, and provision was made for Chinese wounded. Hospices for refugees were established at Newchwang, Liaoyang, Mukden, Hsinmintun, Kuangning, Fakumen and Kaiyuan. The Imperial Railways of North China granted free transport to destitute refugees desirous to return to their homes in Kuanli. At Newchwang over 6000 have been temporarily housed, fed and sent to their homes in various parts of Chili and Shantung. From Hsinmintun over 20,000 have been transported, chiefly coolies from the Russian Railways and mines, who had been thrown out of employment by the war. After the battles of Liaoyang and Shaho many hundreds of wounded natives, women and children as well as men, were received into the hospitals in Liaoyang and Mukden, while over 10,000 homeless refugees, chiefly women and children, have been sheltered and fed in the score or so of refugees established by the Society. Some 20,000 wadded garments were distributed by the society at the beginning of winter, and some 5,000 families whose homes were not demolished but who on account of the destruction of the standing crops, the scarcity and famine price of grain, were in want, are being supplied with grain sufficient to carry them through the winter at least.

Roughly speaking about 80,000 native sufferers through the war have been aided by the society up to the present. As the houses of most of the resident refugees have been demolished, and all their belongings destroyed, it is probable that a large proportion of them especially the women and children, will be dependant on the Society for many months to come.

In addition to the relief work of the Society H. E. the Tartar General has been unremitting in his efforts to ameliorate the sufferings of the victims of the war. He has also assisted the Society in every possible way and a most pleasing feature of the work has been the cordial way in which the Chinese officials have cooperated with foreigners throughout. For this we are indebted largely to the example shown by the Governor General.

JAMES WEBSTER.

Newchwang,

Hon. Secretary.

## TELEGRAMS.

(REUTER'S SPECIAL TO THE "JAPAN MAIL.")

## RUSSIANS IN FULL RETREAT.

London, March 8.

The Russians are in full retreat.

(REUTER'S SPECIAL SERVICE.)

## BRITISH POLITICS.

London, March 3.

The House of Commons has adopted the Address to the Throne by a vote of 235 to 175, after rejecting by a vote of 250 to 201 an amendment proposed by Mr. T. R. Buchanan (Liberal member for East Perth) demanding a reduction in the national expenditures.

## DEMANDS OF RUSSIAN WORKMEN

Workmen in St. Petersburg yesterday chose 200 electors whose duty it is to appoint representatives on the Commission mentioned on the 21st of February. This meeting of electors, which was the first sitting of workmen permitted in St. Petersburg, refused to carry out their task unless 3,000 workmen arrested since the 21st of January were immediately released and other demands were granted including inviolability of person and domicile, freedom of speech and press.

## LORD MILNER'S SUCCESSOR.

Earl Selborne (First Lord of the Admiralty) who has been appointed to succeed Lord Milner, leaves Southampton for South Africa at the end of March.

[Note.—Earl Selborne has been at the Admiralty since 1900. He married, as Viscount Wolmer, a daughter of the late Lord Salisbury, and after obtaining a seat in the House of Commons did much work as Private Secretary for War, the Treasury, etc., until 1895 when he became Under Secretary for the Colonies. He was born in 1859.]

## BRITISH NAVAL ESTIMATES.

London, March 4.

The British Naval Estimates for 1905-6 amount to £33,389,000, compared with £36,689,000 in 1904-5. This is mainly due to a decrease in new construction and repairs, and also partly due to the fact that the latter figure includes the two cruisers bought from Chili. The decrease in repairs is due to the elimination of vessels of small fighting value. It is proposed to begin in 1905-6 the construction of one battleship, four armoured cruisers, six ocean and twelve coastal destroyers, and eleven submarines.

## ST. PETERSBURG WORKMEN AND REFORMS.

At another meeting of the workmen's electors in St. Petersburg, it was decided that unless their demands are conceded to-day, a general strike will be proclaimed.

There is general apprehension at St. Petersburg, Warsaw and Moscow that disorders on a large scale will occur on Saturday, the anniversary of the liberation of the Serfs.

## COAL AND PROVISIONS FOR THE BALTIC FLEET.

Nine German colliers and two steamers laden with stores have left Port Said for the Baltic Fleet.

## REACTIONARIES AGAIN IN THE ASCENDANT.

Later.

The group of Ministers engaged in drafting the proposed Russian Constitution have fallen into disfavour, and the reactionaries have regained the ear of the Tzar, who has issued a manifesto reaffirming autocracy and appealing to the whole nation to unite against internal enemies and an obstinate foreign foe.

## THE NORTH SEA INDEMNITY.

London, March 5.

The British claim for indemnity in connexion with the North Sea affair amounts to £6,500.

## THE STRIKES IN RUSSIA.

The strike in Warsaw affects every trade. The strikers are assuming a threatening demeanour, and are using revolvers and bombs. Unless the Government can force the employees of the gas-works to resume work the city will be in darkness on Sunday. The Tzar's manifesto has had a bad effect. The authorities are hastily concentrating troops in Warsaw and Lodz.

## THE FIGHTING AT THE FRONT.

London, March 6.

General Kuropatkin reports that he lost part of the Goutuling defences on March 2; and that the attack was continued yesterday. The fighting on his left flank was general and of the most severe kind. Desperate Japanese attacks were repulsed again and again, the enemy in some places making ramparts of their own dead.

Over twenty Japanese battalions were yesterday repulsed at Kandolisian with terrible loss.

## THE TSAR'S MANIFESTO.

After the Tzar's Manifesto the Russian public were astounded by the rescript intimating his intention to summon some form of an elective assembly to participate in legislation. The newspapers express satisfaction but the public await developments. The strike of workmen at the Warsaw Gas-Works is finished.

## THE ST. PETERSBURG STRIKE.

Later.

The strike has increased in St. Petersburg, and 51,000 men are out. Saturday passed quietly.

## AT THE FRONT.

The Japanese have gained a signal victory in the region beyond the Hun. They have defeated in detail, with great slaughter, two divisions of the Sixteenth Army Corps, which recently arrived from Europe. They have also captured a large quantity of ammunition.

## NEW LORD OF THE ADMIRALTY.

Earl Cawdor (?) has been appointed First Lord of the Admiralty.

## THE FIGHTING AT MUKDEN.

London, March 7.

General Kuropatkin reports that the advanced guard of the Japanese, who have been surrounding his right flank, arrived on March 4th within five miles of Mukden station from the direction of the Hsinmintun road. Reuter's correspondent at Mukden says that the sudden appearance of the Japanese completely surprised the Russians, and the city was thrown into confusion.

## NEARING MUKDEN.

Reuter's correspondent, telegraphing from Mukden on the evening of the 5th of March, said that the battle raged ceaselessly throughout Sunday. Heavy fighting has begun on the west and north-west of Mukden, where Kuropatkin launched desperate attacks against the Japanese left. The Russians continue to hold the centre.

## RESIGNATION OF MR. WYNDHAM.

Mr. Balfour has announced the resignation of Mr. G. Wyndham, Chief Secretary for Ireland.

[NOTE.—The resignation of the Chief Secretary for Ireland arises, doubtless, from the attack made upon the Government by the Irish members in the course of the debate on the Address to the Throne, wherein the Ministry were accused of dealing harshly with Sir Anthony Macdonnell, the Permanent Under

Secretary, for his action in regard to Lord Dunraven's latest scheme for "pacifying" Ireland—a scheme which at first had Mr. Wyndham's approval but which he afterwards had to disavow.—Ed. J.M.]

## RUSSIAN AFFAIRS.

London, March 8.

The Tzar has ordered the closing of the Labour Commission, mentioned in the telegram of March 2, owing to the refusal of the workmen to elect representatives.

## NEW AMERICAN CONSUL-GENERAL FOR YOKOHAMA.

Mr. Miller has been appointed American Consul-General at Yokohama.

## THE JAPANESE ATTACK.

Reuter's correspondent with General Oku's army telegraphed on March 5 that the attacks of the Japanese left wing since February 28 had been pushed home in the face of tremendous difficulties—heavy snow storms, star shells, and searchlights which lit up every movement. They carried at the point of the bayonet trenches defended by wire entanglements and bristling with machine guns, despite the stubborn resistance of the Russians. The latter are now retreating in disorder, men discarding arms and clothing. The Japanese have captured a number of 6-in. gun and machine guns. The attacks were covered by a furious bombardment in which all the Port Arthur siege guns were employed with terrible effect, pulverising villages and earth-works and demoralising the Russians. Meantime the fighting in the centre was confined to the artillery.

## AMERICAN AMBASSADOR TO LONDON.

Mr. Whitelaw Reid (proprietor and editor of the New York Tribune) has been appointed American Ambassador to London.

## AMERICAN MINISTER TO PEKING.

Mr. W. W. Rockhill (Director of the International Bureau of the American Republics, Commissioner and Plenipotentiary of the U.S. to China in 1900-1901) has been appointed Minister to Peking, Mr. E. H. Conger, Minister since 1898, being transferred to Mexico.

## FRENCH FINANCIERS WARN RUSSIA.

London, March 9.

The Paris correspondent of *The Times* wires that the French financiers have intimated to Russia that the loan must not exceed 20 millions sterling instead of 32 millions sterling, and furthermore that this will be the last loan raisable in Paris for some years.

## THE RUSSIAN RETREAT.

Reuter's correspondent with General Kuropatkin's army telegraphs that the Russians, taking advantage of the darkness, evacuated all their positions along the Shaho and are now in full retreat after setting fire to huge quantities of supplies. The Japanese are pressing them hard. The fall of Mukden is imminent.

## KUROPATKIN'S VERSION.

Later.

General Kuropatkin telegraphed to St. Petersburg, under date of March 6, that the Russian troops on the west of Mukden continue to act on the offensive. They repulsed ten attacks made by the Japanese on the previous day. The assaults on the centre and the Russian extreme left have also been repulsed. Some 3,000 Japanese dead have been counted at Kaotuling, where the enemy have withdrawn to the south.

## RETREAT CONFIRMED.

A later special London telegram says that the Russians are in full retreat.

(Received at the Military Head Quarters on the 2nd instant.)

#### FROM THE FRONT.

The enemy confronting our force in the Kingking region appears to be increasing his numbers.

Our forces in the Penhsihu region have occupied the highlands eastward of Kantailing, and have captured the enemy's position near Changkau (about 1½ miles east of Tungkaushan).

In the Shaoh direction the enemy in front of Waitaushan essayed a small night attack, and on the left bank of the Hun River the enemy made a powerful counter attack from near Chenchiehpau against the positions between that place and the Hun. Both were repulsed.

Our troops have driven the enemy from Changtun and Sufangtai.

(Received at the Military Head Quarters on the 3rd instant.)

#### THE SHAHO.

The enemy confronting our troops in the Hsingking district has made several counter-attacks but all have been repulsed.

In the Penhsihu region our troops have forced the enemy back to his main line of defences and fighting is now going on.

In the Shaoh quarter in the district east of the railway we have captured the highlands north of Hou-sungmupautsz and Tangkiatun and are now engaging the enemy. About a battalion of his infantry attempted to enter Shanhuifang from Fengchihpau but was repulsed.

In the district on the west of the railway we are gradually destroying the enemy's fortifications and pressing him to the north-east.

Our troops have driven the enemy out of Tamintun and Hsinmintun. In the latter place we took a quantity of the enemy's provisions and fodder.

(Received at the Military Head Quarters on the 4th instant.)

#### THE SHINGKING (HITHERTO CALLED KINGKING) DISTRICT.

In this region our troops have been for some days forcing the enemy back to Tita (about 15 miles south-east of Fushun) and Machuntau (about 15 miles south of Fushun) and are now engaging him.

#### THE SHAHO REGION.

During last night (3rd) the enemy made four resolute counter attacks upon our positions at Hou-Sungmupautsz and Tangkiatun, but they were all repulsed.

On the east of the railway the enemy made several small night attacks, but all were repulsed.

On the west of the railway our troops continue their vehemently attacking advance. They have now occupied the line from Wuchinying (about 5 miles west of Shahopau) via Laishenpau (about 2½ miles north-west of Wuchinying) to Suhupau (about 5 miles north-west of Laishenpau).

#### WEST OF THE HUN RIVER.

On the west of the Hun River our troops are advancing northward driving back the enemy in the region between the Hun and the Liao from the north-west of Hsiaopehho. They have destroyed the enemy's line of defences from Changtan to Sufangtai, and vigorously pursuing him, have now reached the line stretching from Wokiapau (about 15 miles south-west of Mukden) via Tatszpau (about 12½ miles west of Mukden) to Lamupo (about 4 miles north of Tatszpau).

The enemy's casualties and the spoils taken from him at various positions during some days past are very large, but we have

not yet had time to make any examination. At Wangkiangpau, however, (about 4 miles south-west of Suhupau) we took ten thousand bags of flour (barley and buck-wheat), fifty thousand bales of bean-cake, a quantity of black bread, salt and vegetables. Again at Tahantai (about 4 miles south of Wangkiangpau) we took a store-house of clothing. (Received at the Imperial Military Head Quarters on the afternoon of the 5th instant.)

#### HSINGKING DISTRICT.

The enemy is still obstinately resisting along his multiple lines of fortifications.

#### SHAHO DISTRICT.

Yesterday (4th instant) our troops which attacked the highlands on the north of Pienniulupau (about 4 miles eastward of Waitaushan), captured the enemy's first position.

At dawn to-day (5th) our forces at Hou-Sungmupautsz captured the various redoubts along the highlands north-east of that place.

In the ground east of the railway, at 8.30 a.m. to-day (5th), our troops captured Liuchangtun (about 2½ miles south-east of Wanpaoshan), forcing the enemy into his second line of defences where we are now surrounding him.

On the west of the railway to-day (5th) we took Hanchingpau and Hsiao-Sukiapau and are now continuing our attacking advance. The railway station at Sukiatun is on fire.

(Received at the Imperial Military Head Quarters on the 6th inst.)

#### THE HSINGKING DISTRICT.

The enemy at Tita made several counter-attacks to-day (6th instant) but our troops repulsed them all.

The enemy at Manchuntun is resisting obstinately, but our attack is gradually progressing in this quarter. A body of our troops at 8 p.m. to-day (6th) occupied the highlands on the north-east of Hwangchi, a position about 4 kilometres south of Manchuntun.

#### THE PENHSIHU DISTRICT.

This afternoon (6th) a body of our troops took complete possession of all the highlands on the south of Taitszkau (about 6½ miles south of Manchuntun), and drove the enemy back in the direction of Sangkiatsz (about 2½ miles south-west of Manchuntun).

#### THE SHAHO DISTRICT.

On the east of the railway there is no change in the situation except that yesterday (5th) night a counter-attack of the enemy against the northern end of Tungkiafen was repulsed.

On the west of the railway we are engaged with the enemy along a line from the east of Hunchingpau to Rhtaitz. The enemy is resisting very stubbornly and is seen to be gradually increasing his forces.

On the west bank of the Hun, this morning (6th) a force of the enemy numbering about a division with 70 guns made a counter-attack in the direction of Tashikiao (not the Tashikiao on the railway east of Yingkow—Ed. J. M.) but was repulsed.

(Received at the Military Head Quarters on the 7th instant.)

#### HSINGKING QUARTER.

Our troops who advanced in the direction of Hwaijen occupied Pienshihata (5 miles south-west of Hwaijen) early on the morning of the 6th instant. They subsequently occupied Hwaijen.

There is no change in the state of the combat at Tita and Machuntun.

(Received at the Military Head Quarters on the forenoon of the 8th instant.)

Our troops who for some days back have

been fighting against a superior force of the enemy at Machuntun, drove him from this position at 8 a.m. to-day and are now pursuing him northward.

#### THE SHAHO QUARTER.

On the east of the railway at 3 a.m. to-day the enemy's infantry attacked the highlands north of Tangkiatun but they were repulsed. They retired leaving 20 or 30 dead. At 2 a.m. the same day the enemy's artillery from Tashan and Wanpaoshan concentrated its fire on our positions and thereafter a large force of his infantry delivered an attack, but by half past four in the morning they were completely repulsed.

#### WEST OF THE RAILWAY.

On the west of the railway at about 11 a.m. to-day we occupied the east part of Hanchingpau and repulsed an attempt made by the enemy to recover it.

#### WEST OF THE HUN.

On the west of the Hun the enemy is gradually increasing his forces at Yangshihtun. Our troops have captured about two-thirds of Likwanpau. They received a counter-attack by about a Division of the enemy, but they drove him back.

(Received at the Military Head Quarters; on the night of the 8th instant from Marshal Oyama.)

#### THE RUSSIAN RETREAT.

Since this morning the enemy has begun to retreat. All our armies are vigorously pursuing.

(Received at the Imperial Military Head Quarters on the forenoon of the 9th inst.)

#### HSINGKING QUARTER.

Our troops, which drove back the enemy from Machuntau, are continuing their pursuit of him.

#### SHAHO QUARTER.

On the east of the railway the enemy having at length showed signs of wavering, our whole line assumed the offensive from the night of the 7th, and driving the enemy from his positions, forced him back into the valley of the Hun River.

From the line of railway to the east bank of the Hun River the whole district is already in our hands.

#### WEST OF THE HUN RIVER.

On the west of the Hun River at Yangshihtun and Likwanpau the enemy still continued to resist obstinately and made several counter-attacks all of which were repulsed, inflicting heavy loss, and the enemy is now being driven back towards Mukden.

On the west of Mukden we met a stubborn resistance but we have already taken possession of Hsiaochitun (about 20 miles north-west of Mukden), of Pakiatz (1¼ miles north-east of Hsiaochitun) and Santaitz. Our troops have cut the railway north of Mukden.

(Received at the Imperial Head Quarters on the afternoon of the 9th instant.)

#### FIRING ON DEAD AND WOUNDED.

Since the day before yesterday the enemy has continually fired furiously on our dead and wounded as they were being carried away on stretchers and in carts on the west of Ningkwautun (about 1¼ miles west of Yangshihtun.)

(Issued at the Military Head Quarters.)

#### MUKDEN.

Field-Marshal Marquis Oyama issued a general order on the 8th instant to the pursuing armies that, in order to ensure respect for the tombs of the Imperial Chinese Sovereigns and tranquillity for the inhabitants of Mukden, no troops were to be quartered within the city.

(Issued by the Naval Department.)

**MORE STEAMERS CAPTURED.**

The British steamer *Venus* (3,558 tons) laden with 5,222 tons of Cardiff coal for Vladivostok, was captured by a Japanese war-ship when *en route* for that port on the 4th instant.

The British steamer *Aphrodite* (3,949 tons) laden with 5,600 tons of Cardiff coal for Vladivostok was captured by a Japanese war-ship on the 4th instant while *en route* for Vladivostok.

(Official returns show that since the beginning of the war the Japanese have captured 32 steamers (including the *Sungari*) of over 1,000 tons, the total tonnage being over 100,000 tons. The steamers lost by the Japanese (exclusive of those sunk at Port Arthur) number 4, and their aggregate tonnage is 14,000 tons. Consequently the balance in Japan's favour is over 86,000 tons.—Ed. J.M.)

(RECEIVED AT THE FOREIGN OFFICE.)

**FLOATING MINES.**

Chefoo—The German S. S. *Koenigsberg*, at 2 p.m. on the 28th of February, observed a floating mine at a point 4 miles south-west of the light-house on North East Promontory; the Nippon Yusen Kaisha's chartered S. S. *Prometheus*, at 1.30 p.m. on the 2nd instant observed a mine in longitude 124.3 East and latitude 36.13 north.

**FATHER GAPON'S LETTER.**

Several French newspapers publish an open letter addressed by Father Gapon to the Tzar. It has attracted much attention. The letter is couched in the most violent terms. Its import is that the Tzar is leading Russia to ruin, and that unless he at once abdicates, and gives peace to his Empire, he, the Imperial Grand Dukes and the rest of his people will be assassinated by means of bombs or other extreme devices. The letter is a menacing warning.

**GENERAL STOESSEL'S WELCOME.**

A Wolff's telegram dated the 1st instant says that General Stoessel, on his arrival in St. Petersburg, did not receive the expected welcome.

**THE ITALIAN MINISTRY.**

The Italian Prime Minister, not yet having recovered from his long illness, has resigned, and the Ministers of the Cabinet are said to have followed his example.

**THE TSAR AND HIS PEOPLE.**

A Wolff's telegram says that the Tzar has issued a proclamation ordering a Council of Ministers to examine and consider any petitions presented by individuals or associations in connexion with administrative reforms, and has appointed himself President of the Council, so that his loyal subjects may find a means of making known their sentiments direct to the Sovereign.

The Russian *Official Gazette* has published a long proclamation of the Tzar, of which the following is the gist: "The cruel war now being waged in the Far East on account of Russia's valour and her leading position in the Pacific is an unavoidable measure for the purpose of securing through many centuries the peace not only of Russia herself but also of other Christian countries. Therefore great efforts and costly sacrifices have been demanded from Russia. Russians are now fighting for their country with valour and determination, yet at home disturbances are raised to the satisfaction of the enemy and the sorrow of Russia. Armed movements to overthrow the present administration and to reorganise the Government are most regrettable in the interests of the State, for they are irreconcilable with the polity of the State and are opposed to the divine right of autocratic Sovereignty. Russia has

often engaged in great conflicts, has endured throughout them, has survived their crises and has emerged with renewed good-fortune. But if domestic disturbances proceed in this manner I shall be compelled to order my officers to remember their public duty and loyalty and to employ their strength in the maintenance of law and order. I call upon my faithful subjects to aid me in the holy work of breaking our enemies abroad and quelling disturbance at home."

**RUSSIAN AFFAIRS.**

According to a Reuter's telegram of the 3rd instant the demands preferred by the representatives of the strikers before the final election of delegates for the Labourers' Investigation Council, have been refused. A general strike has therefore been announced, and many of the leaders have been arrested.

In Poland, in spite of the dissent of the Popular Party, the disturbance does not tend to become allayed. Wealthy people continue to fly from Poland to foreign countries.

The Tzar has addressed a decree to the Minister of the Interior desiring the latter to convey his thanks to the people who have shown their loyalty and who have declared that they will not hesitate to sacrifice their property for the sake of achieving the purpose of the war. His Majesty says: We desire to join our strength with that of men of talent among our people, for the purpose of increasing the nation's welfare and accomplishing the object we have had in view—to preserve the dominions of Russia unimpaired and to maintain law and order. It is our intention to continue the work left to us by our ancestors, and therefore we will assemble persons chosen by the people, and give them a share in deliberating on legislative measures. Having regard to the special conditions existing in our country, the racial difference, the state of the widely removed districts, and the development of our still uneducated masses, our reforms must be limited by practical necessities. In carrying out these reforms there can be no doubt that there are men of local experience and knowledge who can state their views with circumspection and gravity well fitted to the work of legislation, and to the furtherance of the people's advantage. Nevertheless we deem it difficult to achieve the purpose of reform if disturbances continue in the State. We therefore order our Ministers to hold a special council in order to discuss means of giving effect to our wishes.

The principal Berlin journals are astonished at the Tzar's issue of one proclamation after another within the short space of 24 hours. While astonished at the contradictory purposes displayed in these documents, they point out that even a representative assembly of the kind indicated would not have any legislative power, but would be purely consultative. Still they regard it as, in form at least, a first step towards representative institutions.

**THE FIGHTING AT THE FRONT.**

A private telegram to St. Petersburg from Mukden dated the 5th instant says that the Russian wounded are about 15,000.

Telegrams constantly arriving from Kuropatkin are published in St. Petersburg. They all declare that the Japanese attacks in every quarter have been repulsed with heavy loss and that the developments of the military situation are steadily favourable to Russia. Nevertheless in Berlin diplomatic and social circles a pessimistic view is taken of the position of the Russian Army, and it is generally considered that the Japanese up to this time have achieved

a great success against the Russians. The leading Berlin journals say that there is no longer any doubt that the Russians will have to evacuate Mukden. If they can not by a great effort beat back the Japanese left, their retreat will be attended with much graver consequences than was the case at Liaoyang, and may end in destruction. The situation for Russia hangs by a hair. Doubtless the Japanese army will put forth its whole strength to break up the enemy and cut off his line of retreat.

**RUSSIAN RAILWAY STRIKES.**

The railway operatives at Chita went on strike on the 3rd instant in order to procure the release of 1,000 of their comrades previously arrested.

(RECEIVED BY THE "ASAHI SHIMBUN.")

**THE TSAR'S PROCLAMATION.**

London, March 4.

The Tzar's proclamation announcing a resolution to maintain the autocratic system has been received by the people with a sentiment of disgust. Subsequently another proclamation of an opposite import was made, hinting at the establishment of a representative assembly, but this has merely served to call down similar contempt.

Another great strike is said to be planned, and an insurrectionary disturbance is feared in connexion with it. The revolutionary parties in St. Petersburg have warned the Foreign Representatives to remain in their embassies and not to venture into the streets. No reserve is shown in expressing pessimistic views about the war.

**RUSSIAN PLANS.**

London, March 7.

It is said that the Military Council in St. Petersburg intends to despatch a further great army of 400,000 men to the Far East and that the strategical bureau of the Headquarters Staff has formed a new plan for retiring to Harbin, and fighting along the Harbin-Vladivostok line. But what they especially desire is that the Russian submarines should interfere with Japanese freedom of movement in the Sea of Japan.

**OTHER TELEGRAMS.**

Tientsin, March 7.

Last night the Russians on the Shaho were driven back and Kuropatkin has fled.

(This is inconsistent with official reports.—Ed. J.M.)

Hsinmintun, March 6.

Kuropatkin and his staff have just (2 p.m.) entrained.

The Russians were repulsed on the Hun River last night. The Russian army is at a point some 8 miles south of Mukden. The capture of Mukden will probably take place in the course of to-day. The enemy's strength is concentrated on the north of the city, where a heavy battle is now being fought.

(This telegram is inconsistent. Further, we know that Mukden was not taken on the 6th.—Ed. J.M.)

Skirmishes continue daily near Hsinmintun. Yesterday about 1,000 of the enemy at Faukiatun make an attack. Their leader was killed, and we took 30,000 rounds of ammunition.

(This is state news.—Ed. J.M.)

Hsinmintun is quiet. Our troops are not in the town. The enemy's main strength is at Machwantsz where he has about 30,000 men, with detachments in Changshantsz, Tamintun, Fukakoshi and Ipantai. Yesterday our cavalry was suddenly attacked at Changshantsz, but they at once repulsed the enemy. The Russians who attacked Tafschan west of Mukden numbered over 10,000 and were repulsed with heavy loss. They

left a great number of dead when retreating. Fighting continues in that region.

The goods stored in Mukden have all been transported to Tieling. Bodies of the enemy are retreating one after the other. His army is panic-stricken. The Hungtutsz leaders, Tu Lishan and Feng Linko, are making Hsinmintun their centre of operations and are very active.

(RECEIVED BY THE "JIJI SHIMPO.")  
AT THE FRONT.

Yingkow, March 6.

According to Chinese statements the Russians hitherto within Mukden have left the city and have commenced to busily transport goods to the rear. Since yesterday morning Kuropatkin has moved into a railway carriage at the station, where more than a hundred officers are collected holding a council.

They say also that the effects of the Japanese heavy guns is indescribably destructive. The Russian troops, even when far distant, raise a cry at the sound of these guns and show symptoms of flying.

Another report from the same place says:—The Russians on the Hun River were completely driven back last night. The Japanese left has advanced to a point 5 miles west of Mukden, and is pushing on, driving the enemy before it. To-night the Japanese troops will bivouac on the north of Mukden.

Another report says:—Yesterday at Fankiatun, which is 8 miles north of Hsinmintun, the Japanese came into collision with a body of the enemy's cavalry over a thousand strong. The officer commanding the cavalry had his skull cleft, and his men retired in disorder leaving many killed and wounded. The Japanese took 30,000 rounds of ammunition.

(Published by the "Jiji Shimpō" in an Extra.)

It is alleged that the Japanese left has arrived within 2 or 3 *ri* (from 5 to 7½ miles) of Mukden and has cut the enemy's line of retreat. His right and centre are thus completely surrounded, and his losses increase hourly.

The enemy's main strength is in the Fushun quarter. There the Japanese right is pressing him heavily, and he appears to be now retiring though Fushun to Tieling.

(RECEIVED BY THE "JIJI SHIMPO.")

#### THE ENEMY'S RETREAT.

It is alleged on good authority that since the night before last the whole of the enemy's line began to retreat in a state of confusion. Our entire army took up the pursuit. Especially our right pressed the pursuit home, the "Red Caps" (Guards) getting to such close quarters that they were able to bayonet the Russians from behind.

A part of our extreme left occupied Mukden, where it took a great quantity of provisions. Another part cut the railway on the north of the city and thence marched on in the direction of Tieling.

The enemy's centre seems to be annihilated.

#### NEWS OF THE WEEK.

The *Jiji* says that the stock of coal at Moji is now estimated at only some 100,000 tons, so that the price is rising.

An official telegram says that a case of small-pox has been reported in the district of Echū, Ehime prefecture.

Some Russians at Dairi, on the evening of March 5th gave a theatrical entertainment when many Japanese officials and officers were present.

Owing to the dull state of the silk business the output of *habutaye* in Ishikawa prefecture during

February was only 46,479 pieces. This shows a decrease of 20,139 pieces on that of the previous month.

A case of scarlet-fever has been reported among the crew of the steamer *Hoshin Maru*, which arrived at Moji on March 7th from Korea.

A telegram reports that 50 Russian officers, 55 men, 6 women, and 5 infants were expected to arrive on March 9th at Nagasaki from Port Arthur.

A telegram from Ujina says that 1,101 Japanese invalids arrived there on March 5th from the front. A number of Russian prisoners were brought there and five hundred were removed to Hamadera.

The latest official investigations show that the savings in post offices throughout the Empire now total yen 39,862,111.59. This is an increase of yen 1,744,585.22 over the sum at the end of last year.

Two hundred and five officers who, from August 21st to the end of December were noted in despatches for meritorious work or were killed at Port Arthur, have received decorations of various grades.

H. E. Governor Sufu has notified that owing to repairs to the time-ball, from March 20th a red flag will be hoisted on the lower beam of the pole of the time-ball at the French hatoba 5 minutes before noon and taken down at noon.

Patients suffering from scarlet fever have been found among the passengers of a steamer that recently arrived at Moji from Korea. The passengers and crew were removed to the Dairi quarantine station and the ship is being disinfected.

According to a telegram received on Feb. 28th in Tokyo, it is reported by the *Jiji*, Grand Duke Alexis, Chief of the Naval Staff Office, and Vice Admiral Avellan, Minister for the Navy, are said to be about to resign their positions, and Admiral Alexieff will succeed the latter.

A procession consisting of various public bodies took place last night, to welcome a portion of the Formosa garrison and also to celebrate the latest success at Mukden. The procession proceeded through Isezaki-cho and other adjoining streets where the troops are lodged.

General Baron Okazawa, Aide-de-Camp to the Emperor, and Colonel Muraki, Aide-de-camp to the Crown Prince, who went to the front to enquire as to the health of the men, arrived on March 6th at Fusan, via Seoul, where the Imperial messengers were warmly welcomed. In the evening, they left by the *Nikko Maru* for home.

The Emperor has requested Lieut-General Prince Kanin, Commander-in-Chief of Cavalry, say Tokyo papers, to return home and to take up other duties, but the Prince, it is reported, has asked to be allowed to stay as expected events are about to happen and he does not care to leave his present position before his duty is concluded.

The construction of a new dock in the compound of the Mitsu Bishi Shipbuilding Yard, Nagasaki, being completed the opening ceremony will take place in the middle of this month. The length is 722 feet; width, 96 feet and depth 39. The dock will admit a steamer of about 22,000 tons, 74 feet in length, 82 feet in beam and 34 feet in draft. The work was commenced in January, 1902.

About 39 representative tea traders throughout the Empire met on the morning of March 6th in the meeting hall of the Department of Agriculture and Commerce when Mr. K. Ito presided. He reported that at the last session of the Diet, a Government bill providing a subsidy of yen 70,000 per year for seven years commencing 1905, and handed to the Central Tea Guild, had been passed. The president asked his hearers to return thanks to the members of both Houses for their appreciation and this proposal was at once agreed to. A report from Mr. G. Homma, manager of the St. Louis office of the Guild, was next read. After a short discussion, the meeting adjourned.

#### AMERICAN TOPICS.

The total capital of new enterprises incorporated in the eastern states in January reached \$116,250,000, which compares with \$59,000,000 in January of 1904.

Next May Harvard University will send an expedition consisting of fifty men, under the leadership of Professor Jagger, to Iceland to study its geology and its volcanic and glacial formations.

A telegram received from Buenos Ayres reports that the sealing schooner *E. B. Marvin* of Victoria, B.C., has arrived with 1600 sealskins, taken off the South American coast. She left Halifax in September. The skins will be shipped to the London market from Buenos Ayres.

The engagement is announced of Miss Lucy Hayes, youngest daughter of J. A. Hayes of New York, and William Beverly Rogers of Beverly Garrison on Hudson, N. Y. Miss Hayes is a granddaughter of Jefferson Davis, the Confederate chieftain, and Mr. Rogers is a grandson of Hamilton Fish, Secretary of State under General Grant. The Hayes-Rogers marriage will occur soon, but no date is set.

Mr. Payne Whitney, the son of the late William C. Whitney, has given Yale new training quarters at Gales Ferry where the oarsmen remain for three weeks each spring, taking on the finishing touches for the races with Harvard in June. The cost will be \$25,000. Mr. Whitney also said he would foot the bills for the construction of a new dormitory with new bathrooms at the training quarters. He captained the Yale crew in 1898, his senior year.

Mr. Charles M. Schwab, former president of the steel trust is on his way to Mexico, accompanied by New York capitalists, for the purpose of making a special investigation of the project of constructing a great tunnel in the Guanajuato mining district to drain a number of rich mines and to open up new veins of mineral. It is stated that Schwab and his associated magnates agreed to finance the enterprise. Seven million dollars will be required to build the tunnel.

The petroleum drawn from the oil wells of Indian Territory is to be transferred to the New York Standard Oil refineries through a pipe line 2,000 miles in length. The line is reported to be now ready for operation. The route is from Red Fork to Kansas City, to Whiting, near Chicago, to Cygnet, O., thence through Pennsylvania to Olean, N. Y., across New Jersey and under the Hudson and East rivers to Greenpoint, N. Y. Pumping stations are established at various points to keep the stream of oil flowing.

More men are employed by the railways of the United States in 1905—1,500,000—than were in the armies of Grant, Sherman, Sheridan and the rest of the national commanders at any one time from 1861 to 1865. The total assets of the railways in 1905, \$16,000,000,000, equal the value of the property, real or personal, of the whole country at the time of Lincoln's first election. Their income in 1904, more than \$2,000,000,000, it is said would pay the bonded debt of the United States government twice over and leave \$200,000,000 still to the good.

The following statement has been made by Mr. Secretary Hay with regard to the recently amended arbitration treaties:—

"The President regards the matter of the general arbitration treaties as concluded by the action of the Senate on Saturday. He recognizes the right of the Senate to reject a treaty either by a direct vote in that sense or indirectly by changes which are incompatible with its spirit and purpose. He considers that with the Senate amendment the treaties not only cease to be a step forward in the cause of general arbitration, but are really a step backward, and therefore he is unable to present them in this altered form to the countries with which we have been in negotiation."

## BAD COMPLEXIONS

Dry Thin and Falling Hair and Red Rough Hands Prevented by

## CUTICURA SOAP

MILLIONS use CUTICURA SOAP, assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chaffs, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes, for ulcerative weaknesses, and for many sanative, antiseptic, cleansing purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. CUTICURA SOAP combines delicate emollient properties derived from CUTICURA OINTMENT, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated soap is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the best skin and complexion soap, and the best toilet and baby soap in the world.

## COMPLETE EXTERNAL AND INTERNAL TREATMENT FOR EVERY HUMOUR.

Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales, and soften the thickened cuticle; CUTICURA OINTMENT, to instantly allay itching, inflammation, and irritation, and soothe and heal; and CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. A SINGLE SET is often sufficient to cure torturing, disfiguring humours, eczema, rashes, and irritations, with loss of hair, when all else fails. Sold throughout the world. Australian Depot: E. Towse & Co., Sydney. French Depot: 738, Chateaubain Sq., London. French Depot: 5 Rue de la Paix, Paris. POTTER DRUG AND CHEM CO'S., Sole Props., Boston, U.S.A.

## CUTICURA RESOLVENT PILLS

(Chocolate Coated) are a new, tasteless, odourless, economical substitute for the colic-brated Liquid CUTICURA. Resolvent, as well as for all other blood purifiers and humours cures. Put up in screw-cap pocket vials, containing 30 doses. CUTICURA PILLS are alterative, antiseptic, tonic, and digestive, and beyond question the purest, sweetest, most successful and economical blood and skin purifier, humours cure, and tonic.

from the other side have to a large extent ceased, waste silk spinners awaiting the outcome of the strikes and political unrest in Russia.

## NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, MARCH 18TH, 1905.

## MARRIAGE.

At No. 91, Bluff, Yokohama, on the 15th March, 1905, by the Rev. Mori Kanji, TAKABATAKE TOKU, second daughter of Takabatake Yoshinori, Esq., to Dr. N. GORDON MUNRO.

## SUMMARY OF NEWS.

COLONEL J. OKA has been promoted Major-General.

THE proposed budget of Yokohama City for this year was yen 423,604.28

THE British steamer *Venus* captured on March 4th in the north has been brought to Yokosuka.

TWELVE doctors and sister nurses of the Nippon Red Cross Society left Tokyo on March 13th for the front.

MR. K. MIMASU, Japanese Consul at Seoul, reports that in the region between Pyongyang and Wiju, rinderpest is now prevalent.

A DAUGHTER of the King of Siam died unexpectedly on the morning of the 21st Feb. after three days' illness. The princess was 33 years of age.

A TELEGRAM has been received in Tokyo to the effect that Major-Generals Kamada and Imahashi were wounded in at the recent battle at Mukden.

THE British steamers *Venus* and *Aphrodite*, with Cardiff coal, captured by Japanese in the North Sea on their way to Vladivostok have been brought to Yokosuka. The crew, 24 in all, of the captured steamer *Easty Abbey* and the crew,

23 in all, of the *Scotsman* were brought to Yokohama on March 10th and were released at the Kencho.

MR. WADA, Vice Minister for Agriculture and Commerce, will leave Tokyo on March 17th for China and Korea to investigate agricultural industries.

ON the morning of March 12th, about thirty high officers of the Army were received by the Emperor in audience. They are about to have for the front.

GENERAL BARON OKAZAWA and Colonel Muraki, Aides-de-Camp to the Emperor and the Crown Prince respectively, arrived at 9.30 a.m. on March 12th at Tokyo from the front.

TOKYO papers report that the Emperor has asked Prince Arisugawa to be present at the wedding ceremonies, of the German Crown Prince which will take place on June 6th.

RUSSIAN coins, 345 roubles in gold, 107 roubles in silver and 6,608 roubles in notes, were exported to Shanghai by the steamer *Oceanien* which left Yokohama on March 10th.

DURING February, the export of tea was as follows: To San Francisco, 18,093 *kin*; Canada, 100,093 *kin*, New York, 77,550 *kin*, Chicago, 53,940 *kin*; and Pacific coasts, 25,116 *kin*.

MAJOR-GENERAL ISHIDA, formerly chief staff officer of the 11th Division (Marugame), who was recently appointed commander of a certain division, left Hiroshima on March 10th for the front.

A TELEGRAM from Shidzuoka reports that Sub-Lieut. Freshman, of the Russian Army, who is detained there, escaped on the night of March 8th but was arrested the following morning.

G. KIKUCHI, (27) a jailor of the Yokohama Prison, and K. Taniguchi (29), a constable of the Toke Station, have been arrested and removed to the District Court. The charge against them is that they have stolen the clothing of convicts.

ON Feb. 28th, the stocks of cotton in Osaka and Kobe amounted to 60,068 bales, and the value was estimated at yen 5,051,360. The stocks of cotton yarn in the same cities were 9,629 bales, and the value was estimated at yen 636,328.

THE thoroughbred horse Donovan, winner of the Derby and St. Leger of 1889, having met with an injury at Welbeck Stud, Notts, has been destroyed. While on the turf Donovan, who was owned by the Duke of Portland, won in stakes the sum of £35,154.

A LENGTH of telephone wire between Nagoya and Shidzuoka was found on the morning of March 10th to have been cut and stolen so that during the day, long distance telephonic communication on the Tokaido was interrupted. Repairs were reported to have been completed on the following day.

THE Toyo Kisen Kaisha will hold a general meeting on March 20th in the Nihon-bashi Club, Tokyo, when the accounts for the latter half of 1904 will be declared. The *Fiji* reports that the net profits during this period were yen 185,038.34, and the interim dividend will be 6 per cent, or at the rate of 12 per cent per annum.

SUBSCRIPTIONS in Yokohama for the 4th Exchange Bonds up to date amounted to yen 10,170,000 including the Specie Bank, yen 5,000,000; the 74th and the 2nd banks, yen 750,000 each; Yokohama Bank, yen 500,000;

Moji Bank, Mr. Watanabe, and the Hara Gomei Kaisha, yen 400,000 each; Wakao and Sodo banks, yen 300,000 each; Mr. K. Abe, yen 200,000; Messrs. K. Otani and Mr. Masuda, yen 150,000 each.

WE understand that Mr. T. S. Baker, of the Hongkong and Shanghai Banking Corporation, who is going home on leave, has had presented to him by the Emperor of Japan, the Third Order of the Sacred Treasure. Our readers will probably recollect that only a short time ago the Fourth Order of the Rising Sun was conferred on Mr. Baker.

A CORRESPONDENT of the *Nichi Nichi* reports that several foreigners—principally German, French and Russian—suspected of being military spies, at Hsinmintun, having been ordered by the Japanese garrison to leave there, have arrived at Tientsin. Mr. Grasses, one of them, recently arrived at Nagasaki from Tientsin on his way to Shanghai.

A TELEGRAM from Chefoo to the *Asahi* reports that on the night of March 9th, 1,050 Russian invalids were brought there by a Japanese transport from Port Arthur and were delivered to the Russian authorities who removed them to a chartered ship. Among the invalids, there are two hundred men whose hands or feet had been amputated because of wounds.

As a result of the various enterprises for economizing in the government expenditures since the beginning of the war, the Yokohama police are to be reduced by a hundred from April 1st, which is the commencement of the new fiscal year. Mr. Hamada, Chief of the Yokohama Police, therefore, intends to extend the hours of duty for police constables over the present service to make up for the diminished force.

AT Government House, Hongkong, on the 24th ult., H.E. the Governor (Sir Matthew Nathan) handed to the Hon. Dr. Atkinson, P.C.M.O., and Dr. J. Bell, superintendent of the Government Civil Hospital, on behalf of the Czar of Russia, gold cigarette cases for their services in connection with the officers and sailors wounded on the *Varyag* at Chemulpo, in February last. The cases are of solid gold ornamented with the Imperial coat of arms set in diamonds.

A PASSENGER who arrived on March 13th at Moji from Sonchin, Korea, leaving there on the 6th, says the *Kokumin*, reports that before his departure, intelligence was received to the effect that a Russian converted cruiser and a number of destroyers had emerged from Vladivostok. Perfect preparations, however, had been made against their raids so that Japanese vessels plying on the eastern coasts of Korea were safe.

THE *Englishman* reports the tragic death of Lt.-Col. Harman, of the 54th Sikhs, but acting as commandant of the South Waziristan Militia, which occurred on the evening of the 11th Feb. A sepoy of the regiment ran amok, and making his way into the officers' mess at Wana, armed with a bayonet, ran it through and killed Col Harman, who had risen to see what the matter was. Capt. Plant, who was also in the room, seized and overpowered his assailant.

A REPORT to the captain of the steamer *Pro-metheus* which arrived on March 13th at Nagasaki from Taku, say Tokyo papers, a floating mine was seen on the 10th about 3 miles off Kelmingtan in Shantung. The captain fired 11 times upon the mine to destroy it, but failed to do so. Some Japanese papers add that the sea north of Yuentan off Port Arthur is still regarded to be dangerous with floating mines, but the neighbourhood of Dairen is quite safe.

## NEWS FROM THE FRONT.

Saturday, March 11.

Again we have signal example of Russian savagery on the field of battle. So shamefully cruelly did they behave in firing repeatedly on the Japanese hospital corps that Marshal Oyama considered it necessary to allude to the subject in his official report. "Since the day before yesterday," he telegraphed, "the enemy has continually fired furiously on our dead and wounded as they were being carried away on stretchers and carts." Not once was this brutal fire directed against the servants of the Red Cross and their incapacitated burdens, but continually throughout two days. It has been thus ever since the first fight on the banks of the Yalu. Even as lately as the battle of Heikautai General Oku was "reluctantly" compelled to call the attention of General Kaulbars to the facts that the body of a Japanese Major had been shockingly mutilated and the Japanese wounded treated with abominable cruelty. We can only repeat that if a small fraction of the disgraceful savagery perpetrated by the Russians throughout this war were chargeable against an Oriental army, all Europe would be crying with a voice of loud indignation.

Monday, March 13.

It is estimated that the Russian forces in the Battle of Mukden numbered 376 battalions of infantry, or 300,400 bayonets; 178 sotnias of cavalry, or 26,700 sabres; and 171 batteries of artillery, or 1,368 guns—a total force of about 350,000 of all arms. This number is very probably correct. It is unlikely that the Russians could have had more men in the fighting line, though they certainly have many more men in Manchuria. The *Kokumin Shimbun* alleges that the total forces engaged amounted to 850,000 of all arms. At Liaoyang there were 460,000 troops in the fighting lines; at the Shaho, 580,000 and now 850,000. No such battle ever previously took place in historic times. The nearest approach to it was Leipzig in 1813, when the allies had 301,500 men and Napoleon 171,000, making an aggregate of 472,000.

Tuesday, March 14.

There are various accounts of the subsequent movements of the Japanese army. One story places the van at Liaohaitun, only 6 miles from Tieling. Another puts them at Sanchatzs, which is 17 miles from Tieling. We should imagine that the condition of the Japanese army at present is one of comparative quiescence. The troops must be utterly wearied, and however high their spirit a few days' rest seems inevitable. A few days' rest, too, will work little improvement in the condition of the Russians. Kuropatkin has to take stock of what remains to him. If he decides to fight again at Tieling the Japanese will have another wide out-flanking march to make. If he decides to retreat from Tieling, the question for him then will be whether to use the railway, which would mean the breaking up of his remnant of an army, or to march his men to Harbin, which would involve grave difficulties of supply. He can not employ the railway to carry off the troops unless he is tolerably sure that the operation will have been completed before the Japanese fall on him, and unless his organization is already made for a march, it will be difficult for him to make it. Two or three days more or less will make little difference. If the Japanese are tired, so most assuredly are the Russians.

General Oku's Army, which forced the

Russians up the right bank of the Hun, having crossed the river for that purpose from the historic field of Heikautai, and which fought not only desperately but also with splendid success, delivering repeated assaults in the face of a storm of snow and quick-firers, has received a *Kanjo*. Well it deserved it.

Wednesday, March 15.

Tokyo journals take up the question of the guns captured in the Battle of Mukden. They are evidently much perplexed to account for the fact that whereas more than one half of the Russian army was put *hors de combat*—killed, wounded or captured—only four per cent. of the guns were taken. All agree that Kuropatkin sacrificed his troops to his artillery and that had he kept the latter to cover the retreat of the former, his casualties would have been considerably smaller. There is talk of some new method of transportations, but that may be regarded as a flight of perplexed imagination. Supposing that there has not been any error in the figure transmitted by Marshal Oyama, the most credible theory in our opinion is that Kuropatkin saved his artillery by accident. His reports go to show that up to the last moment he had no expectation of being required to undertake a highly perilous retreat. He claims to have fallen back from his first line of defences without fighting, and his calm announcement that all his armies commenced to retire on the night of the 9th suggests that he believed the way to be quite clear. Very probably he had then made up his mind to retire quietly to Tieling and subsequently make a determined stand, for there is some reason to think that re-inforcements had not been reaching him as quickly as he had anticipated and that to defer a general engagement may have seemed advisable. Now if he believed the path to be clear to Tieling, and if he had been allowed to make the first step of his retreat unmolested—which is not improbable since the Japanese had no desire to hurry him out of his lines on the Shaho—it is very likely that he determined to send forward his artillery at once, for such a big park would necessarily block the path for the infantry. His idea was to get the guns safely to Tieling and thereafter to follow them leisurely with his infantry and cavalry. Thus the artillery was already outside the cordon by the time that the horns of the Japanese crescent closed in on Mukden and Fushun. Of course had Kuropatkin understood that his armies would have to run the gauntlet of Japanese gun and rifle-fire alike from the east and from the west during their retreat, he would never have deprived himself of the protection of his artillery. But not anticipating anything of the kind, in fact not appreciating the situation, he sent forward his artillery and thus had one piece of good fortune among his calamities. Such a theory is tenable. But we have Kuropatkin himself officially announcing the loss of 500 guns. Can Marshal Oyama's "60" be a mistake for "560"?

The extraordinary frankness of the Russian Government—unprecedented frankness—in publishing an avowal of over 200,000 casualties and the loss of 500 pieces of artillery, will strike every one with astonishment. These are the numbers already formulated unofficially in Japan—the artillery excepted—though Marshal Oyama, with his wonted conservatism, has not as yet estimated more than 177,000. There need be little doubt that 200,000 is correct, and as for the 500 guns, the petty figure in Oyama's report is probably an error on

the part of a telegraph clerk in Japan or in a Manchurian office. But what does the Russian Government's outspokenness signify? Is it peace? We are inclined to think so. Public announcement of such a crushing disaster can scarcely prelude a fresh call for recruits. It may imply, however, that the Government hopes to rouse the nation's patriotism, or at any rate its anger, by this terrible tale of killed and wounded fathers, sons and brothers. That would be likely enough if the people were not already crying out against the futile sacrifice of life it entails. It appears to us therefore that if such a confession of loss has really been made—and as to that further confirmation is necessary—the fact may be taken as an indication of throwing up the sponge. St. Petersburg must know that Kuropatkin's situation is now utterly hopeless. It is hard to see how he can escape annihilation. His whole army will cease to be a force *in esse*, and then, if Russia is to continue the war, she must amass a new force and move it into a country where she has no bases of operation and where, when that time comes, she will have no railway. Peace has never hitherto seemed to us at all imminent; but if St. Petersburg has in truth shown this frankness, there is some reason to hope that Russian autocracy has at length awoke to a sense of its impotence in Manchuria *vis-à-vis* Japan.

Thursday, March 16.

Mukden city did not altogether remain outside the pale of combat. A number of Russian soldiers made their escape within the walls and the Japanese were compelled to enter. They passed in through the south gate while holding the enemy at the front gate, and the Russians being thus taken between two fires, surrendered to the number of over a thousand.

On the 14th there was a triumphal entry into Mukden. Great preparations were made for it, and doubtless the pageant was very striking. Such doings are necessary for many reasons, though at first sight one is disposed to count them a waste of time.

Governor-General Tseng has returned to Mukden. It seems to be true that he was spirited away by a Russian officer and a party of Cossacks, but the Russians apparently found that no special uses existed for his presence. Can it be that Tseng himself, doubtful of the reception likely to be accorded to him by the Japanese, saw safety in prudential absence for a few days?

It is stated that Lieut.-General Tserwick, who commands the 10th Army Corps, was wounded in the battle.

Three foreign attachés are said to have come over to the Japanese from the Russian side during the Battle of Mukden. Their names are given as Commander Ayers, R.N., Surgeon Herbert, of the American Army, and Captain Herbert, of the American Army. They had two servants, a Russian and an Indian. These gentlemen, having been attached to the Russian army, can not, of course, remain with the Japanese. They are to be sent to Kobe at once. The fact that they left the Russians may be interpreted as indicating the demoralization existing among the latter.

The Russians in the west of the field are said to have inflicted some injury on the railway bridge during their retreat, but the damage is not serious. This bridge has veritably been in the wars. It figured perpetually in the records as the scene of fighting.

According to the latest investigations, the total number of Japanese officers killed and

wounded during the Mukden Battle was 882. The list is probably still incomplete. If we take the casualties among the rank and file as 45,000 and those among the officers as 900, we find that the proportion of officers put *hors de combat* was just 2 for every 100 men.

The march of the army on the extreme left of the Japanese front seems to have been a splendid feat of endurance. Those who have followed the details of the wonderfully fine strategical plan of the victors, will have apprehended that its main feature was an outflanking movement screened by an attack on a large scale. While Oku's army was delivering sledge-hammer blows between the railway and the Hun and between the Hun and the Liao, the outflanking army (which is still unindicated) swept round under cover of these assaults, and, describing a wide circle *via* Hsinmintun, emerged finally on the north of Mukden. The distances covered by this army are given as 30 miles the first day; 25 miles the second; 20 miles the 3rd; and 15 miles the 4th, or 90 miles in four days. This is not the whole story. After the fourth march of 15 miles, the army smashed the railway north of the city and then detached a force to essay the capture of Kuropatkin and his staff. But Kuropatkin had already escaped by rail to Tieling. The army, furiously disappointed, would have followed him thither. It actually did head northwards, but almost immediately afterwards it became hotly engaged with that great body of Russians described in Oyama's report as having streamed northward on the west of Mukden, taking the only available line of retreat. A desperate combat at close quarters ensued, and while it was in progress a force of Japanese troops arriving from the east, assisted in enveloping the Russians, who were ultimately annihilated in effect, those that escaped the bullet or the bayonet being made prisoners.

A terrible fight occurred at Waitaushan on the 3rd instant. Waitaushan lies a little south of the Shaho and on the west of the road from Penhsaihu to Fushun. It was one of the enemy's sole remaining positions southward of the river. Looking at the map, it will be seen that the course of the Shaho is a curve convex toward Mukden. As it flows eastward and southward it gradually becomes remote from the general line of the Russian positions, and this remoteness became an inconvenient feature when the Japanese began to push forward their right columns toward Fushun. They had, therefore, to correct the convexity of their front so as to keep touch with the columns advancing on the right, and for that purpose it became necessary to drive the Russians from Waitaushan. The thing was done by escalade at night. It was appreciated that a bloody business was in hand, and the men bade each other farewell before they fell in. Heavy snow was falling and had already accumulated to a depth of two or three inches. It crunched under the feet of the troops and the sound warned the Russians. Yet this snow proved an aid, for its hollows marked the positions of the military pits and deprived them of all danger. The wire entanglements were heaved out of place by means of heavy logs which the sappers carried and which they used as levers. Then ensued a fierce hand-to-hand fight, which ended in leaving the Japanese masters of the first line of the enemy's entrenchments. The next day a shocking incident is recorded. The Russians concentrated their gun-fire on the Japanese Red-Cross hospital, though the flag was flying conspicuously, and maintaining this

savage manœuvre for some hours, killed a great number of the Japanese wounded. Correspondents say that indescribable fury was caused by this brutal exhibition, the Japanese swearing to be avenged.

The Russian reserves are said to have been at Hunhopau. They consisted of the 16th Army Corps, namely the 25th and 41st Divisions. Hunhopau is immediately south of the point where the Mukden highway crosses the Hun River. These reserves seem to have been rapidly drafted to the Russian left when the Japanese attacks along the Mukden roads suggested that the main assault was to come from that direction.

A leading feature of the battle was that the Japanese did not lay themselves out to capture any special point, as had been the case in most of the previous fights. Their object was to smash Kuropatkin's host. Hence the general order issued by the Field Marshal was to pursue everywhere with the utmost vigour, and it was by adopting that policy that such wholesale destruction ensued. The Russians are indeed a smashed remnant.

It appears that when the Japanese columns after many days' fighting in the Hsingking district, had forced their way through the mountain passes and reached the banks of the Hun on the 9th of March, they found that the ice had so far melted as to forbid any attempt to send troops across. There was no resource except to cross by bridge, and this necessity proved a great obstacle as may easily be supposed. An apology is therefore due to Kuropatkin for the ridicule evoked by his statement that the Japanese flanking movement was facilitated by the fact of the Hun happening to be frozen. In that statement he referred to the Hun as it was on the 7th or 8th, and to its passage by the Japanese in the west of the field. Apart from Kuropatkin, however, the experience of the Hsingking columns shows how very close were the assaulting army's calculations. To have waited a few days longer before delivering the attack would have been to lose the facilities afforded by the frozen rivers. To commence the attack any sooner would have been to expose the soldiers to unendurable hardships. Precisely the right moment seems to have been chosen. The eastern columns, indeed, would have fared much better had they reached the southern bank of the Hun two or three days earlier. But their delay was a dislocation of the programme. It had not been anticipated that they would be detained at the Machuntan and Tita trenches from the 27th of February to the 8th of March, as they actually were. Could they have carried the Russian positions a little more expeditiously, they might have marched across the Hun without any thought of bridges. The official reports now in process of publication have not yet reached the part of the narrative which relates to the crossing of the Hun by the Japanese centre. Had the river then recovered its bearing strength, or were the troops of Kuroki and Nozu obliged to cross by bridges as were those in the Hsingking district? This is a point of the greatest interest. But even with the information we now possess it is possible to understand how vehemently the Japanese must have pressed the Russians after driving them from the Machuntan and Tita entrenchments. The enemy had not time to destroy the bridges or even to attempt their destruction. Oyama in his reports might justly apply intensifying adjectives to the nature of this pursuit. The fact has an interest of its own quite distinct from the special occasion of its occurrence. For

it shows how ill-informed and hasty were the critics who, sitting comfortably in their arm-chairs, have been in the habit of declaring that the Japanese show want of dash in pursuit. Here was a case where the men might justly have been wearied to the point of dropping in their tracks. They had been engaged in an almost continuous struggle for 18 days—from the 19th of February to the 8th of March—yet they pressed the enemy so hard throughout the 15 miles of his flight from Machuntan that he had not leisure to put a charge of dynamite under the Hun bridges. Could he have done so, the whole complexion of the battle might have been changed.

Friday, March 17.

Nothing is known as yet about the conditions around Tieling. One report says that the Russians are busily despatching their wounded northward by railway, and that bodies of their troops are taking the road for Kaiyuan. Reuter's telegram, received on the 15th, represents Kuropatkin as making desperate efforts to strengthen the fortifications of Tieling, and the inference would be that he intends to make a stand there. But in this matter we do not trust Reuter. Such a message would not have been allowed to pass the Russian censor and consequently it assumes the character of a mere conjecture or a rumour. We doubt whether Tieling's defences are of altogether so strong a nature as some publicists say. It is true that the Russians have had months to fortify the place, and that its importance as their last emporium of stores southward of the big desert should have dictated the duty of placing it in a good state of defence. But can we conceive that Kuropatkin ever looked forward to the situation in which he now finds himself? The cardinal feature of his programme was an advance from Mukden. There he was collecting his huge force, and thence was to be made the spring that would drive the Japanese to the sea. It never entered his calculations to be beaten and forced to fall back on Tieling with an army so shattered as to be incapable of renewed resistance on an effective scale. If he has indeed fortified Tieling so as to convert it into a semi-permanent fortress, his foresight as a master of retreat will somewhat redeem his incompetence as an offensive strategist. We trust that his foresight will be justified, for the best thing that could happen would be a halt of the Russians at Tieling. But we fear that Kuropatkin will adopt the obviously wise strategy of leaving there a rear-guard of forty or fifty thousand men, and carrying the bulk of his army northward. That would involve the sacrifice of the rear-guard, but it might save some of the rest.

Since the above was in type news has been received of the capture of Tieling by the Japanese.

It is evident that there was an error in the statement wired on the 14th as to St. Petersburg having officially admitted 200,000 casualties. So, at any rate, we judge from Kuropatkin's reports. What figure the Russian General will ultimately fix remains to be seen, but on the 11th instant he spoke of 50,000 wounded. Now we know for certain that there are at least 27,500 Russian dead lying on the field, and it is therefore extravagant to claim that the wounded do not exceed 50,000. That would be less than 2 wounded for 1 killed. The ratio has never been less than 4 to 1 in any of the battles during this war, and 4 to 1 would give 110,000 wounded. However, it does not

follow by any means that Kuropatkin is purposely under-stating his losses. His report of 50,000 was sent on the 11th, and when telegraphing on the 12th he mentions figures which show that this number, 50,000, was not by any means conclusive.

There is still much surprise about the 60 guns. It must now be assumed that the figure is correct. Marshal Oyama does not mention the calibre of the sixty, but they are probably guns of position, that is to say, pieces of large calibre. These the Russians can scarcely have spirited away. In some quarters it is suggested that the Russians threw a number of guns into the Hun, or that they buried them in their entrenchments. It is very mysterious, unless we accept the hypothesis that Kuropatkin sent all his artillery ahead, expecting to effect a leisurely and unmolested retreat.

The *Asahi Shimbun* draws attention to an interesting fact, namely, that the gun ammunition left by the Russians on the field aggregated over 220,000 rounds; in other words, 160 rounds each for 1360 guns. That is something like the allowance for a whole campaign. Is it conceivable that while leaving behind them such an immense amount of ammunition, the Russians carried off all their guns except sixty? However that may be, the Russians must certainly be very short of ammunition now. They can not have more than the few rounds that are packed in the limbers.

It may be noted that 220,000 rounds of gun ammunition weigh at least 1,500 tons.

#### FROM KUROPATKIN'S POINT OF VIEW.

A Japanese officer, speaking in the columns of the *fiji Shimpō*, analyzes Kuropatkin's misconceptions in a manner that seems to us very perspicacious. There was at the very outset a fundamental error; namely, an idea, based on the geographical features of Japan, that a Japanese army would fight well in hilly country alone and would show little prowess in the plains. That notion informed Gripenberg's essay against the Japanese left, and was strengthened by the failure of the Japanese to follow up their victory in that quarter. Hence Kuropatkin looked for a turning movement from the direction of the Japanese right, namely, the Hanchang district. In this conception he was confirmed, first, by the news that Japanese reserves had landed at a point which could mean nothing but an advance on the east of Mukden; and, secondly, by the fact that the Japanese operations commenced in the Hanchang region, whereas their forces remained quiescent on the west. Readers will remember that Chinghoching was carried on the 24th of February, the troops in that quarter having taken the field five days previously, whereas Oku's army on the Japanese left did not commence an attacking advance until the beginning of March. Kuropatkin thus arrived at the definite conclusion that his own left would be the scene of the great struggle and he strengthened it accordingly. But all this was in the Japanese plan. At the proper moment Nogi's army—which Kuropatkin had looked to find in the Hanchang region—was slipped from the leash, and, moving with the greatest celerity, had actually reached the north-west of Mukden before Kuropatkin suspected what was happening. He then hurried two divisions into the field on his extreme right, but they could not stand against the veterans of Port Arthur. The rest is known. In short, Kuropatkin was completely out-generalled.

#### THE BALTIC SQUADRON.

Monday, March 13.

The *Hochi Shimbun* has a London telegram which represents the Baltic Fleet as definitely on its way home. The reason assigned, briefly speaking, is recognised incompetence to meet the Japanese. The ships are found to have become so foul during their long journey, and the speeds of the different units are so unequal that to manoeuvre in the face of an active enemy would be hopeless. All this may be mere conjecture. One fact to be noted is that in the last week of January, that is to say only six weeks ago, it was stated in London that 16 large Hamburg-American steamers had been under-written at Lloyds, for the coal-service of the Baltic Fleet, the risks covering a voyage from any port of the United Kingdom or the Continent to any neutral port not east of Colombo. Evidently the Russian Government would not have chartered this squadron of German steamers at the end of January had there then been any intention of recalling Rojdestvensky's Fleet. Nevertheless two difficulties may have subsequently presented themselves. The first, that to obtain supplies of coal in waters eastward of Colombo became almost impossible, since even German ship-owners, who have shown themselves such willing servants of Russia, declined to allow their vessels to follow Rojdestvensky beyond the 80th degree of east longitude. The second, that all the arrangements for amassing an ample supply of coal at Vladivostok have been defeated by the activity of the Japanese. Twenty ship-loads of Cardiff coal, amounting to some 80,000 tons, have been captured by the Japanese en route for Vladivostok, and the qualifications of the latter to serve as a naval base have been greatly impaired. All these things may have been conspired to induce the Baltic Fleet's recall.

Tuesday, March 14.

A curious and suggestive item of news comes from Melbourne. It is to the effect that two Norwegian (or Swedish) steamers have arrived there from Guam, and that they appear to be acting as colliers. Ten other vessels are spoken of as likely to arrive with the same object. Does this signify, we wonder, that Admiral Rodjstewsky intends to seek a new naval base at Kerguelen Island. This island, which was annexed by France some years ago, is said to be 70 miles long and to possess a large number of safe and well concealed anchorages. The military expert of *The Times* has drawn attention to it as a possible half-way house for the Russian Admiral. Another point about Kerguelen is that it lies within the limits beyond which the lately chartered fleet of German colliers could not obtain insurance. But if the Fleet is to use Kerguelen, Rodjstewsky must have resolved to make the voyage round the south of Australia and thus the time of his probable arrival in Japanese waters becomes again deferred, to say nothing of the condition his ships would be in by the era of their entry upon the field of battle.

Friday, March 17.

Yesterday's telegrams quoted the evidence of two steamers, one a French mail-carrier, the *Oms*, that on the 4th and the 8th instant the Baltic Fleet was seen still at anchor in Nossi Bé. Is there the slightest possibility of doubting that these Russian vessels have been enjoying for weeks past the hospitality of a French port? Rumour attributes to French officials a denial that the vessels are

within the territorial limits of France. We decline to credit rumour. French officials do not tell falsehoods, and if any one, in the face of the evidence reaching us from all quarters alleges that Rojdestvensky and his ships are not in the waters of Madagascar, there must be either a hallucination or a deception. It is a most unhappy business, for though immediate trouble need not be apprehended, the memory of this incident is not likely to fade from Japanese minds for many a year.

#### THE EMPEROR'S MESSAGE TO THE ARMY

His Majesty the Emperor has addressed the following message to the Army in Manchuria:—

"Since the Battle of the Shaho last year Our Manchurian army, husbanding its strength and not essaying any needless operations, has waited until the moment for fighting matured; whereupon, no sooner did it adopt the resolve to move than the whole line sprang into activity and, forcing back the enemy, has already manoeuvred with a view to surrounding him. We rejoice that each report reaching us brings further intelligence of the military situation's successful development.

Soldiers—it distresses us profoundly to think that in this bitter season at the close of winter you have suffered the hardship of exposure for many days and nights. Be careful of yourselves; husband your valiant strength that it may endure, and that you may achieve splendid results, thus responding to the hopes of your Sovereign and of your countrymen."

#### TOKYO SCHOOL FOR FOREIGN CHILDREN.

(COMMUNICATED.)

A visit to the School for Foreign Children in Tsukiji, Tokyo, should convince the foreign residents in Japan of three things: First: The necessity for its existence, there being about one hundred children enrolled, with a prospect of increase; Second: the inadequacy of its equipment. It is housed in three buildings, quite separated, two of them most inconveniently arranged for school purposes; desks, apparatus, books, maps and charts are deficient; Third: a Boarding Home is greatly needed for pupils coming to Tokyo from other points. Cannot the foreign community be aroused to a sense of its obligation to help provide and maintain permanent quarters for the Kindergarten, Intermediate and Academic departments; to secure needed furniture, apparatus and books of reference; to meet the salaries of additional regular teachers, and to defray the cost of furnishing a permanent boarding home for pupils from a distance? Has not this school a claim upon the interest and support of not only the entire missionary circle here, but upon all the Mission Boards represented and upon the non-missionary community also? The buildings so kindly loaned for present use may soon be withdrawn and the very existence of the school endangered. Will not all help this most worthy undertaking?

This appeal is made by one not connected with the school but strongly convinced that what is done should be done now. Will not all who can help lift a burden daily becoming more oppressive from the shoulders of the Principal and hard-working, self-denying Faculty? Mrs. B. C. Haworth, Principal, No. 6 Tsukiji, and Mr. J. T. Swift, No. 9 Tsukiji, Secretary of the Board of Trustees, will gladly receive contributions.

## GERMANY AND THE YELLOW PERIL.

In the Foreign Office telegrams we read that at a meeting of the German Asiatic Society, presumably in Berlin, Herr von Karban, lecturing on the subject of "Germany's objects in Shantung and her Success," discussed the question of Japan's increasing influence in China and avowed the conviction that the Yellow Peril would certainly have its origin in Japan. On the other hand, Lieutenant-General Baron von Gayl, who had been one of Count Waldersee's staff in the Peking expedition, combatted the lecturer's views about Japan. He praised her in unstinted terms. The achievements of her armies and navies, he declared, almost exceeded the limits of human capacity, and there were no words to express the applause deserved by her soldiers and sailors since the war begun. As to the Yellow Peril, he was persuaded that although Japanese influence would be exercised in the cause of civilized reform and economical improvement in China, it would not be exercised politically. There was one thing, however, that he desired to point out; namely, that to assume that a nation whose influence had acquired such large development and who believed in themselves would hereafter refrain from any active exercise of that influence, would be to assume what is contrary to nature. Such unenterprising inaction was not to be expected on the part of a people so alert and energetic as the Japanese. The only question, then, was in what direction would Japan extend her influence and by what methods. China would probably be the field. China would doubtless employ Japanese to train her army and navy. Some folks regarded that incident with apprehension, but the fact was that no better military teachers could possibly be found than the men who had just fought at Mukden.

This meeting took place on the 10th inst. It is singular that Germany should be prominently the country to distress itself about this phantom of the Yellow Peril. The fact invests her Shantung policy with a sinister atmosphere.

## KOREA.

Monday, March 13.

It has been found necessary to place the railways and telegraphs in Korea under martial law. A proclamation has been issued declaring that attempts to injure the roads or the wires will be punished with death, and promising rewards to those that seize an offender or give such information as shall lead to his apprehension. Upon each village also the responsibility of watching the railways and telegraphs is imposed, and penalties are to be inflicted on any villagers neglecting the duty. The provisions of the announcement sound harsh, but evidently the people have rendered this measure necessary by their wanton destruction of property.

Tuesday, March 14.

There has been a recrudescence of the political intrigues for which Seoul is notorious. The motive of this last trouble was anti-Japanese. Three politicians, by name Kim Kachin, Ho Ui and Li Yongtai induced Chhoi Ikwon, Governor of Kyongkwido, to memorialize the Throne urging that the convention with Japan should be denounced and that the Emperor should declare himself independent in fact as well as in name. What this independence really signified in the eyes of the agitators may be understood

from the facts that another of their accomplices, Kim Hakchhin, addressed a letter to the various Foreign Representatives, complaining of Japan's interference in Korean affairs, and that a part of their scheme was to convey the monarch once more to a certain foreign Legation—that of France we presume—where he might be in a position to defy Japan and to assert his independence under the shadow of the flag of Russia's ally. There is no suggestion that the French Representative, or any other Representative, was a party to this intrigue. The matter does not appear to have gone beyond the tentative stage. Associated with these conspirators was An Kukchu, alias, Li Ilsik. Possibly the latter name may have escaped our readers' recollection. We may explain, then, that Li Ilsik was the gentleman who took a leading part in the murder of Kim Ok-kyun. He did not himself directly share the work of assassination, but it was clearly proved that he inspired the assassin and sent him to Shanghai in pursuit of the victim, remaining himself in Japan. For that escapade he was summoned before a Japanese tribunal and tried, the result being that he was banished from the empire. Seeing that Kim's assassin, who made a journey from Shanghai to Chemulpo in company with the remains of his victim, received high reward from the Court in Seoul, it will easily be conceived that Li Ilsik did not fare worse after his banishment from Japan. Nevertheless Li Ilsik found it expedient to change his name to An Kukchu, under which cognomen he is now lying in prison. For the whole six conspirators have been arrested and are in durance. It appears that one feature of their plot was the assassination of General Hasegawa. This project they carried to the point of arranging an ambushade, but the Japanese police were too quick for them. With any *bona fide* desire to assert Korean independence there would be no difficulty in sympathising. But these men merely use their country's independence as a cloak for their own ambitious designs. A genuine ambition for independence would aim first at developing ability to be independent.

Thursday, March 16.

The Osaka Shosen Kaisha's Chinnampo-Japan steamship service was resumed from the end of February, and the recent warm weather having melted the ice on the Tadong, steamers have begun to ply once more between Pyongyang and Chinnampo.

Li Il-sik has been apprehended under his alias of An Kuk-chu, and under his additional alias of a christian. He is said to be one of the leaders of the recent political disturbance.

## A BLACK SHEEP.

The discovery of a Russian paroled officer discharging military duties at Hsinmintun has evidently and justly excited profound indignation in Japan. There are black sheep in every fold, and it would not be altogether astonishing to find that one out of a large number of officers should be so flagrantly wanting in the principle of honour as to violate his oath. This, indeed, is not the first instance of the kind, if rumour may be credited, for some of the *Varyag's* officers are said to have subsequently served on board Russian ships at Port Arthur. But the Hsinmintun case is differentiated from a mere act of individual perjury by the fact that the perjured officer is understood to have been engaged in the discharge of commissariat duties. He was taken, it is believed,

when superintending the conveyance of a quantity of contraband of war through Chinese neutral territory for the uses of the army at Mukden. It follows, therefore, that his violation of parole was with the consent and approval of his Government, and thus the Russian Authorities stand before the world as abettors of perjury. The thing is almost incredible. Should it prove to be true, no language will be strong enough to convey the disgrace attaching to such a Government. But we do not see that the evidence is yet quite clear. The apprehension of the man himself is indisputable, but the fact that he was in the discharge of military duties appears to be only an inference. The fullest proof must be forthcoming before fastening this shame on the Russian Government.

## JAPAN'S REPLY TO RUSSIA'S CIRCULAR ON SUBJECT OF CHINA'S NEUTRALITY.

It is reported that the Russian Government has again drawn the attention of the Powers by issuing a statement to the effect that the Imperial Japanese troops were guilty of a violation of Chinese neutrality as their appearance behind the Russian Army westward of the railway in Fengtien Province, must have been effected by taking a route through Mongolia. As a matter of fact, however, the Imperial forces have never passed through Mongolian territory, while Russia has long been drawing supplies from Mongolia and always sending there disguised or armed troops, which, intimidating the native princes and people, have caused them to render assistance to the Russians in the rear. The following are the facts in evidence:

1. From the beginning of the war till July last, Russia had, at Halatoki and Lesser Koulon and in the Khorchi district under the jurisdiction of the Prince of Hintu, some 200 soldiers detailed for requisitioning horses and cattle.
2. In the latter part of June last, a Russian force consisting of some 50 troopers and artillery-men, proceeding from the neighbourhood of Tieling and Kaiyuan, penetrated the interior of Mongolia under the rule of Prince Pei, taking their route between Chungchiatun and Kangping.
3. In September last a body of Russian soldiers together with a number of Manchurian and Mongolian soldiers, in their employ, proceeded westward from the neighbourhood of Tieling, guarding 300 carts laden with arms and ammunition and passing through that part of Mongolia which is administered by the Prince of Hintu, reached Pakuoshu near Lesser Koulon. At Pakuoshu they met with resistance at the hands of the Chinese officials and people and, being defeated, had the ammunition confiscated by the magistrate of the Chao-yang District.
4. On the 20th September last, 300 troopers were despatched from Tieling to Haratoki, presumably for the purpose of intimidating the aforesaid Chinese officials and people.
5. Since August last from 200 to 500 Russian soldiers have been stationed in the capital-town of the Hwai-te Hsien or District and a portion of them have been going their rounds in the Khorlos district in Mongolia extending from Chungchiatun to Petun. These Russian soldiers levied supplies, especially cattle and horses, by requisition in the northeast of Mongolia, and after bringing them together at Petun, conveyed them southward, under custody of tens of soldiers, both by water and land routes, through the Khorlos district.
6. It is still fresh in the memory of the general public that Russia had the rifle and gun ammunition, which she attempted to send to north China from Mongolia through Changchia-kue, or Kalgan, confiscated by the Chinese Authorities at Kalgan and Fengtai.

## THE SEOUL-FUSAN RAILWAY.

The official opening of this line is fixed for the 25th of May. All the bridges will have been completed by the end of April, and from the 1st of May through trains will run, covering the distance between the two termini in 13 hours.

# CONVENTION REGARDING THE COMMERCIAL RELATIONS BETWEEN JAPAN AND INDIA.

The following Convention was published in the *Official Gazette* of the 16th instant. It received the Imperial Approval on the 14th.

His Majesty the Emperor of Japan and His Majesty the King of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, Emperor of India, being equally desirous of facilitating the commercial relations between Japan and India have resolved to conclude a Convention in that effect, and have named as their respective Plenipotentiaries:

His Majesty the Emperor of Japan, Baron Jutaro Komura, Jusammui, First Class of the Imperial Order of the Rising Sun, His Imperial Majesty's Minister of State for Foreign Affairs; and

His Majesty the King of the United Kingdom of Great Britain and Ireland and of the British Dominions beyond the Seas, Emperor of India, Sir Claude Maxwell MacDonald, Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, Knight Commander of the Most Honourable Order of the Bath, His Britannic Majesty's Envoy Extraordinary and Minister Plenipotentiary:

Who, having reciprocally communicated their full powers, found in good and due form, have agreed as follows:—

## ARTICLE I.

Any article, the produce or manufacture of the dominions and possessions of His Majesty the Emperor of Japan shall enjoy, upon importation into India, the lowest customs duties applicable to similar products of any other foreign origin.

## ARTICLE II.

Reciprocally any article, the produce or manufacture of India shall enjoy, upon importation into the dominions and possessions of His Majesty the Emperor of Japan, the lowest customs duties applicable to similar products of any other foreign origin.

## ARTICLE III.

The privileges and engagements of the present Convention shall extend to native states of India which by treaty with His Britannic Majesty or otherwise may be entitled to be placed with regard to the stipulations of the Convention on the same footing as British India.

His Britannic Majesty's Government shall communicate from time to time to the Imperial Government of Japan a list of these states.

## ARTICLE IV.

The present Convention shall be ratified and the ratifications shall be exchanged at Tokio as soon as possible. It shall come into effect immediately after the exchange of ratifications, and shall remain in force until the expiration of six months from the day on which one of the High Contracting Parties shall have announced the intention of terminating it.

In witness whereof the above mentioned Plenipotentiaries have signed the present Convention and have affixed thereto their seals.

Done in duplicate at Tokyo, in the Japanese and English languages, this 29th day of 8th month of the 37th year of Meiji, corresponding to the 29th day of August of year one thousand nine hundred and four.

[L. S.] Baron JUTARO KOMURA,  
His Imperial Japanese Majesty's  
Minister of State for  
Foreign Affairs.

[L. S.] CLAUDE M. MACDONALD,  
His Britannic Majesty's Envoy  
Extraordinary and  
Minister Plenipotentiary.

## CHINA.

Monday, March 13.

Governor-General Tseng is said to have informed Peking that the Russian troops are now in Chantu, which is on the west of the Liao River far north of Tiehling. This is regarded as neutral territory. But is it? The Liao has many branches in that region, and a wise man would be needed to choose which of them is the main river. At any rate the Russians, in their present plight, are not likely to pay much attention to refinements of Chinese neutrality.

Tuesday, March 14.

Yinkow confirms the report that General Tseng, Governor-General of Manchuria, has been spirited off by Russian troops under

General Kamisal (?) This Russian officer, at the head of 50 or 60 Cossacks, surrounded Tseng's Yamen when Mukden's fall had become imminent, and required him, by Kuropatkin's orders, to accompany the Cossack troop northward, taking with him his principal subordinates. Tseng, the unhappy Tseng who once professed himself anxious to swallow opium, and thus escape from Russian importunities, pleaded vainly that he had no instructions from the Peking Government to quit his post. Kamisal (?) replied that he had Kuropatkin's instructions and that they must suffice. So the old man mounted his sedan chair and set off. Did he really yield to *force majeure* or was the Cossack troop a mere blind? However that may be the Russians' purpose is evident. They mean to employ the Governor-General as a master of requisitions. His seal will command obedience when the Chinese are required to feed Kuropatkin's demoralized legions. If ever the unhappy inhabitants of Manchuria have had to suffer, it will be now when a huge mob of defeated Russians are streaming through Shingking.

A telegram from Peking says that congratulations have been showered on the Japanese by all classes in the city. Even the Germans, it is suggestively remarked, are making a demonstration of satisfaction.

Pekin is said to have it in contemplation to call upon the two belligerents to defray all losses entailed by their operations in the neutral territory of Mukden. We do not decipher clearly what is meant by this term "neutral territory." There has never been, so far as we know, any talk of Mukden's neutrality, unless some special arrangement exists as to the Imperial Mausolea, and the latter hypothesis can scarcely be reconciled with the great delight and satisfaction the Chinese are said to have displayed in connexion with Marshal Oyama's proclamation enjoining respect for the Mausolea. The Court and the Government of Peking are said to have conveyed through Mr. Uchida most hearty expressions of gratitude on account of that tactful order.

The brave act of Dr. A. Forster who so courageously rescued two Chinese children who were imprisoned under an overturned sampan in Hongkong harbour in December, has been recognised. The trustees of the Belilios medal have taken note of the action and on February 23rd Dr. Forster was handed the medal. Although the Belilios medal was instituted in 1884, Dr. Forster is, we understand, only the second recipient. The Belilios medal is a large silver medal and is in the shape of an eight pointed star. In the centre there is engraven a representation of the Judgment of Solomon, round which there is a laurel wreath, green inlaid work. A blue ribbon is attached to the medal and the clasp bears the following inscription, "Presented to Dr. A. F. Forster for saving life from drowning. Hongkong, December, 1904." The presentation was made privately at the express wish of Dr. Forster. We are further informed that the Hongkong Government has recommended that Dr. Forster should be awarded the Royal Humane Society's medal. Dr. Forster has since left for Japan, bound for Shimonoeki, where he is taking up a position in his profession.

The Nanyang College is at present taking a recess, pending the completion of the new arrangements. It is understood that Japanese professors are to be engaged to supplement the three foreign professors at present on the staff of this institution, which is to become a commercial college.

Circulars have been sent to the shareholders in Messrs. Farnham, Boyd and Co., Ltd., stating that the proposed sale of the company in London has not been concluded, and that Messrs. Twentyman

and Prentice are returning to Shanghai at once. There is a later report that negotiations have been reopened in London.

The Li Hung-chang memorial temple at Tientsin was formally inaugurated on the 27th ult., with theatrical performances to which foreigners were invited.

The Peking correspondent of the *North China Daily News* writes:—Perhaps never in the history of Peking has there passed such a quiet New Year season. The Chinese seem to have lost the spirit of hilarity which they usually exhibit at this time. Very few fire-crackers were exploded and no large ones. On asking as to the cause, we were told that it indicates a decline of interest in their local gods whom they have ceased to respect. Notwithstanding the report that the Empress Dowager has become a Christian she made special efforts this year to arouse an interest in the old festivities, but without success. The Empress was the largest purchaser of fireworks, but they were enjoyed only by those who felt obliged to accept her invitations. The general absorption of temple lands for the support of the new schools and the fact that so many priests are thrown out of their usual means of support, do not convince the people that the Court has much respect for the old forms of religious activity.

The *Chefoo Daily News* laconically says:—A mine washed ashore on the beach about five miles east of Chefoo. A passing mafoo hit one of the spikes with his whip, and he and some eight on lookers were blown to pieces.

A Chinese newspaper remarks that the rush to Japan of Chinese military students for the completion of their education will have to be stopped for a while, owing to the lack of accommodation in the Japanese military academies. According to a Peking dispatch the Chinese Minister at Tokyo has telegraphed the Waiwupu asking that instructions be sent to the various Viceroy and Governors of provinces on the subject, and stating that he has done so at the request of the Japanese Headquarters Staff in Tokyo. In consequence of this some thirty young cadets from the Canton Military Academy, who have been lately preparing to start for Japan, have been instructed by Viceroy Tsên Ch'un-hsuen to delay their departure until further notice. It is also stated that should the block in students' accommodation continue Viceroy Tsên may possibly send a batch of his military cadets to Germany to complete their education.

Mr. R. S. Gundry, C.B., has been nominated as the new President of the China Association for 1905-6.

## DR. MUNRO'S MARRIAGE.

Miss Takabatake Toku, the announcement of whose marriage to Dr. Munro appears in this issue, is well known to many of the residents of Yokohama as a highly gifted and amiable nurse. Born from a noble samurai family, formerly daimyo of Ogasawara, this lady received a strict education in Chinese literature while very young, and has since added to it an excellent knowledge of English. She received her nursing training in the Charity Hospital at Tokyo, and has acquired unusual insight into the treatment of infectious fevers, by her courageous and self-denying application to the relief of stricken humanity. To give only one out of many instances where her services as a volunteer nurse have earned the grateful appreciation of her patients, we may mention that during a severe epidemic of dysentery at Nagano, she had over a thousand cases under her care, and was presented, not only with a special testimonial by the local Kencho, but with a document signed by twelve hundred persons, setting forth their grateful thanks for her tender and skilful attention to the suffering patients.

## CAPTURED STEAMERS.

It appears that the steamer *Venus* was seized off Etorup. She was therefore attempting to make the Soya Strait. Hitherto reticence has been observed as to the place of capture of steamers carrying contraband, but apparently the veil is now raised. The number of steamers captured since the 11th of January when attempting to make Vladivostok now numbers 20—quite a respectable fleet. If Vladivostok placed much reliance on the safe arrival of these vessels, the folks there must be considerably chagrined. What surprises us is that ships still attempt to run the gauntlet. One supposes that it would pay better to stop them *en route*, but presumably in that case the Russians would repudiate whatever agreements they have made with regard to the cargoes. One thing is certain, namely, that the major part of the loss has to be borne by Russia.

The crew of the *Vegga* have been conveyed to Nagasaki and released.

There seems to be still a steamer caught in the ice in the northern seas. On the 1st instant she drifted north-east from Abashiri, in company with a mass of floating ice.

The Sasebo Prize Court, on March 9th delivered a decision confiscating the British steamer *King Arthur* (1,416 tons gross and 1047 tons registered) and rejecting a claim by the owner for damage incurred through her having been captured. The ship was captured on December 19th while escaping from Port Arthur without cargo. She is the 25th among the captured vessels.

## NOTES ON CURRENT EVENTS.

The *Fiji Shimpō* warns its readers not to indulge in any hopes of peace in the sequel of this great battle. Already Russia begins to talk of sending a fresh army of 400,000 men. No one sees clearly how she is to accomplish the feat, or what conditions will exist in the field before these fresh troops arrive, but at any rate those that direct her affairs show no signs of weakening. The nation, indeed, will be more than ever anxious for peace, but the nation seems powerless to secure redress of its own terrible wrongs. How can it dictate a cessation of the war? It would indeed be premature to hope for anything definite. What Japan has to do is to gird up her loins and go on.

An interesting ceremony took place last Saturday, in the Library Hall of the Mitsui Building, Tokyo, when a valuable collection of English books on the fine arts, consisting of 166 volumes, were presented to Mr. Masuda by his colleagues, numbering about four hundred and fifty, in the Mitsui Bussan Kaisha, as a souvenir of their gratitude for his constant advice and guidance in the conduct of their business in this well-known firm, where Mr. Masuda had acted as President at one time and as Managing Director at another, for a period of 29 years, when he took up the more important post of Chief Director and later as Vice-President, of the Board of the Mitsui Family Council. The books were selected in London and are all in calf tree bound with Mr. Masuda's family crest engraved on them, and are contained in two finely carved oak cases.

Rumours of scarcity of provisions in Irkutsk are again heard. This state of affairs is attributed to interruption of the railway service owing to the strikes. If there be any truth in the rumour it accentuates

the embarrassments of Kuropatkin's plight for the railway must now be his chief feeder, and even though the railway were in full working order, some time must pass before the Russian General can restore his food-stuffs to the state they were in before the battle of Mukden.

Japanese securities have gone up in the London market. The following is the return:—

Four per-cents .....	£ 87 17s. 6d. (17/6 rise)
War Bonds (5 per cent.) .....	102 4s. 3d. (2/9 rise)
Five per-cents .....	100 3s. 5d. (2/2 rise)
Six per-cents .....	105 5s. 0d. (10/0 rise)
New Six per-cents .....	102 2s. 6d. (2/6 rise)

His Imperial Highness Prince Arisugawa is to proceed to Germany to attend the wedding of the Crown Prince of that Empire. He will leave Japan on the 1st of April by the German mail-steamer *Prince Heinrich*, and will be accompanied by Mr. Ito Yukichi, Col. Osawa, two naval officers and others. It is expected that the Prince will return at the end of July or the beginning of August.

The Welcome Society issue a booklet of "Itineraries for Travelling in Japan" which should be interesting and useful to tourists. It is gratifying to see that this society continues its work in the direction of facilitating the movements and promoting the comfort of visitors to this country.

## WAR CELEBRATIONS.

On the 15th a banquet was given at the Bankers' Club to celebrate the Mukden victory. Baron Shibusawa said a few words appropriate to the occasion. The Prime Minister, in replying, recalled the sentiment of the nation in February of last year when on the verge of war. Anxiety as to the future then filled every heart. War had become inevitable. Not to fight would have been to invite the fall of the empire. To fight was to plunge into calamities. It was a case of the proverb, between the devil and the deep blue sea. They had chosen to fight, and now most happily, thanks to the virtues of the Emperor, the bravery of their soldiers and sailors and the loyal support of the nation, signal victories had been won. Nevertheless they had a hard task still before them. It must be remembered that Russia enormously excelled Japan in wealth, in numbers, and in extent of territory. Moreover, she enjoyed the reputation of being one of the greatest military Powers in the world. That such a State should bow her head and acknowledge defeat must be immensely difficult. Let them conceive the situations changed and then think what their own sentiment would be. There was therefore all the greater need for fresh efforts, and he looked to the nation and to the representatives of its wealth assembled this evening to continue the material support which alone could crown with final success the noble valour of the Army and the Navy.

To celebrate the brilliant successes in the Mukden region, General Terauchi, Minister for War, gave a dinner party on the evening of March 11th at his official residence at which about 150 high officers were present including Marquis Yamagata, Chief of the Staff Office, and other officers.

Mr. Ozaki, Mayor of Tokyo, proceeded at 10 a.m. on March 11th to the Palace to present an address to the Emperor congratulating His Majesty on behalf of the citizens, on the occupation of Fushun and Mukden.

On Saturday night, illuminations were displayed by leading firms in Tokyo, and flags and lanterns were displayed throughout the streets.

Prominent citizens are preparing to hold a great meeting in the Hibiya Park to celebrate the recent success and to adopt congratulatory addresses to Marshal Oyama and his generals. Meanwhile the 12th being Sunday and the weather being of spring warmth, many processions were organised and the display of illuminations and search lights was conspicuous, especially in the streets between Shimbashi and Asakusa and in Nihonbashi.

Expresses reporting the occupation of Mukden and Fushun were issued very late on the night of Friday in Yokohama. On Saturday, lanterns and bunting on a comparatively small scale, and on the same night illuminations showing characters lauding the victories were displayed at the Mitsui Bank, the Mogi Shoten, Meiji-ya and other leading firms. Bombs were sent up at Kitagata, Ota and other places, but these enterprizes were marred by the rain, which is called by the Japanese *harusame* when it comes in the flower season. The celebration was revived on Sunday because of the fine weather.

On the evening of March 14th, a big lantern procession was organized at Yamato-cho (formerly the Rifle Range) and proceeded along the main roads of the Bluff and Settlement, dispersing at the Public Garden. The demonstration had been fixed to take place on the previous evening but was marred by the rain.

A garden party was held on the afternoon of Sunday at the Otsu Naval Rifle Range near Uraga where Admiral Inouye, Commander of the Yokosuka Naval Station, Admiral Muraki, Commander of the Tokyo Defences, Governor Sufu and many other officers and citizens were present.

## CUSTOMS PROTEST.

On March 9th, Mr. Midzakami, Director of the Yokohama Customs, has delivered a decision on a protest instituted by the Iwai Shoten. The appraisers imposed duty at the rate of *yen* 9.169 per 100 *kin* in accordance with No. 34 of the Conventional Tariff between Japan and Germany on woollen yarn imported by the firm. The importers lodged a protest contending that the duty should be *yen* 8 under clause "A" of No. 343 of the statutory tariff and that the staple is provided for weaving purposes and not for knitting. The protest was rejected on the ground that the yarn could be used for weaving serge and felt while its general use is for knitting purposes.

Mr. Midzakami, Director of the Yokohama Customs, has given a decision on a protest lodged by Messrs Sale and Co., Ltd., No. 167, Yokohama. On 75 packages of bar steel imported by the steamer *Yangtze*, with certificate of origin, on which the appraisers imposed a  $\frac{7}{16}$  *ad valorem* duty in accordance with No. 45 of the Conventional Tariff between Japan and Great Britain. Messrs Sale & Co. contended that the duty should be *yen* 26.1 per 100 *kin* as the material is of the class of mild steel. The protest was rejected on the ground that the material had been found not to be mild steel after analysis by the Customs.

## FIRES.

Early on the morning of March 8th, fire broke out on board the British steamer *Adato* (2,145 tons gross) at Kobe, where she arrived on March 2nd from Bombay. Fortunately the larger portion of her cargo had been landed; nevertheless the damage is estimated at some ten thousand *yen*. The ship brought 21,187 bales of cotton and 2,041 bags of bone-meal from India. According to a Tokyo paper, the hull and cargo were insured in London for some two million *yen*.

At 9.20 p.m. on Sunday, fire broke out in the villa situated at Tsukioka-cho, Yokohama, belonging to Mr. M. Masuda, a well-known sugar importer of Honcho, destroying two buildings. The cause is not yet known.

The well-known Buddhist temple Kenfukuji at Yokkaichi was destroyed on March 13th by fire and one woman was killed.

## THE BATTLE OF MUKDEN.

March 10th, a.m.

THE situation of Hsiao-chitun, which together with Pachiatz and Santaitz, was reported on the 9th to have been captured by the Japanese army operating on the north and west of Mukden, has been a matter of some perplexity. Our version of the official report put the place 20 miles north-west of Mukden, but all our Tokyo contemporaries give 5 miles instead of 20, and we presume that 5 is the correct figure. Unfortunately Hsiao-chitun is not marked on any map accessible to the public. The three towns mentioned appear to be grouped on the north-west and north of Mukden within a radius of some 7 or 8 miles; they are almost suburbs of the city.

It will be understood that the occupation of Mukden does not constitute a feature of any importance. Mukden lies in a plain dominated by hills on the north and north-east, and it is undoubtedly to occupy these hills that the Japanese extreme left has been working. The task is said to have been accomplished on the 7th instant and Mukden itself may therefore be left severely alone. Along the base of these hills runs the railway from the south, and it has been cut. Thus all possibility of a Russian retreat in this direction is precluded. It is further stated, though not on infallible authority, that the Japanese right has worked round to the north of Fushun, and that retreat by the direct road from Fushun to Tieling will be impossible. Along the highway from Mukden to Fushun are situated the hills among which are the Imperial Mausolea. In fact nearly all the country to the west of Mukden is flat, whereas that on the east and north-east is comparatively mountainous. The impression conveyed by observation of the movements of the Japanese extreme left, as described in the official reports, is that the General in command has for objective the hills extending eastward from the line of railway in the Fushun direction, hills which command the railway and also the Fushun-Mukden road. That would explain the order issued by Marshal OYAMA with reference to the Imperial Mausolea, for unless we suppose that the Japanese left is working round in the direction of the tombs, there should be no immediate prospect of their being involved in the field of operations and therefore no reason for enjoining the duty of respecting them. From points like Malingchih and Kinlungpau, which are villages on the road between Mukden and Fushun, roads run northward toward Tieling, and every one of these roads becomes a matter of cardinal importance to KUROPATKIN from the moment that he loses the use of the railway. We find it difficult to conceive that the Japanese right has worked round to the north of Fushun except on the hypothesis formulated some days ago, namely, that independently of the columns engaged in the attack against Machuntan and Tita, namely, the columns pressing towards Fushun from the south and south-east, there was another column marching along the road from Hsingching and destined to emerge eventually on the north-east of Fushun. But we fear that this hope can scarcely be any longer entertained, for had this force been in the field, its presence should have been felt ere now. Another highly interesting contingency is that KUROPATKIN, pressing forward from Kautailing and Sankiatz, which we know he has captured, may reach the town of Shihfuchang before the Russian centre has extricated itself from the valley of the Shaho. But there is not much to be gained

by all these conjectures. The only thing which we can regard as quite certain at the present moment is that KUROPATKIN's big army must retreat *via* Fushun and the roads leading northward from points between that place and Mukden, and it is quite within the range of possibilities that these secondary roads may be closed by the manoeuvres of the extreme left of the Japanese armies.

It really seems as though the movements of the Japanese turning column which advanced towards Mukden from the Hsin-mintun direction, escaped the observation of the Russians until its pressure had become fatal. One can scarcely conceive such carelessness on the part of the Russian scouts, but so the case appears to stand. Most assuredly neither KUROPATKIN, nor any Russian however sparing of the truth, can pretend that there ever was any intention of abandoning the Shaho-Hun position and falling back *pour mieux sauter*. Russian military men and diplomats have been too outspoken to leave any loophole for doubt. The Shaho was to have been the point of new departure. Thence was to emerge the great army destined to roll up the Japanese and hurl them back to the sea. So far as fortifications were concerned, KUROPATKIN left nothing undone to render the position impregnable. English military experts who had looked carefully at his works, declared that they could never be carried by a frontal attack, nor did the Japanese essay a frontal attack until the shocks of their onsets at the wings had visibly weakened KUROPATKIN's hold at his centre. Then, on the night of the 7th, they swept forward. But KUROPATKIN seems to have quite overlooked the apparently obvious contingency that his right flank might be turned by a daring movement of wide range. Are we to conclude that this strange blunder was the outcome of inefficiency on the part of his scouts, or that it was due to the fact that there still lingered in his mind a contempt for Japanese strategy? Did he, while acknowledging the splendid fighting qualities of Japanese soldiers, underestimate the strategical qualities of Japanese leaders? That is what, in our humble opinion, German experts and some English also have been doing, and we have endeavoured to show that their judgment was based on an insufficient estimate of the conditions existing and the forces engaged. They will now probably modify their views, but what will become of KUROPATKIN's reputation? Remember, too, that of all the duties devolving on his forces, none should have been performed so efficiently as scouting work, since he has the most numerous force of cavalry ever sent into the field since the days of the Scythians.

March 9th, p.m.

The official news received in Tokyo on the evening of the 9th and published at noon on the 10th shows that the situation grows hourly more interesting. It will be observed that one region has now been dropped out of the report. Hitherto we have been informed from day to day of the operations westward of the Hun River, and the report published on the 9th showed the enemy resisting there at two points and being driven back towards Mukden. These incidents, it must be noted, were happening on the west or northern bank of the Hun, and as the narrative has now been suspended, we presume that the forces then driven back are identical with those spoken of in the later report as fighting on the west of Mukden. In other words, all the Russians on the northern bank of the Hun were separated

from the main army hitherto in the Shaho Valley) and were fighting independently on the west and north of Mukden when (mid-day on the 9th) Marshal OYAMA last telegraphed. Thus much the official report seems to show. An extra published by the *Kokumin Shinbun* (on the afternoon of the 10th) speaks of two defeated army corps being still on the west of Mukden, and predicts that they will be virtually annihilated unless they can cut an exit. These may be the troops forced back along the northern bank of the Hun, together with the troops told off by KUROPATKIN to resist the advance of the Hsin-mintun Army. But are they isolated? To picture the situation the reader must observe that the Hun River, flowing north-east to a point about 6 miles from Mukden, then trends eastward, and after having formed round the south and south-west of the city an arc with a radius of about 5 miles, turns due east and runs beside the Fushun road. Now it is evident that troops forced from the south along the northern bank of the Hun, might cling to the stream and reach the Fushun high-way by passing between the city and the river, and it is equally evident that troops fighting on the west of the city could retreat similarly. The one thing to prevent this would be that the Japanese who have been pushing up the Mukden highway, may have crossed the Hun and advanced northward so as to occupy the road between the river and the south of the city. The *Kokumin* says that they have done so, but we await more unequivocal information, noting meanwhile, that under any circumstances the Russians on the west of Mukden can retreat through the city itself.

The next point of special importance—possibly paramount importance—is that Marshal OYAMA speaks of having “completely forced the enemy into the Valley of the Hun River on the south and east of Mukden,” and adds that the Russians have halted on the southern bank of the river where, behind strong defensive works, they are receiving the Japanese attack. What is to be understood by the south and east of Mukden. The phrase suggests at first sight that the Russians have been headed back from the Fushun quarter. But it can hardly be read in that way. In retreating towards the Hun the Russians are virtually falling back on the Fushun highway, which as we have said, runs nearly parallel to the river from a point 5 or 6 miles east of the city. Were this great battle taking place in May or June, the situation of an army thrust with its back to a big river running parallel to the line of attack would be almost desperate. But at present the Hun is frozen. Presumably it can be crossed anywhere. Hence there can be no cutting off here unless the Japan cross the river and get astride of the Fushun road.

Apart from that question, however, there is the fact that the Russians have halted. Can it be possible that when every moment is vitally needed for purposes of retreat, KUROPATKIN has deliberately halted to make another stand in a hopeless position? It is possible only on the hypothesis that he is pressed too hard to continue his retreat without allowing it to degenerate into a rout, and this, his only chance of avoiding an overwhelming disaster, is to check pursuit by a desperate renewal of resistance. Rather than accept that view we are inclined to think that what is now taking place in the Hun Valley is a rear-guard action, under cover of which the Russians are withdrawing along the Fushun road.

Tita has fallen. Its fate was finally decided by a night attack, crowned with success at 3 a.m. on the 9th. That does not look like deliberate evacuation on the part of the Russians. Yet, after the capture of Machuntun on the 8th, and the consequent opening of a road which enabled a Japanese column to threaten the rear of the Tita position, the latter must soon have become untenable. We fear that Machuntun and Tita have been bloody enterprises for the Japanese. At all events two columns are now moving on Fushun.

11th instant, a.m.

It is useless to forecast the results of the great battle that has just been fought in Manchuria. The expression used by Marshal OYAMA in his report of the 10th instant was very significant. "Our enveloping attack, which has been in progress for some days back, has completely attained its object" (*sujiisu irai no hoi-kogeki wa mattaku sono mokuteki wo tasseri*). When these words were written Marshal OYAMA did not know that Fushun had fallen into the hands of his troops, and that they were then attacking the hills overlooking the Fushun-Tiehling road. Had he possessed this knowledge his announcement would probably have been even more sweeping. The rapid capture of Fushun is one of the most inexplicable incidents of the battle. No effort of which KUROPATKIN was capable should have been spared to guard this place, for on its tenure depended the safe retreat of the huge Russian army. Yet it does not seem to have made anything like a resolute resistance. Its outlying defences, Machuntun and Tita, held out for many days, and it was doubtless to their successful repulse of attack after attack that KUROPATKIN referred in the reports which now make such comical reading, if anything connected with so terrible a tragedy can be called comical. But Fushun itself does not appear to have resisted for a day. A desperate rear-guard action was the least that might have been expected there. What are we to conclude? The most disquieting hypothesis is that the resistance offered on the Fushun roads at Machuntun and Tita had served its purpose and that the retreat of the Russians had been accomplished. But that is not conceivable. We can not imagine that when Marshal OYAMA spoke of forcing back the Russians into the Valley of the Hun on the south and east of Mukden, he mistook for the main body of his enemy a few desperately fighting rear-guards. Much more reasonable is it to infer that Fushun itself offers no facilities for defence, and that the hills on its north are the position of vital importance, namely, the position commanding the line of retreat. It may be indeed that the Russians were demoralized and that their capacity for resistance had been paralysed in the long fight. We can not tell. What we hope, however, is that the usual reticence will not be observed with regard to the tangible results of the battle. It is not a Japanese habit to count up the gains with much celerity, but considering how assiduously the Russians hide the reality of their discomfitures, the record of this huge fight should be completed and published as quickly as possible.

It has indeed been a huge fight. Fully three quarters of a million men must have been engaged, and since the days of the probably semi-fabulous hosts led by XERXES and the Captains of pre-historic eras, no such armies have confronted each other in one field. Above all what distinguished the

Battle of Mukden—so it will be called, we presume—from previous combats was the immensity and complexity of the strategical plan. European experts have been sparing, more than sparing, in their appreciations of Japanese strategy. They judged that, in the given circumstances, Japan's generals should have accomplished much more than they actually did accomplish. It was difficult to agree with such a verdict. The conditions did not appear to have been sufficiently considered. What differentials present from former battles is the enormously wide front over which the armies manoeuvre, and the duration of the fighting. The latter is in some sense a consequence of the former, but both features combine to defy the flanking movements, the sudden concentrations or the surprise strokes which formed the stock-in-trade of strategists in earlier days. When you are fighting with an extension of from 90 to 100 miles, you can not despatch a corps d'armee on a 24 hours' march to turn the enemy's position. Anything of that nature must be an operation of days, if not of weeks, and in the meanwhile the commander-in-chief loses touch of the force thus employed, and the probability of its operations being discovered and forestalled by the enemy increases in proportion to the distance covered. When these things are taken into account, and when it is further remembered that each opposing army mustered from three hundred thousand to four hundred thousand men, so that the task of reconnaissance is stupendous, one begins to understand what is involved in successful strategy in this twentieth century, and one comprehends why no striking coups were achieved prior to the Battle of Mukden. Indeed it was always hard to see why KUROPATKIN, who had done nothing but retreat and had never scored one strategical success, should retain his high reputation while the Japanese Generals, who had at least won victories, should have been written down as inferior strategists. Now, however, these things are at an end. Europe is already rubbing its eyes and marvelling at the spectacle presented to it. Over a front of nearly 100 miles the Japanese put seven columns into operation and managed to achieve the really wonderful feat of co-ordinating their movements through a period of some twenty days, so that in the end they were found to have thrown a net round a colossal Russian host which for five months had been making strenuous preparations to receive them. There is nothing more signal in military history. It is one of the greatest strategical feats on record.

11th instant, p.m.

The official news published on the afternoon of the 11th carried us down to the evening of the 10th. It showed the enemy still resisting on the highlands northward of Fushun, where doubtless, his forces cover the road once so vitally necessary to the Russian retreat. We say "once" because it has now become doubtful whether even the Fushun route is fully available to KUROPATKIN. Marshal OYAMA says that he has driven back the enemy to the north bank of the Hun, and is enveloping him there. He adds the words *senjo tsuigeki chu wasi*, which, literally translated, mean "pursuing on the field." We presume that the intention is to convey that the Russians in this part of the field were not making an orderly retreat but were flying from the ground. In other words, the whole of KUROPATKIN's centre was broken up. As for his right, the picture conveyed by the Japanese report is appalling.

It may be remembered that the fate of these Russian troops westward of the Mukden road was discussed in our last issue, where we came to the conclusion that the Japanese advance up the road and across the Hun had probably closed the eastward line of retreat for these columns, and that they might be compelled to retire through the city or westward of it, thus falling under the fire of the Japanese left which had established itself on the north of the city. That is what evidently happened, and the unhappy men, described as "exhausted and suffering," had broken into a disorderly mob and were being shot down by Japanese rifles and guns. To augment the horror another body of Japanese, moving rapidly from a point (Kinglungtien) 12 miles west of the city on the Hsinmintun road, reached Puho (about 12 miles north of Mukden), where they too intercepted the crowd of fugitives, who were being killed as they ran. Probably a great many surrendered, but when troops lose their formation and become a mob, it is inevitable that numbers who would gladly surrender should be shot down.

Reuter's news received simultaneously with the above report of OYAMA's is belated. We learn from it nothing subsequent to the 8th. But it is interesting as showing the truth of the conjecture suggested to people in Tokyo at the time, namely, that KUROPATKIN, when driven from his first line of entrenchments in the Shaho Valley, hoped still to make a stand with his back to the Hun. Commenting on this possible phase of the combat we wrote; "can it be possible that when every moment is vitally needed for purposes of retreat, KUROPATKIN has deliberately halted to make another stand in a hopeless position?" Apparently it was possible. Apparently that is what he did, and the result has been incomparably more disastrous than it would have been had his decision to retire been adopted earlier. The sum of the matter is that of the three courses open to him, he took the one involving greatest risks in the event of failure: he trusted his wings to beat back the Japanese and he therefore clung to his central position until there was no leisure to retreat safely. On the 8th, when this fatal halt was made on the Hun, Machuntun had fallen and KUROPATKIN should have known that Tita could not be expected to hold out much longer. But he had probably laid his plans on the night of the 7th, and it is not easy to change the evolutions of an army in a few hours. If the Japanese operations had been regulated by an omnipotent clock they could not have happened in a more timely manner. Had Manchuntun's defences been forced a day sooner, and certainly had the railway been cut a day sooner, KUROPATKIN might not have halted at the Hun. He might have at once directed his columns upon Fushun, in which case his disaster would have been considerably less signal.

12th inst., a.m.

The perplexing fact that two places of the same name are often found on Chinese maps within no very great distance of each other has caused some confusion about the point whence the Japanese column set out which, in Marshal OYAMA's report dated the night of the 10th, marched rapidly from Kinglungtien to Puho, on the north-east of Mukden, and there took part in the work of intercepting the Russian retreat. There are two Kinglungtiens; one on the Hsinmintun road west of Mukden; the other on the Fushun road east of Mukden. It may appear at first sight a matter of no impor-

tance which place is regarded as the starting point of the intercepting force, but it is in truth a matter of much importance. For these reasons. We do not know exactly at what time Fushun was occupied, but it seems to have been the night of the 9th. When the occupation was effected, the enemy still retained possession of the heights on the north of the place. Did his retention of those heights prevent the Japanese forces from pushing towards Mukden along the north bank of the Hun? If they were able to march immediately in that direction, then they found themselves completely in the rear of KUROPATKIN's centre, which OYAMA was then engaged forcing back into the valley of the Hun; and if they so found themselves, then the plight of KUROPATKIN's centre must have been as sorry as the plight of his right which streamed past the west of Mukden, broken and exhausted. OYAMA, describing the attack upon KUROPATKIN's centre (10th instant), said:—"Our troops have forced the enemy to the north of the Hun and are there enveloping him and pursuing him on the field." A frontal attack could not have been an enveloping attack, and we are consequently constrained to believe that OYAMA had some flanking force operating on the east when he was engaged forcing back KUROPATKIN's front. That force may have been either the Fushun troops, or the troops of KUROKI, which—as suggested in a previous analysis—reaching Shihfuchang, had advanced thence across the Hun to Kinglungtien, and were therefore in a position to make an intercepting movement against the Russian right which was then flying past Mukden on the west and north, flying along the railway and the Tieling high-road. The thing is quite conceivable on either hypothesis, for Kinglungtien is 10 miles from Fushun and 15 miles from Puho (the point on the Tieling road where the interception took place), so that KUROKI's men or the Fushun men might have made the march. If Kinglungtien on the Hsümintun road was the starting point, then the intercepting corps had to march 22 miles to reach Puho; an easier operation, which would simply mean that the reserves of the Japanese extreme left moved up rapidly to the assistance of their comrades on the north of Mukden. Japanese journals, however, fix the eastern Kinglungtien as the starting point of the intercepting corps, and if we accept that hypothesis, then it follows that OYAMA's centre and right had so effectually enveloped KUROPATKIN's centre as to be able to spare a force for intercepting the latter's right also. As for the Russian left, present indications are that it retreated successfully along the Fushun-Tieling road.

It is stated, non-officially, that the Japanese extreme left has occupied Iiu, an important town on a river of the same name, mid-way between Mukden and Tieling. We hear nothing of artillery in OYAMA's reports. He mentions weapons of war (*heiki*), in which term guns are of course included, but he does not directly allude to the latter. If KUROPATKIN has managed to carry off the bulk of his artillery, the magnitude of his defeat will be diminished.

The *Shogyo Shinpo* says that the van of the Japanese left has reached Hsintun, which is only from 8 to 10 miles south of Tieling, and one of its columns—the extreme left—has pushed up the Liao as far as Shifusz, which is 10 miles from Tieling. This news, being unofficial, must be taken with all reserve. We have to remember that the

Battle of Mukden has been an affair of many days and that the Japanese troops must be much wearied, not only by constant fighting but also by exposure to terrible weather. Any one who has been on the plains of North China during one of the winter storms which blew on the 9th instant around Mukden, knows what suffering they entail. No clothing can exclude the piercing cold forced into every joint of one's body; objects are almost invisible and to open the mouth is to have it filled with sand. We can not conceive troops fighting under such conditions, and, reviewing the whole situation, it appears to us that only superhuman energy could enable the Japanese to push on at once to Tieling, where the Russians have semi-permanent fortifications and where at least a hundred thousand men would be waiting to receive an onset. What is conceivable, however, is that KUROPATKIN may not find himself in a condition to halt at Tieling. That will depend on the losses he has incurred.

March 13th.

KUROPATKIN can not be supposed to have sent to St. Petersburg the despatches attributed to him in their published form. No General would forward such fragmentary and inconsequential information. It may be taken for granted that the despatches have been freely edited and that only excerpts have been given out to the world. It is unfortunate for KUROPATKIN. Whatever reputation he possessed as a strategist is now buried under the absurdities attributed to him by his own Government. Up to the morning of the 9th we have him, either directly or through his chief of staff, sending the most optimistic messages. The Japanese attacks repulsed again and again; a score of prisoners taken here; half a hundred there; two machine-guns captured yesterday; three more to-day; in short, everything going on as nicely as could be expected. Incidentally and without any assigned reason we are told that he had retired to the Hun River, and as though purposely to increase the perplexity of this strange incident, he adds that he made his move to the rear without fighting! Then, with equal abruptness and equal lack of explanation, he informs the world that he has commenced his retreat. Such an announcement, coming in the immediate sequel of a series of entirely satisfied and favourable reports, assumes their complexion and reads like a triumphant declaration. One is led to suppose that retreating is considered a fine feat by a Russian army, or that, at any rate, KUROPATKIN is quite pleased to be able to tell his country that the tactics in which alone he has shown some proficiency have recommenced. Indeed, since neither he nor any General known to history ever began a retreat at the head of an army of 350,000 men, the idea conveyed is that KUROPATKIN felt a thrill of exultation at the prospect of conducting his favourite manoeuvre on such an unprecedented scale. But then, only a day later, comes the sudden and laconic declaration "I am surrounded." The case is precisely that of a chess-player who, absorbed in the effort to capture one of his adversary's pawns, fails wholly to observe that the toils of checkmate are being gradually drawn round his own king. KUROPATKIN began his retreat on the evening of the 9th, and on the morning of the 10th he awoke to the discovery that he was surrounded. We remember that at one time in the course of the war the *London Spectator*, in its own prettily rumi-

native style, expressed admiring surprise at the providential dispensation which seemed to create for Russia a genius competent to deal with every crisis threatening her. At Sevastopol she found a Todleben; on the steppes of Central Asia a Skobeloff; in Manchuria a KUROPATKIN. We were sufficiently irreverent to observe, at the time, that in Japan's interests we hoped that the same all-wise Providence would keep KUROPATKIN in command of the Russian legions as long as possible.

There are several features of the battle which suggest special reflections. The first is that the Russians seem to have succeeded in carrying away the great bulk of their artillery. They are supposed to have had 1368 guns in action, and Marshal OYAMA speaks of only 60 as having been taken. That is remarkable. It suggests for the first time that one of the chief prizes of victory was snatched from the Japanese by lack of cavalry. KUROPATKIN doubtless sent his artillery off in the van of the retreating army, and as well-horsed guns move much faster than the quickest infantry, the batteries, with the exception of a few which remained in action to the last, appear to have broken through the cordon before it had been completed. Even on that hypothesis the number of cannon captured is strangely small, for there must have been many guns of position which could not move with any celerity. Possibly the total may be increased by later captures, but no material change in this respect is probable.

As to the casualties, Marshal OYAMA does not tell us how many of his prisoners are wounded, and without that knowledge it is difficult to form any satisfactory estimate of totals. One thing certain is that the Russians carried off the vast bulk of their wounded and many of their dead. That seems, at first sight, inconsistent with the idea of an army fighting to escape from a cordon. But it has to be remembered that operations connected with the transport of the dead and wounded are under the sacred shelter of the Red Cross flag. The only notable exception to this humane rule stands to the eternal discredit of the Russians at Port Arthur, who allowed hundreds of Japanese wounded to lie dying slowly through days of protracted agony under the muzzles of the fortress' guns, neither extending to them the mercy dictated by the Geneva Convention, if not by the instincts of common charity, nor permitting their comrades to approach to their succour. It is more than probable that this savagery exercised a great influence on the ultimate fate of the fortress, for the Russians, conscious of what they deserved at Japanese hands, were careful to surrender before the confusion of a final assault could expose them to the retaliation they merited. But on the part of the Japanese at Mukden, there was no brutality of that kind. The Russians were suffered unmolested to carry off their wounded, as indeed policy would have directed, for Marshal OYAMA desires nothing less than to be cumbered with the care of thousands of disabled Russians. What figures then are we to take for the tale of casualties? OYAMA's first report in the Battle of the Shaho put the Russian corpses on the field at 10,580, which total subsequently swelled to 13,333; a growth of about one-third. His first figure for the Mukden battle is 26,500. We may assume that this will certainly grow to 30,000; probably to 33,000. As for the wounded, taking the ratio of 4 wounded to 1 killed, we find 120,000 to 130,000 wounded. And the prisoners, stated in the report sent

off on the morning of the 12th to be at least 40,000, will probably increase to the vicinity of 50,000. Thus the total Russian losses in the battle will aggregate fully 200,000, out of an army of 350,000. KUROPATKIN, therefore, is utterly shattered. He dare not face the Japanese again for months to come. Supposing that Russia can recruit him at the rate of 1,000 men daily, six months would be required to restore him to the strength he had before the Battle of Mukden. What is he to do! The enemy is now so enormously superior to him in fighting force—with the one exception of artillery—that if he halts at Tieling, it will be to lose the remnant of his army. Tieling has facilities for defence, but it has few facilities for supplies, and at any rate the disparity between the strengths of the two armies is now so great that KUROPATKIN can not venture to give battle in the near future. We have to remember, too, how terribly encumbered he must be with his wounded. He has about as many wounded on his hands as he has sound soldiers. They must all be sent to Harbin. Tieling, a new town never destined to be a great military base, can not possibly accommodate more than a small fraction of the number. Thus the work of getting the wounded to hospital will occupy the whole resources of the railway for some time; and in thus computing we take no account of the many Russian wounded who must already have been lying in Mukden. Besides, KUROPATKIN has lost an immense quantity of supplies, and he is cut off completely from a source of fuel, except such as can be obtained from the forests. The Fushun coal mines were his great emporium in that respect and they are lost. Altogether his condition is pitiable.

The Japanese casualties will probably reach the neighbourhood of 50,000, all told. Thus far the returns show 41,222, among whom are 141 officers killed (including Colonel UCHIDA); and 752 officers wounded (including 4 Major-Generals, YOSHIDA, MAYEDA, IMAHASHI and KAMEDA). Perhaps 50,000 is too large a number to anticipate, but 45,000 or 46,000 will not be excessive. Among these there will be some 35,000 wounded, and the Government has at once to provide transport for about 50,000 prisoners. Great victories have their embarrassment. And in truth this has been a colossal fight—250,000 combatants put out of the field. There is nothing like it in history. We observe that some critics already begin to say it was not a Sedan. It was not. It was far greater than Sedan.

#### A GERMAN MILITARY EXPERT ON THE WAR.

THE London *Standard* publishes an interesting essay by Colonel R. GAEDKE on the subject of the War. Colonel GAEDKE is introduced by the London journal as "the well known German military expert," and his article is described as "a brilliant analysis of the Russo-Japanese campaign." Thus heralded the essay will prove, we fear, a disappointment to many of its readers. Possibly to call for such an analysis, especially from a German, and yet again especially from a German who, having been attached to the Russian army in the capacity of newspaper correspondent, has seen and made a study of that army alone, was to assign to the gallant officer a too difficult task. Colonel GAEDKE is obviously sensible of the embarrassments of the work allotted to him, for in his preface he compares his undertaking to an attempt to solve a problem

involving more unknowns than equations, and likens himself to a man seeking to find his way among pitfalls in a fog. In the body of the essay there are numerous examples which show that he has not solved the equation or emerged from the fog. Thus in one place he tells us that "the prospects of a successful continuation of the campaign by the Japanese are based on moral factors and not on the simple proportion of the numbers of the contending troops," and in another place he declares that "a superior number of troops alone will most certainly speak in favour of the Russians." At one moment he affirms that "the long resistance of Port Arthur was of incalculable value to the Russian Generals, and was the only factor which enabled them to maintain their supremacy at Mukden, and with it the possession of the largest part of fertile southern Manchuria." At another he asserts that "in my opinion the capitulation of Port Arthur is not of such decisive and material importance as the general public assume it to be." In one sentence he declares that "the dogged pertinacity of the Japanese in striving to subdue Port Arthur was within a hair's breadth of costing them the loss of the battle of Liaoyang." In the next he estimates "the reinforcements that OYAMA will receive by the arrival of the Port Arthur Army as only fifty thousand men." There are several other statements equally difficult to reconcile, but those we have quoted will suffice to show how uncertain this "well known military expert" feels of his ground. They will suffice also to show that his bias is emphatically anti-Japanese. Whenever he is betrayed into praise of the Japanese, his reluctance looks out conspicuously through his faint panegyrics. The Russians are in his eyes "the heroes of Port Arthur." From first to last he finds not one word of applause for the Japanese in connexion with the capture of the fortress, and as for the strategical character of their effort to subdue it, there is no question that the German critic thinks they might have done better had they left the place severely alone. Here indeed it is that his limitations become curiously evident. He gives no thought, at any rate says no word, about sea-power. It does not occur to him to remember that with Port Arthur there perished also the whole, or virtually the whole, of the Russian Pacific Fleet; and still less does it occur to him to remember that were that Fleet now in *esse*, and were the Baltic Fleet nearing the East-Asian shores to join it, a situation of incalculable peril would exist for Japan. The sole allusion he makes to this vital phase of the problem is found in the following wonderful sentence:—"Was it anything else than chance that caused the *Petropavlovsk* with Admiral MAKAROFF and his whole staff on board, to be wrecked by a floating mine, thus sealing the fate of the Russian Fleet?" "Anything else but chance!" Is it then the opinion of Colonel GAEDKE that "chance" laid the field of mines where the disaster occurred, and that chance directed the manoeuvres of the Japanese squadron which led to the entanglement of the Russian battleship? He also commits himself to the remarkable assertion that the loss of the *Petropavlovsk* sealed the fate of the Russian Fleet, and thus two conclusions are reached, first, that the reduction of their numbers by one iron-clad paralysed the Russians, though an exactly similar loss left the Japanese unweakened; and secondly, that all Togo's long vigil; all the grand heroism of his officers and men in

blocking the port; all their splendid bravery in laying mines and in dashing in again and again to harass the enemy with torpedoes; all the grand courage and self-sacrifice of the troops which won positions whence the Russian ships could be bombarded—all this counted for nothing: the one factor that defeated the Russians was the "chance" which cost them the *Petropavlovsk*. These very notable assertions would be singular even if they came from a man in the street, but as coming from a "well-known German military expert" they prepare us for the still more notable allegation that the Russian army at Mukden is superior to the Japanese "in numbers and undaunted courage." There are many things that might be said, with more or less truth, about the relative qualities of the Russians and the Japanese, but it takes a Colonel GAEDKE to discover that the superiority in undaunted courage is with the Russians. That is a most cruel and insulting comment; an utterly unjust comment too; for the whole world, except Colonel GAEDKE, agrees that never did braver men go into a fight than the Japanese have shown themselves. A military expert is warranted in criticising the tactics or the strategy of an army, but he is not warranted, not for one instant, in condemning it broadly as inferior in courage to its opponents. Special examples of defective nerve may justly be adduced and condemned. In this sort of criticism the German expert does not spare, though he diligently seeks to excuse, the Russians. Thus he writes:—

The great aversion shown by the Russian nation to the war was evident in the depressed spirits of the reserve troops, many of whom had left their families behind in poverty and distress. Frequently led straight from the railway on to the battlefield after a journey of four to six weeks, situated in a very difficult position from the very outset, marching and fighting in unknown regions, taken away from their original regiments and joined together anyhow, it is not surprising that symptoms of panic repeatedly manifested themselves among the Russian soldiery, especially as, in consequence of their insufficient knowledge of warfare, they were continually exposed to attacks on the part of the experienced Japanese infantry. The Russian troops showed themselves especially nervous of attacks threatening their flanks, and cases have occurred where they simply evacuated the positions entrusted to them without fighting and without awaiting orders.

This, we say, though severe, is warranted since it does not deliberately impugn the morale of the Russian soldier. But, on the other hand, when in the sequel of such condemnation of the Russians, Colonel GAEDKE still finds them superior to the Japanese in "undaunted courage," we have only to say that he enjoys the distinction of having penned one of the most insulting and unjust assertions ever published.

Let us pass on now to general strategical features. Here also the German expert's "brilliant analysis" contains much that is very difficult to endorse. He appears to think that the Russians have lost little since they "maintain their supremacy at Mukden and with it the possession of the largest part of fertile South Manchuria." What, we wonder, forms the basis of Colonel GAEDKE's estimate. The taking of Port Arthur he dismisses as "the capture of a pile of ruins which has been infinitely more costly to the Japanese than to the Russians." Costly in what? In lives? Colonel GAEDKE must have known when he penned this "brilliant analysis" that the Russians and the Japanese had lost about equal numbers in killed during the siege, and that whereas the vast bulk of the Japanese wounded will rejoin, or have rejoined, their corps, the forty thousand prisoners taken from the Russians will never fire another shot for their country while

this war lasts. Thus whereas the Russian army lost fifty thousand effectives by the fall of Port Arthur, the Japanese lost at the very most fifteen thousand, and, on the other hand, four Divisions—not 50,000 men as Colonel GAEDKE with extraordinary ignorance affirms—were freed for service at the front. Hence from the point of view of the general campaign the Japanese loss was fifteen thousand, their gross gain about a hundred thousand, and their nett gain over eighty thousand, whereas the Russian nett loss was fifty thousand without any gain at all. To which side, then, are we to say that the capture of the place was “infinitely more costly?” But perhaps Colonel GAEDKE was not thinking of lives. Perhaps he was thinking of material. His use of the term “a pile of ruins” suggests that something more tangible than lives was in his mind. Here again he displays singular ignorance. By no possible stretch of honest imagination could the epithet “pile of ruins” be applied to the Port Arthur that fell into Japanese hands. The whole of the land defences on the west and the whole of the sea-coast defences were intact. Moreover, lying in the harbour were the wrecks of the Russian Pacific Fleet. Of these indeed the term “pile of ruins” might be justly used, but to whom were the ruins costly? Russia would gladly give three or four army corps to have these ships safely restored to her. We see then that Colonel GAEDKE's methods of calculation are difficult to appreciate, and we are prepared to find him congratulating KUROPATKIN on having retained, as the result of a year's fighting and about a hundred and sixty thousand casualties, an inland city of Manchuria and some fertile plains two hundred and fifty miles from the sea. What is Manchuria to Russia? What purpose does it serve in her eyes? It is a territory with a fine sea-board, and access to that sea-board constitutes its sole value. Russia is not bent upon growing beans and millet, or gazing at the tombs of the Tartar sovereigns. She wants an open route to ice-free seas. For that she spent a thousand million roubles on a trans-Asian Railway; for that many of her great men, like MURAVIOFF and NEVOLSKOI, worked with grand energy and perseverance to annex the Amur districts; for that she built Dalny and fortified Port Arthur, and for that she is fighting this war. Well, she has lost every inch of the sea-board. She has lost Dalny and Port Arthur. The debris of her fleet lies at the bottom of the sea. The only port remaining to her in the Far East is blockaded. Yet Colonel GAEDKE congratulates her upon holding the far-inland city of Mukden and upon remaining temporary mistress of regions where good crops can be grown.

The German expert's appreciations of men are as convincing as his estimates of things. KUROPATKIN he must have learned to sum up pretty accurately, since we presume that he enjoyed many opportunities of judging the Russian General at close quarters. At all events Colonel GAEDKE's confidence is here didactic. He tells us that “the disdain of the *imponderables* of immeasurable psychical influences avenged itself on the Commander-in-Chief himself by drawing him down into the whirlpool of the army's shaken confidence.” Perhaps the reader will have difficulty in tracing that recondite route of descent. Let us explain then what the context teaches, namely, that KUROPATKIN “attached too little weight to moral considerations” and “disregarded the action which the slow

but constant advance of the Japanese produced among his troops and followers.” In short he imagined that a programme of perpetual retreat could be pursued without demoralizing the army and he ended by being demoralized himself. Retreat and defeat became his habit of mind. He lost the faculty to look for advance or victory. Thus “at the decisive moments on the blood-sodden battle-fields of Liaoyang and Yentai his composure deserted him, and when only requiring to stretch out his hands to gain the laurels, he yielded them to his opponent.” The reader will be glad to hear, however, that KUROPATKIN “regained his lost confidence.” This is not the least remarkable part of Colonel GAEDKE's “brilliant analysis.” How and where did KUROPATKIN regain his lost confidence? He regained it “during the nine days' battle between Mukden and Liaoyang.” Of course every one remembers the preface, the text and the sequel of that Titanic fight. Every one remembers the fanfare that heralded it—how the moment had at length come to cease strategical retreats, and, turning upon the enemy, to sweep him into the sea from whence he had advanced; how KUROPATKIN set all his vast forces in motion to accomplish this sweeping; how, instead of driving back the enemy, he was himself driven back 18 miles, and how he lost seventy thousand men and fifty guns. Colonel GAEDKE, however, does not remember. What he now has to say of the nine-days' battle is:—“It was only due to KUROPATKIN's unyielding resistance during that period that the Russian army was enabled to maintain its positions and even to gain fresh footing, and this success was instrumental in the gradual recovery of the martial spirit in the Army.” So then the Battle of the Shaho was a Russian “success.” So then KUROPATKIN, whereas he set out to take the offensive and to hurl back the enemy, regained his own lost confidence and brought about a gradual recovery of martial spirit in his army, by “unyielding resistance”; in other words by reverting to his old policy of the defensive. We do not know whether Colonel GAEDKE is to be taken seriously. In the paragraph immediately preceding this announcement of the Russian recovery, he tells us that the influence of KUROPATKIN's loss of composure was “felt up to the capitulation of Port Arthur and *will still be felt*.” Then he tells us that the Shaho Battle restored the decayed morale, and in the previous column he had assured us that the Russian army in front of Mukden was “superior to the Japanese in numbers and undaunted courage.” Perhaps he means that had not KUROPATKIN struck in the Valley of the Shaho he would have himself been shattered and forced out of Mukden. But if the Russian General's sole object was to hold his ground, why did he loudly proclaim to his troops that he was about to rob the Japanese of their ground? Did he regain his own confidence and restore that of his men by announcing that he was about to achieve a feat which he had no intention of essaying?

It is agreeable to be able to share Colonel GAEDKE's views in one respect, namely, that—apart from recovering the command of the sea; which the Colonel does not consider—Russia's only chance of re-establishing the balance of advantage is by invading Korea. That is what we have often said. Colonel GAEDKE, indeed, does not appear to appreciate that by this very declaration he contradicts his own previous attempts to minimize Russia's losses in Manchuria. He

does not seem to see that if to turn to Korea is her only recourse, then her plight in Manchuria itself must be very sorry. But he does perceive that before she can venture to invade Korea she must first drive back the Japanese armies and seal them in Liaotung. That, too, we have often said. Is there much chance of it? The Colonel is not without hope.

#### TIEHLING.

TIEHLING is now the cynosure of all eyes. It is universally stated that the Russians have there their last great emporium of supplies and that if they lose the place before removing the supplies, their plight will be hopeless. No one who thinks for a moment can fail to appreciate the terrible dilemma now confronting KUROPATKIN. In the first place, what is he to do with his wounded? He must have about 100,000 or even 120,000 on his hands. There is no accommodation in Tiehling for more than a small fraction of that vast number. They can not be sent by road to Harbin, where the nearest hospitals are. The choice lies thus between abandoning them to the Japanese or entraining them for Harbin. To accomplish the latter with any reasonable degree of celerity, all the available rolling stock would have to be requisitioned and the whole service of the line would have to be given up to this work and to no other. No re-inforcements could be carried, even supposing re-inforcements to be in sight, which is very doubtful, and the army would have to depend on the store of provisions already in Tiehling. Undoubtedly KUROPATKIN's wisest plan would be to abandon his wounded, but such a heroic measure is inconceivable. Then he has to face the military problem. He can not have more than 150,000 or 160,000 effectives at his immediate disposal. A few months ago such an army would have seemed very formidable. But the war has developed such proportions that KUROPATKIN's remaining host now looks insignificant. And in fact it is insignificant. If with 350,000 men he could not avert the disaster of envelopment in the Shaho position, what hope is there for him with 150,000 men at Tiehling? Should he halt there and organize new lines of defence, the railway behind him will be severed. That is certain. And what then? Starvation; nothing more or less. In short, by halting at Tiehling he deliberately places himself within the coils of a net which the Japanese will not fail to draw around him. By abandoning Tiehling he cuts himself off from his great emporium of supplies, and must commence a march paralleled only by NAPOLEON's retreat from Moscow. It is not difficult to see that his instinct may be to thrust his troops into trains and carry them away by train to Kaiyuan, the last town on the confines of the desert, only 25 miles from Tiehling. Yet even there he could not hope to enjoy more than a brief respite. Harbin would be his true terminus. But the feat of reaching either haven is impossible. Think what it involves. It involves the entraining of 150,000 troops and 100,000 wounded while the enemy is within five or six miles. Such things transcend imagination and human capacities. The sum of the matter is that we have reached the most supremely interesting stage of the war. If the Russian General manages to extricate himself from his present dilemma, he will indeed deserve the world's applause. Probably his course will be to sacrifice two or three

corps d'armée for rear-guard duty and make a supreme effort to save the rest by means of the railway. A very short time must solve the question one way or the other.

#### THE IWASAKI RECORD.

THE largest dock in the whole of the East has just been finished and will immediately receive the biggest steamer in Pacific waters, namely, the *Minnesota*. The dock is at Nagasaki, and it belongs to the Mitsu Bishi. It was commenced in January, 1902, and has thus taken full three years to construct, as may well be supposed when we say that it is capable of accommodating a steamer of 714 feet length. The opening ceremony would have been performed on the 10th of this month, but it has been postponed in order that the *Minnesota* may be accommodated on her return from Manila, which is expected about the 25th instant.

This dock is one of the many works that Japan owes to the IWASAKI Family. Quietly and unostentatiously that Family has gone on for nearly forty years adding to the Empire's most valuable resources. It may be said with truth that to Mr. IWASAKI YATARO Japan owes her mercantile marine, which is now one of her most important assets. He it was that laid the foundations of that marine, and in a remarkably short space of time organized a fleet of steamers which gave the world a new conception of Japanese enterprise and capacity. Then the IWASAKIS were found operating on a large scale in the field of coal mining, and adopting methods of development which again illustrated their great business ability. How much Japan's wealth has been increased by the scientific exploration of her coal fields it would be difficult to form any estimate, for in addition to the profits directly accruing from the sale of the mineral there are the large collateral gains represented by the aid given to the growth of the country's manufacturing industries in general and by the expenditures of the innumerable foreign steamers that visit Japanese ports to take in fuel. Then we have the ship-building enterprise in which the IWASAKIS stood for a long time almost completely alone, and in which they can scarcely yet be said to have any serious rivals, though, thanks to their example, several competent building yards have sprung up at different places. The Nagasaki yard, of which the great dock alluded to above forms the latest feature, has turned out steamers of nearly seven thousand tons capacity, and will now be able to build even line-of-battle ships. What that means there is little occasion to point out. No need presses upon Japan more imperatively than that of being able to construct war-ships and merchant steamers in her own yards without having to go abroad for them. The present war furnishes a striking illustration, for owing to lack of independent constructive competence the naval potency of the Empire is strictly limited. There are no means of recuperation. Thanks to the IWASAKI Family, however, and to the determined endeavours of far seeing Japanese statesmen, the country has now come within sight of the time when it will be self-supplying in this vital respect. A wreath should be placed on the grave of Mr. IWASAKI YATARO when the nation celebrates the great victory just won in Manchuria, for had not his genius and dogged resolution equipped the country with the beginnings of a mercantile marine, the immense army now carrying the banner of the Rising Sun to such splendid

successes, could not have been transported over-sea or supported throughout the arduous campaign of the past thirteen months. It is in worthy succession to that remarkable man's achievements that his brother, Baron IWASAKI YANOSUKE, and his son Baron IWASAKI HISAYA, are able to augment the country's victorious rejoicing by announcing the completion of a dock where battle-ships can be built. This too is not the only remarkable achievement of the Mitsu Bishi Works at Nagasaki, for they are now engaged in constructing the floating dock to be used at their Kobe yard. The building of a large floating dock in Japan is a feat that would have been referred to a very distant future even by sanguine prophets a few years ago. Not perhaps so striking but certainly not less solid as a national benefit is the banking enterprise of the IWASAKIS. We do not mean simply the fact that they keep a prosperous bank and that they conduct it in accordance with principles which offer an example to all stability-loving institutions. A great deal might be said, indeed, on the latter topic, for it is something novel in financial experience to find a bank which uniformly carries to its reserve funds all profits in excess of a dividend representing little more than one-half of the rate of interest ruling in the open market. Remarkable as is that method and wholesome as is the type of finance it presents, what strikes us specially about the Mitsu Bishi Bank is the absolute confidence it enjoys among foreigners. We know the unfortunate habit that prevails of impugning the commercial integrity of the Japanese; we know that there are some grounds for the criticism, and we know what serious injury is thus done to Japan; not merely moral injury but material injury also. Is it not plain, then, that no factor could be more potent as a restorer of this forfeited credit than a bank where almost every foreign resident of Tokyo lodges his money and conducts his financial business with the most absolute confidence? One can not appraise in dollars and cents the value of the service thus rendered to Japan, nor perhaps can one fully appreciate it without some exercise of reflection, but it is certainly a great and signal service. And in the context of the bank we are reminded of the group of buildings springing up about it on its pattern. Already there are four of these colossal edifices. They have no rivals in Tokyo except the best of the Government offices, the Bank of Japan, the Mitsui Bank and the Ueyeno Museum. The architecture of Tokyo in general will doubtless level up to these buildings some day or other, and the most hopeful factor of the prospect is that the city has men like the IWASAKIS to offer it such models.

In the field of public charity also we constantly note on the part of the IWASAKIS acts of munificence well worthy of a place in their record. Just now, for example, they have constructed and presented to the military hospitals at Toyama and Shibuya two fine buildings to serve as recreation places for the sick and wounded soldiers. It appears that the accommodation available at the hospitals did not suffice for this purpose under the unusual strain now put upon their resources. Not only were the men without places of amusement, but also when their friends and relatives called to see them, the meetings had to take place in the open air. That defect has been remedied by the liberality of the IWASAKIS. One of the edifices erected at their expense was handed over to the Toyama Hospital on the 25th of January; the other and larger, which

is a three storied brick building covering an area of 600 square yards, was opened for use on the 10th inst. Its ground floor has a hall capable of accommodating from 3000 to 4000 persons and provided with a movable stage as well as other adjuncts of recreation; while in the topmost storey are a number of small rooms where the patients can receive visitors. It is interesting to know that the men who command such great financial resources and employ them so wisely, lead quiet, unostentatious and hard-working lives, holding their riches in trust for the nation rather than to minister to their own pleasure.

#### THE TALK OF PEACE.

THE Japanese nation, if we may judge from the utterances of its press, is too level-headed to count on peace as the immediate outcome of the great victory at Mukden. There have been frequent allusions to peace in the columns of European and American journals since the war commenced, and the probability is that they had the effect of postponing the end these writers desired to compass, for they suggested to Russia a false idea that Japan was weakening and that, by some round-about process conceivable only within the arcana of Muscovite intelligence, Japanese agents had "got at" the press of the various countries, and were endeavouring to manufacture a pacific public opinion. But the Japanese, from all that we have seen of them, are fighting to secure not a mere armed truce but permanent tranquillity. They do not want a peace that will condemn them to a war of armaments and to a long period of uneasy expectation destined to end in a fiercer struggle than ever. Writers who appeal to sentiment and to humanity in the cause of an early settlement, and who denounce as enemies of mercy those advocating a sterner course, are merely doing mischief. Weakness or yielding is the worst possible mood to encourage. It is quite true that Japan can not vitally injure Russia. It is equally true that Russia can not vitally injure Japan. But as between the amounts of punishment that the belligerents can mutually inflict, the advantage is all on Japan's side. Japan's territory is in no kind of peril. Russia's territory is now in the greatest peril. Japan's prestige has gained incalculably; Russia's has proportionately declined and will decline still further. Property upon which Russia has spent hundreds of millions has been destroyed, or acquired by Japan, or is on the eve of one or the other fate, whereas no Japanese property is jeopardized. All the projects that Russia has nursed for years and pursued with such resolution as to command the world's admiration, though not perhaps its approval, are threatened with final defeat, whereas no such projects of Japan's are menaced. Then the allegation that Russia can not be beaten to her knees, beaten so as to gladly grant terms effectually precluding her from again plunging the Far East into war—that allegation is quite baseless. Nothing is easier than to win the cheap applause of a few emotional folks by drawing pictures of the horrors of war and gibbeting those that deprecate its merely temporary cessation. We all know how shocking are those horrors, and there is not one of us whose heart does not bleed for the widows, the orphans and the bereaved families. But it is precisely because we seek to avert a repetition of these awful calamities, a repetition on a larger scale than ever, that we deprecate the notion of a settlement which

would be no settlement but only a postponement. Russia's position at this moment is outside the pale of hope. She has now no force in Manchuria, that can cope with the Japanese armies. It is more than doubtful whether she can ever muster such a force, for, as KUROPATKIN significantly points out in his last report; so long as the command of the sea remains with Japan, she can put into the field and maintain there a larger army than Russia can, and, as KUROPATKIN does not assert but as every soldier must admit, no troops hereafter sent from Russia can hope to stand against the veterans now marching northward in Manchuria. It would be difficult to overestimate the value of the moral quality that has been developed in the Japanese troops by their twelvemonth's experience of fighting and their continued victories. No Russian army hereafter organized for service in China can possess that asset. Therefore the position is all in Japan's favour, and she would be mad if she did not utilize to the full the advantages it offers. Not for purposes of greed or imperial ambition, but to obtain such terms of peace as shall secure her people against any repetition of this terrible ordeal, or to continue the war until such terms are obtainable. Russia must begin to reflect sooner or later. It is hard for her, terribly hard, to bow her head to Japan, but she will be helped to make the effort by the consciousness that she is rapidly losing the sympathy of her allies, the French. The unanimity of the French press in urging her to make peace is most significant. Should she neglect that advice, she must be prepared to be condemned by French public opinion. Perhaps she is waiting for Japan to make overtures. That would be extravagant. It is not for the victor to propose peace.

#### "TIEHLING AND AFTER."

ALL conjectures about Tiehling become worthless in the face of the news just received that on the 16th instant at 0.20 a.m. the Japanese took possession of that town. Marshal OYAMA's laconic report announcing the event says that the troops, following close on the enemy everywhere, captured the place at that hour. Whether this is a matter for sincere congratulation remains to be seen. Tiehling, according to the military map, is 33 miles from Mukden, though some maps make it as much as 42 or 43. The road is crossed by several rivers with more or less precipitous banks, and, as General KUROPATKIN's report shows, the Russians in retreat could not make rapid progress between the two places. The battle itself may be said to have ended on the night of the 10th instant, and therefore that the Japanese covered the distance between the two towns in the 5 days immediately succeeding a fight which had lasted continuously for 18 days, was an excellent feat. Nevertheless the value of the achievement depends on the condition of KUROPATKIN's army. Has he left his wounded behind him, or is he encumbered with a hundred thousand crippled men? There certainly has not been time to send the wounded, or even any considerable part of them, to Harbin by train, and if KUROPATKIN has them with him, his plight and theirs must be most miserable. Then there is the still more vital question of provisions. We can not imagine that in the brief interval of 5 days a commissariat service has been organized for a retreating army of 150,000 effectives and 100,000 wounded. Hitherto the Russians

have been working with a fixed secondary base; first Liaoyang, then Mukden, and subsequently Tiehling. At these bases they have always been able to amass large surplus stores of provisions, and further, by means of the railway, they have been able to draw leisurely on the resources of the country as well as on their prime base, Harbin. All the secondary bases have now been lost, and the railway is lost also, temporarily at any rate. It must be KUROPATKIN's most pressing object to recover touch with the railway. He has practically failed to do so at Tiehling, and his next point, under ordinary circumstances, would be Kaiyuan. But Kaiyuan is only 15 miles beyond Tiehling. There will be no respite for the retreating army at Kaiyuan, and we do not know that the Russians have formed any important emporium of supplies between that place and Harbin, a distance of 285 miles. If it is KUROPATKIN's necessity to re-attach himself to the railway as quickly as possible, it must be the aim of OYAMA to keep him off it, and thus a race of extraordinary interest and the most vital results has begun. One need scarcely say that a beaten army, retreating with the enemy at its heels, can not possibly collect supplies from the country through which it passes. Given leisure to sit down quietly and employ the process of forced requisitions, a General can do much, but while he is kept on the move he must rely solely on the stores carried in his own transport waggone. It is scarcely conceivable that KUROPATKIN can have any considerable supply of such stores, and on the whole his situation seems to be of the most precarious nature. But we do not yet know what his facilities are. Our own hope was that he would be compelled to halt at Tiehling and make a final stand there. That course must have resulted in the complete annihilation of his remaining forces. But he has avoided the most immediate danger and the consequence of his choice remains to be seen.

#### YOKOHAMA LITERARY SOCIETY.

The usual fortnightly meeting of the Yokohama Literary Society was held last evening at the Van Schaick Hall. The proceedings began with a short descriptive lecture by the President on Sweden and Denmark which was illustrated by some fifty lantern slides. Following these Mr. J. P. Mollison was introduced and read a letter written in the early seventies describing a voyage from Shinagawa to the Loochoos. He began by quoting some extracts referring to the Loochoos which he had found in an old volume of the *China Repository*. This book was printed at Canton in 1838, and was the 6th volume of the "Records of the Morrison Education Society," inaugurated in 1836, with the avowed object,—to quote from the first Annual Report of the Society's proceedings, submitted at a General Meeting held at Canton on 27th Sept. 1837,—of "that improvement and extension of education, so much needed amongst those who speak the Chinese language." It was interesting to note here, said Mr. Mollison, that amongst those present at the meeting alluded to were gentlemen bearing the well known names in China, and also he might say in Japan, of Dent, Jardine, King, Turner, Gilman, Schwabe. Lancelot Dent, Esq., was elected President, and William Jardine Esq., treasurer of the Society for that year. Besides the education of the Chinese, the Society busied itself with many other matters and might well have been styled the Morrison Education, and Asiatic Geographical Society, because its records contain much that is interesting in the latter direction. Mr. Mollison then read an extract from a work on the Loochoo Islands written by a Chinese named Chow Hwang who was sent

there as an envoy in the first year of Kunlung, A. D. 1757.

Continuing Mr. Mollison said: As you are probably aware, for many years previous to 1874, there was a King of Loochoo who paid tribute jointly to China and Japan, but from that year on to Japan only. After the Formosa trouble between Japan and China, up to 1879, the King continued to rule at Loochoo, but he was then relegated to Tokyo and the Loochoo Islands became known as Okinawa Ken.

By way of introduction to the letter Mr. Mollison next read another extract from *The China Repository*, part of a narrative written by S. Wells Williams, being a description of his first impression of Loochoo, on the occasion of what would appear to have been the first visit of foreigners other than Chinese and Japanese to the Islands, with the exception of one made in 1816 by a Captain Beechy and Captain Basil Hall,—the latter a relative of Mr. B. H. Chamberlain, the Japanese sinologue. Mr. S. Wells Williams and party sailed for Macao in the good ship *Morrison*, on the 4th July, 1837, and reached the Harbour of Napa Keang on the morning of the 13th July. They had with them some shipwrecked Japanese whom they hoped to be able to return to their native land, but their benevolent intentions were prevented by the Japanese authorities, who refused to allow the men to land either at Uraga, or later at Kagoshima. Mr. Mollison having read the extract continued:—

This brings me to the real object of my appearance before you this evening, and I fear I may have been somewhat too long in reaching it. The paper that I now hold in my hand is in the form of a letter written by the late Captain Hubbard, husband of the lady of that name whom we all know so well and love so dearly. The letter was written sometime during the Seventies, in that far away time which has for us older residents in Japan such pleasant memories, and for the younger generation, I trust, more than a passing interest. The letter was written to a sister of our dear old friend, amongst whose papers it was found after her death. It was first intended that Mrs. Hubbard herself should read it, and how doubly interesting it would then have been is easy to believe, but for reasons that you will readily understand the original idea was abandoned and Mrs. Hubbard asked me, as one of her oldest friends, to do the needful. I need not say how gladly I acceded to her request, and thus it is that you find me on the platform this evening. With these few words of explanation I will now proceed to read the letter, which unfortunately is undated, but we know must have been written at least 30 years ago. It was written on board the S. S. *Nymph*, from the town of Napa on the Loochoo Islands. The letter begins with some rather gloomy prognostications of the possibilities of Japan not requiring the services of foreigners much longer. "The Japanese are learning so fast that soon they will dispense with foreign help and do for themselves. In many departments it is the case already and I don't know how soon I may be told that my services will be no more required." The *Nymph*, we gather from the letter, was a vessel of 600 tons carrying a foreign Captain, two foreign officers, two foreign engineers, with Chinese cooks, stewards and waiters, the rest of the crew, sailors, firemen and cargo-men being Japanese. Her port of departure for the Loochoos was Yedo, the steamer lying two miles off the forts at Shinagawa, but stores and water were always taken in at Yokohama. After an interesting description of Osaka, its people and its sights, the letter refers to Kobe as it struck a visitor in the early seventies. "Kobe is an open port and several years since when foreigners were building its pretty houses, people thought it was destined to become a place of great importance, but the last two years trade has fallen off rapidly and many have left for other fields and now it is almost deserted and its pretty houses are going to ruin; this is owing to too many people coming in and over-stocking the market with goods they could not sell. So many failed and left and are doing so all the time, and the place is slowly becoming deserted by foreigners. It is a pity, for it is the garden of Japan,

and so very healthy that Doctors have no business and leave in disgust."

Commenting on this passage Mr. Mollison said:—In view of the opinion expressed herein about Kobe, it will interest you to know that it was not a singular or isolated opinion. Many men keenly interested in Kobe thought the same, and the pessimistic feeling that prevailed was shown by the fact that any number of the best lots in the foreign settlement were offered to any one willing to pay up the back ground rent due on them. This I know to be a fact, because I myself bought about 1000 tsubo from the Chartered Mercantile Bank on the condition named. How the gloomy views then held regarding the future of Kobe have been falsified is known to all, but I may just mention that the land alluded to is now worth probably yen 100,000, though, unfortunately for me, it is no longer in my possession. On the other hand what Captain Hubbard wrote about Kobe being such a healthy place has not been confirmed by hard facts, notably since the Hill was adopted for mixed residence and built over on every available plot of ground. The hill drainage through the foreign settlement must always be a source of danger to the community and there would appear to be lasting fame in store for any engineer who can devise some other scheme whereby this danger can be eliminated.

Mr. Mollison then resumed the reading of the letter, which went on to describe a run through the Inland Sea to Kagoshima, and from thence to the Loochoos (Riukiu). The harbour Napa, the capital of the group, is entered after passing through several miles of coral reefs, which makes navigation very difficult, but when in the harbour is snug and safe. It is too small for a vessel of the size of the *Nymph* to lie at anchor and so she was made fast to the shore with hawsers. Here she stayed two weeks, taking in sugar for Osaka. Again we quote from Capt. Hubbard. "The people of the Loochoos live very secluded lives; their houses are widely scattered, each house is surrounded by a stone wall about eight feet high, which is close to the house, and seems to be only intended to keep outsiders from looking in. I have been into several of them, but one visit is sufficient, as everything is filthily dirty. The islanders do not use any paint and the fire-place is in the middle of the room, and as the house is not blessed with a chimney, you can imagine how black with soot everything is. The floors are covered with grass mats which answer all the purposes of furniture. The people live on rice, fish, sweet potatoes, with now and then daikon as an extra dish. I think the men are the laziest lot I have ever seen in any part of the world. Woman here reigns supreme, for she has the privilege of doing everything for herself. As for the men, it is a very difficult thing to find out what a Loo-choan man does and what a woman does not do. The women do the cooking and take care of the house. They do the work, that is, of coolies in other countries and as there are no vehicles of any description here all goods are lugged about on the heads of women. I saw one day a bale of cotton yarn which must have weighed a quarter of a ton being carried off on the heads of six women." Later on in his narrative Captain Hubbard remarked that Napa is rather a pretty place. "It is built on numerous small hills which run down nearly to the seashore. The scenery of the river which flows into the port is very pretty; the hills on either hand are covered with palms and tropical shrubs. The island abounds in very small horses; the natives are good horsemen and ride a great deal, and a good pony and saddle could be had for 20 cents a day.

We have not space for further extracts from the brave old mariner's letter, which concludes with a vivid description of the Loochoan mosquito, which seems to have worried him a good deal.

Mr. Mollison in closing said:—I am sure we all feel greatly indebted to Mrs. Hubbard for permitting us to make use of her husband's letter, and, speaking for myself, if you have derived even half the pleasure in listening that I have in reading it, I shall feel well repaid

for my share in putting before you such a highly interesting contribution to the records of the Yokohama Literary Society.

On the motion of the President a hearty vote of thanks was accorded Mr. Mollison, while opportunity was taken to wish him *bon voyage*. The President then announced that the musical competition had been fixed for March 25th at Van Schaick Hall. A short musical programme in which Miss Mendelson, Mr. A. E. Cooper and Mr. Horne took part brought the proceedings to a close.

### RUNNING THE BLOCKADE.

THE S.S. "SEVERUS."

The circumstances attending the capture of the German steamer *Severus* about a day's run from Vladivostok, the crew of which reached Yokohama yesterday, lend additional interest to recent Japanese seizures, and impart an altogether new colouring to the anticipations of blockade runners. The vessel sailed from Cardiff on November 17 with a cargo of 3,200 tons of the best Welsh coals and whether in her lower holds dynamite was stowed, as the Japanese authorities have been informed, remains yet to be told.

At the time the ship's articles were signed her destination was stated to be Hongkong, and there was nothing exceptionally strange regarding her passage except that after rounding Ceylon she steered for the Sumatra coast and pursued a zigzag course till a defect in her boilers compelled her to put into Sabang, where she remained for three weeks. Leaving there she coaled at Labuan and then proceeded northward. It was on February 21 when she first encountered the ice, being then about a few miles north of the Hachinohe-Rikuchu Province, where her sister ship the *Romulus* (one of the same company's vessels which had kept her company from the time of coaling at Labuan) altered her course so as to escape the massive flocs only to meet others of a more dangerous character and sustain damage which for a time wholly disabled her. The *Severus* proceeded on her course and, on February 22 collided with a floe which stove in her bows. As she was rapidly going down by the head the pumps were set to work and kept going but the water for days continually increased till twelve feet were in the fore peak. On the morning of the 23rd she was fully encased in the ice, and it was on the afternoon of that day that the *Hongkong Maru* was sighted right ahead. The usual signals were hoisted, and at the request of the *Hongkong Maru* another attempt was made to proceed onward, but a thicker floe breaking across the bows stove in two more plates. The condition of the *Severus* was such that it was decided to signal the *Hongkong Maru* that it was impossible to go any further, and an answer was received to await the daybreak. Crumbling the ice like match-wood at early morn the *Hongkong Maru* came up abreast the *Severus*, and at 9 o'clock two Japanese officers and eight men boarded her. After an examination of the ship's papers the Japanese officers gave the order to put the engines full speed ahead and "never mind the leak," and following the wake of the warship the blockade runner was taken to Yokosuka where she arrived on the evening of the 2nd instant.

The *Severus* is one of the Claus Andersen's fleet of Hamburg steamers built in 1892 by Sir William Gray at West Hartlepool. She is of iron construction, triple expansion engines, and had a speed of ten knots. Commanded by Captain Bernd she had been engaged in the South American meat trade, and is a staunch vessel and altogether a valuable prize. It is whispered that her freight was to be four times the value of her cargo, and that she was insured up to the hilt.

Among the crew of the *Severus* were two Russians who were arrested by the Japanese and retained in prison at Yokosuka.

THE S.S. "ROMULUS."

Further particulars gleaned ante the seizure of the S. S. *Romulus* on February 27th (the crew of which have been released and are now in Yokohama) open up to view many new points in the game now being played in these waters.

The *Romulus* is one of a fleet of sixteen vessels which loaded at Cardiff and the Bristol Channel ports with the best Welsh coal during the months of December and January. They were purchased with their cargoes by the Russian Government, and apart from the price paid for the vessels themselves it is stated that £5 a ton were to be paid for freight and expenses upon arrival at Vladivostok; about five times as much as was paid for the same kind of mineral consigned to ports in Japan during the latter part of last year. Some of the steamers were insured against war risks only, but others included both war and marine risks ranging from 30 to 50 guineas per cent.

The whole of them cleared for Hongkong and other Far Eastern ports with articles distinctly setting forth as a sort of eastward limit "any East Asiatic and non-blockaded port," and only one, the *Wilhelmina*, as far as is at present reported, has made a successful passage, and she was subsequently captured on her second attempt with a general cargo from Shanghai.

There was nothing eventful in the passage of the *Romulus* after she left Barry Dock on Dec. 10th till she reached Northern Japanese waters early in February. She coaled at Algiers, Port Said, Sadang and Labuan, taking altogether with her bunker at Barry 1800 tons en route. Coming up from the Sumatra Coast she kept well out of the track of passing vessels and steamed leisurely onward taking every precaution to avoid the Japanese warships reported to be cruising south-east of Singapore. Nothing occurred however to mar her onward passage till she passed Hachinohe, Rikuchu province, where she first met the ice-floes. Her thin plates after eighteen years of service at first withstood the floating obstructions, and with full speed ahead she steered for the Kunagiri passage to the Soya Strait, but eventually meeting more massive flocs her bows were stove in on one side up to a few inches from the fore water-tight bulkhead. Finding that the water was gaining on the pumps some of the cargo was jettisoned, and on the day preceding the capture the water was got under and there were but a few inches in the forepeak. Whether she subsequently collided with another floe which rent the plate abaft the fore-water-tight bulkhead remains to be seen, certain it is that the appearance of water in the main hold surprised everyone on board a few hours after her capture. She was sighted by the *Kasuga* early in the morning, the cruiser steering southward apparently unheeding the runner, but shortly afterwards through the dim light stretching across the horizon the warship could be seen "putting about" and heading northwards. Then a shot was fired, and the *Romulus* went slow and stopped. She was boarded by the Japanese who took charge of her till the *Hongkong Maru* hove in sight and piloted her onward towards Yokosuka. On the way, however, the water gained rapidly on the steamer in the lower holds till, in a sinking condition, she was beached near Misawamura but a few yards from the shore.

The *Romulus* is not altogether a valuable prize, although her engines are in a good state of repair. Her boilers are defective, and her hull not altogether serviceable. When captured she had about 3,000 tons of coal on board.

### THE LAW COURTS.

#### CLAIM FOR LANDING CHARGES.

In the Yokohama District Court, the hearing of a case instituted by Captain A. Weston, Landing Agent, against the Compania General de Tabaco de Filipinas claiming yen 1,036.59 was resumed on March 10th before Judge Yasuda.

After a brief discussion as to evidence produced by either party, Plaintiff's counsel stated that Captain Weston carries on business as a landing agent, being patronized by the British India Steam Navigation Company whose Yokohama agents are Messrs. Samuel, Samuel & Co. and on the arrival of the *Salara*, Captain Weston landed the whole of the cargo, including twenty thousand bags of rice consigned to defendants in the usual way. For what is incurred as landing

expenses, the consignees must pay at the rate provided by the ship's agents. Defendants, however, refused to pay the charges.

Repeating the statement given on Sept. 10th, defendant's Counsel contended that his clients had arranged with the shipping agent in Rangoon for landing work in accordance with a special clause made in the bill of lading and consequently defendants did not ask plaintiff to attend to the cargo though it was landed by him under the instructions of Messrs. Samuel Samuel and Co. Thus defendants have no responsibility to plaintiff but to Messrs. Samuel Samuel and Co. Capt. Weston seemed to be an employee of the firm for landing business. The charge for landing the cargo was not yet paid to the ship's agent.

Plaintiff's Counsel stated that Capt. Weston carried on his business quite independently of Messrs. Samuel Samuel and Co. The special clause in the bill of lading just pointed out by defendants Counsel did not include landing expenses. The document also specified that the cargo should be landed by the consignees at their expense and risk. To ascertain the general relations existing between landing agent and consignees, Plaintiff's Counsel asked the Court to examine Mr. M. Ishimaru, a clerk in the Shipping department of Messrs. Samuel Samuel and Co. The Court rejected the request. Counsel further asked to have summoned as an expert any person on the staff of Messrs. Helm Bros., Inoye or Matsushita, landing agents. The Court decided to appoint an expert as recommended by Counsel and adjourned the hearing till March 24th.

#### NICKEL COIN COUNTERFEITERS.

N. Yamaguchi, residing at Minami-Shimbori, Kyobashi, Tokyo, was sentenced on March 9th in the Tokyo District Court to 9 years' confinement with hard labour on a charge of having made several hundred counterfeited nickel coins, and Mr. Kadono, who assisted in the work, to 3 years' imprisonment with hard labour and 6 months' police surveillance.

#### A "SAKE" BREWER.

In the Tokyo District Court, T. Nakajima, a sake brewer residing at Koishikawa, Tokyo, was punished on March 9th with a fine of yen 26,660 on a charge of having clandestinely manufactured 160 koku of sake. The plant in the factory was confiscated.

#### P. SARDA v. GRAND HOTEL.

This case, in which plaintiff claims yen 3,407.16 as compensation for supervision of construction work, and the hotel counter-claims for yen 37,267.01 for damage caused by imperfect work passed by the plaintiff as architect, was brought up again on March 13th in the Yokohama District Court before Judge Yasuda, when two Japanese were examined as witnesses.

K. Ishii, a carpenter, stated that the work the Grand Hotel assigned to him through Mr. Sarda was concluded on April 30th, 1902, when the directors and manager of the hotel inspected the work. After its completion, the hotel ordered witness to perform other work different from the original specifications which he finished about the beginning of June in the same year. He did not attend to the concrete work in the basement so that he could not say anything about it.

Y. Isono, a blacksmith, deposed that in the beginning of 1902 he fitted up copper pipes in the bath rooms in the Grand Hotel. At first, he was ordered to lay iron pipes with which he commenced the work. But the manager of the hotel required him to replace them with copper. There was a difference of yen 25 as to prices between the two kinds, the copper pipes being dearer. He received this difference from the hotel after his bill was endorsed by Mr. Sarda. Witness made the plans for fitting pipes in the bath rooms, which work he thought was perfect.

On the motion of defendant's Counsel, G. Hamano, a contractor, was called and appointed by the Court to examine the parts of the work on the Grand Hotel which are in dispute. The investigation was to be made by him before noon of March 13th in company with an engineer from Tokyo, for whose services also defendant's Counsel had asked the Court.

Plaintiff's Counsel commented upon the capacity of Mr. Sarda as an architect and contended that he had a proper claim against the Grand Hotel for compensation for supervision of the work, which he carried out with care as a competent architect. Therefore, defendant had no right to file a counter-claim against Mr. Sarda under the pretext of imperfect work. Counsel asked the Court to summon Mr. Tsumaki, a chief engineer of the Home Department, who had been in England, France and Germany, in order to ascertain the custom in foreign countries as to architects and their duties.

Defendant's Counsel held that there was no necessity to examine Mr. Tsumaki as an expert and that his clients made their counter-claim in accordance with Arts. 644 and 656 of the Civil Code. Even if Mr. Tsumaki gave his opinion with regard to foreign customs as to architects, it could not have any effect in Japanese law.

The Court rejected the request of plaintiff's Counsel and adjourned the hearing.

Miss Sophie Anne Barbe de Witte, residing at No. 16, Yokohama, has lodged in the Yokohama District Court an action against Mr. S. H. Kuhn, whose present residence according to her complaint, is unknown, petitioning for an affirmation of the invalidity of marriage between them and claiming an allowance for a certain period. The hearing is fixed to take place on April 5th before Judge Nakanishi.

#### CLAIM AGAINST THE O. & O. COMPANY.

In the Yokohama District Court; the hearing of a case instituted by a Chinaman named Lee Huan Tang, No. 146, against the O. & O. Steamship Co., claiming yen 108.90 was resumed on March 16th before Judge Nakanishi, when defendant's Counsel asked the Court to examine a Chinaman (whose name was not ascertainable) and a Japanese named G. Tanuma as witness. Counsel stated that several lots of bananas shipped on Oct. 8th on the *Gaelic* at Honolulu had deteriorated before the ship arrived at Yokohama and that the company could not now say whether the fruit in dispute had been involved. The Court decided to summon the men requested by Counsel.

#### INTERNATIONAL FOOTBALL.

##### YOKOHAMA VICTORIOUS.

There was quite a large attendance of spectators on the cricket ground on Saturday afternoon, when the Association football match between Yokohama and Kobe was played.

After the teams had been photographed they lined up as follows:—

YOKOHAMA.		Kobe.	
K.R. & A.C.		K.R. & A.C.	
J. L. Graham.	Goal.	E. Powys, Jr.	
C. H. Lightfoot		W. S. Moss	
(Capt.)	Backs	A. S. Cooper	
G. Stephens		W. B. Mason	
D. Ailion		W. J. White	
C. J. Williams	½ Backs	D. Weed	
J. Kuhn Jr.		I. F. Drummond	
R. G. Crane		O. Strome	
F. James		H. W. Kilby	
S. R. Clarke	Forwards	(Capt.)	
F. Gutierrez		K. van R. Smith	
S. Stephens		J. M. Mollison	
Referee:—C. T. Mayes.			
Linesmen:—H. Goddard and T. Kilby.			

The visitors kicked off from the Settlement end and brought the ball into the home territory, but Moss cleared and Drummond getting hold on the right ran up but kicking too hard the leather went behind. Yokohama were dangerously near the Kobe goal immediately after, but Lightfoot tackled Kilby and cleared to his left wing, where Gutierrez made a good run, and centred well, but the Kobe centre failed to take advantage. A foul against Strome followed which was kicked over by Kuhn. From the goal kick Mollison collared and made a fine run up the left and centred, a dangerous situation being saved by Williams kicking behind. The corner was nicely placed by Weed, but the visitors got the ball away successfully, only to be again attacked, Graham having to run out to clear. Kobe then did some

pressing and looked like scoring, but Gutierrez slipped and the home backs cleared. The visitors continued to have the best of the play for a time, but were not strong enough to beat the home defence, though Mason had to concede a corner in saving a critical situation. This was well placed by Williams, who was playing a fine game, but successfully cleared, and Kobe again attacked vigorously, securing another corner from a misjudged kick by Mason. From this Mollison got hold and had a clear run right up the field, but kicked behind. He followed this up with another good run shortly after and centred well but G. Stephens cleared to his left, where Drummond secured the leather and shot into goal, Graham saving. The visitors again assumed the offensive and Crane had a shot for goal which went wide of the mark. Just at this time the play was nearly all on the home left wing, the halves and backs having all they could do to defend their territory, but the one or two shots for goal by Kobe were unsuccessful. The home forwards got away to the visitors' goal, but some excellent play by Williams quickly brought the leather back again; then Smith and Mollison ran up the left and passed to the centre, but Kilby failed to score though apparently he had a good opportunity of doing so. The home forwards now had the best of matters and pressed Kobe hard. Following a break away by the visitors, some combined play by Kilby, Strome and Drummond made matters look dangerous for Kobe but Graham saved well by conceding a corner. This was placed well but Gutierrez got the ball away and passed to the centre, where good work by Clarke and Crane brought the play to the home goal. A rather long shot by Crane was misjudged by Powys, but the ball went off his toe behind the uprights. The corner was unproductive, and Yokohama again had the best of matters, but could not score, the Kobe backs defending well. The visitors then came down the field with a rush, but over-ran the ball, and give and take play ensued for some time without either side looking dangerous. Then Yokohama secured a corner, and this being finely placed by Mollison produced a hard struggle in front of the visitors' goal, the custodian having twice to fist out. Kobe finally got away and Powys ran out and cleared. The home men again attacked, though not dangerously, and Graham had no difficulty in saving the one or two shots put in. The whistle went for half-time with the ball in centre field. No score.

Upon resuming Yokohama were fortunate in at once scoring. Graham fisted out a shot, but Smith again shot placing the ball in the net. This appeared to encourage the home players and they continued the game with much more success than had been shown in the first half and gave the opposing defence plenty of work. The latter, however, played pluckily against their heavier opponents and managed to keep their goal intact, though a stinging shot from Strome hit the upright. Kobe broke away and in turn attacked, but were not very dangerous, the home defence being always equal to the occasion. Graham saved several shots from the home forwards, and many others went wide or high, the local players showing their usual weakness in front of goal. From this time to the finish Yokohama kept up the pressure almost continuously, though the visitors occasionally got away and made gallant attempts to score, but were not strong enough. When there still remained about ten minutes to play Kilby sent in a good shot which went just outside the upright, and soon after again put in a shot which was partly cleared, but Smith meeting it scored the second goal for Yokohama, Graham having no chance of saving it. The local men continued to have the best of the play to the end, but the whistle sounded for time without anything further being added, the game thus ending in favour of Yokohama by two goals to nil.

The local players were a much heavier lot than their opponents, but in speed the teams appeared to be about equal, and Kuhn in this respect was useful in marking Drummond. In the first half of the game Kobe certainly showed up well, much better than had been anticipated, and were several times very near scoring. During this part of the

game the combination shown by their forwards was superior to that of the home men, and had they had a heavy centre who could shoot well Yokohama would probably not have been able to keep their citadel intact. Both the visiting backs played very well, but the halves were somewhat weak except Williams, who played a sterling game, and of course the forwards, though exhibiting some clever play, were very light. Graham in goal did excellently. For the home team the forwards, though playing well individually, lacked combination and were very weak in front of goal, many opportunities of scoring being missed, especially in the second half of the game. No one in this line could be picked out for special mention. The halves did very well, W. J. White being undoubtedly the pick. Both backs played a strong game, their weight being very useful but their kicking lacked judgment. Powys was not hardly pressed in goal, but cleared well when called upon.

#### THE DINNER

Was held at the Club Hotel in the evening and proved a very enjoyable affair. The tables were laid in the former billiard room of the Y.U.C., which was decorated with foliage, the unused space being curtained off by means of flags among which the Stars and Stripes and the Union Jack were conspicuous. The place was well lit up by three large electric lamps. There was a big attendance. Dr. Wheeler, President of the Y.C. & A.C., occupied the chair, being supported on his right by Mr. C. H. Lightfoot, (Captain of the Kobe team), Mr. J. P. Mollison, Mr. F. J. Lias, Mr. A. E. Cooper, Mr. H. McDonnell and Mr. D. Cox; and on the left by Mr. H. W. Kilby (Captain of the Yokohama team), Mr. A. E. Cooper, Mr. G. N. Fairhurst, Mr. K. van Smith, Mr. C. T. Mayes, etc. The croupiers were Messrs. E. W. Kilby (Hon. Secretary) and L. D. Tebb (Hon. Treasurer).

After dinner, on the excellent quality of which the Club Hotel deserves congratulation, a programme of toasts and speeches interspersed with songs was entered upon.

The healths of the Emperor of Japan and of the rulers of the respective countries represented at the meeting were very heartily drunk on the proposal of the Chairman.

The next toast "Our Kobe Visitors" was then given by the Chairman. He said the visitors included old friends—jolly old friends—and apart from the team they were glad to see other Kobe friends, some young and some old. The Kobe team played up and gave the over-estimated Yokohama team a hard tug—(Cheers)—and he thought they deserved thanks for giving such a good game—(Cheers). Yokohama appreciated their coming up, at the expenditure, doubtless, of much valuable time and labour—(Cheers).

Mr. Lightfoot replied for Kobe and at the same time proposed the toast of the Y. C. and A. C. He expressed for the very kind way in which the Chairman had proposed their health and for the hospitality that had been extended to them. Personally it gave him the very greatest possible pleasure to be present because at one time he thought he would be unable to get a team together to visit Yokohama this year. The fates were finally with him, however, and he was very pleased to bring up a team, which people called "Lightfoot's Kids"—he did not suppose the "Kids" minded it—and 16 to 1 was spoken of. When they got here he was told they were an "awful" team and the betting was 10 to 1—so that there was all the more honour to them for what they did. One of the Yokohama papers had stated that this was his first interport match (Laughter). He was not aware which of the gentlemen present was the author of that statement, but he could assure him that his (Mr. Lightfoot's) first match was not played for Kobe but for Yokohama in 1893—(Cheers). It was needless, when he mentioned that F. J. Lias was Captain of the team and that F. J. Hall was playing, to say that Yokohama won, yet, though he played his first interport match for Yokohama he was still a Kobe man—(Cheers). In proposing the health of the Yokohama team and in handing to Mr.

H. W. Kilby the flag of the visitors he would express three wishes; first, that Mr. Kilby might captain the Y. C. & A. C. team for many years to come, secondly, that whether he was with or against Kobe (with them for preference) he might score a century in every interport cricket match—(Cheers)—and, thirdly, that as long as ports existed in Japan there would be a Kilby in an interport team—(Cheers).

Mr. Kilby in replying thanked Mr. Lightfoot for his kind words. He thought, however, sufficient stress had not been laid on the difficulties with which Mr. Lightfoot had had to contend in bringing up a team. He congratulated the visitors on the excellent form shown by their forwards.

Mr. W. S. Moss in a highly humorous speech proposed the toast of the referee and linesmen, to which Mr. Mayes suitably responded.

Other toasts followed.

In the course of the evening songs were given by Messrs. Cooper, Aslett (who was enthusiastically recalled), Windett, Foster, Thorn, etc., Mr. H. Grimble playing the accompaniments, and a very pleasant evening was spent.

#### TREASURE TRUE.

White Ship upon the Northern Main,  
Trampling to foam the dark sea swell,  
May no ill tide thy march detain,  
No tempest blow inimical!

Speed on! Speed in! For many bide  
Thy stately steps, in Morning Land,—  
A mother at a cradle side,  
A lover dreaming on the strand.

They who at smoking shrines of Trade  
For East and West do mediate,  
In Traffic's dusty stole arrayed,  
The tally of thy cargo wait.

And I who know no cradle songs,  
With empty heart too chill for Love,  
Far from the clamor of the throngs  
Watch from the yellow cliffs above.

Yestreen when fell the day on rest  
A tawny bird did sing and sing,  
To all the east, to all the west,—  
The first-come songster of the spring—

"A fair white ship across the blue—  
The Petrel gave the word of cheer—  
A treasure true doth bear to you,  
And, lo, the morrow brings her here."

\* \* \*

Across a thousand leagues of sea  
The great Ship wins the harbor's calm.  
"What treasure hast thou brought to me,  
And to the Isles of Pine and Palm?"

I hear the sailors' jocund shout,  
Well pleased the port of peace to win:  
I see the lighters putting out  
To bear the precious burden in.

"I come not empty on my way,  
But stored with all that ship may hold;  
With shining stuffs for wide Cathay,  
And wealth of what the merchants sold.

"A thousand and a thousand tons,  
And thrice a thousand tons, my load,  
Brought from the rising of the suns  
Adown the lone sea's misty road.

"A myriad and a myriad yen  
Must many, many times be told,  
And many times be told again,  
To match the treasures in my hold."

"And what of all this bounteous store  
For hands of mine, fair Ship, hast brought,  
Of treasure trove on sea or shore,  
Or what the skill of man hath wrought?"

"Mid all my myriad, myriad bales  
No bale, alas, I bear for thee.  
Far, far, I fear, are yet the sails  
Thy eyes await across the sea."

"Now others' be thy shining store!  
And others' be thy corded bales!  
But bring'st thou not one treasure more  
Across the roaring of the gales?"

"In sooth, one other bale I bear,  
A tiny bale, and light as chaff—  
A word of love, a lock of hair,  
A blue-eyed baby's photograph."

"Then take thy myriad bales who will,  
To me whate'er thou wilt, deny.  
This bundle small my hands shall fill,  
This wealth my soul shall satisfy."

\* \* \*

These silken strands of fine-spun gold  
On 'Change but slender gain would win;  
This pictured face, at auction sold,  
Small count of coin would bring me in.

This word of love—Now who will bid?  
I hear the crowding buyers laugh.  
Nay, in my heart it shall be hid,  
Beneath the baby's photograph.

My treasure true, and safe from knaves,  
Unenvied wealth, yet rich and fair,  
Thou brought'st, good Ship, across the waves,—  
A baby's smile, a wisp of hair.

May God thee keep, thou fair white Ship,—  
Thy health in Love's red wine I quaff—  
When down the west thy prow doth dip,  
Who brought'st my baby's photograph!

And bless the bird of tawny wing  
That gave the news, yet told not half.  
Strange that such wealth one ship could bring,—  
A blue-eyed baby's photograph.

#### GOTEMBA LEPER HOSPITAL.

We beg to acknowledge receipt on behalf of the Gotemba Leper Hospital of the sum of yen, 10, from "C. B. S."

## RUSSIAN PRISONERS.

According to official investigations, Russian prisoners brought to Japan up to Feb. 28th numbered 38,358. They are quartered at the following places:—

	Officers.	Non-commissioned officers.	Men.
Matsuyama .....	439	313	2,397
Marugame .....	—	35	315
Himeji .....	—	352	1,834
Fukuchiyama .....	—	62	1,037
Nagoya .....	111	185	925
Shidzuoka .....	60	3	57
Hamadera .....	—	12,565	22,424
Ninoshima .....	265	120	1,902
Osato .....	—	298	1,658
Fukuoka .....	—	135	864

A large number, says the *Asahi*, have arrived since Feb. 28th and there are many prisoners still at Port Arthur making a total of some fifty thousand in all. Should the new prisoners captured in the Mukden region be added to the foregoing the total will be about a hundred thousand. It is added that three Lieut.-Generals, two Major-Generals and one Rear-Admiral are detained at Nagoya, and that Major-General Nachimoff is now on his way from Mukden to Japan.

The burden of the prisoners will soon be very heavy. There were already 38,358 in Japan on the 28th of February and some 10,000 more have to come from Port Arthur. Then there is the huge batch from Mukden. Altogether the country will soon have a hundred thousand of these unwelcome guests.

The military authorities, says the *Nichi Nichi*, have decided to quarter the Russians captured in the Mukden region, at the following places:—

Jurisdiction of Divisions.	Officers.	Non-commissioned officers and men.
First .....	{ Sakura .....	420
	{ Takasaki .....	550
Second .....	{ Sendai .....	4,037
	{ Nagoya .....	3,000
Third .....	{ Toyohashi .....	1,500
	{ Ozu .....	1,020
Fourth .....	{ Fushimi .....	2,020
Fifth .....	{ Yamaguchi .....	1,000
Sixth .....	{ Kumamoto .....	5,045
	{ Kurume .....	—
	{ Hiroaki .....	62
Eighth .....	{ Akita .....	5,030
	{ Yamagata .....	30
	{ Kanazawa .....	46
Ninth .....	{ Sabae .....	33
	{ Tsuruga .....	1,500
Tenth .....	{ Himeji .....	1,000
Eleventh .....	{ Zentsuji .....	1,000
Twelfth .....	{ Kokura .....	20
	{ Fukuoka .....	50

The foregoing figures are merely estimates.

## THE "NOVOE VREMYA."

In the issue of the 14th January (Russian New Year's Day) the following telegram appears:—

"Java, January 13, 1905. The Japanese fleet have as a base the island of Labuan on the north-west coast of Borneo. In order to conceal the fact, the only telegraph existing there, an English one, has not been working for the last twelve days under the pretext that it is damaged."

An instructive example of the steadfastness of the ally.

Commenting on the above, the journal inserts the following leader:—

"An instructive example of the steadfastness of the ally" is telegraphed to us by our correspondent in Java. Instructive indeed! The English are true friends and faithful allies. Possibly the reason of their faithfulness is that they only enter into an alliance or a friendship when it is to their advantage. The alliance with Japan is advantageous to them and they accord her splendid support and hearty co-operation, regardless of external considerations, be they what they may: now, they intercept cyphered messages by means of their wireless telegraphy, now they cut the only telegraph with Borneo, which of course is in English hands, in order to hide the movements of the Japanese fleet. All this is done with that essentially British hardihood which appropriates not only cities but whole districts.

The telegram printed above has been received from an absolutely reliable source, but we are certain that the British authorities will categorically deny the truth of our information. It will be probably appear that the telegraph was accidentally interrupted and that measures have already been taken to repair it. England has not once violated her neutrality, and in this statement we are quite prepared to stand by the British cabinet. She only renders to her allies those friendly services which are not foreseen in any declaration of neutrality. These declarations generally do foresee very little and are pure matters of form.

It is impossible to lay down hard and fast rules for honour and honesty. Legally, a man may remain an honest member of society who is balancing on the limits between the criminal and the civil law. Legally, the English are observing neutrality. Try and convict them of premeditated interception of telegrams, or premeditated damage to the telegraph. Is it possible? Certainly not, but at the present time, the Japanese fleet is already in the Indian Ocean with a base on the British island of Labuan, with a splendid harbour six miles from Borneo and in uninterrupted communication with all the British colonies. Most important of all—the neutrality of England is not violated and those who would dare to say the contrary are "chauvinists" and sowers of discord in Europe. We shall await the denials which are sure to come and will more than ever convince us that England is balancing between neutrality and secretly hostile action against Russia.

The following editorial appears in the same issue:—

Telegrams from Port Arthur give reports of the quantity of warlike and other stores, in other words trophies, which have passed into the hands of the Japanese. Amongst other articles, we read of 82,000 projectiles. This it seems to us must be a lie otherwise the fortress would still be holding out, and what moreover goes to prove it is a lie is the fact that another telegram reports that during the last days of Port Arthur, the Russians themselves were casting projectiles to an extent of 40 per diem. However this may be, Russia is impatiently awaiting an explanation of all the circumstances attending the fall of Port Arthur and not from Japanese or English sources, but from Russia. The foreign news agencies are devoting themselves 'con amore' to the cataloguing of all the trophies even almost to the cavalry bridges. The Russian reads all this daily and his blood boils within him. He asks: How is this? Is it true that they took so many guns? What's the object of these guns? What's the object of the fleet? and he gets no answer. But it does not seem difficult to give an answer and an answer should be given.

From Berné it is telegraphed that "The International Peace Bureau" wishes to induce Russia and Japan to conclude peace. Is not this enough to give rise to an "International War Bureau"? And this would be an excellent idea as these two bureaux could compete between themselves and leave us alone.

## THE YOKOHAMA SPECIE BANK.

## GENERAL MEETING.

A general meeting of the Yokohama Specie Bank was held at the Bank's building on the 10th. Mr. Soma, the President of the Bank, occupied the chair and delivered a speech, appended below. The following report and accounts for the fiftieth half-yearly term, July to December, 1904, were then discussed and finally adopted.—

	Yen.
Gross profit .....	7915,988.428
(Including 527,000,548 yen brought forward from last account.)	
Expenditure .....	6,006,066.045
Balance (Net Profit) .....	1,909,922.383
To Ordinary reserve .....	200,000.000
To Silver reserve .....	100,000.000
To Dividends .....	1,080,000.000
Carried forward .....	529,922.383

At the election of directors and auditors which followed, all the existing members of the Boards of Directors and Audit were re-elected.

## MR. SOMA'S SPEECH.

Mr. Soma's speech was substantially as follows:—  
Gentlemen:—In submitting the settled accounts for the second half of last year to this fiftieth general meeting, I shall briefly refer to the economic circumstances both at home and abroad, and give you an outline of the business of our Bank.

Gentlemen, the war is more than one year old, and the war expenses disbursed last year amounted to more than 500 million yen. With regard to the economic aspect, both the Government and people naturally took a very cautious attitude. fearful that

the war might disturb the finances of our country. But I am happy to say that not only was the financial power of the nation fully maintained, but in addition the sericulture and the rice crop of last year were abundant, while the Imperial forces won every battle they fought and the glory of our arms was displayed both on land and sea. The people were therefore able to assiduously follow their peaceful pursuits, and the nation was so full of vigour and so pervaded with the spirit of tranquillity, that we could find no difference in this respect with times of peace. The nation bore the heavy burdens of war taxes, and at the same time each issue of the war loan was over-subscribed several times. The money market showed signs of activity at intervals during the term under review, but on the whole it remained steady and the bank deposits kept increasing. In the foreign trade, the exports during last year amounted to 319,260,000 yen and the imports to 371,290,000 yen, which compared with the preceding year, showed an increase of 29,750,000 yen in exports and of 54,150,000 yen in imports. This prosperity, occurring as it did in time of war, must be viewed with satisfaction, and was doubtless due to the acquisition by Japan of the control of the sea, which assured the freedom of our communication with foreign countries. In the export trade, the demand for our commodities increased chiefly in America, and next in England, France, Italy, China, Korea, India, Australia and other countries, and our exports of raw silk, *habutay*, silk handkerchiefs, straw braid, matches, and other things increased. But at the same time the imports of rice, cotton, kerosene, coal, sugar, wool, skins and hides, vessels, machinery, iron, and other direct or indirect war supplies, and the imports made in anticipation of the revision of the customs tariff, considerably increased, with the result that the excess of the imports over the exports reached 52,020,000 yen and the exodus of specie from Japan amounted to a large sum. Such an occurrence is, however, unavoidable in time of war. But this excess of imports and the exodus of specie occurred chiefly in the first half of last year, and their amount greatly decreased in the latter half. Moreover the second foreign loan amounting to 120 million yen was successfully issued in England and America, and the stability of our convertible currency was further assured. Since that time our loan bonds on the foreign markets have continually advanced, and the increase of the credit abroad of our country is a pleasing fact.

Now to look abroad, the commerce and industry in England presented a flourishing aspect, and the money market there was tranquil. In the United States there was an abundant crop of agricultural products, and trade in general prospered there, the Presidential campaign having had no serious effect on economic circles. In China, our occupation of Yinkow and Liaoyang had a reassuring effect on the market, and there was a decided increase in trade as compared with the preceding term. The Indian trade was also in a prosperous condition.

Our banking operations during the latter half of last year were precisely in the same condition as in the preceding term. On the one hand, there was a large demand for money abroad on account of the war, and in consequence we purchased a large amount of export bills as possible, thus affording financial accommodation to the export trade. On the other hand, however, it was very difficult to obtain sufficient funds for the import trade, and I deeply regret that the Bank could not afford full assistance in this connection. Happily, however, during the term in question, the excess of imports over exports was not so great, and the rate of interest at London was low. Owing to these circumstances our business was much more easily conducted than in the preceding term.

The net profit in this term, taken together with 517,000 yen brought forward from the previous account, reached 1,909,922 yen, which shows but little difference with the preceding term. With regard to the details of the business of the term under review, I beg to refer you to the report for that period.

Gentlemen, as I mentioned on the occasion of the last general meeting, we have established a branch office at Dairen. Again, we opened the Liaoyang branch on November 15th last year, and are now making preparations to open another branch at Port Arthur in the near future. These branches in Manchuria have been established owing to the necessity arising from the war, and for the present the business there will be limited to that of the branches of national treasury, entrusted to us by the Bank of Japan. But according to the development of the situation and to the growth of the commerce in those districts, the branches in question will have to deal with ordinary banking business. When that occasion arises, these branches will be, with your consent, raised to the rank of regular branches.

By the capture of Port Arthur, and by the victory achieved lately in the great battle near Mukden and Fushun, our army, combining its excellent strategy with the patriotism and bravery of its officers and

men, has brought about a great development in the situation. But, gentlemen, we cannot easily decide the date of the conclusion of hostilities and we ought to prepare ourselves for a prolonged war. Even in the event of peace being restored at an early date, the post-bellum business is no easy thing. In consideration of these circumstances, we shall make it our aim in carrying on our business both at home and abroad not to deviate from the great principle with regard to our national economics. I ask you for your assistance in this connection.

#### NEW REGULATIONS OF THE GOVERNMENT RAILWAYS.

The Government Railway Construction and Traffic Bureau puts in force on and after April 1 the following regulations published by Notification No. 69 of the Department of Communications, February, 1905:—

Article I.—When the holder of a ticket for a distance less than 50 miles leaves the train at an intermediate station, he forfeits the further use of the ticket for the continuation of his journey by another train.

The holder of a ticket for a distance not less than 50 miles will be allowed to leave the train only at the specified station in order to take another train.

The available periods of tickets for distances not less than 50 miles are as follows:—Two days for a distance not less than 50 miles, but less than 100 miles. One day for every additional 100 miles or less.

In calculating the available period of a ticket, the day of its issue shall be included.

Article II.—The passenger must have his ticket punched at the time of taking a train.

The same rule applies when he leaves the train at an intermediate station.

Article III.—In case a passenger boards a train without a ticket, having had no time to purchase one, or in case he changes to a carriage superior to that which his ticket entitles him to, he must notify an official to that effect and obtain from the latter a certificate.

Article IV.—When a passenger who has ridden in a train without any ticket or with an unusable ticket, fails to establish clearly the class of the carriage in which he has travelled, he shall pay the fare according to the tariff for the best class carriage in the train.

The provision of this and the following articles shall also apply to a passenger who has ridden in a train beyond the point to which his ticket entitles him without the consent of a railway official.

Article V.—A passenger who has ridden in a train without a ticket or with an unusable one, or who refuses to show his ticket when asked to do so, or to deliver it to the collector, shall pay, besides the ordinary fare, an extra sum equal to the ordinary fare.

A passenger who has changed to a car superior in class to the one to which he is entitled, without notifying the conductor, shall pay, besides the difference of the fares between the two classes, an extra sum equal to the fare.

The extra fares mentioned in the above two clauses shall not exceed the following maximums:—

1st class .....	Yen. 3
2nd class .....	2
3rd class .....	1

Article VI.—A passenger who, having had no time to purchase a ticket, boards a train with the consent of the conductor, shall pay, besides the ordinary fare, an extra sum of 20 sen.

But in no case shall the extra sum mentioned above exceed the amount of the ordinary fare.

N.B.—Simultaneously with the coming in force of the present regulations, Notification No. 3 of the Railway Board, October, 1899, and Notification No. 87 of the Department of Communications, April 1898, cease to have any force.

#### CORRESPONDENCE.

##### RAILWAY MORTGAGE LAW.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I beg to thank Mr. de Becker for his explanations. The only thing I am not quite sure of is the meaning of the words "debenture" and "shasai." What is the legal meaning of the English word debenture? Is it the loan itself or the certificate of the loan? I think the Japanese word shasai refers to the loan itself, and not to the certificate, though such an Article as 201 in the Commercial Code which says, "Each shasai must not be less than twenty yen," might make people think differently, and then again in Article 206 we find "Registered shasai." But lower down in the same Article it says, "unless the name is written on the saiken." I take it that saiken is the proper word for Debenture. In Capt. Brinkley's dictionary "shasai" is given as "The debt contracted by a company." On the

other hand we find "kosai" as "Public Loan Bonds" and also "kosaihosho" as having the same meaning. I think the explanation given for "kosai" by the dictionary must be a clerical error for "Public Loan." The literal meaning of the characters is 社 (sha) company 債 (sai) debt.

I remain, Sir, yours faithfully,

IGNORAMUS.

Tokyo, March 9th 1905.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—The legal meaning of the English word "debenture" is an instrument in writing, generally under seal, creating a definite charge on a definite or indefinite fund or subject of property, payable to a given person, &c., and usually constituting one of a series of similar instruments. In fact it is a kind of "hypothecary debt" which is a lien upon a certain more or less definite estate.

Certainly, the word *Shasai* (社債) means the debt itself, while the certificate of debenture (the bond itself) is called *Saiken* (債券).

As a matter of fact, there is a distinct difference between *Shasai* and *Saiken*, but the terms seem to be used almost synonymously.

With regard to the word *Kosai* (公債), it refers to the public loan itself, whereas the additional word *Shosho* (證券) refers to the certificate of the loan.

In other words *Kosai* (公債) is the debt and a *Kosai Shosho* (公債證券) is the document evidencing the same.

I would refer to page 217 of Messrs. Hobart-Hampden and Parlett's excellent English-Japanese Dictionary of the spoken language.

If the gentleman who uses the evident misnomer *Ignoramus* will communicate with me at No. 70 Yamashita-cho, Yokohama, I shall be very pleased to give him any further information in my power.

Yours truly,

J. E. DE BECKER.

Yokohama, March 13th, 1905.

#### THE SCARE OF THE YELLOW DANGER IN JAVA.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—To show how our Dutch friends in Java appreciate strangers visiting them, I enclose this article translated from the Soerabaya *Courant* of 9th February, 1905; the reader may draw his own conclusion. This time it is a couple of Japanese guests of a respected Japanese resident.

This article gives a fair example of the Dutch character; but if the reader thinks it is only the Japanese that are regarded with distrust he is mistaken; the English, American and even Germans (but especially the English) are regarded as dangerous to the fine possessions which the Dutch so zealously guard "as a miser his gold," i.e. they will not advance with modern times but follow slowly, very slowly indeed. They will not open their fine lands to modern advancement nor will they let others do it for them. This is the result of their close-fisted home policy; even the Dutch in Java who are very much more liberal in their ideas, acknowledge this of their pure-breed home parents.

Soerabaya *Courant*, Thursday, Feb. 9th.

#### OUR JAPANESE GUESTS.

For some time we know there is living with the Japanese Consul, Yokotake, at Kedong Doro a pair of his countrymen who are modest enough although one of them at least is an engineer officer (Royal Engineer).

They do as if they were merely pleasure-seekers, perhaps naturalists. Just as tourists are treated in Japan, our Government has been polite enough to look after their safety by instructing the police not to lose sight of them, and wherever they go they are accompanied with a guide (detective) to guard them against accidents.

However, "just as we often see in this world," it seems that these officer tourists don't sufficiently appreciate this act of kindness, at least they act as if they want to be free from such company. They go out by preference when it is dark and rains. Yes even when it pours, dressed as natives.

Yes, they have so much desire to get rid of the fatherly care of our Government that they take a carriage and send a boy in it with native clothes for them to some village (Kampong) and shortly after they follow and reappear metamorphosed as natives and with the greatest of pleasure and go wandering.

As islanders their hearts are attracted to the sea and by night at unseemly hours they try to reach the coast. Even enclosures (fences) are not too troublesome for them, they surmount them easily; from the public they have little trouble. The batteries on the coast they even reach in this way. The calibre of the cannon, the amount of ammunition on hand—everything is very interesting to these pleasure-seekers.

Yesterday evening at 7.30 (we all know how dark

it was and such heavy rain) one of those untired naturalists rode out on horseback; this morning this victim of inquisitiveness had not yet returned.

Really the Government must be more attentive to these valuable guests; otherwise they may run into danger or something may happen to them, because they show themselves sometimes where the public never come. There are paths which lead to strengthened positions not to be found in the commercial charts. Those paths are (if it is no pure chance) we would say preferably taken to wander—but a watchful guard might—let us take Algiers for example—after a short warning pull the trigger.

An accident can take place so quickly even though a soldier on guard in Netherlands India is more loath to do that than in French Africa.

The joke of going about dressed as natives in the streets is not recommendable and we would politely advise them in their own interest to abstain in future from a course that might bring them into difficulties.

Yours truly,

Soerabais, Java.

"NIPPON."

#### "THE SLEEPING BEAUTY."

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—I have much pleasure in intimating that the proceeds of the "Sleeping Beauty" performance given on the 4th inst., in aid of the funds of the Yokohama Cricket & Athletic Club amounted to the substantial figure of yen 469.89. Out of this, a sum of yen 50 has been donated to Miss Riddell on behalf of the Leper Hospital, Kumamoto.

In obedience to the wishes of the Committee and on behalf of the Members, I take this opportunity of publicly expressing the best thanks of the Club to Mrs. Dinsdale for her kindness in placing the proceeds at the disposal of the Club, to the Members of the Caste for their hearty cooperation, to the local Press for granting special advertising terms, and to all who have contributed to the success of the performance.

I remain, Sir, Yours faithfully,

L. D. TEBB.

Hon. Treas. Y.C. & A.C.

Yokohama, March 16, 1905.

#### Y. M. C. A. NOTES.

##### DELEGATES TO WORLD'S CONVENTION.

Rev. V. Honda, President of Aoyama Gakuin and Dr. K. Ibuka, President of Meiji Gakuin, sailed by the *Princess Alice*, Saturday morning, March 4th, en route to Paris. Messrs. Honda and Ibuka are going as representatives of the Young Men's Christian Association Union of Japan to the World's Convention of the Associations, to be held in Paris, April 26-30. Early in May they will proceed to Utrecht, Holland, where they will represent the Student Association of Japan at the Conference of the World's Student Christian Federation. Dr. Ibuka is the Japanese representative of the World's Committee of Young Men's Christian Associations, and President Honda is Vice Chairman of the General Committee on the World's Student Christian Federation. It is assured that these two delegates will receive a hearty welcome and exert a large influence at these two gatherings. The Central Committee of the Association Union was enabled to enlist the hearty cooperation of a number of the highest officials in the country, who not only contributed themselves but assisted in securing funds for the trip of these representatives.

While these two gentlemen go particularly as delegates of the Young Men's Christian Association and in order to attend the Association Conferences, the Association has arranged to make their influence as wide as possible by planning for them an itinerary which will touch conferences and conventions of a large number of religious bodies. After visiting several countries of the continent they will proceed to England and home by way of America. It is anticipated also that their tour will give large opportunity for them to present before the people of Western nations the real attitude and position of Japan at this time.

The Army Committee of the Association has secured the consent of Dr. J. H. De Forest, of Sendai, to make a special tour among the Army Associations in Manchuria. Dr. De Forest will deliver at each place a series of addresses for officers and men. The Association has secured in this matter the cordial cooperation of the Premier, Count Katsura, of the Minister of War, Gen. Terauchi, and of the chief officers at the General Staff Headquarters. Dr. De Forest will take with him letters from these officials to the General Staff in Manchuria and to the officers in command of various divisions. Dr. De Forest sailed from Osaka yesterday, the 15th, for Dairen (Daini) where he will begin his work.

## TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

## THE BALTIC FLEET.

London, March 10.

The correspondent of the *Temps* at Antanarivo telegraphs that the entire Baltic fleet has left Madagascar for Jibut.

## THE FIGHTING NEAR MUKDEN.

A Russian telegram from Mukden dated the 8th, about 10 in the morning, says that there was heavy cannonading, on the north-west, shaking the houses in Mukden. An engagement is proceeding at the Imperial Tombs.

## JAPANESE STRATEGY.

The consummate strategy of the Japanese, as exemplified at Mukden, is universally acknowledged. The Russian losses during the past ten days of the battle are officially given as nearly 33,000, including 800 officers.

## INDEMNITY FOR THE NORTH SEA OUTRAGE.

London, March 10.

Count Benckendorff, the Russian Ambassador at London, has handed Lord Lansdowne, the British Secretary for Foreign Affairs, the sum of £65,000 sterling as indemnity to the Hull fishermen.

## THE FIGHT AT MUKDEN.

A Mukden dispatch of the 8th inst. states that on the southern front the Japanese are fast advancing along the Hunho, where the Russians expect to make a stand, but the issue depends on the operations northward along the railway.

## ANGLO-JAPANESE ALLIANCE.

London, March 11.

Lord Rosebery, speaking at a Liberal banquet in the City of London, said that the Liberal party were certainly prepared to renew the Japanese alliance.

## MUKDEN OCCUPIED.

The Japanese have occupied Mukden.

## KUROPATKIN'S REPORTS.

London, March 12.

The *Times* publishes a St. Petersburg telegram, which Kuropatkin is believed to have despatched early yesterday morning from Tiehling, and which has reached Tsarskoe Selo, and which states laconically, "Am surrounded."

The official report puts the Russian losses up to Thursday morning at 65,000.

## RUSSIA AND RUMOURS OF PEACE.

London, March 13.

The *Daily Graphic*, which has more than once obtained important information from diplomatic sources, declares itself to have been informed that Russia has intimated to France her readiness to entertain negotiations for peace, provided that a reasonable basis for discussion can be arranged. Communications on the subject of mediation are passing between London and Paris. Great Britain, it is understood, communicates the Russian overtures to the Japanese at an early date, if that has not been already done. It is understood that the action of Russia is largely due to the difficulties experienced in connection with the raising of the loan in Paris.

## KUROPATKIN ON HIS RETREAT.

Later.

General Kuropatkin wiring at 6 o'clock on Friday evening said—"Our retreat was the most dangerous yet attempted but thanks to extraordinary efforts our armies are out of danger."

## PEACE RUMOURS DENIED.

The Foreign Office at St. Petersburg denies the rumours of peace overtures.

## EMPHATIC STATEMENT BY CASSINI.

Count Cassini, Russian Ambassador to the United States, in the course of an emphatic statement at Washington, said he was acquainted several weeks ago with the Tsar's final decision to carry on the war regardless of the cost until the time comes when Russia will be victorious. Preparations are already made to send large reinforcements to Kuropatkin.

## THE BALTIC SQUADRON.

It is explained in St. Petersburg that Admiral Rojestvensky is only going to meet the third squadron.

## "COALS TO NEWCASTLE."

Later.

Marshal Oyama telegraphs that the Russian prisoners number 30,000 and are momentarily increasing. The Russians casualties are estimated at 90,000. The Russians left 26,500 dead upon the field.

General Kuropatkin's telegram yesterday throws little further light on the situation, but says that he has received no reports from the third army.

## KUROPATKIN ASKS LEAVE TO RETIRE.

London, March 13.

The *Times*' St. Petersburg correspondent says that General Kuropatkin has asked the Emperor for permission to transfer the command, owing to his need for rest.

## RUSSIA'S LOSSES.

Official Russian despatches record the loss of nearly 500 guns and over 200,000 men.

## CHANGES IN THE BRITISH CABINET.

London, March 14.

Mr. Walter Hume Long, President of the Local Government Board, succeeds Mr. George Wyndham as Chief Secretary for Ireland; Mr. Gerald Balfour, President of the Board of Trade, succeeds Mr. Long; Lord Salisbury, Lord Privy Seal, succeeds Mr. Gerald Balfour; the Hon. Ailwyn Ffellowes, Junior Lord of the Treasury, succeeds to the vacant place(?)

## ENGLISH NEWSPAPERS ON MUKDEN.

The English newspapers all comment on the stupendous significance of the battle of Mukden upon the history of the world. The *Standard* says there will be grave heart-searchings in Germany which has so studiously consulted Russia's interests and so stoutly opposed every advance of Japan. Great Britain rejoices unreservedly at the success of the people with whom she is associated by alliance and by ties of common interest and sympathy. The papers also pay glowing tribute to Japanese statesmen, soldiers and sailors.

## TO STUDY THE NEW SITUATION.

London, March 15.

M. Clementel, the French Minister for the Colonies, will spend September in Indo-China, studying the improvement of the defences of the French Colonies in view of the changed situation in the Far East.

## KUROPATKIN'S ADMISSIONS.

General Kuropatkin in his official report on the 11th March admits that he has 50,000 wounded.

## PEASANT RISING IN RUSSIA.

Later.

Peasants have brutally slaughtered nine landed proprietors in the province of Kursk, Russia. The peasant movement is rapidly spreading.

## TO DEFEND TIEHLING.

Preparations for the defence of Tiehling are going on with frantic haste. New trenches are being dug and fortifications constructed.

## THE RUSSIAN JACQUERIE.

London, March 16.

The peasants pillaged the estate of the Tsar and other members of the Imperial family in the provinces of Orel and Tchernigoff.

## TO CONTINUE THE WAR.

It is stated that the Council of War decided to immediately raise a fresh Russian army which will include two Divisions of Infantry of the Guards, two Divisions of Cavalry of the Guards, and Artillery of the Guards. Hitherto no Guards have been called out.

Non-military circles, however, believe that the mobilization in the present internal condition of affairs in Russia is impossible.

## RUSSIAN FINANCE.

The *Temps* says that owing to the uncertainty of Russian intentions regarding the continuance of the war, the issue of the new Russian loan is postponed until the situation is clearer.

(Received at the Imperial Military Head Quarters on the afternoon of the 9th inst.)

## THE HSINGKING REGION.

Our troops who for many days had been engaged continuously attacking the enemy at Tita, where in a very strong position he offered obstinate resistance, finally drove him out at 3 a.m. on the 9th and are now pursuing him.

Our troops in the Machuntan quarter continue their vigorous pursuit of the enemy and are approaching Fushun.

(Received at the Military Head Quarters on the night of the 10th instant.)

Our troops continue the attack of a superior force of the enemy who are still resisting on the hills north of Fushun.

(Received at the Military Head Quarters on the 11th instant, p.m.)

Our troops in the Hsingking region have driven the enemy back and thereafter pursued him. At 11 p.m. on the 10th they reached Huiyuanpau (5 miles north of Fushun), and are now advancing in vigorous pursuit.

They have taken several hundreds of waggons belonging to the military railroad. There has not yet been time to count other spoils.

(Received at the Imperial Military Head Quarters on the afternoon of the 9th inst.)

## THE SHAHO REGION.

On the south and east of Mukden we have completely forced the enemy into the Valley of the Hun River, where he has halted on the left bank (southern bank) and there, behind strong defensive works, is receiving our attack.

On the west and north of Mukden the attack is being conducted with the utmost vehemence against the enemy, who is resisting most obstinately.

To-day there is a heavy dust-storm, darkening the sun and obscuring the view.

(Received at the same Head Quarters at 11.20 a.m. on March 10.)

Last night our troops in the Hsingking district occupied Fushun, and are now attacking the enemy, who holds the hills on the north of Fushun.

(Received at the Imperial Military Head Quarters on the night of the 10th inst.)

Our various columns have driven the enemy completely back to the right (north)

bank of the Hun and are now enveloping him on the east and north of Mukden, where they are pursuing him on the field.

Reports show that from noon on the 10th instant the enemy, in the positions between the railway and the Mukden high-road, has lost all formation, and is in a pitifully exhausted and suffering condition, is crowded in the interval of 7 or 8 miles north of Mukden between the city and Sanwa, whence he is rapidly retreating north. He numbers apparently many tens of thousands. Our infantry and artillery in that region were pouring a concentrated fire upon the enemy and causing him heavy losses up to sunset.

A body of our troops from Kinglungtien advanced rapidly to Puho (about 12 miles north of Mukden) in the evening and, inflicting heavy losses on the broken enemy, are endeavouring to exterminate him.

(Received at the Military Head Quarters on the 11th instant.)

Our troops, having from every direction pressed upon the enemy and emerged on the right bank of the Hun, are inflicting heavy losses on him. Yesterday afternoon our whole line took possession of a line about 12 miles north of the Hun and to-day (11th) is continuing the pursuit.

On the 11th instant a body of our troops which had left Puho and advanced north, fell in with a large column of the enemy retreating northward. A hand-to-hand fight ensued, and we finally surrounded the column and compelled it to surrender.

In the vicinity of Mukden the enemy's broken forces are still resisting or surrendering. At present we are busily engaged in disposing of them.

The enemy's dead are piled in heaps everywhere. There has not been time to deal with them. The enemy's losses at the different positions have not yet been clearly ascertained, but the killed and wounded, the prisoners and the spoils are exceedingly great. Garments, provisions and fodder are heaped up so as to be difficult to estimate.

(Received on the night of the 11th instant.)

Up to yesterday (10th) our prisoners amount roughly to 20,000 and are continually increasing. They will probably total 30,000. I mention this on account of transport questions and other preparations.

(Received on the 12th instant.)

Collating the reports received from our various armies since the 26th of February, our casualties total 41,222 killed and wounded.

(Received at the Imperial Military Head Quarters on the forenoon at the 14th inst.)

Things remain as before. Our troops are driving out the shattered remnants of the enemy's forces.

On the east of the Tiehling high-road numbers of the enemy are surrendering to our transport guards.

(Received at the Military Head Quarters on the afternoon of the 10th instant.)

#### MUKDEN OCCUPIED.

At 10 o'clock on March 10th we occupied Mukden. The enveloping attack in which we had been engaged for several days has completely succeeded. Fierce combats are now in progress near Mukden. We have taken exceedingly large numbers of prisoners and quantities of arms, ammunition, provisions, fodder, and war material, but we have not had time to make any count.

(Received at the Imperial Head Quarters on the afternoon of the 12th instant.)

The battle which commenced in the last part of February, 1905 and lasted to the middle part of March has been named the "Battle of Mukden."

#### BREAKING PAROLE.

(Received at the Military Head Quarters on the night of the 12th instant.)

Our troops have apprehended a Russian officer who was in the garrison of Port Arthur and who took oath there to return home. He had broken his oath and come to Hsinmintun. A quantity of war material belonging to the Russians has also been seized.

#### THE PURSUIT.

(Received on the 13th in the forenoon.)

The various bodies of our troops who are pushing north in pursuit of the enemy are inflicting heavy losses on such of his troops as attempt resistance. Last night (12th) they had completely driven him to a point about 25 miles north of Mukden and were still pursuing.

At Kaulitan on the South of Kiulikautsz (which is on the west of the railway about 15 miles north of Mukden), innumerable carts, laden with ammunition and other war material were found to have been abandoned by the enemy. They extended to a length of about 12 miles. There has not yet been time to count them.

One of the flags taken by us belonged to 162nd Regiment of the 41st Division of the 16th Army Corps. This regiment was in the wars of 1874, 1878 and 1883, and in 1878 it performed distinguished service. The flag had been kept in the Wilna army district at Moghileff and the officer commanding the regiment was Colonel Gafriloff.

[Received by the Same (later).]

The losses of the enemy in the Hsingking region are not yet known but over 800 bodies have been counted. The prisoners say that the 11th Division was almost annihilated.

The spoils in this district have not yet been counted but they include 400 waggons for the coal-mine railway and about 2000 rifles. The enemy burned his store-houses at Machuntan and Manuilupau but he left thousands of *koku* of provisions and fodder, as well as ammunition and various materials.

#### YINGPAN.

(Received at the Military Head Quarters on the forenoon of the 14th instant.)

On the 11th instant a body of our troops drove the enemy from Yingpan (about 18 miles east of Fushun) and took possession of the place.

#### HSINGKING OCCUPIED.

(Received at the Military Head Quarters on the 16th instant p.m.)

Our troops in the Hsingking region occupied Hsingking on the 13th instant.

#### CAPTURE OF TIEHLING.

A telegram from Marshal Oyama says: Driving the enemy everywhere before them the Japanese captured Tiehling at 0.20 a.m. on March 16th.

#### THE SPOILS.

(Received at the Military Head Quarters on the afternoon of the 12th instant.)

The prisoners and the spoils taken by our troops in the Shaho region, as well as the Russian casualties are roughly as follows, but it is to be observed that the prisoners and guns are rapidly increasing.

Prisoners—Major General Nahkimoff and 40,000 men.

Dead bodies left by the enemy on the field, 26,500.

Other casualties, 90,000.

Spoils—Two flags, about 60 guns, 60,000 rifles, 150 ammunition waggons, 1,000 transport waggons, 200,000 rounds of gun ammunition, 25,000,000 rounds of rifle

ammunition, about 15,000 *koku* of cereals, about 55,000 *koku* of horse-fodder, 35 miles of material for a military railway, 300 railway waggons, 2,000 horses, 23 Chinese cart-loads of mats, 1,000 Chinese cart-loads of accoutrements; 1,000,000 loaves of bread, 18,000 *kwan* of hay. In addition to the above there are a constantly increasing number of entrenching tools, tents, oxen, telegraphic materials, timber, iron bedsteads, stoves, and so on. The returns of the spoils in the Shinking district have not yet been received.

(Received at the Military Head Quarters on the afternoon of the 13th.)

The spoils taken by us in the Hsingking region since the 24th of February (the day of the battle of Chingchong) are as follows:—

Rifles.....	2,200
Machine-guns.....	6
Rifle-ammunition.....	320,000 rounds.
Gun-ammunition and bursting charges.....	11,500 rounds.
Entrenching tools.....	6,000
Horse-shoes.....	300
Iron Wire.....	1,200 coils.
Materials for military railways sufficient for.....	32 miles.
Railway waggons.....	450
Clothing.....	10 Chinese carts full.
Coal-mining implements, enough for.....	6 shafts.

In addition to the above there are quantities of cereals and horse fodder not yet counted, as well as oxen, horses, tents, sleeping garments, stoves, maps and telephones.

The dead bodies left by enemy on the field number about 1,200 and he lost 80 prisoners. His casualties can not have been less than 20,000.

(Received at the Military Head Quarters on the afternoon of the 13th instant.)

The waggons taken by us on the south-east of Kiulikau number over 1000, and their kinds are roughly as follows:—

Carts for 8½ cent. field-gun ammunition.....	150
" 15 cent. heavy-gun.....	300
" rifle ammunition.....	200
" entrenching tools.....	50
" telegraph materials.....	30
" telephone.....	30
" bridge.....	50
" commissariat purposes.....	400
" water-boiling.....	70

The following is a tally of articles:—

8½ cent. field-gun ammunition.....	14,000 rounds.
15 cent. heavy-gun.....	1,400
Rifle ammunition.....	1,200,000 "
Intrenching tools.....	5,000
Telegraph wire.....	100 bundles.
Balloon materials.....	2 carts' full.
Telegraph poles.....	800
Oats.....	1,000 <i>koku</i> .

In addition quantities of clothing, beds, bread, baking-carts and various carts.

In the Hsingking district the following additional spoils are reported:—

	Rounds.
Rifle ammunition.....	120,000
Gun Cartridges.....	800
Intrenching Tools.....	3,000

(Received at the Imperial Head Quarters on the afternoon of the 14th.)

The following spoils were taken at Fushun on the 11th instant:—

Millet ( <i>awa</i> ).....	1,880 <i>koku</i> .
Sorghum.....	1,700 <i>koku</i> .
Bean cake.....	60,000 bales.
Beans.....	700 <i>koku</i> .
<i>Awa-koku</i> .....	4,000 <i>kwan</i> .
Coarse Salt.....	60 <i>koku</i> .
Pickles.....	1,000 <i>kwan</i> .
Fuel.....	5,000 <i>kwan</i> .

#### NEWS FROM EUROPE.

(RECEIVED BY THE "ASAHI SHIMBUN.")

London, 11th inst.

At St. Petersburg a great fête is taking place although the only news publicly announced is a statement from Kuropatkin "I am surrounded." It is considered very

strange that Russia should keep festival in the face of her frequent defeats.

It is generally considered that this last defeat of the Russians is truly decisive, and that there is no longer any ground for hope.

#### AN ESCAPE.

Hsinmintun; 11th inst.

When our troops occupied Mukden the Russian General Kamisal(?) escaped through the cordon taking with him Governor-General Tseng and a number of Chinese officials.

(RECEIVED BY THE "HOCHI SHIMBUN.")

London,

It is generally considered that the defeat of the Russians is notably a much heavier disaster than was the fall of Port Arthur. Public opinion is unanimous in thinking that Russia, in her own interests, should not needlessly continue a hopeless war, which will involve financial ruin.

American military experts class Marshal Oyama with Hannibal, or with Frederick the Great, or with Marlborough, or with Napoleon, or with Grant.

Lord Rosebery, leader of the Liberal Party, affirms that the Liberals favour the maintenance of the Anglo-Japanese alliance.

#### PEKING.

A telegram from Peking to the *Hochi Shimbun* represents the Waiwupu as in a semi-distracted state owing to the combined importunity of the German, French and Russian Representatives. The message says that these three diplomats seem to be working together in accordance with private arrangement, the German Minister asking for special privileges in Shantung, the French for similar concessions in Kwangsi, and the Russian continuing to prefer accusations of breaches of neutrality. M. Lessar is said to go now to the length of charging that Ma's soldiers are operating in conjunction with the Hunghtsz to harass the Russians. We apprehend that there is much exaggeration in the whole story.

Another rumour is that Chinese statesmen have become imbued with the idea that Japan intends to hand over Port Arthur to Great Britain, and this prospect is said to be causing them much concern. We do not see why it should. If they could sleep without nightmares when Russia was in possession, their national conscience should be impervious to fear connected with other Powers.

#### THE BALTIC FLEET.

London, March 9.

The whole of Rojdestvensky's Fleet has left Madagascar. Its objective is said to be Jibuti, but the conjecture is that it is to return to Russia.

(RECEIVED IN TOKYO.)

The vessels belonging to the Third Baltic Squadron are said to be:—

Battle-ship.....	Nicolai I.
Armoured Cruiser.....	Admiral Apraksin.
do .....	Admiral Oushakoff.
do .....	Admiral Seriyavine.
Cruiser .....	Vladimir Monomach.

These, with several transports, reached Suda Bay from Morocco on the 13th inst.

(Received by the Naval Department.)

#### THE "TACOMA" SEIZED.

The American steamer *Tacoma*, which had suffered much from floating ice, was captured on the 14th instant by a Japanese war-ship. She is a vessel of 2,812 tons.

(Nothing is said as to her cargo.—Ed. J.M.)

(RECEIVED AT THE FOREIGN OFFICE.)

#### KUROPATKIN'S STORIES.

The *Times* correspondents in St. Petersburg

wire that it has been publicly announced that the Russian casualties in the first 10 days of the present fight were about 33,000, including 820 officers.

Kuropatkin telegraphs under date of the 6th:—"On the right of the Hun River the enemy attacked our positions on the north and south of Yangshihitun but did not effect his purpose. Our troops, which advanced along the Hsinmintun highroad occupied Iinwautsz near Tashikiao, but were repulsed by the enemy. This body of the enemy is now strongly defending Giuyenan on the east of Tashikiao. He has been reinforced from the south-west and the east. The losses of the Japanese are very heavy. Our troops captured 3 machine guns and 50 prisoners at Putiloff hill. The attacks of the enemy against Kanlarosan and Ulemifutsh have been repulsed.

Kuropatkin telegraphs under date of the 7th:—"Numerous attacks made by the enemy against our positions at Yungshihitun and Yuanfatan on the right (west) bank of the Hun have been repulsed. His determined attacks at Putiloff hill and Novgorod hill as well as his various night-attacks against Kaudorisan have all been repulsed. At one place he fell into a trap laid by us and became involved in our wire-entanglements. A detachment of ours drew back the enemy at night and captured 2 machine-guns. The Japanese army assumed the offensive this morning, but we made a counter-attack and captured a machine-gun on our left flank.

[It will be observed that this report is dated the 7th. Undoubtedly Kuropatkin's extreme left repulsed several Japanese attacks on the Fushun roads. His troops were not driven from their positions there until the mornings of the 8th and the 9th. Neither did his general retreat begin until the night of the 7th. Thus his report does not necessarily conflict with Marshal Oyama's. But a more confused report we have seldom read. Probably it is only a collection of extracts.—Ed. J.M.]

Reuter wires that on the 9th instant Kuropatkin reported:—

The enemy did not attempt any important attack to-day against our southern and western lines. According to a report which reached me at 10 a.m. the enemy, in the sequel of a fight, captured Kiyuson (26 versts east of Mukden). The Japanese army is concentrating its attacks against our northern line with the object of reaching Mukden and the railway. The enemy has abandoned Shindaitz which he had occupied. The fight is still going on at Kenitan. We have taken two machine-guns and a number of prisoners. The Japanese army continues its northward movement.

Under date of the 10th Kuropatkin reports:—

Our armies commenced their retreat from last night. Throughout the night no fighting was seen, but rifle-fire and gun-fire continued.

[General Kuropatkin will have just cause to complain that his Government make him look an imbecile in the eyes of the world. What a report! Everything going on splendidly until the 9th, and then on that very evening, "our armies commenced their retreat." There is no prefatory explanation of any kind. One would suppose that, in Kuropatkin's eyes, a retreat was quite a fine thing; quite a normal sequel to a battle.—Ed. J.M.]

A report from Kuropatkin dated the 8th says:—"The enemy on the right of the Hun has assumed the offensive against Mukden from the north and north-west. Our centre and right, without fighting, have retired to our trenches on the right bank of the Hun. The enemy on the 8th attacked the north line and drove in our outposts from Puja (2 versts north-west of Toretzan). The Japanese army on the north of Mukden attacked our positions in that region but was repulsed with heavy loss. On the west line the enemy attacked our positions near

Sayushitau but was repulsed. In the attack on the centre we captured many prisoners. At our other positions there was no fighting during the day.

General Sakharoff, Chief of Staff, reports on the 9th inst:—

Last night the enemy made many vehement attacks on the north line but they were repulsed.

[How are we to account for these reports? The only explanation which suggests itself is that up to the last moment Kuropatkin did not fathom the Japanese plans or comprehend what was happening. It will be very interesting to see his reports on the 11th. If we ever see them.—Ed. J.M.]

A Reuter telegram gives a report from Kuropatkin dated the 10th instant:—"The retreat of our army was most perilous. The troops that retreated by the ground near the Mukden highway fell into special danger. The Japanese army had made its way into the hills in the Tawan direction but with great difficulty we evaded the peril. The enemy fired on our line of retreat from the east and west. On the eastern Mukden road we were cannonaded from Tawan and Pulho. The reason that the Japanese forces were thus able to advance to the north was that the Hun River, which protected our position on the Mukden side, was frozen that day."

[Kuropatkin is exquisitely naive. One would imagine that the Hun had suddenly and unexpectedly got covered with ice, and that such a contingency had never entered his calculations.—Ed. J.M.]

"In the battle of the past few days we have had 50,000 wounded. Our retreat from Mukden was most arduous. The rear-guard, preserving excellent order, advanced to the appointed place. Our transport service along the Mukden road became involved in difficulties owing to the fire of the enemy's artillery, and moreover the highway between Mukden and Tiehling is crossed at several places by steep-banked rivers, so that progress was unsatisfactory, and the train was obliged to halter en route. The waggons waited for each to take its proper place and the whole was delayed in consequence. Examining the corpses of the enemy's soldiers and questioning his prisoners, I find that in addition to his newly despatched troops, General Nogi's army also took part in the battle. Owing to the proximity of Japan and the facilities offered by sea-transport, the Japanese are able to keep their units at full strength. Further, in consequence of the perfect organization of their intelligence bureau and their investigations conducted even in time of peace, they are well acquainted with the positions occupied by our troops."

Kuropatkin's report dated the 12th March says that according to a report received from the officer commanding the rear-guard, a force of the enemy numbering 1½ divisions, with artillery, are within range. There had been no report of any important fighting that day.

The report from the officer commanding the rear-guard of the 2nd Army says that the Czar's Honorary First Regiment of Siberian Rifles fought most stoutly on the 6th inst. and lost 1,000 of its members. All the Division suffered very heavily. Yurief's regiment of the 25th Division had only 2 officers and 1,619 rank and file left.

#### THE KAISER ON JAPANESE

#### PATRIOTISM AND BRAVERY.

The Emperor of Germany, addressing the recruits at Wilhelmshaven, applauded the great patriotism, courage and unselfishness of the Japanese, who were always ready to sacrifice their lives for the sake of their country. He hoped the German recruits would appre-

citate this noble disposition and would emulate it if occasion arose.

This speech was published in two or three Berlin papers and has not been contradicted.

#### THE FEELING AT YINGKOW.

A telegram from Yingkow says that the Chinese residents hung out Japanese flags and crowded the Consulate and the offices of the Administrative building offering their congratulations upon the successful outcome of the battle of Mukden. Their demonstration was not different from that which followed the fall of Port Arthur though Mukden has a greater commercial bearing upon Yingkow. So long as the Japanese did not take Mukden there was always the possibility of the Russians moving down again to Yingkow, and therefore the Yingkow merchants stopped trade and postponed laying in fresh stocks. But now not only has that fear disappeared but also communications can now be reopened with Mukden and further there is much less fear of bandits in the districts under Japanese rule. Junks which were detained upstream since last year will now be able to come down as soon as the ice melts. Moreover, Japanese paper money will now circulate to the west of the Liao and the rate of exchange will improve. Already it has gone up, being 112 yen to 100 Mexican.

#### VLADIVOSTOCK.

It has been forbidden to admit the public at large within the limits of the Vladivostock fortress. Persons not provided with a permit from the Governor-General of the Amur, the Military Governor of the Maritime Provinces, or the Commander-in-Chief of the fortress, are ordered to be sent back after examination at Manjuria Station. This is published in a Russian paper of the 9th inst.

#### RUSSIAN STOCKS.

The Russian defeat seems not to have exercised any special influence on the price of Russian securities in Berlin, but this is because Russian agents have bought up the securities for the purpose of maintaining their price. It is stated that a great part of the proceeds of the late Russian loan is kept for this purpose and also for paying the interest on the loan. The Russian 4 per-cents. were quoted at 87 marks on the 13th inst.

#### THE BALTIC FLEET.

The French mail steamer *Oxus*, which has just left Port Louis, says that when she passed Nossibé on the 4th inst., the Baltic fleet was still at anchor there. Another steamer which left Madagascar on the 8th inst. tells the same story.

#### THE RIOTS IN RUSSIA.

According to telegrams from St. Petersburg to Berlin the movement of the farmers against the bureaucracy has assumed a very grave form. In some places the farmers have raised riots and looted the palaces of the nobles, causing losses of many millions of roubles. From other districts also comes news of agrarian disturbances. In Berlin these events are regarded as most serious, for if the Government cannot quickly deal with them a state of anarchy will arise and the downfall of the Russian empire may be feared.

#### A JAPANESE SQUADRON.

A Hongkong correspondent of the *Daily Mail* writes that the *Taishang*, on March 15th, observed a Japanese squadron consisting of fifteen ships which was slowly proceeding in the neighbourhood of Palawan (extreme south west of the Philippine islands) in an easterly direction.

#### MANCHURIAN TRAINS.

On the 16th instant the service of trains

from Yingkow to Hsinmintun via Kangfontsz was reopened.

#### VIEWS OF THE CONTINENTAL PRESS.

The *Tagblatt* thinks that the battle of Mukden renders the prospects of peace more remote, for Japan not knowing what Russia really desires in the way of peace will not formulate any proposals and in Russia the war party, which still has power, will insist on a continuance of the combat. Therefore no third Power, not even France, will intervene and risks offending Russia.

The *Lokal Anzeiger* says that the heroism and obstinacy of the fighting at the battle of Mukden was without parallel. The bravery and deliberation shown by the Japanese were largely the result of their having projected an operation which should prove a mortal wound to Russia. Thus while they were inferior in numbers to the enemy and did not succeed in making the battle a second Sedan, their achievement was most remarkable and deserves much praise.

The *National Zeitung* says that the new Russian defeat will have a greater effect upon the population of Russia than did the fall of Sevastopol. In that war Russia was opposed by two great European Powers, but in this she is opposed by a Power which neither she herself or anyone else could have supposed capable of standing up against a country which the Emperor of Germany once declared was the greatest military power in the world. But the might of proud Russia is now humbled before the brave determination of a people which she once despised as yellow monkeys. The moral effect of this battle will be as great as the battle of Jena was to the Prussians. If the Russian authorities bend the knee and accede to the terms imposed by the victors, Russia will not only be defeated in war, but will have to acknowledge the failure of all her military projects, and the Russian people will be incited to new acts of disobedience and rebellion. The Government will not escape the responsibility of having brought misfortunes upon the country.

The *Vossische Zeitung* writes as follows about peace:—The Mukden battle has ended in the complete defeat of the Russians. All fair-minded and unselfish persons must conclude that the proper time has now come for friendly countries to attempt mediation. But it is doubtful whether Russia would or would not welcome it. Unless Russia herself desires peace and takes the initiative in seeking it, intervention would be fruitless. Until the Emperor of Russia and his Ministers appreciate that the present war is altogether lost, peace can not take place. The position of the Russian army in Manchuria and the internal condition of Russia herself have reached a stage which ought to induce her officials to come to a decision, but there is not the least sign of the Tsar and his advisers having arrived at the above conclusion. So long as those high in power in Russia do not abandon the idea of continuing the war, no question of mediation can arise.

The English newspapers with one voice applaud the strategy of the Japanese army and its bravery.

The St. Petersburg correspondent of the *Times*, says that the Russian casualties have been announced to exceed 200,000, and 500 guns have been lost. Concerning this the *Times* says that such losses amount to the annihilation of the Russian army.

Another journal ridicules Russia's semi-official denials of the peace rumours, and declares that such denials show her folly.

As the magnitude of Japan's success becomes known throughout Germany, society and the people at large are deeply moved. They regret that so many lives have been lost, but at the same time there is everywhere shown applause and astonishment towards Japan's achievements. The principal journals of all parties, offer congratulations to Japan. They say that Japan's victory is one of the greatest the world has seen and that it will be long handed down in the pages of history. The Russians, on the contrary, must have been completely disheartened by this great disaster, and if they lose the power to resist further, it must be considered that the military situation for the year 1905 is now decided. What they (the German Journals) desire to know is whether this defeat will induce the Tsar to make peace on any terms. Under any circumstances the Japanese nation has won the respect of the world.

The newspapers in Holland and Denmark commenting upon the battle of Mukden heartily praise the able strategy of the Japanese generals and the valour of the troops.

The Dutch newspapers say that the victory will make far more impression upon the Chinese and will be far more beneficial for the Japanese in the eyes of the world than the fall of Port Arthur. On the other hand the Russian army must have lost heart and in addition there are the troubles at home. Under the circumstances Russia undoubtedly has lost all hope of being able to carry out any further military operations. Although her Government denies the truth of the peace rumours this battle has brought the cause of peace one step nearer.

The Danish papers say that if Kuropatkin cannot extricate a great part of his army Russia will have lost inevitably her prestige and her chances of future success.

The tone of the Austrian papers and of general public opinion tends to applaud the magnitude of the Japanese feat in the capture of Mukden and says that it is greater than the capture of Port Arthur. The general belief is that the Japanese army is superior to Russia in every point and that Russia's efforts and plans will all end in failure.

With regard to peace, the *Fremdenblatt* says that the Mukden defeat is not in one battle only but that it compromises the whole campaign. Russia can certainly send out a new army under a new leader, but if her second army be defeated Japan's terms of peace will grow all the more severe. Should Japan capture Vladivostock, which has been in Russian possession for 40 years, the result will be that the restoration of that place will be one of the terms of peace. Japan regards the present war as involving her very existence, while as for Russia it has no national significance. But whereas if Japan makes inroads into the domain of Russian sovereignty the war will come to wear a national colour for Russia also.

Other newspapers also discuss the terms of peace and say that Russia's best plan would be for her to think of peace before Japan's terms grow too severe.

French journals, speaking of the fall of Mukden, say that its influence in the future is still uncertain but that the most sincere applause must be given to the Japanese Generals for their handling of troops and to the Japanese soldiers for their gallantry. All the papers agree in this; at the same time the various journals, especially the *Echo de Paris* and *Le Gaulois*, which are the most Russo-phil, criticise the incompetence of Russian officers with profound regret, and declare the view that, in the interests of the

Russian people, it would be a wiser policy to make peace at once than by continuing the war to bring destruction on the State. With regard to this latter point the Socialist organs, as is their wont, express the opinion that there is only one way of saving Russia, namely, to make peace at once. Moderate papers like *Le Temps* think that the Russian Government has not yet any desire for peace.

The views of the French press with regard to the great battle at Mukden are as follow:—

*Le Temps*, in its issue of the 12th, says:—"Does Russia consider it wise, having regard to her own vital interests, to torment herself for the sake of carrying on a useless combat? Can she, diverting her whole strength to one corner of her empire, abandon her activity in all other parts and forget Eastern Europe as well as Central Asia? According to our view, the terms of peace may be severe but they cannot affect Russia's existence. With peaceful activity she can easily recoup her present losses. The great majority of the French people pray for the establishment of tranquillity, and hope that their ally will see the necessity of adopting this policy in order to emerge from her present difficulties."

The *Debats* writes:—"The world waited to see Russia victorious this spring and now the fall of Mukden has rendered that hope vain. Inasmuch as Russia has not hitherto been able to gain a victory, there can not be any anticipation of her success hereafter. To recover her lost ground there is nothing for her but to send out a new and stronger army. If she can not do that, today is indeed the time for her to think of peace. Should Kuropatkin's line of retreat be cut off and his whole army fall into Japan's hands, it must be admitted that Russia's position will be hopeless. Will Russia conclude peace on severe terms? If not, there is nothing for it but to recommence the war under extremely unfavourable conditions."

M. Clemenceau, writing in *L'Aurore* says:—"Now indeed it is time to offer intervention. There is not one reason against it. France and England should undertake the difficult task. The present war has produced two great changes. One is that Japan has come to rank with the first-class Powers. The second, that the military value of the Russo-French alliance has been metamorphosed and that it has injured to France's disadvantage."

The *Echo de Paris*, recognising Kuropatkin's complete defeat, says:—"The time has come when Russia, having regard to her own interests, should consider the advantage of lending ear to the urgings of foreign countries. The war party will probably refuse to yield. Nevertheless no one anticipates that the terms of peace proposed by Japan will be so severe as to be unacceptable. We trust that those who are Russia's sincere and unselfish friends will reflect what is to her interest and her advantage."

*Le Journal*, after explaining the greatness of Russia's defeat, hopes that the Russian Government, considering the country's true interests, will make up its mind to peace. The St. Petersburg correspondent of the same journal writes:—"Even the optimists have now come to confess that the Russian army is beaten and that there is no hope of recovery. It is clearly acknowledged that Russia is now for the first time in a hopeless position."

Among Russian newspapers the *Novosti* says:—

"It is no disgrace to Russia to abandon

her scheme of colonization. Saghalien was originally a Japanese possession. If Vladivostock is necessary as a war port, it may be opened. There is no occasion for Russia to subdue other countries yet she must give guarantees for the condition of the people's existence. The recall of Rodjestvensky is an indication that peace is near.

[It will be observed that this paper speaks of Rodjestvensky's recall as an accomplished fact.—Ed. J.M.]

#### ST. PETERSBURG'S DENIALS.

A Wolff's telegram from Berlin says that the rumour regarding the Russian Government's intention of opening peace negotiations is entirely groundless. Such a report can have had no official origin. It is simply a newspaper supposition or has emanated from the Japanese side. The correspondent makes this denial by desire of the Government. He further states that it has been ascertained that Japan is now engaged in negotiating a loan with American and British bankers and the present rumour is intended to remove the public doubt as to the continuance of the war, so as to assist the loan.

Wolff's agent at St. Petersburg, wiring under the same date, says that the Russian Government has no desire for peace. It has decided to continue the war and to send out a fresh army. All rumours in an opposite sense are contrary to facts.

#### NEWS OF THE WEEK.

On March 10th, 895 invalids arrived at Ujina by the *Kiusho Maru* from the front.

On the morning of March 15th, 1,227 invalids were brought from the front to Ujina.

At the battle of Mukden, twenty-nine surgeons on the Japanese side were killed or wounded.

On the March 15th a rat infected with plague was found at Hamaguri-cho, Fudagawa, Tokyo.

A Kanazawa telegram says that preparations to quarter there six thousand Russians captured at Mukden have been made.

A Berlin telegram under date of March 14th says that the new 5 per cent. Russian loan was issued in Paris at francs 91.14.

Mr. Cecil Guinness will take over the management of the Hongkong and Shanghai Bank at Penang, on the departure of Mr. A. G. Stephen for home.

The Emperor of Korea has presented a sword and some porcelain ware to the Emperor and Empress of Japan through Baron Okagawa who recently returned from the front via Seoul.

Admiral Kataoka arrived on March 14th at Kure from Tokyo. On the following morning he paid a visit to the naval station. He is expected to leave there on the 21st for the front.

The *Asahi* has a telegram from Chefoo that 350 Russian invalids from Port Arthur were brought there on March 15th via Dairen. They were removed to a steamer chartered by Russia.

The Kaiser will make a tour in the Mediterranean leaving Hamburg on March 23rd and calling at Lisbon, Tangier, Gibraltar, Port Mahon and Naples. At the last port he will arrive on April 5th.

The *Fiji* has to a telegram from Sakai to the effect that the steamer *Oki Maru* found a Russian mine on her way from Okito Maizuru. The captain of the ship delivered it to the naval authorities.

The *Boyeki* gives the numbers of policemen belonging to the various stations in Yokohama as follows:—Kaga-cho, 122; Bluff 86; Harbour, 45; Iszaki-cho, 121; Kotobuki-cho, 121; Tobe,

86; and Kanagawa, 36. The figures show an average of one policeman per 608 citizens. At Kobe, the average is one constable per 630 citizens.

Tokyo papers report that for the purposes of transporting the enormous number of Russians captured in the recent battle, many steamers on various lines have been temporarily chartered by the Government.

On March 10th, 150 Russian prisoners from the Shaho region and the same number from Port Arthur arrived at Moji. An official telegram reports that 659 Russians who were at the Ninoshima Quarantine Station were removed on the same day to Hamadera, near Osaka.

M. Oshima, a jinrikisha coolie, has lodged a claim of yen 17,000 in the Tokyo District Court against the Tokyo Street Electric Railway Co. His contention is that a carriage of the company ran over his child of 5 years inflicting severe injuries so that its feet had to be amputated.

The crew, 27 in all, of the German steamer *Romulus* which is under examination by the Yokosuka Prize Court, were brought on March 14th to Yokohama and released in the Kencho in the presence of the German Consul-General. The ship had been captured (on Feb. 25th) in the North Sea on her way to Vladivostock with 3,500 tons of Cardiff coal.

The average rate of local taxes to be borne in 1905 is yen 71 per head of population; of the prefectures in the Empire, Toyama has a maximum rate of yen 1,151, and Kanagawa a minimum of yen 47.3. The local taxes in the principal centres of population are: Tokyo, yen 58.9; Niigata, 93.7; Kyoto, 83.4; Hyogo, 73.6; Osaka, 70.2; Nagasaki, 56.6; etc.

The new church which has been built at Hinode-cho, Nichome, Yokohama, and which will henceforward be known as St. Andrew's Mission Church, was dedicated by Bishop McKim on Sunday forenoon. The services were conducted almost wholly in Japanese. The new edifice, which takes the place of the former church in Kotobuki-cho, has accommodation for some 200 people and the building is besides available for Sunday School and other classes. It will ever be associated with the name of the Rev. Walter Weston, its energetic pastor, to whose untiring exertions its erection is due.

The Tsukiji Type foundry invited its customers in Tokyo and Yokohama along with representative of various newspapers to view the new building, on the afternoon of the 11th instant. The new building is four-storied and constructed of brick. The hall was decorated, and several thousand Japanese and foreign pictures and types were exhibited. Baron Hanabasa, Vice Minister of the Household Department; Mr. M. Tokuno, Director of the Government Printing Bureau; Mr. Ohashi Shintaro, M.P., proprietor of the Hokubunkan; Mr. S. Tsuji, Member of the House Peers; Mr. M. Takei, of the House of Peers; and many others were present. Several performances in foreign and Japanese style were given, and Mr. Tsuji then proposed the toast of the type foundry. Mr. T. Namura, M.H.P., proprietor, replied.

#### LITERARY GOSSIP.

Mr. Guy Boothby died on Feb 28th. This well-known and prolific writer of "wire-puzzle" novels and romances was born in Adelaide in 1867. "Dr. Nikola" was his most impressive "creation."

The *Times*, in printing the uncompleted novel by Disraeli, says:—"It adds to our knowledge of the working of Lord Beaconsfield's mind, in that last sad year when he had finally withdrawn from office, beaten by Mr. Gladstone; a mind still as alert and penetrating as it had been ten years before, when he wrote *Lothair*, or thirty-three years before, when he wrote *Tancred*. It gives us a little store of epigrams, which would have been a large store had the nine chapters grown to the full number. Moreover, it gives us the first

outlines of what promised to develop into a full-length portrait of the author's great rival. For there is no mistaking the identity. Joseph Toplady Falconet, the young man born of a rich commercial family, who grows up a prodigy with no sense of humour; whose information is colossal and whose eloquence is overwhelming; and who, "firm in his faith in an age of dissolving creeds, wished to believe that he was the man ordained to vindicate the sublime cause of religious truth"—this protagonist can be no other than William Ewart Gladstone. Was there ever a more delightful situation? An ex-Prime Minister of England, defeated at the polls by his rival after a contest of unexampled bitterness, takes a humorous revenge by writing a novel with that rival for a hero! Unhappily, the pen fell from the writer's hand before he had taken young Falconet past the threshold of the House and of society."

Mr. Frederic Harrison, writing in the *Westminster Gazette*, takes quite another view. He calls the unfinished novel Disraeli's last joke. Says he:—We have all been enjoying Disraeli's posthumous novel—the nameless novel with a nameless hero—and have been puzzled again with that strange union of insight and incoherence, epigram and rhodomontade, knowledge of the world and crass ignorance. But there are some "curiosities of literature" in this new fragment which exceed any recorded by his father. Here is an eminent writer who wrote some fifteen works extending over a period of fifty-five years, who outlived Thackeray and Dickens, Charles Kingsley and George Elliot, who had seen the finished form of modern romance, and yet in the last years of his life he composes a novel in the style of the "Keepsake" of the age of Lady Blessington and the "Mirror of Fashion" of the Regency. False grammar, loose phrases, antiquated idioms, abound in every paragraph.

In his latest book, "Great Englishmen of the Sixteenth Century," Mr. Sidney Lee, the Shakespearean scholar, loses no opportunity of breaking lance with the Baconians, and though there is little that is new on this well-thrashed subject he always continues to say what is old with an appetising freshness. The writing of verse was probably the only branch of intellectual endeavour, he says, which was beyond Bacon's grasp. He was ambitious to try his hand at every literary exercise. At times he tried to turn a stanza. The results are unworthy of notice. Bacon's acknowledged attempts at formal poetry are uncouth and lumbering; they attest congenital unfitness for that mode of expression. Strange arguments have indeed been adduced to credit Bacon with those supreme endowments of all poetic excellence—Shakespeare's plays. The number of works that Bacon claims to have penned, when combined with the occupations of his professional career, so filled every nook and cranny of his adult time that on no showing was leisure available for the conquest of vast fields of poetry and drama. But whoever harbours the delusion that Bacon was responsible for anything that came from Shakespeare's pen, should examine Bacon's versified paraphrase of *Certain Psalms* which he published in a volume the year before he died. He dedicated the book to the poet George Herbert, in terms which attest, despite some conventional self-depreciation, the store he set by this poor experiment. The work represents the whole of the extant metrical efforts which came, without possibility of dispute, from Bacon's pen. If the reader of that volume be not promptly disabused of the heresy that any Shakespearean touch is discernible in the clumsy and crude doggerel, he deserves to be condemned to pass the rest of his days with no other literary company to minister to his literary cravings than this "Translation of Certain Psalms into English Verse, by the Right Honourable Francis, Lo, Verulam, Viscount St. Alban."

Miss Ellen Thorneycroft Fowler, writing in *The Author* on "Literary Responsibility," says:—Next to being buried wholesale in Westminster Abbey, perhaps the most glorious thing that can happen to an author is to be preserved piecemeal, as it were, in a birthday book. The birthday

book is the literary amber wherein our choicest epigrams are embalmed; and all of us to whom this honour has been accorded ought to be thankful that our *jeux d'esprit* have thus been rescued from the transitory state of ephemera to the immortality of flies in amber. But it is when we see ourselves first dissected and then mummified in a birthday book that the terrible responsibility of authorship comes home to us! The speeches which we gave to our puppets to show, as we thought, the material whereof these puppets were made, now stand forth—with no background of atmosphere, no shadow of context—as our own confession of what life has taught us, and of what we are in turn longing to hand on to other people. It is ghastly! Apart from the risks of the birthday book, novel-writers are exposed to mis-judgment by "consumers of novels roasted whole." Miss Fowler remembers a reviewer once saying of her, more in sorrow than in anger, "Miss Fowler ought to have known that no lady would address a gentleman as 'captain.'" She adds—"Miss Fowler did know it, and had made use of the subtle device to convey to her readers that the lady speaking was no lady. But I had apparently succeeded merely in conveying the impression that I was no lady myself!"

Mr. James William Norton Kyshe, formerly Magistrate and Registrar at Malacca, and more recently Registrar of the Hongkong Supreme Court, from which post he retired some time ago, has published with Messrs Sweet and Maxwell (10s 6d) "The Dictionary of Legal Quotations." A short critical note in a home paper thus refers to Mr. Norton Kyshe's works: "Selected dicta of English chancellors and judges from the earliest periods to the present time, and dedicated to the Lord Chief Justice. A composition of this kind entails a vast deal of research and collation, and in this case it has been done with an eye to humour as well as legal acumen and authority. Even the lay reader will find some excellent browsing in its pages, and its value as a book of reference cannot possibly be gainsaid."

Mr. Edmund Gosse's literary essays have always the charm of cultivated scholarship and of keen sympathy with the analytical and reflective sides of writers in prose and verse. His new volume, "French Profiles," is devoted to the consideration of the work produced by certain writers, some living, some dead; the work of the former being regarded in entirety, while that of the latter is matter for selective judgment. Thus, in the case of Pierre Loti, Mr. Gosse has preferred to discuss the books written by the errant Academician since the date of his election. In his criticism of M. Anatole France, his illustration is the "Histoire Comique." The emancipation of the younger French poets from circumscribed forms is insisted on in an appreciative article on M. Henri de Regnier. Among the lighter essays is an amusing sketch of a journey made in Mr. Harland's company in search of Paul Verlaine "up and down the Boulevard St. Michel," and of the poet's capture in the suit "which had been bought for him to lecture in, in Belgium. He was particularly proud of a real white shirt; 'C'est ma chemise de conférence,' he said, and shot out the cuffs of it with pardonable pride."

The reign of the late Mr. W. E. Henley on the *National Observer* is looked back upon with undying interest by many young writers, if they can any longer be called distinctively young. The consent given by the Dean of St. Paul's to the placing of Rodin's bust of Henley in the Cathedral has naturally stimulated their memories, and Mr. H. B. Marriott-Watson has revived them in an interesting article in *T. P.'s Weekly*. Referring to Mr. Henley's pains as an editor, Mr. Watson says:—

He was a real editor, and went through his copy with a pencil, amending and altering to his whim. He took infinite pains with a contribution which he saw to have the right "stuff" in it; but very frequently a new writer would scarcely recognise his own work when it appeared. He loved toying with the copy. Thus 'uses and 'twases were scattered promiscuously about the pages, and were not neces-

sarily the work of the writers themselves. He called his work of supervision "tickling up."

When other editors essay such supervision it is usually the contributor who is "tickled up."

Mr. Watson continues:—

He had a flair for a likely man, whether he was twenty or sixty. And he never hesitated to back his opinions by deeds. When Mr. Kipling, failing an appreciative editor, sent him "Danny Deevee," the first of the "Barrack Room Ballads," Henley wrote back saying he would take as many more of "that sort of stuff" as he could get.

What Mr. Henley did not supervise, or tickle up, was the commercial side of his paper. "From such matters he was by nature utterly disassociated." The disassociation asserted itself in due time, and some eight hundred sixpences were in vain offered for the "N.O." by readers who felt they could not live without it, and who still live without it under protest.

Literary topography and history are combined in Mr. Lewis Melville's volume "The Thackeray Country" (A. and C. Black), which is fully illustrated after photographs by Mr. Barnes Ward. The book tells the story of Thackeray's wanderings, describes his homes, clubs, haunts, and so forth.

The London reviewers are delighted with Sir Frederick Treves' book of travels, which he has called "The Other Side of the Lantern." As the *Westminster* says:—

"It is the misfortune of most people that the privilege of long-distance travel comes to them either when they are too young to know what to observe or when they are too old to derive pleasure or profit from it. Sir Frederick Treves has been fortunate in his opportunity, for he came to these new scenes in the prime of life and fresh from a busy professional career, in which he had learnt the art of observation in no ordinary degree. His tour is therefore not, as he modestly says, a commonplace one, but the rare chance of an unprejudiced observer keenly alive to new impressions. His track is, of course, familiar enough. Thousands of travellers in these days have visited India, Burma, Ceylon, China, Japan, and America; and nearly all of them appear to have written books about their experiences. For all that, Sir Frederick is original. There is no other book that we are acquainted with which gives us precisely what is in this book—namely, a rapid, vigorous, impressionist survey of the world and its inhabitants in a narrative which compares place with place and race with race, while the whole is yet fresh in the writer's mind. Such a book, if badly done, might of course be merely a pretentious and superficial globe-trotter's account of his travels, but Sir Frederick is never open to this criticism. His book never pretends to be more than it is, nor he himself to know more than he does. Both author and book are in the best sense of the word naive. What we get is something which is as valuable in its way as any detailed study of a particular country—the vivid impressions of light and shade, resemblance and difference, which are made upon a keen intelligence by the greatest of variety shows."

A book that has the promise of individuality in its very title and authorship is Mr. R. B. Cunningham Graham's "Progress," which Messrs. Duckworth publish. Although this book may be described as a series of travel-sketches, Mr. Graham's "Progress" denotes much more than mere progression. The title is given to the first and longest of these impressions of man, social and individual, in various parts of the world—in Mexico, for instance, and Morocco.

Your true poet is never bothered for a rhyme. Addressing a stanza to his inamorata a young writer was for a moment puzzled about a rhyme for "nightingale," but got out of it thus:—

"My love is a chrysanthemum  
And I am like the nightingale.  
Ising her verses all the night,  
Unmindful of the biting gale."

Messrs. Hodder & Stoughton will shortly publish the third volume of their Art and Life Library, edited by Mr. Walter Shaws Sparrow. The volume will have for its subject *The Women Painters of the World*, from the fifteenth century to the present day, and will contain about three hundred illustrations representing the work of nearly two hundred lady artists. The volume will be published in luxurious style.

# ITCHING HUMOURS

## SPEEDY CURE TREATMENT FOR EVERY HUMOUR.

Bathe the affected parts with hot water and CUTICURA SOAP, to cleanse the skin and scalp of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply CUTICURA OINTMENT freely to allay itching, irritation, and inflammation, and soothe and heal, and lastly take CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. This pure, sweet, and wholesome treatment affords instant relief, permits rest and sleep, and points to a speedy, permanent, and economical cure of the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, eczemas, rashes, and irritations, from infancy to age, with loss of hair, when all else fails.

## MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, and for all the purposes of the toilet, bath, and nursery. Millions of Women use CUTICURA SOAP in the form of baths for annoying irritations, inflammations, and excoriations, for too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers.

## CUTICURA RESOLVENT PILLS, CHOCOLATE COATED.

Are a new, tasteless, odorless, economical substitute for the celebrated Liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials containing 60 doses. CUTICURA PILLS are alternative, antiseptic, tonic, and digestive, and beyond question the purest, sweetest, most successful and economical blood and skin purifiers, humour cures, and tonic-digestives, yet compounded.

CUTICURA REMEDIES are sold throughout the world. Australian Depot: R. Towns & Co., Sydney. British Depot: 21-23, Charterhouse Sq., London. French Depot: 2 Rue de la Paix, Paris. Forrester Dato and Co., Cebu, Iloilo, Zamboanga, Manila, U. S. A.

business. The top grades of *Noshi* are now finished for the season, but there is still some stock of *Kibiso*, of which the better grades hold their own as to prices, while medium and inferior sorts are easy.

## LEA & PERRINS' SAUCE

The Original and Genuine Worcestershire.

## HOLLOWAY'S OINTMENT

IS A HOUSEHOLD NECESSITY

It cures Rheumatism, Sciatica,

Stiff Joints,

Glandular Swellings,

Sore Throat, Quinsy, Mumps,

Burns, Piles, Fistulas, &c.

**AND EVERY  
FORM OF SKIN DISEASE.**

Manufactured only at 53, New Oxford St. (late 533, Oxford St.),  
London. Sold by all Chemists and Medicine Vendors.

## Bovril is Strength.

In these days of increased commercial activity strength and perfect health are needed more than ever. Bovril taken regularly is most strengthening and sustaining. It keeps the system in the very pink of condition.

### VESSELS ON THE BERTH.

For New York via ports, and Suez Canal, Prompt Despatch, the "INDRANI."—Jardine, Matheson & Co.

For KEELUNG, via Moji (from Kobe), 3rd, and 18th every month, at Noon, the "SATSUMA MARU."—Nippon Yusen Kaisha.

For PORTLAND, Ore., Mar. 19th, the "ARAGONIA."—P. & A. S.S. Co.

For AUSTRALIA, via ports (from Kobe), Mar. 21st, the "AUSTRALIAN."—Cornes & Co.

For NEW YORK, via ports and Suez Canal, about March 21st, the "LOWTHER CASTLE."—Dodwell & Co., Ltd.

For SAN FRANCISCO, via Honolulu, Mar. 22nd, 3 p.m., the "MANCHURIA."—P. M. S.S. Co.

For SHANGHAI, via Kobe, Moji, and Nagasaki, Mar. 22nd, at 2 p.m., the "DAINI TATSU MARU."—Nippon Yusen Kaisha.

For HONGKONG, via Kobe, Moji, and Manila, about Mar. 23rd, the "TREMONT."—Dodwell & Co., Ltd.

For CANADA, United States, and Europe, via Vancouver, B.C., March 25th, the "ATHENIAN."—Canadian Pacific Railway Co.

For MARSEILLES, London, and Antwerp, via Kobe, Moji, Hongkong, Singapore, Penang, Colombo, and Port Said, Mar. 25th, at Noon, the "BAROTSE."—Nippon Yusen Kaisha.

For HONGKONG, via Kobe, Inland Sea, Nagasaki, and Shanghai, about Mar. 25th, the "TARTAN."—Canadian Pacific Railway Co.

For MARSEILLES, via ports, and Shanghai, Mar. 25th, at 7 a.m., the "TOURANE."—M. M. S.S. Co.

For KEELUNG, via Moji (from Kobe), Mar. 25th, at Noon, the "KOSHUN MAUR."—Osaka Shosen Kaisha.

For AUSTRALIA and New Zealand (from Kobe), Mar. 26th, the "CHINGTU."—Butterfield & Swire.

For HONGKONG, via Kobe, (Inland Sea), Nagasaki, and Manila, about March 27th, the "SIBERIA."—P. M. S.S. Co.

For MARSEILLES, London, and Antwerp, via Kobe, Shanghai, Hongkong, Straits, Colombo, and Port Said, Mar. 28th, at Daylight, the "MANILA."—P. & O. S.N. Co.

For LONDON, Amsterdam and Antwerp, Mar. 28th, at Daylight, the "MACHAON."—Butterfield & Swire.

For NEW YORK, via ports, and Suez Canal, 29th March, the "HUDSON."—Standard Oil Co.

For HAVRE, Hamburg and Bremen via ports, Mar. 31st, at Daylight, the "SILESIA."—C. Illies & Co.

For HONGKONG via Kobe, Moji, Nagasaki and Shanghai, Mar. 31st, the "NUMANTIA."—P. & A. S.S. & Co.

For BREMEN and Hamburg, via ports, April 1st, at 9 a.m., the "PRINZ HEINRICH."—H. Ahrens & Co., Nachf.

For BATAVIA, Cheribon, Samarang, Soerabaya, and Macassar, about April 1st, the "TJIPANAS."—Ed. L. van Nierop & Co.

For SEATTLE, Wash., April 1st, the "MINNESOTA."—Nippon Yusen Kaisha.

For HONGKONG, via Kobe, Inland Sea, Nagasaki, and Shanghai, about April 3rd, the "EMPEROR OF INDIA."—Canadian Pacific Railway Co.

## NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, APRIL 1ST, 1905.

## NOTICE

Mr. T. SAKAI is no longer authorised to collect or receive moneys or give receipts on behalf of the *Japan Mail*.

A BELLAMY BROWN,  
Manager.

Yokohama, April 1st, 1905.

## DEATH.

On January 9th, 1905, at the residence of her son-in-law (Dr. Devlin), 43 King Street, Great Yarmouth, England, Mrs. JOANNA M. MACLEOD, formerly of the College for the Higher Education of Japanese Ladies (Sho Rei Kisai), Tokyo. Interred in Echo Bank Cemetery, Edinburgh.

## SUMMARY OF NEWS.

THE most prolific writer of boys' books in the Victorian era, M. Jules Verne, is dead.

MAJOR-GENERAL KOIDZUMI, who recently left the Kumamoto hospital, started on March 27th for the front.

SEVEN officers who will shortly leave for the front were received in audience by the Emperor on March 27th.

THE transportation of the captured Russians from the Mukden region to Japan will be completed by April 10th.

SOME students of the Wasoda College, Tokyo, will leave on April 4th by the *Korea* to play the Stanford College at baseball.

THE appeal of a Chinaman named Yang, residing at No. 187, Yokohama, who was sentenced in January, last in the Yokohama District Court to six years' minor confinement on a charge of having

circulated a number of counterfeit Chinese notes has been rejected by the Court of Cassation.

SEVERAL hundred Russian mines have now been picked up by the Japanese along the coast between Wonsan and Sonching, Korea.

THE interim dividend of the Kyushu Railway Company for the last half of 1904 has been fixed at 4 per cent. for the half year.

MRS. CHADWICK, charged with the violation of the Federal banking laws, has been convicted at Cleveland, Ohio, on sixteen counts.

THE property of the well-known Buddhist temple Higashi Hongwanji has been seized against a debt of three thousand yen.

MR. K. KUBO, Master of the Yokohama Railway Station, has been appointed Superintendent of a transportation corps at the front.

MR. K. DEN, Vice Minister for Communications, will shortly leave for Korea and Manchuria to investigate postal and railway business.

ON the night of March 26th and the following morning, a heavy snow storm was experienced at Kure. This is a very rare occurrence.

CARDIFF coal obtained from steamers captured by the Japanese since the outbreak of the war is estimated at about seventy-five thousand tons.

OWING to the continuous heavy rains, inundations occurred on March 23rd at Miyazaki. Postal communication was temporarily interrupted.

EARLY on the morning of March 27th, fire broke out at Odawara, burning down seven houses. Two old women were killed and one man was injured.

A NAGASAKI correspondent of the *Kokumin* says that according to intelligence received from the front, a big fire occurred on March 22nd at Harbin.

OWING to a strong wind, a fishing boat capsized on the night of March 20th off Haneda, the result being that three of the four fishermen were drowned.

A TELEGRAM from Fukui reports that a floating Russian mine was seen on the morning of March 25th off the district of Oyei in Echizen province.

AN official report says plague appeared in Formosa during the period from the beginning of January up to March 22nd, of which 563 cases were fatal.

CAPT. KOHANA, recently appointed Commander of a warship, and Commander Mikami, leader of a torpedo flotilla, left Kure on March 23rd for a certain bay.

THE death is announced of Count Komatsu Tatewaki at Kagoshima. He was one of the most prominent supporters of the Imperial cause at the time of the Restoration.

K. BABA, (25) an employee of the Marunouchi Post Office, Tokyo, was arrested on March 27th on a charge of having stolen 24 registered letters containing cash from March 1st to March 20th.

A TELEGRAM reports that recently a Russian floating mine was found by fishermen off the village of Uga, in Oki island. It was removed by the 2nd *Oki Maru* to the Maidzuru Naval station.

K. SUDZUKI, Y. KUBOTA, and H. WATANABE, employees of the Nippon Drug Manufacturing Co., Tokyo, were sentenced on March 24th in the Tokyo District Court to three months im-

prisonment with hard labour on a charge of infringing the alcohol and *sake* regulations, and Sudzuki in addition was ordered to pay a fine of yen 19,589.20 and Kubota and Watanabe fines of yen 1,407.20 each.

THE new steamer *Taiko Maru* of the Osaka Shosen Kaisha, which was under construction at the Mitsu Bishi Yard, Nagasaki, was launched on March 27th. She is 1,658 tons gross and 10 knots speed.

A TELEGRAM from Sano reports that two trains collided on March 21st at Yoshimidzu station on the Tokaido Railway, the result being that both locomotives were destroyed. No person, however, was injured.

NINETY-six tons of woollen cloth among the spoils at Port Arthur were brought on March 27th to Tokyo from Ujina. It filled fourteen railway cars. Details as to quality, etc., of the goods are not yet reported.

AT 10.06 a.m. on March 27th, passenger and freight trains collided on the Sobu Railway at Makuhari station in Chiba prefecture. Two cars of the freight train were derailed and sustained slight damage. The negligence of a pointsman was the cause.

THE announcement of a marriage between Viscount Ogasawara and a daughter of Count Abe has been made and the wedding ceremonies will shortly take place. Viscount Tsuchiya, it is reported, will marry the eldest daughter of Marquis Tokugawa, who is a descendant of the feudal lords of Tayasu.

OWING to a storm, two fishing boats capsized on March 26th off Kawasaki in Shizuoka prefecture, two fishermen being drowned, and eight fishing boats are missing. On the same day, a lighter of 42 tons capsized at the entrance of Yokohama harbour, with the result that two out of four *snedo* are missing.

THE Finance Department intends to impose taxes on mercantile business, oxen, horses, and carts in the districts of Manchuria that are now in occupation of the Japanese, in order to raise expenses for sanitary, police and other purposes. The taxes are expected to produce about a million yen but this estimate does not include the Mukden region and northern districts.

BETWEEN ten and eleven o'clock on March 21st about four hundred cases of oil, discharged from the steamer *Yorihime Maru* in Kobe harbour into a lighter, took fire when the lighter was at the railway pier. The fire spread with such rapidity that three *sendo* had to save themselves by jumping overboard. The lighter burned all night, having been towed out of the harbour.

IT is reported by a Seoul correspondent of the *Asahi* that on the Seoul-Fusan Railway, 28 locomotives, 230 freight cars, and 13 passenger carriages are employed. The construction of the Seoul-Wiju line will be completed in May, this year. The work from Seoul to Anju via Kaichong and Pyongyang is finished, and on these sections, trains carrying railway materials run every day.

A TELEGRAM from Chemulpo, Korea, says that the steamer *Santo Maru*, to be employed in the work of floating the *Varyag*, has arrived there. The construction of an observatory of the Japan Meteorological Department has been completed. On March 26th, the opening ceremony took place when General Hasegawa, Commander of the forces in Korea, Mr. Hayashi, Japanese Minister, etc., were present.

## THE MILITARY SITUATION.

Friday, March 24.

According to Japanese journals Yushuchingsz is another name for Changtu, which was entered by the Japanese van on the 21st. The town is not large. It contains only 1,500 houses, but many substantial merchants reside there, and as it is traversed by a river some 40 yards broad, it has great facilities for transport. The railway station is at a distance of 5 miles on the east of the town. It is evident that the Japanese van is in touch with the Russian rear-guard, and that there is not likely to be any rally on the part of the enemy for a considerable time. The object of the Japanese will be to cut off the Russians from all the avenues of Mongolian supplies, and we shall probably hear of their entering Shaotatz and Kintung. The general opinion in Japan seems to be that there will be nothing in the nature of a severe fight south of the Zungari line, if even there. The Japanese soldiers are not exhausted as they were after the battle of the Shaho. They are full of vigour. The repairs and conversion of the railway are being pushed apace and the troops are pressing on so that no time is afforded for the enemy to organize renewed resistance. Linevitch will certainly take no risks. He has succeeded to Kuropatkin's legacy of retreat and he would doubtless like to prove that his own military instincts point in a different direction, but circumstances will over-rule him for many days to come.

A Peking telegram, dated the 23rd instant, reports that a number of Russian troops have entered Kirin, and that the Governor of the city, fearing to see the place converted into a second Mukden, is applying to his own Government for instructions and to the Russians for consideration. Neither appeal is likely to produce much. These Russian troops can not be part of the retreating army. There has not been time for any of its units to cover so much ground. They must be forces which were quartered at neighbouring places. It was always understood that the Russians had some troops in the Kirin district.

The *Nichi Nichi Shinbun* justly observes that the Russians have now been driven completely from southern Manchuria and that there is no immediate prospect of any renewed fighting on a large scale in that district. Our contemporary looks for interesting developments in another direction.

London says that Linevitch contemplates organizing new lines, 87 miles long, on the banks of the Zungari, and that, including reinforcements, he will be able to muster 250,000 troops there. That is an extreme estimate, we should imagine.

In the *Asahi Shinbun* we read that Russians guns are constantly being unearthed or fished out of wells and streams in the neighbourhood of Mukden, and that the number in Japanese hands now exceeds 150. The authorities, however, refrain from making any detailed statement on this and other points until complete investigations have been made.

Saturday, March 25.

Telegrams from the front indicate that Linevitch is at Changchun, and that he is busily collecting his troops there for a rally along the Changchun-Kirin line. Changchun itself does not appear to offer any good facilities for defence. An affluent of the Zungari flows nearly due north from it, and though capable of covering a Russian army operating solely on the east of the railway, it presents no obstacle to the advance

of an army up the west of the line. At a point about 32 miles south of Changchun, however, the road is crossed by an important affluent of the Liao, and immediately north of this affluent there is a cluster of three tolerably large towns, namely, Hwaitch, Itungchou and Itungtien, which would greatly assist the quartering of troops in this region. Here, perhaps, Linevitch may choose his ground. Nevertheless the position offers one great disadvantage, namely, that, after crossing the road and running nearly due west for 35 miles, the river trends almost due south, and an army moving northward could therefore cross at some point low down, and thence advance up the western bank. Thus, in short, the features of the ground alike at Changchun and on the south of it do not seem to lend themselves to Linevitch's purpose if he wants to fight on the south of Harbin.

It is said that the Russians have entirely evacuated Manchuria southward of the Palisade, which runs from Shianhaikwan northward and eastward in the shape of an arch, having its apex at Yingyuenpau, a little north of Kaiyuan, and its eastern foot planted at Fenghwangching. Kuroki, who opened the campaign on land, began by driving the Russians from Kiulienching and then from Fenghwangching, and now they have been entirely expelled from the whole region of which Fenghwangching forms the eastern limit in Chinese eyes.

There is some doubt in official quarters as to the truth of the statement that General Kuropatkin has been appointed to the command of the First Army. Had he been asked to assume a position subordinate to some new General brought from a different field, the change would be credible, but that he should be obliged to receive orders from a man who had previously received orders from him in the same campaign is scarcely conceivable. There is consequently a disposition to await further intelligence. A telegram from London to the *Hochi Shinbun* affirms that Kuropatkin's return to St. Petersburg was suspended and his resumption of duty in Manchuria directed, because it was apprehended that his appearance in the Russian capital would give rise to fresh disturbances. The telegram adds that he will act merely in the capacity of Linevitch's nominal counsellor. That explanation sounds rather whimsical. There is also another point to be considered. It is that Gripenberg has returned and assumed command of the Third Army. Now Gripenberg undoubtedly went to St. Petersburg after the Battle of Heikautai to prefer a complaint against Kuropatkin. His point was that when he was on the verge of victory, Kuropatkin not only failed to give him the essential support, but actually ordered him to suspend operations. Imagine then what a situation would exist with Gripenberg commanding one Army, Kuropatkin another, and Linevitch directing the whole. Is it conceivable that the Russian authorities should sanction such a combination.

A telegram to Peking from Harbin (published by the *Kokumin Shinbun*) represents Harbin as infested by robbers, who carry on their trade even by daylight, and as the scene of frequent conflagrations.

The Japanese Government is adopting vigorous methods to provide easily accessible facilities everywhere for the exchange of the military notes circulated by it in Manchuria, and the consequence is that these notes are now quoted nearly at par.

Neither the *Jiji Shinpo* nor the *Nichi Nichi* nor the *Kokumin* thinks that Russia is

about to yield. They are all persuaded that in her heart she recognises the hopelessness of the struggle, but, on the other hand, those that stand at the head of her affairs know that to yield would expose them to worse things than an unsuccessful war. They will choose the lesser of two evils. Therefore Japan must take for motto "perseverance and endurance" (*kennin jikyu*).

Any one following closely the operations of the Japanese troops in the Battle of Mukden must have observed that whereas the men of the Hsingking army were said to have been unable to cross the Hun without bridges, no such difficulty was recorded of the crossing lower down. But it now appears that the Centre Army also got over in the very nick of time and not without trouble. This Army crossed on the 9th, the day of the great dust storm; a day when—so the description runs and so every one familiar with these Manchurian winds will believe—it was almost impossible to open the eyes or to face the piercing sand-laden gale. Very few commanding officers would have dreamed of moving troops in such weather, but to the brave Japanese the occasion seemed precisely one to utilize. They commenced the crossing. Already, however, the ice had begun to melt. Its surface was not only covered with ankle-deep water, but also was so soft in the place first essayed that the gun-wheels stuck and to drag them across was not possible. Evidently the task was one of great peril, but the Japanese persevered, and by trying one locality after another they finally got over in safety. Two days later the ice had become so thin that not a company could have crossed, much less an army. It will perhaps be recorded by some annalists that this was a piece of extraordinary luck for the Japanese. But the story illustrates the old saying that luck comes to those deserving of it. Had not the Japanese defied that terrible dust-storm on the 9th and had they not marched out in the teeth of it, they would have been arrested on the south bank of the Hun.

Sunday, March 26.

We read in the *Asahi Shinbun* that the Japanese troops are now following and keeping touch with Russians. Up to Kaiyuan they "pursued" them but thereafter they merely "followed," a difference of some significance in military language. The pursuit may be said to have commenced on the 8th and lasted until the 19th, a period of 12 days. From the Japanese lines in the Shaho Valley to Kaiyuan the distance is 77 miles, and throughout that distance the pursuit was kept up. Thence the advance to Chingtu (15 miles beyond Kaiyuan) was in the nature of following, which means merely maintaining touch with the enemy. It is now supposed that the Japanese van has reached Supingchich, which is 20 miles beyond Chingtu. Hence the total advance thus far has been 112 miles. From Supingchich to Changchun the distance is 58 miles. If then Linevitch contemplates a stand at the latter place, the fact will very soon be known. We doubt whether he has time to make any effective dispositions. Probably he will continue his retreat to the positions immediately southward of Harbin. However, it is said that the Russians are beginning to show signs of recovering their order, and if that be the case it is impossible to tell when Linevitch may feel justified in offering renewed existence.

Meanwhile the business of clearing the field at Mukden continues. It is not yet possible to give any accurate statement of the spoils but they are said to be very large,

The railway bridge over the Hun has been nearly repaired, and railway communication right through will soon be established. The Liao also being now free from ice, is available as a water-way.

Some calculations are made in Japanese papers as to the Russian strength. They put the number of killed in all the engagements at 50,000, the number of prisoners at 40,000 and the number of wounded at 110,000, making a total of 200,000 casualties. From the wounded, however, 20 per cent. should be deducted on account of men whose hurts are not serious. This brings down the total to 178,000, and if the Russian forces originally in line of battle near Mukden were 380,000, there now remain about 200,000, among whom, however, there must be many suffering from frost-bite and exhaustion. It is further calculated that between Kirin and Tieling the enemy had  $1\frac{1}{2}$  Divisions; at Harbin 1 Division, and in the Vladivostok district one army corps. This would make his total strength now in Manchuria about 260,000. Of course he can not draw upon the Vladivostok district for the defence of Harbin, and it has further to be remembered, as a fact demonstrated by military experience, that many of his units have practically no fighting value in their present decimated condition. Until the vacancies in their ranks are filled, in part at any rate, they can not be relied on in the field. These considerations make it clear that Linevitch has a very hard task to perform.

A great deal has been written about the desperate fight made by the Nagoya Division at Likwanpau, but the most sanguinary engagement of all seems to have taken place at Kautailing, which was attacked by a regiment of the Sendai Division under the command of Colonel Shimada. The attack began on the night of the 2nd and continued until 1 a.m. on the 4th. This position confronted the left wing of the Centre Army, and its capture was essential in order to correct the recess in the Japanese line. The place was fortified in a most effective manner, the result of months of labour, and the Japanese regiment, though attacking at night, found that while attempting to surmount the various obstacles, including several lines of wire-entanglements, a rain of shot from quick-firing guns was perpetually poured upon it. There seems to have been a moment's hesitation, but Colonel Shimada dashed to the head of the now greatly thinned ranks. He brandished a six-foot pole and shouted encouragement in a voice that was heard above the crashing of the artillery. Thereafter the men seemed invincible. They carried the first line of trenches and finally charged into the enemy's last position, winning an extraordinary victory but at extraordinary cost, for out of the whole regiment only one officer—Captain Watanabe—and 26 men remained in the fighting rank. Each Japanese regiment in the Battle of Mukden must have mustered fully 5,000 men. This loss, then, was absolutely without precedent in the annals of warfare.

Fresh instances are quoted of Russian brutality, a woman being the victim in one case, and the Japanese wounded in another. This savagery is almost indescribable. Gouging out the eyes of wounded men, mutilating them in the most shocking manner, and even burning them seem to be acts quite within the category of Russian soldiers' practice. Comment is idle.

Monday, March 27th.

A Peking telegram says that Linevitch is assembling his forces at Changchun, and

that the broken ice in the rivers is greatly impeding the operations of the troops. Apparently this latter observation applies to the Russians, but inconvenience of that nature must be equally applicable to the Japanese.

Nagasaki telegraphs to the *Hochi* that an iron bridge on the railway between Vladivostok and Harbin has been broken by the floating ice and that traffic is suspended.

The Russians took great pains to smash bridges and injure the line of railway as much as possible in their retreat. They evidently did not look forward to the possibility of being able to apply it again to their own uses. It is stated, however, that in the interval between Mukden and Kaiyuan the Japanese have already managed to construct temporary bridges, there not being any river of great magnitude to negotiate. The Hun bridge, however, on the south of Mukden, still presents some difficulty. This is the bridge which was so often the cynosure of attack during the winter months.

Floating ice still impedes navigation at Yingkow, but it is expected that this obstacle will have entirely disappeared by the 28th instant. Thereafter the Liao will be of immense service to the Japanese army in its advance. The great river and its affluents constitute a fine water-way nearly as far as Changchun.

The Russians do not appear to be able to organise even an efficient rear-guard. We do not hear of anything like obstinate resistance at any point. One would expect that to stay the Japanese advance even for a brief space would be of importance to Linevitch, but apparently he does not find himself competent to do so. Of course it is not to be expected that the progress of the Japanese armies will continue to be as rapid in the immediate future as it has been since the battle of Mukden. They have to clear all the detached Russian forces out of the districts occupied, and the farther they advance beyond their base the more troublesome do the commissariat and transport arrangements become. Then there is the question of weather. The spring thaw will soon reduce the roads to an almost impassable condition. Indeed it is surprising that this factor has not produced more effect already. Reviewing the whole situation, one must be prepared for a marked diminution of celerity in the Japanese advance.

Wednesday, March 29

Yingkow reports that the Russians are still retreating, and that there seems to be very little prospect of their organizing any resistance south of Harbin.

The same telegrams say that great numbers of Japanese are arriving at Yingkow. There are already 2,000 Japanese settlers there, and the rapid coming of others is viewed with some uneasiness, as many of the arrivals are men without capital. Advice is given that for such the place offers few opportunities and that persons proposing to come would do well to consider the matter seriously.

On the 27th it was announced that ships might enter Yingkow, the floating ice having ceased to be dangerous. Some 25 steamers had been waiting outside, and to prevent the confusion that would certainly have attended the simultaneous entry of such a mob of vessels, arrangements were made for them to come in one by one.

The correspondent of the *Nichi Nichi Shinbun*, the well-known Mr. Kuroda, sends intelligence which throws light on a hitherto obscure feature of the recent campaign,

namely, the taking of Tieling. It seemed strange that a place of such importance, where the Russians were understood to have made defensive preparations of a most thorough nature, should have been evacuated without a struggle. Our readers will remember that from Russian sources news was sent of a heavy fight on the north of Tieling. But the date of this was said to be the 18th, whereas according to the Japanese official report, Tieling was occupied very early on the 16th. The two things, therefore, could not be connected, and, besides, there does not appear to have been any serious combat north of Mukden. What happened at the taking of the place is now recorded by Mr. Kuroda. He says that a certain force, which had advanced through the mountains, crossed the Fan River, south of Tieling, on the 12th, and then attacked the Russian defenses, which were very strong and which would assuredly have offered a desperate resistance had they been held by unbroken troops. As it was, however, they did not greatly check the Japanese advance, though their capture cost some 700 casualties. The force that took these heights was not the force that entered Tieling. Another body of men, moving in a more westerly part of the field, occupied the town. The Russians, after being driven from the heights, were observed busily destroying the stores amassed in the city and retreating.

One fact brought out by this and other reports is that the Japanese wings—or at any rate a considerable section of them—did not make any halt in the vicinity of Mukden, but pressed on northward at once.

The same correspondent, Mr. Kuroda, mentions a report that General Kuropatkin had a bad fall from his horse during the battle. He was observing the operations from a position at Tashan, when a 28 cent. Japanese shell fell and burst in his vicinity. The General's horse plunged so furiously that the rider was dashed to the ground, and had to leave the field. He is said to have been carried off in an automobile, and Mr. Kuroda expresses the opinion that his subsequent application to be relieved of the supreme command on the ground of illness had some foundation of truth. But all this is only rumour. It would account, however, in some degree, for the subsequent appointment of Kuropatkin to the command of the First Army, for if rest alone was needed, his return to St. Petersburg may have been unnecessary, and it may be the Tsar's intention to replace him in full command so soon as he is sufficiently recovered. The removal of Gripenberg looks as if Kuropatkin were still in favour.

Mr. Kuroda writes a treatise on the old saying *fusei kwakurei* (sound of the wind and voice of the crane). He says that history relates instances of troops flying before these imaginary indications of danger, but to credit the annals it is necessary that one should actually witness a fight like that at Mukden. No less than fifteen thousand Russians surrendered within the city, almost without a struggle. Bodies 2,000 strong, which had apparently retained their organization, raised the white flag after a few rifle-shots. On the 11th inst. a force of from 400 to 500 men laid down their arms to 200 Japanese; a half-company, 120 strong, surrendered to a small commissariat guard of Japanese, and, most remarkable of all, 24 Russians actually allowed themselves to be made prisoners by 4 Japanese who were hastening to rejoin their corps. Nine Japanese prisoners were recovered when the Russians were in the act of escorting them towards Tieling; the

escort surrendered and handed over the objects escorted—paid back the loan with interest, as Mr. Kuroda says.

Thursday, March 30.

The *Asahi* conjectures that the van of the Japanese army is now at Lienhwachieh which is 22 miles north of Kaiyuan on the Kirin high road. This refers to the eastern column. The central had marched as far as Shwangmiao at the date of latest official advices, which place is 13 miles north of Changtu; and the left column, having passed through Fakumun, and occupied Kingkiatun, has proceeded to a place some 17 or 18 miles further north. The gist of this is that the Japanese, so far as accessible intelligence indicates, are advancing up both sides of the railway with a front of about 28 miles. But this does not take account of the Hsingking column, about whose progress no exact details are published, though the indications are that it is advancing by the Kirin highroad from Hallunching. We must not expect any official reports of what is going on unless a fight occurs of sufficient magnitude to call for special notice and, on the whole, that does not seem to be anticipated in the near future. The Russians appear to be making no attempt whatever to offer organized resistance to the Japanese advance. They are reconnoitering the enemy's progress and sometimes making a show of posting weak rear-guards, but it may be inferred that the immediate programme of Linevitch is to put the utmost possible distance between himself and his pursuers, and to fight his first battle somewhere in the Sungari valley with Harbin for base.

A telegram from Peking to the *Nichi Nichi Shinbun* suggests that the Russian plan includes the march of a strong force from some point on the railway between Harbin and Lake Baikal across the two Mongolias so as to emerge near Petuna. This would be one of the most stupendous flanking movements on record, and how an army could be supported throughout such an advance we can not conceive. It would be traversing regions almost wholly unproductive, and would consequently have to rely entirely on supplies obtained from Russia. In other words, for the purposes of such an army, a large part, if not the whole, of the railway service would have to be tapped at some point far westward of Harbin, and the latter, with all the troops whose base it now forms, would have to become independent of this means of communication. Of course could the operation be undertaken it would have great strategic importance, for the obviously weak feature of the Russian situation at present is that unless Harbin be abandoned the danger of its isolation will be imminent. The Russians are now retreating along the Chinese Railway but with their front parallel to the Baikal-Harbin line. Evidently, therefore, an outflanking movement on their west, might interpose between Harbin and Baikal and thus cut off the whole of Linevitch's army from its home bases. If Linevitch is strong enough to extend his right so as to guard against such a ruinous contingency, then he must correspondingly weaken his left, or, in other words, abandon all the Kirin district. Even then the situation would be full of peril for him if he attempted to cling to Harbin. A secondary army marching across Mongolia and threatening the Japanese left, would greatly change the situation. But whence is such an army to be procured, and how long must elapse before it can traverse the immense areas of

arid deserts that now separate it from the field of operations?

Governor-General Tseng seems to have at length found the peace so long denied to him. The Japanese are treating him in a manner very different from that pursued by the Russians, and he is said to have telegraphed to Peking unstinted expressions of satisfaction.

Field-Marshal Oyama's entry into Mukden on the 15th instant was an affair of great splendour. General Tseng went out of the city to meet him, and all things were arranged after the method adopted by General Baron Kodama on the occasion of his official entry into Taihoku in Formosa. The order of the procession was this:—(1) a force of cavalry; (2) a band of music; (3) a guard of honour; (4) the Field-Marshal; (5) a guard of honour; (6) the Field-Marshal's staff; (7) the foreign military attachés; (8) the Chinese attachés and officers; and (9) a large force of infantry. The whole line of procession is said to have been guarded by soldiers numbering from forty to fifty thousand. News of the capture of the Tichling position reached Mukden during the course of the day and added materially to the rejoicings.

We read in the *Kokumin Shinbun* that from the beginning of the Battle of Mukden until the capture of Tichling, a period of 29 days, the total casualties on the Japanese side have now been ascertained to be between 56,000 and 57,000, of whom the killed are a little over 10,000. There is no reason to suppose that on the Russian side the ratio of wounded to killed was less than on the Japanese. On the contrary, as we have often pointed out, the Russian rifle, which carries a heavier projectile than the Japanese, is proportionately more deadly. It would follow, then, that if the Japanese had 46,000 wounded to 11,000 killed, the Russians must have had at least 113,000 wounded to 27,000 killed. What has become of all these wounded? Is it conceivable that they were despatched northward by rail in the very few days available for such a purpose, days of stress and confusion? This is one of the most interesting features of the campaign. If the railway performed such a service, it must be capable of hitherto unconceived feats.

It turns out that three regimental flags, not two, were taken from the Russians in the Battle of Mukden. They arrived in Tokyo on the 28th instant. One of them is quite scathless. The two others have broken staves and show various evidences of the terrible circumstances under which they were captured.

Major-General Maeda died on the 28th instant, in consequence of wounds received in the Battle of Mukden. He was raised to the rank of Lieut.-General before his death. This is the first instance of an officer of General rank dying from wounds received in action during the present war.

We learn that Major Yamaoka, who was wounded at the same time as Colonel Shiba in the Port Arthur trenches, will be completely blind in consequence of his injury. The bullet passed from temple to temple, severing the optic nerve. No apprehensions of a fatal result are entertained unless symptoms of which there is at present no indication supervene, but very great sorrow and sympathy are expressed on all sides. The Major was an officer of the highest promise, an accomplished linguist as well as a distinguished soldier. It will be remembered that he had been constantly employed to convey communications between the besiegers and the besieged.

In the interval of 10 days between the 18th and the 28th the following Russian prisoners reached Japan and were distributed as shown:—

	Rank and		
	Officers.	File.	Total.
Ninoshima .....	128	12,263	12,391
Matsuyama .....	8	149	157
Fushimi .....	—	1,180	1,180
Otsu .....	—	1,500	1,500
Kokura .....	30	29	59
Narashino .....	—	2,020	2,020
Fukuoka .....	—	800	800
Kanazawa .....	30	2,080	2,110
Total .....	196	20,021	20,217

All authorities are now agreed that the main cause of the Russians' defeat at Mukden was their mistaken notion that the chief Japanese attack would be delivered on the east not on the west. With that idea they massed great forces on the east, but discovering their error they moved these men back at high speed and thus brought them into battle in a greatly wearied state, to say nothing of the demoralization that inevitably results from such marching and counter-marching.

We are precluded from entering into any detail as to the methods adopted by the Japanese for engendering the above misconception, but we may mention that they entailed the march of a column from the Yalu into the Hsingking district, in other words, the organization of a line of communications and transport some 200 miles long in mid-winter. This feat seems to have been performed with complete success, and it is certainly not one of the smallest achievements of the war.

Friday, March 31.

It is stated that when Mukden was taken there were found there ten Japanese women. Four of them could speak Russian and were accordingly employed as interpreters. For all her gentle self-effacing ways the Japanese female can not be said to lack enterprise.

A party of Russian female nurses, numbering some 70 or 80, attempted to escape from Mukden on horseback, but their services being much needed for the purpose of ministering to their own wounded countrymen, they were detained.

Fushun, though a walled town, is a very small place. We read that there are only 200 houses inside the enclosure and 300 outside it. The latter should be spoken of in the past tense for they suffered so severely in the battle as to lose their habitable capacity.

At about 11 miles westward of Fushun on the road to Machuntan the Russians had a big bread-baking establishment. They set fire to it when retreat became inevitable but the conflagration is said to have been only partially destructive. Great quantities of baked bread and of materials for making it were taken.

There are various rumours about the mysteriously spirited-away artillery. One informant alleges that many of the guns have been dug out. Another states that the number thus found is insignificant—only some six in all—and the rest are believed to be reposing at the bottom of the Hun. The water, however, is still too cold to permit careful investigation.

It is stated that arrangements are being made to levy taxes in the Mukden district. In order to avoid needless trouble, the plan is to make these taxes supplementary; that is to say, to levy them by way of an addition to rates already in operation. The proceeds are expected to amount to some two million yen yearly.

## JAPAN'S NEW LOAN.

It is stated that the subscriptions to the new domestic loan will exceed five times the amount required. Again in this context the question of subscriptions by foreigners is raised. Rumour recently put the total of such subscriptions at over 50 million yen, but a much more credible version is that they reach 20 millions. Messrs. Samuel Samuel and Company are said to have offered for 5 millions worth of bonds at something over 91. On the other hand, there still prevails some idea that the Government entertains an objection to foreign subscriptions being mingled with domestic. Even the *Jiji Shimpō* evidently views that statement as credible and is at some pains to combat the supposed reasons of the Treasury's reluctance. But it appears to us that much more credence attaches to the *Kokumin Shinbun's* version, namely, that the financial authorities, so far from objecting to foreign subscriptions, welcome them heartily. They have, however, thought it expedient to emphasise some facts which may possibly be overlooked by the subscribers and which, if overlooked, would be a source of future trouble. These facts are that a subscriber does not necessarily receive the full amount for which he tenders: he only receives a *pro-rata* amount; that the interest and principal of domestic loans are not paid abroad as is the case with foreign loans; that the bonds of domestic loans are not endorsed, as is the case with those sold in the Occident, and that foreigners subscribing to a domestic loan are in all respects on the same footing as Japanese. To avoid any possibility of misconception the Treasury has thought it advisable to direct attention to these facts—a prudent precaution, we venture to think. Probably that is the whole story. The *Jiji*, we observe, always liberal in its views and arguments, urges that the Government should endorse all the bonds. The same contention was advanced some months ago by Mr. Taguchi in the *Keisai Zasshi*, and was noticed in our columns. But there is one thing to be said. To endorse the domestic bonds would be a levelling-down process instead of a levelling-up. Endorsement would gladly have been avoided in the first place. It was conceded by Count Matsukata as a kind of necessity in order to secure the sale of the 40 million yen worth of war bonds negotiated by Messrs. Samuel Samuel & Company. If to-day foreigners are willing to purchase Japanese bonds without endorsement, why endorse? That seems an obvious consideration. Mr. Taguchi's contention is that endorsement would open the foreign market to all the bonds now held by Japanese subjects, and would consequently produce a great enhancement of price. But it would also produce a great depreciation in the prices such securities now command in Europe.

The new foreign loan has been arranged on very favourable terms; namely, 4½ per cent. interest; selling price 90; amount 30 millions sterling; the loan to be redeemed for 5 years, whereafter to be redeemable at any time according to the convenience of Japan, provided it be wholly redeemed in 20 years (including these 5 years); finally, the security to be the tobacco monopoly. London and New York finances the major part of the loan, but Berlin has some small share. The German capitalists are understood to have been willing but apparently they were forestalled.

Of course this is a great triumph for Japan. Such a transaction amounts to a very solid

demonstration in her favour—a demonstration which gathers additional significance from the fact that Russia is no longer able to obtain any money in the foreign markets.

With regard to the new foreign loan of thirty millions sterling, it may be well to re-state here the exact figures, namely:—

Amount of Loan.	30 Million Sterling.
Places of flotation	London and New York.
Rate of issue	£90.
Rate of Interest	4½ per cent.
Period	20 years.
Period prior to commencement of Redemption	5 years.
Security	Tobacco Monopoly.
Dimensions of bonds	£100, £200, and £500.
Rate of Exchange	\$4.87 per £1.
Period of Subscription.	March 1905 to July 1905.
Net amount received by the Japanese Treasury per bond	£86.15s.

The comparison between this loan and the two former loans is:—

	First Loan 6 per cent.	Second Loan 6 per cent.	Third Loan 4½ per cent.
Price of Issue	£93.10s.	£90.10s.	£90.
Actually received	£90	£86.15s.	£86.15s.

Turning now to the question of financing the war for the current year (April 1st, 1905, to March 31st, 1906), we have the following figures:—

Amount called for by Budget irrespective of increased taxation	Yen. 571,000,000
Second Foreign Loan raised in December, namely 12 millions sterling	Yen. 117,156,000
Fourth Domestic Loan now in process of being raised	100,000,000
Third Foreign Loan of thirty millions sterling	292,890,000
	510,000,000
Deficit	60,954,000

Further we have to consider the differences between the nominal amounts of the various loans and the actual sums received by the Treasury. The results are:—

	Yen.
Difference on the First Domestic Loan	5,000,000
" " Second	8,000,000
" " Third	6,400,000
" " Fourth	10,000,000
" " First Foreign Loan	6,345,950
" " Second	11,129,820
" " Third	29,289,000
Total	76,164,770

Thus we arrive at the fact that in order to round out its estimate for the year 1905-6, the Government will have to raise a further sum of 137,118,770 yen, namely:

Deficit in first table shown above	Yen. 60,954,000
Deficit in second table shown above	76,164,770
	137,118,770

There can not be any difficulty in obtaining this amount. Already 100 millions of it have been promised by the banks, which means 90 millions actually received, leaving only 47,118,770 to be raised. That is a mere bagatelle, and therefore we may fairly say that the war is financed for the whole of the current year so far as Japan is concerned.

The Tokyo press is unfeignedly pleased with the result. Each of the previous foreign loans evoked some expressions of dissatisfaction, but nothing of the kind is heard on the present occasion. There is, indeed, some little regret that security should have been necessary, but the newspapers agree that in view of the circumstances as well as of the fact that security had to be given in the case of both the previous loans, the present arrangement was inevitable. It is naturally noted that Russia's

attempt to float a five-per-cent. loan in Paris at 90 was not successful, and that Japan may thus congratulate herself on having been victorious not on the field of battle alone but in the realm of finance also.

We read in the *Shogyo Shimpō* that in addition to England and America four other countries have subscribed for part of the new Japanese loan. The allotments are:—

Hamburg	1 million sterling.
Amsterdam	500,000 pounds sterling.
Brussels	500,000
Switzerland	500,000

The subscriptions for the Japanese Domestic Loan commenced on the 26th, and during the first two days the applications totalled 105,272,800 yen, of which 13,441,500 was above the selling price. This is the best result hitherto attained.

A telegram to the *Shogyo Shimpō* says that the Japanese loan just floated in London and New York has been a signal success. Competitive offers to subscribe were received before the opening of the lists, and a message sent from London on the night of the 27th says that the bonds are already at a premium of 1½ per cent. Another telegram dated the 28th says that the premium has risen to 1.8 per cent., and that the number of subscribers is very large. The 29th was the day for issuing the prospectus and inviting public subscriptions but the list will have to be closed on the first day, when the applications will be many times as large as the amount required.

A telegram was received in Yokohama on Thursday, from Mr. J. T. Hamilton, now in New York, that the Equitable Life Assurance Society of the U.S. has subscribed one million pounds sterling to the new Japanese loan.

The Russian foreign loan seems likely to enter the category of the Baltic Fleet and the peace rumours. The other day we were positively assured by telegraphic agents generally trustworthy that the Paris bankers had definitely declined to float the loan. Then came a not very probable story that they had yielded to governmental pressure—not very probable, because financiers are little likely to part with their money to a foreign borrower merely because their own officials advocate such a step. Now, again, comes a telegram to the effect that the bankers retain their obdurate attitude.

From the same source (*Hoch's* London telegrams) it is asserted that Russia has asked France to use her good offices for the purpose of discussing terms of peace. Did St. Petersburg make up its mind that peace is necessary, it would very likely solicit France's good offices, but we have to remember that immediately prior to this last tale the most unpacific mood was attributed to the Tsar and his trusted advisers. The only recourse is to believe nothing until we have it officially. We may mention here that quite elaborate stories are published in Tokyo about this question of peace, but they do not seem worth reproducing, still less discussing. Some prospect of early peace appears to be suggested by quotations for Japanese securities in London, and by a marked rise of prices all round in the Japanese share market. But we have seen these things happen previously.

## COUNT OKUMA AND MAJOR-GENERAL NAGAOKA.

The last meeting of the *Toyo Kyo-kwai* was interesting. It opened with the performance of a ceremony in *memoriam* of Count Soyemima, the founder of the Society. Count Okuma subsequently addressed the meeting. He alluded to the telegraphic rumour that the Emperor of Germany had avowed an intention of abandoning his *welt-politik*, which announcement, if true, would certainly conduce to the cause of peace. Passing on to speak of the new foreign loan, the distinguished statesman expressed satisfaction with its terms, as compared with those obtained on previous occasions, and remarked that only a very little more would completely equip Japan with finances to carry on the war until the end of next fiscal year (31st March, 1906). The country might reasonably congratulate itself on success in the field of finance as well as in that of war. But the reasons for congratulation might easily disappear if there were any undue elation or if any disposition for extravagance resulted. Never had there been a time when greater need existed to remember the wise old adage *katte kabuto no o wo shimero* (tighten your helmet in the hour of victory).

Major-General Nagaoka, Vice-Chief of Staff, who enjoys a high reputation in Japan, spoke at some length. He dwelt upon the difficulty of reconciling representative institutions and the exigencies of warfare. In a constitutional country the administrators of affairs have to consult public opinion at every stage, and have to court the confidence of the nation by the utmost frankness. But in conducting a war, generals and staff-officers have to act in accordance with altogether autocratic principles. They have to make their plans in entire independence of public opinion and they have to hide everything as much as possible from public observation. Nothing shows more clearly how hard it is to reconcile war with the doctrines of civilized progress. And this concealment is a matter of the greatest difficulty; has become, in fact, additionally difficult in consequence of that very progress. For whereas in ancient times captains could take the field without any preliminary preparations on a conspicuous scale, being assured of obtaining supplies by methods then practicable but no longer so, enormous stores of every kind have to be collected in advance now-a-days, and the arrangements for their transport furnish clear indications of what is projected. The same is true of arms. A soldier used formerly to count on his sword, or his lance or his musket as sure to outlast a campaign, whereas the comparatively delicate weapons furnished by present-day science and the immensely increased strain to which they are subjected, shorten their serviceable life and necessitate a provision of duplicates or even triplicates. All this involves publicity inconsistent with successful strategy. On the other hand, the expenditure of life and treasure is vastly greater than it ever was before, and a correspondingly heavy responsibility falls upon those charged with the duty of conducting a war. It is essential above all to be in a state of perpetual readiness. The education of the officer stands at the head of the list of requirements. He must be a man not only familiar with every detail of his profession, but also capable of commanding respect and confidence in time of peace no less than on the field of battle. In one thing Japan is fortunate: there has descended to her sons a special moral legacy which has great value in the stern pursuit of arms. But

that is only one element: an element of little worth unless it be supplemented by thorough education and by a constantly operative conviction that though the whole of a military man's career may pass without hearing a shot fired in anger, the one absorbing business of his life must be to prepare himself for war. Japan has perhaps some right to be gratified that these principles have found practical application in the ranks of her soldiers and sailors, but the enormous efforts now demanded of soldiers, the great sacrifices they have to make even when successful and the vast burden of debt and mourning imposed upon the nation make it more than ever imperative to be prepared. Never did the experience of previous wars suggest the task that a soldier has now to perform or the numbers that have to enter the field. The battle of Liaoyang continued for 5 days and 460,000 men were engaged. The battle of the Shaho went on for 8 days and 580,000 troops took part in it. The battle of Mukden was a fourteen-days' combat involving 850,000 soldiers. These feats of endurance were never previously called for. It was never contemplated as possible or necessary that men should fight for 5 days, or 8 days, or 14 days consecutively, almost without rest and without proper food through these long periods. Such facts invest war with a new character of destructive vastness. But Japan, when she counts the terrible cost, has to remember that not military renown alone is in question. Peace for her sons and their sons; national progress; imperial security; the respect of the world—these are the great stakes for which the country is fighting.

## GENERAL KUROPATKIN.

It seems now certain that General Kuropatkin is to become the subordinate of the man he yesterday commanded. He is to change places with General Linevitch, the latter ascending to the captaincy of the whole three Russian armies, the former descending to the command of one of them. Kuropatkin will perhaps be applauded in the Occident. Though deposed from his high estate, he remains in the field to fight for his country. That is the first interpretation of his act that will suggest itself to onlookers. But there is another thought. Did he ask to be relieved, as the telegraph said originally. It said that he had represented himself as too weary to continue in supreme command and that he prayed the Tsar to give him rest. Everything goes to show that he was in urgent need of respite from incessant work and worry. Long before the great battle which obliterated his fame as a general, there had been rumours, gaining strength daily, that he was suffering from nervous prostration and that he had lost the capacity of framing a plan or a decision. If that were so, is he fit to take command of the first Army? Apparently he thinks so himself, and apparently the Tsar thinks so. What does the First Army think, we wonder. In the eyes of the officers and of the men constituting that force—which, before the Battle of Mukden, numbered 100 battalions of infantry, 30 batteries of artillery and 48 sotnias of cavalry—the incompetence of their new commander has been proved. He is a discredited Captain. They will not argue that because a supreme position is found to be beyond his capacity, a subordinate place may still be within it. They will say that he is a failure and that they are condemned to serve under a failure. It is a very strange appointment. We shall

be curious also to learn what the Japanese think. Their history contains a very similar instance. In the early part of the 17th century, when the Christian insurgents had assembled in Shimabara Castle and were defying all the efforts of Itakura Shigemasa to subdue them, the *Shogun* Iyemitsu, becoming impatient of these failures, appointed Matsudaira Nobutsuma to supersede Itakura. The fencing-master and adviser of the *Shogun* at that time was the celebrated soldier Yagiu. Learning what his master had done, he said at once:—"Then you have condemned Itakura to death. He will certainly not survive this humiliation." Iyeyasu, much perturbed, desired Yagiu to recall Matsudaira, and it is on record that Yagiu himself rode at full speed on the errand. He was too late. Before Matsudaira could be recalled, Itakura, learning what was in store, had made a desperate attack on the castle and fallen under a shower of the insurgents' arrows.

In the *Nippon* of the 24th we read a brief comment by Count Okuma. It is not surprising to find that there has occurred to Count Okuma's mind the same parallel from Japanese history as that noted by us, namely, the parallel of the Shimabara castle and Itakura's virtual suicide. Count Okuma regards it as the very acme of humiliation that General Kuropatkin should descend from the position of commander-in-chief to a subordinate post under one of the Generals who have hitherto been his own subordinates. Apparently that is the Russian method. It is a method incomprehensible to the Japanese.

## SAGHALIEN AND VLADIVOSTOCK.

A telegram to the *Nichi Nichi* from Vladivostock quotes Yuensan as saying that the Russian garrison in Saghalien seems likely to be withdrawn to Vladivostock as soon as the ice breaks up sufficiently to permit such a movement. We should think that this is very likely from a purely military sense, for it is plain that if the Japanese choose to stretch out a hand, Saghalien can not offer any appreciable existence. But is the whole establishment of convicts to be transferred to Vladivostock? It is understood that the so-called garrison of the island consists mainly of men taken from prison for the purpose. If these are to be added to the defenders of Vladivostock, we presume that their guards must go with them, and then what becomes of the remaining convicts?

Great efforts are being made to complete the defences of Vladivostock. It ought to be a very formidable fortress by this time. Already before the war broke out the place was understood to be second to Port Arthur only, and a whole year has been available since then to correct deficiencies and supplement previous plans.

## A VERSION OF THE JAPANESE NATIONAL SONG.

(COMBINED WITH ANOTHER JAPANESE COUPLET PROBABLY INSPIRED BY THE FORMER.)

Until this grain of sand,  
Tossed by each wavelet's freak,  
Grow to a cloud-girt peak,  
Tow'ring above the land;  
Until the dewy flake  
Beading this blossom's gold  
Swell to a mighty lake—  
Age upon age untold  
Joy to joy manifold  
Add for our Sov'reign's sake.

## GENERAL STOESSEL.

Concerning the accusations preferred against General Stoessel in connexion with the capitulation of Port Arthur, it is right to publish what that officer himself has said. We find in the Paris correspondence of *The Times* the following:—

Paris, February 11.

Several of the Paris newspapers sent special correspondents to Aden to interview General Stoessel at that port on his way home. The General arrived there yesterday morning on board the French steamer *Australien*, which left Nagasaki on the 17th ult. He was accompanied by his wife, seven generals, a vice-admiral, 138 officers, two popes, seven ladies, 144 soldiers, and six orphans from Port Arthur, who have been adopted by that most excellent woman and devoted wife, Mme. Stoessel.

*The Matin*, the *Echo de Paris*, and the *Journal* all publish long accounts of conversations with the General, who spoke to them through an interpreter, not being familiar with the French language. The correspondent of the *Matin* says he talks with a rough voice, and first of all expressed his great sadness at having to return home vanquished. "But," he added, "I am conscious of having done my entire duty, of having struggled to the end, in order that the fortress, the flag of which had been entrusted to me, should not fall into the hands of the enemy. The town could at the outside have held out four days longer. The ammunition that could be used and the provisions were almost entirely exhausted. It is true there remained 6,000 common shells, a few hundred high-explosive shells, and 2,000,000 cartridges—that is to say, next to nothing against the 11 in. guns of the Japanese—to defend a front of 25 kilometres. As to the men I had left, they mustered only 3,000 suffering from scurvy, stricken with illness and fever, obliged to fight sitting or lying down in the trenches where the dead could no longer be picked up; 18,000 were in the hospitals. The remainder were in their graves. For several months my men had had 200 grammes of horse meat a week. That was all their food, and to cook it we were obliged to give them machine grease. Since the month of September a single ship, the *King Arthur*, commanded by a French captain, and three junks, had succeeded in forcing the blockade. All of them brought me disastrous news from outside, telling me that no relief was to be expected. On September 20 a telegram from Kuropatkin reached me, saying: 'In three months I shall come to your rescue.' The three months elapsed, and I had no news either from Kuropatkin or Rodzestvensky. The garrison was physically and morally exhausted. The few remains of the fleet, the preservation of which was the only reason for resistance, were destroyed one after the other when 203 Metre Hill was captured by the Japanese."

General Stoessel here remarked that further resistance would have inevitably resulted in frightful carnage, which was what he wanted to avoid and what decided him to capitulate. "I acted without consulting anybody. I have to reckon with the judgment of the Tsar and of my equals. They will judge me, and they will say whether I ought to have accomplished the heroic but criminal deed of blowing up the fortress. I prefer having a smaller reputation in military records to having 300,000 human lives on my conscience."

In conversation with the General's subordinates, the correspondent of the *Matin* found them profoundly irritated with the conduct of Admiral Ukhomsky, to whose presumption they attributed the loss of the fleet. They were also much incensed with several other incapable general officers, and above all with Admiral Alexeieff, who had foreseen nothing and prepared nothing. The garrison was obliged, under the very fire of the enemy, to reconstruct most of the fortifications, which had been erected in a deplorable fashion. All of them were loud in their praise of General Stoessel's bravery, while also affirming that General Kondratenko was the real soul of the defence, and that with his death Port Arthur was lost. Smirnov and several generals were deeply affected on hearing of the capitulation. Notwithstanding the permission of the Tsar, they preferred captivity to returning to Russia.

In his conversation with the correspondent of the *Echo de Paris*, General Stoessel referred to the death of General Kondratenko as a great misfortune. Every day he invented something new for checking the advance of Japanese. At the moment of his death he was in a casemate with some officers talking over the employment of mines against the enemy. A Japanese 11 in. shell fell near them and General Kondratenko was killed, not by a splinter from the shell, but by the force of the explosion, which hurled him against the wall and fractured his skull. To this correspondent the General made light of the wound, of which he still bore the marks on his head. He spoke appreciatively of the courtesy shown him

by General Nogi, and described the bravery of the Japanese as extraordinary. A hundred thousand had been placed *hors de combat*. This figure was given to him by Ijichi, the Chief of General Nogi's Staff. If Russia recovered the command of the sea, Port Arthur might be recaptured. Otherwise, it would only return to Russia after her victory on land. "And," added the General, "you may be sure we shall be victorious."

It is plain that some flagrant mistake has been made somewhere. As to the figure here assigned to the General—namely, the "three thousand suffering from scurvy, stricken with illness and fever"—it would appear that a clerical error was committed by the French correspondents, and that the number really given by the General was 8,000. But even then how are we to reconcile such figures with the indisputable fact that some twenty-five thousand Russian soldiers were found in the fortress, not "suffering from scurvy and stricken with illness and fever," but stalwart, free from debilitating malady and able to make a long march to the railway station within a few days of the capitulation? Is it conceivable that these men were hiding somewhere beyond the ken of their officers, and that whereas Stoessel believed them to have perished, they were really enjoying good health? Stoessel surrendered in order to avert the perils that would have attended capture by storm. That is what he himself now declares, and what was understood from the first. Into such a form of surrender the element of judgment enters largely. Stoessel judged that the crisis had come. Others, reviewing his position and his residuum of capacity, judge differently. Perhaps that is as near the truth as we can reasonably hope to get.

With regard to General Stoessel's statement that there were only eight thousand effectives in the garrison of Port Arthur at the time of the capitulation and that eighteen thousand were in hospital, making twenty-six thousand in all, we have examined the statistics, and we find that at the end of February the number of Russian prisoners in Japan was 38,358. Of this total 3,631 had been in the country at the close of January, that is to say, prior to the capitulation. Consequently 34,727 were Port Arthur prisoners. To these must be added 1,286 (664 officers and 622 men) who were released on parole, so that we thus obtain an aggregate of 36,013 of all ranks, independently of those still remaining at Port Arthur. With regard to the latter, the following detail shows the state at the close of February:—

## IN HOSPITAL.

Men wounded in action .....	2,678
Typhoid cases .....	3
Dysentery cases .....	48
Scurvy .....	1,997
Various .....	240
Convalescent .....	119
Total .....	5,085
Sanitary Corps .....	1,308
Non-combatant officers .....	183
Popes .....	10
	6,587

Out of this aggregate the popes must of course be deducted, when there remain 6,577 as forming part of the regular garrison, and we thus obtain 42,590 as the number that were actually in garrison when the Japanese took the fortress. There can be no question about these figures. What becomes, then, of Stoessel's twenty-six thousand? The mystery is difficult to solve. His statement as to eight thousand effectives may have been based on an exceptional estimate of what constitutes an effective, but when he said that there were only twenty-six thousand in garrison whereas 42,590 actually fell into

Japanese hands, it is obvious that he laboured under some very strange misconception.

## A JAPANESE POLITICIAN'S EXPERIENCES

In the columns of the *Keisai Zasshi* Mr. Tsunoda Shimpei, the well known Progressist politician, writes interestingly about his experiences and observations in the Liaoting Peninsula, which he visited on the last occasion of the *Manshu Maru's* trip. Among other things he speaks highly of Dalny as an important centre of Japanese concourse. There all the wounded and sick were assembled, with the exception of those sent to Kiulienching. It was the 9th of January when Mr. Tsunoda passed through Dalny, and he says that the hospital returns showed a total of 118,279 men as having been admitted from the time of the place's occupation until that date. Of course it will be understood that these were not all Port Arthur casualties. Dalny, having been occupied immediately after Nanshan, received all those wounded in that fight as well as those wounded in virtually all the subsequent fights up to the Battle of the Shaho, together with the sick. The figure given is therefore not more than we should have expected. Among the above total of 118,279, the returns showed that 112,153 had been sent to Japan, while of the remaining 6,126, some had died and some were still in the Dalny hospitals at the time of Mr. Tsunoda's visit. The wounded sent to Japan are virtually convalescent: that is to say, their recovery is pretty well assured.

Mr. Tsunoda goes on to say:—"From Changlingtsz station, a journey of about 2½ miles takes one to Liushufang, where the head-quarters of the Third Army were. There I met General Nogi and his Chief-of-staff, General Iseji. Nogi said: 'I am deeply pained to have expended so many men and so much treasure. To the nation which I kept so long in suspense I can not excuse myself.' I heard that he had lost both his sons in battle and that it had been his own habit to expose himself frequently in the field. All felt for him and sympathized with him. Unfortunately the Chief-of-Staff and his inferiors were said to be not such universal objects of sympathy. Lieut.-General Oshima (Hisanao) commanded the Ninth Division, and his second-in-command was Major-General Nanazawa. This is the Division that blew up Urlungshan on the 28th of December. Some time previously it had captured Panlungshan and the Ichinohe Fort—a Division with a fine record. It had mounted two 28-cent. guns and caused the enemy no little loss. Visiting this Division, I was taken to the top of Wantai whence a wide prospect is commanded, and I was advised to content myself with that as there was not much more to see. On the way I saw two fish-torpedoes. The enemy had carried these to a fort and discharged them against our troops. They had wounded one man. You could infer the straits to which the Russians must have been reduced. On one occasion a captain of Russian artillery wrapped something in paper and threw it to our men. On the paper was written: 'I have a mother, and I want to let her know how I am. Will you not convey to her the fact that I am now in Port Arthur.' Enclosed in this was a sum of 10 roubles. To send the message *via* Shanghai would cost 27 roubles, so the Commander of the Division paid the other 17 roubles himself, and then wrapping a copy of the telegram round a stone, caused it to be thrown into the fort. At such close quarters was the fighting. By

and by an answer came from the officer. He said:—'My circumstances make it impossible for me to show my thankfulness, but I assure you that I shall never forget nor can I ever repay the joy it caused me to learn that you had telegraphed to my mother or the joy she must have felt on receiving the telegram.' That officer was in truth a European. A few days afterwards another weighted envelope containing 10 yen was thrown into our lines. But there was nothing written. An inquiry was therefore addressed to the Russians by the same means, and this answer came:—'Some days ago one of your soldiers (here followed a description of the man), after fighting splendidly, was killed within our lines. There were ten yen in the breast of his tunic, and we return the money. Use it for his benefit.' Such incidents occurred during the combat.

"One feature of the attack was very terrible—the digging of the approaches. A forlorn hope would be sent to do this work. It consisted generally of six men who had to cut through the hard rock in such a way as to avoid attracting the enemy's attention. The Russians were very close, and when their presence was detected, it was necessary to undermine them and blow them up. Repeated experience taught our men exactly how much power was required to produce a given effect, and their efforts thereafter proved very successful. It was a case of combined science and practice. When Umlungshan was taken the quantity of explosive employed weighed—*kwanme*. Imagine what the result must have been. But it was not an easy matter to manage such explosives. If the powder exerted its force in an upward direction only, the result was virtually useless. Equally so if it operated laterally only, and worse than useless if it blew backwards. No little labour and experimenting was needed before a satisfactory method was devised. As to the men engaged in the digging, each had a cord fastened to his foot. This cord passed out to the rear, and to it was attached the digger's name, so that if he was blown to pieces his identity might be ascertained. The attachment was made to the foot so as not to impede the work of digging with the arms. 'Hearing these things,' says Mr. Tsunoda, 'made me shed unconscious tears'. When Umlungshan was blown up in the sequel of these mining operations, over a hundred of the Russians were hurled into space and as many more were buried under the debris. \* \* \* After the taking of 203-metre hill an observatory was stationed there, and telephones were laid to the batteries of the First, Ninth and Eleventh Divisions where the 28-cent. guns were in position. By these telephones accurate information was constantly conveyed for the laying of the big guns, and that sealed the fate of the Russian ships."

#### KOREA.

The Korean Government is reported to have decided upon closing its legation in Peking and entrusting the charge of its diplomatic business there to the Japanese Representative.

The Japanese residents of Pyongyang have presented to the authorities a petition asking that, within the limits of military convenience, the Seoul-Wiju railway should be opened to general traffic. We presume that this line is now completed. It was expected to be finished at the end of the current month. The line from Seoul to Yuensan will be the next to be opened.

The bridging of the Tadong, a heavy job,

has been so far accomplished that locomotives can now cross.

Cho Pyongsik, who is not pleased to see the railways, posts and telegraphs of his country falling entirely under Japanese control, is said to have tendered his resignation on the ground of sickness. He is to be succeeded by Min Yonghwan.

A telegram to the *Asahi Shimbun* says that on the 26th instant the Cheungyak tunnel on the Seoul-Fusan Railway was finished, and that the Pusang tunnel was cut through on the 28th. The former is in Chhyunghyong-do, the latter in Kyongsando. Owing to the opening of these tunnels, through trains will hereafter run, one daily from either end, the new service commencing on April 1st. The train leaving Fusan at 8 a.m. will arrive in Seoul at 9.45 p.m., and the train leaving Seoul at 6.30 a.m. will arrive in Fusan at 8.15 p.m.

The British Representative in Seoul is said to be pressing for the grant of mining privileges in the Suan district of Hwanghaido. This application is made in the name of an English firm, but it is understood that the enterprise is a combination of English, Japanese and American projectors.

The railway bureau in Seoul having been broken up by the Government in connexion with its new scheme of administrative reforms, many foreign employees will be dismissed, including Mr. Oniya Chobei and five other Japanese. It is stated that the salaries paid by the Korean Government to foreign employees total some 200,000 yen annually, a fact due to the independent methods hitherto pursued in engaging these men, each Korean Minister being able to consult his own convenience in making appointments.

It is reported that on the 26th instant some Japanese cavalry videttes encountered a small body of Russian cavalry immediately north of Kilju and drove them back. These Russians are evidently performing scouting duty, but there are statements that 2 companies of Cossacks crossed the Tumen on the 10th and were followed by a force of about a thousand infantry with some cavalry, who are now posted at a point 2 versts north of Kyongsong. The videttes seen near Kilju on the 26th were doubtless reconnoitering on behalf of this force. It is not supposed that the Russians have any considerable body of men on the Tumen line, but whatever their number be they do not appear to be furnished with a commissariat train, at all events not a duly organized one, and the consequence is that they are obliged to live upon the resources of the district, to the no small embarrassment of the inhabitants. That, however, is an old story. For the rest, it is not apparent that the Russians have ever contemplated any serious operations in north-eastern Korea. Their purpose does not seem to extend even to covering Possiet Bay.

It is announced that seven Japanese subjects, who had left Yuensan on a shooting expedition, were murdered by Korean freebooters on the 19th instant. The Koreans are spoken of as "incendiaries" (*Kwasoku*), a term frequently applied of late to a troublesome class of law-defiers in the peninsula.

The Korean Government is said to have arranged for the despatch of another party of 50 or 60 students to Japan next May or June.

With regard to the proposed transfer of all postal and telegraphic offices in Korea to Japanese control, the Seoul Government seems to be hesitating, and Mr. Hayashi is

said to be pressing for a definite reply. It is understood that the measure is considered essential for military purposes.

The celebrated Yong Anpho is to be opened to foreign trade. This step is said to have received the concurrence of the Korean Government. Three engineers, Messrs. Wada, Hida and Miyagawa, with ten assistants have been sent to the place to make surveys for purposes of harbour improvement. It will be fresh in our readers' memory that when, in 1903, proposals were made by Japan for the opening of Yong Anpho, the Russians strenuously opposed any step of the kind on the ground that it would be inconvenient pending the final adjustment of the Manchurian question. That meant to defer the opening to the Greek Kalends, but the reluctance of St. Petersburg was easily understood in view of the reputed personality of the owners of the Valu timber-felling concession.

Japanese papers state that the combination formed for working the Suan mine consists of an English firm whose name appears to be "Harse" or "Barse," and that the United States is represented by Messrs. Collbran and Bostwick, and Japan by the Mitsui Bussan Kaisha. That should be a strong combination.

The Korean Envoy, Li Chai-hak, whom Korea is sending to congratulate Japan on the Mukden victory, left Seoul on the morning of the 29th for Fusan, where he was to embark on the 30th in a Government transport. It is understood that this Envoy will be lodged at the Shiba Detached Palace during his stay in Japan. Hitherto quarters have been assigned to Korean representatives in the Seiyoken Hotel at Ueno. Mr. Kato, adviser to the Korean Government, is to accompany the envoy.

#### TIBET.

According to a telegram to the *Asahi* from Peking, Tang Shaoi has informed the Chinese Government by wire that the Anglo-Tibetan convention has been amended so as to contain several new provisions. It now consists of 15 articles, the gist of which is:—

- 1.—Tibet will be under the joint protection of England and China. In the event of any disturbance occurring there the two countries will send troops and will employ them to restore order. No other country, even though it has merchants in Tibet, shall be entitled to send troops under pretence of protecting its trade.
- 2.—It is of course understood that the Tibetan Government has competence to appoint, promote or degrade, its own officials, but England and China has executive rights.
- 3.—When reforms are considered necessary in the government, finances or other matters in Tibet, conference shall be held with the Minister Resident, and no other country shall be allowed to take part.
- 4.—Land in Tibet, whether owned by Tibetans or by Chinese, shall not be either sold or leased to foreigners (other than English or Chinese). Neither shall foreigners be allowed to share in railway concessions, mining concessions or telegraph concessions. If England herself contemplates engaging in these enterprises, she shall approach the Chinese Government and shall take joint counsel of the Tibetans.
- 5.—The open marts shall be increased.
- 6.—The provisional convention of the 19th year of Kwangsu is annulled.

The other provisions do not differ greatly from those of the previous Convention, but it is not certain that some omissions may not have taken place in telegraphing. With reference to the objectionable term "joint protection of England and China," it has been condemned and detailed instructions have been sent to Tang.

## THE PRISONERS.

The *Official Gazette* says that the number of Russian officers released on parole at Port Arthur, carried thence to Nagasaki and sent on their way home, from January 10th to the end of February, was 664, and that to them were attached 622 rank and file, making 1,286 in all. Further, there proceeded to Russia from Nagasaki 9 priests, 11 surgeons, 122 women and children, 4 servants and 5 porters. The detail as to the principal of these paroled prisoners was —

Lieut.-Generals .....	2
Major-Generals .....	4
Colonels .....	12
Lieut.-Colonels .....	38
Rear-Admirals .....	3
Captains (Naval) .....	6
Commanders (Naval) .....	20

Among the number were six nobles, namely 4 Princes and 2 Barons.

A batch of Mukden prisoners numbering 620, passed Omori station on the 25th instant *en route* for Narashino. They are said to have been a very motley crew. Some were wearing Chinese clothes, some had only red shirts and some wore jerseys. That they had long been unacquainted with soap and water was a fact indisputably announced to the olfactory organs of the bystanders. The people in the vicinity of the station did what they could to supply the men with hot water, tea and tobacco, for which attentions the Russians seemed very grateful.

General Fock, who is now a prisoner at Nagoya, is said (*Hochi Shinbun*) to have been incredulous at first as to the magnitude of the Mukden defeat, but careful perusal of the Japanese newspapers and the official reports, which he caused to be translated, convinced him finally. The intelligence evidently caused him much surprise and profound disappointment. Above all he lamented the removal of Kuropatkin from the supreme command. His verdict about Kuropatkin is that the latter had the confidence and love of all the forces and that he is the most competent commander Russia now possesses. Linevitch is a good fighter, an efficient man in the field, but not a captain of large armies. General Fock thinks that if Kuropatkin could not save the situation, no one could, and he regards the outlook as very black.

Seven hundred Russians from the Mukden region passed Hiranuma at 11.24 a.m. on Sunday on their way to Narashino and about the same number passed on Monday. An enormous crowd was present at Hiranuma station who were probably familiar only with Russian soldiers as shown in the windows of picture-shops. The Japanese assembled gave cheers of *banzai*, to which the prisoners for the most part responded with military salutes. Cigarettes, tea, etc., were presented to the strangers, many ladies joining in these courtesies. Some of the Russians could utter a few words of Japanese, and the words "*arigato*" and "*Yokohama*" were frequently used, those who possessed such linguistic ability prompting their comrades to acknowledge the gifts.

It may be added that according to the *Notae Prehyn*, translated by the *Nichi Nichi*, Japanese prisoners in Russia are viewed by the people with such aversion as leprosy-stricken visitants might awaken.

The *Official Gazette* says that the number of prisoners who reached Japan and were distributed in various districts from January 1st to February 28th was 34,461, including 500 officers. These must all have been prisoners taken at Port Arthur or in the siege operations. The figure independently calculated by us and published in our issue

of the 28th was 34,727, so that the two totals are virtually identical, the difference being 266 men. Adding to the official 1,286, who were released on parole, we get a total of 35,747, independently of those remaining in hospital, namely, 6,577.

## THE PROGRAMME OF LINEVITCH.

General Linevitch, the telegrams say, is not to receive any strong re-inforcements, but will have drafts sufficient to stiffen his units and will be instructed to pursue a Fabian policy. In other words, his army will not be raised to such strength as would warrant him in engaging the Japanese. His business will be to avoid a battle and to remain at the head of a force *in esse*. This, we presume, is the old "luring on" game. But how is it to be played? Luring on has hitherto been supposed to mean enticing the Japanese to a long distance from their base and then giving battle to them at a point where they would have difficulty in exhibiting their full strength. Always, however, there has been included the conception of battle sooner or later, and always Harbin has been regarded as the limit of retreat. But Linevitch can not make an effective stand at Harbin with forces which have been merely "stiffened." His Fabian tactics will have to be carried beyond Harbin, carried westward in the direction of Lake Baikal, and in that event it is hard to see what there will remain to fight for. Harbin lost to her, Russia would have to organize outside Manchuria if she contemplated the recovery of her position there, and for that purpose a colossal scheme of mobilization would be required. But there is to be no mobilization on a large scale, we are told. Thus we arrive at an impasse in either case, and the impression produced is that Russia is perplexed to form any practical programme whatever. She is merely drifting. If the season were on the verge of winter some intelligence might be read into the Fabian policy, but to say that on the threshold of the spring, when seven months of fighting time are directly ahead, the Russian Government has decided to refrain from attempting to put into the field any army capable of engaging the Japanese, is to say that the great northern empire acknowledges itself beaten. The Japanese will not be slow to take advantage of such strategy. They are two months ahead of their last year's time, their organization is complete, and their big army is made up of victorious veterans. That they will have left to Russia by the end of the season anything worth fighting for, is not likely.

## FORMOSA.

An expedition against the Formosan insurgents in the Taihoku district was undertaken on the 24th instant. A body of 150 police marched against the rebels. The police had three men killed and seven wounded. They inflicted heavy losses on the insurgents, and destroyed their village.

Pest has broken out in Gilan, Taihoku, Shinchiku, Ensui and Kagi in Formosa. From January until the 22nd instant there were 622 cases, of which 563 ended fatally. Strenuous measures are being adopted to prevent the spread of the disease.

The Formosan officials telegraph that on the 24th instant an expedition was sent against the insurgents' hamlet of Sawarai in the Taichu region, a place which had

long given much trouble. There were despatched a force of police accompanied by some gendarmes and by a body of native volunteers. The insurgents were driven out. Two were killed, and five wounded were left in Japanese hands, but the number of the hurt is believed to have been much larger than this record suggests. A large part of the hamlet was burned. On the Japanese side one policeman and three volunteers were killed, and there was a total of seven wounded.

## THE REV. WALTER WESTON.

By the French Mail steamer *Tourane* the Rev. Walter and Mrs. Weston left for England. Mr. Weston leaves a gap as a preacher, a missionary, an athlete and a philanthropist which will be hard to fill. As a mountaineer he has explored some of the most inaccessible of the Japanese Alps and we are pleased to hear that his book "Mountaineering in the Japanese Alps," has lately been brought to the notice of the Emperor and obtained his august approval. Mr. Weston was a splendid exemplar of what Charles Kingsley taught us to call muscular Christianity and he was ever ready to lend his services to the Y. C. & A. C. or to the Y. A. R. C. in training their men for the sports or the regattas. To the many who have counted it a privilege to make his acquaintance during the past few years it will come as a painful shock that there is little probability of his returning to Japan to labour. A distressing infirmity of the eyes compels him to leave these shores and forbids him the hope of returning except for the briefest interval. And the regrets of the foreign community on this score will be shared by large numbers of Japanese who remember with gratitude his indefatigable and unselfish labours during the Awomori famine, when he distributed the fund subscribed so liberally by the foreign residents. To Mr. and Mrs. Weston we heartily wish *bon voyage*.

## MR. ARIGA ON MANCHURIA.

Mr. Ariga, the eminent Japanese expert on international law, has written a book called "Manshu Imin Tochi-ron," or the question of delegated administration of Manchuria. We have not seen the work, but the gist of Mr. Ariga's argument is given in the columns of Tokyo journals. He assumes that after a certain measure of military operations the Japanese will give rest to their arms, and then the problem must be faced of the future of Manchuria. Pending an international settlement, he would have Japan occupy the country for garrison purposes (*shubi senryo*), with the ultimate view of inducing the Chinese to delegate to her such sovereign power as would suffice to administer the affairs of the three provinces and to guarantee them against any renewal of Russian aggression. In the way of such an arrangement stand Russia's conventions with China, which conventions the latter will naturally be disposed to observe, and which, at any rate, can not well be abrogated without Russia's consent. Until such consent be obtained Japan could continue her garrisoning occupation, a condition which could probably induce Russia to accede to the less drastic settlement suggested by the title of the book.

## CHINA.

A telegram to the *Asahi* from Shanghai alleges that there is an insurrection in Szchuan in the Changting district. The I-ho-chwan are with the insurgents whose motto is "down with foreigners." The battalions of troops sent to quell the riot have been defeated and re-inforcements are now being despatched.

In the *Nichi Nichi* we read that the Viceroy of Nankin has issued instructions that one or two medical students shall be sent from each town under his jurisdiction to study medicine and surgery in Japan. This seems to be one of the wisest moves yet made in China. The Chinese have now in their Japanese neighbour's territories schools of medicine and surgery not inferior to those existing in Western countries, whereas in China itself the healing art remains much where it was a hundred years ago.

The *Novoe Vremya* wants to know why the Chinese troops do not prevent the Japanese from carrying provisions by the Shanhaikwan-Hsinmintun railway. The *Choya Shimbum*, to which its Russian contemporary's complaint is telegraphed, wants to know why the *Novoe Vremya* did not advance this contention when the Russians were carrying stores by the railway, as they did continuously so long as they were in occupation of Mukden.

The editor and certain members of the staff of a Chinese newspaper published in Shanghai have been arrested for vilipending the Empress-Dowager and the Manchurian officials, and for advocating an anti-foreign policy. The telegram (*Asahi*) predicts a repetition of the *Sipao* affair.

The Chinese Representative in St. Petersburg is said to have telegraphed to Peking that the Russian Government is planning the despatch of a new army of 300,000 men to the Far-Eastern field. One part of the Army is to be moved across Mongolia, so as to contain the Japanese left, and His Excellency Hu advises that the Chinese Government should be prepared against this contingency. If Russia begins to march armies through Chinese territory, a new development of the situation will take place. But is such a thing possible?

It is stated by telegraph (*Asahi Shimbum*) that by the request of the Governor of Shantung, Baron Seckendorff has been appointed adviser to the Shantung administration and the appointment has been imperially sanctioned.

A categorical denial has been published of the statements recently made on apparently good authority, that the Germans had posted troops along the line of railway in Shantung; that they interfered in the selection of an official for the post of Governor of the province, and that the German Representative in Peking required the new Governor to repair to the capital to meet him. The German newspaper of Shanghai declares these allegations to be wholly groundless.

The *N.-C. Daily News* translates the following notes from Chinese papers:—

H. E. Yu Yu-mei, Director-General of Northern Railways, is now, according to a Tientsin dispatch, touring the Liaohsi region outside Shanhaikuan, inspecting the Chinese Railway in that vicinity. It is, however, reported that his Excellency is studying the condition of Southern Manchuria, or Fengtien province, and there are indications that the Central Government may appoint him to reorganise Manchuria, at the end of the present hostilities.

It is stated from Peking that the Japanese troops

in Hsinmintun have also taken charge of the telegraph office there, and upon a remonstrance being made to the Japanese Minister by the Waiwupu, his Excellency replied that had the Russians respected Chinese neutrality and kept away from Hsinmintun, the Japanese troops would never have entered that town or any neutral territory. One of the reasons of the presence of Japanese troops in Hsinmintun was because the Russians had been using the Chinese telegraph office there in a way hostile to Japanese interests, in consequence of which the Japanese Minister declared the troops of his country were compelled to take charge of the office to prevent any further repetition of previous conditions.

A Chinese syndicate with a capital of Tls. 300,000 is on the point of starting a steamboat line between Shanghai and Shaohsing, in Chékiang province, the name to be the Pao Ta S. N. Co. A thousand-ton steamer, to be named the *Shaohsing*, is being now built in Hongkong for the company and is expected to be completed in a short time. This steamer will run on the coast from Shanghai as far as the small seaport town of Lihaiso (belonging to Shangynhsien) and connect with steam-launches running inland between Lihaiso, and the towns of Hsiaoestefu, Hsin-fut'ou, Sanchiangcheng, etc., all belonging to the prefecture of Shaohsing.

At the annual meeting of the Shanghai Tug and Lighter Co., Ltd., it was decided to accept the recommendations of the directors, pay a final dividend of 3½ per cent on the preference shares, making 7 per cent for the year; 5 per cent, or 6 per cent for the year, on ordinary shares; place Tls. 25,000 to a fund for the insurance by the company themselves of some of their property, and carry forward the balance of Tls. 43,763.68. The net profits on the year showed an improvement of Tls. 13,220. Warm tributes were paid to the work of the agents and staff and a bonus of ten per cent on their wages was voted to the latter. The usual ten per cent bonus to contributors of business for the six months ended the 31st of December was also voted.

During the insurrection at Huiyuen, Kwangsi, last year, the likin stations there were temporarily removed to Chingyuenfu. Now that the situation has been pacified, all the Hunan, Cantonese, Yunnan, and Kiangsi native merchants at Chingyuenfu have protested to Viceroy Tsen Chen-hsuen against the increase of likin stations on the ground that they have been reduced to a poverty stricken condition and that Chingyuenfu has been subject to repeated calamity and is desolate.

The Peking officials hold an adverse opinion in regard to the foreign loan intended to be contracted by Fukien with the Foochow Dockyard security.

The Veterinary College at Paoting is to have two more instructors, one a Japanese Veterinary Surgeon, and the other a Chinese officer named T'ang Cheng, who learnt his profession in Japan.

The Nanyang College has been formally reopened in the presence of Mr. Yang, an official belonging to the Shantung, or Ministry of Commerce, which reminds the *North China Daily News* that the Nanyang College has been renamed the Commercial College of the First Class, owing to the institution being now under the direction of the Shantung and not the Nanyang Administration. The students, at present muster over two hundred. The faculty of the College remains the same as it was last year, but several Japanese instructors are expected next month to supplement the present staff—a much-needed increase, as the staff of instructors has hitherto been much too small.

The campaign against mosquitoes in Hongkong has reduced the death rate there from malaria by one-half.

Much regret has been caused at Nanking by the receipt of a cablegram announcing the death in America, on the 12th instant, of Mrs. E. H. Hart, of Wuhu. Mrs. Hart, who was born in Hamilton, Ontario, Canada, was married, just prior to her departure for China, to Dr. Hart, whose father, Dr. Virgil Hart, was for many years the Superintendent of the American Methodist Episcopal Mission in Central China, and subsequently the pioneer of the Canadian Methodist Mission in Western China. Mrs. Hart spent the whole of her missionary life in Wuhu, only leaving last

October to come to Shanghai, being seriously ill. She left with her husband and five children last January for America, where she died as the direct result of a serious operation which was rendered necessary by the nature of her illness. Her sister is married to the Rev. T. E. Lund, of the American Episcopal Mission, Wuhu. Her death will be keenly felt by the many friends in China who were attracted to her by her bright and genial disposition.

A third suicide in Shanghai within the space of a week is recorded by the *North China Daily News*. On March 11th, Mr. Ernest Schmidt, resident partner in the firm of Messrs. E. Gipperich & Co., was found in his rooms above the offices 48 Peking Road, dead from a bullet wound, a revolver beside him, and all the evidences of self-destruction. It is difficult to find any reason for the deed, except temporary depression or insanity. Mr. Schmidt was only thirty-two years old, was very popular in the German community, and his affairs appear to be in perfect order. His health was good and, a fact which makes his death all the sadder, he was engaged to be married.

A Chefoo telegram to the *Mainichi*, dated March 27, states that at the end of February two German soldiers at Kiaochow attempted to violate a Chinese girl at Laichow. A number of Chinese police engaged in the protection of the railway interfered, with the result that two of them were killed by the Germans. At the time, the offence committed by the German soldiers was attributed to Russians, who were alleged to have subsequently escaped from Kiaochow, but, upon a further investigation being made, the real facts were discovered. On March 17 one of the German soldiers was sentenced to seven months' and the other to thirteen months' imprisonment. The Chinese at Kiaochow are incensed at the misconduct of the German soldiers and at the incompetence of the Chinese officials.

In the Portuguese Court at Tientsin, H. E. the Portuguese Acting Minister explained, while trying the case of Corven z. Gonzales, that whatever the event of that case the defendant would be deported to Macao as a confessed gambler, gambling being a penal offence by Portuguese Law. Portuguese subjects anywhere in China convicted of gambling are to be deported.

H. E. Yuan Shih-kai has sent his eldest son Mr. Yuan Yuan-tai to accompany the new Governor of Shantung, H. E. Yang, to Chinanfu, to remain there studying the conduct of foreign relations by the Governor.

The news of the death of one of the oldest missionaries in China, Bishop Volonteri, of the Roman Catholic Mission, has been received with deep regret and sorrow. Bishop Volonteri left Nanyangfu, his headquarters, for the purposes of visiting his out-stations and he arrived at Luyhsien in apparently good health but passed quietly away during his sleep on the 21st of December at the age of seventy three. Bishop Volonteri was a native of Milan and came to Hongkong in the early sixties where he worked for ten years as a missionary, winning the esteem of all he came in contact with. In the early seventies he was appointed to Honan as Superior of the Honan mission and four years after his arrival was appointed Bishop for South Honan which post he held for about thirty years. Bishop Volonteri was a very familiar figure throughout the whole province, and has seen many strange scenes and many changes during his long residence there.

At the request of H. E. Sheng Kung Pao, Director General of Imperial Chinese Railways, Lord Li (an adopted son of the late Li Hung Chang) acting at present as one of the treaty revision commissioners, has been appointed Assistant Director of Imperial Chinese Railways.

During February the sun was seen in Hongkong for a period of 26.3 hours only. For ten successive days no glimpse of it was obtained; in all nineteen days were sunless and on two days only was the sun visible for more than two hours.

## NOTES ON CURRENT EVENTS.

A telegram to the *Hochi Shimbun* says that the new Japanese line-of-battle ship *Kashima* was launched at Newcastle on Tyne on the 23rd instant. The order for this vessel was placed just before the war broke out, and it will thus be seen that remarkable expedition has been attained up to the present. We presume that the launching of the *Katori*, which is under construction at Messrs. Vicker, Maxini & Company's Yard, will soon take place. Viscount Hayashi was present at the launch of the *Kashima*, which is said to have been a brilliant spectacle.

Burglars broke into the house of Viscount Nagaoka in Hamacho at daybreak on the 24th. They tied up one of the maid-servants and required her to show where the money was kept, but she pleaded ignorance. They then extinguished the lamp and proceeded to the sleeping room of the Viscountess, whom they threatened with a sword. She seems to have fainted when the burglars made a pretence of cutting her down. Meanwhile the alarm had been given to a manservant, Otani Zen, and he hastened to the rescue armed with a sword cane. He met one of the thieves in the act of carrying off a large bundle of garments. The burglar at once attempted to cut Otani down, but was himself wounded in two places. He then attempted to escape, and, encountering a porter who lived on the premises, slashed his hand. By the assistance of a constable, however, the thief was arrested, and his confession led to the apprehension of his accomplice also. Viscount Nagaoka seems to have been absent.

The Court of Cassation has rejected the appeal in the Collins case. This might have been expected. For the Court of Cassation does not interfere with the judgments of inferior tribunals unless a point of law is concerned, and the appeal of Collins did not touch any point of law. His contention was that the lower courts had erred as to the facts. He claimed, in brief, first that he had no opportunity of getting access to Japanese military secrets and therefore could not communicate them; secondly, that his object was merely to extract money from the Russians who are Japan's enemies, without rendering them any service; and thirdly that although he did send a cypher communication to General Dessino, the detective officer Sekimoto was privy to it. None of these pleas related to a question of law and they were consequently rejected. Collins has therefore to serve his eleven years.

The Paris correspondent of *The Times* translates the following narrative from the columns of *Le Temps* of February 10th, the incident described having occurred in St. Petersburg:—

The wounded on January 22 were carried to the different hospitals of the town. Among them was a lady student who was caught in the crowd and whose left breast was slashed open by a Cossack's sword. Some days ago a police agent called at the hospital to take her away, but the surgeon told him that she was too ill to go out. A few days later the police agent called again and received the same answer, but this time he obliged the young woman to accompany him, though her breast was covered with bandages. Twenty-four hours afterwards an ambulance car brought her back to the hospital in a shocking state. On being undressed she screamed with pain, and it was then found that her shoulders, her back, and her loins were black and blue all over. There were marks the size of one's little finger. She was placed on a bed covered with milk curds to relieve the pain. A gendarme remained near her day and night. Nevertheless, her case became known.

A commissary of police had questioned her on the

revolutionary plot and the Anarchist movement, as she was known to have friends among the revolutionists. She refused to speak, whereupon she was whipped with birch-rods without regard for her wound. She was questioned a second time, but could say nothing. She was then whipped again, which drew from her all the police wanted to know.

The informant of the correspondent of the *Temps* says that this was not an isolated case, and that for several days the birch-rods did duty at most of the police offices of the capital.

Commenting on the above, M. Cornely remarks in the *Siecle* that, of course, the Tsar cannot be held personally responsible for a barbarous deed "before which all our civilization stands indignant and speechless," but asks how it is that, if to-morrow General Kuropatkin were to win a decided victory over the Japanese, the young Autocrat would take the benefit of this victory, which would increase his prestige. M. Cornely wants to know why, if the Tsar is responsible for a victory which he has not gained, he is not responsible for a crime which he has not committed, but which has nominally been perpetrated for his defence. He proceeds thus:—

"For the sake of the reputation of the people who participated in this abominable tragedy it must be verified or denied. For other reasons also—in order to set our consciences at rest . . . and in order that we should not be reduced to the sad extremity of believing that mere hazard and not justice prevails in the events we are witnessing. Is there, yes or no, any part of Europe where torture is habitually or exceptionally applied? Is there a corner of Europe where wounded women are tortured? Russian official publications confess to 95 killed. Eye-witnesses have discovered more than 2000. Statisticians reckon as many as 10,000. The slashed breast of the lady student who was flogged makes more impression on me than all this lugubrious arithmetic."

On the 25th instant a banquet and reception took place at the Imperial German Legation in Tokyo by way of farewell to Their Imperial Highnesses Prince and Princess Arisugawa, who are about to visit Germany in order to attend the marriage of the Crown Prince. The Legation salons were crowded with a brilliant assemblage of all nationalities. After some fine vocal and instrumental music the Imperial guests took their leave, and dancing then commenced to the music of the Imperial Band.

According to investigations made by the Finance Department, the total sum of voluntary offerings to the war chest from the outbreak of the war until the 28th of February was yen 2,172,690.35 and of that amount the Treasury had thus far received yen 1,795,855.31. During March a further sum of yen 14,171.79 has been subscribed. Tokyo's contribution to the grand total was yen 735,243.69.

The earnest advice tendered by the French press in the cause of peace naturally attracts attention in Japan. Both the *Fiji Shimpō* and the *Asahi Shimbun* write on the subject. They note especially that the views published by Paris journals and periodicals do not emanate solely from newspaper writers, but are now formulated by men of light and leading whose opinions must carry great weight. France is a constitutional country and her Government can not but attend to the voice of the public, but whether the French Cabinet will be induced to interfere, or whether, even if it does interfere, Russia will listen—these are questions hard to answer. Certainly France has much at stake. She must always be more or less solicitous about her enormous loans to Russia, and political considerations must have still greater weight, for she knows that anything tending to alienate her from Russia would delight her German neighbours, whose game she is most unwilling to play. But whatever may be the outcome of the unrest now evidently prevailing in the mind of the French, Japan must disregard such matters. For her the only course is to continue strik-

ing with all her might. It is not for her to approach Russia. Her business must be to compel her adversary to ask for peace, and it is evidently the forecast of our two contemporaries that the time for that is still distant. Russia is like a gambler who has staked so much that he can not persuade himself to withdraw, even though he recognises the hopelessness of the game.

On Wednesday the *Fiji Shimpō* published the following extra:—"The *Standard's* St. Petersburg correspondent telegraphs a curious statement to that journal on the strength of what he calls good authority. The Emperor of Germany, he says, sent a letter to the Tsar urging the latter to make peace and offering friendly assistance. Mr. de Witte also advised the Tsar to accept this counsel. But the Tsar angrily answered:—"Do you too give me such advice? You are not a patriot." Subsequently the Kaiser sent another letter tendering the same counsel, but the Tsar threw it aside, saying:—"It will be a long time before I obey this suggestion."

One need scarcely point out the extreme improbability of this story. Such advice is not at all likely to have been given by the Emperor of Germany, and if it had been given and rejected, the world would not have heard anything about it. As to its having been repeated, that is even more incredible.

The *Shogyo Shimpō* has a wire that Japanese securities continue to rise in the London market. The latest quotations are:—

Four-per-cents	.....	£ 85 15s. 6d. (5/0 rise)
War Five-per-cents	.....	£ 101 16s. 7d. (10/3 " )
Five-per-cents	.....	£ 99 15s. 9d. (12/9 " )
Six-per-cents (old)	.....	£ 105 5s. 6d. (5/0 " )
do. do. (new)	.....	£ 102 8s. 6d. (2/6 " )

Russian bonds have fallen by 5/0 and are quoted at £88 15s., but in Paris they have risen by 25 centimes and now stand at 86 francs.

The boat of the *Mars* which was carried away by floating ice from the Kunajiri sea, is now reported to have made the land at some point which is not stated in the telegram. Two of the crew had perished from cold. The survivors consisted of 4 Englishmen, 22 Chinese, 5 Indians, and 4 Spaniards. They must have had a terrible experience. The drifting away of the boat was announced on the 17th instant, and it would thus seem that the unfortunate men were exposed for eleven days.

A telegram to the *Fiji Shimpō* from London says that the St. Petersburg press is vehemently opposed to any extension of the Anglo-Japanese alliance. It declares that such a measure would be directed plainly against Russia. The *Novoe Vremya* says that the chief object of the alliance would be to ensure to Japan the fruits of her victory. In the same telegram it is added that, according to the *Bourse Gazette*, Russia's only ally is time. Concerning the *Novoe Vremya's* declaration the obvious comment is that the Russian journal thus admits frankly that its country's policy should be one of revenge. Make peace now and prepare to strike again. That is not an unnatural feeling on the part of a patriotic Russian, but evidently it is precisely the feeling against which due precautions must be taken unless the Far East is to be kept in a perpetual welter of war or preparations for war. No better argument could have been furnished for the necessity of extending the scope of the alliance.

## DELAY.

A LONDON telegram to the *Hochi Shim-bun* quotes the St. Petersburg correspondent of the *Morning Post* as saying that Russia's programme is clearly known. She intends to continue the now hopeless war only so long as may be necessary to excite general distrust of Japan's future attitude towards China. Then, when the Great Powers of Europe become sufficiently disquieted to interfere, comparatively easy terms of peace will be arrangeable. That theory sounds like a resuscitated echo. It was heard recently in connexion with the curious circulars prepared in St. Petersburg complaining of Japanese violations of China's neutrality, and it has been heard in the Yellow-Peril outcry ever since the war commenced. Russia's memory still reverts to 1895. She recalls with satisfaction, which must now be assuming a tinge of melancholy, the extreme complaisance then shown by Germany and France in clearing the path for her future aggressions, and it is probably difficult for her to realize that similar coöperation can not be contrived now. Indeed, in a certain subtle sense, some obligation rests upon France and Germany. Without the assistance they rendered in expelling Japan from Manchuria, Russia could never have obtained a footing there, and it would not be an illogical sequence of events that her two quondam allies should now aid her to evade some of the worst results of the enterprise which they then enabled her to undertake. The situation, however, has radically changed. Japan is at present the Power to be courted, and England, who stood aside altogether ten years ago, is to-day bound by the terms of her alliance as well as by her own inclinations and policy to see that Japan is not confronted by a coalition of hostile or semi-hostile States. Against any repetition of the 1895 performance there is thus a double guarantee; the guarantee of an altered mood on the part of France and Germany, and the guarantee of England's promise to secure fair play for her ally. It is difficult thus to see how Russia can hope to appeal successfully to the gallery that listened so readily ten years ago, and it is equally difficult to conceive any practical methods of appeal. In 1895 she could point to a treaty already concluded which actually placed Japan in possession of the Manchurian littoral. In 1905 she can point to nothing, except, on the one hand, her own unsuccessful attempt to add the whole of Manchuria to her dominions, and, on the other, Japan's convention with England pledging the signatories to respect the territorial integrity of China and to preserve the open door. Fully do the Powers identify the aggressor in Russia, not in Japan, and entirely are they convinced that whatever course England, as Japan's ally, endorses will be a course consistent with all legitimate interests. Russian statesmen can not fail to appreciate these things, and the probability is that, instead of following a fixed line of action, they are merely drift-

ing—"waiting," perhaps as KIPLING says, "waiting for some easy wonder." No Power hastens to propose peace at the moment of defeat unless some important crisis requires quick solution; unless the fall of a capital has to be averted or an army saved from annihilation. Russia is not confronted by any such crisis. No town, nor even any part of her dominions, is immediately menaced, and the plight of her Manchurian army could not be bettered except by an armistice, to which Japan would certainly not agree as a prelude to peace negotiations. Thus Russia loses nothing and may possibly gain by waiting, and thus too no definite inference as to the continuation or the cessation of the war is to be drawn from her hesitation. She talks big, but that too is in the natural order of things. In fact, the larger her words and the more conspicuous her belligerent preparations, the more probable does it become that the desire for peace is beginning to sink into her soul. Yet the period for delay is not long. For the first time Japan has now her opportunity. She dominates the field with an army to which the Russians have nothing adequate to oppose. Now, therefore, is the moment for her to reach a position whence she can dictate such terms of peace as will be in some degree proportionate to her great efforts and great sacrifices. Thus her enemy's hesitation will be turned to her advantage. We do not know what Japan's programme may be, but nothing in her past conduct of the war suggests that she will now act a Fabian part. Every blow she can strike within the next few months will tell permanently in her favour.

## GERMANY AND JAPAN.

THE Imperial Chancellor's recent utterances in the Reichstag, whatever be the degree of conviction they carried to the minds of his hearers, have at least had the effect of evoking in Japan expressions which no German should find any difficulty in interpreting. It can scarcely be said that Count von BULOW's method was very happy. The sense of a wittingly incomplete case is conveyed by dragging affairs of the heart into the field of international diplomacy, and when, in the context of his analysis of German-Japanese relations, the Chancellor referred to a marriage between two young people in Tokyo, he showed more enthusiasm than tact. For the rest, however, his speech has probably done good. The Germans, in our opinion, have of late been inclined to misinterpret Japanese sentiment towards them and their country. They seem to have carried conclusion beyond the limits warranted by premiss. Indeed the attitude of the German mind during the past five or six years has been in some degree a revelation. Instead of the calm, analytical judgment attributable to a people with such a record of scientific and philosophical achievement, one finds an emotional temperament not at all compatible with clear insight. They appear to be un-

able to endure criticism, however moderate. The critic they at once set down as a malignant enemy; the partizan alone they regard as a friend. That kind of disposition is not without charm on account of its essentially human elements, but it is apt to be misleading and at times it involves troublesome errors. For example, there appears to have prevailed of late among the Germans a conviction that they are disliked in Japan and that their Far-Eastern expansion may therefore be inconveniently thwarted by and bye. On account of that apprehension the German Representative in Tokyo was recently instructed to sound the mood of Japanese officialdom. We use the expression "was instructed" in a purely inferential sense, but the inference seems warranted, for it is certain that the Japanese, of their own unprompted motion, would not have volunteered any superfluous expressions of good-will, or offered any assurances concerning their future attitude towards the Oriental enterprises of German *welt-politik*. The whole incident must have had its origin in Germany's uneasiness, and that uneasiness must have attained considerable dimensions when the Chancellor of the Empire deemed himself called on to take extraordinary steps for allaying it. Hence it is that we venture to characterise German judgment as emotional rather than perspicacious. For no impartial onlooker can detect among the Japanese, or has ever been able to detect, evidences of genuine dislike towards Germany. The intellectual relations of the two nations have been too close during the past twenty-five years, and are still too close to leave any space into which genuine dislike could intrude. You can not really dislike a man whom you respect and for whose moral attainments and capacity you entertain profound admiration. But you may distrust him, and that is what the Japanese do in Germany's case. There is nothing subjective in their mood. It is a mood educated solely by historical facts. Germany, by her own doings, has made herself an unknown quantity. During the past few months she has afforded many evidences of good will towards Japan. She has discharged her neutral obligations with strict impartiality—one point alone excepted—, and she has let it be plainly seen that she desires to cultivate friendly relations with this country. The Japanese appreciate these things, and are very willing to reciprocate the temper they represent. But as to implicit trust, the unhappy record stands in the way. The *Nichi Nichi Shim-bun* refers to it with cold explicitness. It recalls the fact that during the war 1894-5 no Western State furnished to Japan more unequivocal evidences of good will and appreciation than Germany did, yet on the very morrow of her sympathetic congratulations this same Germany was found heading the three-power dictatorship. The influences that enjoin that striking change of mood may at any moment re-assert themselves. Who can tell? No reproach is laid at Germany's

door. It would be absurd to reproach a State for acting in accordance with its own view of its own interests. But that the Berlin Government can not be again persuaded to sacrifice Japan on the altar of European politics, is a conviction which Japan dare not entertain without proof more tangible than mere professions of sympathy. We must wait, then. And in the meanwhile the situation is quite clear. Japan entertains friendly feelings towards Germany; desires nothing better than close relations with her, but is not sure whether Germany's good will may be trusted to survive pressure such as that to which it yielded ten years ago. The matter is wholly in Germany's hands. It was a reversal of the natural order of things to ask Japan for assurances. Japan has not given Germany any reason to doubt her friendship or to question her intentions. It is Germany that has a record to correct.

#### JAPAN IN KOREA.

IT is certainly time that a protest were entered against the ill-considered comments bestowed by a certain class of public writers on Japan's policy in Korea. The chief error underlying such comments is the theory that in dealing with Korea Japan should be strictly guided by the principles she endeavoured to enforce as between herself and foreign nations. Thus it is maintained that to ask for concessions involving residential and trade privileges outside the settlements is inconsistent and arbitrary on Japan's part, since the plea of jurisdiction can be entered by Korea in bar of such concessions with just as much validity as it was entered by Japan herself in bar of similar concessions sought by Western nations prior to treaty revision. The Japanese Government, when urged, in the old days, to open the whole country to foreign trade, travel and residence, used to reply, among other things, that no request of the kind could reasonably be granted in the absence of machinery for exercising jurisdiction over foreign subjects and citizens beyond treaty limits. Within treaty limits there existed that very imperfect vehicle of justice, the consul, but outside these limits there was no consul, and Japan's competence being denied, it resulted that foreigners trading or residing in the interior would have had to be a "law unto themselves." The same objection is now put forward by the critics with regard to Japan's action in Korea. She is told, in effect, that, if consistency of procedure be any object in her eyes, the enterprise of other subjects should be strictly confined to treaty areas pending one of two things, namely, her recognition of Korea's judicial autonomy or the provision of a sufficiency of consular tribunals throughout the interior of the peninsular empire. The trouble with this contention is that it applies an identical principle to cases which are wholly dissimilar. In the first place, it was in the very essence of Japan's contention fifteen years ago that she herself had qualified to be entrusted with

jurisdiction over foreigners within her borders, and that in refusing to recognise her qualifications while, at the same time, asking for the privilege in question, and while further, declining to incur the expense of supplementing their consular machinery so as to meet the needs of the situation they proposed to create, the foreign Powers sought to reconcile a policy of prejudiced conservatism with one of reckless liberalism. Can any such argument be applied for one single instant to Korea? Has she ever made the smallest effort towards qualifying for the recovery of her judicial autonomy in the case of foreign subjects and citizens? She has not. It may even be reasonably doubted whether the recovery of her judicial autonomy has ever suggested itself to her as an object of honourable ambition. We arrive then at this conclusion, that if a nation desire to remain a hermit, it need only be absolutely non-progressive. By clinging to its old laws and its old judiciary, by eschewing every effort of reform, the Korean Government establishes a right to keep its territories closed against any extension of foreign intercourse. Are the critics disposed to admit that proposition? It is conceivable that they may be. They may possibly say that a sovereign nation is entitled to regulate and control at will the degree of its intercourse with other States. If so then they become exponents of the doctrine that Occidental Powers were fundamentally wrong in thrusting their companionship on countries like China and Japan. There is a further consideration; the consideration that did Japan obey these fine altruistic dicta she would be alone in herself-effacement. While other States were securing for their nationals in Korea—as they have secured and are securing—mining concessions, timber concessions, trade concessions and so forth outside treaty limits, Japan would have to confine herself strictly within these limits; to consent, in short, to comparative extinction.

But how idle this discussion is after all! Not one of us, least of all the academical critics, is so blind as to be unaware that Korea stands in an altogether exceptional relation to Japan. It is not merely that Japan has fought two great wars to secure her little neighbour against the domination of a foreign State, though that, in itself, constitutes an irrefragable title in the practical eyes of Occidental Powers themselves. It is that Korea's geographical situation compels the Japanese to oversee her destiny. To dissimulate appreciation of that obvious fact is mere silliness. Whatever motives impel England to spread her hand over Egypt, cognate motives, but much more cogent, compel Japan to interest herself actively in Korea's future. If she treat Korea as England has treated and is treating Egypt, she will be justified in the eyes of the most captious historian. A much pleasanter and wholesomer atmosphere of controversy would be created could an end be put to the besetting habit of some observers, the habit of requiring Japan to live

up to a standard which not only is as high above the standard adopted by the Occident itself as the empyrean is above this planet, but is also incapable of being adjusted to the every-day needs of the situation. Can anything be more comically inconsistent than to lay down for Japan's guidance rules which the most enlightened State of the West finds it impossible to observe, and at the same time to charge her with obeying an inferior code of international morality? Assaults delivered in such guise are not prompted by friendly solicitude, as the assailants, with futile cant, pretend. They are the strokes of inveterate enemies.

#### JAPANESE PUBLIC OPINION AND THE WAR.

NOTHING is more natural than that countries like France and Germany should be absorbingly anxious to obtain some clear insight into the real aspirations of the Japanese nation. These countries possess in the Far East interests which they would have difficulty in defending against Japan; interests acquired at a time when present circumstances could not possibly have been anticipated. Neither France nor Germany imagined, ten years ago, that the immediate future included such a contingency as the unquestioned and unquestionable supremacy of Japan in the East; above all such a supremacy that the colonies established in this part of the world by remote European States would be held at the will of the new Power. Thus the situation is startling and may well inspire uneasiness in the breasts of those who imagine that because Japan has shown herself to be strong, she must necessarily show herself aggressively ambitious also. We that know her do not entertain any such conception, but in Germany and in France she is comparatively little known, and the mystery attaching to her ultimate mood causes much speculation there. Some one seems to have deliberately set himself to foster that feeling by collecting the writings of Japanese jingoes and presenting them to the public of Paris as a trustworthy index to the nation's mind. There are jingoes in Japan. Every reader of current literature is conversant with that fact. The *Nippon* has always been their organ, and the quality of its articles shows that they are intended to appeal to the highly educated classes. But no one possessing any insight would think of regarding the *Nippon* as a journal representing a large section of public opinion. Still less would they assign that character to the *Toyo Keisai Shimpō*, a periodical the very name of which is unfamiliar, or to the writings of Professor TOMIZU, or to those of the *Nippon-jin*. Yet these are the authorities recently quoted in Paris, and, to judge from the comments they have provoked, great importance is attached to them. Such indiscriminating choice is apt to be very misleading. There may be differences of opinion as to whether Professor TOMIZU

deserves the title of "eminent publicist," but certainly it is an error to allege that "his writings did much to prepare the Japanese mind for a war with Russia." When, after his trip to Manchuria two years ago, he made his debut as a publicist by producing a book which advocated the substitution of Japan's political power for Russia's in Manchuria, his arguments were received with ridicule by responsible statesmen, and one of the leading journals expressed thankfulness that Japan was still far from placing the conduct of her foreign affairs in the hands of such a man. The Professor and his six comrades of the University made quite a commotion in a small way by ventilating their stalwart views, but never did an agitation subside more rapidly or completely than theirs, and to accept them or the *Toyo Keisai Shimpō*, or the *Nippon-jin*, as exponents of Japanese thought in general would be about as rational as to infer Germany's state policy from the talk of an ultra-imperial coterie among her college students. Professor TOMIZU recently contributed an article to the *Revue Diplomatique*, the gist of which was that Japan should keep Manchuria and should convert it into a camp whence she could send an army into China proper if occasion demanded such a course. This article is believed by the *Revue de Paris* and the *Nouvelle Revue* "to reflect the official mind of Tokyo," but such a conception indicates merely that the channels of Japanese thought are unexplored by these French writers. Few people can be so sanguine as to suppose that Japan is without ambition. Her strong patriotism contradicts the notion. But splendid as are her fighting qualities we should hesitate to call her a fighting nation, and the strong probability is that she will seek to reduce to a minimum the responsibilities arising out of the new situation in Manchuria. She can not, it is true, take the risk of effacing herself there altogether, for that would be to invite a repetition of the circumstances which led to the present war. But the Manchurian problem shrinks to comparatively small dimensions when we remember that, stripped of certain points along their littoral, the three provinces lose all practical value in Russian eyes, so that they may be guaranteed against aggression without great difficulty and without demanding any large expansion of the Japanese Empire. There is no sense in assigning to Japan a virtue of self-effacement which no Power has ever yet displayed, but neither is there any sense in accepting as true exponents of her views writings like those of Professor TOMIZU, the *Toyo Keisai Shimpō* and the *Nippon-jin*.

Russians from Port Arthur released at Nagasaki from Jan. 10th to Feb. 28th are as follows: 664 military officers and civil officials, 622 soldiers and bluejackets employed by officers as servants, 9 priests, 11 doctors, 122 women and children, 4 servants, and 5 postal delivery men. Many non-combatants were also removed to Chefoo direct from Port Arthur.

## MINING LAW.

(Law No. 45 OF THE 38TH YEAR OF MEIJI.)

PROMULGATED BY IMPERIAL ORDER ON THE 7TH DAY OF THE 3RD MONTH OF THE 38TH YEAR OF MEIJI (7TH MARCH, 1905.)

TRANSLATED BY J. E. DE BECKER.

## CHAPTER I.—GENERAL PROVISIONS.

Art. I.—The expression *Mining* (*kōgyō* 鑛業) in this law means prospecting (*shikutsu* 試掘) and mining (*saikutsu* 採掘) for mineral ores including all operations ancillary thereto.

Art. II.—The expression *mineral ore* (*kōbutsu* 礦物) in this law means:—Ores of Gold, Silver, Copper, Lead, Bismuth, Tin, Antimony, Mercury, Zinc, Iron, Iron Pyrites, Chromite, Manganese, Tungsten, Molybdenite, Arsenic, Phosphates, Graphite, Coal, Lignite, Petroleum Oil, Asphalt, and Sulphur. It does not, however, include mineral dust (alluvial or sedimentary deposits).

Art. III.—All unmined minerals (including rejected ores and tailings) are the property of the State.

Art. IV.—The term *mining right* (*kōgyō-ken* 鑛業權) in this law includes both the right of prospecting and the right of mining.

Persons entitled to a mining right have a right of mining and acquiring, within the limit of their mining areas (*koku* 鑛區 "concessions"), the mineral in respect to which they have obtained permission: provided that in case of coincident mining areas, persons entitled to mining rights are mutually limited to the exercise of their respective rights.

Art. V.—No persons other than subjects of the Empire, or companies duly formed in accordance with the laws thereof, are entitled to acquire mining rights.

Art. VI.—Rights and obligations determined by this law as appertaining to persons entitled to mining rights are transferred and pass with the mining rights.

Proceedings taken and acts performed in accordance with the provisions of this law are valid as against the successors of persons intending to make application for mining, persons applying for mining, persons entitled to mining rights, landowners, or persons concerned.

Art. VII.—When two or more persons jointly carry on, or desire to jointly carry on the business of mining, one of them is to be selected as their representative, and this must be notified to the Chief of the Mine Inspection Office. When no such notification is made, the Chief of the Mine Inspection Office shall designate the representative.

The representative represents, *vis-à-vis* the State, persons jointly applying for mining and the persons jointly possessed of mining rights.

Persons jointly applying for mining, or persons jointly possessed of mining rights shall be considered as having entered into a contract of association.

Art. VIII.—The expression *mine laborer* in this law means a laborer employed in mining.

Art. IX.—The expression *mining area* (concession) in this law means an area of land in respect to which mining rights have been registered.

The boundaries of mining areas are determined by straight lines and are limited under these to the same measurement as the surface, the boundary lines descending perpendicularly. The extent of one mining area shall be from 50,000 *tsubos* (about 42 acres) upwards for coal, and from 5,000 *tsubos* (about 4 acres) upwards for other minerals, and shall not in either case exceed 1,000,000 *tsubos* (about 826 acres); provided, however, that in cases where it is actually necessary for the protection of mining interests, or the division of mining areas, the limit of 1,000,000 *tsubos* may be exceeded.

Two, or more than two, mining rights may not be created in respect to the same mining area, except when the subject of such rights are different kinds of minerals, and in the case contemplated in Article 36.

Art. X.—No place within 300 *ken* (600 yards) in every direction from Imperial Palaces, Imperial Detached Palaces, Imperial Shrines and Imperial Mausolea or within the first district of fortified land (要塞地帯第一區) may be made mining areas.

No places within 300 *ken* (600 yards) in all directions from naval ports, ports of strategic importance, gunpowder factories, gunpowder magazines, and ammunition store houses, or within the second and third districts of fortified land (要塞地帯第二區及第三區) may be made mining areas unless the permission of the competent authorities has been obtained.

No places mentioned in the preceding two paragraphs may be used for mining purposes unless the permission of the respective competent authorities has been obtained.

Art. XI.—No mining operation may be carried on in places within 30 *ken* (60 yards) in all directions (whether at the surface or in the interior of the earth) from railways, tracks, roads, canals, rivers and lakes, marshes and ponds, embankments, the precincts of temples and shrines, cemeteries, public gardens, and all other constructions and buildings; nor may such places be used for mining purposes, unless, in both cases, the permission of the competent authorities, or the consent of the owner or persons concerned, has been obtained: Provided, however that the owner or persons concerned may not refuse such consent unless for proper and valid reasons.

Art. XII.—The provisions relating to applications for mining are applicable *mutatis mutandis* to applications for the correction, increase or decrease, and revision of land in respect to which application has been made for mining, and to mining areas.

Art. XIII.—The expression *mining tax* in this law means taxes imposed on mining areas and on mining production.

Art. XIV.—This law is, with the exception of Chapter VIII., applicable to the mining undertakings of the State.

## CHAPTER II.—MINING RIGHTS.

Art. XV.—Mining rights are to be classed as rights *in rem*, and the provisions relating to immovables (with the exception of the provisions of Par. I of Article 179 of the Civil Code) are applicable *mutatis mutandis* thereto.\*

Art. XVI.—Mining rights shall be indivisible. Art. XVII.—Mining rights may not be made the subject of rights other than those of succession, transfer, measures adopted in connection with non-payment of national taxes, and distraint (compulsory execution); but rights of mining may be made the subject of a right of mortgage.

Art. XVIII.—The term of a right of prospecting is two years, calculated from the date of recording in the Mining Register.

The term specified in the preceding paragraph will not be changed on account of any correction, increase or decrease, or revision of the mining area.

Art. XIX.—The creation, alteration, transfer, extinction, disposition of mining rights and rights of mortgage shall be recorded in the Mining Register.† The same applies to the withdrawal of a person jointly entitled to a mining right. Provided however that in a case where the disposition of a mining right has been restrained (limited) no record of relinquishment of business can be made.

The record mentioned in the preceding paragraph shall take the place of registration.

Rules relating to record will be determined by Order.

Art. XX.—With the exception of the cases of succession, of extinction of a mining right on account of the expiration of the term and of auction specified in Articles 42 and 43, the matters mentioned in Par. 1 of the preceding article shall not be of valid effect unless recorded.

Art. XXI.—Persons wishing to engage in min-

\* When the right of ownership and some other right *in rem* in respect of the same thing are vested in the same person, the right *in rem* ceases. But this rule does not apply to cases where the thing, or the right *in rem*, is subject to the right of a third person (Civil Code Par. 1 of Article 179).

† *i.e.* The record in the Mining Register will take the place of registration in a Court.

period exceeded that of 1903 by over twenty-two million yen.

The following are the values of the Exports and Imports for the last two years:—

## EXPORTS.

## MANUFACTURED ARTICLES:—

The export and import of Japan of Gold and Silver Specie and Bullion during 1904 were:—

	Yen.	Yen.	Yen.
Export.....	107,795,858	33,946,655	73,849,202
Import.....			

Harbour Reclamation.—As stated in the last Annual Report, want of funds had delayed the prosecution of this undertaking, and as financial conditions remain unaltered in respect to public works it cannot be expected that the Reclamation scheme will be proceeded with much vigour for some considerable time. Information has been received from the Customs stating that, for the purpose of landing rough cargo, a space of 14,368 *tsubo* of ground on the Reclamation will be temporarily devoted to the use of importers, and that this space will be ready for occupation by goods on the 1st of April next.

The Breakwater.—The work of repairing the damage caused by a violent storm towards the end

of 1902 was continued during the past year, but the operations are necessarily slow and are often interfered with by bad weather. It is proposed to complete the repairs by the end of 1905.

Dredging.—The dredging done in the harbour during 1904 was mostly in the fairway from the entrance to the pier and the surrounding anchorage. Nothing has been done at the mouth of the Creek during the past year, though how much excavation is necessary at this point is evidenced at every tide by the large number of craft waiting to get in.

Arbitration.—An arbitration case of some importance came before the Board for adjudication during the past year. Begun in August and concluded in September, the case was speedily put through at comparatively small cost to the parties, and subsequently copies of documents in the case, covered by a Board Certificate, were duly filed in the Yokohama Saibansho, where they stand upon the record and have all the force and value of a judgment from the Bench.

Tea Subsidy.—On the strength of a letter addressed to this Board in 1903 by the Tea exporting firms, in reference to the Tea Subsidy that had been in existence some years, representations were made by the Board to the British and American Ministers, and it was understood that the Authorities had promised that the subsidy would not be renewed. But it appears that the subsidy—which was *yen* 70,000 for seven years—merely lapsed by the effluxion of time, and that another of *yen* 35,000 was granted for one year.

According to the Japanese Press, at a recent meeting of the Tea Guild the Chairman announced that at the last session of the Diet a Government Bill providing a subsidy of *yen* 70,000 per year for seven years, commencing in 1905, had been passed. But at a subsequent meeting of the National Tea Guild, the Minister for Agriculture and Commerce is reported to have said that since the subsidy of *yen* 35,000 given by the Authorities in 1904, a petition had been received from the Guild, but "that the Government was not in a position to give any financial assistance," alleging as a reason, not that the Authorities had promised foreign Ministers that the subsidy should not be renewed, but that the Government declined "owing to the war."

Yokohama-Hachioji Railway.—This undertaking appears to have suffered suspension as has been the case with other public works. Last year it was stated that the company was about to apply to the Authorities for permission to commence construction, and that the line would be completed by the end of 1905, but no work has yet been done, and it is now authoritatively stated that the company have got no further than to make an application for a provisional charter.

Yokohama-Tokyo Electric Railway.—This company has obtained official sanction to undertake the construction of the Kanagawa-Kawasaki section of their line, which, when completed, will connect Yokohama with the capital.

## EXPORTS.

Raw Silk.—The Silk crop of 1904 has been an unusually large one, estimates of the quantity available for export having varied between 85,000 and 90,000 bales, and it is now very probable that the exact amount will reach nearer to the latter than the former figure. The Central and Prefectural Governments and private associations continue to do their best to increase the production of Raw Silk, with good results, so far as can be seen from the export statistics. Though some improvement is observed in the quality from certain districts, it is a regrettable fact that the product of Shinshu Province has not yet been able to regain the favour of American buyers, and it is earnestly to be hoped that those interested in the Silk industry of this province will do their best to bring about an improvement that will again place Shinshu Filatures on a level with others. American buyers have for the last few seasons given a marked preference to all other Filatures, especially those of Koshu and Kansai, which are freely taken at higher prices, thus placing the product of Shinshu in the second range. Even Rereeled Maybush—a very important production—have out-classed Shinshu Filatures in value, the best quality of Rereels having been sold for from *yen* 5 to *yen* 15 more than Shinshu Filatures.

The ever increasing demand for Japanese Raw Silk from the United States has induced the great majority of producers to reel their Silk for the American market only, *i.e.*, coarse sizes, and the year 1904 has shown a great falling off in the production of the fine-sized Filatures suitable for Europe, with the exception, perhaps, of 11/13 den., which have been in regular demand for the latter market at full prices.

During 1904 the production of Kakedas showed a marked increase, and the sorting of the entire crop being now under the supervision of one packing company, the quality of the different grades has been found more regular than in former years.

During the first half of the year under review

prices have kept remarkably steady, and it was due only to the prospect of a large crop that at the beginning of the new season a decline of about 3 per cent. occurred. At the same time, however, a good regular demand set in for the new product, both from America and Europe, and by September prices had regained their lost ground. In fact from that time up to the end of the year the demand continued very active, and never have stocks been kept so low on the Yokohama market as during the latter half of 1904.

An abundant crop and the Russo-Japanese war are the factors which induced producers to continue selling promptly, thus preventing a more rapid advance in prices, which stood at their highest at the end of December, being *yen* 1,020 for Fil. No. 1, coarse size, with but few buyers, against *yen* 890/930 July-October; and it may be taken for granted that the bulk of this season's business has been done on a basis of *yen* 890 to *yen* 930 for good Shinshu Filatures.

The export figures for the calendar year 1904 are 97,345 piculs, valued at *yen* 88,740,702, against 73,216 piculs, valued at *yen* 74,428,907 in 1903. This considerable increase is entirely due to the active demand during the second half of the year, or, to be more precise, the first half of the Silk season 1904-5.

The following table shows the export in bales for each season during the past six years, and destination:—

	1903-04.	1902-03.	1901-02.
Continent of Europe ...	25,100	28,182	27,080
England.....	22	—	16
America.....	49,792	48,252	44,459

Hamatsukis . 45 90 180 250

Total Piculs 84,670 83,370 79,375 71,850

It may be added that the export to America by the native export houses for the season 1904-5 had already reached 22,400 bales at the end of December, the total export for the same period being:

To America..... 42,651

To Europe ... 22,117

Total..... 64,768

which is an unprecedented figure.

**Waste Silk.**—During the first six months of the year under review the market was in an extremely discouraging condition, prices marking a heavy decline. The brisk advance in prices that had taken place the previous year and which was mentioned in the last report, had tempted a number of speculators and owners to take to the dishonest mixing and falsification of goods. This practice had already done much harm to legitimate trade, and the rather large holdings of such doubtful goods during the spring months considerably increased the general unsatisfactory situation.

The market for new season's produce opened rather late, in August-September, but later a steady demand was kept up at only slightly fluctuating prices.

The average prices for the year were as follow:—

	In January, Yen.	In August—new season's produce, Yen.	The year closed at, Yen.
Kikai Noshi ...	190 to 200	150 to 160	155 to 165
Kikai Kibiso ...	130 to 160	110 to 120	105 to 125
Joshiu Noshi ...	115 to 140	80 to 100	80 to 100

During the year 1904 the export of Waste Silk was as follows as compared with 1903:—

	1904.	1903.
Marseilles .....	12,889 Bales against	14,957 Bales.
New York .....	425 "	429 "
Genoa .....	747 "	679 "
Trieste .....	473 "	195 "
London .....	393 "	89 "
Other ports .....	114 "	272 "

15,011 Bales. 16,621 Bales.

46,483 Piculs. 50,111 Piculs.

The shipments were composed of

	1904.	1903.
Kibiso .....	9,594 Bales.	11,025 Bales.
Noshi-ito .....	5,000 "	4,984 "
Sundries .....	408 "	612 "

15,011 Bales. 16,621 Bales.

**Manufactured Silk.**—A general review of the trade shows a decided development, shipments to the principal markets exceeding all previous records. It is, however, impossible to furnish any reliable statistics, owing to the incorrect Customs' declarations which some exporters find it to their interest to make. These fictitious figures are misleading, not only as regards destinations, but also as to size and value of shipments.

**Plain Silks.**—The market opened upon a fairly high level with moderate stocks, principally of inferior quality. Early in January, a revival of the "war-scare" stimulated demand in some quarters, and as the diplomatic situation intensified, fears were apparently entertained that an outbreak of hostilities would prove detrimental to the production of *habutai*. Alarmists talked of the weaving industry being seriously hampered by the operatives being called out to defend their country, while others endeavoured to show that the railways being monopolized by the Government for the transport of troops communication with the weaving districts would be stopped and supplies suspended. As the looms are worked almost exclusively by women, the calling out of the reserves did not in any way interrupt the industry; on the contrary, the women wage-earners had to be the more zealous when the supporters of their families were drafted for service, and weaving operatives thus increased instead of diminished. Moreover, although railway communication was at times seriously interrupted, and the transport of Silk to Yokohama suspended for several days together, the material finally came to hand in larger quantities than usual, the forwarding agents naturally giving it precedence over less valuable produce. The markets abroad were also slow to appreciate another potent factor, which arose through the strict economy enjoined upon the natives by the Japanese Government. Silk apparel was largely abjured throughout the country, and many looms and operatives were thus diverted from producing Silk material for home use, and turned towards the foreign trade. At first, however, the consumers in Europe, and to a greater extent in America, appeared to anticipate that supplies would be inadequate, and therefore, following the definite outbreak of hostilities, the market was driven upward by excited buyers, until it had reached an abnormally high level in the month of May. Early in June a reaction set in, and prices took a downward course, which was practically uninterrupted until the end of November, by which time they had reached a basis 15 per cent. below the price current in May. Meanwhile, a fairly large trade had been transacted both with Europe and America, the former being spasmodic, but the latter steadily maintained. Early in December, the local market took a sharp upward turn, and prices advanced fully 5 per cent. from the lowest point touched. The year closed, therefore, with quotations practically upon a normal basis, and with fairly large stocks, mostly of inferior material, first choice *habutai* being excep-

tionally scarce and lower grades proportionately plentiful.

**Kaga Habutai.**—The above refers mainly to the staple grades of Echizen material. Kaga textiles have followed a similar course of fluctuation, being influenced by the same conditions, but there has been a further marked development in the American preference for Kaga *habutai*.

**Kawamata.**—This material still suffers from the bad reputation it gained in previous years respecting the heavy percentage of starch inserted by the short sighted producers. There have recently been definite and well-sustained efforts on the part of one or two prominent weavers to establish reliable brands which can be taken as proofs of good quality, but the European buyers are slow to place confidence therein, and the trade is consequently confined to narrow limits. Even the Indian market seems to have had all it requires of starched *Kawamata*, and the inferior material which at one time figured largely in the shipments is almost neglected.

**Twills.**—This material still remains in the background, and there is no prospect of its being reinstated in public favour. The European weavers are well able to meet their "home" demand, and the consumption in other markets is insignificant.

**Kaiki.**—Here again, a line which once figured prominently in fashionable circles is now entirely neglected, with the exception of a small demand from the Canadian and Indian Market.

**Brocades.**—Early in the year, activity in the Rangoon demand promised to result in a repetition of the brisk trade seen some four years ago, but the movement collapsed, and both the Yokohama and Rangoon market hold fairly heavy stocks of "Brocades" which they would prefer to be without. Demand from other quarters is too trivial to call for mention.

**Joshiu Weaves.**—These have not been restored to the important place they at one time occupied. The heavy plain Silks produced in Echizen are preferred by the European consumers, and the Joshiu weavers do not seem to exert themselves to recover their lost position. Prices have fluctuated slightly in sympathy with the movements of Raw Silk, but the basis has been comparatively high throughout the year.

Amongst the merchants and shippers of integrity (both native and foreign) various efforts have again been made to arrest the pernicious practice of increasing the weight of *habutai* by the addition of moisture. The Japanese Governmental Department of Agriculture and Commerce is zealously prosecuting the matter, and some good has already resulted from the measures adopted, especially in the weaving districts. Some more drastic and widespread action is called for, however, seeing that much of the adulteration must be laid to the charge of the Yokohama dealers; neither are the shippers entirely guiltless, seeing that in some cases the official brand indicating the net weight of the material is deliberately cancelled by a surcharge, or the strip upon which it is stamped cut off the piece. Such practices may result in temporary profit, but they cannot be too severely condemned, seeing that they thwart the measures which have been introduced to place the industry upon a sound footing. Most of the leading buyers in America and Europe now insist upon the Echizen and Kaga material bearing the official brands of Matsu, etc., to indicate quality; let them hereafter be equally rigorous in paying only for the net weight of the silk indicated by the Government stamp (which will appear in clear Roman numerals on the end of each piece). If these official weights be taken as the basis, the dealers and shippers in Japan will soon find their watering practice useless and this detrimental feature will be eliminated.

**Handkerchiefs.**—In this department the Customs' returns indicate so marked an increase in the trade that the records of eight or ten years ago have to be referred to to find a parallel. Unfortunately, in this instance (as in Silk Piece Goods), exporters do not make accurate declarations, and the figures shown by the official statement must therefore be accepted with reserve. Be that as it may, however, there has certainly been a considerable improvement in the trade, and although European demand appears to be satisfied for the present, American shippers continue active.

**Tea.**—The total settlements at this port for the year amounted to about Piculs 180,000, against Piculs 195,000 for the previous year.

Prices for First Crop choice grades ruled about the same as in 1903, and this high basis was practically maintained until they were exhausted; lower grades of the First Crop, however, ruled a little easier, ranging from *yen* 2 to *yen* 4 lower than the previous year. Prices for Second Crop Teas during July averaged about *yen* 4 per picul under prices of the previous season, the home market showing little change for a month or two; later on, however, as it became apparent that the late picking had not been excessive and that the home market was rather understocked, holders became firmer. At the end of the year stocks upon this side were practically nil, whilst advices

from America report a different and less desirable state of things there.

The quality of the Teas, whilst not falling materially below the average of the past few years, left much to be desired.

**Copper.**—The increasing demand for this product for the China Mint requirements as well as a continued want for the home trade, have absorbed the bulk of production, which for the year under review is estimated at 35,000 tons.

Shipments to Europe and India have ceased entirely since April, the prices paid here for the metal being over 10% higher than those obtainable in Europe.

Total Exports from Japan amount to 19,500 tons, of which about 15,000 tons went to China.

**Fish Oil.**—The old stocks carried over from last year were somewhat underestimated, but, owing to a better demand from European markets, could be almost cleared at *yen* 6 to *yen* 6.50 per 100 *kân* in January.

The outbreak of the war almost put a stop to further business for several months, the summer catch turned out to be only very small, and in view of the war the Saghalien catch could not take place, but nevertheless owing to the very dull tendency of the consuming markets abroad prices dropped gradually to *yen* 5.30/50 per 100 *kân*, at which parity a moderate business was done, and finally the price declined to *yen* 4.80/75. Even the fact that the winter catch was rather short and that prices were comparatively cheap, did not tempt exporters to make purchases on a larger scale, and consequently the stocks left at the end of December were rather heavy.

**Japan Yarn.**—The export of these Yarns showed a decrease in 1904 as compared with the preceding year, as will be seen by the figures below:—

Piculs.	1904.	Value, Yen.
771,924 .....	1903.	29,268,455
921,608 .....	1902.	31,418,613
592,443 .....	1901.	19,901,522

#### IMPORTS.

**Raw Cotton.**—The import of this article has not been adversely affected by the war, as the following figures show, viz:—

	Yen.
Value of import during 1903 .....	69,500,000
" " " " 1904 .....	71,500,000

The tendency of the market had been rising up to May, and reached its climax in the middle of that month.

**Yarn.**  
45.50 for American Middling  
32.50 " Broach  
31.50 " Chinese (best quality);  
and since then prices declined continually, and were in December as low as

Yen.
25.00 for American Middling
23.00 " Broach
20.00 " Chinese (best quality).

Deliveries from the Hatoba were much retarded, especially during the last three months, owing to insufficient Customs accommodation.

**Yarn.**—The heavy annual decline in the import of Yarns, and the gradually increasing quantity of the Japanese product, has for some years past pointed to the fact that the import trade was doomed, and the time has now arrived when it may be said that it is defunct, and reference thereto may in future be left out of the Board's Report.

Taking the value of this import for two past periods of four years, the figures show:—

1896.	1900.	1904.
Yen.	Yen.	Yen.
11,372,001	7,043,046	343,290

The import to Yokohama during 1904 was 3,740 piculs, against 7,243 piculs in the previous year, while the deliveries were 4,004 piculs, against 15,290 piculs in 1903, and the stock on December 31, 1904 amounted to only 948 piculs.

**Shirtings.—Grey.**—There has been a large decrease in this department as compared with recent years. High cost in Lancashire, increasing production by the Japanese weaving companies, and a restriction of demand owing to the war, have all combined to reduce the volume of business. Still, importers have been careful and conservative, and there is no reason to suppose that they have been working at a loss. The projected Consumption Tax may tend still further to restrict the demand in 1905, but considering the cheaper price of raw material there should still be a working margin in the coming year. Comparative imports for six years are as under:—

	1904.	1903.	1902.
Pieces .....	212,950	463,743	785,293

Pieces ..... 1901. 1900. 1899.  
479,502 750,117 748,829

White.—Trade in this branch has been on a fairly satisfactory basis. Home cost was high, but regular buyers absorbed the normal quantity, and well-known qualities were in good demand. The year closes with no glut of stocks, and contracts are already made at lower rates for arrival in 1905. Notwithstanding the heavy Consumption Tax, the prospect is healthy for a moderate and profitable trade.

Fancy Cottons.—The exceptional conditions prevailing last year render any comparison with former years quite fallacious. The uncertainty imported into all business forecasts by the outbreak of hostilities, coupled with the high price of Cotton and Cotton Manufactures, caused buyers to restrict their forward commitments to very small figures. The volume of new business done was consequently small, but clearances during 1904, although not very free, were steady, and importers' godowns were considerably relieved. Apart from the effect that prolonged hostilities and additional taxation may have upon trade, credit, and consumption, the present position may be considered favourable.

Prints.—Business in printed Cottons has again been unsatisfactory, and there would seem to be no prospect of a return to the trade level of some five or six years ago. Tokyo continues to be largely supplied by Osaka, and the superiority of the Osaka design, with the low price accepted by Osaka Merchants for their surplus holdings, would seem to offer Tokyo buyers every inducement to adhere to present methods of satisfying their requirements.

Velvets.—Although Manchester prices for Velvets did not show an advance in any way to be compared with the rise in other classes of Cotton Goods, moderate costs did not counterbalance unsatisfactory market conditions, and very few new orders were placed, stocks in importers' godowns being sufficient for current needs.

Cloths.—An exceptionally large trade was done during 1904, mostly against Government Orders, and in anticipation of Government requirements. For ordinary public consumption, orders were scarce, the general demand being of a very inactive character.

Woolens.—Owing to the political situation, prospects seemed very doubtful at the commencement of the year, but eventually 1904 turned out a very good and prosperous year for the trade. During the spring, black and blue Worsteds and Serges sold well; mixture and striped Serges in good demand during March only, but fancy Worsteds and figured Coatings proved a drug in the market, and a considerable part of these lines had to be carried over for the next season. Forward business for arrival Spring 1905 was small, and limited to black, blue, and Khaki Serges, while next to nothing was done in other regular lines.

Stocks for the winter season proved short owing to two causes, namely, (1) The Army Department having greatly underestimated their requirements offered readily for all stocks suitable for their needs, and (2) the good harvest created a much larger than the anticipated demand up country. Under such conditions Army Cloth, Presidents, and similar articles, Blankets and Flannels, went up to record prices, as much as double market prices being realised for Blankets on the spot. An equally ready sale, though little above normal limits, was obtained for better class black and blue Worsteds, Serges, and Super-fines, and considerable trade was done during July to October for near forward arrival, but Mixtures and Fancy Worsteds, and coloured and figured Coatings were in very limited demand at prices barely covering cost, and orders for Autumn 1905 in these lines were comparatively few and very small. The additional 15 per cent. tax did not seem to have any material effect on the market.

The market was active at the end of the year, and with stocks nearly exhausted, prospects were distinctly good. There is, however, cause for fear that forward business may have been overdone and that the arrivals for Autumn 1905 may prove in excess of the actual demand in Army Cloth, Presidents, Beavers, and cheap rough Serges. Flannels, Blankets, and Woollen Yarns participated in the favourable condition of the market.

Native mills proving insufficient for the demand of the Army, the Japanese Government placed very large contracts for Army Cloth, Blankets, and Woollen Yarns with a number of local foreign firms.

On April 1st a consumption tax of 15 per cent. was suddenly enforced by vote of Parliament. Considerable anxiety was felt by foreign importers as to the probability of its regular collection on running contracts from the Japanese indentors, but the latter responded promptly to the call on the arrival of their intended goods.

Metals.—Total values and quantities show an increase over 1903, and the year's trading has resulted more satisfactorily to importers than that of several years past. The year commenced with comparatively small stocks, while demand was stimulated by purchases in connection with the war, and for some

months the market was cleared of all supplies immediately upon arrival. Encouraged by this state of affairs, buyers made large forward contracts in the latter months of the year, and December closed with a quieter feeling.

As a matter of interest, it may be remarked that the trade in Metals is not expanding in proportion to the total imports. Although quantities show an increase over 1903, they are not equal to the figure of earlier years, as will be seen below. When the war ceases and the Imperial Steel Works again becomes a factor in the home trade, we may expect diminishing imports.

Iron and Mild Steel Bars.—Imports during the 12 months amounted to 530,000 piculs, against 475,000 piculs in 1903 and 638,000 piculs, in 1898.

Plates and Sheets.—Imports were 234,000 piculs, against 199,000 piculs in 1903 and 268,000 piculs in 1900.

Pig Iron.—Imports 176,000 piculs, against 156,000 piculs in 1903 and 339,000 piculs in 1898.

Wire Nails.—Imports 125,000 kegs, against 141,500 kegs 1903 and 164,929 kegs in 1899.

Galvanized Sheets.—Imports were 119,000 piculs, against 180,000 piculs in 1903 and 121,500 piculs in 1900.

Tin Plates.—The imports have been enormous, amounting to 147,975 boxes or 7,428 tons, against 82,578 boxes or 4,145 tons in 1903. The increase is entirely due to demands in connection with the war, for canning provisions and for packing cases. Prices have ruled very high, and for some time there was difficulty in obtaining goods fast enough. A large quantity was purchased from the United States, price being entirely secondary to the quick delivery which was required. There is evidence, however, that supplies will soon be in excess.

Kerosene.—Kerosene Oil being one of those articles which has been severely taxed, on account of the war, it is only natural that the trade has somewhat suffered during the year 1904. Up to October 1st, there was a Duty and a Consumption Tax upon Oil, but on that date the Consumption Tax was removed and a Duty of seventy-six (76 sen) a case was imposed, this impost being applicable equally to Case and Bulk Oils. The effect of this very heavy burden has been to hamper the sale of Oil, and also to create competition.

Contrary to general expectations, Echigo Oil did not benefit by this Duty to the extent that was anticipated, and the figures for the year under review are about the same as they were for 1902. The Hoken Oil Co. again heads the list, with an output of 720,000 cases; then follow the Nippon Co. with 480,000 cases, the International Co. with 120,000 cases, and finally various small companies aggregating 240,000 cases. The International Oil Co. are said to have found some favourable results in August and September; but the prospecting which has been prosecuted in Hokkaido has developed most unfavourably and been practically abandoned.

The two leading companies in Echigo, the Hoken Co. and the Nippon Co., have amalgamated, no doubt with a view of taking advantage of the high prices imposed on imported Oil; but, unfortunately for them, a keen struggle having arisen towards the end of the year between importers of American and Russian Oil, these two Japanese companies have been placed in the undesirable position of holding a large and unsaleable stock of Echigo Oil.

As regards prices, the highest price for the year, for American Oil, was in January, when it was selling at yen 3.40. In May the price was down to yen 3.16, and the lowest recorded was in July, viz. yen 3. Towards the end of the year the price advanced again to yen 3.38, and after that receded rapidly. The highest price for Russian, "Anchor" brand, was from October to December, when it touched yen 3.32, and the lowest was in July, yen 2.88. Tank Oil has shown a steady tendency all throughout the year, opening at yen 2.20, and closing in December at yen 2.70.

A new feature has been introduced by the import, on the part of the Standard Oil Co., of their "Camelia" Oil. It was introduced into the market in July, at a price of about yen 2.88, and steadily advanced to yen 3.15, towards the end of the year.

At the time of writing, the Diet has passed a measure further increasing the duty on Kerosene Oil, which will be raised, on the 1st July, to ninety-six sen (96 sen) on Tank and Case Oil.

In this connection it should be mentioned that this is the first occasion upon which Case and Bulk Oils have been taxed on the same basis, and buyers of the latter are very much dissatisfied with their Government on account of this measure.

The apparent increase in the deliveries of Russian Oil during 1904 is practically accounted for by the figures including the deliveries of "Camelia" Oil, which comprised 381,402 cases of the total Russian Oil deliveries.

The year 1905 opens unfavourably with a very weak and falling market, the result of which is sure to be disadvantageous in every way to the Oil business.

The subjoined tables shows the arrivals and deliveries of American and Russian Oils, the latter comprising "Anchor," "Rain," "Camelia," and Tank Oils:—

	AMERICAN.		RUSSIAN.	
	Arrivals.	Deliveries.	Arrivals.	Deliveries.
1903	1,252,767	1,206,939	1,567,724	1,406,052
1904	1,672,949	1,195,973	1,615,770	1,709,913
	420,182 increase.	10,966 decrease.	48,046 increase.	303,661 increase.

Sugar.—The threatening political position at the beginning of the year, as well as the anticipation of a heavy increase in the Consumption Tax in the event of the outbreak of hostilities, resulted in a brisk speculative business during the first three months, and prices consequently experienced a rapid advance all round. After the imposition of the additional tax, which came into force on the 1st of April, there was for some time a lull in the market, which had become over-stocked by recent purchases, and demand, on the other hand, was restricted on account of the enhanced value of Sugar, so that the months of April and May saw very little business put through. During this season the Japanese refiners, in anticipation of a further rise, were holding out for higher prices than buyers then cared to pay, and they (Tokyo and Osaka) were finally closed, each for about three to four weeks, ostensibly to give a thorough overhaul to their plant, but in reality to expedite the enhancement of quotations by stopping further increase in their stocks.

With the setting in of the usual summer demand in June/July the market recovered its activity to some extent, and prices resumed the upward course, which movement was supported by the increase of the Import Duty (lower grades) on the 1st of July, as well as by the absence of importation from Hongkong owing to the difficulty of obtaining freight to Japan ports.

Towards the end of the year a fresh speculative element—due to the rumour of a short crop of European Beet and to a further prospective increase in the Sugar Tax—again excited the market, but the volume of transactions was only limited.

In short, two prominent features may be mentioned as having ruled the market throughout the year:—

1. Steady and continuous advance in prices caused by the increased Import Duty and Consumption Tax, as well as by the heavy rise in the value of Java Raws during the latter part of the year.

2. Limited demand in consequence of enhanced prices.

The following comparative table will show the extent of the rise in quotations during the year:—

	Quotation, Quotation Quotation. Dec. 1903, July 1904, Dec. 1904.		
	Yen.	Yen.	Yen.
China Sugar Refinery Allix.	11.25	15.25	17.60
Taikoo "	B.A....	11.00	17.65
Tokyo "	A.A....	11.20	15.10

Java Sugar.—The season for this commodity practically begins in May and finishes in December. The total shipments during the period covered by the above months for the last three years have been,

	1902.	1903.	1904.
Tons .....	709,055	734,581	834,248

of which Japan took

	1902.	1903.	1904.
Tons .....	47,460	108,685	90,663

The enormous development of the trade with Japan in 1903 was, no doubt, due to the heavy duties imposed on imported refined Sugar, which, with the rebate allowed to Japanese refiners, made it possible for these to compete successfully with foreign manufacturers. The year 1904 has shown a falling off in the importation to Japan which arises from the very high prices demanded owing to the short Beet-root production and the increased consumption in Europe. The 1905 Java crop has already been sold, and considerable transactions for 1906 crop have been recorded.

Indigo.—Plant Indigo.—The trade in Plant Indigo has been of a most unsatisfactory character throughout the year, and there appears to be every prospect of the natural dye being driven out of the market by the free sales at low prices of Artificial Indigo. There was a temporary demand for Plant Indigo in the early autumn, and holders availed themselves of the opportunity to reduce stocks.

Several parcels imported from India were re-exported during the year, and as imports from Java were small, existing stocks at the end of December were light.

Provided the manufacturers of Artificial Indigo continue to sell in Japan at the prices current during the past year, there is little hope of any extensive trade in Plant Indigo.

Artificial Indigo.—Since our last Annual Report, the imports of Plant Indigo have greatly decreased, in fact about 1,000 cases of Indian Indigo have been re-exported, as the price offered by the Japanese

would have left a great loss to the importers. On the other hand, the imports of Artificial Indigo have further increased, as the price has again come down and the consumers now fully appreciate the many advantages offered by the artificial product. At the end of the year under review, the price for Artificial Indigo has been raised, but still remains much cheaper than Plant Indigo, so that there is very little hope for the natural product.

The imports for 1904 were *kin* 1,034,104 of the value of *yen* 2,117,678 being:—

76.54 per cent.	of the Artificial product.
9.20 per cent.	Plant Indigo from Dutch India.
7.44 per cent.	" " British India.
6.82 per cent.	" " United States of America and other countries.

**Shipping.**—The extent to which the large foreign-going steamers of Japan have been taken up for transport purposes is shown by comparing the inward and outward tonnage of those vessels sailing from Yokohama to Australia, India, Europe, and the Pacific Coast, which during 1904 were: inward 80,175 tons outward 48,539 tons, against during 1903, inward 440,027 tons, and outward 442,134 tons. The consequence of this diversion of Japanese bottoms, which included many vessels employed on the coast as well as those on the routes referred to above, was the chartering of foreign steamers on a large scale, as is shown by the increase in the tonnage under different flags entering Yokohama during 1904 compared with the previous year. The total increase in the tonnage entering Yokohama in 1904 over the preceding year was 1,037,719 tons, British tonnage showing an increase over 1903, of 700,325 tons, German 144,937 tons, Norwegian 110,061 tons, Swedish 38,339 tons, and Dutch 24,553 tons. Most of the increase under these flags was due to chartering, while the increase by 71,348 tons of American vessels in 1904 over the previous year was mainly due to larger vessels from Pacific ports. Steam vessel—13 British, 3 Dutch, 2 German, and 1 Norwegian—were purchased and placed under the Japanese flag during 1904, at a cost of *yen* 9,319,697.

**Freights.**—The rates for Europe at the close of 1903 were maintained throughout 1904 for general cargo, namely, 50/ (45/ for B class, 40/ for C class), and for Waste Silk per 40 cubic feet the rate was *yen* 22, which continued till the end of the year.

For New York via Canal, for general merchandise the rate closed in 1903 at 25/ but was subsequently raised to 30/ at which figure it remained during 1904.

The extent of competition now existing in Transatlantic rates, and the numerous opportunities afforded of freight by tramp steamers from London, Liverpool, &c., to the U. S. Atlantic seaboard, makes it possible to route goods from England, via New York, to Japan, and this advantage in rates is doubtless being availed of with quantities of goods the speedy transport of which is no object. The only disadvantage is the transshipment necessary, but with proper handling ample compensation should be found in the advantageous freight rates.

For the Pacific the freight on Tea, which closed in 1903 at 1 1/4 cent per pound, continued throughout 1904 at the same rate. Measurement cargo for New York and Overland points opened in 1904 at \$8 per 40 cubic feet and continued at that figure for the remainder of the year.

**Railways.**—New construction has been largely suspended during the period under review, but with the termination of the war it is expected that many new lines and extensions will be commenced. There has been a small increase all round in the receipts, both in the passenger and goods departments, on Government as well as private railways, but this is partly due to the altered rates. The following table shows the total mileage and receipts for the last financial year and the increase in mileage as compared with the previous twelve months:—

	Total Mileage.		Increase over the previous year.	
	Miles.	Chains.	Miles.	Chains.
Government Railways	1,344	70	118	14
Private Railways	3,150	57	130	77
Total	4,495	47	249	11
		No.	Yen.	
Government Railways (Passengers)	34,008,286		12,592,919	
Private Railways (Passengers)	79,861,798		17,862,643	
Total	113,870,084		30,455,562	
		Tons.	Yen.	
Government Railways (Goods)	3,492,622		6,374,015	
Private Railways (Goods)	14,268,690		15,173,449	
Total	17,761,312		21,547,464	

Total receipts for passengers and goods on Government and private railways, *yen* 52,003,026.

**Bullion and Exchange.**—The past is the seventh year of the Gold Standard of Japan, that Standard having been adopted on 1st October, 1897. On the outbreak of war with Russia fears were entertained as to the ability of Japan to maintain her Gold Standard; these fears proved groundless owing to the judicious action of the Government in raising Foreign Loans abroad and retaining a large portion of the proceeds in gold to secure the convertibility of their paper currency.

At the end of 1903, the Gold Reserve of the Bank of Japan stood at *yen* 118,000,000 against a note issue of *yen* 229,000,000, and gradually declined to *yen* 68,000,030 against a note issue of *yen* 200,000,000, at the end of May 1904, when the stock was replenished by the proceeds of the Gold Loan of £10,000,000 raised abroad.

At the end of December, 1904, the Gold Reserve stood at *yen* 82,500,000 against a note issue of *yen* 278,000,000, and there was still to be received a further sum of about *yen* 84,000,000 out of the proceeds of the Second Gold Loan of £12,000,000.

It is computed that, of the above note circulation, there are some *yen* 30,000,000 circulating in Manchuria and Korea.

The figures for the last six years are:—

	Gold Reserve.	Note Issue.
	Yen.	Yen.
1904	82,460,000	277,789,000
1903	118,271,000	229,556,000
1902	108,033,000	230,809,000
1901	68,500,000	180,000,000
1900	66,000,000	215,000,000
1899	110,500,000	225,000,000

During 1904 exports of Gold exceeded imports by *yen* 100,570,000, but imports of Silver exceeded exports of that metal by *yen* 26,731,000.

During the same period, Foreign Trade showed a balance against Japan of close upon *yen* 52,000,000.

The following table gives the imports and exports of Gold during the past nine years:—

	Imports.	Exports.
	Y.	Y.
1896	10,217,458	1,996,575
1897	64,313,492	8,863,797
1898	37,027,752	46,281,343
1899	20,080,695	8,768,365
1900	8,967,191	51,761,614
1901	10,651,207	11,477,852
1902	30,183,670	453,313
1903	27,807,469	19,001,198
1904	5,456,322	106,026,564

Blankets 4 lbs. per pair	599,445	26,577	598,723	28,080	2,608	1,556,680

ing shall apply to the Chief of the Mine Inspection Office in respect to prospecting, and to the Minister of Agriculture and Commerce in respect to mining, the application being accompanied by a map of the mining area.

Art. XXII.—Persons applying for mining may effect a change in the name of the applicant. In this case, such change shall not be of valid effect unless a notification has been made to the Chief of the Mine Inspection Office in respect to prospecting, and to the Minister of Agriculture and Commerce in respect to mining.

Art. XXIII.—Persons applying for mining shall prove the existence in the land in respect to which application is made of the mineral intended to be mined.

Art. XXIV.—Should the Chief of the Mine Inspection Office deem land in respect to which application is made for prospecting, suitable for mining, he shall order an application for mining to be made.

In the case contemplated in the preceding paragraph, should no application for mining be made within 60 days from the date of service of the order, the application for prospecting shall not be granted.

The provisions of the preceding two paragraphs apply *mutatis mutandis* to a case where the Minister of Agriculture and Commerce deems further prospecting necessary on the land in respect to which application for mining is made.

Art. XXV.—When it is deemed that the position and shape of land in respect to which application is made for mining differs from the position and shape of mineral formation and that consequently they will be injurious to mining interests, the Minister of Agriculture and Commerce shall order an application to be made for amendment thereof.

In the case contemplated in the preceding paragraph, should no application for amendment be made within 60 days from the day of service of the order, the application for mining shall not be granted.

Art. XXVI.—When it is deemed that the position and shape of land in respect to which application is made for mining differ from the position and shape of the mineral formation, and that consequently they will be injurious to mining interests, the applicant for mining may apply for an amendment thereof.

Art. XXVII.—Mining applicants may apply for an increase or decrease of the area of land in respect to which application has been made.

Art. XXVIII.—In case land, in respect to which an application for prospecting has been made, falls within a mining area belonging to another person at the time of making such application, should it be made for the same kind of mineral, permission shall not be granted in respect to such portion of the land as is coincident with the mining area.

Art. XXIX.—In case land, in respect to which an application for mining has been made, falls within a mining area belonging to another person at the time when such application is made, should it be made for the same kind of minerals, permission shall not be granted in respect to such portion of the land as is coincident with the mining area. The case contemplated in Article 36 is, however, excepted.

Art. XXX.—In case land, in respect to which an application for mining has been made, falls within land under application for prospecting, made by another person, should it be made for the same kind of mineral, the provisions of Pars. I. and II. of Article 24 shall be applied *mutatis mutandis* to the coincident portion of the land.

Art. XXXI.—In case land, in respect to which an application for mining has been made, is coincident with a mining area owned by another person, should it be made for a different kind of mineral, the Chief of the Mine Inspection Office shall notify the person possessed of the mining right to that effect.

The person possessed of the mining right may himself apply within 60 days from the date of service of the order mentioned in the preceding paragraph, for permission to mine such minerals.

The provisions of the preceding two paragraphs do not apply to the case contemplated in Art. 36, or to cases where the previous consent of the

person entitled to the mining right has been obtained.

The application mentioned in Par. 1 shall not be granted, if it be deemed to obstruct the mining operations of other persons.

Art. XXXII.—Applications for mining shall not be granted should they be deemed injurious to the public welfare or unworthy of the undertaking.

Art. XXXIII.—In the case of coincident prospecting areas, or of coincident mining areas in respect to which application has been made, the person whose application has been despatched earliest shall have the preferential right relative to such coincident portion. When the dates of despatch of applications are identical, the Chief of the Mine Inspection Office shall notify each applicant to that effect. In this case, the applicants shall arrange the matter between themselves and make a report to that effect within 60 days from the date of sending such order.

In case applicants do not make the report specified in the preceding paragraph, the person entitled to the preferential right shall be determined by means of drawing lots.

The provisions of the two preceding paragraphs are not applicable to cases contemplated in Arts. 25 and 26, Par. 2 of Art. 31 and Art. 36.

In the case of land in respect to which application for prospecting is made being identical to land regarding which application for mining is made, should the date of the despatch of the applications be the same the applicant for mining shall be entitled to the preferential right as regards the coincident portion of the land.

Art. XXXIV.—In case a person applying for permission to prospect makes a further application for permission to mine the same kind of mineral, should the land under application be coincident, the application for mining shall be considered to take the place of the application for prospecting on the date of sending the latter application with regard to such coincident portion of the land under application. This rule does not, however, apply to the case contemplated in Par. 4 of the preceding article.

The provisions of the preceding paragraph are applicable *mutatis mutandis* to cases where an applicant for mining makes a further application for prospecting relative to the same kind of minerals.

The provisions of the preceding two paragraphs do not apply to applications made after the expiration of the term in cases contemplated in Arts. 24 and 25.

Art. XXXV.—Persons entitled to a right of mining may make application to the Minister of Agriculture and Commerce for the amalgamation or partition of mining areas. The same applies to cases where a portion of a mining area is to be amalgamated with another mining area.

When a right of mortgage has been created, should it be desired to make the application mentioned in the preceding paragraph, the consent of the mortgagee shall be obtained and arrangements made respecting the rank of the right of mortgage.

Art. XXXVI.—Should it be necessary, on account of the position and shape of mineral formations, to dig into a mining area belonging to another person, an amendment of the mining area may be applied for upon obtaining consent of the person entitled to a mining right in respect to the adjacent mining area. The person entitled to a mining right in respect to the adjacent mining area may not refuse his consent without valid and proper ground.

Art. XXXVII.—The provisions of Par. 1 of Art. 25, Art. 26, Art. 27, and Par. 3 of Art. 33 are applicable *mutatis mutandis* to mining areas.

In cases corresponding to Par. 1 of Art. 25 should no application be made within 60 days from the date of service of the order, cancellation of rights of mining shall be made by the Minister of Agriculture and Commerce.

When a right of mortgage has been created, should it be desired to make application for a decrease of a mining area the consent of the mortgagee shall be previously obtained.

Art. XXXVIII.—In case an application for mining has been granted in mistake or error,

revision of the mining area shall be ordered or cancellation of the mining right shall be made by the Minister of Agriculture and Commerce.

In the case of a revision contemplated in the preceding paragraph being ordered, should no application be made within 60 days from the date of service of the order, the Minister of Agriculture and Commerce shall cancel the mining right.

Art. XXXIX.—When mining operations are deemed injurious to the public welfare, the Minister of Agriculture and Commerce shall cancel the mining right.

Art. XL.—If, without any valid reason, a person entitled to a mining right does not commence operations within one year from the date of the record in the Mining Register, or if he has suspended operations for more than one year, or if he has not mined in accordance with the scheme of work, the Minister of Agriculture and Commerce may cancel the mining right.

Art. XLI.—In case a person entitled to a mining right fails to comply with the order specified in Art. 72, the Minister of Agriculture and Commerce may cancel the mining right.

Art. XLII.—When a right of mining has been cancelled the Chief of the Mine Inspection Office shall give immediate notice to any mortgagee thereof.

The mortgagee may, within 30 days from the date of receipt of the notice mentioned in the preceding paragraph, demand that the right of mortgage be put up to and sold at public auction. Cases where cancellation of a right of mining is made in accordance with the provisions of Par. 1 of Art. 38 and Art. 39 are, however, excepted.

Rights of mining shall be regarded as continuing to be valid, until the time mentioned in the preceding paragraph, or the day on which the auction procedure has been completed, so far as the object of the public auction is concerned.

The proceeds of the auction shall be applied to the expenses of the auction and to the repayment of monies owing to the mortgagee; the balance shall revert to the Treasury.

Purchasers by auction shall be deemed to have had the right of mining transferred to them at the time when the cancellation thereof has been recorded.

Art. XLIII.—The provisions of the preceding article are applicable *mutatis mutandis* to cases where a person possessed of a right of mining has relinquished his business.

Art. XLIV.—Persons possessed of rights of mining shall hand in a scheme of intended operations to the Chief of the Mine Inspection Office as determined by Order. The same is applicable to cases where a change has been made in the programme.

Persons possessed of rights of mining may not engage in mining unless in accordance with a regular scheme of operations.

Art. XLV.—The Chief of the Mine Inspection Office may point out his reasons and order alterations to be made to schemes of work.

The schemes altered in accordance with the provisions of the preceding paragraph shall not be changed unless the permission of the Chief of the Mine Inspection Office has been obtained.

Art. XLVI.—Persons having rights of mining shall keep a plan of the interior of the mine and a mining book at their mining offices, as determined by Order; and duplicate copies of the same shall be handed in to the Chief of the Mine Inspection Office.

Art. XLVII.—Persons having rights of mining shall hand in to the Chief of the Mine Inspection Office a statement of particulars relating to their mining operations as determined by Order.

Art. XLVIII.—Mining products acquired in the course of prospecting may not be disposed of unless the permission of the Chief of the Mine Inspection Office has been obtained.

Art. XLIX.—Persons possessed of mining rights, or persons interested, may apply to the Chief of the Mine Inspection Office for actual investigation to be made in respect to adjacent mining areas belonging to other persons.

Applicants must furnish labour and materials necessary for the investigation mentioned in the preceding paragraph.

## CHAPTER III.—EMPLOYMENT OF LAND.

Art. L.—The expression *persons concerned* (關係人) in this chapter includes persons possessing rights relative to land which may be employed or acquired prior to the service of the notice mentioned in Articles 52 to 54 and Article 56; also those who have succeeded, subsequent to the service of the notice, to rights which existed prior to the service of such notice.

Art. LI.—The expression *compensation* (償補金) in this chapter includes consideration, land rents, and all other compensation for loss ordinarily accruing to land-owners or persons concerned.

Art. LII.—When it is necessary for the purpose of making an application to be allowed to mine, or when it is necessary for mining purposes, persons intending to apply to be allowed to mine, mining applicants, and persons entitled to mining rights, may, upon receiving permission from the Chief of the Mine Inspection Office, enter upon land belonging to other persons to make surveys and inspections.

When persons who have obtained the permission mentioned in the preceding paragraph intend to enter upon land belonging to others, they shall previously notify the possessors of such land.

Art. LIII.—If necessary to the survey or investigation which is to be made according to the provisions of the preceding article, any object forming an obstacle may be removed after obtaining the permission of the Chief of the Mine Inspection Office.

In case persons who have obtained the permission specified in the preceding paragraph intend to remove any object forming an obstacle, they shall previously notify the owner or possessor thereof.

Art. LIV.—If necessary to avert imminent danger relative to mining, persons entitled to mining rights may, upon receiving permission from the Chief of the Mine Inspection Office immediately enter upon or use land belonging to other persons.

In the case contemplated in the preceding paragraph, persons entitled to mining rights shall, without delay, notify the possessor of the land.

Art. LV.—With regard to loss sustained by land-owners or persons concerned in accordance with the preceding three articles, compensation for same must be paid when demanded.

Art. LVI.—Persons entitled to mining rights may use lands belonging to other persons when necessary for the following purposes:—

1. Boring, opening shafts or tunnels;
2. Providing depôts or store-places for ores, earth and stones, explosive compounds, lumber, fire-wood and coals, tailings, slag or ashes;
3. Constructing reducing plants;
4. Laying or constructing railways, tracks, roads, canals, drains, flumes, ponds and wells, wire rope-ways or electric wires;
5. Building and constructing other works or constructions necessary to mining.

When persons entitled to mining rights intend to use land belonging to other persons in accordance with the provisions of the preceding paragraph, the permission of the Chief of the Mine Inspection Office shall be obtained.

When the Chief of the Mine Inspection Office has given the permission mentioned in the preceding paragraph, notice to that effect shall be given to the land-owners and persons concerned.

Subsequent to giving the notice mentioned in the preceding paragraph, persons entitled to mining rights shall confer with the land-owners and persons concerned with a view to the acquisition of rights relating to the land.

Art. LVII.—When land has been used (使用) for a period exceeding three years, or the shape or nature of the land is altered, the owner may demand the purchase (收用) of the land.

Art. LVIII.—If owing to the purchase (收用) of a portion of the land, the remaining portion of the land cannot be employed for the purpose for which it was used in the past, the land-owner may demand the purchase (收用) of the whole land.

Art. LIX.—When land is to be employed (使用) (hired) or purchased (收用), compensation for same shall be paid to the land-owner and to the person concerned.

Art. LX.—If, owing to the employment (使用) or purchase (收用) of a portion of land, the value of the remaining portion of the land is reduced, or any loss sustained relative to such remaining portion, compensation for same shall be paid.

Art. LXI.—If, owing to the employment of land on lease (使用) or purchase (收用), necessity arises to build, rebuild, enlarge or repair passages, drains, fences and other constructions, compensation shall be paid for same.

Art. LXII.—If, subsequent to the service of the notice mentioned in Article 56 it is intended to change the shape and nature of the land, or to build, rebuild, enlarge, or extensively repair any constructions, or to affix or add any objects, the land-owner or persons concerned shall obtain permission of the Chief of the Mine Inspection Office. Persons who have done the above acts without obtaining such permission are precluded from demanding compensation relative thereto.

Art. LXIII.—Persons entitled to mining rights shall pay compensation in respect of any loss sustained by the land-owner or persons concerned on account of abandonment or alteration of enterprises subsequent to the service of the notice specified in Article 56.

Art. LXIV.—Land-owners and persons concerned may require persons entitled to mining rights to furnish proper security relative to compensation.

Art. LXV.—When an arrangement has been made, a decision become conclusive, or a judicial judgment rendered regarding the employment (使用) or purchase (收用) of land, even though a decision relative to the compensation or security has not become conclusive, a person entitled to a mining right may employ (使用) or purchase (收用) the land by depositing (in a Public Deposit Office) compensation, or by furnishing security in accordance with the said decision.

Art. LXVI.—In case a person entitled to a mining right has made neither payment nor deposit of compensation, nor tendered security, land-owners and persons concerned may refuse to permit the employment of land.

Art. LXVII.—In case land is employed by purchase (收用) the ownership of the land shall be acquired by the person entitled to the mining right, and other rights over the land shall be extinguished from the time of the employment (收用).

In case of land employed (on lease) (使用), the right of employment shall be acquired by the person entitled to the mining right from the time of employment (使用), and the exercise of other rights over the said land shall, with the exception of rights which do not obstruct its use, be suspended during the term of employment (使用).

Art. LXVIII.—When the employment (使用) of land has ceased, the person entitled to the mining rights shall restore the land to its original state, or pay compensation for any loss arising on account of not restoring it to its original state, and return the land.

Art. LXIX.—Preferential rights, rights of pledge, or rights of mortgage, may be executed in respect to any compensation payable to a debtor on account of employment (使用) or purchase (收用) of the matter forming the subject of such right; but attachment must be made before the payment of same.

Art. LXX.—The provisions relating to the compulsory use (使用) or purchase (收用) are applicable *mutatis mutandis* to rights relative to the use of water.

## CHAPTER IV.—MINING POLICE.

Art. LXXI.—The following police affairs relating to mining shall be conducted by the Minister of Agriculture and Commerce and the Chief of the Office for the Control of Mines, as determined by Order:—

1. Preservation of peace relative to constructions and works;
2. Protection of life and public health;
3. Precaution against dangers and protection of other public welfare.

Art. LXXII.—When danger is apprehended in respect to mining, or when it is deemed injurious

to public welfare, the Minister of Agriculture and Commerce shall order persons entitled to mining rights to take precautionary measures or to suspend mining operations.

When necessary in order to avert imminent danger, the Chief of the Mine Inspection Office may take the measures mentioned in the preceding paragraph.

Art. LXXIII.—The Minister of Agriculture and Commerce may order persons entitled to the right of mining to appoint or make a change in the appointment of managers to be in charge of technical matters.

Rules relating to the qualification and functions of managers shall be determined by Order.

Art. LXXIV.—Even subsequent to termination of a mining right, the Minister of Agriculture and Commerce, and the Chief of the Mine Inspection Office may, within a period of one year from such termination, order a person who was entitled to such mining right to take precautionary measures against danger by correspondingly applying the provisions of Art. 72.

A person who has received the order mentioned in the preceding paragraph shall be considered to be a person entitled to mining rights so far as the object of taking precautionary measures against danger is concerned.

## CHAPTER V.—MINE LABOURERS.

Art. LXXV.—Persons entitled to rights of mining shall establish regulations relating to the hire and employment of mine labourers (礦夫), and obtain official permission *re* same from the Chief of the Mine Inspection Office.

Art. LXXVI.—A person entitled to mining rights shall, in accordance with the terms of Orders in that behalf, provide and keep a Mine Labourers Register at his mining office.

Art. LXXVII.—When a person entitled to mining rights has discharged a mine labourer, he shall, upon demand, give to the labourer a certificate showing the period of his engagement, the class of work in which he has been employed, his ability, his wages, and the cause of his discharge.

Art. LXXVIII.—A person entitled to mining rights shall determine one or more dates in each month and pay to the mine labourers, in currency, their wages at such specified times or times.

Art. LXXIX.—The Minister of Agriculture and Commerce may limit the age of mine labourers, working hours, and limit the class of female and child labour.

Art. LXXX.—In case a mine labourer has been wounded, fallen ill or died owing to mining operations on account of no gross fault of his own, the person entitled to mining rights shall grant relief to the labourer or his surviving relatives.

## CHAPTER VI.—MINING TAXES.

Art. LXXXI.—Mining Taxes will be imposed upon persons entitled to mining rights.

With regard to gold, silver, lead and iron ores, no tax on the mining production will be imposed.

Art. LXXXII.—With regard to mining, no business tax will be imposed upon persons entitled to mining rights.

Art. LXXXIII.—The tax imposed upon mining areas shall be 10 *sen* per annum in respect to prospecting and 40 *sen* per annum in respect to mining for each and every 1,000 *tsubo* (4/5ths of an acre) of mining area and any fraction of 1,000 *tsubo* (4/5ths of an acre) shall be considered as 1,000 *tsubo* (4/5ths of an acre).

Art. LXXXIV.—During December in each year, the tax imposed upon mining areas for the following year shall be paid in advance.

With the exception of the case contemplated in Paragraph 1 of Article 35, taxes on mining areas which become payable or deficient owing to recording the creation or alteration of a right of mining, and which are for the year of the record, shall be paid immediately.

Amount of taxes imposed upon mining areas payable in accordance with the preceding paragraph, will be calculated at the monthly rate. The same is applicable to taxes for the last year of the term of a right of mining.

Art. LXXXV.—The amount of tax imposed on mining productions shall be one per cent. of the value thereof.

With regard to the value of mining productions, the average price of the principal markets shall be taken as a basis, and the same will be publicly notified by the Minister of Agriculture and Commerce. With regard to productions relative to which public notification is not made, the value will be examined into and determined in each case.

Art. LXXXVI.—Taxes on mining productions for the previous year shall be paid during March in each year, provided, however, that they shall be paid immediately in the case of the extinction of rights of mining.

Art. LXXXVII.—Persons jointly entitled to mining rights shall be jointly and severally responsible for the payment of taxes.

Art. LXXXVIII.—Hokkaido, Urban, and ordinary Prefectures, as well as Cities, Towns and Villages may levy an additional tax on the mining taxes not exceeding Ten (10) per cent. of the principal tax.

With the exception of the additional tax mentioned in the preceding paragraph, Hokkaido, Urban and ordinary Prefectures, as well as Cities, towns and villages, may not levy taxes upon mining operations nor taxes based upon mine labourers, mining productions, mining areas, constructions, instruments, or machinery used for the direct mining purposes.

The provisions of the two preceding paragraphs are applicable *mutatis mutandis* to "Ku" (administrative divisions), "Magiri," (divisions of a county) and islands in Hokkaido and Okinawa Prefecture, and to those places considered equal to towns or villages.

#### CHAPTER VIII.—PETITIONS, SUITS AND DECISIONS.

Art. LXXXIX.—A person dissatisfied with a permission given, or refusal of application made, relative to mining, may lodge a petition (訴願), and, if he consider his rights unlawfully injured, may bring an administrative suit (行政訴訟).

Art. XC.—A person who has been refused the consent mentioned in Article 11 or 36 or who is unable to obtain such consent, may apply to the Chief of the Mine Inspection Office for a decision.

A person dissatisfied with the decision mentioned in the preceding paragraph may lodge a petition, and if he consider his rights unlawfully injured, may bring an administrative suit.

Art. XCI.—Persons dissatisfied with the cancellation of a mining right may lodge a petition, and if they consider their rights unlawfully injured, they may bring an administrative suit.

Art. XCII.—In case no arrangement has been made or an arrangement cannot be made as to the employment of land on lease (使用) or purchase, (收用) compensation, or security, persons entitled to mining rights may apply for the decision of the Chief of the Mine Inspection Office.

Persons dissatisfied with the decision regarding lease (使用) or purchase (收用) of land mentioned in the preceding paragraph may lodge a petition, and, if they consider their rights unlawfully injured, may bring an administrative suit.

Persons dissatisfied with the decision regarding compensation or security mentioned in Par. 1 may bring a suit in an ordinary court of law (通常裁判所).

Art. XCIII.—Neither petition nor suit may be brought after the expiration of thirty days from the date of service of the notice of disposition or decision.

With regard to persons who have not received notice of disposition or decision, the term mentioned in the preceding paragraph shall be calculated from the date of public notification thereof.

#### CHAPTER XIII.—PENAL PROVISIONS.

Art. XCIV.—Persons who have mined minerals without possessing mining rights, or who have obtained mining rights by fraudulent acts (詐偽ノ所爲), shall be punished by major imprisonment not exceeding two years or a fine not exceeding yen 1,000.

Persons who, through error or mistake, have mined minerals outside the mining areas shall be punished by a fine not exceeding yen 500.

Art. XCV.—In the case contemplated in the preceding Article, minerals mined shall be con-

fiscated; and in case they have been either transferred or consumed, the price thereof shall be collected.

Art. XCVI.—Persons who have acted contrary to the provisions of Par. 3 of Article 10 or Article 11, or who do not comply with the orders mentioned in Article 72 or Par. 1 of Art. 74, shall be punished by a fine not exceeding yen 200.

Art. XCVII.—Persons who have infringed the provisions of Article 44 or Par. 2 of Article 45 or who do not comply with the orders mentioned in Par. 1 of Article 45 or Par. 1 of Article 73, or who have infringed the provisions of orders issued in accordance with Arts. 79 or 80, shall be punished by a fine not exceeding yen 150.

Art. XCVIII.—Persons who have infringed the provisions of Arts 46 to 48, 76 and 78, shall be punished by a fine not exceeding yen 100.

Art. XCIX.—Persons who have removed any obstruction without having obtained the permission mentioned in Par. 1 of Article 53 or who have infringed the provisions of Article 75 shall be punished by a fine not exceeding yen 50.

The same penalty shall be imposed on persons who have refused to allow competent officials to inspect writings or objects relative to mining or obstructed such inspection. Should, however, express provisions governing the case exist in the Penal Code, punishment shall be inflicted in accordance with that Code.

Art. C.—Persons who have infringed the provisions of Art. 77 shall be punished by a fine not exceeding yen 20.

Art. CI.—Persons who have, by fraud or any other dishonest acts (詐偽其他不正ノ所爲), evaded, or attempted to evade, the payment of mining taxes, shall be punished by a fine equal to three times the amount of the taxes thus evaded.

Art. CII.—With regard to persons who have infringed either the provisions of this law or those of any order issued by virtue of this law, the provisions relating to commutation of penalties and aggravation of penalties on account of repetition of offences, and the provisions governing the case of several offences being committed by the same person, shall not be applied.

Art. CIII.—In case a person entitled to mining rights, is a minor, or a person interdicted from the management of his property, the penal provisions applicable to him by virtue of this law, or the provisions of any order which may be issued in accordance with this law, shall be applied to the legal representatives. Provided, however, that minors who have the same capacity as an adult shall not come under this rule.

Art. CIV.—Should the agents of a person entitled to mining rights, of the head or members of his family, persons residing with him, employees, mine-labourers, and of other persons employed by and serving under him have infringed this law in connection with his business, he cannot be exempted from penalties in accordance with the provisions of this law.

The same holds good with regard to the penal provisions of any order which may be issued by virtue of this law, except when any special provisions to the contrary are included in the order.

Art. CV.—In the case of the preceding two articles neither imprisonment nor police detention can be inflicted.

Art. CVI.—The provisions of Law No. 52, issued in the 33rd year of Meiji (1900) are applicable *mutatis mutandis* to offences foreseen in this law or in any order issued in accordance with this law.

#### SUPPLEMENTARY PROVISIONS.

Art. CVII.—This law shall be enforced from the 1st of July of the 38th year of Meiji (1905).

The Mining Regulations (鑛業條例) are hereby abolished.

Art. CVIII.—Permission for prospecting given under the Mining Regulations shall be considered as the record of the right of prospecting.

Art. CIX.—Grants of leases given in accordance with the Japanese Mining Law, (日本坑法) and mining privileges granted in accordance with the Mining Regulations (鑛業條例) shall be considered as records of rights of mining. Provided, however, that those privileges which have been granted in respect to mining areas containing less

than the minimum extent determined by Par. 2 of Art. 41 of the Mining Regulations (鑛業條例) shall become extinct at the expiration of the term thereof.

Art. CX.—Mining lands belonging to various authorities prior to the enforcement of this law shall be classed as mining areas, and they shall be considered to have been duly recorded on the date of putting this law into operation.

Art. CXI.—A record of pledge of a right of mining which has been made in accordance with the Mining Regulations (鑛業條例) shall be considered as a record of a right of mortgage.

Art. CXII.—The provisions of Art. 74 shall be applied in cases where permission for prospecting or mining privileges has become extinct prior to the enforcement of this law; provided that the term of one year will be calculated from the date of extinction of such permission or privilege.

Art. CXIII.—Persons who have obtained permission of lease according to the Japanese Mining Law, (日本坑法) and who have obtained permission for prospecting or mining privileges according to the Mining Regulations, (鑛業條例) shall pay in the taxes imposed on their mining areas for the 38th year of Meiji (1905) or any balance thereof within 60 days from the date of the enforcement of this law, such tax being calculated at the monthly rate.

Art. CXIV.—Taxes imposed on mining productions for the 38th year of Meiji (1905) shall be levied on minerals produced previous to the enforcement of this law.

Art. CXV.—The provisions of Article 88 will not be applied to taxes for the 38th year of Meiji (1905).

Art. CXVI.—With regard to any disposition, procedure, or other acts made in accordance with the Mining Regulations (鑛業條例), they shall be considered as made in accordance with this law if corresponding provisions exist in this law.

Art. CXVII.—With regard to petition, demand for a decision, or an administrative or civil suit concerning a disposition which has been made prior to the enforcement of this law, the provisions of the Mining Regulations (鑛業條例) shall be applied.

Art. CXVIII.—With regard to the extent of a mining area in respect to which application has been made for prospecting or mining according to the Mining Regulations, (鑛業條例) the provisions of Par. 2 of Article 41 of the Mining Regulations (鑛業條例) shall be applied.

Art. CXIX.—Should a person who has without cessation, been engaged in the collection of tungsten (重石鑛) or molybdenite (水鉛鑛) since prior to 31st December, the 37th year of Meiji (1904), apply for a license for mining such mineral, the privilege will be granted to him, irrespective of the provisions of Articles 31 and 33 and the provisions of Article 9 regarding the extent of mining areas, so far only as regards the area in which he has been engaged in the collection.

In the case of a person engaged in the collection mentioned in the preceding paragraph applying for the privilege before the 31st July, the 38th year of Meiji (1905), he may, irrespective of the provisions of this law, continue the collection until the day on which an official order is given in respect thereto.

In the case of the extent of the area in respect to which privilege has been obtained in accordance with Par. 1 being a fraction of 5,000 *tsunob* (say 4 acres), such privilege will cease to exist after the expiration of 5 years.

The draft of expenditure of Yokohama city for 1905—from April 1st, 1905 to March 31st 1906—having been investigated by the Councilors of the City Assembly will be submitted to the Assembly at a meeting to be held to-morrow March 30th. A comparison with that of the previous year is as follows:—

	1905.	1904.
	Yen.	Yen.
Ordinary Expenditure .....	336,272.939	504,730.877
Extraordinary Expenditure.....	422,072.281	959,021.716

## YOKOHAMA FOREIGN BOARD OF TRADE.

The annual general meeting of the members of the Yokohama Foreign Board of Trade was held on Tuesday afternoon in the Masonic Rooms, No. 78 Yamashita-cho. Mr. E. C. Davis, Chairman, presided and there were also present Messrs. V. A. Caesar Hawkins, J. Griffin, C. V. Sale, V. R. Bowden, C. Griffin, M. Beart, E. W. Maitland, L. Mottet, W. T. Payne, F. M. Tegner, A. J. McClure, J. A. Harmsen, J. D. Hutchison, B. R. Berrick, J. C. Hartland, J. Robertson, etc.

The notice calling the meeting was read by the Secretary (Mr. J. E. Beale) and the minutes of last meeting, were on the motion of Mr. J. Griffin, seconded by Mr. J. D. Hutchison, taken as read.

The next business was the consideration of the accounts, and in reply to Mr. Griffin, Mr. A. J. McClure explained that the item dependency interest in the accounts was the proportion of accrued interest.

On the motion of Mr. Tegner seconded by Mr. L. Mottet the accounts were adopted.

The CHAIRMAN said:—The report which you have before you deals in a statistical way with every branch of import and export business of any importance. The point of interest to most people is, naturally, the effect that this deplorable war has had upon the trade of this country. Let it at once be said that the position is even sadder now than it was at the beginning of the war. That imports exceed the exports is only to be expected but the latter, as also the former, show an advance on previous years, the total volume of trade being much larger than last year. At a time when it was most needed this country enjoyed both silk and rice crops of record size and thus, aided by an easy maintenance of their gold reserve, has been enabled to tide over most successfully what must be considered as the most critical period of its national history. As regards the effect the war has had internally I believe I am right in saying that native merchants have enjoyed a degree of prosperity much above the average. Of their requirements for war purposes it is estimated that fully 70 per cent. are supplied in the country and only 30 per cent imported and even allowing that these figures are not very reliable the fact remains that native merchants and manufacturers have done exceedingly well. In many cases industrial companies are paying dividends that have not done so in the past and the recent quotations of stocks and shares are alone sufficient to prove that war is a great incentive to prosperous trading. At one time great anxiety was felt both by Japanese and foreigners when the Vladivostok Squadron appeared at the entrance of the Bay and any success on a large scale on the part of that fleet would certainly have paralysed trade. The sinking of the *Knight Commander* caused a great sensation and this Board on behalf of local insurance companies has represented the case fully to the Chambers of Commerce of London and Liverpool. Foreigners have enjoyed a large portion of the trade for war purposes, which was placed by the Government in foreign countries and this should be noted as an important advance on the exclusion which was displayed during the war of 1894. In spite of abnormal duties and taxes the economic condition of Japan to-day is one which must surely arouse the admiration of all classes of the foreign community and I think it is not out of place on my part to say that we, foreigners, owe a debt of thanks to the Japanese Army and Navy for their successes, the brilliance of which have assured not only the safety of our property but perhaps, even our lives.—(Hear, hear.) With these few remarks I invite discussion of the report.

Mr. GRIFFIN said he was glad to hear the optimistic views of the Chairman as to the future and hoped they would be realised. With regard to the report there were one or two things that were not quite clear. One page it was said that the Customs receipts during 1904 exceeded those of the previous year by over four million yen. He thought it should be explained that this was due to increase of duties owing to the war, and that it did not necessarily represent such an increase of business, as would seem to be indicated.

The CHAIRMAN pointed out that the total im-

ports were 371 millions as against 317 millions in the previous year.

Mr. GRIFFIN went on to point out that in the second paragraph on page 3 there should be such words inserted as to show that the figures afterwards given referred only to Yokohama and were obtained from the Customs.

Mr. HUTCHISON took it that the whole of the report referred to Yokohama.

Mr. GRIFFIN then referred to "Maybush Re-reel" on page 6, and at the request of the Chairman, Mr. Tegner, speaking for the Committee of the Silk Association, who had supplied the information, said the Committee had considered the matter and decided to retain the phrase.

Mr. GRIFFIN said many customers in the States were much against Maebashi Re-reels if they could get Joshiu—yet both were from the Joshiu district. On the 7th page Bushiu did not appear under Filatures, and he suggested that the term Joshiu should be replaced by Kwanto.

Mr. TEGNER said the matter had been discussed by the Committee of the Silk Association and he thought it should stand good.

In reply to the Chairman, Mr. Tegner said every silk firm here is a member of the Silk Association and the report was prepared by a Committee.

Mr. GRIFFIN said no notice had been given to members and he should thrash the matter out at the first meeting of the members.

In reply to Mr. Caesar Hawkins, who said he thought it was a geographical discussion,

Mr. GRIFFIN said Joshiu was a province by itself as much as any county in England. On page 13 he saw no mention of Cotton Italians and Sateens under the heading "Fancy Cottons" and suggested that the words "Dyed Cottons" should be substituted for that caption. Prints he would admit as Fancy Cottons, but he certainly should not admit Velvets. He pointed out that in last year's report Cotton Italians and Sateens had the leading place under the same heading.

Mr. BOWDEN said it seemed to him too late to alter the report and suggested that note should be taken of Mr. Griffin's points so that they should be presented to the incoming Committee for consideration in preparing next year's report.

This was seconded by Mr. Sale and agreed to.

Mr. PAYNE emphasised the fact, commented on in the report, that despite the withdrawal of such a large number of men for service at the front there had been such a gratifying increase of the export trade in this country—particularly in the more valuable commodities such as raw silk and *habutai*, while perhaps other articles not mentioned in the report because produced in other parts of the country had participated in the increase. The matter, he thought, was explained by the large proportion of female and child labour employed in the production of such exports, in consequence of which Japan was able and ready to supply the demand from consuming markets for such commodities.

On the motion of Mr. Caesar Hawkins, seconded by Mr. Griffin, the report was adopted.

The next business was the election of a Committee, and while this was going on the Chairman called attention to a purely verbal alteration in the Arbitration Rules necessitated by the change in the name of the Board.

On the motion of Mr. Payne, seconded by Mr. Tegner the change was agreed to.

The new Committee, it was intimated, will consist of Messrs. Payne, Davis, Hutchison, Harmsen, Mottet, Caesar Hawkins, Blake, Sale and Beart.

In reply to Mr. GRIFFIN, the Chairman said the question of holding the annual meeting at No. 78 instead of in their own room had been considered by the Committee, who were influenced by the desirability of meeting in a central situation.

Votes of thanks to the members who had given their assistance in the preparation of the report and to the Chairman brought the proceedings to a close.

ANNUAL REPORT.  
The Course of Trade.—Notwithstanding the extraordinary conditions that came into existence last year, the returns of the foreign trade of Japan for 1904 continue to show an increase both in Imports and Exports.

	1904. Yen	1903. Yen
Total Exports.....	319,250,436	289,502,442
Total Exports from Yokohama.....	170,209,453	146,580,438
Total Imports.....	371,167,029	317,135,518
Total Imports to Yokohama.....	136,265,011	110,878,968
Total Exports.....	258,303,065	252,349,543
Total Exports from Yokohama.....	139,015,675	113,822,517
Total Imports.....	271,731,258	255,816,645
Total Imports to Yokohama.....	89,292,505	88,528,419

The total value of the Foreign Trade of Japan in 1904 was yen 690,417,465; in 1903 yen 606,637,960; in 1902 yen 530,034,323, and in 1901 yen 508,166,188.

The Customs receipts during 1904 exceeded those of the previous year by over four million yen. The figures for the past four years are: in 1904, Yen 21,230,242; in 1903, 17,047,890; in 1902, 15,313,072; in 1901, 15,122,616.

Nearly all articles of Export showed an increase during 1904 over the previous year, and among manufactured goods *Habutai* stands at the top with an advance in export value of ten million yen. Silk *Handkerchiefs* also increased by nearly two million yen, and other articles which increased in the export trade are Cotton Tissues, Towels, Matches, Matting, Porcelain, Lacquered Ware, and Cigarettes, while this class of goods not enumerated shows an increased export of about three million yen. Among raw materials and partly manufactured goods, the export of Raw Silk shows the largest increase, being over fourteen million yen in value in 1904 above that of the previous year. In Straw Plaits and Marine products (except Fish Oil) there was also an increased export, while the articles under "others" showed an advance of nearly seven million yen. The articles showing a decreased export were Coal, Copper, Rice, Fish Oil, Tea, Comphor, Waste Silk, and Cotton Yarns, the circumstances in which Japan was placed during the past year being accountable for the restricted export of some of these products. Several articles of Import showed a considerable increase, namely, Raw Cotton, Wool, Leather, Sugar, Rice and Kerosene, while there was an advance also in the import value of most kinds of Iron and Steel, Locomotive Engines, and Steam Vessels. The import of several textiles suffered a notable decline, namely, Mousseline-de-laine, Woollen Cloths, Shirts, Cotton Sateens and Velvets, and in Dry Indigo and Oilcake there was also a large falling off.

The export of bullion during the year exceeded the import by nearly seventy-four million yen.

The import of Rice during 1904 exceeded the export by nearly fifty-five million yen in value, and the crop harvested in Japan was the largest on record, being no less, according to the final figures from the Department of Agriculture and Commerce, than 51,401,997 koku. The average yield being 42.296-935 koku, the crop of 1904 turns out to be 21.5 per cent. above the average, and 10.6 per cent. better than the crop of 1903.

As was to be expected from the situation, the export of Japanese Yarns declined somewhat, but only a little over two million yen, while Cotton Tissues showed an increase of a million and a half.

Silk, both Raw and Manufactured, is accountable for a large portion of the total increase in Exports, the former being valued at Yen 88,740,702 in 1904, against 74,428,907 in 1903, against 74,428,907 in the previous year, while *Habutai* was exported to the value of Yen 37,546,099 and Silk Handkerchiefs to Yen 4,699,592 last year, the respective figures for 1903 being *Habutai* Yen 27,510,478 and Handkerchiefs Yen 2,938,421. The rapid advance of *Habutai* to the large export of the past year is shown by the fact that in 1890 its export value was only Yen 819,537, which was increased in 1895 to Yen 8,354,490, in 1900 to Yen 17,436,381, and four years later to the present large export, namely, Yen 37,546,099.

Straw Plaits and Matches showed an increased export value in 1904 over the previous year of over a million and a quarter yen each, Porcelain nearly three-quarters of a million, Towels nearly half a million, and Lacquered Ware and Umbrellas each a considerable advance. In Imports the increase in value last year of Raw Cotton compared with 1903 amounted to nearly four millions, of Wool over five millions, of Leather two and three-quarter millions, of Rice seven and three-quarter millions, of Beans a million and a quarter, of Sugar over two millions, and of Kerosene six and three-quarters of millions of yen. Unenumerated Imports in 1904 showed an increase of 30½ million yen over those of 1903.

The value of the deliveries of the principal articles of Import in Yokohama during 1904 was about the same as that of the previous year, but the value of the principal articles of Export during the same

NOTE.—Tonnage under the Japanese flag entering and sailing from the Port of Yokohama to Australia, India, Europe, and the Pacific Coast amounted, during 1904, to—Inward, 80,475 tons, and outward to 48,539 tons, against 440,027 tons inward and 442,134 tons outward in 1903, the great difference between the tonnage of these two years being accounted for by the fact that the Government took up most of the large foreign-going steamers for use as transports. Thirteen British steamers of 27,017 aggregate register tons were sold and transferred to the Japanese flag during 1904.

## WARMING-ELDRIDGE WEDDING.

The marriage took place on Thursday of Miss Fanny Heath Eldridge, daughter of the late Dr. Stuart Eldridge, to Mr. Sophus Warming, Danish Consul in Yokohama. Christ Church was beautifully decorated for the occasion, the floral adornments being most ornate. Rev. W. P. G. Field conducted the service and the bride was given away by her mother, Mrs. Eldridge.

The bride arrived to the strains of "The voice that breathed o'er Eden" and looked particularly handsome as she entered the church on the arm of her brother-in-law, Mr. F. M. Tegner. She was followed by Mrs. Tegner, sister of the bride, by the Misses Stella MacDonald, Hope Payne and Doris Healing as brides-maids and by Masters Henry and Sven Tegner as pages.

The bridegroom was supported by Mr. P. A. Cox as best man, whilst Messrs. G. G. Brady, Johnstone McClure, Chandler Gibbens and A. R. Owen were ushers.

The bride was dressed in heavy white satin trimmed with old point lace, which had been worn by her mother and her sister at their weddings. She also wore a tulle veil, orange blossoms and full court train and carried a shower bouquet. The bridesmaids wore soft white silk with tulle hats and carried basket bouquets of white flowers. Each one also had an iris brooch, the gift of the bridegroom. The little pages made a very sweet pair in their fancy costumes and three-cornered hats.

The matron of honour (Mrs. Tegner) wore a handsome dress of imported white lace. Mrs. Eldridge wore black and carried a lavender and white bouquet.

The service was fully choral, the choir being specially augmented for the occasion. In addition to the organ marches rendered by Mr. Hugh Home, Mrs. James Walter sang a selection from "Ruth."

The register was signed by Baron Sweets de Landas Wyborgh, Danish Minister to Tokyo, and Mr. E. C. Bellows, U. S. Consul-General at Yokohama.

A reception was afterwards held at the residence of Mr. and Mrs. Tegner, No. 44 Bluff. The spacious rooms were decorated with white flowers, chief among which was a large floral bell. The invitations numbered 500 but many friends were unable to attend in consequence of distance, and the telegrams, letters and cablegrams included congratulations from England, France and America. The wedding cake was a graceful structure which attracted general attention. Another room was devoted to the wedding presents, of which the display was large and costly.

The usual toasts were honoured, Baron Sweets de Landas Wyborgh proposing "The Bride and Bridegroom."

Later in the day the newly wedded couple left for their home at Daishi, where the honeymoon is to be spent. The bride's going-away dress was of white serge trimmed with guipure lace and she wore a black picture hat.

## MAJOR GENERAL BETSUYAKU.

The death was announced on March 27th, in Tokyo, of Major-General Betsuyaku, in reserve, who had been suffering from consumption for several months past. He was well-known in connexion with the quelling of the Satsuma rebellion. At that time he was isolated, with the Imperial forces, in Kumamoto castle under General Tani (now a Viscount and a member of the Upper House) and assisted in its successful defence and in the sortir whereby the Government army defeated the rebels and joined its re-enforcements. In the Japan-China war, he held the post of Commander of the Third Division (Nagoya). In appreciation of his meritorious services the Emperor promoted him on March 28th to the Fourth Senior Rank and decorated him with the Second Class of the Rising Sun. The funeral will take place on March 31st at Aoyama Cemetery, the cortège leaving his house at 1 p.m.

## YOKOHAMA LITERARY SOCIETY.

The fortnightly meeting of the Yokohama Literary Society was held last evening at Van Schaick Hall and despite the inclement weather drew a good house. The programme began with an overture by the Midget Orchestra, a musical combination of lads and lasses, the youngest of whom boasts of but ten years. They played two bright national selections, one being representative of Spain the other of Italy. The paper of the evening, contributed by Mrs. A. Bellamy Brown, was kindly read by Mrs. J. Lincoln Dearing, who is the happy possessor of a clear voice combined with a pleasant enunciation which makes it a delight for her audience to follow her. The paper dealt first with Durham Cathedral, within sound of whose bells the writer was born, alluded to the legends which have gathered around St. Cuthbert, to whom the Cathedral is dedicated; to the Venerable Bede and other north country worthies, and then passed on to a short description of the fabric and of its past glories, as well as the vanished glories of the see. St. Paul's Cathedral in London was next referred to, with a passing glance at some of the traditions which Geoffrey of Monmouth and the old chroniclers have woven into the earlier history of Britain, and which centre more particularly around London. Finally Mrs. Brown took her hearers to Westminster Abbey, concluding with a reference to the literary men who have found rest within its walls, or have had monuments erected to them there since Chaucer was placed within the tomb which afterwards became the centre of Poet's Corner. Following the paper came forty-three lantern slides, mostly coloured, giving an idea of the great diversity of architectural features in the principal cathedrals of England, and 20 slides devoted solely to Westminster Abbey. These proved very popular. On the motion of the Rev. E. S. Booth Mrs. Brown was heartily thanked for her interesting paper and Mrs. Dearing was likewise commended for her sympathetic reading of the essay.

The second part of the programme introduced Miss Davies, a most accomplished reuter, Master Bischof, who gives promise of becoming a charming violinist, Mrs. W. T. Payne, who was encored and the Midget Orchestra, their selections being as follows:—

Song....."The Rose".....Erschman.  
Mrs. W. T. Payne.  
Violin Solo....."Nocturne" No. II.....Chopin.  
Master W. G. Bischof.  
Recitation....."Jane Conquest".....Unknown.  
Miss Davies.  
Selection....."Neapolitan Duet".....Henry Lawson.  
The Midget Orchestra.

## THE LAW COURTS.

## CLAIM FOR LANDING EXPENSES.

In the Yokohama District Court, the hearing of a case lodged by Captain A. Weston against the Compania General de Tabacco de Filipinas claiming yen 1,036.59 came up again on March 24th before Judge Yasuda.

T. Inouye, a Customs broker, was examined as an expert witness as to shipping usage in Yokohama.

Witness deposed that freight from foreign countries to Japan does not include the expenses incurred in landing cargo. Freight is limited to the port in Japan to which the cargo is addressed. Consignees, therefore, have to land their goods from steamer at their own charges and risk though some bills of landing add a special clause in order to avoid unnecessary disputes. The usage in Yokohama is that all the shipping agents have a special agreement with their customs brokers to land cargo brought by their own ships. Consequently consignees of cargo always understand that their cargo will be landed by the custom broker concerned with the shipping company whose steamer brings it. For instance, Capt. Weston it patronized by Messrs Samuel Samuel and Co., and consignees are of course, obliged to pay the landing expenses to Capt. Weston, and not to the shipping agents. The Nippon Yusen Kaisha, the Pacific Mail; etc., have their own landing

departments but their custom with regard to freight and landing expense is not different.

In reply to defendants' Counsel, witness stated that the customs brokers were patronized by shipping agents, but the former were always independent of the latter. Responsibility for landing cargo from steamers should be borne by the customs brokers.

Defendants Counsel stated that plaintiff delivered only 19,990 bags of rice against twenty thousand set out in the bill of lading and ten bags were still left undelivered, but plaintiff claimed landing expenses for twenty thousand bags.

The Court said that the dispute as to the difference in the number of bags was too trivial, as the landing expenses concerned could not be more than ~~sen~~ 40 or 50, and that at the previous hearing, defendants' Counsel had consented not to follow up this point.

Defendants' Counsel asked the Court to cancel his previous admission and said that not only must he urge the importance of this small difference in the landing expenses, but that defendant might lodge a claim for short delivery of the ten bags.

Plaintiff's Counsel said that the particular shipment of rice had been destined for several places and he asked the other side to state which lot was short.

Defendants' Counsel replied that the short delivery occurred in a lot consigned to a rice dealer named T. Sudzuki, but he would inquire again of his clients. Counsel asked the Court to adjourn the hearing.

The Court granted the request, adjourning the case till April 6th.

## THE COLLINS CASE.

The appeal of H. B. Collins, charged with having acted as a Russian military spy, was rejected on March 23rd by the Court of Cassation. His punishment of eleven years' confinement with hard labour is now confirmed and he was removed to prison.

## OHARA v. WRIGHT.

A case brought by T. Ohara against Mr. W. N. Wright, claiming yen 18.25, came up again on March 30th in the Yokohama Local Court, when on account of the absence of the defendant, judgment was given in favour of plaintiff.

## ATTEMPTED MURDERS IN YOKOHAMA.

Two attempts at murder were made on March 25th in Yokohama. In one case a jinrikisha coolie named K. Moiono (42) attempted to murder Kura (33), formerly his wife, inflicting severe injuries upon her with a hatchet in the dwelling of Matsu Masuyama, (a younger sister of the woman) at Hodogaya. The culprit was arrested at Kanagawa. The woman was removed to the Yokohama Hospital. The cause is reported to have been that she refused to rejoin her former husband.

The other case was that of a jinrikisha coolie named T. Ura (40). He attempted to murder his wife in the house of her parents, residing at Minami Ota, wounding her on the head with a large knife. The culprit was arrested on the scene. The cause is reported by the Isezaki-cho police to be jealousy.

## "A GHASTLY FARCE"

The *Speaker* to hand by the French mail on Thursday, holds that the time has come when the Governments of England, France, and Italy should face the fact that Austria and Russia have failed in Macedonia:—

What else could we expect? Austria is notoriously irresolute and now more than ever preoccupied by her internal crisis. She has, indeed, a forward school, but its hope is that reform may fail and an Austrian occupation become inevitable. That the Russian bureaucracy should conceive any humane reform or compass any efficient achievement was never likely. It is now impossible. Europe engages in a ghastly farce when she authorises a Government which is face to face with ruin, revolution, and bankruptcy at home to be the saviour of Macedonia and the reformer of Turkey. Were their intentions never so admirable, both Austria and Russia are

for the moment impotent. Without the cynical and interested backing of Germany there is not a Minister at the Porte who would buy Russia's favour or fear her anger. In 1902 the two Empires were the dominant Powers in the Levant. To-day Russia at least is a negligible factor. The victories of Japan have altered the whole balance of power at Constantinople. On this ground, if on no other, the responsibility for the future falls to the Western nations. They have at length their chance.

"Public opinion in all of them is unanimous and articulate. It lies with Lord Lansdowne and M. Delcassé to use this unique opportunity."

## CORRESPONDENCE.

## ST. ANDREW'S MISSION CHURCH, YOKOHAMA.

TO THE EDITOR OF THE "JAPAN MAIL."

DEAR SIR:—Will you allow me, on the eve of our departure from Japan, to offer, through the medium of your columns, the grateful thanks of Mrs. Weston and myself to the members of the Congregation of Christ Church, Yokohama, and to the many other friends who have during the past 18 months given us such kind help and sympathy in the work of raising funds to build a new Church in a better situation for the Anglican Mission (the Nippon Seikōkwa) in Yokohama.

The support we have received has been no less remarkable for its generosity than for its readiness, and I should like to take this opportunity of expressing the very deep sense we feel of this token of the confidence and good-will of so many of the business men and others in this place. To Mr. and Mrs. James Walter, especially, our best thanks are due.

The work has been a long and difficult one, but the labour has been lightened more than we can say by the almost invariable kindness and courtesy with which we have been received during its course, and the helpful and encouraging words that have often been spoken have been no less welcome than the generous gifts which they have accompanied. Indeed, I might venture to add that this combination has been almost a revelation to us and we are more grateful than I can adequately express.

I am, your obedient Servant,

WALTER WESTON.

## REPORT AND STATEMENT OF ACCOUNTS.

The new Church of the St. Andrew's Mission, situated in Hi-no-de-cho, which was dedicated on Sunday, March 12th, stands on the site of a Japanese house acquired by the Mission in December, 1903, and since then used for Church purposes. Through the help of friends in Yokohama and in Christ Church, Wimbledon, England, a site was leased and the buildings standing on it purchased, and while one of these was used for Services, etc., the remainder were let so as to produce a substantial sum towards the ground rent. Meanwhile efforts were made to raise further funds to erect a more suitable building, and the present Church is the result. It is composite in construction, being of two storeys, with the Church proper on the upper floor. The west end looks over Hi-no-de-cho, a busy street at the base of Noge-yama, while the East end faces the Canal, towards the Bluff and the Bay of Yokohama.

The building is mainly of timber with several courses of brick resting on concrete, and is supported by six brick buttresses. It is surmounted by a tower with a gilt cross, and one cross also marks the end of the church roof and another the porch at the main entrance. It is coloured deep red, and has a slate roof.

The ground floor contains a Vestry, large rooms for Sunday School, Night-School, etc., as well as quarters for the Bible-Woman and the Caretaker, and rooms for various other purposes. All these are semi-foreign in style, but with Japanese mats, *shoji*, *fusuma*, etc., and are unusually light and airy.

From the front porch, a spacious hall has on either side a handsome staircase of *sen* (wood), leading to a landing lofty and well-lighted, from which the Church itself is entered through swing doors of *keyaki* and strong plate glass. No attempt has been made to render the interior ornate, but

as far as possible to combine dignity with a necessary simplicity and to afford a measure of the necessary properties of acoustics, light, and good ventilation. At either side the body of the Church has three good pointed windows, looking over the Bay on the north and to Fuji-san on the south. A handsome 'rose' window pierces the west wall, above the door, and the tower greatly assists in the matter of ventilation. The benches and pulpit are of solid teak, handsome and comfortable, while the Lectern and Litany stool are of *keyaki*. A graceful Gothic screen of the latter wood separates the nave from the chancel, and is surmounted by a well-designed arch and small cross. The prayer desks here are of *keyaki*, and the *keyaki* altar rail is supported on brass standards with a foliated design. The Holy Table and credence table are of *keyaki* and behind the former, on which stands a plain cross of gold lacquered wood, is a handsome silk brocade hanging. When fully seated the church will accommodate 200, being at present provided with benches for 150.

The East window, of three lights, and the smaller side windows in the chancel are filled with good coloured glass, with pleasing designs, imported from Italy. The floor of the Church is of excellent Oregon pine, and the arched roof is handsome and strongly built. The Church (as well as the principal rooms on the ground floor) is well lighted with electricity, and at the entrance on the Hi-no-de-cho side is a pretty little Japanese garden with stone lantern, pines, and shrubs.

The work has been carried out by the Shimoda Construction Company of Yokohama, and is of a substantial character with unusually good and careful finish. Operations began just before Christmas, 1904, and the Church was dedicated on March 12th, 1905, by the Right Rev. Bishop McKim, D.D., acting in the place of Bishop Awdry, who was unfortunately absent through illness. The Rev. John T. Imai, the Rev. Walter Weston, M.A., in charge of St. Andrew's Mission, the Rev. A. E. Webb, M.A., and the Rev. C. H. Shortt, M.A., also took part in the Service, together with the Japanese Catechist, Mr. A. N. Shiozaki. The offertory, which amounted to yen 54.36, included a gift of yen 10.13 just received that day from the Guild of the Daughters of the King, of St. Stephen's Church, Harrisburg, Pa., U.S.A., through Mrs. Franklin Rogers, of Yokohama. A number of Foreign friends were in the congregation, and it was a pleasure to afterwards learn that the Church and its appointments gave general satisfaction.

An unusually gratifying feature connected with it all, is the number of gifts of a personal character from friends in the Foreign Community in Yokohama. These include:—a beautiful brass alms-dish, given by Mrs. Lowder in memory of the late Archdeacon Shaw; the pulpit, the joint gift of the local branches of 'The King's Daughters' and the 'Brotherhood of St. Andrew and Philip'; Credence table, from Mrs. Franklin Rogers; Communion linen, worked by Mrs. Bathgate, a former interested helper of the Mission; the Cross on the tower, from the Sunday School Children of Christ Church, Yokohama, given in 1903; and the hanging behind the Holy Table, in memory of the late Mrs. Francis Fox, of Wimbledon, England.

A final most interesting and valuable gift, not yet completed, however, for use, is a new stone Font, given by the "Editor and Staff of the Monthly Mince Pie Magazine," some well-known young ladies on the Bluff, Yokohama.

During the week following the Dedication, special Evangelistic Services were held, at which large congregations were present. Later on was held an inauguration meeting in connection with the "English Night School" belonging to the Church, at which a number of students were enrolled. It is hoped and believed that this will ultimately prove in an indirect way a very useful adjunct to the work of the Mission. With these considerations in view the friends of the Mission may not only look back to the past with encouragement and thankfulness but to the future, under God's blessing and guidance, with hope and confidence. Humbly and prayerfully we "Thank God and take courage."

The accounts which accompany the report

show total receipts of yen 11,069.73, and an expenditure of yen 11,032.69, showing a balance in hand of yen 37.04.

#### "FOR LOVE OR MONEY."

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—In reply to your correspondent "Pond-water's" remarks respecting the translation of "For love or money," I beg to point out that the translation *ikami shite mo*, though expressing the sense in which the above words are often used, fails to bring out the point of the original. Some such translation as *doraku no tame ka, riyeiki no tame ka* would be preferable in addition to the rendering given. Another dictionary we have consulted renders "money" as *hoshu* and the "love" by *hoshu nashini*, which of course implies that a thing is done because it is pleasant.

I am, yours, &c.,

THE WRITER OF THE MONTHLY SUMMARY  
OF CURRENT JAPANESE LITERATURE.

March 19th, 1905.

#### THE ALLEGED GROWTH OF FAITH IN AMERICA.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—On the 18th inst. a very remarkable article from the pen of Dr. Schaffner was reproduced in your columns under the title of the "Growth of Faith in America." Never was a title more misleading or inappropriate; for the one thing that the writer quoted fails to prove to the satisfaction of any but the most superficial thinkers is the "growth of faith." The "growth of the fashion of Church-going" would have been a more appropriate heading for Dr. Schaffner's statistics.

It is a curious but an undoubted fact that a large number of highly educated foreigners visit America without discovering the existence of deep national religious sentiment there. Some Americans tell us that their nation is the most religious of Occidental nations. But observant men who go to the States return to their countries with a different impression. Year after year we have had Japanese coming back from America and telling us that though it is fashionable to profess religion in the States, real religious faith is rare. One would suppose that the Archbishop of Canterbury is qualified to pronounce an opinion on the progress of religion in America. Well, during his recent visit to the States he was audacious enough to remark that it seemed to him that evangelical influence in the States was on the decline. One mark of this, he said, was the law against reading the Bible in schools passed in many States. Dr. A. Schaffner undertakes to enlighten the ignorant Archbishop and all other bigoted, blind foreigners on the religious faith of the American people. This very abolition of the Bible in the schools, we are told by this authority, was a blessing. "A teacher could not read any selection bearing on Christ or the Apostles without raising controversial questions among the parents of the children of all the faiths represented in the schools, and the safer ground of the Old Testament therefore was generally sought." The selection had almost invariably been the Psalms. But in practice this Psalm, read in a perfunctory way, had so little influence of the kind desired that I for one had felt no great regret over its abolishment. I seldom have met with more extraordinary logic than that appearing here. In an article whose object it is to prove that the religious faith of the American is in a highly satisfactory condition we are informed that the minds of the parents of school children are so petty, uncharitable and unrecurrent that they would not consent to have their children listen to the Sermon on the Mount or the beautiful description of Charity found in the Epistle to the Corinthians and therefore the Bible was advised by kept out of the schools. When this trumped up argument was paraded before the Archbishop, he naturally expressed himself as unconvinced. In England the banishment of the Bible from the schools is not regarded as a sign of the growth of religious belief. "Dr. Davidson, however, accustomed to the English view, had his doubts," says Dr. Schaffner. "He feared that the evangelical influence in this country was lessening."

In order to convince the Archbishop and others that the American religious world is the best of all possible worlds, that not a cloud darkens the horizon of the Christian outlook in the United States, Dr. Schaffner gives us a long column of statistics which he has collected bearing on attendance at religious services, religious ceremonies, Sunday Schools, and the like; and he apparently takes it for granted that this attendance is an indication of sincere Christian belief in Christian Supernaturalism; for no other meaning can be attached to the Archbishop's "Evangelical influence." How the good Archbishop must have stared when after this big blast of the statistic trumpet by Dr. Schaffner, this airy optimist

goes on to say in effect, "We make no inquiries as to the personal belief of the attendants at our evangelical churches. What they believe and what they reject nobody knows but themselves." "Dogma keeps no man out of the church," says Dr. Schaffner loftily. "All that a man is required to do in order to join any evangelical church is to substantially accept God as the Father, Jesus as the personal Saviour, the Divine Spirit as the Sanctifier and the Bible as the rule of life"—a confession of faith that could not be beaten for vagueness. The Archbishop no doubt asked himself what "substantially" means and what "the Bible as a rule of life" may mean, when every member of the church interprets it as he or she pleases and resents in the most marked manner clerical interference or dictation. How bright do all things seem when once these Christian optimistic spectacles are put on!

Some young ministers, Dr. Schaffner tells us, are naughty enough to express their pessimistic opinions in certain religious newspapers. Dr. Schaffner has spoken. Let them for ever hold their peace. They bewail the loss of faith in their congregations and a disinclination to accept the Christian message on the part of audiences. These lamentations are due to the scepticism of these ministers most probably, says Dr. Schaffner. Exquisite logic! A sceptical minister mourning over the scepticism of his hearers! If such stuff as this passes for argument in the religious world in America it says very little for the intelligence of that world. But I do not for a moment think it does nor should I have taken the trouble to dwell so much on it had Dr. Schaffner assumed a less exultant tone. Christianity in America is a great socialistic organization. Most people go to church and chapel because they would otherwise become the victims of unbearable ennui, partly to see other people there, or to enjoy the music and the preacher's eloquence. Only a few go for real worship. Any person who knows what genuine religious feeling is is naturally astounded at the worldly air of fashionable congregations in the great cities of the States. Such a person when visiting one of these churches would naturally ask, how many real worshippers are there here? The answer would be very, very few. In these modern days we are told that all dogmatic tests must be abolished in the case of the laity. "Dogma is for the clergymen" says Dr. Schaffner. Unbelief keeps no man out of a church; keeps no man from becoming a communicant if he be inclined to conform to the family or social custom of attending an ancient rite of the church. There are many clergymen who know all this. Dr. Davidson of course knew it all too well when he ventured to suggest that real religious belief in the ancient doctrines of the Christian religion as stated by church authorities is dying out in the United States, and something more than Dr. Schaffner's shallow arguments will be needed to convince the Archbishop that he is mistaken. On the attitude of the American people as a whole to Christian supernaturalism Dr. Schaffner's article throws no light at all. He hints that the American people have succeeded in making their services, their Sunday schools and other religious agencies very attractive by one means or another; but that has no bearing on heart belief; and it was about this and this only that the Archbishop was naturally much concerned. It is a case of Canterbury sunshine versus Schaffner fog. The Archbishop is logical and intelligible; the American Doctor the reverse. In his "Short History of Christianity" Mr. John M. Robertson makes the following discerning remarks:—"Of the state of thought in the United States it is difficult to speak with precision. The latitude allowed to or taken by the majority of the clergy keeps within the ostensible pale of the numerous churches much opinion that elsewhere would rank as extremely heterodox; and it is from American churchmen that there has come the project of the so-called 'Rainbow Bible,' in which the heterogeneous sources of the Old Testament books are indicated by printing in various coloured inks. As in all countries where the clergy are democratically in touch with the people, the breach between authority and modern thought is thus less marked than in the sphere of the Catholic and Anglican churches. But in such a civilisation development is inevitably continuous. . . . What preserves the form of faith in the States is probably less the Socio-economic pressure seen so commonly in England and Scotland (since all life is freer and freer in the New World, especially in the West) than the simple lack of leisure for study in a community where competition for income drives all men at a pace that almost seems to belie prosperity."

Apologizing for the length of this letter,

I am yours, &c.,

March 21st, 1905.

CRITIC.

Sub-lieutenant M. Yamaji, of the Cavalry, eldest son of the late Lieut.-General Yamaji, who captured Port Arthur during the Japan-China war, has left for the front. He graduated from the Military College at the end of last year.

## TELEGRAMS.

(REUTER'S SPECIAL TO "JAPAN MAIL.")

## BRITAIN AND PEACE.

London, March 24.  
A striking article appears in *The Times*, based upon a letter from its Tokyo correspondent, dated Feb. 10th, in which Japanese views of the Anglo-Japanese alliance were set forth. The article declares there is no danger of British vacillation or weakness as to the exclusion of interference by third parties in the final settlement. The article further proceeds to discuss sympathetically the suggestion of Japanese publicists that the alliance should be transformed into an agreement absolutely binding each party to assist the other in the event of war. The co-operation of the British navy and the Japanese army wherever that might be required would reduce the menace to China, Persia, and Afghanistan into perpetual impotence. The journal can not yet determine whether this is within the range of practical politics, but is confident that if it is capable of realization, the great end aimed at may be achieved.

## RUSSIAN DOMESTIC LOAN.

London, March 24.  
The agreement for the internal Russian loan mentioned in the telegram of the 19th inst. has been signed. The loan will be issued at ninety-six, redeemable in fifty years.

## THE GERMAN EMPEROR.

The Kaiser has left Bremen aboard a liner for Lisbon, Tangier, and the Mediterranean.

## RUSSIAN BANKERS AND THE WAR.

London March 25.  
The belief among the St. Petersburg bankers is widespread that the Tsar will be compelled by circumstances, if not induced by his Ministers, to discontinue the war. This opinion is freely expressed among the bankers who negotiated the internal loan with the Ministry of Finance.

## THE NEW JAPANESE FOREIGN LOAN.

The *Standard* understands that arrangements have been virtually concluded for an early issue in London and New York of a Japanese four-and-a-half per cent loan of thirty millions sterling at the price of 90.

London, March 26.  
The Japanese loan of thirty million sterling at 4½ per cent. is secured upon the tobacco monopoly. It is redeemable after five years if Japan desires.

## SIAMESE LOAN.

A Siamese loan of a million sterling has been issued. It was closed after three-quarters of an hour, being largely over-subscribed.

## PESSIMISTIC RUSSIANS.

The Russian correspondents at the front discuss the situation in a most pessimistic tone. They say that a vast Japanese turning movement is developing and they believe Harbin will be untenable unless 200,000 reinforcements are sent immediately.

Reunenkampff has lost three-quarters of his force.

New war taxes are about to be imposed.

## FRANCE AND RUSSIA.

Later.  
A committee of the Paris Stock Exchange officially announces that the Russian loan negotiations have been resumed and are now proceeding quite satisfactorily.

## THIRD BALTIC SQUADRON.

The third Baltic Squadron are at Port

Said, heavily laden with stores which they are shipping, apparently little anxious to avoid delay. They are sailing Friday night for Jibouti.

## THE JAPANESE LOAN.

The English half of the Japanese loan has already been underwritten in England. The American half is oversubscribed in New York.

## PEACE PROSPECTS.

The partisans of peace are daily becoming more numerous, even in the official world. They base their hopes on the certainty that the Japanese conditions will be more onerous a few months hence.

## LINIEVITCH'S REPORTS.

London, March 27.  
Linievitch on the 24th March reported several cavalry skirmishes in the vicinity of the railway.

## MAXIM GORKI.

The authorities have decided to prosecute Maxim Gorki, now at Riga, on a charge of drafting proclamations to overthrow the Government.

## GENERAL GRIPENBERG.

Later.  
An Imperial Ukase deprives General Gripenberg of the command of the 2nd Manchurian Army, though maintaining him as *Aide-de-Camp* to the Czar.

## THE THIRD SQUADRON.

The Third Baltic Squadron has sailed from Suez, steering southward.

## JAPANESE LOAN A HUGE SUCCESS.

London, March 28.  
The Japanese Loan is a huge success.

## RUSSIA AND PEACE.

Later.  
Reuter's correspondent at St. Petersburg learns that a majority of the Council of Ministers on Friday agreed as to the opportuneness of initiating some step in the direction of peace. This decision will probably be communicated to the Tsar on Saturday.

## A CRETAN REVOLT.

London, March 29.  
As a result of the discontent arising out of the absolutist rule of Prince George of Greece, 600 armed Cretans assembled near Canea as a provisional national assembly. They were presided over by Japayansakis, who proclaimed the union of the island with Greece. The meeting appealed to the Powers not to employ force in the maintenance of the present regime.

Prince George has issued a proclamation appealing to the population and denouncing the movement.

A Russian gunboat has brought reinforcements of Cretan gendarmerie to Canea from other parts of the island.

## FRENCH SUBSCRIBERS TO THE LOAN.

New York bankers state that they are receiving heavy French subscriptions for the American portion of the Japanese loan.

## EAGER SUBSCRIBERS.

Later.  
The exterior of the Bank at the time of the issue of the Japanese loan resembled Boxing Day at the theatres. Special police were stationed to preserve order. There were long queues, the largest being near the H. & S. Bank. It is certain that the loan will be largely over-subscribed.

## RUSSIA'S INTENTIONS.

It is understood that the intended mobilization on a large scale will be abandoned for the present in Russia, and that only

drafts will be sent sufficient to stiffen the army of Linievitch, who will pursue Fabian tactics.

## ANGLO-JAPANESE ALLIANCE.

The *Daily Telegraph* is taking up the idea of strengthening the Alliance of Great Britain and Japan. It says that it receives general approbation in the city, especially as it enjoys the moral support of America.

## BALTIC SQUADRON COMING EASTWARD.

London, March 30.  
Ships of the Baltic Squadron were sighted on March 19, steaming eastward, 250 miles north-east of Madagascar.

## A BIG FLEET.

London, March 30.  
A Reuter's telegram from Durban says that the steamer *Dart*, from Rangoon, sighted 30 warships and 14 colliers on the 19th inst., steaming eastward from a point 250 miles northeastward of Madagascar.

## THE KAISER'S TOUR.

The French semi-official press affects unconcern about the Kaiser's visit to Tangier, but the tone of the newspapers generally in both countries show that they attach significance to its effect.

(Received at the Military Head Quarters on the afternoon of the 25th instant.)

## REPORT OF THE TROOPS THAT OCCUPIED HSINGKING.

The enemy that were in Hsingking: retreated towards Haitungting (about 88 miles north-east of Hsingking).

According to a report sent from Wei-yuan-paun at 8 p.m. on the 24th, there is about a company of the enemy's cavalry on the Kirin highway at Mienhwachieh (about 23 miles north-east of Kaiyuan). Small bodies of the enemy's cavalry make their appearance at places between Wei-yuan-paun and Changtu, and at Taiseiyei (about 2½ miles east of Wangmasai which is some 20 miles east of Wei-yuan-paun) and at Kankoushi (about 2½ miles south-east of Wangmasai). The inhabitants say that at Aihsinkau (about 9 miles north of Wangmasai) there are some 200 of the enemy's cavalry, and at Taulu (about 15 miles east of Wangmasai) there is a mixed force—infantry and cavalry—of from 500 to 600.

## REPORT OF THE TROOPS THAT OCCUPIED CHANGTU.

Dated 1.30 p.m. on the 24th instant.  
There is only a small force of the enemy's cavalry southward of the line from Shwang-miao (about 20 miles north-east of Changtu) to Kinglunging (about 7½ miles of Shwang-miao) and Sumienching (some 18 miles north of Changtu).

## REPORT OF THE TROOPS THAT OCCUPIED KINKIATUN.

(about 23 miles north-east of Fakumun),  
Dated 5.40 p.m. on the 23rd instant.  
There are none of the enemy in the direction of Kwangping (some 13 miles north-west of Fakumun), but there appear to be a few at Liaoyangwapeng (about 25 miles north of Kwangping).

## RELEASED RUSSIANS.

(Received at the Military Head Quarters, on the afternoon of the 25th.)

Among the Russian non-combatants taken prisoners by our troops in the Battle of Mukden, the following, who remained at Mukden, have been released:—

Released in front of our advanced guard: 47 men ranking as officers; 359 rank and file; 9 nurses; 11 priests; and 4 correspondents.

Released at their own desire in Chefoo or Shanghai:—23 men ranking as officers; 23 nurses and 298 rank and file.

(RECEIVED AT THE FOREIGN OFFICE.)  
PRESS OPINIONS.

The *Novoe Vremya* of the 20th instant speaks indignantly about the incompetence of Russian diplomacy. "If," it writes, "Russian diplomats could not preserve peace in the Far East and maintain Russia's position there, is it to be expected that when the time comes for restoring peace, they will be equal to the task of fully recognizing the important reasons for achieving such a success as shall secure those objects?"

French journals continue to urge peaceful views. The *Petit Parisien* of the 22nd instant publishes the views of the former Minister of Agriculture, M. Dupuy, who advocates peace. Also the *Siecle* of the 23rd instant contains an article from the pen of M. Lanessan, former Minister of Marine, who strongly advises Russia to conclude peace. M. Lanessan says:—"In the event of further Russian defeats what will be the influence exercised upon France's prestige and credit? The Minister of Foreign Affairs, M. Delcassé, must appreciate this fully. There is only one country in Europe which has openly declared its determination not to interfere in the cause of peace, and that is a country whose power increases *pari passu* with every decrease of the power of France and Russia. This, too, is not unknown to M. Delcassé. It is not only proper that France should tender friendly advice to Russia upon all subjects, but having regard to France's vital interests it belongs to her duty to do so. If the French Government fails to take this step and continues to procrastinate, it must be prepared to accept the heavy responsibility of future consequences."

Journals which have correspondents in St. Petersburg all publish news from that capital in the sense that peace is earnestly desired. The correspondent of *Le Matin*, in a telegram dated the 23rd instant, says:—"I have made further inquiries as to the general opinion with regard to peace or war, and I am more than ever firmly convinced of the fact that with the exception of military circles and officialdom the general desire is to end the war and establish peace. To every one the question presents itself, 'why this delay and indecision,' and the *Synn Otschewa*, which represents the general trend of opinion, says:—"Is there any room to doubt that each great victory won by Japan makes the terms of peace more onerous for Russia? Is it necessary to wait until Vladivostock and Saghalien have fallen into Japanese possession before discussing peace? Russia's defeat can not be laid to the charge of one unfortunate General: it is wholly due to the condition of the Russian Government, which condition made war possible and victory impossible."

## THE BALTIC FLEET.

A telegram received in a trustworthy quarter says that the British steamer *Aurora* met the Russian Second Squadron at a point from 800 to 900 miles south-west of Ceylon, and that the squadron seemed to be steering for the Sunda Straits. The Third Squadron entered the Suez Canal. on the 25th.

A telegram from Port Louis, dated the 23rd instant, which is published by the Paris press, says:—"A steamer from Colombo on the night of the 16th instant sighted a Russian torpedo boat followed at some distance by a squadron."

A Havas telegram from Port Said dated 24th says:—"The Russian Squadron has arrived here. To-morrow it will set out again, steering south."

The *Journal* has a St. Petersburg telegram dated the 23rd which says:—"Niebokadoff's Squadron will join that of Rojestvensky in about 10 days, and both will thus proceed towards the Pacific."

A Lloyd telegram from Port Said dated the 24th says:—"Niebokadoff's Squadron, consisting of 5 war-vessels, 3 transports and one tug-steamers arrived here last night and this morning."

## KUROPATKIN.

There were many rumours of Kuropatkin having been appointed to the command of the First Army. The fact was officially announced on the 23rd instant.

## THE BALTIC SQUADRON.

A Reuter's telegram from Port Said says that Russian Squadron took in large quantities of provisions there, but no coal. The transports had much cargo. It was said that the squadron's destination is Jibouti and Vladivostock. A part of the Squadron will probably leave to-day.

## THE GERMAN EMPEROR'S TRIP.

The German Emperor left by the N.D.I. steamer *Hamburg* on the 23rd inst. for the Mediterranean. His Majesty calls at Lisbon and after visiting the King of Portugal will proceed to Tangier. As the foreign newspapers have attributed political meanings to His Majesty's visit, the *Allgemeine Zeitung* says:—"There is no reason why the Emperor should abandon his visit to Tangier. German policy toward Morocco is not to obtain territory. It is simply to preserve the open door, and thus secure equal commercial opportunities for all nations. Therefore it is a mistake to suppose that the visit signifies any new political departure."

## FRENCH ADVOCATES OF PEACE.

*Le Matin* of the 25th instant publishes an article by M. Pelletan, formerly Minister of Marine in France, advocating peace. The writer maintains that even though Russia organizes a new army and fights again she can not possibly beat Japan, and then proceeds as follows:—

"Even supposing for a moment that Russia, employing her utmost strength, succeeds in conquering at last, she will be prostrated with heavy debts after the war, will be deprived of her military strength for a long time and will be isolated from the political situation in Europe. All that may be confidently affirmed. If things reach that pass, the Franco-Russian alliance will become a mere formality, and any one will be able to see through its true value. Should Russia send the most important part of her army to Manchuria she will deprive the Franco-Russian alliance of all practical importance. If Russia does not possess in Europe military force such as commands the respect of other countries, the reasons for continuing the Franco-Russian alliance will disappear altogether. The French Government should spare no effort on this occasion to save, for the sake of France, our allied country from the calamities of its eminently perilous position."

## PRODUCE MARKETS.

New York, March 24.

The silk market is dull. Re-reels No. 1 stand at \$3.875 to \$3.90.

Cotton forwards are dull. The demand is weak. May deliveries stand at 7.69 yen. The stock on hand is 1,202,246 bales.

Shanghai, March 25.

Telegrams from Japan call for re-purchases. Many transactions have been effected and the market is lively. Rises of 2 or 3 *momme* are recorded according to quality. There are no short-period sales. The demand for

Indian yarns for North China is tolerably brisk. Quotations to-day are as follow:—

	No.	Taels.
Kanagafuchi, Kago-sakana mark.....	16	109
Hirano, Tachinuma mark .....	"	98
" Futatsu-shika mark .....	"	40
Kurashiki, Mitsu-uma mark .....	"	97.75
Osaka, Kinzo mark .....	"	97

The stock of Japanese yarns is 10,029 bales; that of Indian yarns 64,994 bales. Transactions in Japanese yarns during the past week amounted to 1,500 bales; imports to 2,850 bales, and re-exports to 2,530 bales.

## THE JAPANESE LOAN.

The Berlin *Lokal Anzeiger*, in a long article with reference to the Japanese loan, says:—"The Japanese not only on the field of battle in Manchuria, but now in their financial management in Europe and America also have shown themselves skilful tacticians. When Japan made her first foreign war loan many, seeing how the English subscribed, were astonished at their courage, but now things have completely changed, and from all quarters competition has arisen for the privilege of participating in the confidence placed in this new great Power. A large number of the German bankers too were disposed to take a share of the Japanese bonds, and the Japanese seemed to have a wish to admit this combination. But German financiers chose to decline the honour of standing to leeward of the British and the Yankees, and thus in the end the German demand was not pushed. (The language of the telegram is peculiar at this point Ed. J.M.). Japanese financiers, taking advantage of Germany's willingness to open her market to their bonds, formed the plan of playing off the three competing countries against each other, and thus succeeded in getting the bonds floated on favourable conditions. By way of contrast to this opening of the exchequers of Europe and America to Japan, the great Empire which has been defeated finds the way barred, or at any rate much obstructed, to procuring the assistance of foreign capital."

[What silliness this is about "standing to leeward of the British and the Yankees." One does not expect such remarks in the column of a journal like the *Lokal Anzeiger*.—Ed. J.M.]

## THE LIAO.

The ice at the mouth of the Liao river has entirely melted and as navigation presents no difficulty, the ships, of which there are about 30 at the mouth of the river, have been allowed to enter.

## THE MANCHURIAN COMMANDS.

According to news published by the Austrian Report Bureau on the 28th inst., Kaulbars has been appointed to command the Second Army in Manchuria and Batsanoff the Third.

(Received at the Imperial Naval Department.)

## SHIPPING ITEMS.

On the 28th instant the steamer *Industry* (198 tons) was seized by a Japanese war-ship.

No particulars are given as to the nationality of the vessel or the place of seizure.

With regard to the wrecked steamer *Mars* the following has been received from the Chief of the Hokkaido Administration, under date of the 29th instant:—

"The master of the *Mars* and some of her crew reached a ship navigating adjacent waters on the 21st instant. The navigating officer and an engineer had perished from exposure. Among those saved, the master and 29 others were cared for at Shiranukadomari, and 8 were to be located to-day in the Atoiya light-house. The *Mars* broke her back at the engine-room. She is with

her ends deep in the water and her waist elevated.

#### YINGKOW.

According to a report from Mr. Segawa, Japanese Consul at Yingkow, 23 steamers which had been anchored off the mouth of the Liao for some days, entered the River on the 28th, and 11 others followed on the 29th. All reached their berths safely and are now anchored in the harbour.

#### RUSSIA'S DOMESTIC LOAN.

It was announced in the St. Petersburg *Official Gazette* of the 26th instant that to meet war outlays a domestic loan would be floated. The amount was to be 200 million roubles, the rate of interest 5 per cent., the bonds to be guaranteed against taxation, the issue price to be 96 roubles, the period of redemption 49 years and the period prior to the commencement of redemption 12 years. A hundred million roubles were to be taken by a large majority of the country's bankers, and the other hundred millions were to be subscribed by the public at large. Compared with Russia's last-year issue of Treasury bonds, which carried 3.6 per cent. interest, were redeemable in 4 years and were issued at par, the terms of this new loan are conspicuously unfavourable. The *Novoe Vremya* appeals to the patriotism of the people and urges them to subscribe.

(RECEIVED BY THE "HOCHI SHIMBUN.")

#### THE JAPANESE LOAN.

To-day London banks were opened from an early hour and police posted round them are controlling the crowds. The Japanese loan has been subscribed many times over. It is an unprecedented success. Lists closed at 2.30 p.m.

#### THE BALTIC FLEET.

A steamer—the *Dart*—which has reached Durban from Rangoon, reports having sighted 30 Russian war-vessels and from 14 to 19 colliers at a point 250 miles north-east of Madagascar. The Squadron was heading eastward.

[This augments the mystery. Rojstvensky's ships are supposed to have left Madagascar on the 10th. Where can they have been in the interval between that date and the 19th, if, on the latter day they were only 250 miles from Madagascar.—Ed. J.M.]

#### THE TSAR'S DETERMINATION.

General Batianoff, the newly appointed commander-in-chief of the Second Russian Army, is to leave St. Petersburg in two weeks. He affirms that the Tsar is more determined than ever to continue the war.

According to reports from St. Petersburg, Linevitch has received only 25,000 reinforcements. The provisions and supplies that he has for the army will last a short five days only.

#### NEWS OF THE WEEK.

The Tsuchiura Local Court was burnt down early on the morning of March 29th.

Major-General Imahashi, who sustained wounds at the battle in the Mukden region, arrived by the *Yokohama Maru* at Ujina.

S. Yajima, and I. Terajima, directors of the Suwa Bank, Nagano prefecture, were arrested on March 29th on a charge of fraud.

Mr. T. Mishima, a secretary of the Lower House, has been engaged by the Korean Government as an adviser to the Home Department.

Major-General Nabikoff captured at the battle in the Mukden region will be detained at Nagoya with other high Russian officers from Port Arthur.

The crew, 37 in all, of the British steamer *Harborton* were released on March 30th at Yokohama. This ship was captured on March

18th by the Japanese in the North Sea on her way to Vladivostok with 5,000 tons of Cardiff coal, and is now undergoing examination at Yokosuka.

About forty thousand workmen employed at the Tokyo military arsenal will organize a procession on April 16th to celebrate the latest successes at the front.

The many friends of Mr. J. T. Hamilton will be glad to know that he is returning to Japan by the *Manchuria*, leaving San Francisco about the middle of next month.

It is reported by Tokyo journals that the condition of Lieut-General Murai, who is under treatment in the Yokosuka Military hospital for apoplexy, is now serious.

The condition of Viscount Torio, who has been at his villa at Atami since last year is reported to be serious. The Emperor has sent a messenger to him enquiring as to his health.

Colonel S. Naito of the infantry has been promoted Major-General, and Sergeant K. Toshishi and twenty-nine others have been promoted to the rank of Sub-Lieutenant.

S. Okabe and Y. Furuya, accountants of the Toyama Military Hospital in Tokyo, were arrested on March 29th on a charge of having stolen 180 bags of rice belonging to the hospital.

One male and three female Spanish students arrived on March 29th at Nagasaki by the *Minicota*, on their way to Tokyo. Their purpose, it is reported, is to study the Japanese language.

Two American, one German, and one French war correspondent who were temporarily detained at Shizuoka together with Russians from Port Arthur, were released on March 28th. The journalists immediately left for Yokohama.

Captain Tsuno, confidential secretary to the Minister of War, having been appointed to the staff of a certain Division, left Shimbashi on March 29th by the 6 a.m. train. General Terauchi, Major-General Usakawa and other high army officers saw him off at the railway station.

According to a report of the *Nichi Nichi* reproduced from the *Novoe Vremya*, there are four British and five Chinese in Russia among the Japanese prisoners. They would seem to have been captured from the Japanese transports which were attacked by the Vladivostok squadron.

Three Russian regimental colours captured at the battle of Mukden were brought on March 28th to the Imperial Head Quarters, Tokyo. A decoration of St. George is attached to one of the colours, which is reported to have been given by the Tsar to the regiment concerned for meritorious services in a previous war.

The British steamer *Kingston* on the morning of March 29th was stopped and examined by a Japanese warship off Mutsure, the former being bound in a westerly direction. The *Fiji's* Shimonoseki correspondent says that though the Japanese warship ordered her to stop she continued on her course, so that the former had to fire twice. After examination she was released at once.

The crew—46 in all, including two Russians—of the American steamer *Tacona* (2,812 tons gross) captured by the Japanese on March 14th in the North Sea on her way to Vladivostok with contraband, who were under examination at Yokosuka, were brought on March 29th to Yokohama and released at the Kencho, after making the usual oath in the presence of Governor Sufa and the foreign Consuls concerned.

A Chinaman named Liking, an employee of the British steamer *Australian*, which arrived at Yokohama on March 27th, and two Japanese merchants, T. Takatsuki and S. Kinoshita, were arrested on March 29th by the Harbour Police on a charge of having attempted to smuggle 54 cases of cigars and 9 tin cases of cigarettes, valued at about yen 500. On the previous night they

brought the tobacco by boat from the steamer to Hiranuma canal and they were landing it near a bridge at Sakuragawa-machi when a policeman approached them to make an investigation and they escaped, for the time, leaving the goods there.

A lady bearing the remarkable name of Kaananamokauehai-Kuikawaikamookahi Ke-amokuhalepohai, has written to the Governor of the Hawaiian Islands requesting him not to give the crown lands of Kamehameha to Liliuokalani, who is now petitioning the American Congress for them, but to hold them in the name of the writer. It is added that this is the longest name that has yet appeared, even among Hawaiians, where names of many syllables are not uncommon.

We are informed by the Agent of the Chartered Bank of India, Australia and China that he has received telegraphic advice from the London Office that at the approaching meeting of shareholders of this Bank the Directors will recommend a dividend for the half year ended 31st December last at the rate of 11 per cent. per annum free of Income Tax, placing £75,000 to the Reserve Fund, which will then stand at £875,000, and carrying forward £80,000.

The following judgment has been given in the Kobe Chihō Saibansho, in regard to the criminal proceedings against C. F. Reimers, Nishiyama Nobu, Ishida Kotaro, and Kajiura Aisuke, on charges of fraudulently obtaining money from Japanese who desired to emigrate to America:—Reimers having failed to surrender to his bail, his bail money is hereby ordered to be confiscated. The charges against Reimers having been established by the evidence, he is sentenced to four months' major imprisonment, a fine of yen 10, and six months' police surveillance under Arts. 390 and 394 of the Criminal Code. There being insufficient evidence against the other accused persons, they will be released, in compliance with Arts. 236 and 224 of the Criminal Code. Reimers is ordered to restore the sum of yen 331.20 to Shigemori.—*Kobe Herald*.

#### AMERICAN TOPICS.

Through the death of the widow of the late George L. Littlefield of Pawtucket on Feb. 26, Brown University will receive the bulk of the estate, nearly \$1,000,000.

Representative Charles Landis of Indiana has received a letter from the widow of General Lew Wallace of Indiana, offering as a gift to the government, to be used as a fish hatchery, General Wallace's beautiful fish preserves, 23 acres in area, near Crawfordsville, Ind.

The Navy Department has made public a picturesque letter received by the President from 10 prominent native chiefs of Tutuila, Samoa, in which they wish the President long life and state their approval of the kind administration of Commander Underwood of the navy, the retiring governor of Tutuila.

A special from Nome says that the clean-up in the camp for this year will be a record-breaker. There has been an unprecedented amount of work done on nearly every creek where winter operations are possible. More work will be done this year on the ancient beach streak between Nome and Hastings Creek than in any previous season of the camp's history. The pay-streak in the immediate vicinity of the mouth of Nome River shows up as rich as the pay on the same line on Pelu and west of there. Last fall two men took out \$2,100 in 30 days from a claim near the mouth of the stream.

One goes abroad to learn the news and explanations. American papers to hand by the *Siberia* print the following paragraph:—"Henry B. Miller, of Oregon, whose record in the consular service in the far East has commended itself to the state department, was nominated today for consul at Yokohama to succeed E. C. Bellows, of Tacoma. There had been much complaint against Mr. Bellows by Americans travelling abroad, who declared that they were not treated with as much

consideration as they had a right to expect. Mr. Miller has for several years been consul at Newchwang. The president some time ago declared his intention of placing the consular service in the Orient on an improved basis. Two consuls were dismissed."

All authentic records for wireless communication on land has been broken. Messages between the naval stations at Chicago and Key West, a distance of 1,100 miles, have been exchanged. The Navy Department is informed by De Forrest that on Feb. 10, signals between Kansas City and Cape Hatteras were distinctly heard. The next night very satisfactory exchanges were made with Cape Hatteras and calls from Chicago were noted. Separately Chicago and Cleveland were communicated with. It is also announced that messages have been received from steamers 100 and 50 miles out from New York. These messages generally were very distinct and surprising by loud," the report says. It is stated that the messages during the day time were not so plain and did not carry so far as those exchanged at night.

A most prosperous condition is disclosed by the savings-bank returns of New York state, which show the greatest resources, the largest total of sums deposited, the largest credits to depositors for interest, and the largest total of open accounts ever reported in any year, as well as a notable increase in surplus. The total resources of the savings banks on January 1 amounted, according to Superintendent Kilburn, to \$1,311,993,505, an increase of \$73,193,036 for the year. The amount due depositors was \$1,198,583,142, an increase of \$67,301,198, and the surplus computed on the market value of investments was \$112,853,766, an increase of \$5,804,690. The increase in deposits was the largest ever reported except for the year 1899. The gain in the resources of the trust companies is even more striking than that in the case of savings banks, being larger by more than \$100,000,000 than was ever made in any other year.

The *Chicago Tribune* of February 22 says:—"The beef trust is one step nearer its fate. The United States authorities, acting on orders from Washington, called yesterday for a special grand jury, before which evidence will be laid to prove criminal violation of the Sherman anti-trust law. Indictments of the heads of the great packing houses are expected to follow. Simultaneously in fifteen cities deputy United States marshals served subpoenas on the clerks and managers in the employ of the various packing firms to appear before a grand jury in Chicago on March 20. In all 185 summonses were served, 130 of them in Chicago. None of the heads of the corporations were served, as the evidence to be given will bear against them. This latest move of the federal authorities is the result of an eight months' investigation by secret service men into the conduct of the business of the packers since being placed under the injunction issued by Judge Grosscup on May 10, 1902."

The filing of the will of Mrs. Jane Lathrop Stanford with the county clerk of Santa Clara county, in San Jose, on March 4th caused a stir in police and detective circles. It had been argued by them that the bequests in the instrument might furnish a clue that would lead toward the unravelling of the baffling tangle. Whether or not the will has aided the police is unknown, as they are not ready to comment on this phase of the case. The only person in Mrs. Stanford's employ who is a beneficiary to a considerable extent in the will is Miss Bertha Berner, for nineteen years secretary to the late Mrs. Stanford. She is bequeathed the sum of \$15,000. In her last testament Mrs. Stanford refers most affectionately to Miss Berner, who, she styles a "devoted friend in her hours of trouble." Servants are remembered in the will, but each of these is given a small amount. The former maid, Miss Richmond, and the ex-butler, Beverly, were not mentioned in the will. All of Mrs. Stanford's relatives, near and distant, are treated generously. To her brother, Charles Lathrop, now treasurer of the Leland Stanford, Jr. University, she bequeath-

ed \$1,000,000, and further makes a request that he be continued in the office of treasurer of the university at a salary of \$12,000 a year. Ariel Lathrop, of Albany, N. Y., is given a life interest in the net income of \$1,000,000, to be invested in bonds. His next of kin are also provided for. In her bequest to charity Mrs. Stanford remembers all creeds. All plate and articles of art are bequeathed to the Stanford university museum. The residue of her estate is bequeathed to Stanford university.

A statement issued by the Health Commissioners giving a comparison of the death rates in New York and London shows that the rate in New York, the smaller city, exceeds that of the British metropolis. The number of deaths in New York city last year reached 77,985 while in London there were 77,694 deaths. The population of New York is estimated at 3,666,000 and that of London at 4,684,000. The rate in New York accordingly is 20.23 per 1,000 and in London 16.6 per 1,000. The commissioner remarks in his statement that the death rate in New York is higher, and says last year was an unusually bad one as regards the number of deaths. The death rate for the previous year was 18.8. Summer complaints due to careless preparation of foods, especially in the tenement districts, is assigned as one of the causes for the high death rate. There were 25,623 deaths among children, of whom 6,936 were under two years of age. In London the number of deaths among such children was 4,801. In London there were 5,068 deaths due to accidents while in New York the number was 5,195, but this included 1,000 persons who lost their lives in the *Slocum* disaster.

The big fire at the Illinois Central docks in New Orleans makes a remarkable total for four great fires that occurred within eight days. These fires were:—

Indianapolis, Ind., Feb. 19, business blocks .....	\$1,000,000
Boston, Feb. 21, Hoosac Tunnel docks.....	1,000,000
Hot Springs, Ark., Feb. 25, hotels, dwellings and business blocks.....	1,500,000
New Orleans La., Feb. 26, Illinois Railway Terminal and Stuyvesant docks.....	5,000,000
Total .....	\$8,500,000

In this connection a record of the great American fires is of more than passing interest. In the past 70 years the list is as follows:—

1835—New York City .....	\$15,000,000
1865—Richmond, Va. ....	10,000,000
1865—Virginia City, Nev.....	7,500,000
1866—Portland, Me. ....	15,000,000
1871—Chicago, Ill. ....	185,000,000
1872—Boston, Mass.....	80,000,000
1889—Seattle, Wash.....	6,600,000
1889—Boston, Mass.....	6,000,000
1889—Spokane, Wash.....	4,800,000
1889—Lynn, Mass.....	5,000,000
1892—Milwaukee, Wis.....	5,000,000
1897—Pittsburgh, Pa. ....	3,000,000
1900—Hoboken, N. J. ....	7,000,000
1901—Jacksonville, Fla. ....	10,000,000
1901—Waterbury, Conn. ....	3,000,000
1902—Paterson, N. J. ....	10,000,000
1904—Baltimore .....	100,000,000
1904—Toronto, Canada .....	12,000,000
1904—Rochester, N. Y. ....	4,000,000
1905—Hot Springs, Ark. ....	2,000,000
1905—New Orleans, La. ....	5,000,000

#### YOUNG MEN'S CHRISTIAN ASSOCIATION ARMY DEPARTMENT.

Tairen (Dalny).—The following points are gleaned from the reports of Dr. Fukuda, secretary in charge: "The opening of the Association building fell upon the day of the arrival of a new division of troops, which resulted in fifteen hundred visitors at the building. The average daily attendance since has been 900. The building which is to be used temporarily is too limited to provide fully for all features of the work. The correspondence room is frequently crowded and a placard is hung on the door giving notice as follows: 'Waiting room now full.'"

The largest room is used for games and social work and a majority of the visitors gather here. It is provided with the games of go, shoji and crokinole. There is not room to put up the pingpong outfit. Many men enjoy the stereoscopic views of famous Japanese scenery, others play upon the accordion and musical instruments provided. The gramo-

phone is used every day after three o'clock. When it is used the house always fills up with attentive listeners who often break out in applause. This is the most popular attraction. The reading room is not fully equipped owing to some delay in arrival of supplies. The room devoted to this purpose has a capacity for only twenty men at a time, but as many as eighty soldiers visit it often in a single hour.

The barber shop is well patronized from early till late. Scissors, clippers and razors are constantly busy. The scarcity of water (even for drinking purposes) makes it impossible to supply water for washing the face and of course, the providing of baths is out of the question. Water for tea can be obtained and the demand for it is great. The men often wish to fill their canteens, but the supply will not permit this.

Religious meetings are held daily for half an hour. The meetings are usually begun with hymns which are very attractive and open the hearts of the men. Many ask to keep the hymns after the meetings. The secretaries report that the men, far from parents and wife and children, about to go to the firing line, listen with rapt attention to the addresses, the attendance averages from 160 to 180. These meetings are always followed by after meetings when literature is given to those who desire and men are dealt with personally. Within two weeks thirty-one men made written application for Bible instruction."

The following commendation of the work at Tairen has been presented to the Association in writing by the military governor: "To the Army Department Japanese Young Men's Christian Association Union:—We acknowledge the great benefits offered to our soldiers through your work in this station since February 2nd of this year. Your work has been conducted with care and with thoroughness in every arrangement."

Meiji 38, March 11.

Yingkow.—The following notes from reports of Secretary Gleason give some idea of the way the work is appreciated and a little glimpse into what actually transpires in the rooms. "This 'Soldiers' Club, as it is known among the military, was opened just three months ago. The attitude of all Japanese who know its work is well summarized by Lieut. Col. Miyazaki, the Commandant at this post, at the close of a report to the Manchuria Headquarters shortly after the opening of the rooms. He wrote: 'My firm belief is this: that when this work is fully equipped there can never be any better form of recreation and diversion for the soldiers whose hardships and privations are so conspicuous that they are needless to mention. . . . In the Reading Room was a cavalryman playing the little folding organ as if he were charging a Cossack band, and around him was a group of admirers, some of whom occasionally burst into the weird strains of the Japanese National Anthem. After playing pingpong awhile with some of the fellows, who in their thick, hobnail boots, rough goat skin vests and heavy coats, find this game a little too lively, I was interrupted by a friendly voice. 'Gleason, won't you teach me to play on the organ. 'Stand up for Jesus.' 'As I would rather teach hymns than pingpong, I sat down by the organ and taught him to play the hymn which is so popular among the men here. They like to carry away with them the attractive little hymn sheets which the Japanese Secretary in Osaka designed, and of which we have had 30,000 copies printed. On the first page is the seal of the Young Men's Christian Association, which with the triangle of 'Spirit, Mind, Body,' furnishes a text for an impromptu sermon while we rest our voices. On the front page there is also the name of the Association Army Department in Japanese characters, and a cut of Mt. Fuji, with the verse from Proverbs: 'Righteousness exalteth a nation, but sin is a reproach to any people'. . . . The letter paper, postal cards and envelopes are going out by the thousand, and the stereopticon and gramophone are greatly appreciated. Last night we advertised that from seven to nine we should have a social with songs and games, making a specialty of some new amusements. We were almost overwhelmed by the large attendance. . . . A few evenings ago we gave a magic lantern exhibition and were so crowded by the audience that the platform and two tables upon which the men, eager to see, had climbed, are now wrecks. I think there were between 500 and 700 present."

Mr. A. Segawa, the Japanese Consul at Yingkow, who has observed the work of the Army Association at that point from the beginning has made the following statement: "The Japanese Y.M.C.A. Union established a soldiers' club in Newchatsu in December last, for the soldiers who are stationed here. Musical instruments, games, pictures and stationery were furnished. Besides this, two secretaries were sent to care for the club and usually to address helpful lectures by which the men may receive great comfort and help. Therefore this work is welcomed everywhere where there are soldiers. I who have seen the success of your Army Work pray that it may continue to flourish in the future."

## LATEST COMMERCIAL.

## IMPORTS.

Yokohama, March 24.

There has been some enquiry for Cassed Yarns, but quotations are nominal as no actual business has transpired. A fair demand has been experienced for Grey Shirtings (both spot and future) but business is rendered difficult by the high prices and long delivery required by the manufacturers. The same conditions prevail as to Whites, the position in Manchester being apparently abnormal—cheap cotton and dear goods.

## COTTON PIECE GOODS.

White Shirting—{40 yds. 36 in.} ... 0.10 to 0.18  
 {50 yds. 36 in.} ...

# FOR BABY'S SKIN SCALP AND HAIR

## Something for Mothers to Think About

EVERY CHILD born into the world with an inherited or early developed tendency to distressing, disfiguring humours of the skin, scalp, and blood, becomes an object of the most tender solicitude, not only because of its suffering but because of the dreadful fear that the disfiguration is to be lifelong and mar its future happiness and prosperity. Hence it becomes the duty of mothers of such afflicted children to acquaint themselves with the best, the purest, and most effective treatment available, viz., THE CUTICURA TREATMENT.

Warm baths with CUTICURA SOAP, to cleanse the skin of crusts and scales and soften the thickened cuticle, gentle anointings with CUTICURA OINTMENT, to instantly allay itching, irritation, and inflammation, and soothe and heal, to be followed in the severer cases by mild doses of CUTICURA RESOLVENT PILLS (see below), to cool and cleanse the blood, are all that can be desired for the alleviation of the suffering of skin-tortured infants and children and the comfort of worn-out, worried mothers. A single set is often sufficient to cure when the best physicians fail.

## Millions of Women Use Cuticura Soap

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for soothing irritations and inflammations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sensitive, antiseptic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are prepared to meet the wants of delicate women, and sensitive children, and are pure, sweet, and tasteless. They are beyond question the most successful blood purifiers and humour cures yet compounded.

CUTICURA REMEDIES are sold throughout the world. Australia Depot: R. TOWNS & Co., Sydney. British Depot: 27-29, Charterhouse St., London. French Depot: 1 Rue de la Paix, Paris. Forras Dava and Cuzco. Other, Sole Agents, Boston, U. S. A. \* All about the Skin, 5c.

## "FAIS CE QUE DOIS: ADVIENNE QUE POURRA"

### NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, APRIL 8TH, 1905.

### BIRTHS.

On the 2nd inst., at "Novarra," Negishi, Yokohama, the wife of G. GUSTAVUS BRADY, of a Son.  
On April 5th at No. 5 Bund, the wife of IRVINE WILLIAMS, of a Daughter.

### MARRIAGE.

On the 23rd Feb. at Christ Church, Ealing by the Rev. W. Templeton King, Vicar, Staff Paymaster HENRY CONSTANTINE, R.N., son of F. R. Constantine, of Romansleigh, Victoria-road, Southsea, to ALICE LOUISA, eldest daughter of Commander Mountjoy Squire, R.N., and granddaughter of the late Admiral East and Mrs. East, of Ealing.

### DEATHS.

On the 30th March, 1905, at Sydney, Australia, Hanaah, relict of the late Thomas Bowden, and mother of VIVIAN R. BOWDEN, of Yokohama. Aged 79 years.

On Friday, 31st March, at 220-B Bluff, Yokohama, LAURITZ THOMPSEN, son of Capt. William Thompson, N.Y.K. Aged 20 years 7 months.

At No. 84 Settlement, Yokohama, on the 2nd April, 1905, PAUL SARDA, aged 55 years.

### SUMMARY OF NEWS.

EXCHEQUER Bills amounting to ten million yen were redeemed on March 31st.

REPORTS agree in saying that Vladivostok is free from ice but the Soya strait is very dangerous with floating ice.

On April 2nd a heavy storm was experienced

at Morioka, Iwate prefecture. Several buildings sustained damage.

THE Central Tea Guild has decided to close the branch office at Paris. Mr. K. Sano, manager of the office, will shortly leave for home.

CONVICTS throughout the empire numbered 57,980 on Feb. 28th. The figures show a decrease of 6,530 over the same period last year.

Tokyo papers believe that Mr. Francis, formerly Secretary of the Interior and President of the St. Louis Exhibition, will arrive in Yokohama in July.

THE Russian prisoners detained at Kanazawa on March 31st numbered 4,979, including a regimental commander and thirty-six other officers.

THE trial trip of the Nippon Yusen Kaisha's new steamer *Tango Maru* took place on March 30th off Nagasaki. It is reported to have proved most satisfactory.

THE united meeting of representatives of the silk goods guilds throughout the Empire will be held on April 13th in Yokohama. The conference sits for three days.

THE death is announced of Mr. S. Otsuka, a well-known lawyer in Yokohama. He was one of the first students of French law, being taught by Dr. Boissonade.

MAJOR-GENERALS TARABE and Ishida, having recovered from their wounds, left the Hiroshima military hospital on April 4th for Hiroaki and Osaka respectively.

DURING March, 31,124 pieces of *habutaye* silk were manufactured in Kanazawa. The figures show an increase of 2,700 pieces over the output of the previous month.

A KYOTO telegram reports that fire broke out in the compound of the Uji Ammunition factory but was immediately put out without much damage being caused.

EARLY on the morning of March 31st, fire broke out in Tsuruga, Echizen province, burning down about 120 buildings, including post and telegraph offices and the branch office of the 205th Bank.

A TELEGRAM from Kure reports that three officials of the city office were arrested on April 2nd on a charge of having forged governmental letters and having embezzled money belonging to the office.

MR. K. HADANO, a judge of the Yokohama District Court, has been removed to the Usawa District Court and Mr. S. Satomi, of the Tokyo Appeal Court, appointed to the Yokohama Local Court.

THE *Nichi Nichi* believes that Generals Kuroki and Oku will shortly be decorated with the Grand Cordon of the Rising Sun. At the same time, some eight hundred officers of the Navy and Army will be decorated.

A REUTER'S telegram to the Shanghai papers says that eight steamers have been chartered by private firms at Sydney to convey to Hongkong nearly 10,000 horses purchased on behalf of Japan. The first steamer sails in a fortnight.

A HIROSHIMA telegram to the *Asahi* reports that a military attaché of the German Legation in Tokyo left there on March 31st for the front to convey the decoration recently conferred by the Kaiser upon General Nogi.

REV. J. BARTON of the American Board of Foreign Missions of the Congregational Church announce-

ed on March 14th that Mr. John D. Rockefeller has donated \$100,000 to the Board to be used as it sees fit in its mission work. The greater part of this sum will be used in the Board's work in Ceylon.

THE steamer *Midorikawa Maru*, on the morning of April 2nd collided with a small sailing vessel, the *Daihoku Maru*, at Yoshida, Ehime prefecture, the result being that the latter was sunk, but her crew were saved.

THE *Chugwai Shogyo*, a prominent commercial organ in Tokyo, says that the money market in Yokohama still remains dull and bankers have large deposits untouched. The minimum rate of discounting is about *sen* 1.7 per day.

On the evening of March 30th, passenger and freight trains collided at Kio station, on the Boso Railway, the result being that 13 persons were severely injured and many others slightly. The negligence of a pointsman was the cause.

A NUMBER of workmen and socialists held a meeting on April 2nd at Ueno, Tokyo, on the pretence of holding a cherry-blossom party, but on its political character being discovered it was ordered by the Shitaya police to disperse.

MAJOR-GENERALS TAKEUCHI, and Ogata have arrived at Ujina from the front. Captain Ikeuchi and Lieut. Commander Yamaguchi left Kure on April 1st for a certain destination. Major-General Koidzumi left Moji on April 1st for the front.

M. GEORGE BREMER, who was agent of the Messageries Maritimes in Shanghai some forty years ago, and has since been agent in London, director at Marseilles, and inspector-general of the company, died at Paris on the 8th inst. at the age of 73.

MRS. MONTAGUE KIRKWOOD has been very dangerously ill during the past three months, says an exchange, but is now, we are pleased to be able to say, sufficiently recovered to go abroad, where the doctors advise that she should remain for several months.

It is officially reported by the German Minister in Tokyo, that Lieut-Commander Trummeler, naval attaché to the Legation, has been promoted Commander and that Lieutenant Moriz Eichborn, of the 15th Hanover regiment of Queen Wilhelmina's Cavalry, has been appointed attaché for one year commencing to-day, April 1st.

SOME Tokyo papers report that the Toyo Kisen Kaisha intend to open a regular service between Japan, and Manila, Sydney and Melbourne for which purpose several employees are now investigating the conditions in foreign countries. Probably two steamers now under construction in America will be employed on the line.

A TIENTSIN correspondent of the *Asahi* says that the Italian garrison in north China will depart before the middle of April leaving merely a small force as guard of the Legation in Peking. It is also said that the Italian authorities intend to return to the Chinese Government the concession in Tientsin which the former obtained after the Boxers' trouble.

MESSRS. Y. TANIKAWA and J. YAMAGUCHI, judges of the Yokohama District Court, have been removed to the Yokohama Local Court and the Uraga District Court respectively; Messrs N. Naganuma and C. Nagatsuka, judges of the Yokohama Local Courts, have been promoted to the Yokohama District Court and the Takasaki Local Court respectively; and Mr. T. Kaidzuka, judge of the Kofu District Court, Yamanashi prefecture, to the Yokohama Local Court.

## THE MILITARY SITUATION.

Saturday, April 1.

We read in the *Asahi Shimbun* that the Japanese force which recently occupied Fakumun, has pushed on, and, dispersing a small body of the enemy, reached on the 29th ultimo Tawa, which is on the road to Changchun and Hwaitieh, and is 55 miles north of Fakumun, and 28 miles south of Fenghwa. This force may therefore be expected to occupy Fenghwa very shortly, when it will be within 40 miles of Hwaitieh, which is only 20 miles south of Changchun. To put the matter shortly, the Japanese left was within 78 miles of Changchun on the 29th ultimo, and was pressing on steadily.

As for the Japanese centre, which recently occupied Kaiyuan, it has pushed on to Lien-hwachieh, 25 miles further north. Lien-hwachieh is on a road leading from Kaiyuan to Kirin.

The right, which advanced from Fushun and the Hsinking region, has to march through a mountainous country, but the troops are said to be overcoming all difficulties with the greatest resolution. On the 29th the van of this wing reached Shanchingtsz and the neighbourhood of Heichitsz, which is 10 miles beyond Shanchingtsz. From the latter place to Hailungching the distance is 15 miles. Hailungching is the town of third importance in Manchuria, the order of magnitude being Mukden, Kirin and Hailungching. From Hailungching to Kirin is 87 miles.

These facts give a tolerably clear idea of the advance of the Japanese forces. They are covering the ground with much rapidity, and it now seems improbable that Linevitch will be able to organise any considerable resistance along the Changchun-Kirin line. Of course the St. Petersburg rumour that a force of Japanese had already entered Kirin can not be credited.

The *Asahi* says that the advance is practically unresisted. It resembles a movement on a field day during spring manoeuvres in Japan.

It is stated that the proprietors of the Shanhaikwan-Yingkow Railway have applied for permission to continue the Shanhaikwan-Hsinmintun line from Hsinmintun to Mukden. It had never been their intention to arrest the progress of the line at Hsinmintun, but during the Russian occupation of Manchuria they were unwilling to prosecute the work. Now, however, they seem to think that the opportune moment has arrived and the Japanese Military authorities are said to have given their assent.

The Russian Government, according to a telegram to the *Kokumin Shimbun* from Washington, has entered a protest against Japan's conduct on the ground that she is violating China's neutrality in Mongolia. Baron Komura, Minister of Foreign Affairs, has replied, emphatically denying any such violation on Japan's side, and countercharging Russia with flagrant commission of the very offence she lays at Japan's door. All this sounds as though it were a belated version of an event already familiar to the public. The Chinese Government, adds the report, is becoming uneasy lest these charges of Russia's should be employed as a ground for demanding an indemnity after the war. It is consequently considering the advisability of asking the Powers to appoint a committee of investigation.

Major-General Hayashi's force moved out of the Litajen-Chinchiepau line at the commencement of the Battle of Muk-

den, and undertook against the fortified Russian positions on the west of the railway an attack which lasted for several days and nights, entailing heavy sacrifices, but ending in the complete repulse of the Russians. Marshal Oyama has conferred a *kanjo* on the gallant Division to which this brigade belonged. He specially mentions Major-General Hayashi's men.

Lt.-General Kigoshi's Division also has received a *kanjo*. The particular affair which obtained this distinction was the attack against the Russian centre at Shatotsz, an attack which lasted without intermission for five days and five nights.

Monday, April 3.

It is stated that the utterly destructive method adopted by the Russians in dealing with the railway north of Mukden contrasts markedly with their methods immediately after leaving Liaoyang and while retreating towards that town from the Liaotung Peninsula. Up to Mukden the injury inflicted on the line showed reserve: the Russians evidently looked forward to a time in the near future when they would recover the road and employ it once more for their own uses. But northward of Mukden they think only of the most effective kind of wrecking, and the plain inference is that they have abandoned all hope of again moving southward, at least for many months.

The *Asahi Shimbun* publishes a telegram from the front saying that at the time of the Battle of Mukden a division of Russian troops, newly sent from Europe, was reaching Harbin. Japanese scouts report that these troops are moving towards Changchun, evidently to assist the retreating army. It is therefore inferred that the Russians contemplate some resistance along the Changchun-Kirin line.

Reports from the Hsingking district through which General Kawamura's army marched, show that in the region between Samachi and Fushun the inhabitants seem to have suffered cruelly at the hands of the Russians. In most of the villages a large part of the houses were wantonly burned and over a hundred corpses of Chinese were found brutally murdered. Many of the people's horses also had been slaughtered. It is an old method of war to lay waste the country when retreating so as to embarrass a pursuing enemy. Some excuse may therefore be found for the burning of houses and the killing of horses. But to slaughter the peaceful inhabitants is mere savagery. Another page is thus added to the evil record of Russian deeds during this war.

On the south side of the Fushun-Mukden railway a great quantity of timber has been found. The interesting feature about this article is that its provenance is Hokkaido, and it must consequently have been imported by the Russians for railway purposes before the war commenced.

Details now received show that the Russians defended Tieling with two divisions. The brunt of the attack fell upon one Japanese division, and the losses of the assailants were 700, those of the Russians being computed at over 1,000. No guns or waggons were taken. The enemy made his stand at a position of great natural strength. Some 5 miles south of Tieling runs the Fan River, an affluent of the Liao and nearly as large as the Hun. Between this river and Tieling the country is broken into a number of commanding heights, while from the south the approaches to the river are over long and gradual inclines completely exposed to fire from these heights. Thus the place was ideal for defensive purposes, and the Russians

had improved it by adding many works constructed during their days of leisure. They posted two divisions on the heights, and placed 30 guns in position at elevated points with 8 more on the plain. This constituted their first line of defences. Originally the Japanese contemplated attacking with one brigade under Major-General Ishibashi, but careful reconnaissance showed that such a force must prove insufficient. A second brigade was added, thus bringing the assailants to one division. The attack commenced at noon on the 14th of March, and by evening the Russians were dislodged from the Fan heights. In the accounts lying before us no particulars are given of the method of attack or the quality of the enemy's resistance. All that we learn is that Major-General Umezawa advanced against the Russian right and Major-General Ishibashi against the left, but we do not gather that there was any enveloping movement, nor do we find any explanation of the fact that such a splendid position was won with such ease. Probably the truth is that the Russians had lost heart, and that they knew themselves to be fighting a rearguard action. It will be remembered that telegrams from St. Petersburg spoke of this fight as an affair of great magnitude, and said that it had cost the Russians nineteen thousand men and 80 guns. But that appears to have been a gross exaggeration. In Japanese official reports, at least in those published, no mention whatever was made of a fight: the affair was treated as a sub-incident of the Battle of Mukden. After being driven from their first line of defence the Russians made a feeble resistance on a hill lying south-east of Tieling, but on the 15th in the evening they abandoned this position also and applied themselves to smashing the railway and destroying the stores in Tieling.

It is stated that the Russian buildings at Tieling were on a scale scarcely inferior to that of Liaoyang, and that they had accumulated immense stores of coal, fire-wood and provisions. Most of the important buildings were destroyed by fire, only 80 of the smaller remaining intact. There was also great destruction of stores, but in this part of their work the Russians were not successful.

Mukden has suffered greatly at the hands of the Russians. The city within the walls is comparatively safe, but all parts outside this protection have been more or less devastated.

The Russian officers who were taken prisoners at the same time as General Nahkamoff are said to be quite satisfied with the reflection that they would not have been beaten had not their armies been surrounded.

Mr. Kuroda, the *Nichi Nichi's* correspondent, affirms that the first request preferred by the Russian prisoners everywhere was for food. They seemed to have been suffering something like starvation, and they eat ravenously everything given to them.

A *Kanjo* has been granted to the field-telegraph corps which kept up the communications between General Oku and the Commander-in-chief's head quarters during the Battle of Mukden. The document is given by General Oku, and judging from its language the work performed by the corps must have been something really admirable. Telegraphs and telephones are just as important elements of war in modern times as rifles and cannon.

General Kawamura's army is now known as the "Army of the Yalu." In a message of approval addressed to it by the Emperor,

His Majesty uses that appellation. The message alludes specially to the terrible climatic conditions that this force had to encounter in marching through the mountains northward of the Yalu during the depth of winter. The feat was certainly one of extraordinary endurance. The men must have slept in the open most of the time, and how they ever waded through to Fushun is a marvel. We can not tell the exact date of their landing in the estuary of the Yalu, but it was approximately the close of January, and between that date and the 28th of February, when they carried the Russian positions south of Fushun, they must have suffered hardships without precedent in the case of an attacking army. Troops driven from their cantonments and compelled to retreat during the winter have often had to endure much, but the Japanese must have had extraordinary confidence in the quality of these men to whom they assigned such a task. Any one who saw the men before they left Japan would have felt that the confidence was justified, but when we remember that one of the factors of Russian hope was a belief in the inability of the Japanese to endure cold, it is seen how radically mistaken all outside estimates were.

Tuesday, April 4.

Several Tokyo journals express the opinion that the Russians are making arrangements for a renewed defence at Kirin. There the troops that retreated from Mukden are said to be assembling, and there also such re-inforcements as Linevitch can command are concentrating. Kirin would have for commissariat bases Ningkuta (which is close to the railway) and Vladivostock. Ningkuta is 150 miles east of Harbin, and if Linevitch makes it one of his chief bases, the inference would be that he intends to retreat ultimately towards Vladivostock. But that is scarcely credible. In fact the prospect of anything like a determined stand by the main Russian army at Kirin does not suggest itself as very likely from a strategical point of view, inasmuch as Kirin lies 70 miles off the line of railway, and thus offers a unique opportunity for an attacking army to interpose between the Russians and Harbin. Seventy miles is not, of course, too wide a front to be held by an army of from 250,000 to 300,000 men, but if Linevitch intends to preserve his communications with Harbin, he can not afford to rest his right flank only on the Mukden-Harbin line. His strategy may now be largely affected by the question of supplies, but the map suggests that if topographical features govern his plan, he will chose the line of the Sungari at Chanchiatz (60 miles south of Harbin) as his grand rallying point. His front would then be entirely covered by the great river.

Wednesday, April 5.

An officer who has just returned from the front says that the Russians are assembled mainly at Changchun, where they have a force of from 100,000 to 150,000, but that they do not appear to be contemplating any resolute stand there.

In the *Niroku Shinpo* we find some interesting particulars about Fushun and its coal mines. Fushun itself is a small place, containing only some 320 houses, and it may well be supposed that the town suffered severely during the battle. There were three wooden bridges over the Hun but the Russians destroyed than all before abandoning the place. They have, however, been repaired by the Japanese and are now serviceable. The names to-day given to

them are Zentsuji bridge, Marugame bridge, and Tadotsu bridge; appellations evidently derived from the corps by whose engineers they have been re-constructed. The coal-mine is about 1½ miles east of the town at Sukiatun. The Russians worked it on a small scale, but the coal is of admirable quality, being almost describable as smokeless and nearly equal to Cardiff coal. The Japanese are beginning to work the mine vigorously. They are now taking out 50,000 lbs. daily, and distributing it by means of Chinese carts to the various military quarters. By and bye they expect to utilize the mine extensively. A great deal used to be said about the Yentai mine, as our readers will remember, but on examination the fuel was found to be inferior and the seams vertical. Possibly the accounts now given of the Fushun mine may be exaggerated but as between the two mines the latter is confidently spoken of. It may be presumed that the Russians have now to carry all the fuel for their locomotives from a long distance, but, on the other hand, the distance covered by the locomotives themselves has been appreciably shortened.

According to the *Hochi Shinbun* and the *Fiji Shimpō* the officials of the Russo-Chinese Bank are of opinion that it would be better to leave the East Chinese Railway in Japanese hands after the war than to place it under the combined control of several States. This idea is largely based on the conviction that the railway can not succeed in any hands except those of the holders of Port Arthur and Dalny. The railway will be indeed a problem. No one seems inclined to advocate transferring it to Chinese management, nor would China be particularly disposed to accept such a burden, we imagine. Thus far no particularly possible plan has been suggested. Some have spoken of selling the road to China and devoting the proceeds to partially recouping Japan's outlays. But China might not be inclined to buy and you can not well compel a Power to purchase property which it does not desire to own. Of one thing we feel tolerably convinced, namely, that with their frequently garnered experience of what is involved in international combinations, none of the Powers will be in a hurry to become parties to a commission for the joint management of the line. Japan, of course, will have the casting vote, and certainly the most practical plan would be to leave the road in her possession. But does she care to have it? Is it a paying concern? Nothing would be more irrational than to add to the burdens of the victor merely for the convenience of outsiders. This railway never was a purely commercial venture. In fact, economical considerations had very little to do with its construction. Its *raison d'être* must disappear in great part with the forced abandonment of the ambition that dictated its construction.

Thursday, April 6.

The division of Lieut.-General Tachimi has received a *Kanjo*. From the language of the latter we learn that this Division carried on the desperate fight at Yangshitun and Hankwantun on the south-west of Mukden, a fight which lasted for several days and cost the Japanese immense losses. Had the Russians forced Tachimi's lines at this point, the enveloping movement which the Third Army was then carrying out in rear of Tachimi's Division must have been seriously jeopardized if not wholly checked. In that case the battle of Mukden might have had a very different result. But Tachimi's men, though much outnumbered, clung to their positions with desperate tenacity and

the enveloping movement proceeded uninterrupted.

The *Nichi Nichi Shinbun* has a telegram from Peking which says that an epidemic resembling typhus is raging in Harbin, and that during the past week it claimed five thousand victims, including Chinese. This sounds like a replica of a statement circulated very shortly after the battle of Mukden, when, owing to alleged inability to dispose of the dead or minister to the wounded, Harbin was represented as being in a deplorable condition.

The *Hochi Shinbun* has a Shanghai telegram saying that 76 Japanese prisoners have committed suicide at Novgorod, and that one was saved. A telegram on the same subject reaches the *Asahi* from London. It alleges that the number who committed suicide was 70, that the Russians are giving out that only one made away with himself, and that the tragedy happened in the office of the local administration. We are inclined to regard these large numbers as apocryphal for the obvious reason that prisoners are not in possession of weapons suitable for carrying out such a wholesale hecatomb. It may be indeed that the men were allowed to keep their clasp-knives, and with these it would be possible to sever jugular veins and inflict severe stabs. But a pocket-knife is a very clumsy instrument for such a purpose, and it would probably fail to inflict a fatal wound in the case of at least one half of the 70 or 76. Even clasp-knives too should not be left in the keeping of prisoners, and thus from every point of view the story sounds inexplicable.

Friday, April 7.

A Japanese officer who has just returned from the front and communicated his views to the press, confirms a statement already made, namely, that between Changchun and Tieling there is no position suitable for defence against an army moving northward. It appears therefore that the Russians are concentrating on the Kirin-Changchun line, and are laying a light railway between the two places, a distance of 60 miles. Prior to the battle of Mukden they had already made some preparations to hold this line and they now seem determined to essay the defence on a large scale as they have assembled about 100,000 troops there. Possibly they expect large re-inforcements from Russia, but in Japanese military circles there is evidently an impression that a strong army could not be utilized on the Kirin-Changchun line, and that the main object of making a stand there would be to gain time for constructing defenses at Harbin.

The latest movements of the Japanese troops, as officially reported, mean simply that the three columns—the Kaiyuan column, the Fakumun column and the Changtu column—have manoeuvred so as to establish touch with each other, and that they will now advance with an even front. The Russians are not at present offering any resistance to this advance. It is plain that Linevitch is confining himself to reconnaissances with small bodies of men, who have not even the duty of rear-guards to perform. The 500 of the enemy who were found retreating along the east of the railway near Santaikau on the 4th instant, probably made the mistake of not getting away in time, and suffered for their tardiness.

Another advance of 25 miles will bring the Japanese to Fenghwa, which is the most important town south of Changchun. From Fenghwa to Changchun is 43 miles, so when we hear of the occupation of Fenghwa, we shall know that if an encounter is to take

place along the Kirin-Changchun line, it must be then very imminent.

The three columns spoken of above do not represent the whole Japanese Army. There is also the Hsingking Column, now officially known as the Army of the Yalu, which is advancing in the easterly section of the field with an interval of about 42 miles between it and the right of the three columns which have now aligned their front. The Yalu Army seems to be directing its march upon Hailungching, which is an important town on the Kirin highway, 100 miles distant from Kirin. A hundred miles sounds a great distance, but as a matter of fact the Japanese forces have already advanced fully 100 miles north of Mukden, and they will probably traverse the distance separating them from Kirin and Changchun before the first week in May is past. The Yalu army is marching through a mountainous country, where, nevertheless, there are towns of some magnitude. It will be remembered that stores of grain made by the Russians between Shanchiatsz and Yingemun were spoken of in a recent official report, and we may infer that the Russians will make some efforts to save themselves from being driven out of this useful district.

A Chinese who has just come to Yingkow from Kirin gives (*Jiji Shimpō*) a vivid account of the demoralized state of the Russians. He says that, so far as he could discern, they have lost all semblance of order, and are retreating in small groups, the men abandoning not only their rifles but also everything that impedes their flight. The sick and wounded are often left lying upon the road-side where they solicit the charity of way-farers. He does not say that this disordered condition exists right through the Russian army. Northward of a place which we can not identify in its *kana* dress he observed troops duly organized. We suspect that this Chinaman is not above the trick of the traveller. It is not conceivable that disorder such as he describes can exist on a general scale in the Russian ranks, for we know that many of Kuropatkin's units retired in good order.

The rumour that Harbin is suffering from a terrible epidemic receives confirmation in a telegram from that place *via* Peking to the *Kokumin Shimbun*. The telegram says that the disease is striking down 5,000 soldiers per week, and that it is supposed to have its origin among the troops who have reached Harbin from Mukden; that is to say, among the wounded and dying. The consequence is that people can scarcely be found to perform the last offices for the dead. Nothing is wanting to add to the horrors of this terrible war except the outbreak of pestilence in one of the contending armies, and if Harbin is the site of the calamity, Linevitch will quickly find himself in serious straits. He can not draw supplies from an infected town, and every company of men arriving in his lines from Russia will be potential disseminators of disease. However, there have been previous rumours of similar calamities in the Russian lines, and since in every case they proved exaggerated, this last rumour must be regarded with caution.

#### A DARING DEED.

A very bold deed was performed prior to the battle of Mukden by a body of Japanese cavalry. The number of men engaged in the exploit is not stated, but they seem to have been volunteers from four battalions and they were led by Major Naganuma. This

*kesshintai*—a Japanese term much superior to our "forlorn hope" but without any English equivalent that we know of—set out on the 9th of January, just at the time when Mischenko was making his great cavalry raid along the west bank of the Liao towards Yingkow. The two forces must have unwittingly approached very close to each other's paths. The Japanese, however, were in very small numbers: thus much we gather. Their place of departure was Sumapau, near Heikautai, and their object was to cut the Russian railway at some point north of Mukden. To make their essay at any place in the immediate vicinity of Mukden, or between that city and Tieling, would have been hopeless. Discovery must have ensued, and discovery in the immediate vicinity of the main Russian army would have been certain destruction for such a small body of troopers. Accordingly Major Naganuma determined to direct his march towards some place far northward, and he chose Hsinkaiho, which is described as a little south of Changchun. Remembering that Changchun is 167 miles north of Mukden, we get an idea of the nature of Major Naganuma's project. And he achieved it too. On the 11th of February his little troop emerged on the railway at Hsinkaiho, and blew up an important bridge. It will be observed that Naganuma chose the Mikado's Fete-day for the performance of this extraordinary exploit. On the 14th his men were attacked by a force of Russian cavalry which they dispersed without suffering any loss themselves but they carried away as trophies of their victory one gun and one transport waggon. On the 13th of March Major Naganuma was able to report his return at head-quarters. He had been absent 60 days and not only had he blown up a railway bridge and thus interrupted traffic on the enemy's chief line of communication, but his appearance at such a place so astounded the Russians that they hastened to despatch a large body of cavalry to the region, thus weakening their forces on the very eve of the great battle. The exploit sounds absolutely incredible. That this little detachment of men, between one and two hundred strong—for that is the arithmetical inference suggested by three asterisks in the report—should have ridden through the enemy's line, cut his railway at a point about 150 miles in rear of his main position, and ridden home again without losing a single man or a single horse is one of the most extraordinary feats recorded in military annals. We should dismiss it as a wild romance were we not confronted by the incontrovertible evidence that a *hanjo* was granted to the leader of the brilliant little troop. News of the exploit reached the world from Russian sources. It was described as an emergence of the Japanese in the rear of the Russian armies effected, by a movement through western regions, but not much more was heard about it, and the world assigned it to the Hungtutz, never imagining that a detachment of regular Japanese cavalry could have achieved anything of the kind. Mischenko moved down the Liao with a huge force of troopers, many thousands, and his exploit was pronounced by certain French onlookers as the most brilliant act of the whole war. But Naganuma's side stands easily at the head of the record.

Some further particulars of this memorable ride are published. It appears that the troops (called a *teishintai*) consisted of two detachments of 75 sabres each. These were led by Captains Asano and Nakaya. A

letter written by the former to his parents on the eve of setting out has found its way into print. In it the writer admits that he is about to undertake a task of great danger and that the result must depend on the "guidance of Buddha." He expresses the fullest joy that such a duty should have fallen to him and he swears not to disgrace his family name. His letter concludes with a couplet after the usual Japanese form—a couplet which proved to be his last composition on earth, for he died by a Cossack lance. His fate did not overtake him, however, until he had seen the success of his men and bid farewell to his commanding officer. The fact of his death makes it necessary to modify our previous statement that Naganuma's raid was not attended by any casualties. Captain Asano's death is certain and how many more fell must now remain a matter of doubt until some fuller account appears.

The following is the Russian version of Major Naganuma's ride from Sumapau to the Hsinkai River:—

St. Petersburg, February 16.

The following despatch, dated the 16th inst., has been received from General Kuropatkin:—

"In consequence of the receipt of reports that a considerable number of Chunchuses under Japanese leaders were massing in Mongolia, near the railway at Gunshulin and Kunchenzi, I despatched on the 11th a detachment of frontier guards under Lenizky to make a reconnaissance. This force, having learned of an attack on the 12th on a bridge near Fan-tse-tun, advanced against the Japanese and dispersed them. During the pursuit, which was continued for a distance of 20 versts to the north-west of Gunshulin, Lenizky encountered six squadrons of Japanese cavalry and four companies of infantry and a band of over 2,000 Chunchuses. Surrounded on all sides our detachment, after some fighting succeeded in retiring to Gunshulin, where it arrived on the 15th."

General Sakharoff telegraphs to-day:—

"The Commander-in-Chief has received a report from General Tchitchagoff giving details of the retreat of the frontier guards' force under Lenizky after the fight on the 14th. Boyarinoff, with 90 men, was ordered to resume the offensive against the enemy in order to save the guns of the detachment, but at 9 o'clock in the evening of the 14th he was cut off from Lenizky near Fan-tse-tun, 25 versts north of Sandishan, and was hemmed in on all sides by six squadrons of cavalry and 1,000 Japanese infantry. Boyarinoff kept the Japanese at bay, but when two squadrons of the enemy's cavalry appeared on his flank he made his men mount their horses and charge the squadron on the left. They killed a number of the enemy. On the infantry coming up shouting 'Banzai,' Boyarinoff retired 400 paces, firing several volleys as he retreated. Three men were killed, an officer was badly wounded, and 24 men were wounded. Our force withdrew slowly, carrying their dead and wounded with them. Some of the men who had lost their horses possessed themselves of Japanese animals. The enemy followed in pursuit for 20 versts. Boyarinoff arrived at Fan-tse-tun on the 16th with all his dead and wounded. The wounded officer died *en route*."

This is a case of "men in buckram" with a vengeance. There may have been Chunchuses in the engagement that the first paragraph reports, though as for the "six squadrons of Japanese cavalry and four companies of infantry" they are obviously mere figments of Lenizky's imagination—Dogger-bank troops in fact. The second paragraph is even more explicit. It agrees in date—February 14th—with the Japanese account of the engagement, and it repeats the tale of six squadrons of Japanese cavalry and 1,000 infantry. Now how could 1,000 Japanese infantry have reached a point 160 miles north of Mukden on the 14th of February? How could such a thing have happened by any conceivable possibility? What is plain is that Messrs. Boyarinoff and Lenizky encountered Major Naganuma's squadron of 150 men, and subjected it in their reports to a Rojestvensky process of multiplication which deserves only ridicule.

## MR. UCHIDA ON JAPAN'S MERCANTILE MARINE.

The chief of the Shipping Bureau in the Department of Agriculture and Commerce, Mr. Uchida Kakichi, has made some interesting statements in the columns of the *Fiji Shimpō*. The gist of them is this:—To get an idea about the condition of the Japanese mercantile marine at present, we can not do better than take the state of affairs during the China-Japan War as a standard of comparison. Up to that time the Japanese marine may be said to have been in an infant condition, and its development had not been rapid. In 1893 the country possessed only 167,000 tons of steamers and 33,000 tons of sailing vessels, making 200,000 tons in all. A large part of these had to be requisitioned for military purposes when the war broke out in 1894, and it resulted that great scarcity of shipping facilities was felt in the domestic trade. Freight rose and there followed a considerable purchase of vessels by the Government and the people alike, so that by the end of 1895 the steamer fleet had an aggregate tonnage of 331,000. In fact, it had almost doubled in the short space of 2 years. Naturally this abnormal growth proved too large for normal requirements. The tonnage offering exceeded the goods to be carried in home waters, and keen competition arose, with the result that many private owners had to sell out. Hitherto the services of Japanese vessels had been confined for the most part to domestic waters, but the excess of shipping now created a tendency to go farther afield, and lines were opened to North and South China as well as to Korea. Here Japanese shippers had to meet some competition from the flags of England, Germany and Norway, but as certain exceptional facilities were connected with the employment of Japanese bottoms for carrying Japanese exports and imports, the services in Chinese and Korean waters were gradually placed on a firm footing. Meanwhile, taught by the experience of the war with China that if the country was to have an expanding future it must provide for the development of its mercantile marine, the Authorities had obtained the Diet's approval of laws for encouraging ship-building and navigation. These went into operation in October, 1896, and led immediately to the establishment of services to Europe and America. Moreover, as the importance of the Yangtze Valley to Japanese trade became obvious, lines were opened to Hankow and Ichang via Shanghai—the former in January 1898, the latter in January, 1899—and these were followed by a Soochow-Hangchow service; by lines via Formosa to Amoy, Swatow and Hongkong, and by an increase of the sailings as well as of the ports of call on the North-China lines. Other signs of progress were also manifest. Prior to the enactment of the law for encouraging ship-building, all vessels of any size had been purchased from abroad, with the exception of one wooden ship of a thousand tons. But now a great impetus was given to the building industry. Ships of 6,000 or 7,000 tons were launched from Japanese yards, and at the close of 1903 the country had 657,000 tons of steamers and 320,000 tons of sailing ships, a total fleet of 977,000 tons, the tonnage of the steam fleet being thus about four times greater than it had been at the time of the outbreak of the war with China 9 years previously. Nevertheless the magnitude of the struggle with Russia, involving as it did the country's very existence,

showed this fleet to be insufficient. Ships had to be bought and chartered, and special permission had to be given for foreign vessels to engage in the coastwise trade. During the year 1904, the losses connected with the blocking of Port Arthur and those due to other causes caused a diminution of 71,000 tons. But, on the other hand, 27,000 tons of steamers were constructed in Japan and 177,000 tons were purchased from abroad, making 204,000 tons in all. Thus the nett increase was 133,000 tons, and the steamer fleet, which had been some 657,000 at the close of 1903, showed an aggregate tonnage of 791,000 tons at the close of 1904. The exact figures are as follow:—

Size in Tons.	End of 1903.		End of 1904.	
	Ships.	Tons.	Ships.	Tons.
20 to 50 ...	303	9,764	349	11,204
50 to 100 ...	199	14,036	217	15,286
100 to 300 ...	228	37,926	244	40,821
300 to 500 ...	84	33,175	85	33,045
500 to 1,000 ...	77	50,596	88	58,665
1,000 to 2,000 ...	86	126,234	97	141,616
2,000 to 3,000 ...	66	165,334	77	190,375
3,000 to 4,000 ...	18	62,978	33	112,528
4,000 to 5,000 ...	5	22,478	11	48,622
5,000 to 6,000 ...	3	16,438	5	26,755
Over 6,000 ...	19	118,305	18	112,138
Total .....	1,088	657,264	1,324	791,053

The longer the war continues the greater the need of steamers. During last year the number of foreign vessels employed in the coastwise trade was greatest in April, May and June. Such ships then aggregated 160,000 tons. Subsequently there was some reduction, but at the close of December the tonnage still stood at 110,000 tons. On the other hand, there is the problem of how the increased fleet will find employment after the war. As to that, some people take a pessimistic view. Certainly there may be a measure of embarrassment, but in the opinion of Mr. Uchida the history of the development of the country's marine goes to show that the situation will be met by developments of navigation. There is still much room for steamer services in North-China waters, as well as in those of South-China and South-America. The outlook is not discouraging, provided that owners persuade themselves to look far afield instead of competing foolishly in the domain of the domestic carrying trade only.

## THE PEACE RUMOURS.

Commenting on the constantly arriving rumours of peace the *Fiji Shimpō* insists that the time is inopportune. Russia has not yet definitely recognised the inevitable character of the situation. No peace could now be arranged that would be better than a temporary truce. One difficulty that everyone can appreciate is that Japan has not yet got into her hands anything which she can hold as security for Russia's fulfilment of peace-terms. In sum, the *Fiji*'s opinion is for resolutely continuing the war. The *Asahi Shimbun*, discussing the same subject, arrives at the same conclusion but by a different route. Its view is that Japan must remember all her own sufferings, all her own humiliations, during the past ten years. It has not been her habit, it never is the habit of her people, to wear their hearts upon their sleeves; to let the world see what pain and indignation racked their bosoms while they were treated by certain western nations as things of no account, and scornfully designated "Yellow monkeys." They did not go into this war willingly. The tears were hidden in their eyes when they drew the sword and even to-day, after they have met in

public to celebrate their victories, they retire to their homes to weep over the memories of the dear ones they have lost. With all these memories and and these sufferings to steel their arms they must not now be betrayed into any act of weakness. The time is with them; the fortune of the hour is theirs. Let them take the utmost advantage of the situation. It may sound merciless to preach in such a strain, but it is in truth merciful—merciful to future generations and merciful to humanity at large. The fight must never be abandoned until it reaches a point where permanent peace is clearly in sight. Russia must be forced to divest herself finally of her mischievous mood of aggression.

In the best informed Japanese circles it appears to be confidently believed that the numerous peace rumours now in circulation have no basis of fact. Russia is preparing to continue the war, and if St. Petersburg is the source of pacific talk, an explanation suggested as probable is that a Russian loan is to be issued this month, or in May, and that its successful floating would be much promoted if the public imagined peace to be in sight. That hypothesis may seem a little far-fetched, since the rumours, if intended to serve such a purpose, are plainly premature. But whatever the true facts may be, there does not appear to be any solid foundation for optimism.

## THE IMPERIAL HUNTING GROUNDS.

The Imperial House has hunting preserves at six places in the empire, namely, at Nikko in Shimotsuke, at Amagi in Izu, at Susano in Suruga, at Nishigahara in Totomi, at Narashino in Chiba and on the Yedo-gawa. The first four are too distant from the capital to be easily available, but all the members of the Corps Diplomatique and all distinguished visitors to Japan are well acquainted with the preserves of Narashino and the Yedo River, and have enjoyed many a pleasant day there, thanks to the hospitality of the Emperor. These last two preserves measure some thirty thousand acres. The Chiba and Yedogawa preserves were formed in the year 1890, and an arrangement was made with the people of the localities for a period of 15 years, which will expire this year. Game preserves are not favourite things with dwellers in their immediate vicinity. They involve injury to crops and other inconveniences bitterly resented by the lower orders in Europe. But the people of Japan appear to take a different view of the matter. Thus the Chiba and Yedo-gawa inhabitants have sent delegates urging that these preserves should be maintained. The reasons they assign are that after the war His Majesty may expect more numerous visits than ever from foreigners of distinction, for whom the Imperial court will be anxious to provide some form of amusement, and therefore the maintenance of the preserves is desirable. The Emperor is said to have been much pleased with the spirit shown by these representations, which, though couched in different terms are alike in tone. As well indeed His Majesty might. For what the representations show is that the people of the two prefectures desire to cooperate with the Imperial Court in displaying hospitality to foreign visitors. The Japanese are truly remarkable people. Is there any other nation in the world that would retain a kindly feeling towards foreigners in spite of such a record as the Japanese have to recall—the record of the Yellow Peril, the Yellow Monkeys, and the unvaried contempt of outside peoples?

### EUROPEAN OPINION AT THE CLOSE OF FEBRUARY.

It is curious and interesting to read the views entertained in Europe at the close of February; that it is to say, at the very time when the battle of Mukden had actually commenced, little as the fact was suspected. The critics rightly estimated Kuropatkin's army as not greatly exceeding 350,000 men of all arms, and they spoke, probably with equal insight, of the immense difficulty that must be encountered in keeping him supplied with provisions after the thaw set in. But they also talked with perfect assurance of Kuropatkin "not making a decisive movement until a few months hence," pending which decisive movement Russia would of course entertain no idea of peace. "A few months hence" is an expression which, reckoned from the 22nd of February when it appeared in the *Temps*, could not mean anything sooner than May, and indeed in other quarters the end of April was confidently named as the earliest moment when Kuropatkin's crushing blow could be delivered against the Japanese. Evidently, therefore, it was imagined in Paris that the Japanese would remain obligingly idle until it suited Kuropatkin's convenience to attack them. Yet at that very moment Marshal Oyama's great onset had already commenced; commenced two days previously.

There is a theory in Japan that General Kuropatkin had no suspicion of the menace of the Yalu Army against his left and that he was taken entirely by surprise. It is impossible to endorse that idea. In St. Petersburg it was well known in the middle of February—according to Paris correspondents—that "the Japanese had been reinforced by the besieging army from Port Arthur" and that "recently three divisions of territorial troops had been landed in Korea." The conclusion reached was that "such re-inforcements as had been sent to Kuropatkin were outnumbered by those received on the Japanese side." Everything goes to show that Kuropatkin was not so egregiously ignorant. In fact it did not enter into the Japanese strategy that he should be so ignorant, for the object was to encourage his apprehension of a turning movement from the east, and then to organise a rapid turning movement on the west.

### THE INDEPENDENT CAVALRY CORPS.

Those that have followed the operations in the battle of Mukden with attention must have observed that the enveloping army on the Russian right was preceded by a screen of cavalry, which rode into Hsinmintun on the 3rd of March and subsequently sent a detachment to cut the railway north of Mukden. Colonel Uchida was in command of this Independent Column and Captain Naha led the railway-wrecking detachment. It appears that the latter's task was one of great difficulty and danger, for the Russians, warned by experience, had posted guards at close intervals along the line and adopted every precaution to protect it. Nevertheless Naha's troopers managed to place dynamite charges at 5 points, and thus the road bed was so effectually torn up that from the following morning—9th—the railway ceased to be of the slightest use to the Russians. Naha's men cut the telegraph wires also. It was a brave exploit but we doubt whether its uses were very marked, for apparently the Russians had already sent away from Mukden all their locomotives and rolling

stock. In other words, they had derived from the railway pretty nearly the entire service that it could have rendered. This is consistent with the comment attributed to a Russian staff-officer, namely, that had the wrecking operation taken place a day sooner, it would have given a rich prey to the Japanese. Presumably Kuropatkin and his staff had driven away on the 8th just before the line was cut. We need scarcely add, perhaps, that the capture of Russian rolling stock is not a matter of importance to the Japanese except in so far as it embarrasses the Russians. In that respect, indeed, it has much importance, but neither Russian locomotives nor Russian waggons can be of any subsequent utility to their captors, since the first step taken by the latter is to reduce the gauge of the rails.

### THE FIGHT AT THE NORTHERN MAUSOLEUM.

The regiment commanded by Colonel Murakami rivals that of Colonel Shimada in fame acquired at Mukden, and as in Shimada's case so also in that of Murakami, death overtook the brave leader. In Shimada's regiment only one officer, Captain Watanabe, survived; in Murakami's regiment only two officers emerged scathless. The reports sent by correspondents are somewhat confusing, but the language of a *kanyo* granted to the regiment shows clearly that its heaviest fighting took place on the 9th and 10th. The regiment, having driven the Russians out of Sutaitsz, reached Pehling (the Northern Mausoleum) and was there completely surrounded by the enemy. Newspaper correspondents speak of a kind of siege lasting for several days and of the regiment living all the time on a scanty ration of biscuit carried in the men's knapsacks. But we do not understand how this position could have been won before the 9th or the 8th at soonest. The Northern Mausoleum stands almost due north of Mukden on a hill overlooking the railway, and it thus commanded the line of retreat of the Russians. Naturally, therefore, they spared no effort to drive out the Japanese. These had their fiercest struggle on the 9th when the Russians moved up to close quarters, and a *melee* ensued, lasting with more or less intermission from 5 a.m. to 4 p.m. The position remained ultimately in the hands of Murakami's men, but their colonel was dead, and all his officers save two were killed or wounded. Marshal Oyama, in the *kanyo*, applauds the regiment not only for holding this important position, but also for subsequently utilizing it to harass the Russians in their retreat. Evidently, therefore, the regiment retained its fighting potency even after such an ordeal.

### THE PROJECTED AMERICAN SUBSIDY SCHEME.

If the proposals formulated by the United States Merchant Marine Commission become law, one of Mr. Hill's leviathan steamers recently placed on the American Oriental route would receive an annual subsidy of some 200,000 *yen*. This handsome aid might be continued to her for a period of ten years, by which time her owner would have pocketed a sum of 2,000,000 *yen* in the form of State assistance. It is calculated that the cost of ship-building is from 30 to 50 per cent higher in the States than in England, which fact is one of the chief reasons underlying the idea of granting large public aid. Evidently if a ship-owner can count on

being re-imbursed to the extent of 100 *yen* per ton out of the national treasury, he need not be much concerned about the question of cost of building.

The above subsidy is to cover the building difficulty. But there remains another difficulty, namely, that the expense of running an American ship is considerably greater than the expense of running an English ship, owing mainly to difference in wages of seamen. This is met by subventions in addition to the subsidies. Take the case of a fortnightly service between the States and the Far East performed by seven steamers such as the Nippon Yusen Kaisha employs on its Seattle line. Then these seven vessels, averaging 6,000 tons each, would receive—were they under the American flag—420,000 *yen* annually by way of subsidy, and 1,200,000 *yen* annually by way of subvention, so that their total aid from the State would be 1,620,000 *yen* yearly.

It sounds very heroic, but one can not be surprised that the people of the United States have grown impatient about the state of their mercantile marine. Before the Civil War, that is to say in 1861, they had a fleet of 5,539,831 tons; a fleet equal to that of all other nations combined—Great Britain excepted—and not greatly inferior to the marine of England. In fact it then seemed as certain as anything human could be that the stars and stripes would soon cover the greatest mercantile fleet in the world. At present the American flag covers only 900,000 tons, and as only 9 per cent of the country's foreign trade is now carried in American bottoms, it appears that the United States is disbursing 300 million *yen* yearly to foreign nations for performing services which should be performed by the nation itself. Such conditions are calculated to stir the soul of the go-ahead American, who is not content to play second-fiddle in any orchestra.

### THE TOBACCO MONOPOLY.

The tobacco monopoly appears to be a most profitable enterprise, judging from official figures just published. The monopoly system went into force last July, so that, up to the close of the fiscal year (March 31st) it had 8 months to run. During that period the Government's estimate of net profits was 20,194,000 *yen*, whereas the profits actually realized were 27,542,000 *yen*, showing an excess of 7,348,000 *yen* above the estimate. These figures are thus obtained:—

	Yen.
Profits of Sale of Leaf Tobacco .....	16,750,000
Manufactured Tobacco .....	8,740,000
Profits from Various Sources (over) .....	3,000,000
	28,490,000
Expenses .....	1,900,000
	26,590,000

Presumably some addition is to be made to this last figure for otherwise it does not tally with the statement of 27,542,000 *yen* made above. But at any rate the result must be very gratifying to the Government, especially as, during these first 8 months of its operation, the monopoly had to compete with large sales of tobacco manufactured privately in anticipation of the new system, and moreover the Government, in consideration of the military situation, sold quantities of tobacco to the troops at greatly reduced prices. It is plain that the foreign loan of 30 millions sterling based on the security of the tobacco monopoly is a very safe business.

## TECHNICAL EDUCATION IN JAPAN.

Of late years, says the *Nichi Nichi Shim-bun*, middle-class education has made marked progress in Japan. There are now 223 officially conducted middle-schools in the empire and 41 private schools. No city or prefecture, if we except Okinawa and Tottori, is without 3 or 4 such schools. Tokyo has 48; Niigata and Osaka 10 each. And there are evidences that the number will increase. Female education has progressed steadily. The country has 89 female high-schools established by the Government and 9 private institutions of the same kind. Each city or prefecture has one and some have 2 or 3; besides which there are not a few that have not sought official sanction.

Thus conspicuous has been the growth of middle-class education in the past, and it continues in the present. But with regard to technical education, though there is not wanting a tendency towards its development, great necessity exists to encourage it. The following table, compiled from investigations made by the authorities in January last, gives some idea of the state of affairs in this branch of education.

**Agricultural Education**—There are indications of this kind of education spreading throughout the whole country. The number of institutions devoted to it at present is:—Agricultural University 1; special schools of agriculture 3; ordinary schools of agriculture 106; schools of sericulture 11; making a total of 120. The greatest progress seems to have been made in Kyushu, Fukuoka, Oita, Kumamoto and the Tokaido districts, probably owing to facilities of communication. The regions where development is slow are those on the Sea of Japan.

**Industrial Education**—This kind of education comes next to agricultural education in degree of progress. The institutions devoted to it are:—Industrial Universities 2; industrial high-schools 3; general industrial schools 17; industrial schools where weaving and dying are the main subjects taught 13; industrial apprentice-schools 38; industrial schools having special departments attached or industrial high sections 2; making a total of 75. (In this list are not included certain industrial schools, a high school in Nagoya for example, which are to be established during the current year.) The lead is taken in matters of industrial education by Kyoto, Osaka, Nara, Tokyo, Gumma, Chiba, Saga, Fukuoka, Kumamoto and Kagoshima; considerable backwardness being shown by Sanindo and Sanyodo (that is to say, the central regions) as well in by Shikoku and the northern provinces. Considering the small area of Japan in proportion to her population, it would seem that greater development might be expected in this line.

**Commercial Education**—The schools in this branch are:—Commercial high schools 4; commercial general schools 56; schools of navigation 7; making a total of 67. Besides there are to be opened during the current year commercial high-schools in Yamaguchi and Nagasaki. Here the tendency to progress is most apparent in Kyoto and its vicinity, in Tokyo, in the Tokaido districts and in the provinces on the coast of the Inland Sea. The south-east of Kyushu as well as the Sanin districts have very few schools, and there is not yet so much as one in Fukushima, Iwate, Yamagata, Akita and Awamori. These things are largely a question of the conditions prevailing in a locality and of the state of communications. Japan, in view of her island state, has much need of men trained in the theory and practice of

navigation, yet there are only 7 schools for that purpose throughout the whole empire.

**Marine Products Education**—Schools in this section are very few indeed and they show no sign of vigour. They are:—marine-products independent schools 6; marine products attached schools 2; total 8. This is a curious record when we remember the immense extent of the Japanese coastline and the great sources of wealth offered by her marine-products. The *Nichi Nichi's* conclusion is that whereas agricultural education shows fair progress, there is much need for encouraging other branches of technical training, and that when the country's post-bellum programme comes to be elaborated, this fact must not be lost sight of.

## ALEXIEFF AND ROSEN.

We observe with regret that in Europe there begins to be established a habit of bracketing the names of Alexieff and Rosen together as originally responsible for the war. As to Alexieff there is no second opinion in Japan. He never believed that the Japanese would fight and therefore he never treated them seriously. Such was said to have been his conviction from the first and it has just received confirmation of a very emphatic character. One of the Port Arthur officers told a representative of the *Russophile Echo de Paris* that "a few days before the Japanese surprised the Russian Fleet Admiral Alexieff was present at a dinner at the Military Club; yet, although they all expected a declaration of war, he told them nothing, not even that the Mikado had recalled his Minister from Washington." Another piece of evidence was obtained by M. Eric of the *Journal*, who met General Stoessel and his party at Aden:—"General Reiss declared that when General Kondratenko called the attention of Admiral Alexieff to the necessity of hastening the construction of the forts, the Admiral smiled at his anxiety and assured him that Japan would never dare to attack Russia. Two days later the war began." It will therefore be very hard indeed for Alexieff to escape condemnation in the pages of history, but Baron Rosen surely belongs to a different category. It may be that he too did not credit the possibility of little Japan bearding the Colossus of the North. Modern Japan had grown up under his eyes and the steady continuity of the development had perhaps impaired his appreciation of its magnitude. Indeed had he been convinced of the probability of war, he must have shaken Alexieff's scepticism. But apart from that the idea that Baron Rosen spared any effort or neglected any means to avert war, no one that had the pleasure of knowing him can imagine for an instant.

## JAPAN'S CRIMINAL LAWS.

The *Official Gazette* of the 1st instant promulgated a measure which passed the Diet last session and has received Imperial sanction for mitigating the operation of the Penal Code. It is an interesting modification:—

## LAW No 70.

I.—Should any of the undermentioned persons be sentenced to imprisonment for a period of not more than one year, the operation of the sentence may be deferred, according to circumstances, for a period of not less than 2 years and not more than 5 years from the date of the judicial decision. Provided that persons under police surveillance are excepted:—

(a) Persons who have never previously been sentenced to imprisonment or any heavier penalty.

(b) Persons who, though previously sentenced to imprisonment or some heavier penalty, have not been

sentenced to imprisonment or some heavier penalty during a period of 10 years from the day of the conclusion of the previous sentence's operation or from the day of its remission.

II.—In cases where the operation of a sentence is deferred, the operation of a supplementary sentence will also be deferred. Provided that confiscations are not included.

III.—The deferring of the operation of a sentence may, on the application of a public procurator or at the judge's discretion, be ordered simultaneously with the passing of such sentence.

IV.—After a sentence has been passed, the Court that passed it may, of its own discretion or on application by a public procurator, decide to defer its operation. In such case the operation shall be suspended until such decision is confirmed.

After the operation of a sentence has commenced, such operation may not be deferred.

V.—When the period of operation of a sentence has passed without any repeal of the judgment deferring such operation, the operation of the deferred sentence shall be remitted.

This Law shall go into force from the day of promulgation.

The above law represents a reform which has long been talked of. Its gist is that persons sentenced to not more than a year's imprisonment for a first offence may be given a period of grace during which to redeem their character in the eyes of the law. Should such period pass without the commission of any fresh offense, the original sentence is then revoked. The law applies also to persons who, though they have previously undergone a punishment of not more than a year's imprisonment, can claim to have remained for ten years without any subsequent conviction.

## THE CANARD ABOUT THE NORTH SEA COMMISSION.

It now appears that the extraordinarily erroneous version given to the world originally about the finding of the North Sea commission came from Reuter. The comment of *The Times*—which, it may be remarked *en passant*, did not give publicity to Reuter's telegram—is as follows:—

Some weighty and well-considered remarks in the *Temps* recall attention to the fact that on the night of February 22nd a despatch was sent from Paris by Reuter's agent, according to which the Commission's report declared "that Admiral Rojestvensky might legitimately have believed that his squadron was in danger and that he was entitled in view of the circumstances to act as he did." This was a categorical statement, on a matter of the first importance, made by an agency of high standing and acknowledged reputation, without any reserve or any indication that it was based on rumour and not on positive knowledge. It was accepted at its face value by several of our contemporaries, and published in their morning issues of Thursday last. This statement, which, as the publication of the report has proved, was at variance with the facts, did not appear in our columns, as we received concurrently a carefully worded telegram from our Paris Correspondent, who enjoys a well-deserved reputation for accuracy and caution, in which he definitely stated that the reports which had got abroad concerning the North Sea incident were devoid of foundation, that the Admirals had not communicated their decision to the two Government Agents, and that they had kept their secret so well that it was not even known whether they had come to a unanimous agreement. Whatever may be thought of the wisdom of commenting on the alleged contents of a report before that report is officially published, it was hardly to be expected that, in default of further information, our contemporaries should withhold from publication a telegram of such importance as that sent by Reuter's agent from Paris on the night of Wednesday last. The responsibility for the feeling which its contents not unnaturally aroused in this country must rest with Reuter's Agency, which may be reasonably expected to provide an explanation of this unfortunate incident.

No explanation has been furnished, however, so far as we are aware. Reuter's Agents made a mistake. That is the whole story, and they are too wise to attempt any extenuation. Very seldom indeed do they err and this one blunder may well be forgiven, though it was particularly unfortunate.

# GRIPENBERG ON THE BATTLE OF HEIKAUTAI.

We have now a statement which seems to be authentic from the lips of General Gripenberg as to how and why he failed to win the battle of Heikautai. It is sent to *The Times* by the latter's correspondent under date of February 17th:—

General Gripenberg on his arrival at Moscow yesterday was interviewed at the railway station. To the correspondent of the *Novoye Vremya* he expressed great pleasure at having an opportunity of stating the true reasons for his departure from the theatre of war.

"In the first place," General Gripenberg is represented to have said, "General Kuropatkin was fully aware of my projected attack on Sandepu, and he himself fixed the limits from the south to the north-west towards Sandepu beyond which I was not to advance. The Japanese dispositions were favourable to our attack. . . . On the morning of the 13th (26th) a battle began along the whole line. On our right flank we had the First Army Corps, then the First Rifle Brigade, and later on the Fifth Division and a brigade from the Second Army Corps. In all we had 62 battalions against twice as many of the enemy. The battle raged all day. By the evening we had maintained all our positions, but the left flank was weakened, so I begged General Kuropatkin, who had 60 battalions, to send me reinforcements. He refused on the ground that the Japanese were threatening to attack his centre.

"Next day I decided to take Heikautai. When the attack began on the 14th (27th) I again demanded reinforcements. Our position was favourable, and had General Kuropatkin sent me the troops I wanted we should have surrounded 100,000 Japanese. Our cavalry was threatening them from the south-west and south.

"On the morning of the 15th (28th) we successfully repulsed four desperate Japanese attacks, but I was unable to advance owing not only to the want of reinforcements but to the fact that I had not received permission to do so. Victory was in our hands, and I cannot tell you how anxiously I awaited men and authorization to advance. Neither came.

"On the evening of the 15th (28th) General Kuropatkin ordered us to retire in view of a possible attack from the Japanese centre.

"It is not for me to criticize, but I must say that the Japanese could not possibly have attempted any serious attack on General Kuropatkin's centre. It is difficult to describe my feelings on receiving General Kuropatkin's order.

"On the night of the 16th (29th) we retired, carrying away all our wounded and even picking up broken bayonets. The men retired unwillingly, with tears in their eyes. I decided that it was impossible for me to remain any longer at the front, and next day I reported myself to General Kuropatkin, asking him to relieve me of my command immediately. He did so."

The Emperor received General Gripenberg in audience this morning and heard his report.

If this is a correct report General Gripenberg's ideas of the Battle of Heikautai differ radically from those of the Japanese. Without attempting to reconcile them, we may draw attention to the glaring discrepancy in the statements of numbers given by both sides. General Gripenberg says that he had only 60 battalions, or about 48,000 men, and he assigns to the Japanese 100,000. The Japanese say that Gripenberg had 8 divisions, or about 100,000 of all ranks, while they themselves had only two divisions in action. Which account is correct? One thing we know for certain, namely, that only General Oku's Army can possibly have been engaged on the Japanese side, and that Oku had only 3 divisions, which, at that time, did not muster 70,000 men. We know also, with nearly equal certainty, that one of these Japanese divisions can not have been in the fight since its position was in the northern part of the field. Therefore if we conclude that 50,000 Japanese were engaged, we shall be very near the truth. Another point which reads very curiously is Gripenberg's allegation that Kuropatkin had 60 battalions. What is to be understood by that? Kuropatkin was in the centre of the Russian position. Are we then to conclude

that the whole Russian force on the right and centre consisted of only 120 battalions? Where were the rest? The Russians had then 376 battalions of infantry, 171 batteries of artillery and 178 sotnias of cavalry in the Mukden lines. Yet we are asked to believe that not one-sixth of this force was under Gripenberg's command on the eventful day when he attempted to roll up the Japanese left; that another sixth was engaged defending the centre and that the remaining four-sixths were away in space. Apart from this Gripenberg seems to be condemned out of his own mouth. For he tells us that having been refused re-inforcements on the 26th of January—refused for a reason which must have been equally operative on subsequent days—he determined to attack Heikautai on the 27th, and immediately on commencing the attack applied again for re-inforcements. He admits then that, having failed to obtain any accession of strength, he at once and deliberately undertook a task which he knew to be impossible without such accession. The strangest thing of all is his claim of virtual victory. Avowedly the battle was an attack. The Russians set out to advance to certain points and to drive the Japanese from them. Yet on the evening of the first day Gripenberg had only succeeded in "maintaining all our positions." A fine record for a successful attack. On the second day he made the essay which could not result favourably for lack of re-inforcements. Its actual result was that the third day found him acting on the defensive. All that is consistent with Japanese reports, and it is also consistent with what certainly did take place, a complete Russian defeat.

The Gripenberg incident is so interesting that we make no apology for returning to it again. In *The Times* we find the following:—

Paris, February 19.

A Russian officer who has just returned from the front, and who was with General Gripenberg during the last battle, has been interviewed by the St. Petersburg correspondent of the *Journal*. The Russian General Staff map used by General Gripenberg was found to be totally inaccurate. He relied upon this map, however, and the result was that General Stackelberg, who was ordered to advance, thinking he would have to operate in a plain, found himself unexpectedly face to face with the Japanese admirably entrenched and fortified on a high hill. General Gripenberg was informed and gave the order to take the hill. This was done with heavy losses, but the Japanese immediately effected a turning movement, enveloping General Stackelberg.

General Gripenberg had with him only 60 battalions. He several times asked General Kuropatkin to send him fresh troops since General Kuroki was constantly reinforcing the Japanese. General Kuropatkin's reply was that he would not send reinforcements, for he himself expected to be attacked in the centre by the entire Japanese force. Immediately afterwards General Gripenberg asked for leave of absence on account of illness and telegraphed to the Tsar *via* Mukden, informing him of the facts and adding:—"If I had been reinforced I should have won a complete victory." General Kuropatkin intercepted this telegram and asked General Gripenberg for an interview, but the latter did not reply, and sent a second telegram to the Tsar. The Tsar thereupon asked for further information in a cipher telegram, and General Gripenberg's reply consisted of 152 words. The Tsar telegraphed back to General Gripenberg bidding him come on without delay, and he left for St. Petersburg without seeing General Kuropatkin.

February 20.

It would appear from the accounts furnished by the St. Petersburg correspondents of the Paris newspapers that General Gripenberg met with a cool reception at Tsarskoe Selo, and in fact that the Tsar distinctly took General Kuropatkin's part. The *Echo de Paris* says that General Gripenberg's reception was cold, and that after having listened to him the Tsar said:—"I am entirely of Kuropatkin's opinion." In military circles General Gripenberg is severely censured. It is contended that it would be the negation of all discipline if he were not severely

punished for having disobeyed the orders of the Commander-in-Chief and having left his post. The correspondent of the *Echo de Paris* represents the army to be most unfavourably impressed by the publicity given by General Gripenberg to the incident, as it exposes to the whole world and to the enemy the dissensions and incapacity of the high command in Manchuria.

St. Petersburg, February 20.

General Gripenberg has requested the *Novoye Vremya* to publish a correction of the account of the interview which the representative of that journal recently had with him. He says that General Kuropatkin ordered the Second Manchurian Army to assume the offensive, not to make a reconnaissance in force. The village at Heikautai was taken on January 25 at 11 o'clock in the evening, and on the following day the Japanese began a series of desperate attacks, which were brilliantly repulsed with enormous losses to the enemy. The Russian retreat was carried out during the night of the 28th by order of the Commander-in-Chief. The rumour published in the newspapers that it was then that the Russians sustained their greatest losses the General declares to be an invention, as the Japanese were much weakened themselves, and made no pursuit.

All this makes it clear that Gripenberg behaved with extraordinary disregard of discipline. Having engaged in a certain operation by the orders of his commander-in-chief, and having failed, he then proceeded to telegraph to the Tsar over the head of the commander-in-chief, and subsequently went to the length of refusing even to meet Kuropatkin. Kuropatkin would have been entirely justified in arresting this mutinous subordinate and trying him by drum-head court-martial. Does it not sound like a grim comedy to be told that Stackelberg—this always unfortunate Stackelberg—suddenly found a fortified hill where he expected to find an entrenched plain? And is not Gripenberg's ignorance strikingly illustrated by his fancy that Kuroki was re-inforcing the Japanese at Heikautai; Kuroki who was fifty miles away!

## A NEW DEPARTURE IN TOKYO JOURNALISM.

We believe we are correct in saying that to the French belongs the credit of introducing an entirely new practice in the conduct of a journal, namely the retention of a certain portion of the available space for the use of noted writers, whose views are published over their own signatures. Thus a Simon column or a Ferry Column, for example, would give the public the benefit of the views of those statesmen on current events. The *Yomiuri Shimbun* of the 3rd instant announces that it purposes following this practice and that hence from the 10th inst. onwards a part of the paper to be known as *Betsu Tenchi* (Another World) will be loaned to the Mayor of Tokyo, Mr. Ozaki Yukio, who will be at liberty to write just what he pleases, although the sentiments may be in direct opposition to those of the editor of the *Yomiuri Shimbun*. A newspaper, says the *Yomiuri*, has the duty of furnishing to its readers all sorts of opinions on various subjects and to depend on correspondents only for this does not seem to answer over well. Hence the new departure. This is a kind of *imperium in imperio* in the newspaper line. The name given to this column by a French writer is *Mon petit journal*; but since Mr. Ozaki's views on a variety of topics are opposed to those of the general public, "A Different World" or "A Different Outlook" is a well chosen title. This part of the *Yomiuri Shimbun* will certainly be read with great interest, for Mr. Ozaki is a charming writer.

## KOREA.

Monday, April 3.

The Korean Government has finally decided to place all the communications of the country in Japanese hands. There was a disposition to limit the time to ten years, but ultimately that provision was abandoned, and the transfer will be for an indefinite period.

With regard to the withdrawal of Korean Representatives from foreign capitals, the first step will be taken in the case of Peking, it is stated. The Korean Legation there will be closed, and its inmates all recalled. What a contrast this presents to the time when Peking was the Mecca of Korea, and when Korean envoys used to carry annually their country's tribute to the Court of the Middle Kingdom.

An American company is about to undertake the task of building water-works for Seoul.

The Belgian Representative is applying for mining privileges for his countrymen.

On the 27th ultimo official permission was given to the Anglo-American-Japanese syndicate to commence mining operations at Suan in Korea.

Tuesday, April 4.

Tokyo journals publish the following *precis* of the convention concluded on the 1st instant between Mr. Hayashi, Japanese Representative in Seoul, and the Korean Foreign Office:—

1. The Governments of Japan and Korea, in order to regulate the machinery of communications in Korea, consider that for the sake of bringing this machinery in both countries into thorough connexion, it is in the interests of Korean administration and finance that the post-offices, telegraphs and telephones of Korea shall be entrusted to Japan and shall be under her management.
2. The Korean Government will hand over to Japan's safe-keeping the machinery of communications hitherto established by it together with all connected appliances.
3. With respect to the regulation and extension of the Korean machinery of communications by the Japanese Government, the Korean Government will afford all necessary facilities.
4. The Japanese Government will be responsible for all expenses of regulation and extension.
5. The Korean Government may establish other offices of communications provided that they do not impair the rights and privileges secured by the convention.
6. With regard to operating the machinery of communications the Japanese Government will appoint Korean officials and such employees as may be required.
7. The outgoings and incomings connected with the machinery of communications shall be clearly shown, and Japan will hand over to Korea all profits.
8. When the Korean Government shall have attained a condition of administrative and financial competence to operate independently the machinery of communications, these shall be restored to it.

The transfer of all the Korean post-offices telegraphs and telephones to Japanese control and administration may have presented itself to the Korean Authorities as in some sense a loss of sovereign power, but from a financial point of view they ought to rejoice at the measure. For

so defective has been their management of a business which in nearly all other countries proves a source of revenue, that they have hitherto had to suffer a loss of 300,000 *yen* annually on account of the postal and telegraphic services. They have some reason to be gratified, therefore, that this expensive enterprise is to be taken off their hands. The Japanese will probably succeed in converting the deficit into a profit. There is no apparent reason why postal and telegraphic business should show such unfavourable accounts in Korea while it works so well elsewhere.

A telegram from Chemulpo to the *Asahi*, dated the 2nd, says that Rear-Admiral Arai and his staff arrived there by the *Santa Maria* on the 1st instant. They will await the coming of the work-ships *Nisshin*, *Iriyama* and *Heiwa* and will then proceed to raise the *Varyag*.

The same journal has a telegram from Hyongyang dated the 1st saying that the telegraph lines were to resume general work from that day.

Wednesday, April 5.

The Russians are said to have about a thousand troopers in Kyongsong and their videttes push as far south as Kilju, where they are almost in touch with the force under Lieut.-Colonel Ikeda. They no longer venture as far as Songjin, for very sufficient reasons. They are watching Unkw Bay with much vigilance, and have established a telegraph station there as a means of quickly communicating any indications of Japanese activity. There are some 200 sabres in Kyongheung on this bay. It does not appear that the troops on the north bank of the Tumen have either withdrawn to Vladivostok or passed into Manchuria. They are evidently still on the Tumen, and the inference is that they contemplate making a stand there against any attempt on the part of the Japanese to advance in the Vladivostok direction. The Tumen would then become the first line of defences for Vladivostok. Only 2,000 troops are said to be now on the Tumen, and since the distance thence to Vladivostok is 137 miles, this force assumes an isolated character difficult to reconcile with any theory of obstinate resistance. What seems most probable is that the Cossacks on the Tumen and at Kyongsong are mere outposts, having for chief duty to reconnoitre and to keep Vladivostok posted with regard to all Japanese movements.

These comments may be read as suggesting that some operations in north-eastern Korea are imminent. But that would probably be a wrong inference. We have no reason to think that any Japanese troops are further north than Songjin, and from Songjin to the Tumen the distance is 140 miles—a distance not to be traversed without much difficulty at this time of year. Meanwhile it is denied that recent rumours are credible with regard to constant visits of Russian torpedo-boats from Vladivostok to Possiet Bay. It does not appear that anything of the kind is taking place, and indeed it could hardly take place without requisitioning the services of the Vladivostok ice-crushers which have probably plenty of work to do it the naval station.

There appear to be some signs of disturbance at Chonju in Chollodo, the progressists and the conservatives being at daggers drawn. One account speaks of the conservatives as the Peddlers Guild, which is credible enough. It has been found necessary to replace the Korean police-inspector with a Japanese gendarme.

Mr. Li, Korea's envoy to congratulate Japan on her victories, arrived at Shimbashi on the morning of the 4th and proceeded at once to the Shiba Detached Palace. His suite numbered six.

Thursday, April 6.

A collision took place on the 3rd instant at a place near Yongampho (which lies a few miles from Seoul on the Han) between 30 of the Korean "fire bandits" and a party of Japanese gendarmes. Five of the bandits were killed, three captured and some arms, ammunition and money were taken from them.

The bridge over the Tadong was opened to traffic on the 3rd. There was a ceremony of some brilliancy, attended by Major-General Yamane, who started on the following day to make a tour of inspection along the Seoul-Wiju railway.

The Korean Envoy is to attend the Palace to-day and be received in audience by the Emperor.

Friday, April 7.

In the *Asahi Shimbun* we find a letter from one of its correspondents who writes apparently from north-eastern Korea. This letter indicates that a Japanese force is advancing north-ward from Yuensan, that it has reached Songjin, and that at the latter place it received re-inforcements. What may be the dimensions of this operation there are no clear indications, but evidently the immediate purpose is to drive the Russians from Korean soil. The correspondent says that whereas the Koreans, having for a long time observed the Cossacks in undisturbed occupation of the north-eastern regions, had learned to look with contempt on the Japanese, their point of view has now undergone a radical change. Yuensan has recovered its prosperous aspect.

## DEPARTURE OF PRINCE AND PRINCESS ARISUGAWA.

Shimbashi witnessed a great gathering of high personages and interested onlookers on the morning of the 1st when Their Imperial Highnesses Prince and Princess Arisugawa left Tokyo for Germany. The departure took place at 9.45 a.m. and Their Imperial Highnesses proceeded direct from the Yokohama station to the *Prins Heinrich*. Japanese newspapers, while wishing that the voyage may be safe and pleasant, express hope that the visit to Germany may help to cement the friendly relations between that empire and this.

At 10.30 a.m., Prince and Princess Arisugawa arrived at Yokohama and proceeded to the English Hatoba by a carriage from the Detached Palace. The Prince walked along the pier to the German mail steamer, the Princess riding in a jinrikisha provided by the German Consul at Yokohama, rain falling heavily at the time. When the Imperial party reached the steamer, the bands on board the ship and of a steam-launch from the Yokosuka Naval Station played the national anthem. *Banzais* were also given by the public who were present to see the party off. At noon the ship left the pier, three torpedo boats from Yokosuka escorting them until the steamer got out of the harbour. Among the notables who were present on the pier, were Princess Kanin, Prince and Princess Higashi-fushimi, Princesses Yamashina and Yamashina, Prince Tokugawa, President of the Upper House, Prince Tokugawa, ex-Shogun, Princess Arisugawa, daughter of the Imperial couple, the Foreign Ministers from Tokyo and their wives, many high officials of the Imperial Household Department, etc.

On the following day, April 2nd, the *Prins Heinrich* arrived at Kobe.

## RUSSIAN OFFICERS' CRITICISMS.

The 36th Regiment of the 9th Division having been reduced to some 300 men of all ranks, surrendered on the north-west of Mukden. Its Colonel, whose name is not given, spoke with some frankness in an interview with Lieut.-General Iida, Colonel Hoshino acting as interpreter. One of the most interesting statements made by the Russian officer was that Kuropatkin had always over-estimated the numerical strength of the Japanese army, and had consequently confined himself to defensive tactics. This Russian Colonel had fought against the Japanese for the first time at Shalingpau. He stated that, comprehending the numerical inferiority of the Japanese force there opposed to him, he had made dispositions for an immediate attack but had been restrained by the General commanding the division, who desired to get the artillery into full action as a preliminary step. Before the latter arrangement could be effected, however, the Japanese themselves attacked. The Colonel further alleged that Kuropatkin had become aware of the Japanese turning movement at Mukden two weeks previously to the conversation (on the 11th of March) but that is credible only on the supposition that Kuropatkin acquired this knowledge simultaneously with the commencement of the movement. Perhaps he did, but if so his failure to defeat it becomes very difficult to understand. Another interesting statement made by the Russian Colonel was that the artillery of the Japanese had contributed materially to their victory. The force of their gun-fire had been, he said, terrific and quite conclusive. This, we presume, refers to the heavy guns that the Japanese had brought up and mounted in their entrenchments prior to the commencement of the battle.

The Colonel of the 14th Regiment, who is now a prisoner, seems to have been very frank in his conversation. He is spoken of in the columns of the *Jiji* as "M.D.," his full name being concealed. This officer alleges that in order to make their great turning movement against the west of Mukden the Japanese divisions marched through neutral territory, for which offense they will be held accountable when the day comes for making peace. Concerning the disaster that befell the Russian arms, he says that nothing so humiliating had previously stood in Russian history, and that if any recovery is to be made, the command must be placed in other hands than those of Kuropatkin, whose nerves are quite shattered. He hints very broadly that the reports sent home by Kuropatkin have usually been inaccurate, and he has also much to say against other officers, especially Mischenko, to whom he concedes the one quality of bravery, denying to him the first essentials of a cavalry leader, dash and celerity. Mischenko's January raid was to have paved the way for Gripenberg's turning movement against Liaoyang, but the big force of cavalry wasted day after day dressing its ranks and otherwise frivolously occupying itself, so that in fine it accomplished nothing that a few sotnias of Cossacks might not have done. Had Orloff or Rennenkampf been in command a different result might have been expected, but Orloff was discredited on account of a mistake for which Stackelberg was really responsible. Russia owes her defeats to the fact that her people are not

united for the purposes of this war. Their heart is not in it at all. In fact unless a blow falls somewhere very near home, the habit of the Russian people is to remain largely indifferent. Yet peace is not probable at present, in the opinion of this officer. To purchase peace Russia would have to pay an indemnity of two hundred million pounds, and she would rather spend the money to prosecute the war than devote it to buying an ignominious peace.

Of course this Colonel labours under a misapprehension when he says that the Japanese turning movement against the west and north of Mukden was made through neutral territory. The official reports show that the three divisions engaged in the movement marched between the Hun and the Liao. So long as they did not cross the latter, they were in the belligerent area. Their cavalry outpost did indeed ride into Hsinmintun, but that operation was an obvious military necessity, and in Hsinmintun there were found conclusive evidences that the Russians had been using the place as a commissariat station. If breaches of neutrality are in question, the record is held by Mischenko and his cavalry raid down the west bank of the Liao. It is clearly established that he moved down the west bank. Indeed he could never have eluded Japanese observation otherwise.

## THE PROSPECTS OF PEACE AFTER THE BATTLE OF HEIKAUTAI.

The Paris correspondent of *The Times* sent to that journal on February 17th a note which has just now not so much interest as it had then:—

The persistent reports representing peace to be within sight are due, no doubt, in some measure to the strange quiet at the seat of war itself. Then Count Benckendorff's journey from London to St. Petersburg after seeing the King several times has not escaped notice, and to-day it is said that General Kuropatkin himself has gone to Kharbin. There is, however, as yet, little or no substantial ground for assuming that the war is nearing its end. The most powerful argument pointing to peace at present is the state of things reported in my telegram published in *The Times* of the 3rd inst. as to the difficulty there will shortly be in provisioning the Russian army in Manchuria, which I have reason to know is still the cause of profound concern to the Russian military authorities. In existing circumstances there can be no question of sending General Kuropatkin reinforcements. They cannot be fed. It has thus come about that the great superiority of Russia's resources in men over Japan owing to her more numerous population is of no advantage whatever in the present campaign. The means of communication with the Far East do not permit of feeding an army larger than, or even as large as, that with General Kuropatkin for any length of time. There is good reason to believe that this question is rapidly becoming acute.

A personage who has just returned from Tsarskoe Selo has given Mr. Dru, the St. Petersburg correspondent of the *Echo de Paris*, the following information:—

"If the Japanese were to make proposals we would agree to examine them, and perhaps we would conclude an armistice. But as the pretensions of Japan after a year of war would be greater than at the beginning of hostilities there is no chance of an understanding. Yes, we are discouraged. We can no longer hope for a decided success; but if we cannot beat the Japanese we will ruin them. If we cannot attack them we will retreat still further; but we will continue the war until the Japanese, having not a yen left will be forced to ask for peace. The war will last two years if necessary. Whatever may be said to the contrary, we are rich enough to indulge in that luxury."

M. Dru says he hears pretty much the same thing said on all sides. He himself has reason to believe that the plan of the Government is to maintain the army at about 500,000 men and to exhaust the Japanese.

If the above proves nothing else, it shows that the

Russians are resolved to bluff to the last. Independently of the danger of famine to which I have referred, there is another small consideration that can scarcely escape the powers that be in St. Petersburg. Where is the money to come from to carry on the Manchurian campaign for another two years? Certain recent experiences of the Russian Government in the Continental money markets give strong emphasis to the above question. That it will not be in Paris may, I think, be said with some confidence; at all events, no considerable portion of it.

The interest this possesses at the present moment is due to the fact that it foreshadows the policy to-day attributed to the Russian Government—the policy of delay. Already in the beginning of the year, that is to say, before the battle of Mukden and immediately after the battle of Heikautai, the Military Authorities in St. Petersburg had come to the conclusion that it was beyond Russia's capacity to put into the Manchurian field an army capable of driving back the Japanese. The most they could hope to do was to "contain" them; that is, to check their further advance. Therefore they had come to the reluctant conclusion that a war of exhaustion must be fought. The campaign must continue until Japan had not a yen left to conduct it. Now if the premises of this conclusion existed in February, how much more effectually do they exist now? For in February the Russian forces were drawing large quantities of their supplies from Manchuria, Mongolia and China proper. Indeed, judging from the spoils taken by the Japanese from their enemy, he was feeding his troops mainly with what he obtained locally, so that the railway was wholly available for the carriage of such stores as could not be thus obtained, together with ammunition, arms, reliefs and remounts. But to-day all sources of local supply are well nigh completely closed to the Russians, and each day's retreat intensifies this disadvantage. Moreover, they have lost the strength to "contain" the Japanese. They have received a crushing blow and are themselves being driven back on their last base, with no apparent chance of renewed resistance. Whither, then, will their policy of "retreating still further" lead them? Out of Manchuria altogether, and probably out of Vladivostok and Saghalien also. One is perplexed to comprehend what will thereafter remain to be gained by the policy of "further retreat," or what methods the Russians will adopt to retrieve their position. They will have to begin the war all over again and it will be a war in which they must assume the offensive. That finale was never included in their original game of retreat, and if it commends itself to them now, the inference is that they are desperate and hopeless.

On the other hand we hesitate to place credence in the prospect of peace confidently outlined by Reuter's telegram which we publish this morning. That there is a peace party in Russia can not be doubted, but it is not the party in power. The men who are at the head of affairs must be sensible at heart that for their country's sake the war should be brought to a close with all speed, yet for their own sakes it must be continued, and there is only too much reason to fear that selfish considerations will prevail. Ten years ago a solution might have been found by other Powers bringing pressure to bear on Japan, but the day for that kind of solution is past. There are no Powers willing to act such a part, and Japan would not listen to them if they made the essay. Hence the most prudent attitude for the public mind would appear to be one of scepticism as to the Russian Government proposing any acceptable terms of peace.

## WOUNDS.

An army surgeon quoted by the *Nippon* gives some interesting information about wounds produced by cannon and by rifle-bullets. He compares the records for Port Arthur and for Mukden in order to show the difference between siege operations and field operations. Thus at "Cap Mountain"—one of the Port Arthur positions—281 men were wounded by rifle-bullets and 57 by cannon. At Feughwangshan, there were 284 rifle wounds against 44 cannon. And at Antsushan fort 2,460 were wounded by rifles and 1,000 by gun-fire. These figures show, in sum, 3,025 rifle-wounds for 1,101 cannon-wounds, a ratio of 2.75 to 1, approximately. At and around Mukden, the following figures are given.

Place.	Rifle-wounds.	Cannon-wounds
Sufangtai .....	120	222
Masankia .....	605	262
Chukiatun .....	1,025	173
Kwochitun (10 miles N.-W. of Mukden).....	408	68
Totals.....	3,158	725

This shows that for every one cannon-wound there were 2.97 rifle-wounds, a result not differing markedly from that obtained at Port Arthur. The *Nippon's* informant accounts for this similarity by saying that at Port Arthur both sides were continually firing at each other from loop-holes at very close range—not more than 50 or 60 metres—whereas in field-fighting the Russians used cannon as much as possible, avoiding recourse to the rifle. That is easily understood when we remember that the Japanese field-guns were outranged by the Russian, but when it came to interchange of rifle-shots the Japanese not only had as good a weapon but also showed themselves able to handle it with much better effect. Hence the Russians had recourse mainly to their artillery. Still further is that explanation borne out by the record of the Russian wounded. For among those inspected by the Japanese at Port Arthur, there were 4,062 rifle-wounds against 1,109 gun-shot-wounds, a ratio of 3.66 of the former to 1 of the latter; and in the fighting at Mukden 2,900 men were hit by rifle-bullets and only 82 by gun-shot—a ratio of 35 to 1. These last figures are not sufficiently numerous to be conclusive, but the general tendency is to show that the Japanese were more deadly with their rifles than with their artillery.

Another point noted by this surgeon is that at Port Arthur, where men found cover and fought, for the most part, in an erect position, wounds produced by rifle-bullets seldom had a long track; they passed direct through the part struck. But in fighting on the plains where the only protection was to lie down, soldiers were often struck in the shoulder by bullets which thereafter ploughed their way right down the body, causing wounds of a very troublesome nature.

## THE JAPANESE LOANS.

It is stated that the sum offered by subscribers to the Japanese loan in London exceeded a hundred millions sterling—an extraordinary figure when we observe that the lists were opened in the morning and closed at 2.30 p.m. the same day. The bonds now stand at a premium of £1.15s.

Up to 10 p.m. on the 1st instant the reports received by the Bank of Japan show that the subscriptions to the fourth domestic loan totalled 478,502,025 yen, of which 76,055,625 were above the issue price. It

will be remembered that the period for subscribing commenced on the 26th of March and ended on the 31st. There can be no doubt that when all the returns reach the Bank of Japan 500 million yen will be found to have been offered.

It may be interesting now to recall the corresponding figures in the case of previous loans:—

	Total subscription.	Above issue price.
	Yen.	Yen.
First Loan (100 millions) ...	452,130,475	33,439,675
Second Loan (100 millions) ...	322,190,650	6,267,675
Third Loan (80 millions) ...	245,829,200	1,872,625
Fourth Loan (100 millions) ...	500,000,000	77,000,000

Inasmuch as the subscriptions above issue price will all be successful, it is plain that the sums allotted to subscribers at lower rates must be very small fractions.

The subscriptions from foreign sources were found to total 79 millions, of which 40 millions were over issue price. British subjects and American citizens head the list and after them come Chinese. Yokohama alone—the foreign community—offered 14 millions through the Specie Bank and foreign countries submitted applications for 18 millions through the same source. London applied for 10 millions of the latter amount and New York for 7 millions. Some foreigners offered 100 yen for each bond. It is certainly a very signal success. It is understood that the next loan of 100 millions will be floated in May.

The final figure for the subscriptions to the 4th domestic loan is 483,140,250 yen, of which 76,483,975 yen is above the issue price. The subscriptions by foreigners aggregate 90 million yen, of which 45 millions are above issue price. It follows that one half of this loan will fall into foreign hands.

The exact figures relating to the Fourth Domestic Loan are these:—

	Yen.
Total subscriptions .....	483,140,250
Total above issue-price .....	77,017,325
Total at issue price .....	408,532,825
Subscriptions from foreigners .....	91,000,000
Foreign Subscriptions above issue-price .....	50,000,000

It is remarked by Japanese journals that the unprecedented element of foreign subscriptions to this loan quite changes the character of the transaction. Foreigners will come into possession of more than one half of the entire loan, whereas hitherto they have stood aloof altogether from such investments. We are not surprised that this feature attracts much attention. Thus far foreign capitalists have demanded one of two things or both; namely, special endorsement or security. But in the case of this domestic loan they are content to stand on exactly the same footing with Japanese subjects. That is a very eloquent and practical tribute to the growth of Japan's credit. The endorsed and secured bonds command, it is true, higher prices than the bonds not so distinguished, but that is a detail. The broad fact that foreigners have subscribed more than one-half of a Japanese domestic loan is very significant.

The last domestic loan seems to have caused much disappointment to the subscribers. Owing to the fact that so many offers were sent in at figures above the issue price, those that had subscribed at the latter rate received only 5 per cent. of the sums for which they applied, and it is rumoured in Tokyo that many banks are pressing the Treasury to issue the next loan without delay. The original intention had been to wait until May, but possibly the Government will yield to this unexpected pressure.

## THE HOSPITALITY ENJOYED BY THE BALTIC FLEET.

We have been charged with trying to stir up mischief because we commented on the remarkable degree of hospitality extended to the ships of the Baltic Squadron in France's territorial waters. But this hospitality is a thing which no publicist can possibly ignore however friendly may be his feeling towards France, for it is an incident that affects the whole structure of international law and can not be for one moment reconciled with any definition hitherto formulated of strict neutrality, or indeed of any form of neutrality. Some kind of subterfuge has been sought in a pretence that the Russian ships, though lying off Madagascar, were anchored outside the limits of France's territorial waters. Europe has never paid the least attention to that pretext, nor has it ever been seriously advanced in the face of telegraphic items like the following:—

Port Louis, February 20.

The Baltic Fleet and its accompanying colliers, 70 ships in all, were at Nossi Bé on the 16th inst.

Later.

In addition to the 70 vessels and colliers of the Baltic Fleet at Nossi Bé, a Russian torpedo-boat destroyer and six German colliers arrived at Diego Suarez on the 14th instant. The fleet is buying a great stock of stores, including large quantities of chocolate, preserves, jams, wines, and champagne, at Majunga and other places. Never before has any fleet laid in such stores of champagne and liqueurs. Ten thousand bags of flour and 50,000 cases of potatoes have been asked for at prices which will mean a fortune for the sellers. It is feared that these transactions may lead to trouble as regards neutrality.

Can any rational person suppose that the "Nossi Be" and "Diego Suarez" of this telegram are outside French territorial waters, and if he can persuade himself in that sense, how will he account for the purchase of great quantities of stores in the towns of Madagascar? Well might the Military Expert of *The Times* write:—"Thanks to the imperfect neutrality and boundless hospitality of France a large Russian Squadron interposes between Japan and Europe." Without that extraordinary hospitality the Baltic Fleet could never have made its way to the Far East. France's position is difficult, and her sense of chivalry, always very strong, renders it very hard for her to practise justice at the expense of a distressed ally. But believing that France has some regard for Japanese friendship, the strain to which she is now deliberately subjected it seems incomprehensible.

## THE NEW CRUISERS.

Japanese journals state that the two big cruisers now under construction at Kure are making rapid progress. One will be finished and ready for commission by the close of the year; the other by next March. Statements differ as to the size of these vessels. The *Jiji Shimpō* speaks of 13,500 tons displacement; another paper gives a vaguer figure, namely, something over twelve thousand. It is added that the armament of the cruisers will be exceptionally heavy. It will include 15-inch cannon, and each ship will carry a total of 50 guns of various calibres. As soon as these cruisers are off the stocks, others will be laid down.

As to destroyers, the *Fubuki* is now receiving her armament and will be ready for sea next month. Further, a telegram from Kure dated the 4th instant said that the *Arare* was to be launched on the 5th. Three other destroyers now on the stocks will be launched in July or August.

## THE STOESSEL MYSTERY.

It becomes more and more perplexing to decipher General Stoessel's meaning. Hitherto we have been disposed to imagine that the statements attributed to him with regard to the forces in Port Arthur were disfigured by errors of reporters. But here is what he himself said in reply to a speech of welcome delivered by the Mayor of Moscow:—

"It was not our fault that Port Arthur had to fall. We resisted as long as possible. As early as October the Japanese held us fast, having taken all the important forts over an area of four kilometres. They were in a position to force an entry into the fortress at any moment, and with a heart full of grief I was obliged to surrender Port Arthur, since in any case the enemy would have taken it at the first assault. I believed it my duty to avoid a massacre. The Japanese did not win Port Arthur without paying for it. General Nogi admitted to me that he had sustained very great losses. We ourselves had 317 officers killed out of 680, and all were wounded, some as many as eight times. Out of 17,000 men only 4,000, including the wounded, were left. The fleet was useless. It perished beneath the rain of 11 in. shells after the capture of High Hill. We always hoped for relief. The last despatch from the Commander-in-Chief, received on October 30, promised that help was coming, and our Chinese scouts announced the approach of the Russians. But the Japanese disillusioned us by telling us that Admiral Rodjstvensky's fleet was still off Madagascar and that General Kuropatkin's troops were near Mukden, where they still are. We could hold out no longer for want of food and ammunition."

Now what is meant by this explicit statement "out of 17,000 men only 4,000, including the wounded, were left"? It can not mean anything except that the garrison consisted originally of 17,000 men, and that 13,000 of them had been killed in action or had died of wounds and disease, leaving only 4,000 of whom some were wounded. But there are now actually in Japan 34,461 Port-Arthur prisoners of all ranks, to whom must be added 1,286 released on parole and 5,085 combatants still in hospital at the fortress, making a total of 40,832 combatants. General Stoessel's "17,000" is therefore quite ridiculous. He is almost equally incorrect when he speaks of the officers. "We had 317 officers killed out of 680." That can only mean that the original total of officers was 680. But there are in Japan to-day 500 Port Arthur officers, and 664 were released on parole, making a total of 1,164 actually in the fortress at the moment of surrender, apart from those who may be still in hospital there. What becomes then of General Stoessel's 680? It will be admitted that all this is most mysterious and that it does not conduce to public confidence in the accuracy of the General's assertions.

## BASEBALL.

Quite an interesting event is about to take place in the sporting world. A team of Japanese baseball players left Tokyo on Tuesday to embark on the *Korea* for America where they will engage some of the teams of the United States Colleges, as the Stanford University, the California University and so forth. These lads belong to the Waseda University. They are under the superintendence of Mr. Abe Isoo, a Japanese educated in England where he developed a high respect for the physical training of the British youth. The Waseda University did not stand at the head of the baseball playing institutions of Japan when Mr. Abe took charge of this branch of instruction two years ago. But it has gradually worked its way to the front, and in seven matches recently played—2 in Yokohama—victory was scored

in every case. The Waseda lads are reminded by Tokyo journals that it does not matter materially whether they win or lose. The main point is the good fellowship that will be established by their trip and the impetus that will be given to athletic sports. Americans and Englishmen think no shame of being beaten by one another. They only work the harder.

That is a fine spirit. We wish these gallant lads every success, and we only desire that cricket should one day be practised in Japan with sufficient assiduity to warrant the sending of teams to England and Australia.

## VLADIVOSTOCK.

Vladivostock will be free from ice about the 4th or 5th of this month. We should then have some practical proof as to the condition of the *Rossia* and the *Gromoboi*, and as to the fate of the *Bogatyr*. The two first might make their fighting qualities inconveniently felt if their commanders were inspired with a spirit of daring. Will they wait tamely on the chance of the Baltic Squadron reaching Vladivostock, or will they, in the meanwhile, resume their old metier of commerce-destroyers?

From Moji there comes to the *Asahi Shimbun* a telegram said to emanate originally from a trustworthy source, to the effect that the *Gromoboi* is the only one of the Russian vessels whose repairs have been completed so as to enable her to put to sea. She frequently passes out of harbour but does not venture south of Songchon, which is 108 miles northward of Yuensan. This news makes no direct reference to either the *Rossia* or the *Bogatyr*.

The Russians are said to be very busy fortifying Vladivostock, an item of intelligence which might have been set down without troubling the telegraph wires. It is further stated that such ships as succeed in breaking through the Japanese blockade are not allowed to approach close to the shore. They are obliged to discharge their cargoes into junks. The ice has begun to melt, but some days must still elapse before the harbour is free.

The *Niroku Shimpō* has a telegram from Bombay which suggests that very large quantities of Ceylon and Indian tea have been seized by the Japanese in steamers attempting to run the blockade of Vladivostock. This is partially borne out by a letter to the *Nichi Nichi Shimbun* from Saseho. The writer says that the goods taken from blockade-runners brought into that port are piled up in mountains. They are occasionally offered for sale, but the Japanese merchants combine to tender at ridiculously low prices. Thus tea valued at some 400,000 *yen* did not elicit a higher bid than six or seven thousand.

## CHINA.

The Governor-General of Manchuria is said to have represented to Peking that as the officials now at Mukden are suspected by the Japanese to have acted in collusion with the Russians, it is difficult for them to administer affairs satisfactorily and harmoniously during Japanese military occupation. His Excellency therefore recommends that these officials be transferred elsewhere and replaced by a new set of men. Viceroy Yuan is reported to have recognised the justice of this representation, and to have made arrangements for giving effect to it.

The Peking correspondent of the *Asahi Shimbun*, having visited the principal Chinese statesmen preparatory to his departure for Japan, collates their views with regard to the future. Apparently the consensus of opinion among these statesmen is that Japan should deal with Manchuria at her own discretion, and should avoid anything like enlisting foreign interference. She is in possession of the territory, and to invite the intervention of Western Governments whether for the purpose of opening the three provinces to the world's trade or for any other purpose would be merely to invite troublesome complications. As to the military occupation of the provinces after peace is restored, the Chinese Government has already prepared a project of which the main feature is that a garrison of fifty thousand men will be stationed there. The organization of this force and the preparations connected with their despatch will not be completed for some months, and in that interval China would have no objection to Japan remaining in military occupation. With regard to civil administration, it is thought that the special system hitherto adopted in Manchuria may be abandoned, and that the three provinces may be placed in all respects on the same footing as the rest of the empire. The question of the leasing of Port Arthur, Dalny and Harbin presents some difficulties. It would appear a natural and reasonable course that the leases should be transferred to the victor, Japan, but many people in China would be indisposed to approve that course, and therefore the problem requires careful consideration. Finally the correspondent alleges that the quondam Russo-phils in Peking have entirely changed their tone and are now altogether convinced of Japan's superior strength. They say that whatever reasonable demands she makes will encounter no opposition in China, but they warn her that there are already signs of the interference of foreign Powers under various guises, and they advise every precaution against that contingency.

The *North China Daily News* prints the following account of a sad accident. As the family of the late Taotai Hu Yen, ex-Grain Intendant of the Kiang-An Circuit, were leaving Nanking the other day by houseboat with his remains, bound for their home near Yangchou, the boat was suddenly caught in a whirlpool near the Huimin Bridge, caused by a strong freshet, which dashed the houseboat broadside against one of the buttresses of the bridge and capsized the whole party into the stream. In spite of the strenuous efforts of the native life-saving boats, so strong was the freshet that only a child (the third son of the late Taotai) and a young lady (his daughter-in-law) were saved; all the rest, including his wife, other sons and daughter, retainers, the coffin itself, and the crew were totally engulfed in the boiling waters, leaving no trace behind them. It is further stated that money and valuables valued at over Tls. 100,000 were lost in the sad catastrophe.

The annual rainfall in Hongkong is continually decreasing. The average fall in the last decade was 20½ inches less than in the immediately preceding decade.

The report of the China Flour Mill Co., Ltd., for 1904 shows a divisible balance of Tls. 43,393. Off this the sum of Tls. 4,000 is written off machinery, the agents receive Tls. 3,745, being ten per cent. of the net profits, a sum of Tls. 29,930 is appropriated to a dividend of 10 per cent. Tls. 5,000 are placed to reserve, raising that fund to Tls. 30,000, and the balance, Tls. 718, is carried forward.

Ex-Prince Tuan, the notorious Boxer, who appears to be now residing somewhere in Shensi province, recently wrote to a kinsman, a prince

of the 3rd Order, complaining that although he is not suffering from any particular hardship, physically, he often finds himself in need of money, in consequence of which he asks his worthy kinsman to lend him Tls. 50,000 to help him pay expenses in his exile. This kinsman at once showed the letter to Prince Ching, saying that a confidential retainer was waiting for a reply. The result was that a sum of Tls. 5,000 was promptly subscribed by the various princely kinsmen of the cashiered Prince and sent to him "without comment."

The *Eastern Times*, of Shanghai, says that the authorities are looking forward to the day when extra-territoriality in China will be abolished. The Board of Punishments, which was ordered by the Throne to modernise the Chinese code, is said to have decided to suggest to the Throne, in the near future, the abolition of bambooing, torture and kneeling in court.

The Taotai of Shanghai has wired to the Viceroy of Nanking and the Wai-wu-pu reporting that the negotiations with the Russian Consul-General, in connection with the amendment of the five conditions of parole of the Russian soldiers at Shanghai, have been progressing satisfactorily. It has been decided that a special piece of ground at Pootung shall be leased to the Russians as a recreation ground, to prevent them from coming to the settlement too often. The site of the proposed recreation ground has not yet been selected.

It is reported that the net profits of the Shan-haikwan railway during the last year exceeded Tls. 9,000,000. Prince Ching has highly commended Viceroy Yuan Shih-kai who has been urged in certain quarters to appropriate the money for the building of the Peking-Chang Chia-kow line.

At the next ordinary general meeting of shareholders of the Yangtze Insurance Association Ltd., to be held on the 11th April, the Directors will recommend the payment of a dividend to shareholders of 20 per cent. \$12 per share out of the balance at credit of 1903 account, also a special dividend of 5 per cent equal to \$3 per share out of interest account for 1904 and the transfer of \$50,000 to credit of Reserve Fund bringing the fund up to \$750,000.

Viceroy Chou Fu of Liangkang, H.E. Lu Hui-hsuan, Treaty-Commissioner, Sheng Kung-pao, Minister of Railways in the South, and H.E. Wu, Minister of Chinese Telegraphs, have raised among themselves a sum of no less than Tls. 200,000, which is to be used for the benefit of the poor and needy in Manchuria. According to latest reports, at present there are many in Manchuria suffering from the ruinous effects of the war.

Before the Boxer disturbances of 1900—says the *North China Daily News*, translating from a native paper—the exceedingly miscellaneous styles of rifles in the hands of the Chinese troops baffle description, this country, owing to the avarice and dishonesty of the mandarins concerned, being made the dumping ground of every kind of obsolete firearm that had been discarded by the various Powers. Of recent years, however, bitter experience has taught the responsible officials of this Empire to seek the best arms available, but although matters appear better than before there is still a lack of uniformity, each high provincial general showing partiality for the arms produced by certain countries, regardless of what his brother satrap may be purchasing at the same time. An examination into the matter by the officials of the Army Reorganisation Department at Peking now shows that while the Mauser rifle seems to be the general favourite throughout the country in the proportion of seven-tenths of that make to three-tenths of other makes, the bores still lack uniformity. We now understand that orders have been issued by the Army Reorganisation Department to the Viceroys and Governors of provinces henceforth to arm the troops under them entirely with 6.5 millimetre bore Mausers and to reject all rifles of different bores. In this manner it is expected to arm the troops of the Empire with rifles of a uniform bore within a year, for which the

cartridge factories throughout the country are already commencing manufacturing the necessary ammunition. This important principle of homogeneity is also to be extended to the artillery arm, that is to say, field, mountain, and garrison artillery will each maintain a certain calibre, guns and howitzers of different bores being exceptions to the general rule. The troops of Kiangsu Province are now being reorganised in accordance with the instructions of the Peking Army Reorganisation Department, and the battalions are also being renamed, while the officers commanding them have received orders from Viceroy Chou Fu to be diligent and energetic in attending to the drilling and shooting practice of their men, as at the end of each year Special Imperial Commissioners will be sent down from Peking carefully to inspect not only the troops of Kiangsu but also the forces of other provinces of the Empire. Promotions and rewards can be expected only after thoroughness has been shown to the Imperial Commissioners each year, whilst the officers of those battalions who have proved themselves incapable and lacking in intelligence in taking care of their men will be cashiered or degraded in rank.

The Waiwupu has received the following dispatch from the Viceroy of Szechuan:—Have received petitions from some of my district magistrates who complain that certain Roman Catholic converts have lately been guilty of refusing to kneel before their Courts like other native litigants, displaying their rosaries and crosses in defiance of orders from the presiding magistrate to kneel. To check this I have issued instructions that, in future, Magistrates shall display in the centre of their courts a copy of the Imperial decree commanding that converts and non-converts shall be treated alike, before which all subjects of the Throne of whatever rank and class must reverentially kneel.

The report of the Hongkong Hotel Co., Ltd., for the latter half of 1904 shows a divisible balance of \$88,877. It is proposed to pay a dividend of 10 per cent for the half-year, absorbing \$60,000; to write \$15,322 off furniture, steam launch, etc.; to put \$10,000 to repairs and renewals account; and carry forward the balance, \$3,555.

Mr. Wm. Porter Boyd has been appointed Consul Clerk and Deputy Consul-General for the United States of America at Shanghai by instructions from Washington. Mr. Boyd, with the exception of a short period which was spent as Secretary of the Canton-Hankow Railway, has been continuously in the American Government service for some fifteen years. He was thirteen years in the Consular Service, having been stationed in London, Paris, Toronto, Honolulu, etc., and was also for a short time in the Department of State. The last government position he held was Shipping Commissioner at Honolulu.

The report of the Shanghai and Hongkew Wharf Co., Ltd., for 1904, shows a divisible balance of Tls. 190,256. It is proposed to pay a final dividend of Tls. 6 on the old shares, making 10 per cent for the year, and Tls. 3 on the new shares, to place Tls. 24,000 to repairs account, and carry forward the balance, Tls. 10,712.

The Waiwupu, says the *North China Daily News*, has sent a dispatch to the Japanese Minister in Peking, in which it is stated that Tseng Ch'i, Tartar-General of Mukden, has reported the unwarrantable killing of Imperial Chinese couriers, bearing important Government dispatches, by Japanese soldiers posted at certain barrier stations. To go into details, it is charged that on a certain date last month, a member of the Imperial Courier Post, named Chih Ch'uan, bearing important dispatches from the Board of War, on his way to Mukden was stopped and subsequently killed near the Barrier station of Laopien, by Japanese soldiers who also destroyed two dispatches. On the second occasion two members of the military patrol of Hsinmintun, bearing dispatches from that city to Mukden, were on the road also killed by Japanese soldiers belonging to a Barrier station en route. The contention of the Waiwupu is that, whereas it is a universal law among nations,

and also in Chinese law, not to kill bearers of dispatches proceeding between two armies of nations at war with each other, all the more is to be deprecated and a matter for surprise that bearers of dispatches belonging to a neutral nation on errands having nothing to do with the belligerents should be thus unwarrantably killed. The Waiwupu therefore asks that the culprits who were guilty, be severely punished for thus breaking a well-known law, and also that as a matter of pure justice the families of the dead dispatch-bearers be indemnified for the sad losses inflicted upon their bread-winners.

The report of the Luzon Sugar Refining Co., Ltd., for 1904 shows that no work was done at the refinery last year, and the inevitable expenses raised the debit balance in profit and loss to \$85,988. It is stated that, as prospects lately have somewhat improved, arrangements have been made to resume work at an early date.

The report of the China Sugar Refining Co., Ltd., for 1904 shows a gain on working for the year of \$1,337,292 on a paid-up capital of \$2,000,000. After paying off the debit balance brought forward from last year and the interim dividend of 5 per cent., commission, etc., there remains a divisible balance of \$1,003,813. It is proposed to pay a final dividend of \$15 per share, making 20 per cent. for the year, to write \$50,000 off Swatow property, pass \$450,000 to equalisation of dividend fund, appropriate \$150,000 to repairs and renewals, and \$11,000 to bonus to staff, and carry forward the balance, \$42,813.

The report of the China and Manila S. S. Co., Ltd., for 1904 shows a divisible balance of \$38,108, the paid-up capital having been reduced to \$606,875. It is proposed to pay a dividend of \$1 per share or 4 per cent, to place \$5,000 to reserve, and carry forward the balance, \$8,833. The Company has now two steamers, the *Rubi* and *Zafiro*, which have proved themselves well adapted to the trade.

In its Notes on Native Affairs, the *North-China Daily News* remarks:—By one master-stroke of diplomacy—prohibiting Japanese troops from encamping inside the sacred walls of Mukden—Marshal Oyama has gained the firm friendship and gratitude of all Manchus and Chinese loyal subjects of the Throne, and removed the doubts of even the most suspicious Manchus, who ever since the war began have held apprehensions that Japan aimed not only at driving out the Russians beyond the Amur river but also to take possession of the cradle of the Manchu race. The Chinese papers published in the North now report that when Marshal Oyama first entered Mukden he intended to take up his quarters in the yamen of the Tartar General, but subsequently made his headquarters in a large private residence, the house of a Taotai named Tso, while the Japanese Provost Marshal occupied the premises in which previously lived the Russian Governor of Mukden, called by the Chinese "Gor Mi-sah." The numerous staff of the Marshal and principal officers of departments took up quarters in the numerous native inns in the vicinity of the Tartar General's yamen and the ancient palace of the previous sovereigns of Manchuria. It pleased the Chinese to see that, true to his promise, Marshal Oyama has seen to it that no Japanese officer or soldier has entered to view these palaces or the extensive grounds surrounding them without due authorisation from the proper quarters. Indeed, with the exception of the officers noted above, no other Japanese has entered the city unless on special business, while the army, cavalry, artillery, and infantry, are all encamped outside the walls. All this has been especially gratifying to the Imperial Court at Peking and the whole Manchu race throughout the Empire.

In an editorial article appearing in its issue of April 1st, the *N.-C. Daily News* said:—

After nearly forty-one years of most faithful service to his country in the Far East, Sir Hiram Shaw Wilkinson, Chief Justice of the Supreme Court of China and Korea laid down his office, and

bade fare well to the Bar in the Court yesterday afternoon. From student interpreter he rose through all the ranks to Acting Consul in Japan, passing through and being actor in the stirring times that preceded the Restoration. He came to Shanghai as Acting Assistant Judge in 1899, and was Crown Advocate here, and Acting and Substantive Judge in Japan, closing a brilliant career during which he has made crowds of friends, as the last of our Chief Justices. He retires full of years and honour indeed, but in full bodily and mental vigour, and when the time comes for his departure for home he will be followed by such tributes of respect and affection as none of his predecessors has ever earned in larger measure, and as his successors will be fortunate if they gather as fully. In him we lose a good and faithful friend, and a most able, earnest, and conscientious Judge, as well as a strong link with the days of Sir Rutherford Alcock. Sir Harry Parkes and the great British Proconsuls of the past. The melancholy that must cling round such a ceremony as that of yesterday was brightened by the exceeding gracefulness of the speeches that were made to and by Sir Hiram, speeches that were evidently heartfelt, in which there was not the slightest jarring note, and the tone of which will be echoed by all in the East who know Sir Hiram. Warmhearted, kind, courteous, and obliging to all, he has made himself a home in all our hearts; he has identified himself with the best interests of Yokohama and Shanghai, and we shall long miss him; and the consciousness of this will, we hope, do something to mitigate the sorrow he must feel at leaving the bench he has so adorned.

About 5 p.m. on March 30th, says the *N. C. Daily News*, Messrs. Farnham, Boyd & Co.'s launch *Douglas*, which runs between the various docks with passengers, was sunk by collision with a large sailing vessel. At the time of the accident the trip was being made from the Old Dock to the Comptolitan Dock. The launch usually in charge had given over temporary command to another, who appears to have been wanting in experience. The collision took place near the International Dock and the launch sank in about half a minute. There were on board at the time the three children of Mr. Todd, and the three children of Mrs. Rasmussen, and they would almost certainly have been drowned but for the presence of mind of the eldest, Peter Todd, aged thirteen. Seeing that the launch was doomed, young Peter hailed a sampan which was fortunately close by, and just had time to get his young companions and himself on board. A Chinese cruiser near also lowered a boat, but too late to save four Chinese on the launch who were drowned.

#### NOTES ON CURRENT EVENTS.

The Emperor attended the graduation ceremony at the Military Officers' College on the 30th ultimo. There were 363 graduates, of whom 8 received silver watches from the Emperor for special proficiency. The distribution of the graduates was, infantry 263, cavalry 18, field artillery 19, garrison artillery 15, engineers 29, and land transport 19. There are still 973 students in the college. Among those who have just graduated are sons of Marquis Mayeda, Marquis Ikeda, Viscount Nabeshima, Generals Oku, Oshima and Togo, and Viscount Enomoto.

The planet Mercury is now very well placed for observation, and should be seen any fine evening until about April 10th in the western sky soon after sunset. Of course every one has noticed lately the brilliant evening star, Venus, which through a telescope now appears as a most beautiful crescent. Below Venus, a little to the left, is Jupiter, and lower down directly below Venus, is Mercury, which will soon be on a level with Jupiter. Mercury will be furthest from the sun (19°) on April 4th, and two evenings later there will be a very pretty group of the young moon, Jupiter and Mercury, all close together, a little below Venus. The following sentences are from Whitaker's Almanack, p. 685:—"This in-

teresting trio of planets will form a most interesting and rare spectacle in the evening sky during the first week in April, and will repay careful observation." Mercury sometimes appears as bright as, and occasionally brighter than, a star of the first magnitude, and shines with a ruddy, scintillating lustre, often, however, materially dimmed by the vapours usually floating about on the crest of the horizon." In our text-books on astronomy the planets generally are stated to shine with a steady light, in contradistinction to the fluctuating light of the fixed stars; but Mercury furnishes a notable exception to the rule, for he emits a fitful, flashing lustre. The ancient Greeks recognised this feature and called him "the strongly sparkling one."

A memorial has just been presented at Lambeth Palace couched in these terms:—

"We the undersigned, of the clergy and laity, seriously deprecate any alteration in the Athanasian Creed, or in its use as now enjoined in the Book of Common Prayer."

The covering letter, signed by the Dean of York and Canon Newbolt, as chairmen of a committee for the defence of the creed in the northern and southern provinces respectively, states that the memorial is the same as that which was submitted to the Archbishop of Canterbury in July last by a deputation from both provinces at Lambeth and that the signatures now number 44,899, 3,959 being those of clergy, and the remainder, 40,940, those of lay communicants. Three thousand and four clergy have signed in the province of Canterbury and 27,627 laity; in the province of York 955 clergy have signed and 13,313 laity. A few of the signatories express their desire for a retransmission of the creed, and a few others wish for an authorized explanatory statement.

The *Shogyo Shimpō* says that the Nagasaki representative of the Russo-Chinese Bank has received a message from the head office of the Bank in Shanghai to the effect that the Bank's business is likely to be resumed very soon. It need hardly be explained that the Nagasaki branch of the Bank is not now open. Its property is in the safe-keeping of the French Consul at that port. This message is construed as indicating that according to the Bank's information the restoration of peace is imminent. But the story is of such easy manufacture as to suggest incredulity.

We have very excellent grounds for saying that the "interview" with Mr. F. McCullagh published recently by certain Tokyo journals—which received it doubtless from a news agency—was very erroneous. Mr. McCullagh may have spoken freely on subjects concerning which professional etiquette did not enjoin silence, but he certainly did not make any of the revelations attributed to him, and thus the main part of the so-called interview must be regarded as one of those canards which appear to be considered justifiable in this particular field of journalism. We are further informed that the story of Mr. McCullagh having ridden up alone and voluntarily placed himself in the hands of the Japanese is equally incorrect. He was captured near Tielhing with a body of some 5,000 Russians.

The Yokohama Butchers' Guild is contemplating another rise in the price of butchers' meat. The last time they put up prices the public responded by cutting down the use of meat to a minimum and this has hit the butchers so badly that they declare

they are worse off than before. But surely the time has come when Yokohama foreigners should be up and stirring, following the example of Kobe, and co-operating to secure a supply of fresh meat at reasonable prices.

The reported suicide of 67 or 70 Japanese prisoners in Novgorod does not command much credence. No news of such an event has reached official circles, and it is recalled that among the Japanese prisoners there is Major Togo, who fell into Russian hands very early in the war when engaged upon a reconnoitering expedition in northern Korea. Togo is not a man at all likely to have sanctioned, still less advised, a wholesale act of suicide. A letter was received from him a few days ago. Written in *kana* so as to be legible to the Russian censors, it lamented his own military bad fortune, but said that he was enjoying good health and receiving with delight the news of Japanese victories. Probably the story of the suicide is a gross exaggeration.

#### ACCIDENT TO MR. F. J. BARDENS.

We regret to learn, says the *Kobe Herald*, that Mr. F. J. Bardens met with a somewhat serious accident on Friday morning under circumstances that are not at present very clearly known. It appears that, at about half-past six o'clock calls for assistance were heard from the compound of Messrs. Samuel Samuel's offices in Harima-machi, and that, on an investigation being made by the *mon-ban*, it was found that Mr. Bardens had fallen into a well in the compound. Fortunately, he had been able to support himself by clinging to the rope, and steps were at once taken to remove him from his perilous position. He was then conveyed to his residence, where medical assistance was summoned. As the doctor has ordered that Mr. Bardens is to be kept in perfect repose for the present, it is not yet known how the mishap occurred.

We are glad, says the *Kobe Herald* of April 1st, to be able to state that Mr. Bardens continues to show satisfactory progress. We learnt on enquiry this afternoon that he is making as good a recovery as can be expected from the effects of his trying experience, although it is still necessary that he should be kept in complete quietude. As a result of his fall Mr. Bardens sustained some bruises on the back of the head and the chin, the latter being principally affected, but he is suffering mainly from the severe shock to the system necessarily occasioned by the occurrence. The great number of telegrams and other enquiries which have been received from Yokohama and other parts of the country testify to the widespread regret and concern which have been caused by the unfortunate accident.

#### THE LATE MR. PAUL SARDA.

The funeral of Mr. Paul Sarde, who died at his residence No. 84, Settlement, on Sunday, aged 55 years, took place on Monday from the Roman Catholic Church. The service was conducted by Father Pettier, and a number of Japanese acted as pallbearers. The chief mourners were Mr. Becker, Mr. Bagnol, and the French Consul, Mr. Steenackers. There were many beautiful wreaths.

Mr. Sarde was an old resident of this country. Born at Mathes, in the Department of the Loire, from 1870-1873 he attended the Ecole Centrale of Engineering at Paris. In 1873 Mr. Sarde came to Japan, and was first in the service of the Japanese Government as a teacher of French at Yokosuka. Afterwards he was employed in the Mitsui firm and later he entered on the business of architect. He took a large part in the building of structures in Yokohama, having erected among other buildings, the French Consulate, the Grand Hotel, and Wright's Hotel, the Hotel de Genève, the Public Hall and other public edifices.

## MR. GEORGE KENNAN'S LECTURE.

Mr. George Kennan's lecture on his "Adventures in Eastern Siberia," given in the Public Hall on Thursday night, attracted a large attendance and afforded a most enjoyable evening's entertainment to all present. The lecturer was introduced by Mr. N. W. McIvor, former U.S. Consul General at this port, who said:

My Friends,—Humanity has a compelling—almost a morbid—interest in a cemetery; we feel an instinctive desire to know something of its inner life (if I may use the phrase). This instinct is based, I suppose, on the natural desire of the healthy mind to throw off the restraint of finite limitations, and to know the unknowable. A cemetery represents to us the Great Beyond, from which no human traveller has ever returned to give us information.

The World probably holds no greater cemetery than that known as Siberia. True, it is a political cemetery, not instituted for the actual burial of the body, but, still, it is probably true that there is no spot on the Earth which shuts in more buried lives, hopes, ambitions and aspirations than does Siberia. It has been utilized as the final resting place, not of those who had set at defiance the criminal laws of a country, but of those, morally good and morally bad, alike, whose offense was that they had incurred the displeasure of an autocratic political organization. So few have ever returned to tell the tale of its woes that we have mentally noted it as an unknown land.

Other countries than Russia present curious anomalies. My own country, once every four years, indulges in a political upheaval as a result of which the "official deities" are cast into outer political darkness, simply because they are not in touch with "The Powers that Be," but we have never attempted to collect and confine them in any one place of political oblivion; we turn them loose among the people from whence they came, or, if they are notably bad, (as in the case proved of the man who stands before you) we shut them outside of our Great National Tariff Wall, graciously leaving them free to wander up and down the World and to prey upon the Nations.

Russia has gone further than this, and has provided Siberia as a district for the strict confinement of those who have incurred political displeasure. On account of the mystery which is gathered about it, Siberia has become, to most of us, one of the greatest agencies to spur the desire to seek the unknown.

There is an especial interest in news from Siberia just now, when the brave soldiers of Japan, in their successful effort to protect Manchuria from encroachment, fighting, as they seem to be fighting, the battles of the World's commerce, have marched so near to the confines of the District of Mystery that they may be forced by military necessity to take it, and thus bring back into life and the light of day many of those whose lives have been so long buried.

I am glad to say that I am able to introduce to you this evening a countryman of mine who has probed the mysteries of the district to the bottom, and who has, with some difficulty, returned to tell the world of them. Yet, I can hardly claim to introduce him to you,—he has travelled, written and spoken so much, and with such recognized authority that he has become a world character, known to all men. Ladies and Gentlemen—I beg to present Mr. Kennan, the Lecturer of the evening.

I am requested to announce that the funds accruing from this entertainment are to be distributed equally to two purposes, which, I think, meet your approval and deserve your support: First, to the Yokohama Men's Reading-Room Association, as an addition to the fund now being raised for the renewal of the furniture of the Association Rooms. The work of this organization has been so successful and its influence for good so well known in this community that I shall not attempt to present its claims. Second, to a fund for the benefit of those left destitute as a result of the casualties in the Third Army of Japan in the fight before Port Arthur. The fight was, as you know, a brave one, and one in which the greatest natural and artificial obstacles were overcome. We all admire bravery, and we have an especial sympathy for those upon whom the burden of loss and suffering falls by reason of its exhibition. The Lecturer of the evening was with the Third Army and there learned the lesson of admiration; he now wishes, most naturally, to give some effect to the lesson of sympathy which followed it; he has, therefore, contributed his service to the two purposes named.

The lecturer commenced by relating the purpose of his visit to Eastern Siberia some years ago, when he made one of a party of four American officers, &c., on an expedition to prospect and survey the country, for the Russian-American Telegraph line from Alaska across Siberia to Europe. Mr. Kennan and his companions landed

at the port of Petropaulovsk, in south-eastern Kamtschatka, a snug and primitive little settlement in a lovely country. Mr. Kennan very amusingly describes his early struggles with the jaw-breaking Russian language, which is claimed by its speakers to be the original tongue spoken by Adam and Eve and to have survived the confusion of tongues at the building of the tower of Babel. Contrary to the generally preconceived idea, southern Kamtschatka, instead of being a dreary, bleak and barren waste, in summer at least, is a lovely land. The members of the expedition, in their journey northwards, in the months of August and September, rode through a sparsely populated country of long grass pastures decked with wild roses, lilies and other flowers, forests of silver fir and purling streams, with a background of lofty snow-clad mountain peaks, amid which wild mountain sheep and bear disported themselves and offered sport to the hunter, under a Californian sky and temperature. But as the winter advanced and the travellers got further north the scene changed. At one point the expedition divided into two parties, Mr. Kennan, with an American trader named Dodds, who had long been resident in the country, with a party of natives, struck away to the north-east, towards the coast of Behring Straits, in dog sleighs, and for weeks traversed in mid-winter the barren Arctic steppes, inhabited only by wild nomad bands who roam the waste of snowy plain from place to place, with their herds of reindeer, which exist on the Arctic mosses which vegetate beneath the snow. The travellers were treated with kindness and hospitality by these tribal Ishmaelites and passed many fairly comfortable nights in their deer-skin tents. Mr. Kennan's experience was that the Arctic cold as low as 60 degrees below zero was not actually dangerous to life in the open air so long as the traveller be well and appropriately clothed, and fed on a sufficient meat diet. On one occasion, however, Mr. Kennan and his companion Mr. Dodds had a narrow escape from succumbing to the rigors of the Arctic temperature. They had left the last semi-civilized post to the north-east behind them and having heard from natives whom they met that there was a party of white men, who had been brought to the coast by a fire-ship, or steamer, living in an excavated hut or cave under the snow on the banks of a big river, they were trying to find this party. They had nothing to guide them to the spot but a stove pipe, which the natives had told them, emitted smoke and communicated with the dwelling of the white men. After wandering all day, keeping up active movement to maintain the circulation of the blood in a temperature between 60 and 70 below zero, the long night closed in. Their sleigh dogs were tired and their feet cut by the ice and the travellers exhausted and famished, their stores having given out. Mr. Kennan's only American companion had been overcome by the cold and exhaustion and in spite of the former's efforts to arouse him, had given way to sleep, when a shout from some of the native members of the scattered party, drew Mr. Kennan's attention, and proceeding to the spot, he was overcome with thankfulness to see the long sought for stove-pipe of the reported white men's dwelling. After considerable difficulty he aroused the inmates and succeeded in getting inside, where also his companion was conveyed and restored. The party proved to be some members of their own company, whom they had last taken leave of in San Francisco. The lecturer gave an amusing account of an entertainment given in his honour in a native village and even sang some of the Russian songs which he picked up from the native vocalists and musicians. One of the most striking passages in Mr. Kennan's lecture was his vivid and glowing description of one of the gorgeous and sublime aurora displays which he witnessed. Of word painting the lecturer is a past master, and such a celestial picture as he describes could scarcely be over-painted. It will probably be learnt with regret that the labour on which Mr. Kennan and his colleagues were engaged for two years in Eastern Siberia produced no fruit, as the Russian-American Telegraph Company, after expending some three million dollars, and finding that to carry the scheme to com-

pletion would cost a further four millions, in the face of a competing line, dropped the enterprise. At all events his experiences have provided Mr. Kennan with some pleasant memories and the theme for a most entertaining and instructive lecture.

## RECEPTIONS AT VAN SCHAICK HALL.

On Friday evening, the 31st ult. a very enjoyable reception was held at Van Schaick Hall by the Rev. E. S. Booth and Mrs. Booth, in honour of the members of the Deputation of the American Reformed Church now in Japan en route to their homes, after visiting the stations of the Mission in Arabia and India. The guests of the evening were: Mrs. Olcott, wife of the President of the Hudson River Day Line of Steamers, both of whom are engaged in philanthropic work in many parts of the world; the Rev. Dr. and Mrs. Drand Hutton, the former a highly cultured and talented gentleman and eloquent preacher; and Dr. H. N. Cobb, a travelled gentleman who has done good missionary work in Persia in former days and holds a high position among Church and missionary ranks in the United States. To meet and take part in the welcome extended to these honoured guests a number of personal friends and those connected with the Union Church and Van Schaick Hall had been invited by the host and hostess, and enjoyed a very pleasant social evening. Mr. W. K. Vincent opened the programme with a piano-forte solo, a minuetto by Paderewsky, and was followed by Miss Sada Hayashi in a couple of dainty songs which well suited the singer's sweet soprano voice. The Rev. E. S. Booth in a very neat little speech, bubbling over with kindly feeling and friendliness, welcomed his guests from afar to these shores and spoke of the good work done and doing by the Mission and Church they represented. Dr. Dearing addressed the visitors on behalf of the missionary body and Union Church, and referred to the friendly and social relations existing between the former and the lay community in Yokohama, if not in other parts of Japan, and this he attributed largely to the tact and large-heartedness of Dr. S. R. Brown, the first missionary who was despatched by the Reformed Church to Yokohama and who laboured here so long and worthily. Mr. A. Bellamy Brown, President of the Yokohama Literary Society, addressed the members of the deputation on behalf of the commercial and lay community. He referred to the erroneous idea largely entertained by some good people at home, both in the United States and in England, that Yokohama was a very wicked place, with a reputation not much superior to that of the ancient Cities of the Plain, and quoted some of the writers who had helped to propagate that idea. In confuting this libel the speaker summarized the good work being done from week to week in Van Schaick Hall and referred to the hope entertained of being able to do still more when it should become practicable to enlarge the accommodation of the Hall. Dr. Cobb first replied on behalf of the deputation and emphatically expressed his conviction, from his short experience, that if such opinions had been penned as Mr. Brown had suggested, regarding Yokohama, its people had been much maligned. Dr. Hutton followed with a very happy and humorous little speech, after which Mr. Somerton gave a song and Mrs. James Walter brought the musical programme to an end by singing "Crossing the Bar" with piano and organ accompaniment by Mrs. A. B. Brown and Miss Moulton. Refreshments and pleasant social chat concluded the evening's entertainment.

In spite of the stormy weather of Saturday evening, a goodly company of ladies and gentlemen gathered in the Van Schaick Hall at 5 p.m., to witness the Physical Culture Exercises, and enjoy the musical programme organised by Miss Burdett-Leach and her Japanese pupils for the entertainment of Drs. Hutton and Cobb and party. We congratulate Miss Leach on the successful manner in which the young lady students performed their various exercises, parti-

cularly the Scarf drill and march, and the Ball drill. Miss Leach must indeed have expended much time and patience in training the girls to produce so excellent a result. Judging from faces in the audience, we concluded that many if not all followed the various movements of the young athletes with keen interest. We trust it will not be long before Miss Leach and her pupils will be persuaded to give a second performance.

Mrs. Irvine gave a very successful interpretation of Faure's lovely song "The Palms." Mr. Brady as usual kept the audience in an excellent humour with his comic recitation and song. We append the full programme:—

- I.—(a) Balance Exercises.  
(b) Swimming Exercises.
- II.—Song.... "Where e're you walk." .....Handel.  
Mr. N. G. Maitland.
- III.—Scarf Drill and March.
- IV.—Recitation, "How Uncle Podger hung a picture." .....  
Mr. Brady.
- V.—Bar-Bell Exercises.
- VI.—Song..... "Les Rameaux," .....Faure.  
Mrs. F. C. Irvine.
- VII.—Piano Solo.... "Impromptu" .....Schubert.  
Mr. Karl Vincent.
- VIII.—Dumb Bell Exercises.
- IX.—Duet.... "O that we two were Maying" .....A. Smith.  
Mrs. F. C. Irvine and Mr. N. G. Maitland.
- X.—Ball Exercises.
- XI.—Song.... "When I was a boy at School." .....  
Mr. Brady. ....(By request.)

The 30th annual commencement of the Ferris Seminary was held at 8 p.m. on Monday the 3rd of April in Van Schaick Hall in the presence of an audience of the friends of the pupils and of the school which packed the hall in spite of the inclemency of the weather.

Especially noticeable was the spirit and determination with which the various items were carried out, a spirit well in keeping with the war-like tone alike of essays and musical efforts.

To the graduates the most memorable feature was the address to them by the President of the Board of Foreign Missions of the Reformed Church in America, Dr. Hutton, who spoke of the three steps involved in graduation—a step out, a step on and a step up, and reminded the class that education was but the embroiderer's needle,—the work, the finished product depended upon the use to which they put the needle.

Numerous diplomas for various grades of attainment in the Tonic Solfa Method were given by the principal, and the performance on the part of choruses and the instrumental work showed how well merited were these diplomas.

Following was the programme:—

#### INVOCATION.

#### IMPERIAL RESCRIPT.

- Chorus:—Kimi ga Yo.  
English Essay:—"New Japan."  
Taku Furusawa.
- Piano Duet:—"The Palms," .....Faure.  
Fuku Ide, Kin Takahashi.
- Japanese Essay:—"Relation of Spiritual Life to  
"New Japan."  
Mina Sato.
- Two Part Song:—"March of the Guard," .....Geibel.  
English Essay:—"Christianity and Patriotism."  
Chiyo Okamura.
- Piano Duet:—"Son and Stranger," .....Mendelssohn.  
Nobuji Jimbo, Yasu Ishii.
- Japanese Essay:—"A National Realization of Christianity  
Essential in the Present Crisis."  
Koume Suzuki.
- Vocal Solo:—  
(a) "These Are They which" From "The Holy  
Came," .....Sada Hayashi, City."  
Chorus:—A. R. Gaul.
- (b) "List The Cherubic Host,"
- DISTRIBUTION OF CERTIFICATES.
- Address:—Rev. Mansius H. Hutton, D.D.  
Response:—Tane Yukawa.
- Organ and Piano Duet:—  
"Oberon," (C. M. de Weber) Alberti.  
Kaneyo Kan, Tsuyu Tonui
- Alumnae Address:—  
"The Future Education of Japanese Women."  
Hana Hirano, Class of 1890.
- Chorus:—"Recessional," .....R. de Koven.

BENEDICTION.

### BLOCKADE RUNNING.

#### THE S. S. "HARBERTON."

The circumstances connected with the seizure of the steamer *Harberton* on the 18th instant throw some fresh light on the means now being taken to run the northern blockade. The vessel cleared from Cardiff with a cargo of 5,000 tons of coal for Kiaochow on November 29, and took the outward track of the ordinary mail steamers, calling in at Colombo and Hongkong, but after leaving the latter port an easterly course was taken and continued for several days with a view to avoid the cruisers reported at Hongkong to be patrolling the southern Japanese waters. All went well till the 1st instant when entering the Kunigiri channel the vessel encountered the ice. Meeting floe after floe she pressed onward, each obstruction striking her bows with considerable force, resistance to which was assisted by the heavy plates forward of the water-tight bulkhead. Finding the strain was making great inroads upon her and bending the plates the crew were set to work to straighten her up and this proved successful till on the 18th instant she was completely encased in the ice. On that day she was sighted by the *Akitsu-shima*, and a Japanese officer with eight men were lowered in a boat which they skidded across the ice, every now and again becoming immersed as portions of the floes drifted to the south carrying everything before them. Once aboard the *Harberton*, the Japanese were posted round the ship, the Captain maintaining that he was bound to Kiaochow and producing some documents to that effect. This was however disbelieved and three separate consultations with the Japanese authorities at Yokosuka where the vessel was afterwards taken failed to convince the captors that the vessel's true destination was Vladivostok and she was detained pending the decision of the Court.

Something like a deadlock has been brought about in the arrangements which were being made for the passages to England of the crew of the S. S. *Harberton* captured by the Japanese last month while attempting to run the Vladivostok blockade. The whole of the ship's company attended at the British Consulate on Thursday afternoon, and were told by the Consul that instructions had been received from London that they were "distressed British seamen," and under that heading would be sent to Liverpool or any other port in the United Kingdom, by the first available steamer. They were asked to sign clear of the articles thus terminating their engagement, but they all refused and insisted that they were entitled to their wages up to the time of their arrival in England. The Captain said he had already paid the passage money amounting to upwards of £500, and that acting under instructions from his owners, Messrs Harland and Barthell of London, he had withdrawn the amount awaiting further developments. The whole of the men, including the officers, refused to agree to any other arrangement than that of two months pay and their passages home, the men travelling steerage, and the officers second class. They were then informed that practically they were shipwrecked seamen, but they insisted that their vessel was in seaworthy condition, being only but slightly damaged at the bows, and pending any final decision in her case by the Yokosuka prize court she was to be considered as bound by her articles. They had signed for two years to run between 45° N. Latitude and 45° S. Latitude, had cleared Cardiff for Hongkong and Kiaochow, and it was not communicated to them until Hongkong was reached that the final destination would be Vladivostok. The Consul said he had to carry them out, that the whole of the crew were to be considered as destitute seamen, and that as such they could only be transferred to England. The men maintained that they were not destitute and their ship was not a wreck, and that after being eighteen days in the ice and enduring untold privations it was very hard, many of them being married men with families, that they should be thus treated. They all said they would sign off the articles if they were paid

their wages up to the time of their arrival in England, and that was indeed the least the owners could do for them. This was said to be contrary to advices received from London and the men left the Consulate to await further instructions from the Board of Trade and the owners of the vessel.

The cost of a passage to England as a distressed British seaman is half a crown a day, sufficient to pay for subsistence; the total cost of transfer thereby for the whole of the crew would amount to £228, or about half the money the Captain said he had stipulated with one of the local shipping agents. The men now state that whatever arrangements are made for their passages home they will still adhere to their determination to refuse any other compromise than that of a continuance of their wages till they reach the United Kingdom.

### FUNERAL OF MR. THOMPSEN.

We regret to announce the death of Mr. I. Thompson, (son of Capt. W. Thompson, of the N. Y. K.) a young man of great promise whose sudden removal will be deplored by a large circle of friends. Mr. Thompson, who was prominent in rowing and yachting circles, was attacked by pneumonia to which, after a short illness, he succumbed. The funeral took place on Monday.

The service, which was conducted at the house by the Rev. E. S. Booth, consisted of the 14th chapter of the Gospel according to St. John (which had been read to him at his bed-side, before he died), and the quartette "Asleep in Jesus" sung by Mrs. Bagnall, Miss Moulton, and Messrs. C. Griffin, and J. Macbeth.

At the conclusion of the service the Brotherhood of Philip and Andrew encircled the coffin, and sang, "Blest be the tie that binds." The chief mourners were Captain Thompson, Mrs. Thompson, and Master Thompson, the pall-bearers being Messrs. F. S. Booth, W. Graham, P. E. Nicolle, and R. Wallace from the Brotherhood of St. Andrew and St. Philip, and Messrs. G. B. Spain, A. Lewis, J. Jacob, and H. Goddard from Messrs. Sale and Frazar's—office-friends of the deceased. The deepest sympathy is felt with the parents of this young fellow, so suddenly removed, so amiable that he endeared himself to all whom he met.

### DEATH OF MR. JAMES GREEN.

It is with great regret, says the *Kobe Herald*, that we have to record that Mr. James Green, of Messrs. G. H. Macy & Co., died on board the *Korea* yesterday prior to that vessel's arrival at Kobe. Mr. Green, who had suffered severely from asthma for a considerable time past, left here on a trip to Hongkong about a fortnight ago, in the hope that the sea voyage would aid his restoration to health. Unfortunately he underwent a relapse after leaving Shanghai on the return journey, with the result recorded above. The deceased gentleman who was sixty years of age, was a native of Sutton, England, and started his commercial career in the tea business in London. Coming out to this country over thirty years ago, he was, like several old residents who are happily still with us, for some time in the service of the Japanese Government as a school teacher. Very early in the seventies he became master of English in the Yei-go-gakko, the preparatory school for the University, at Osaka, and there distinguished himself as an exceptionally able teacher and one possessing in an unusual degree the power of winning and retaining the affection of his pupils. Among the latter were many gentlemen who have since earned high distinction as medical men, scholars, lawyers, railway engineers and in other capacities.

The Mitsukoshi Gofuku-ten, a prominent dry-goods shop in Tokyo, seems to be doing good business at the present time. According to the *Jiji*, the receipts on April 4th amounted to yen 46,000 and on the following day to yen 63,000; the customers numbering 15,000 and 19,000 respectively.

## THE LAW COURTS.

## CLAIM FOR RENT.

The case in which Mr. P. Helm claims yen 348 from a Chinaman named Sufang Chee, came up again on April 4th in the Yokohama District Court, when plaintiff's Counsel asked the Court for leave to examine a Chinese merchant, Cheong-Tat King, as witness. The Court granted the request and adjourned the hearing till April 18th.

## GOTO v. MRS. THOMPSON.

The hearing of a case instituted by S. Goto, silk goods dealer, Benten-dori, Ichome, Yokohama, claiming yen 190.32 against Mrs. H. Thompson, No. 77, Yamashita-cho, Yokohama, began on April 4th in the Yokohama District Court before Judge Yasuda.

Plaintiff was represented by Mr. Watanabe and defendant by S. Ota.

At the outset of the hearing, plaintiff's Counsel stated that his claim was for yen 190.32, as well as interest on yen 228.62 from Sept. 17th to Dec. 27th last, on yen 188.62 from Dec. 3rd to Dec. 27th last, and on yen 190.32 from Dec. 28th to the execution of judgment, the rate being calculated at 6 per cent. per annum.

Defendant's Counsel stated that his client is a citizen of the United States. According to the American law, in some of the states the wife is not allowed to appear in a Court of Law on behalf of her husband without his consent, and *vice versa*. Now defendant had no direct responsibility towards plaintiff. Counsel further said that there was a necessity to investigate the laws of the state in America to which she belonged, and for that purpose he asked the Court to adjourn the case or to summon her husband, who is one of the crew of an American steamer on the line between Japan and San Francisco, when he arrives at Yokohama.

After denying consent to the request of Mrs. Thompson's Counsel, Plaintiff's Counsel said that the lady was directly responsible for the claim and not her husband.

The Court said that an investigation as to the American law applicable to the case would be made and declared that the hearing meantime would be continued.

Plaintiff's Counsel stated that on Sept. 17th 1904, the American lady bought at the shop of plaintiff, some female undershirts, a silk bed quilt and several silk cape articles valued at yen 228.62. After repeated pressing for payment, she paid yen 40 on December 2nd. On January 29th she also bought a comforter valued at yen 1.70 making her debt the sum claimed. At the beginning of February, Mr. Walker, of the Pacific Mail Steamship Co., paid a visit to plaintiff on behalf of Mrs. Thompson and asked him to wait for payment until Feb. 18th when she would have a remittance from her husband. Defendant, however, did not pay on the day appointed. Consequently, plaintiff issued a note for payment on Feb. 22nd through the Yokohama Local Court as the final means of securing payment. Defendant lodged a protest against this note, so the case was brought in the present Court.

Defendant's Counsel contended that his client bought the goods from plaintiff on behalf of her husband and not for her own account.

Plaintiff's counsel produced an account book, a chit book, etc., as evidence. After a brief examination of the evidence by defendant's Counsel, the Court adjourned the hearing till April 13th.

H. B. Collins, whose appeal against the sentence of eleven years' confinement with hard labour on a charge of having acted as a Russian military spy in Japan, was recently rejected in the Court of Cassation, is now detained in the Sugamo Prison, Tokyo. On March 29th, he was assigned to the chip-braid department of the jail, where braid is prepared for export. He will not be removed to the Yokohama prison.

## SHIRAISHI v. JAPAN BREWERY CO.

The hearing of a case instituted by K. Shiraishi, claiming yen 156 from the Japan Brewery Co.

Ltd., began on April 5th in the Yokohama District Court before Judge Nakanishi.

Plaintiff's Counsel stated that Shiraishi had a claim of yen 156 against M. Kai, who had a right to receive yen 881 from the Japan Brewery Co. for packing cases supplied to the brewery. Consequently he urged that the amount claimed should be paid by defendants' firm out of the yen 811 owing to plaintiff.

S. Shibata, intervenor, contended that he and some other contractors advanced a large amount to M. Kai so that the sum of yen 881 was regarded as belonging to them and not to M. Kai, while further they contended that the yen 156 did not belong to plaintiff.

Defendant's representative said that the Brewery would be glad to pay the money to a responsible person, but they could not make payment to third person with whom they had had no direct connection. Defendants must now wait for a judgment ordering to whom the payment should be paid.

At the stage, this Court announced it would give an interlocutory judgment on April 10th.

## A BUILDER'S CLAIM.

The case filed by Mr. Carl B. Clausen claiming yen 1,182.69 against Mr. S. Komer came up again on April 5th in the Yokohama District Court before Judge Nakanishi when plaintiff's Counsel, Mr. Ideura, gave a lengthy explanation with regard to the work in dispute comparing the plan with the specification and these with the statement given by an expert who had been ordered by the Court to examine the construction. He then urged that the claim of his client should be recognized as proper.

Defendant's Counsel contended that the statements given by the expert, etc., were not right in this instance.

The parties having briefly discussed the question, the Court announced that it would render judgment on April 12th.

## CLAIM FOR LANDING EXPENSES.

A case instituted by Captain Weston against the Compania General Tabaco de Filipinas claiming yen 1,036.59, cost of landing 20,000 bags of rice at the Customs compound from the British steamer *Salara*, came up again on April 6th in the Yokohama District Court before Judge Yasuda. Defendant's Counsel stated that the short delivery of ten bags occurred in a lot consigned to T. Sudzuki, a rice dealer.

Judgment will be delivered on April 8th.

## LITERARY GOSSIP.

Bookmaking in the United States has been prosperous and increasingly active, according to the careful statistics gathered by the *Publishers' Weekly* and produced in its number of January 28. The total output of new books and new editions advanced from 7,865 in 1903 to 8,291 in 1904, an increase of 426; but the increase in new books alone was much more marked, being from 5,793 to 6,971, or 1,178, while the new editions fell off about 750. This is a fairly favorable showing for the mental fertility of American writers and the demand for their product.

Among the thousands of amusing letters which enliven the monotony of a publisher's existence came recently an undated request from a Western city of the United States written, it goes without saying, by a woman, and expressed concisely in the following words:—"I want an interesting book to read. Please send me one. If I don't like it, I will send it back." Perhaps the day will come when publishers will have "sample departments," where fragments of books will be submitted to women, with fac-similes of cover, etc., from which the ladies may choose volumes for their libraries as they now select materials for their gowns. It is a painful, because an unfamiliar, experience to a woman to buy anything that she cannot "send back" if she changes her mind after she has ordered the goods. All dry goods houses recognize and submit to this idiosyncrasy on the part of women, and since books are read by women in America far more than by men, possibly the sale of books might be

increased if there were not such an alarming finality in their purchase that a woman stops to think before investing.

The *Memphis Scimitar* recently published a letter from Mr. Secretary John Hay to a correspondent in Memphis who had inquired in regard to the origin of "Jim Bludso": "Your suggestion was correct. The name of the boat was the *Fashion* and the name of the engineer was Oliver Fairchild. I used the name of 'Bludso' because they were a family of rivenmen whom I knew. I had the story from Oliver Fairchild in New Orleans. I do not know whether he is yet alive."

Dr. Louis Livingston Seaman, says an American paper, will have almost as many cases of champagne at his disposal at the Savage Club in London any time he chooses to drop in there as there are newspaper correspondents in Tokyo. Four months ago, when Dr. Seaman was in the Japanese capital, he made four attempts to enter Port Arthur. Then he returned to Tokyo and wagered a case of champagne with all comers that the redoubtable fortress would not fall before the first of the year. There were many takers, and so confident were some of the correctness of their views that they even advanced the date. Some bets had it that the fortress was to fall before the end of September. Dr. Seaman has won every bet, as Port Arthur did not surrender until the 1st of January, 1905. This is one of the minor incidents that Dr. Seaman failed to mention in his book "From Tokyo Through Manchuria with the Japanese," which has just been published by the Appletons.

For the post of the Chair of Literature in the University of Bologna, which is to become vacant shortly, the name of D'Annunzio is put forward. D'Annunzio, as all the world knows, is a leading exponent in Italian literary life of realism, and is at the present day enjoying the distinction of being the most discussed of Italian authors. Several volumes of poems proceeded from his pen before he took to prose work. Most of these verses have been much criticised. But not more so than his prose writings. Perhaps D'Annunzio is best known outside his own country by his "Trionfo della Morte," which has been described as a novel of much power. It was translated into several European languages and published in England in 1898. In that year also, it may be remembered, the Lord Chamberlain refused to allow his play "The Dream of a Spring Morning" to be performed by Madame Bernhardt during her season in London that year. In Italy he has a large following, and is idolised by a small group of devoted admirers. Some few years ago he was elected a deputy for his native village to the Italian Parliament. He lives for the greater part of his time in Florence.

Samuel Rowlands, a poet and pamphleteer who flourished in London in the first quarter of the seventeenth century, wrote many poems and tracts which have long been accounted among the bibliographical rarities of English literature. No less than ten of these are known only by a single copy, and three have been supposed to be utterly lost. Of one of these, "The Bride," the only record hitherto found has been an entry in the "Stationers' Register" under the date of May 22, 1617. A copy of this unknown poem was recently discovered in the catalogue of a German bookseller, and has been secured by the Harvard College Library. This copy is now to be reprinted, in a limited edition by Mr. Updike, of Boston, U.S.A. Such are the freaks of fame and discovery. Lost in London, found in Germany, published in Boston.

The Oxford University Press is about to publish "Cantonese Love Songs" in two volumes, one containing the Chinese text with glossary and the other a translation by Mr. Cecil Clementi of Hongkong. Mr. Clementi also contributes an introduction in which he explains the origin of the songs and their importance, and gives a short account of their Author. He states that the more fully the sentimentality of the Cantonese is understood, the more clearly will it be seen to tinge the temperament even of the coldest businessman, or the most uncouth coolie.

## CORRESPONDENCE.

## JAPAN'S DIPLOMATIC AND CONSULAR SERVICES.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—In this month's issue of the *Revue de Droit International*, Professor Takahashi strongly recommends the necessity of revising the Regulations regarding the Examination for Diplomatic and Consular Agents, and sets forth his views as to how they should be modified. I have much in common with his ideas on this question, except in a few rather important points. He thinks it extremely strange that the University students should fall so far behind the other applicants in the Examination for the Diplomatic Service. He seems to think that only those University students, who have had access to his lectures, should obtain the best marks in this examination. Does he think that those candidates who outvalued the University men, succeeded by unfair means? If so, I am a bit surprised at his bold assumption, which is tantamount to looking down upon those non-University men, who were skilful enough to elbow back the professor's pupils in the competition. Learning is not a monopoly of the University or of any other school. Self-educated persons—those who acquire knowledge without the assistance of school teachers—may, in some cases, be more self-reliant, more trustworthy, and, perhaps, better qualified, in a sense, for the diplomatic service.

The professor desires that the Examination Authorities should not lay so much stress upon the other subjects. The reasons he gives for this suggestion seem to me to be simply absurd. I think that they should be all equally considered, because the full mastering of foreign languages is one of the qualifications that constitute the efficiency of really able diplomats. If it is to be but lightly appreciated, it would be better to do away with it entirely from the list of examination subjects. For pupils who can barely understand the Second National Reader, may prove themselves as capable of speaking English enough to appear in London society as the University men, if they stay there for a equal time.

As to the other examination subjects, I go a step further than the professor and should like to see the Laws of Civil and Criminal Procedure added to the list of compulsory subjects, without omitting International Private Law as he does, I do not understand the reason why International Private Law should be pushed back into a comparatively insignificant place among the optional subjects. And when we remember that we have consular jurisdiction in Korea and China, nobody can deny that a thorough knowledge of the Laws of Civil and Criminal Procedure is absolutely required by our consuls in these countries.

In conclusion I sincerely hope that the Commissioners of the Examination will not be guided by the professor's suggestion and depreciate efficiency in foreign languages.

I am yours, etc.,

A WOULD-BE DIPLOMAT.

Tokyo, March 28th, 1905.

## DASTARDLY ATTACK OF ROBBERS ON AN AMERICAN PHYSICIAN IN SOUTHERN KOREA.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—As showing the true condition of Southern Korea I am writing of the above:—

On Saturday March 11th Dr. W. H. Forsythe, an ex-army surgeon, who took a leading part in sanitary work, etc., in Cuba during the war, was called to treat a Korean gentleman who had been wounded the night before by robbers. Dr. Forsythe went to the scene of the robbery and treated the wounded. The place is Mankori, halfway between Kunsan port and Chungri capital and in sight of the main road. Next day being Sunday he attended a native church half-a-mile distant, returning at dusk to Mankori, expecting to come home in the morning. At 4 a.m. seven robbers rushed in, dragged him along the floor on which he slept, beating him with gun-buts and some weapon like a machete, or huge knife. The Koreans ran in and tried to keep them off, telling the robbers that Dr. F. was not a soldier but an American doctor who had come to treat their wounded. They would not listen, however, and beat him into insensibility, one dastardly blow from behind severed the ear piercing the drum and the mastoid to a depth of an inch. Five other gashes on his body, one on the leg, and scratches on the arms he received as he tried to fend off blows.

Friends reached the spot in twelve hours after the deed and he has been brought into port but in an unconscious and very alarming condition.

The Korean Government as well as the Japanese Port-Authorities were notified and both soldiers and police were sent. Korean soldiers are making no

effect to effect capture and only five were sent. Japanese in conjunction with the Korean Police are on the ground making search and a good reward is offered for capture.

The condition of Southern Korea is lamentable. Outside of the magistracies there is no protection for the people and robberies and blackmail are of such daily occurrence that it is a mere incident of Korean existence. In plain sight of the magistracy recently a Christian congregation was beset and only great coolness on the part of the preacher kept his head on his shoulders. He was taken for a soldier because his hair was cut; and his Bible was his salvation—since he had to prove he was no soldier or be killed. Dr. Forsythe was not given this chance.

The people dare not resist, appeal for aid, or aid in catching the bands of robbers. Numbers are moving to the capitals and paying big prices for any kind of house. The writer asked an official why the soldiers or police did not catch the thieves. His reply shows the true lawless state of the country. "Whom would you send to catch the soldiers?"

Practically all American sentiment in Korea is pro-Japanese, and we Americans hope that the fact that no newspaper giving our views is published (except the *Korea Monthly Review*)—may lead outsiders to think that we in anyway sympathize with the inexplicable stuff that goes out to the world as daily news from Korea. Many wonder why the wonderful news is not suppressed by long-suffering Japan. To the mind of many nothing can be worse than the present state of Korea, and between Japan and Russia practically everybody who speaks English says Japan always, Russia never!

Yours faithfully,

W.M.F.

## OLD STAMPS.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—Please receive my best thanks for having published my appeal in favour of the "Old Stamps Association." Yesterday I received the issue of the *Japan Mail* of Dec. 14th, 1904, wherein I read the attacks of one "Old South African." If this gentleman had signed his letter, I could have sent to him official reports about our work in Central Africa to convince him of his error. As I don't know his address I write to you these lines, which I trust you will bring to the notice of your readers.

I am sorry to say that I find only a true one among the venomous assertions of this "Old South African," viz. that I know little English. I am not ashamed to confess my own mother-tongue is the French one. No blame, then, if I am no master in the English language. I make use of the little I know for the salvation of the souls of my brothers.

I much wonder that a gentleman writing so impulsively such attacks without having made erect inquiry to see if his assertions are right. Should this want of honesty be also a result of the civilisation of the "old South African"? I also wonder that, as an old South African, he gives his judgment on what is done in Central Africa, (in England) which he never saw.

This is the whole truth about the "Old Stamps Association." This Association was established in 1891 at Liege with the view to raise funds for the Missions of the Congo Free State in Central Africa. A milliard of stamps, sent from nearly all countries, have passed through our hands. They are sold in the Exchanges of Brussels, Paris, London and Berlin, and up to this, the profit of their sale has enabled us to establish 21 Christian villages in Congoland.

In each of our 21 villages, many negroes receive instruction and Christian education, and there are for these villages several hospitals for the sleeping sickness; for this terrible plague marks at present Central Africa by the sign of the cross.

Sad are the news from Sin Trudo, our most important station in Congoland. Father Senden, who is in charge of this Mission, writes as follows: "The sleeping sickness seems to destroy slowly but surely the Mission, and its ravages are intense and rapid. Humanly speaking, this is an appalling state of things; yet, 'hearts on high,' let us be resigned, and adore God's holy will. Who permits trials to afflict us. We have done all that prudence demands in order to conquer the plague. So far, no blame to the Missionaries. However, whilst the plague is raging, many souls are granted to the faith and sent to heaven after baptism. The plague brings the people to our dispensaries in great numbers, and whilst we can do very little for the body, we can do everything for the souls of the plague stricken. They are taken into our hospitals, nursed, instructed, and are, without an exception, baptised and prepared for death, which they accept with wonderful Christian resignation."

"Last August we have ransomed 41, in September 54, and in October 120 patients, not to mention about a hundred persons who live around the mission, our own Christians. Many of these unfortunate creatures before reaching the climax of the

malady, become mad, and some of them dangerously insane. When this crisis is over, they begin to sleep. This closing phase of the illness may last for weeks, and many of the poor creatures become absolutely unconscious of everything around them. It frequently happens that they get frightful burns, when falling asleep near the fire or into the fire, as they are seized by the malady standing near the fire: for it is necessary that all such patients be near a good fire, morning and evening.

"Were it not for the kind and devoted nursing of the Sisters of Charity, veritable angels of sacrifice, we could never cope with the work which the terrible plague gives us. The nuns help the patients of the hospitals to get up, to dress, to drag themselves about, to take fresh air; they wash and clean them as babies, and give them to eat. Our expenses are enormous, and our scanty resources fall very short of the needs of our poor blacks, who die by thousands all through the country.

"When and how will this terrible malady disappear, we know not," says the missionary who sent us this sad account. "Up to this science has not found any remedy to prevent or to cure the sickness."

This is, Dear Sir, the great work done by means of old stamps whose proceeds are sent to these Missions.

Mr. Butaye, the Superior, writes also, after visiting the villages founded by the *Old Stamp Association*: "We pray to God, The Supreme Remunerator, to bestow his largest blessings upon all those who help us in our work, by collecting old stamps, the sale of which at home enable us out here to establish many more farm-chapels with at least one priest in each district. Our Christians are solidly instructed; they frequent the Sacraments in a most edifying and consoling manner, and go to church regularly on Sundays and feast days. Besides, for very many years back they have given proof of good conduct and morals worth y of a truly Christian generation, contrasting so favourably with the disorders and immorality of the heathen around them."

I believe that this appreciation, coming from Congoland is more valuable than the criticisms of all the Old South Africans in the world.

The same Mr. Butaye says further:—"We never cease to pray, and our Christians pray, for our dear benefactors, and we firmly hope that God will abundantly reward them, even in this life, for what they do for the poorest of the poor, but especially one day in heaven, when they shall enjoy the reward for help they have given to save many souls."

If you desire further particulars, please require them from me; I shall deem it a pleasure to give news from the results of the Association to everyone.

I beg to remain, Dear Sir, Yours faithfully,

JOSEPH PIERRY.

Old Stamps Association, 40, Rue des Prémontiers, Liege.

## MR. KENNAN'S LECTURE.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—I have much pleasure in informing you that the net proceeds of the lecture given by Mr. George Kennan amounted to yen 450.47 (yen four hundred and fifty and sen forty-seven) half of which sum I have handed him for the families of the soldiers of the Third Army who fell in the siege of Port Arthur, and the balance yen 225.23 I have handed to the Hon. Treasurer of the Yokohama Men's Reading Room Association.

On behalf of the Committee and members of the Yokohama Men's Reading Room Association I wish to thank publicly Mr. George Kennan for his great kindness in giving the lecture, to the Local Press for granting special advertising rates and to the Public Hall Committee for reducing their rates, and to all who assisted us.

Yours truly,

E. JAMES MOSS, Jun., Hon. Secretary.  
Y.M.R.R.A.

Yokohama, April 5th, 1905.

## THE PRICE OF BUTCHERS' MEAT.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—Your explanation of the proposed rise in the price of butcher's meat is a little different to that which my cook brought home from market this morning. He says the butchers tell him that the cost of cattle has risen in consequence of the great demand that has set in to meet the commissariat requirements of the horde of Russian prisoners now saddled on Japan. There is no doubt that the supply of store beasts in Japan is growing daily more inadequate, but still, I think, the butchers' ring are endeavouring to make too big a squeeze at the foreigners' expense.

Yours truly,

HOUSEKEEPER.

Yokohama, April 6th, 1905.

## TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

## RUSSIA AND PEACE.

London, March 30.

Reuter's correspondent at St. Petersburg says that Russia has outlined the conditions under which she will be prepared to negotiate for peace.

It is stated, with every semblance of authority, that, thanks to the good offices of the United States and of France, the question of peace has now assumed a practical shape.

## SUCCESS OF THE JAPANESE LOAN.

The subscription list to the Japanese loan has been closed in London. The loan was about ten times over-subscribed and was also heavily over-subscribed in New York, Chicago, Boston, and other cities.

## RUSSIA AND PEACE.

A Russian semi-official agency says that despite the general inclination in favour of conclusion of the war, Russia has not proposed and is unprepared for peace conditions.

## GERMANY AND MOROCCO.

Count von Bulow, the German Chancellor, speaking in the Reichstag, said that Germany's policy regarding equal rights for all trading nations in Morocco was unchanged, but if any attempt was made to change the international status in Morocco or control the open door in that country, Germany must take increased heed in order that her economic interests in Morocco may not be endangered. She therefore intended to enter into communication with the Sultan forthwith.

## FRANCE, GERMANY AND MOROCCO.

London, March 31.

The French Press is irritated at the distinct unfriendliness of Count von Bülow's speech. The papers refer with satisfaction to the Anglo-French *entente*, which Germany's interposition in Morocco has tended to strengthen.

## COUNT LAMSDORFF AND PEACE.

Despite semi-official *dementis*, there is every reason to believe that Count Lamsdorff, Russian Minister of Foreign Affairs, has intimated in certain friendly quarters the conditions which Russia is prepared to entertain. There will probably be much informal diplomatic discussion in the different Chancelleries concerned before anything resembling negotiation occurs.

## COLLIERS UNDER SEALED ORDERS.

The *Daily Mail's* correspondent at Aden states that sixteen colliers for the Russian warships are leaving Jibuti singly and under sealed orders. It is believed they are going either to Batavia or Diego Garcia.

## FINLAND AND THE WAR.

The *Daily Chronicle's* correspondent at St. Petersburg reports that the Finnish Senate has offered to contribute a million sterling towards the war on condition that no Finlander is sent to the Far East. The Tsar, after a long consultation with his Ministers, has accepted the offer, and 26,000 men are consequently exempted from the war.

## THE KAISER.

The Kaiser has left Lisbon.

## ENGLAND'S MILITARY BURDEN.

London, April 1.

In the debate on the Militia Bill in the House of Lords, Lord Lansdowne, the Secretary for Foreign Affairs, said that the growth of the naval and military expenditure

had become a serious menace to the financial stability of the country and England would have to consider in what direction it was possible to arrest the progress of the colossal expenditure. All were agreed that the pruning knife could not be applied to the naval expenditure, nor should England diminish the number of troops available for active operations in India, the Colonies and elsewhere. Therefore any retrenchment must be applied to home defence only.

## THE KAISER AT TANGIER.

The Kaiser has arrived at Tangier. He was saluted by the shore batteries and by the French cruisers. On landing he received the representatives of the Sultan and the diplomats.

## AMERICAN INTERVENTION DENIED.

Rumours of intervention by the President between Russia and Japan have been officially denied in Washington.

## FRANCE AND MOROCCO.

M. Delcassé, speaking in the Senate, said that France seeks to establish her interests, not in disregard of the interests of others, but in such a way as to harmonise her interests with those of other Powers.

The Mediterranean Powers have recognised that France, owing to her position in Algeria, must occupy a superior position in Morocco.

## THE KAISER AT GIBRALTAR.

The Kaiser dined with General White at Gibraltar and had a great reception. The drive round the fortress was abandoned owing to the lateness of the Emperor's arrival.

## THE JAPANESE LOAN.

London, March 3.

The subscriptions for the American portion of the Japanese loan amounted to nearly a hundred millions sterling.

## THE KAISER.

The Kaiser has left Gibraltar for Port Mahon and Naples.

## THE BALTIC FLEET.

The third Baltic Squadron has passed Perim, not calling at Jibuti, which seems to show scrupulous adherence to the principles of the Anglo-French agreement.

## GERMANY AND MOROCCO.

The Kaiser's visit to Tangier gives satisfaction to France. *The Times* remarks that it is not surprising the Queen left Gibraltar a few hours before the arrival of the German Emperor, considering that his coming was directly after an overt demonstration against the Anglo-French *entente*.

## PEACE.

Official denials of the peace negotiations are plentiful, but there is a firm conviction in Paris and St. Petersburg and on the bourses that peace is approaching.

## RUSSIAN SUPPLIES.

Ten trains are leaving Russia daily, laden with commissariat and war material for Vladivostok, with a view to the forthcoming siege.

## CHINAMEN STRIKE AT JOHANNESBURG.

London, April 4.

Two thousand Chinamen have struck at the North Randfontein mine, being dissatisfied with the wages. The police had to be summoned to restore order. The casualties among the Chinese were considerable though not serious.

## BRITISH CLAIM ON RUSSIA.

A commission under the presidency of Professor Martens has been appointed at

St. Petersburg to examine the British claim for compensation with reference to the sinking of the *Hipsang*.

## ILLNESS OF THE PRINCE OF WALES.

A bulletin has been signed by Sir Francis Laking and Sir Frederick Treves to the effect that the Prince of Wales has undergone a slight operation which will confine him to his room for a few days. There need be no uneasiness and no further bulletins will be issued.

## THE KAISER AT TANGIER.

The curtailment of the Kaiser's visit to Tangier is now explained by a statement that the Kaiser received on board a message from the Sultan virtually hailing him as a protector against France. The Kaiser, declining to endorse this, refused to land, but the German Minister ultimately persuaded him, alleging that otherwise German prestige would suffer grievously. The Kaiser then landed and went direct to the German Legation, not entering the Palace which had been specially prepared for his reception. The upshot is that Moors and French are alike offended.

## RUSSIA AND THE WAR.

Reuter's correspondent at St. Petersburg says it is believed that a Council will shortly be held at Tsarskoe Selo to finally decide on the continuation or otherwise of the war, after receiving reports from General Linévitch and the other commanders, as well as from the Russian Ambassadors abroad.

## THE THIRD BALTIC SQUADRON.

The third Baltic squadron has anchored at Jibuti.

## SANITARY MEASURES IN RUSSIA.

London, April 5.

A thousand doctors assembled in congress at Moscow to discuss means of combatting the cholera epidemic which is feared in Russia, have adopted a resolution demanding non-interference by the police in the work of fighting the epidemic. It also demands an amnesty for doctors imprisoned for political offences, compliance with the demands of the workmen made on Jan. 22, and other political reforms.

## GERMANY AND MOROCCO.

Later details in nowise diminish the deliberate character of the German Emperor's intervention in Morocco.

The *Times* correspondent at Tangier reports that the Kaiser, in a conversation with the Sultan's representative, said the present was an unsuitable time to introduce European reforms, which should be wholly founded on Islamic law and traditions. He would, however, find means later on for communicating his opinion to the Moorish Government on the question of details, and he added that he would never allow any other Power to act as intermediary between Germany and the Sultan.

## DISASTROUS EARTHQUAKE IN INDIA.

London, April 6.

A severe earthquake in India, affecting the district from Agra northward to Simla, yesterday caused enormous damage. It is feared that there has been great loss of life, especially at Lahore, where many buildings collapsed and famous mosques were damaged.

## CHOLERA IN RUSSIA.

Cholera has broken out in the Russian provinces of Tver and Vladimir. The disease has apparently continued throughout the winter, and an epidemic is inevitable with the coming of warm weather.

# KING EDWARD AND PRESIDENT LOUBET.

The French newspapers are discussing in a gratified manner the prospects of the interview between President Loubet and King Edward, while the latter is passing on his way to Marseilles to join the Queen on her yachting cruise. It has been arranged that the President will join the King's train tomorrow a few miles outside Paris, and accompany him to the terminus.

(Received at the Military Head Quarters on the 31st of March.)

## REPORT OF THE FORCE THAT OCCUPIED HSINGCHING.

According to the statements of natives coming from the direction of Hailung, the enemy's force under Colonel Madoriloff, which had been concentrated in that quarter, together with the Hunghutsz, all retired north some days ago *via* Mayen-shan. Kirin seems to be now the enemy's principal place of occupation.

Reports from Weiuampaumun (at the Palisades north-east of Kaiyuan) show that there is no change in the condition of the enemy at Mienhuachieh, and that some of his troops are on the highlands at Aishenkau (33 miles north-east of Kaiyuan) and in its vicinity.

## REPORT OF THE CHANGTU COLUMN.

The enemy's cavalry cantonment has been withdrawn to Rhtaohotsz (about 25 miles north of Changtu) and Kojoshi (about 2½ miles north of Shwangmiaotsz, which is on the railroad). He has burned the station at Shwangmiaotsz.

## REPORT OF THE FAKUMUN COLUMN.

The enemy's cavalry cantonment is now at Paolitun (about 32 miles north-east of Fakumun) and at Tungtakau (about 7 miles east of Paolitun). At Pamienching and Fenghwa the enemy's troops are still marshalled.

(Received at the Military Head Quarters on the afternoon of the 1st.)

## AT THE FRONT.

An official reconnaissance sent out by us in the direction of Hailung came into collision with some 300 of the enemy's cavalry at 11 a.m. on the 28th of March near Shan-chintz. The enemy's infantry and cavalry who have retreated towards Hailung, number about 4,000 and there are now about 2,000 cavalry in that place. Further between Yingeching (about 38 miles north of Hsingking) and Shanchingtsz, at various points, quantities of cereals are stored.

There is no great change in the condition of the enemy at Kirin and Changchun.

(Received at the Military Head Quarters on the 2nd inst.)

The column which recently occupied Kaiyuan drove the enemy from Mienhuachieh on the 31st ultimo and took possession of the high lands on the north of that place.

In other directions there is no special change of conditions.

(Mienhuachieh is on the Kirin highway about 23 miles north-east of Kaiyuan. According to an official report published on the 22nd of March there was then a company of Russian cavalry in the place.—Ed. J.M.)

(Received at the Military Head Quarters on the 3rd instant.)

A part of our Kaiyuan column drove the enemy on the afternoon of the 2nd from Aihsinkau (about 33 miles north-east of Kaiyuan) and its vicinity. Otherwise the position has not undergone any special change.

At 5 p.m. on the 1st instant our outposts handed over to the Russians 101 men of their sanitary corps. They expressed great

gratitude for the treatment they had received at our hands.

(Received at the Military Head Quarters, afternoon of 4th.)

A part of the column that occupied Changtu drove the enemy from Tsulushu (about 20 miles north of Changtu) and from Sumienching (about 8 miles west of Tsulushu) on the 3rd instant and occupied these places. To-day (4th) at 12.30 p.m. the same troops drove the enemy from Shwangmiaotsz (about 6¼ miles south-east of Tsulushu) and pushed on to Santaokau. A body of our troops fired heavily on a force of the enemy some 500 strong retreating northward on the east of the railway and threw him into disorder.

(Received at the Military Head Quarters 5th inst. p.m.)

A part of our Kaiyuan column drove back the enemy in its front on the 4th inst. at 3 p.m. and occupied Kuyushu (about 4 miles north-east of Mienhuachieh.)

A force of the enemy comprising cavalry and artillery with quick-firers moved southward from Tawa by the Fenghwa highroad on the afternoon of the 4th instant, and at 8.30 a.m. on the 4th opened an attack against Kiukiatun. At the same time a large force of his infantry advanced by the Mandarin road and two other columns attempted to turn both our flanks. The enemy closed up to within about 400 metres, but at 6 p.m. our troops repulsed him completely. Our casualties in this engagement were 27 of all ranks. The enemy's losses are not clear, but judging from the number of carts he employed to carry off his killed and wounded he must have lost at least 200.

(RECEIVED AT THE FOREIGN OFFICE.)

## THE ITALIAN PARLIAMENT.

As the result of the elections for the Italian Parliament Sr. Forchis (?) was again called to power. On the 28th he organized a Cabinet, himself taking the place of Premier, and all the other portfolios remaining unchanged.

## RUSSIAN AFFAIRS.

A telegraphic agency wires from St. Petersburg as follows: "There is no truth in the Reuter's telegram that an intention exists to open peace negotiations. Russia has not formulated any peace terms nor has thought of doing so." A Havas telegram from St. Petersburg, dated the 29th, says that the position of affairs in the Caucasus is becoming very critical. The movement of rebellion has increased in violence, especially at Kodi, where insurrection is becoming general. The people unanimously repudiate Russian control and have proclaimed a popular administration. The troops in the district having refused to fire upon the people, the Government has been unable to quell the disturbance.

## GERMANY AND MOROCCO.

The German Chancellor, in a speech delivered in the Reichstag on the 29th, with regard to Germany's policy towards Morocco, made the following statement: It is not the time for me to make any detailed statement about the question of Morocco. Just a year ago the German Emperor declared to the King of Italy that Germany did not seek to obtain any territorial advantages in Morocco. After such a declaration it is idle to suppose that the Emperor's visit to Tangier is in any sense directed against the security of Morocco's territory or her independence. But, as in China so also in Morocco, Germany considers it as altogether advantageous that the open door should be preserved—in other words that equal com-

mercial rights should be secured to all nations. Her policy has not changed in that respect. Nevertheless should there be any change in Morocco's foreign relations, or any attempt to interfere with the open door policy in connexion with the financial development of that country, Germany will more than ever take care that her financial interests there shall not be impaired. Therefore, with regard to this matter the German Government will soon open negotiations with the Sultan of Morocco.

## THE BALTIC SQUADRON.

A telegram from Durban, dated March 29, says: The steamship *Dart* arrived at Durban on this date. She reports that on 19th in south latitude 9 and east longitude 53, namely at a point 250 miles N. E. of Madagascar, she saw a squadron of 30 warships, 14 colliers and some transports. The transports led, followed by the war vessels, with the colliers last. The squadron's rate of progress was so slow that those on board the *Dart*, which passed at a distance of half-a-mile, conjectured that the squadron was coaling at sea. The battleships and cruisers were painted ash colour, and had white funnels having a black band at the top. The squadron was heading N. E.

## RUSSIAN AFFAIRS.

The Russian Government has issued a proclamation with reference to administrative reform. It would appear that this is the result first of the people's daily increasing discontent at the dilatoriness of reform work, and secondly of indications that the spirit of rebellion grows always fiercer. The gist of the proclamation is this:—"The Committee is investigating the materials presented by the Home Department and is devoting careful re-consideration to questions already prepared. These materials and those presented by all classes of the people and corporations show very great discrepancies in import and details, and their arguments being from different points of view, branch off in many directions. Further, those engaged in the discussion are not the Government's representatives only; part is taken also by leading men in the various localities and by persons versed in education, so that the Committee's work is inevitably slow. The Minister of the Interior, with the object of fixing rules for convening the representatives of the people, will submit these rules to the council of Ministers, and will then lay them before the Special Committee organized under the provisions of the Imperial Ordinance of the 16th of the 3rd month.

Under the above circumstances the work of the various preparations will be completed in two or three months, and thereafter will be considered the question of devising means for carrying out His Majesty's desire to harmonize the interests of the State as a whole with the needs of the several localities."

The above seems to be an explanation of the delay that has taken place in giving effect to the celebrated Ukase. But, in view of the present state of affairs in Russia, such a proclamation will only have the effect of increasing the people's discontent.

## THE JAPANESE LOAN.

The Dutch subscriptions to the Japanese loan amounted to two million pounds sterling. The subscribers will probably receive from one-tenth to fifteen per cent. of their offers.

## GERMANY AND MOROCCO.

The German press treats very calmly the declaration made by the French Minister

of Foreign Affairs in the Senate with regard to Morocco. They contend that the declaration constitutes no explanation of the situation with regard to the relations between Germany and France.

The *Nord Deutsche Allgemeine Zeitung* clearly states:—"The French Foreign Minister did not go so far as to say one word with reference to Franco-German negotiations, nor did he even remotely hint that any expectation exists of such negotiations being soon opened. It may therefore be inferred that France and Germany will address themselves direct to Morocco as a diplomatically independent country.

#### THE RUSSIAN LOAN.

As a result of the floating of the new Russian domestic loan the bonds of the old loan have fallen generally in value. Thus the four per-cent. have fallen from 87 roubles to 84½, and the four per cent. debentures of the local banks from 87 roubles to 84 roubles. This sudden depreciation is attributed to the sale of the new bonds, and the newspapers universally condemn the Government's procedure. The result of the subscriptions to the new loan is not yet clear.

[The above contrasts remarkably with the *Hochi Shimbun's* telegram of yesterday, which represented the subscriptions as so large that the Government had been encouraged to continue the war with redoubled vigour.—Ed. J.M.]

#### THE THIRD RUSSIAN SQUADRON.

The Third Russian Squadron left Jibutl on the 4th inst.

(RECEIVED BY THE "HOCHI SHIMBUN.")

#### THE JAPANESE LOAN.

The Japanese Loan in London was subscribed to the extent of 180 million pounds. The continental subscriptions alone equalled the Japanese demand.

#### RUSSIA'S LOSSES.

The *Official Gazette* of St. Petersburg says that Russia during the last fourteen months has had a total of 435,000 killed, wounded and invalided.

#### GENERAL NEWS.

London, April 2.

The coaling steamers attached to Rojestvensky's Squadron have received orders to steer for Hongkong via Java.

The Baltic Fleet arrived to-day at Jiboutl. The hospital ship *Kosama* received a supply of coal and water at Perim.

It is feared in St. Petersburg that the Japanese army is making a turning movement westward of Chichihar against the Russian left. (? The Russian right.)

Ten trains, laden with ammunition and provisions, are leaving Russia daily for Vladivostock.

The French think that the action of the German Emperor is intended to stir up a revolt among the Moors.

Twelve plotters of revolution have been arrested in St. Petersburg.

#### RUSSIAN AFFAIRS.

London, April 4.

Subscriptions to the Russian domestic loan being very large, St. Petersburg has abandoned the project of making peace and has declared that the war shall be vigorously carried on, and that re-inforcements shall be sent to the Far East.

*Le Matin* vehemently attacks Russia's changeability and want of resolution. It further declares that Russia will merely exhaust herself by continuing the contest and that she can not possibly win.

The Siberia Railway Bureau has openly announced that the service of through goods trains eastward of Tchhelabinsk is suspended.

(Tchhelabinsk is the 4th station on the Moscow side of Irkutsk.—Ed. J.M.)

A special commission has been appointed in St. Petersburg to inquire into the surrender of Port Arthur.

Japanese bonds are quoted as follows in London:—

4 per cent.	£ 85
5 per cent.	£ 100
6 per cent.	£ 105

#### THE KAISER AND MOROCCO.

London, April 5.

*Le Temps* says:—"The statement made by the German Emperor at Tangier that France must be prepared to meet many difficulties in attempting to reform Morocco, was clearly inspired by unfriendly feeling towards France. That is undeniable. The Russian journals applaud the statement with delight, for they firmly believe that Germany's policy of protecting Islam is opposed to England above all."

The French newspapers predict that the result of the increasing *entente* between France and England will be a change in the balance of power in Europe.

#### AMERICA AND JAPAN.

Mr. Taft, Secretary of War, is officiating for the President during the latter's absence from Washington. The Japanese Representative had a long interview with Mr. Taft yesterday.

#### KING EDWARD'S TOUR.

The King of England is on his way to the Mediterranean to meet the Queen. His Majesty will probably visit the President of the French Republic in Paris.

(RECEIVED BY THE "ASAHI SHIMBUN.")

London, April 5.

The Russian Government is earnestly seeking to conciliate Finland. The military law enacted in 1901 has been practically abolished, and the dismissal of the judges who opposed the law has been revoked.

(RECEIVED BY THE "JIJI SHIMPO.")

#### THE "MARS."

Nemuro, April 5.

The steamer *Mars*, which was driven ashore by floating ice, has suffered more and more from the ice. Her machinery is badly damaged and she is partially sunk. Her captain is safe, but the navigating officer and an engineer were frozen to death in a boat.

#### NEWS OF THE WEEK.

The Crown Prince is reported to be suffering from a slight cold.

The *Asahi* believes that Lieut.-General Hana-guchi will shortly be appointed to an important post.

Silver bullion valued at yen 40,900, being interest on the Boxer indemnity, was brought on April 5th from Shanghai to Nagasaki.

About 4 pounds of new tea were manufactured on April 2nd at the village of Ihara, Shizuoka Prefecture and were brought to Yokohama. Owing to the cold weather, the first crop is three days later than last year. The quality was good.

Major-General Iguchi arrived on April 5th at Hiroshima from the front and immediately left for Tokyo. On the same day two British Army officers—one major and one captain—left Shimoneke for the front. On April 4th, Mr. K. Den, Vice-Minister for Communications, arrived at Dairen.

The S. S. *Brinkbank*, a steamer of 2,943 tons register, now in harbour, has been resold to Messrs. Watts, Watts of London. She was formerly the *Tottenham* and was sold by the latter firm to a San Francisco Company a few months ago who

loaded her with a cargo of cotton and provisions, it is stated, for Vladivostock. News of the recent seizures having reached the consignors she was sent to Yokohama and the cargo was purchased by the American Trading Company.

Nine guns, one ammunition wagon and 81 rounds of gun ammunition from among the spoils taken at Port Arthur were brought on April 5th to the War Department. These trophies have been selected, for presentation to the Emperor, by Baron Okazawa, Aide-de-Camp to His Majesty.

The Gunjin Izoko Kyugo-Kwai, which society under the presidency of Viscount Enomoto aims at relieving the families of poor men at the front, will hold a general meeting in the Buddhist temple Zojoji, Shiba, Tokyo, on April 21st, which is the anniversary of the declaration of peace in the Japan-China war. Counts Okuma and Itagaki, Major-General Nagaoka and other notables will be present.

According to the *Hochi*, since the outbreak of war, about ten million yen have been distributed among the families of officers and men who have died at the front. The military authorities are investigating the merits of non-commissioned officers and men who have died in the Mukden region in order to bestow posthumous honours. Some two thousand orders of the Golden Kite will be shortly conferred.

At the end of March, the stocks of cotton in Kobe and Osaka were estimated as follows: Kobe—Chinese, 15,427 bales; Indian, 44,469; and American, 9,662. Osaka—Chinese, 2,762 bales; Indian, 6,871; and American, 5,321. Stock of cotton yarn at Kobe was 1,054,359 piculs, and that in Osaka, 9,526 piculs. During March, the export of cotton yarn from Kobe to Korea and China was 56,100 bales, and from Osaka to the same countries 12,538 bales.

The crew of the S.S. *Tacoma*, seized on the 14th ult. off Shikotan Island will leave Yokohama on Friday in the S.S. *Empress of China*. The captured vessel was an old Cunard Liner and made several record passages across the Atlantic in the early eighties. Subsequently she made several trips to the Colonies, and was engaged as a trooper during the American Spanish war. She is considered a good prize notwithstanding her age and is pronounced by all to be a thoroughly good seaboat, and, as one of the crew observed, a good keepsake for the Japanese Government.

Calcutta, Medium to best ... 140.00 to 220.00

Madras (Dry Leaf), Medium to best ... 100.00 to 140.00

## EXPORTS.

## RAW SILK.

A dull market with small business. Prices nominally unchanged, but can be shaded by any real buyer. Spring reeling from Joshi have arrived and compare favourably with similar grades from Shinshu. A little business has been done in Five Girl chop at quotations. Prospect poor, and there seems likely to be no business of any moment until new crop. The spring is late, but so far no damage to mulberry trees is reported.

# Skin-Tortured Babies AND TIRED MOTHERS Find Comfort in Cuticura

INSTANT RELIEF and refreshing sleep for Skin-tortured Babies and rest for Tired Mothers in warm baths with CUTICURA SOAP, and gentle anointings with CUTICURA OINTMENT, the great skin cure and purest of emollients, to be followed in severe cases by mild doses of CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. This is the purest, sweetest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusted, and pimply humours, eczemas, rashes, irritations, and itchings, with loss of hair, of infants and children, yet compounded.

## MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chaffs, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the BEST skin and complexion soap, and the BEST toilet and BEST baby soap in the world.

**CUTICURA RESOLVENT PILLS** (Chocolate Coated) are a new, tasteful, odorless, economical substitute for the celebrated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials, containing 80 doses.

CUTICURA RESOLVENT is sold throughout the world. Australian Depot: J. T. T. & Co., Sydney. British Depot: J. T. T. & Co., London. French Depot: J. T. T. & Co., Paris. German Depot: J. T. T. & Co., Berlin. Sole Agents, Boston, U. S. A.

## WASTE SILK.

Purchases continue on a small scale. Good qualities are scarce and firm in price, while inferior sorts can be had the turn cheaper.

## NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL" must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, APRIL 15TH, 1905.

## MARRIAGE.

At the Union Church, Yokohama, on April 8th, 1905, ADELHEID GLAHN, daughter of C. Glahn, Yokohama, to WILLIAM RAY DEVIN.

## SUMMARY OF NEWS.

ON April 6th snow fell at Morioka and Uwajima.

NINETEEN cases of plague were reported on April 10th in Formosa two of which proved fatal.

MR K. DEN, Vice-Minister for Communications, arrived at Mukden on the afternoon of April 11th.

THE Railway Bureau intends to add one more train to the present four daily trains between Tokyo and Kobe.

AFTER a month's absence, the party that went to save the French cruiser *Sully* returned unsuccessful to Hongkong on the 28th ult.

MAJOR-GENERAL OKAZAKI, who is now in Tokyo on account of illness, being recovered, will leave on April 14th for the front again.

AT 10 a.m. on April 11th, fire broke out in the village of Nolate, near Aomori, destroying 53 houses including a primary school.

THE crop of new tea in Nagasaki prefecture is later than that of last year. The first shipment will probably be at the end of April.

K. OGAWA, one of the members of the Hiroshima Prefectural Assembly, was arrested on April 7th at Shimonoseki on a charge of fraud.

THE *Asahi* has a telegram from Yamaguchi that Major-General Yamada, Commander of the

21st regiment of infantry has been appointed to a certain duty; and that Major-General Sunaga has succeeded him.

FROM the outbreak of the war up to March 31st, the Naval Department received yen 505,631.50 for the sailors at the front.

IT is officially reported that Lieutenant Frank Marble, of the U.S. Navy, who is appointed attaché of the legation in Tokyo, has arrived.

MAJOR-GENERAL ALEXANDORF, who was captured at the battle in the Mukden region, arrived on April 9th at Ninoshima en route to Matsuyama.

A TELEGRAM from Taipeh, Formosa, reports that the new crop of tea has been put on the market. The price is lower than that of last year.

EARLY on the morning of April 9th, fire occurred at Kuroiso near Utsunomiya, destroying 83 buildings including the Government tobacco factory.

ON the morning of April 12th, a Russian prisoner at Sendai escaped, but some hours later was arrested at the village of Nakata not far from the city.

THE Emperor of Korea has decorated General Hasegawa, Commander-in-Chief of the forces in that country, with the Grand Cordon of the Plum-Blossom.

MAJOR-GENERAL OCHIAI, Chief of Staff of the forces in Korea under General Hasegawa, was expected to leave Seoul at 11 a.m. on April 13th for the frontier.

THE net profit of the Sanyo Railway Company for the second half of 1904 was yen 1,818,237.94 and the interim dividend was 5 per cent. (or 10 per cent. per annum).

IT is reported by telegram from Nagoya that two Russian officers were arrested on April 12th in a house of ill-fame at Kotobuki-ro. They had escaped from restraint.

THE *Nippon* has been prosecuted in the Tokyo District Court on a charge of having published news with regard to the movements of the squadron under Admiral Dewa.

A LETTER dated March 30th from a surgeon attached to one of the divisions at a place north of Tieling says that bad weather has prevailed there with snow for some weeks past.

AN official telegram from Yingkow says that five cases—4 Japanese and 1 foreigner from Shanghai—of small-pox have appeared there and one of the Japanese patients has died.

Z. KOMURA, a coolie, was arrested on the morning of April 4th in the compound of the Yokohama Customs. He had stolen a quantity of goods from the godown of Messrs. Helm Brothers.

M. OYAMA, an assistant accountant of the 11th Division (Managame) who recently absconded with some two thousand yen belonging to the office, was arrested on April 8th at Tokushima.

A HAMADA telegram reports that typhus is at present prevalent in the barracks of the 21st regiment and that consequently all uninfected soldiers have been removed to the neighbouring villages.

K. ISHII (23) an employee of Messrs. Andrews and George, No. 242, Yamashita-cho, Yokohama, was arrested on April 6th in the Kotobuki-ro, Maganecho, by the Kagacho police. He is charged with having stolen various bicycle acces-

sories from the stock of the firm valued at some thousand yen, and sold them to a bicycle dealer, K. Sakamaki, Ogimachi, Yokohama. The money obtained by this dishonest action he squandered on a girl.

A Gifu telegram reports that Y. Ibuka, a policeman belonging to the Gifu station, who recently stole yen 30,000 belonging to the 16th Bank and absconded, returned on April 6th and gave himself up.

LATEST news brought by the *Anton Maru* from Korean ports, states that Rear-Admiral Arai has commenced the work of floating the *Varyag* sunk at Chemulpo. Business at Chinnampo is generally inactive.

IT is reported by a telegram from Yokosuka that Lieut-General Murai, Commander of the Tokyo Defences, who was under treatment in the Yokosuka military hospital, died on the morning of April 6th.

THE Empress intends to present the order of the First Class of the Crown to the Crown Princess of Germany. The decoration is reported to have been taken by Prince Arisugawa who is now en route to that country.

THE *Nichi Nichi* says that the Minister for Agriculture and Commerce has decided to send Mr. Nakamura, one of the officials of the department, to Korea to investigate the condition of the agricultural industry there.

A RUSSIAN bluejacket in detention at Hamadera, says the *Osaka Jiji*, has been sentenced by Court Martial to ten months' imprisonment with hard labour on a charge of having stolen several kinds of goods valued at yen 240 from a military warehouse.

THE remains of Lieut-General Maeta, who died at the battle in the Mukden region, where he was Major-General; (after death he was promoted) were conveyed on April 10th to Osaka. The funeral will take place on April 23rd at Gojo, in the district of Uchi, Nara prefecture, which is his native place.

THE captured Russian steamer *Michael* has been chartered by the Department of Agriculture and Commerce. She was taken on April 6th from Saseho to the Innoshima yard. This ship was captured on Feb. 10th, 1904, off Changtsen-tun, Korea, on her way from Vladivostok to Shanghai with salt, whale-oil, bar-iron, etc. She is of 3,461 tons gross.

ON the evening of April 11th, a gambler, named Y. Shimada, murdered in Yanagimachi, Kofu, Yamanashi prefecture, a coolie, K. Enomoto, by stabbing him in the breast with a short sword and also inflicted injuries upon another man. The culprit was arrested on the spot. The cause seems to have been a trivial dispute after excessive drinking.

THE death is announced at Peking of the venerable Bishop Favier. His removal will be mourned by everybody in Peking as well as by his co-religionists all over the East. His long residence in the capital, his great abilities, and his unflinching courtesy and kindness, his intimate knowledge of, and sympathy with, the Chinese and their arts, had made him a power there with foreigners and natives alike. It will be remembered, says the *N. C. Daily News*, that he did everything he could to warn the Legations of the trouble that was coming from the Boxers, and his defence of the Peitang Mission was one of the most brilliant episodes of the siege in 1900. His death means a very great loss to the Church, and a personal sorrow to the Peking community.

## THE BALTIC SQUADRON.

Tuesday, April 11.

The United States Government has issued stringent orders to the Admiral on this station to take whatever steps may be required for enforcing strict neutrality in the Philippines. It is fully expected in America, adds the *Kokumin*, from whose telegrams we take this news, that Admiral Togo will achieve success in the pending important trial of strength.

From Hongkong comes a telegram to the effect that the *Glory*, the *Sutlej* and the *Iphigenia* have been ordered to proceed southward with all speed.

London wires that Rojestvensky's Squadron consists of 47 vessels, whereof 25 are transports. There remain therefore 22 fighting vessels. Of these 13, as tabulated by us yesterday, are battle-ships (7) and cruisers (6) and the remainder are torpedo craft.

As to the obvious question, why has Rojestvensky finally hastened eastward after so much previous delay, and why did he not wait for the Third Squadron which is actually on its way to join him, the *Hochi Shimbun* finds the answer in climatic considerations. From the end of April throughout the month of May the Indian ocean is subject to violent gales, and the Russian Admiral did not dare to expose his destroyers and torpedoers to this danger. Therefore he expedited his voyage. But he does not mean to fight until the third squadron joins him. He will seek shelter in Saigon or in some of the Borneo ports. Thus the problem of neutrality will now assume a vital character. The *Kokumin Shimbun* is evidently quite perplexed. It thinks that after steaming direct from Madagascar, a voyage of 22 days, Rojestvensky can not intend to give battle at once. Will he then loiter in the neighbourhood of Singapore preparatory to returning to Madagascar, or will he seek some new harbour of refuge pending the arrival of the third squadron? The *Kokumin* does not offer any definite conjecture. The *Nichi Nichi* thinks that the Russian Admiral will steer for Saigon, there to await the coming of the third squadron, and observes that as Saigon is within 3 days' steaming of Singapore, the facts must be known very soon. Our contemporary does not believe that with his present strength Admiral Rojestvensky intends to put his fate to the test. He will either seize some Dutch island or find a second Madagascar at Saigon. The true character of the neutrality observed by Holland and France will now, therefore, be exhibited. Japan can not suffer a repetition of the Madagascar drama in Far-Eastern waters. Too much will be at stake. The *Jiji Shimpō* writes in its usual moderate style. It believes that the Russian fleet has really come to fight for the command of the sea, and it applauds Admiral Rojestvensky's courage. For a time there was some appearance of hesitation, and in view of all the disadvantages under which he must labour the Russian Admiral's ultimate appearance in these waters was doubted. But he has come, and now the question is to give him a conclusive reception. Japan is prepared, and gladly goes out to try conclusions. If she crushes this squadron, she will have completely broken her enemy's power at sea, and not only will the war have thus been brought one stage nearer its conclusion, but commerce also will recover security. The *Asahi Shimbun* seems to think that in view of its inferiority and of the arduous circumstances it has to contend against, the Russian Squadron will make for Vladivostock.

Rojestvensky's hope is that, the Japanese fleet being now divided by the duty of watching Vladivostock, he may find an opportunity of slipping through the Tsugaru Strait or the Tsushima Strait. At any rate Caesar has crossed the Rubicon. The *Chuo Shimbun*, after formulating several plans which the Russians may adopt, selects as he most probable a division of their force, two or three ships being sent to the coast of Formosa or of Korea to create a diversion while the remainder steer to Vladivostock.

These various opinions reflect the perplexity caused by Admiral Rojestvensky's movements. It is to be observed, however, that unless he means to fight he will be practically forced to find a port of refuge without delay. For with such a large squadron as he leads, he can not possibly hope to conceal his movements. So long as the Japanese fleet was compelled to concentrate its attention upon Port Arthur, the Russian cruisers in Vladivostock were able to slip out secretly and prey upon commerce without encountering an enemy. But the whole of the Japanese fleet is now free. A cloud of vessels can watch the movements of Rojestvensky's numerous squadron, and nothing seems less probable than that he should succeed in reaching Vladivostock without a fight. Besides, what would he gain by entering Vladivostock? He would be sealed up there even more effectually than his predecessors were in Port Arthur, and unless he emerged and fought he might as well be lying in some Baltic port. As to the theory that he intends to find a second Madagascar where he may await the coming of the third squadron, and where he may refit, thereafter coming out to do battle, it need scarcely be said that any Power granting to him the hospitality of its ports for such a purpose will become, *de facto*, a belligerent. It is understood that the French Government has never admitted the presence of Rojestvensky's squadron in France's territorial waters. The theory was that his ships lay at anchor beyond the three-mile limit in some of the commodious bays formed by reefs abounding in those seas. Nothing of that kind is possible at Saigon. Unless a ship enter the river there is no safe anchorage, and thus the neutrality problem would immediately come to the front. It is incredible that France should openly violate her obligations in this matter, (having admitted them by construction in the case of Madagascar) and it is equally difficult to believe that the Russian Government has authorized its Admiral to forcibly violate Holland's neutrality. We are unable therefore to attribute any intention to Rojestvensky except the intention of fighting. It would be a daring stroke if he seized a port actually within Japan's dominions—a port in Formosa or the Pescadores—a daring but a suicidal stroke, which need only be considered to be condemned. There remains but one hypothesis, far-fetched and scarcely tenable for a moment, namely, that Russia has put this menace into the field by way of facilitating peace negotiations. We observe that some publicists are disposed to adopt that idea. But the essence of such a plan would be the possession of a base where the squadron could lie safely, pending the discussion of terms. From that point of view its presence in Vladivostock might be of use. But Rojestvensky, for the reasons stated above, can not hope to reach Vladivostock without fighting, and to fight and be defeated would certainly not facilitate the negotiations for Russia.

There is some uncertainty about the num-

ber of cruisers in the Russian Squadron. The *Asahi* and the *Nichi* include the *Izumrud* (3,200 tons) and the *Oleg* (6,500 tons), but our calculation is that these two vessels are with the Third Squadron. All accounts agree in placing the number of torpedo craft at 12 and these added to the 13 battle-ships and cruisers tabulated by us in our last issue, would make 25 fighting vessels; whereas London puts the total at only 22. This point must remain in doubt for the moment.

Wednesday, April 12.

There is an idea in some quarters that Rojestvensky's purpose may be to lie at the Anambas Islands until he is there joined by the Third Squadron. In such a position he would effectually control all commercial communication between Europe and Japan, and owing to the indirect pressure thus brought to bear on the latter, might compel her to send her fleet in search of him in those distant waters. But it must be at the least six weeks before the vessels which have just passed Jibuti can join Rojestvensky, and it seems scarcely possible that he should remain at the Anambas Islands for all that time. The situation is well chosen as commanding the Straits of Malacca, but the islands are within Dutch territorial waters and can not be used by the Russians at their own convenience. Besides, the trade of Europe with Japan is now carried entirely in neutral bottoms, with which Russia will not be disposed to meddle after her experience in the North Sea. The *Jiji Shimpō* thinks that the halt at the Anambas is of an essentially temporary character, being merely for the purpose of obtaining coal and water. But our contemporary does not credit Rojestvensky with the purpose of coming on boldly to fight; he must have a base, and since he can not obtain one either from France in Indo-China, or from America in the Philippines or from Holland in the Indies, he will probably take one by force from China. It is mentioned in connexion with this that M. Lessar recently applied to China for the lease of a port in Fukien province. That rumour is confirmed by the *Kokumin Shimbun* which has a telegram from Peking dated the 11th instant, saying that the application had just been made by M. Lessar and had been emphatically refused by China. But Rojestvensky must have a base, and the question is will he seize one in Chinese territory. It is scarcely credible that he should do so. Very grave complications would ensue, for the Powers would certainly not sit with folded hands in face of such a flagrant and forcible violation of China's neutrality. Of course it is just possible that the St. Petersburg Government may have been leading up to something of this sort when it again and again made factitious representations to the Powers about alleged Japanese violations of Chinese neutrality, but these representations were not only effectually refuted but also were dismissed by the world as absurd, and at any rate there is a vast difference between acts such as enter into the history of all wars fought on soil foreign to both the belligerents and the deliberate seizure of a neutral's ports for warlike purposes. We do not look therefore for an incident of that kind in Fukien. All this, however, does not bring us nearer to a solution of the mystery involved in Rojestvensky's proceedings. He appears to be in the situation of the drunken man at the lamp-post, unable to go on lest he fall and unable to remain lest he be famished. One telegram from Hongkong

says that his ships presented a very dirty appearance as they passed Singapore and that they steamed at a speed of only 8 knots. But of course such details, though not without interest, are inconsequential, especially the statement as to speed. There is one obvious difference between the Anambas Islands and Madagascar, namely, that whereas the latter is quite beyond the range of ordinary observation, the former are almost in the fairway of one of the busiest sea-routes in the world. Rojestvensky will be under the observation of innumerable steamers so long as he lies where he is, and will also be under the observation of British war-ships which will take care that he does not repeat the act for which he is already under sentence and should, indeed, be undergoing punishment.

A Japanese naval officer speaking in the columns of the *Nippon* and the *Shogyo*, expresses the opinion that Rojestvensky has not come to fight, if he can avoid fighting. His object is to get his ships safely into some port whence they can exercise an influence on the situation by menacing Japan's maritime communications. In short, without attempting forcibly to deprive her of the command of the sea, the Russian Admiral will seek to nullify the advantages of that command. Vladivostok would obviously be the port to reach, but since to get there would be almost impossible without making heavy sacrifices en route, Rojestvensky will probably seize some Chinese port and make it his base. This is merely a repetition of the view with which we have already dealt, and it may be added that the neutral Powers are not at all likely to acquiesce in the use of a Chinese port for the purpose of harassing their over-sea commerce. The *Nippon's* informant adds that Rojestvensky must have plans more or less feasible. That is true, and that it is which leads special interest to his procedure. But so long as every analysis of his plan involves the hypothesis of a neutral port being seized and converted into a permanent naval basis, it is hard to be convinced. The view taken by the *Fiji* is that Rojestvensky will anchor somewhere in the neighbourhood of Borneo or Indo-China and there await the coming of the third Squadron, meanwhile employing his fast cruisers to harass trade. Had his objective been Vladivostok he would never have chosen a route which exposed his movements to all the world. The fact is, however, that all our Japanese contemporaries are perplexed, and so is every on-looker.

Thursday, April 13.

London (*Hochi Shimbun*) says that Rojestvensky has divided his squadron. He has himself taken 5 battle-ships to Muntok in Banka Island, and has sent on another battle-ship with some cruisers under Rear-Admiral Enkvist to the Anambas Islands. His project, we learn from the same source, is to await an attack from the Japanese fleet in this position, the idea being that if Togo assaults the Russian main squadron, then the Anambas section can close in on him from a more accessible point.

Such a theory seems quite fantastic. In the first place, if Rojestvensky's main force is in the harbour of Muntok, he is in Dutch territorial waters and is therefore secure against attack. His Rear-Admiral also is probably within neutral waters at the Anambas Islands, though that can not be taken for granted. In the second place, Rojestvensky can not possibly imagine that the Japanese will go to seek him in those distant waters. If he wants to fight he must enter the field.

The more general view appears to be that the Russians have Saigon for immediate objective, and that they will coal and water there.

The *Yomiuri Shimbun* has a story that a section of Rojestvensky's vessels became separated from the main fleet in the Indian Ocean, and proceeding to the Straits of Sunda by mistake, encountered there a Japanese naval force. This is probably one of many rumours that may be expected to fill the air during the next few days. Thus there is a tale in Yokohama that a steamer laden with Rangoon rice for Japan was sunk by the Russians somewhere near Singapore. No credit can be placed in that tale. The Russians are no longer likely to sink merchant-steamers unless they belong to the Japanese.

In the *Shogyo Shimpō* it is alleged that the presence of the Russian Squadron in the Straits of Malacca need not inconvenience the import trade. All iron articles ordered abroad by Japan have either arrived or have reached Hongkong. Ample stores of rice have been received. As for raw cotton, there are shippers prepared to forward this staple without covering war risks, and at any rate the spinners will not be in any want before autumn.

We have already observed that Rojestvensky's progress after leaving Madagascar was exceptionally rapid as compared with his previous rate of progress. It appears that, according to some authorities who have seemingly given the matter much thought, the date of the squadron's departure from Madagascar has probably been wrongly stated; Rojestvensky set out thence on the 6th of March or on the 9th at latest. Connected with the new assessment of date, there is another theory; a theory which accounts for the fact of Rojestvensky's coming at all. That theory is that the Tsar had received from Kuropatkin a highly favourable forecast of the results of the Japanese attack at Mukden, and His Majesty consequently ordered Rojestvensky to hasten eastward in order to take advantage of the confusion into which the Japanese authorities would have been thrown by a heavy defeat in Manchuria. Rojestvensky accordingly left Madagascar under this impression, which was not corrected until the steam-launch sent out by the Russian Consul at Singapore reached the Admiral's flag-ship. Such being the case, some imagine that he may return without attempting anything, but others believe that he can not now exercise any discretion of that nature.

This theory is not inconceivable, but against it has to be set the fact that as early as March 2nd very pessimistic views prevailed in St. Petersburg about the issue of the Mukden Battle, and the Tsar can scarcely have entertained any confident hopes up to so late a date as the 4th or 5th. The probability is, therefore, that Rojestvensky knew the result of the Mukden fight before he left Madagascar, and that his adventure is a deliberate attempt to retrieve a seriously compromised situation. We had always ourselves imagined that the coming of the Baltic Squadron would synchronise with the time Kuropatkin had fixed for assuming the offensive, namely, the early part of April. A big squadron of war-vessels and transports can not be got ready for sea at a moment's notice. The time for Rojestvensky to leave Nasse Be had doubtless been approximately fixed before the battle of Mukden commenced. Was he then to be detained, or even ordered to turn back, because the

issue of the battle looked bad? Surely not. That he should turn back was never really conceivable. To have abandoned the expedition after despatching the squadron as far as Madagascar would have been a heavier blow to Russia's prestige, a more emphatic confession of impotence, than even a defeat. But why not wait for the third squadron? That is the one question difficult to answer, unless we conclude that from the nature of the vessels composing the third squadron Rojestvensky did not regard them as likely to strengthen him materially. He is taking a big risk, but that he acts under explicit orders from St. Petersburg can not be doubted, and there is always the element of a favourable chance. When we consider how immensely the situation would be changed by anything like a Russian victory at sea, it becomes easy to understand that with so much in the pool Rojestvensky may have been directed to go in even with a comparatively poor hand.

The *Nichi Nichi Shimbun* compares the Baltic Squadron to the Spanish Armada, and hopes that it will meet with the same fate. The *Fiji Shimpō* writes with a very pressing sense of the importance of the crisis, and urges Japanese naval men not to be too confident.

Mr. Uchida, Japan's Representative in Peking, is said to have called the attention of the Chinese Government to the importance of taking care that the *Askold*, the *Manjur* and the *Grosvoy* do not leave Shanghai to join Rojestvensky.

There appears to be a general impression that the Russians, in the desperate extremity of being unable to dispense with a port of refuge, will not hesitate to violate China's neutrality. At any rate, should a battle take place, it will probably be followed by several incidents of the nature of those witnessed formerly at Chefoo and Shanghai.

The names of the Russian Second Squadron under Rojestvensky are now stated to be as follows:—

#### BATTLE-SHIPS, SEVEN.

*Kniaz Suvoroff* (Admiral Rojestvensky's flag-ship).  
*Alexander III.*  
*Borodino.*  
*Orel.*  
*Sissoi Veliky.*  
*Oslabiyev* (Flag-ship of Rear-Admiral Folke-salm).  
*Navarin.*

The total displacement of the above is 87,344 tons.

#### CRUISERS, EIGHT.

*Aurora.*  
*Oleg.*  
*Dimitri Donskoi.*  
*Svetlana.*  
*Zemichug.*  
*Taumrud.*  
*Almaz.*  
*Admiral Nakhimoff* (flag-ship of Rear-Admiral Enkvist, second in command of the Squadron).

These eight cruisers have a displacement of 41,291 tons, and thus the displacement of the battle-ship and cruisers together is 128,636 tons.

#### AUXILIARY CRUISERS, SIX.

*Don.*  
*Udal.*  
*Terek.*  
*Kuban.*  
*Rion.*  
*Donipole.*

The total displacement of these is 45,130 tons.

#### SPECIAL SHIPS, TWO.

*Okean.*  
*Kamchatka.*

The Third Squadron, which has not yet joined Rojestvensky, consists of:—

#### BATTLE SHIPS, THREE.

*Slava.*  
*Alexander II.*  
*Nicolai I.*

These three have a displacement of 32,354 tons.

## CRUISERS, FOUR.

*Pamiat Azova.*  
*Vladimir Monomakh.*  
*Admiral Korniloff.*  
*Asia.*

These displace 20,579 tons.

AUXILIARY CRUISER, ONE.

*Russia*, 5,383 tons.

SPECIAL SHIP, ONE.

*Okean*, 11,897 tons.

(This vessel is mentioned as belonging to the Second Squadron also).

A most eloquent list is published by *The Times* :—

The following is a list of the steamers belonging to or chartered by the Hamburg-American Line which cleared from Cardiff from September, 1904, to January, 1905, with coal for the Baltic Fleet. In the majority of cases the coal has already been delivered at some point along the route :—

Date.	Name of Vessel.	Description.	Tons of Coal Carried.
Sept. 26	...Roddam	Chartered	3,000
" 26	...Pallas	"	3,000
" 28	...Milos	"	4,000
" 29	...Hans Menzell	"	3,500
" 30	...Elisabeth	"	3,400
Oct. 2	...Capt. W. Menzell	"	3,300
" 5	...Bylgia	"	3,200
" 5	...Ascania	Own vessel	2,800
" 8	...Jupiter	Chartered	2,600
" 8	...Ithaca	Own vessel	2,400
" 9	...Rauenthaler	Chartered	3,800
" 10	...Providentia	"	4,500
" 10	...Ingrid Horn	"	3,000
" 11	...Teviotdale	"	5,400
" 12	...Therese Horn	"	4,500
" 12	...Asia	Own vessel	5,000
" 11	...Aberlour	Chartered	6,400
" 14	...Woglinde	"	3,000
" 15	...Castilia	Own vessel	4,100
" 15	...Dortmund	"	7,000
" 17	...Tapien	Chartered	5,400
" 25	...Bethania	Own vessel	10,300
" 26	...Oceano	Chartered	7,200
" 27	...Acilia	Own vessel	8,000
" 27	...Frankly	Chartered	6,800
" 27	...Bosnia	Own vessel	11,000
" 27	...Artemisia	"	8,000
" 28	...Conway	Chartered	6,200
" 28	...Hercules	"	6,200
" 29	...Balavia	"	12,500
" 29	...Secunda	"	3,000
" 29	...Pofonin	"	4,000
" 31	...Alexandria	Own vessel	8,000
Nov. 5	...Cimbria	Chartered	4,000
" 10	...Irngard Horn	"	2,500
" 16	...Hurstdale	"	4,800
" 18	...St. Leonhard	"	6,400
" 19	...Carl	"	5,000
" 23	...Yeddo	"	7,000
" 24	...Claverley	"	5,000
" 30	...Bulgaria	Own vessel	12,300
" 30	...William Storrs	Chartered	5,000
Dec. 3	...Adenia	Own vessel	9,200
" 5	...St. Ninian	Chartered	4,600
" 5	...Kas Dara	"	6,000
" 7	...Rengalia	Own vessel	10,400
" 8	...Sandyford	Chartered	5,300
1905.			
Jan. 7	...Chemnitz	"	3,000
" 9	...Hersilia	"	2,600
" 13	...Mecklenburg	"	2,400
" 13	...Pisa	"	4,700
" 29	...Macedonia	Own vessel	5,000

The following vessels, laden with Westphalian coal, left Emden (except where another port is specified) between September, 1904, and January, 1905 :—

Date.	Name of Vessel.	Description.	Tons of Westphalian Coal Carried.
Sept. 28	...Orion	Chartered	2,200
" 26	...Ceres	"	2,200
" 29	...Johannesberger	"	3,400
Oct. 14	...Teria	"	5,700
" 17	...Frisia (from Amsterdam)	Own vessel	4,700
" 18	...Mecklenburg	Chartered	2,200
" 20	...Dacia	Own vessel	4,000
" 23	...Hersilia	Chartered	2,600
Nov. 2	...Abessinia	Own vessel	6,300
" 23	...Cronshagen	Chartered	2,200
" 23	...Mimi Horn	"	3,700
" 26	...Hoerde	Own vessel	5,500
Dec. 5	...Hermann (from Rotterdam)	Chartered	2,600
" 7	...Mara Kolb	"	3,300
" 12	...Hornstein	"	3,500
" 18	...Helene Horn	"	1,700
" 20	...Seiphos	"	3,300
" 22	...Milos	"	3,400

Dec. 23	...Jupiter (from Rotterdam)	Chartered	2,000
" 24	...Hilda Horn (from Amsterdam)	"	2,000
" 24	...Vesta (from Amsterdam)	"	2,000
" 24	...Heinrich Horn	"	2,000
" 27	...Neptun	"	2,000
" 29	...Prim	"	2,000
" 29	...Russia	"	2,000
" 29	...Marie	"	2,000
" 29	...Barcelona	"	3,000
" 31	...Caledonia	"	2,000
1905.			
Jan. 4	...Hornburg	"	4,000

Friday, April 14.

A *Fiji Shimpo* telegram from London says that Rojestvensky has changed his flag from the *Kniaz Suvaroff* to the *Aurora*. The *Aurora* is a first-class cruiser of 6,630 tons, launched in 1900 and having a nominal speed of 20 knots, whereas the *Kniaz Suvaroff* is a battle-ship of 13,519 tons with a speed of 18 knots. The purpose of such a change is not immediately apparent. Had the *Suvaroff* been injured in any way, Rojestvensky might have been expected to change his flag to one of her three sister-ships, the *Borodino*, the *Alexander III*, or the *Orel*. It would look as though he contemplated some special operation with his cruisers.

An Englishman who saw the Russian ships at Madagascar is quoted by the *Hoch* as speaking in somewhat disparaging terms of their condition, but stories of that nature must be largely discounted.

As to the danger to Japanese mercantile shipping, it is observed that the Government's warnings not having always proved quite timely in the past, ship-owners are on this occasion adopting precautions on their own account. Many eyes are directed towards the action of the Nippon Yusen Kaisha. The great company, however, has no steamers running at present to Bombay, Australia or Europe, and consequently its vessels are not immediately menaced by Rojestvensky's presence in the Straits of Malacca or their neighbourhood. The Formosan line, however, might be endangered were the service regularly continued. It happens just now, however, that the Company's steamers are on their return voyage hence, and the first to proceed southward would be the *Satsuma Maru* on the 18th instant. There will be time enough to stop her if necessary. The Manager of the Ship-owners Association (*Senshu Domei-Kai*) is quoted as stating that the projected voyage of the *Togo Maru* to the Philippines will be suspended for the present until the movements of the Baltic Squadron become more distinct, and that the services to the Philippines, Bombay and Saigon will be stopped. As to Formosa, however, there is still an interval of safety. Everything south of Hongkong is dangerous, but the Formosan waters will be secure for a time. The Osaka Shosen Kaisha also is suspending all its southward sailings subsequently to the 11th instant. A steamer carrying cotton left Bombay on the 25th of March and probably got through the Malacca Straits before Rojestvensky arrived there. But there are five steamers that left on the 29th of March or at later dates—the *Ufina*, the *Crown*, the *Macassar*, the *Spithead* and the *Banka*—, carrying some ten thousand bales of cotton. These vessels may have trouble in getting through. Other vessels from Bombay would have followed in May, but there is time to suspend their sailing if necessary. On the whole the trade most likely to suffer by the appearance of the Baltic Squadron upon the scene is that of the cotton-spinners.

It may be reasonably doubted whether the

Baltic Squadron will pay much attention to merchant vessels. The question of coal is likely to prove so serious that Rojestvensky will not allow anything to turn him from his path. He has now some 3,000 miles to cover before reaching Vladivostock, even supposing that he steers through the Tushima Strait, his most direct route. His four chief fighting ships can carry 1,250 tons of coal in their bunkers, and that would enable them to cover 8,500 miles at their most economical speed, 10 knots, which means a voyage of 12 or 13 days. But if they fall in with the Japanese, and have to fight, they will be obliged to develop their utmost speed, and in that event the coal problem would become very serious. It is one thing to coal at sea when beyond the range of an enemy's guns, but it is a very different matter to be obliged to undertake such an operation in hostile waters. This point must greatly influence Rojestvensky's course. He must contrive, if possible, to avert the necessity of coaling at sea from the time of leaving the neighbourhood of Saigon until the moment of his arrival in Vladivostock. Therefore he will not go out of his way to look for merchant vessels. If they cross his path he may sink them, though even that would depend upon whether he desired to avoid disclosing his whereabouts.

The point of immediate interest is whether Rojestvensky will respect Dutch neutrality or whether he will remain at Muntok in Banka as he did in Madagascar. Muntok, as the *Nichi Nichi* remarks, has everything to recommend it. It is an excellent harbour, in telegraphic communication with the world, and as it lies about mid-way between the Straits of Malacca and the Straits of Sunda, it is admirably suited for the purposes either of a rendezvous or of a retreat. But will the Dutch allow Rojestvensky to convert the port into a naval base? At Madagascar there was always some doubt about the exact locale of the Russian squadron—doubt sufficient at all events to enable the French Government to deny that the neutrality of their territorial waters was being violated. But there can be no doubt about Muntok. What then will the Dutch do? It may prove a very serious thing for Holland to provoke Japan's hostility. Not, perhaps, immediately serious, but certainly serious in the future. The Japanese are not likely to forget those that treat them with open hostility at this crisis of their national history. But apart from that prudential consideration, the Government of Holland will doubtless insist on its neutrality being respected, and Russia, it may be presumed, will not deliberately fly in the face of international law. She stands before the tribunal of Europe and she can not afford to proclaim herself a deliberate law-breaker. The alternative is that Rojestvensky's ships must advance boldly and challenge a decisive fight. The *Fiji Shimpo* expects that result, and reminds the Japanese navy that they carry the fate of the empire on their shoulders. In the interval pending the fight, Japanese commerce may suffer some losses, but that is to be regarded as the fortune of war. The *Nippon*, however, thinks that the Russian Admiral will not join battle for a considerable time. Another month will probably elapse before he discloses his real purpose. But our contemporary does not minutely discuss the question of where he is to remain in that interval. He can not go about from port to port staying 24 hours at each, and if he anchors for a month in any one harbour, the Power within whose territory he lies will become a *de facto* belligerent.

## THE MILITARY SITUATION.

Friday, April 7.

In the face of rumours from Chinese sources to the effect that the Russians are completely broken, the official report received on the 6th will probably be received with surprise, for it indicates that the Russians are not only in an unshattered condition but even have strength to assume the offensive. No careful reader of the story of the Mukden battle, however, can suppose that Linevitch's troops are in the condition described by the Chinese, and, for the rest, the attack made against Kinkiatun on the 4th instant is to be interpreted rather as a desperate attempt to momentarily check the Japanese advance than as a deliberate assumption of the offensive. The number of Russians engaged appears to have been about 3,000, and their object evidently was to hold back the Japanese from Fenghwa which is at a distance of 48 miles north of Kinkiatun and which constitutes one of the important commissariat stations of the retreating army. It is believed that the Russians have from 7,000 to 8,000 troops at Fenghwa, and that a strenuous effort is being made to carry off the stores accumulated there. To gain time for the latter operation a counter attack like that made on the 4th from Tawa against Kinkiatun was an ordinary manoeuvre. Some regard the movement as merely a reconnaissance in force, but that view is difficult to reconcile with the action of the Russian troops. So far as can be judged the Japanese armies are advancing steadily though not with any great rapidity. It had been supposed that the spring thaw would necessitate a halt, but such does not seem to be the case, though doubtless the condition of the roads at present must constitute a great difficulty. It is expected that the next point reached by the Changtu column will be Supingchieh, which is on the Mandarin road at a distance of 18 miles south of Fenghwa.

We recently published a brief account of a remarkable cavalry ride made by a detachment of 150 troopers under Major Naganuma. This *teishintai*, as the Japanese designate such a force, set out from Sumapau on the 9th of January and returned on the 13th of March, having cut the railway at Hsingkai, a few miles south of Changchun. It appears that another cavalry force, doubtless of similar dimensions, rode out of Yingkow on the 15th of January under the command of Major Hasegawa, having for objective to harass the Russian communications. When Major Hasegawa invited volunteers to take part in this perilous expedition he was inundated with names, just as Admiral Togo had been when the blocking expeditions at Port Arthur had to be undertaken. The consequence was that many applicants had to suffer bitter disappointment, and one of Major Hasegawa's most difficult duties was to make a selection such as would not seem invidious. The *Nichi Nichi Shimbun*, which mentions this enterprise, gives only meagre details. The main points are that the troop left Yingkow on the 15th of January and did not return until the 15th of March. In that long interval they had penetrated nearly as far as Harbin, had sustained and made several attacks, had inflicted considerable injury on the railway and had created much alarm in the Russian rear, yet their losses did not exceed 8 men. This extraordinary ride ranks with that of Major Naganuma's troops as among the most brilliant feats of the war. The *Nichi Nichi*

*Shimbun* justly classes such enterprises in the same category as the blocking operations at Port Arthur. Evidently the hardships attending such a ride in mid-winter are immense, for the men had to depend entirely on the resources of the country for sustenance, and were precluded from anything like high-handed requisitioning which would have immediately excited the hostility of the people and led to betrayal. Nothing indeed, is more wonderful than the fact that concealment should have been possible for such a lengthy period. It indicates that the hearts of the Chinese were with these bold riders, and it recalls events little noticed by history, the noble fidelity of the Chinese in now remote days who for months and years gave faithful shelter to Christian missionaries proscribed by the officials of the empire.

St. Petersburg, according to telegrams received by the *Jiji Shimpō*, is surprised at the silence of General Linevitch—surprised but not disheartened, for the public are said to interpret this lack of information as a sign that General Linevitch in planning some great counter-coup which will effectually turn the tables on the Japanese. But side by side with this hope there is published an estimate from a military quarter that the Japanese will enter Kirin on the 20th of March and Harbin on the 6th of April. The expert who makes this precise calculation must be a man of remarkably accurate judgment. As to Linevitch, one thing quite certain is that if he had anything favourable to report, he would lose no time in reporting it. St. Petersburg is in crying need of some crumb of comfort, and Linevitch has his own spurs to win. That he is struggling hard to re-organise there can not be any doubt, but as to his attempting any great and secret enterprise, nothing seems less probable.

Saturday, April 8.

It appears to be generally believed in military circles that Linevitch has by this time reformed his units and that he contemplates making his first line of defence, as hitherto anticipated, in the Changchun and Kirin region, with his main position at Harbin. The distance from Changchun to Harbin—over 160 miles—seems too great to render that programme convenient, but such is the forecast at present.

Spring has apparently been late in visiting Manchuria, but the thaw is now said to be setting in.

The Government in Peking is said to have telegraphed to the local authorities at Kirin directing that all traffic of Chinese craft on the Sungari river be suspended, in order to prevent the use of such craft by the belligerents. But it is quite plain that this order can not be effectively obeyed. The Russians will requisition native boats at their convenience.

The *Jiji Shimpō's* Mukden correspondent relates several instances of disgraceful conduct on the part of the Russians. The first is a somewhat complicated story, the gist of which is that among the alleged surgeons and assistants of the Russian medical corps left behind in Mukden, 12 men were found who really belonged to the combatant branch. These men kept up the deception until they realized that they were about to be returned to their own army when they confessed their true status and asked to be sent as prisoners to Japan. Another point noted by this correspondent is that in spite of the strenuous denials of a Russian General who is among the prisoners, no doubt can be entertained as to the truth of the report

that after the battle of Heikautai a batch of 120 Japanese prisoners were paraded through the streets of Mukden after the manner of condemned criminals. The correspondent says that in view of the unanimous testimony of numerous Chinese eye-witnesses, this disgraceful affair must be taken as proved. Finally there is a fresh case of flagrant abuse of the white flag.

But it is plain that the world has determined to receive with indifference all accusations of this nature where Russians are the accused. If any such charges could be preferred against the Japanese Continental Europe, at any rate, would probably give itself a great deal of concern to denounce their perpetrators. Europe, however, is a great respecter of persons. In the South-African war the German press threw its whole strength into one of the cruellest and most shameful assaults upon British humanity that disgrace the pages of history. But the German press remains indifferent to Russian misdeeds in the present war, and we are bound to say that the press of other countries follows suit. There has been no Occidental eye-witness. That seems to be the explanation.

Six Chinese, convicted on unimpeachable testimony of having acted as Russian spies and assisted the attacks against Haicheng and Newchwang, were recently put to death in Liaoyang.

With reference to this subject a strongly worded proclamation has been issued by the staff of the Japanese armies. Its language amounts to an accusation that the Chinese of Manchuria have hitherto been deliberately siding with the Russians. Who was it, the document asks, that assisted to construct the stake-pits, the *chevaux de frise*, the palisades, the obstacles of all kinds with which the face of the country is covered? Who was it that collected mountains of provisions and clothing for the use of the Russian troops? The people of Manchuria seem to have been egregiously misled in discriminating between the Japanese and the Russians. They have sided with their enemies against their friends. They are now advised to exercise a wiser choice, and they are warned that no excuses will be tolerated should such conduct be repeated. To aid their selection they are reminded that never once on sea or on land have the Japanese suffered a defeat at the hands of the Russians, and they are promised that final victory for the Japanese will ensure to every inhabitant of Manchuria freedom to pursue his avocation in peace and safety.

Prince Leopold has arrived in Peking, and has been received by the Chinese Emperor in audience. The Prince left Germany with the intention of joining the Russian army, but that is now a matter of some difficulty. The idea is that he will have to proceed through Mongolia *via* Chiangukiakau. The fact that the Russian Authorities gave their consent to the Prince's project was naturally interpreted as an evidence that they had much faith in the situation at that time. Indeed everything goes to show that had Kuropatkin been left unmolested for another month, he would have struck the offensive blow from which such great results were anticipated in Russia. But Kuropatkin never could manage to be in time. Perhaps the fault must be attributed to circumstances over which he had no control. There is one thing to be said, however. At Heikautai he made a deliberate onset. He might have delayed it had he been so minded, but he decided to essay the enterprise. When he adopted that

decision he must have been well aware that danger to his own centre would result from any large diversion of force to either of his wings. Yet we find him pleading danger to his centre as a reason, apparently unexpected, for not sending succour to Gripenberg. In a word, he did not provide for precisely the contingencies which must of necessity arise. We look in vain for some evidence of the qualities that constituted his alleged greatness as a General.

Captain Count Keller, son of General Keller, who met his death in the Yangtszling battle, was among the prisoners taken at Port Arthur and, subsequently released on parole. He is now in Shanghai, and it is related that he expresses regret at having survived the General. He speaks in the highest terms of the treatment accorded to him by the Japanese.

From the 20th instant the military government at Dairen will be exchanged for a civil administration. Mr. Maeda Masana is expected to be appointed chief of the latter.

The *Chuo Shinbun* says that the Government is about to suspend the export of copper from Japan, the available supply being needed for the purposes of the war. This language is perplexing. If the Government wants the copper, and is prepared to pay such prices as will make it worth the producers' while to sell at home instead of exporting abroad, nothing is needed except to buy. But to talk of "suspending" the export is obviously a false use of terms.

Sunday, April 9.

Accounts are beginning to arrive of the great commissariat difficulties attending the advance of the Yalu Army from its landing place to the position where the fighting began on the 20th of February. The *Nichi Nichi Shinbun's* correspondent writes an interesting letter on the subject. We learn from him that much assistance was given by a military line which had been laid for a distance of 100 miles as far as Penhsihu. Nevertheless, this effort of moving an army through mountains in mid-winter proved enormously arduous, and its success speaks much for the organizing ability of the Japanese and the endurance of the troops.

A *kanjo* has been awarded to a regiment of the Army under the command of General Nozu for extraordinary exertions in the pursuit after the battle of Mukden. This regiment succeeded in placing itself across the path of the Russians retreating westward of the railway. There for three hours it sustained the attack of a greatly superior force at close quarters, finally compelling the enemy to fly in confusion, abandon his original direction and leave large quantities of stores. We gather that this regiment belongs to the Kumamoto Division.

A prominent Japanese general officer who has just returned from the front is represented by the *Kokumin* as saying that General Kuropatkin's value as a leader seems to have been considerably over-rated. He never succeeded in discovering where the main strength of his opponents was concentrated in the recent battle, and the consequence was that in his condition of doubt he could not adopt any decisive measures. Much of the blame for this want of perception is doubtless attributable to his staff, but he himself must also be held responsible. He is probably a good military organizer, but as the leader of a great army in the field, he leaves much to be desired.

General Kharkevitch reports—according to Reuter—that the Japanese have been

obliged to retire from a place which we identify as Rhtaohotsz to a place which is evidently meant for Tsulushu. But Japanese official reports state that no signs of the enemy were seen on the 6th instant through a space  $7\frac{1}{2}$  miles north of Kinkiattun. This is entirely inconsistent with the statement of Kharkevitch.

Wednesday, April 12.

As to General Kharkevitch's report that he has driven the Japanese back to Tsurushu, the obvious explanation, furnished by a military officer, is that the Japanese occupied Tsurushu on the 3rd instant; that they have not made any advance beyond it, and that scouting parties, pushed out by them on the 4th, retired to Tsurushu on observing the presence of the enemy in some force. We know from Japanese official reports that attempts made by the Russians to re-capture Kinkiattun and Tsurushu failed completely. These attempts took place on the 4th and 5th. Kinkiattun is on the road from Faku-mun to Fenghwa, and Tsurushu is on the road from Changtu to Fenghwa. If Linevitch calls it a victory to have unsuccessfully attacked places occupied by the Japanese, and if he claims to have driven them back from positions to which they had not advanced, there is no occasion to disturb his complacency.

At present the position seems to be that one Japanese column is at Kinkiattun and another at Tsurushu, and that the Russians have a force at Pamienching confronting the former, and a force at Fenghwa confronting both. Pamienching is more than a village. It has a thousand houses, and is a place of some importance.

Tokyo journals quote a military opinion to the effect that although some 200,000 Russian troops retreated from Mukden, probably not more than one-fourth of them are fit to enter the fighting line immediately. Hence it is not probable that Linevitch can muster more than 100,000 men for defending the Changchun-Kirin line, and such a force could not check the advance of the Japanese armies. The probability is, therefore, that he will make his strong stand along the Sungari, south of Harbin. The beginning of July is expected to see a battle in that quarter, a computation which allows some 80 odd days for the Japanese to cover the distance now separating them from the Sungari—a distance of about 145 miles. Such a rate of advance may seem very slow but large allowance is made, of course, for the impossibility of moving great bodies of troops during the wet season, and for the contingency of minor fights *en route*.

#### THE DOMESTIC LOAN.

When the figures relating to the recent domestic loan are considered, it becomes easy to understand the disappointment that has resulted among the subscribers. Out of the total of 100 millions 77 millions were offered at prices higher than the minimum issue limit, and as these subscribers are by law entitled to receive the first allotment, there remain only 23 millions to be distributed among the subscribers of 408 millions—the total sum subscribed was 485 millions—, which means that each subscriber gets only 5.6 per cent. of the sum he applied for. Further, there were application for nine million *yen* of small denominations, that is to say 25-*yen* bonds. These too have a preference, and this sum being subtracted from 23 millions leaves 14 millions for distribution among 399 millions, so that in fine

each of the large subscribers gets only 3.5 per cent. of his application. Under these circumstances it is urged by the bankers that the best way to satisfy the people would be to issue the next loan of 100 million *yen* without delay, and the probability is that it will be issued between the 15th and 20th instant. Some of the applicants are said to be asking that their unsuccessful subscriptions to the present loan should be carried over to the next. About 140 millions have still to be raised to complete the war funds for the current year.

As to the exact figures relating to the applications it appears that there were in all 529,334 applicants, and that their offers aggregated 485,876,250 *yen*. Those that tendered at prices above the issue figure were 34,856 and their subscriptions totalled 77,023,900 *yen*. Hence the subscriptions at 90 were 408,852,350, representing 494,478 applicants. It is said that many of the foreign applicants, finding that their allotments would be insignificant, have approached the Bank of Japan with proposals to take large amounts of the loan at 91.

Latest telegrams show that the subscriptions to the Japanese loan in Great Britain totalled 180 millions sterling, being 12 times the amount to be allotted.

#### THE MUKDEN OUTRAGE.

It would be satisfactory were evidence more conclusive which a correspondent, Baron Kneglostein, has furnished with regard to the alleged parade of Japanese prisoners in the streets of Mukden after the battle of Heikautai. Our correspondent can only state that he saw the prisoners duly and regularly marched under escort to their quarters, but he can not tell whether they were not subsequently taken from thence for the purposes of the reported exhibition. Baron Kneglostein has apparently seen only our recent brief reference to the affair. He was in Manchuria when the original story appeared in print, and he therefore does not know that a number of Chinamen spoke to the fact, giving most circumstantial details and telling a story which can scarcely have been a figment of their own imagination. It was a story which seems to have satisfied the Japanese staff, and while we should much prefer to reject it as baseless, we can not possibly do so without fuller testimony.

#### DEATHS.

Lieutenant-General Murai, Commander of the Tokyo Bay fortifications, died in the hospital of Uraga on the 6th inst.

The death is also announced of Mr. Ohigashi Gitetsu, the well known Progressist politician, who held the portfolio of Agriculture and Commerce in the Union Cabinet.

Lieut.-General Viscount Torio is said to be dangerously ill. He was attacked by influenza on the 7th of March, and though he seemed to have shaken off this insidious disease, its consequences were too much for his strength and he is gradually sinking. On the 20th of March, the day of the opening of the Higan season, he spoke the last consecutive phrase uttered by him *kono yo no majo wo satori tsukuseri haru no higan*. This was evidently intended as an announcement that he knew his death to be at hand. The Emperor has sent a Chamberlain to his residence to make inquiries. Viscount Torio has been a conspicuous figure in Japanese history ever since the battle of Fushimi.

## THE RECORD OF A DIVISION.

From an address to the spirits of the dead delivered by General Oshima on the 25th of March at Manchwantz on the west of Mukden, we obtain a record of the achievements of the Third Division—the Nagoya Division—during the present war. Special-ly mentioned by name in the address are the late Colonel Sekiya Meijiro and the late Colonel Yoshioka Yui. The record is this:—

In the battle of Nanshan at the close of May the Division made more than ten charges and finally carried the enemy's positions, thereafter pushing him back to Antszshan and Taitzshan, and thus completing the investment of Port Arthur.

In the middle of July at Telisz the Division attacked a superior force of the enemy, and having subsequently repulsed a counter-attack by a force many times more numerous than itself, finally effected a turning movement which resulted in the dispersal of the enemy and the capture of 400 prisoners and 17 guns.

At the close of July, fighting in the greatest heat at Tashihkiao, the Division attacked and captured the whole of the enemy's line at Sunkiatun, and thereafter occupying the heights on the north of Pienniukau, compelled the enemy to retreat.

From the close of August to the beginning of September the Division joined in the attack of the enemy's positions at Liaoyang, upon which he had expended months of labour as well as great sums of money, and after several consecutive days and nights of desperate fighting, obtained possession of one face of his defences on the south-east of Shoushanpau, thus inaugurating the fall of Liaoyang.

In the middle of September in the Battle of the Shaho, the Division repulsed an obstinate enemy at Shihho and Yingtehniulu, thereafter attacking his strong position at Kankiawatz, sweeping forward and carrying his defences south of Shahopau, and thus driving a wedge into his centre, with the result that 30 of his guns and 14 or 15 of his waggons fell into the hands of the Division, and the successful issue of the battle was materially assisted.

Towards the close of January, when the cold of winter was at its most intense point and military movements were exceedingly painful, the Division, in the Battle of Heikautai, resolutely assisted its comrades who occupied Yapatai and Chenchiehpau, held the position for several days and nights against vehement attacks from the enemy, and thus contributed largely to carrying out the plan of battle.

Finally from the close of February to the beginning of March during the Battle of Mukden, the main part of the division delivered a determined attack against the enemy obstinately guarding Likwanpau, obtained possession of a part of the place, and when attempting to occupy the remainder, suddenly received a counter-attack from a force of the enemy numbering over an army corps. More than one half of the Division was annihilated, yet in spite of these heavy casualties the men held the position to the death, inflicting immense losses on the enemy and ultimately defeating his plan so that the turning movement of our army could be achieved.

Thus the Division is entitled to a medal with six clasps. It has fought six great battles. General Oshima might well lament that the noble dead who had given their lives for their country, could not be present in the

flesh to witness the triumph to which they had contributed, and that never again would their comrades look into their brave eyes. Justly too might he promise them that their names would be recorded in the everlasting pages of history, that their glorious memory would never be forgotten, and that the grand example they had set would inspire their country's soldiers from generation to generation.

## THREE LETTERS.

There are three letters to which allusion has been made in these columns, and brief extracts have been given. The letters have so much human interest, however, and furnish such clues to Japanese character that it will be well worth while to translate them in full. The first is from General Baron Nogi to General Terauchi, Minister of War. It was written a few days after the capitulation of Port Arthur.

I wish you all the compliments of the season. The feeling I have at this moment is solely one of anguish and humiliation that I should have expended so many lives, so much ammunition and such a long time upon an unaccomplished task. At last General Stoessel's patience seems to have become exhausted and he surrendered the fortress, so that in this part of the field a settlement has been reached. I have no excuse to offer to my Sovereign and to my countrymen for this unscientific, unstrategic combat of brute force. \* \* \* Our preparations are now complete, and we are looking forward with great pleasure to tasting the sweets of a field campaign. Let me add one thing. You will be amused perhaps, but I am more than ever convinced of the inevitable injury done to the discipline and homogeneity of an army in the field by the pernicious habit of acquiring costly and useless toys in time of peace. Do not think that I speak too strongly when I express my absolute conviction that for preserving a military spirit simplicity is as essential as are economy and practicality in moral education. I do not refer merely to the period during which this war may continue, however long it may be. My point is that when they have ceased to hear the voice of the cannon, our military men must never fall into the inconvenient and mischievous habit of regulating their clothing and appurtenances by unutilitarian standards.

I thank you heartily for your kind condolences on the deaths of my sons, and I beg you to forgive my long display of military unskillfulness.

The second letter is that written by Major Naganuma after his return from the celebrated cavalry ride which occupied 63 days, and carried a company of Japanese troopers from Sumapao to a point 160 miles north of Mukden:—

I had always hoped to do something which would help the operations in the great battle of Mukden. Towards the close of December I received orders to form a flying detachment. It consisted of \* \* \* men who were prepared to sacrifice their lives. We entered the enemy's lines and, pushing northward to a great distance, approached the railway, his chief means of communication. On the night of February 11th, our Sovereign's Fete Day, we blew up the bridge over the Hsinkai River, a little south of Changchun, and during the night of the 14th we were attacked by a force of the enemy twice as numerous as our troop and having two guns. We not only repulsed him, but also made a counter-attack which drove him back in confusion. He left in our hands a gun and a transport waggon. These operations, bravely and resolutely carried out by the men of the troop, caused an alarm in the enemy's rear, and the result was that he detached a large body of cavalry from his army about Mukden to meet the menace to his communications, a measure that contributed materially to the success of our enveloping movement in the big battle. On the 13th instant I proceeded to Head Quarters and, in the presence of Field Marshal Oyama, reported the facts of our sixty-days' expedition, whereupon the Field Marshal handed me the *Kanjo* of which I enclose a copy. I need not speak of the honour this is to myself, but I hope it will give you pleasure as a credit to our family, especially when I tell you that although throughout our enterprise I had to live on millet-husk soup and to face a temperature sometimes 32° below freezing point, I am in the best of health and have not received even a scratch. There is nothing to be said except that fortune favoured us signally in the achievement of this heavy task.

## (COPY OF THE "KANJO.")

(Troopers selected from 4 regiments are designated in the original, but this information is not published.) The above, under the command of Naganuma Hidebumi, Major of cavalry, penetrated deep into the enemy's lines, and on the 11th of February wrecked the railway at the Hsinkai River south of Changchun, thus temporarily interrupting the enemy's communications and diverting his troops to this part of the field. I consider this a distinguished achievement, and I hereby grant a *Kanjo*.

The third letter is written by Captain Asano. This officer was one of two captains who served under Major Naganuma in the daring ride. He wrote on the eve of setting out, and he seems to have had a presentiment of his fate. He died from a thrust of a Cossack lance.

To-day at 10 o'clock I am to set out at the head of 75 men specially selected from the Cavalry Brigade. We are to emerge on the enemy's rear, reconnoitre his condition, interrupt his communications and disturb his general plan. Probably you will not hear from me again for fifty or sixty days. We are determined to push far into the Russian lines, and we trust the issue to the guidance of Shaka, believing that now indeed we have an opportunity of repaying, though in an infinitesimally small degree, the favours our country has received from our Sovereigns during thousands of years. That is the sole thought of your worthless son at this moment, and he goes to his duty with absorbing delight. But we have a long march before us and many dangers to encounter. For my own part, though I am myself of little account, the men under my command are such fine fellows that there is hope of success. I beg you to be at ease, for I swear that I shall not disgrace my father's name or sully the honour of our family. At this moment of setting out I have written down a verse by way of farewell to life:—

"If life be but a dream  
"Why dreaming, live?  
"Oh gladder for to fall  
"Ere yet the flower fades,"

(Signed) Rikitaro, the child at your knee.

Some of our readers may be unaware that a Japanese boy up to the age of 12 or 13 has a child-name (*osana-na*) which he then exchanges for the appellation to be borne in manhood. Captain Asano signs his last letter with the name he had when as a little boy he sat on his father's knee.

## ENGLAND AND TIBET.

The *Hochi Shimbun* has a telegram from Peking dated the 5th instant, saying that in consequence of Great Britain's representations to the Chinese Government, the Dalai Lama will set out from Kulon on the 20th instant, and, travelling by Changkiakau and Chenguing, will return to Lhasa.

The Tibetan convention has been expanded and modified, according to the *Hochi's* telegraphic information. Five new articles have been added, of which the gist is as follows:—

1. No concessions for railways, telegraphs or mines are to be given within the limits of Tibet to any foreigners without previously consulting and obtaining the consent of the Chinese Resident and the British authorities.

2. The power of promoting or reducing officials in Tibet is to be exercised in consultation with the British authorities and the Chinese Resident.

3. In the event of internal disorder in Tibet, the Chinese Government, after consultation and agreement with England, will send troops to restore order, and no pretext for interference shall be furnished to any foreign Power.

4. Commercial affairs shall be within the consultative competence of England and China.

5. No Tibetan territory shall be sold or leased to a foreign country without the consent of England and China.

## KOREA.

Saturday, April 8.

The Japanese Minister is said to be pressing for the speedy recall of the Korean Representatives at foreign courts. This step was virtually agreed to some time ago, and was referred, in normal sequence, to the Foreign Office in Seoul, but although two months have elapsed, that leisurely body refrains from expressing a definite opinion. The idea is, not to abolish the legations at once, but only to recall the Ministers.

The Belgian Representative in Seoul is said to have applied unsuccessfully for a mining concession similar to that recently secured by the Italians. It appears that the ground taken by the Korean Government was that no capital had been put up by Belgian projectors, nor had they undertaken any operations of prospecting. It was therefore out of the question to accede to an application which merely took the form of a vague request for a general privilege.

Monday, April 10.

The new currency system in Korea is to go into force from the 1st July. It is a very simple method of conversion. Every 2 *yen* of the old currency become one *yen* of the new and the coins will hereafter have the same value as their Japanese representatives.

Wednesday, April 12.

The Korean Government is said to have formally announced to the French Representative in Seoul that owing to non-payment of rent by the Russians to whom positions had been leased along the Korean coast for whaling purposes, the concession is revoked.

Yeuensan is said to be rapidly recovering its trade prosperity. All restrictions have been withdrawn since a Japanese force occupied Songjin, and the Osaka Shosen Kaisha's regular service of steamers has been reopened.

Thursday, April 13.

It is stated that the Korean Government will shortly remove the tax upon the export of price.

With regard to the three Russian whaling stations on the eastern coast of Korea, our readers are aware that the Seoul Government has given notice of its intention to cancel the lease, the Russian concessionaire having failed to pay his rent. It is now alleged that Mr. Kawakita, representing the *Yen-yo Gyoogyo Kumiai* (Deep-sea Fishing Guild) has applied for a lease of these stations, and that his application is likely to be successful.

Friday, April 14.

The Korean legation in Peking has been practically withdrawn and steps are being taken to follow the same course in other foreign capitals.

It is now stated that the Nagasaki Whaling Company is to succeed to the privileges enjoyed by the Russians on the Korean coast.

The railway bridge over the Tadong has been completed and the opening ceremony performed.

## THE KOREAN ENVOY.

His Imperial Highness Prince Wi Yang, who has hitherto been spoken of as Mr. Li Chai-kak but who is really a prince of the Korean Imperial House, was received by the Emperor in audience on the 6th instant. He presented a document written by the Korean Sovereign of which the *Jiji Shimpō*

gives a transcript:—"We believe that the unique purpose of this war undertaken by Your Majesty is to maintain the state of affairs in the Far East, and we regard it as one of the most auspicious events in history. Right is on Your Majesty's side, and before the flag of right the enemy is broken as a bamboo is split. The capture of Liaoyang, the fall of Port Arthur are now events of the past. But the victory at Mukden confers new lustre on Your Majesty's Arms, extends Your Majesty's prestige and secures fresh advantages for Your people. We are Your Majesty's allies. Can there be any limit to Our rejoicing? We send Prince Wi Yang to offer Our sincere congratulations and to offer also some slight tokens which We trust Your Majesty will graciously receive."

The Prince had audience of the Empress also, and subsequently lunched with the Emperor in the Hall of Flowers (*Chikusanoma*). On the 7th His Majesty sent Marquis Tokudajiri to visit the Prince at the Shiba Detached Palace, and to confer on him the Grand Cordon of the Paulownia.

## DEATH OF DOCTOR DAVID MURRAY.

Dr. David Murray, Ph.D., LL.D., formerly adviser to the Minister of Education in Japan and author of "Japan," in the "Story of the Nations" series, died at New Brunswick, N.J., on March 6th, in his 75th year. The following biographical details we take from a New Brunswick paper. Dr. David Murray, one of the prominent educational men of this city, had been ill for some time. His death has cast a gloom over the city, as he was a great friend of many of the benevolent institutions here and spent most of his time in latter years looking after the affairs of the Children's Home and other institutions of this character. Dr. Murray was born in Bovina, Delaware county, New York, on October 15, 1830, and was the son of William and Jean Black Murray. His parents immigrated to America from Scotland in 1818. He graduated from Union College in 1852 and was a tutor in the Albany academy, holding the position as instructor in mathematics there from 1852 to 1857. For the next six years he was principal of the academy. Dr. Murray became Professor of Mathematics at Rutgers College in 1863 and continued as such until 1873. He married on December 23, 1867, Miss Martha Neilson, of New York city. In 1873 he went to Japan as adviser to the Imperial Minister of Education and became superintendent of education in Tokyo from 1873 to 1879. He established the public school system of Japan. He laid the facts in regard to the Japanese indemnity before the Forty-fourth Congress in 1875 and 1876, which resulted in its return. He visited the Centennial Exposition of 1876 in the interests of Japan and made a collection of articles for an educational museum in Tokyo. He was secretary of the regents of the University of the State of New York from 1880 to 1889 and lectured at the Johns Hopkins university in 1897. In 1899 he received the degree of Ph.D., from the University of the State of New York and LL.D., from Rutgers in 1873 and the University of the State of New York in 1874. He was also decorated with the order of the Rising Sun from the Japanese Emperor in 1878. Dr. Murray was the writer of several works and pamphlets and spent much of the time in later years as a friend to Wells hospital and other institutions here. He was a great friend of the literary societies of Rutgers College.

## THE YASUKUNI SHRINE.

We read in Japanese journals that the usual spring festival at the Yasukuni Shrine (Kudan) in Tokyo will be on a scale of unprecedented magnificence this year. It will take place on the 3rd, 4th and 5th of May, and the ceremonial will be performed on account of the souls of all soldiers and sailors who lost their lives in this war up to the fall of Port Arthur. The army will have to perform rites for over 30,000 dead and the navy for 2,700. The Emperor will attend on the 3rd, the Empress on the 4th, and the Crown Prince on the 5th. It is expected that an immense number of the relatives and friends of the dead will attend.

Incidentally this festival affords an opportunity of correcting the wild estimates of Japanese losses circulating in some quarters. For it will be observed that the total figure for the Army from the commencement of the campaign until the fall of Port Arthur is something over thirty thousand. These do not include deaths from sickness. They represent only deaths in action or from the effect of wounds received in action. A later ceremonial will be held for those killed in the battle of Mukden.

## A NEW RUSSIAN FLEET.

The St. Petersburg correspondent of the *Journal* says that the Russian Government has elaborated a scheme for constructing a new navy by a process of deferred payments. So we read the telegram, which is somewhat obscure. A sum of 750 million roubles is involved, and the fleet is to consist of 10 battle-ships, 12 cruisers, 15 minor vessels, 50 destroyers and 100 torpedo-boats. Payment is to be made by installments spread over five years, and the suggestion is that French builders are to be entrusted with the duty of constructing the ships. That is the kind of programme that might be expected of Russia if she determine to adopt a policy of revenge. She will then continue to be a menace to the peace of the East and to the peace of the world. Thus these big announcements may be regarded by some people as mainly in the nature of bluff, but, on the other hand, we have to remember that even though Russia were now stiffened by the addition of the above force to her navy, she would not be much stronger at sea than she was at the beginning of the war. Of the 7 fine battle-ships that she had then in these waters, 6 are at the bottom of the sea, and one is interned at Kiaochow. She has much lee-way to make up.

## ILLNESSES.

We learn with much regret that Mr. Obata Tokujiro, the old friend and distinguished coadjutor of the late Mr. Fukuzawa, is dangerously ill. His malady is cancer of the stomach and no hopes are now entertained.

Mr. Taguchi Ukichi is also in a perilous condition. The results of a bad attack of influenza have developed grave symptoms, and the well known economist and publicist is now in a most critical state.

Mr. Yokoyama Magoichiro, who is widely known among foreigners, is lying dangerously ill in Mr. Okura Kihachiro's villa near Kobe. He has had an attack of suffusion of blood on the brain, and even if his life be spared, it is feared that a paralytic condition must result.

## CHINA.

Japanese enterprise has outstripped itself at Newchwang. So many ships and traders crowded there on the opening of the river that the place could not accommodate them; prices of necessities went up to an unprecedented figure, and as opportunities for earning money did not offer, something like a panic seems to have ensued. One Chinese vessel is spoken of as lying outside the river with about a thousand passengers on board, who could not obtain even food and drink. It is expected that the further landing of newcomers will be interdicted for a time at all events.

General Tseng is expected to reach Peking very shortly. He is proceeding thither for the purpose of submitting to the Throne a detailed statement of the course of events during the past 14 months of his most troubled administration of the Three Provinces. A very interesting statement it will be. One can not but sympathise with Tseng in all his difficulties and rejoice that his long desired period of rest has come.

The *Fiji Shimpō's* correspondent at Yingpan sends a telegram dated the 11th instant, saying that a Russian force under General Matoriloff has made its appearance about 50 miles north-east of that place, namely, in the direction of Hailungching. Matoriloff is said to have a force of ten thousand men including 2,000 mounted infantry with 9 guns. On the 10th he had a skirmish with a Japanese outpost, when the latter lost 2 killed and 2 wounded. Yinpan lies nearly due east of Fushun. Matoriloff's enterprise looks like an attempt to penetrate the Japanese lines, and embarrass their advance. He can not hope to accomplish anything serious with a force of only ten thousand. Doubtless official news of this incident will be published very soon.

General Tseng's resignation has been at length accepted and he is under orders to return to Peking. A previous telegram represented him as having already set out for that city with the object of submitting to the Chinese Government a detailed report of all events since the commencement of the war. But the statement of resignation seems much the more probable of the two accounts. Tseng well merits rest. He can not be said to have shown himself a strong man during his tenure of office, but then, what enormous difficulties he had to contend against.

The *Hochi Shimbun's* Peking correspondent has had a long interview with Prince Sü. He wires the gist of it only to his journal, suppressing details which it would be indiscreet in the Prince's interests to publish. Speaking broadly, Prince Sü avows himself a strong and thorough advocate of progress. His view is that unless China follows the example of her island neighbour, her independence will be seriously threatened in a few years—four or five is the exact period mentioned. Manchuria, he thinks, should be opened to trade, and provided with railways, telegraphs, a competent force of soldiers and really efficient police. Evidently his idea is that until all this be accomplished, the three Provinces should remain under Japanese administration. The Prince, who is an old friend of Baron Komura, expresses his conviction that the present Foreign Minister of Japan will know how to handle the difficult diplomatic problems arising out of the war and its sequel.

According to the annual report issued by the Registrar General the population of Hongkong, including New Kowloon, but excluding the rest of the Territory, on June 30, 1904, was 361,206, of whom 18,900 were British and foreign and 342,306 Chinese. The population of New Kowloon in 1901 was 17,243 and the rest of the New Territory 85,011.

A most kind and gentle lady, a most gracious representative of the palmy days of old Shanghai, a member of a family that has been connected with China for about half-a-century, passed away at Shanghai on April 1, states the *N.-C. Daily News*, in the person of Mrs. Coultis. She had been seriously ill for some time and but little hope was entertained of her recovery. She came back to China last year to accompany her daughter, Mrs. C. W. Campbell, and to be with her during Mr. Campbell's absence in Szechuan. Her elder daughter, Mrs. Ritchie, is in London, but she had the pleasure of having her younger daughter and her son with her to the last. It was a great pleasure to her old friends when she returned to China, and they will feel her loss acutely for a long time, for she was loved by all who knew her. She was laid to rest in Pashienao cemetery on April 2, her old friends gathering round to pay the last tribute of affection. The Service was conducted by Bishop Moule, D.D., and the Rev. A. J. Walker, M.A., who read the verses alternately.

According to the *Sinwénpao*, says the *N.-C. D. News*, on the night of the 1st instant, a portion of the city wall on the Eastern side of the South gate of Nanking suddenly collapsed for a distance of nearly seventy yards, encompassing the deaths of some hundred and twenty persons in the ruins.

The *N.-C. D. News* states that the Methodist Mission has been sadly bereaved in the sudden death of the Rev. F. L. Guthrie, the principal of the Anglo-Chinese School in Hsinghua City. Mr. Guthrie was a young missionary of great promise, and his loss is keenly felt by all the foreigners and many natives in that region.

The bubonic plague, writes a correspondent of the *N.-C. Daily News*, has raged at Hsinghua every summer for ten years. Undoubtedly hundreds of thousands have died. It has made a very perceptible decrease in the population. Dr. Taylor, of the Church Missionary Society Hospital of this city has successfully used serum obtained from India for three or four past years. He has inoculated from one to two thousand persons every year. He told me recently that, of these thousands, he had lost but one patient by the plague, and he was not treated until after the fever had begun. A number of those inoculated had taken the plague, but all yielded readily to remedies, while very few plague patients recover who have not been inoculated. It is slow and expensive to get the serum from India. When will the Chinese Government or private philanthropy, establish a plant for making here in China this thoroughly tried and proved preventive for the dread scourge of China? It is reported that this serum is made in Shanghai under the authority of the Municipal Council, and that they will sell it at the prohibitive price of one dollar a dose. This is four times the cost of the Indian article after all expenses of transport and duty are paid. Cannot something be done by the public-spirited men of our great metropolis to manufacture in large quantities and sell at cost, this necessity for the saving of multitudes of lives?

A hopeful sign of the times, remarks the Hsinghua correspondent of the *N.-C. Daily News*, is the newly organised School of Modern Science. The money is furnished by public-spirited literati and retired officials of the city. There are fifty students from the best families. English is not taught, but "Western science" is studied with the aid of text books in Chinese. One very unique, and significant feature is that the students wear a uniform of European style. A Prince Albert coat of dark cloth looks strange when worn by a Chinese young man who still braids his hair.

They do not shave their heads, but they have not yet discarded the sign of Manchu supremacy over their race. There is no foreigner connected with the school. The whole movement is very significant of what is going on among the young man who will be the leaders of China in a very few years.

It is reported from Canton, states the *N.-C. Daily News*, that H.E. Viceroy Tsên Ch'un-hsien, of the Two Kuang provinces, has issued a special Army Order which has struck terror into the hearts of all under his command. It is to the effect that, beginning from a certain date, all officers hereafter found guilty of the opium-smoking habit are to be summarily decapitated in the presence of the Army and that soldiers guilty of the same habit will be scourged through the streets with their crime written on small flags, affixed to pointed bamboos piercing the offenders' ears, and finally drummed out of the army. It remains to be seen how such drastic orders will be observed by the Viceroy's forces.

The *N.-C. Daily News* states that another daring escape was effected from the American Consular gaol at Shanghai in the early morning of April 5. Leopold Rosthorn, who was undergoing a sentence of eight months, was incarcerated in the same cell as A. Yattlingy, who was being kept until a ship could be found for him. Their cell was at the extreme end of the gallery of which the prison is formed. A prisoner confined in this very cell escaped about two years ago by making a hole in the wall and climbing out over the roof of a shed beneath. The hole made on this occasion was filled in with bricks and plaster and it was to this part of the cell that Rosthorn and Yattlingy directed their attention. What tools, if any, they had is not known, but they managed somehow to remove the bricks and plaster and to effect their escape without any difficulty. The escape was not discovered until later in the morning. So quietly did the prisoners work that the two men lodged in the next cell did not hear a sound and knew nothing of the matter until the escape had been discovered. One man was soon re-arrested; the other is still at large.

A *Mainichi* telegram from Peking, dated April 10, states that the Chinese Emperor has decorated the German Consul at Tsinanpu, Shantung, with the insignia of the Order of Merit of the 2nd class, and the German chief of police with that of the 4th class. A German missionary there has been presented with valuable gifts by His Majesty.

## "ENERGY: AMERICAN, BRITISH AND JAPANESE."

Speaking at the London Institution, recently, on "Energy: American, British, and Japanese," Professor Ayrton argued that there was too much worship of athletics, although athleticism had very greatly improved the physique of the British middle-class. America was a country of pioneers. We, on the other hand, were a slow-going, old-fashioned, behind-the-times country. England was the first country in the world to make a tube electric railway, the City and South London. But where was England now in urban railway matters? Hopelessly behind our cousins over the Atlantic. Yet when England did wake up—alas! that it was so seldom—she mostly overtook her competitors. One instance of this was the high-speed tool, first made in America and sent here. For a time England slept on the matter. Then she got up, and to-day she was beating the world in making high-speed tool steel. It was said that the great spurting power of Americans was "the almighty dollar." With the Japanese success was the outcome of a wonderful intensity, and of a patriotic fervour which even we could hardly understand. He had never seen a Japanese student over the age of fifteen years who

would allow himself to be drawn into any athletic game, much less put aside his studies for one. Having entered on the work of a man, he had ceased to be a child. We had the same forces within us, and if we did not hurry to put them to the best use we must inevitably go down rapidly in the scale of nations.

Things have altered somewhat since Professor Ayrton left Japan. Baseball, tennis, rowing and athletics generally now find a place in the Japanese students' plan of life, which was almost wholly devoid of such things when the Professor was in Tokyo.

#### TOKYO SCHOOL FOR FOREIGN CHILDREN.

The following is the report of a committee appointed by the Standing Committee of Cooperating Christian Missions to visit the School for Foreign Children in Tokyo.

Having visited the School during School hours we can endorse what was said by last year's Committee as to the excellent teaching work that is being done. Being still in its early stage, and having pupils whose training has hitherto been conducted on very varying lines, there has evidently been difficulty in regard to grading the classes. But this is a temporary difficulty. There is a capital Kindergarten, in charge of an experienced Teacher, and as the children pass up from this the grading of the classes will steadily improve.

We could not but feel that the Teachers have undertaken their work with a courage, zeal and patience that deserve the fullest encouragement. This is the more impressed upon us as we observe the conditions under which the work is being carried on. Three buildings in Tsukiji are now in use, each being kindly loaned to the School by the Mission to which it belongs. Undoubtedly the School has been greatly favoured in having the use of them; but they are not as convenient as we should wish, and better furniture is wanted.

The chief object of this Report is to bring the needs of the School to the notice of all in Japan or elsewhere, private individuals or Mission Boards, upon whose interest and sympathy the School has any claim. The most pressing need of the School, at the present stage, is a suitable building and playground, on a good sized lot of land, in a central location.

The number of Parents not resident in Tokyo, who desire to send their children to the School, is increasing. As all cannot make suitable arrangements for the boarding of their children in the house of friends, a Boarding Department is a pressing need. We are glad to learn that there is a good prospect of this need being met in the near future.

Believing that the School is providing a solution of the very difficult educational problem that meets foreign parents in Japan, we would commend it to those who are considering this question in regard to their own children. About three-fourths of the total number of pupils are children of Missionaries. We believe that the Institution will more and more prove of advantage to the Mission Boards in that it will enable parents to remain longer in the field; and for this reason we would heartily recommend the School to the Mission Boards as a suitable object for their helpful co-operation.

M. A. SPENCER.  
H. MCC. E. PRICE.  
W. E. TOWSON,  
Committee.

[We publish this report for the sake of the object concerned. But in future we must emphatically decline to find space for matter reaching us after its appearance in the columns of other journals. And we take the opportunity of calling attention to the very commonplace fact that the office of the *Japan Mail* in Yokohama, and not the editor's private residence or any other place occasionally visited by him, is the proper destination of matter intended for publication in these columns.—Ed. J.M.]

#### FRIENDS OF PEACE.

Last October the "Thirteenth Annual Peace Congress" met in Boston, the delegates from sixteen foreign countries being welcomed by the Hon. John Hay, Secretary of State, on behalf of the National Government. Mr. Joseph Elkinton, of Philadelphia, has kindly consented to give a report of this congress and speak on other phases of the

"Peace Movement in America," at the Ginza Kwaikan, 20 Nishi-Konyacho, Kyobashi-Ku, on Saturday, April 15th, at half past three o'clock (3.30 p.m.) and on Sunday, April 16, at 7 o'clock. The meeting on Saturday is held under the auspices of the "Council of the Friends of Peace in Japan" and the "Peace and Arbitration Department of the Women's Christian Temperance Union." The address on Saturday will be only in English, but the meeting will be open to all, both foreigners and Japanese. The address on Sunday evening will be interpreted.

#### NOTES ON CURRENT EVENTS.

Three patents for inventions connected with submarines have been granted by the Japanese Patents Bureau. The first is to the Electric Boat Company of New York; the second, to a Japanese subject, Mr. Saito Toichi of Yamagata Prefecture; and the third also to a Japanese subject, Mr. Iwasaki Chiyokichi, who resides in San Francisco. The American citizen applied for his patent in January, 1894, and obtained it in December of the same year. Mr. Saito sent in his application in November, 1903, and was granted a patent in December, 1904. And Mr. Iwasaki, having applied in May, 1903, was successful in December, 1904. Evidently the Patents Bureau does not act precipitately, and it is noticeable that the foreigner's application was dealt with most expeditiously. None of the submarines that form the subject of these patents has been practically tested—we read in the *Jiji Shimpō*—but their inventors claim great things for them. Mr. Saito's boat is intended to enter an enemy's port and lay special torpedoes beside his vessels—one submarine can lay 7 of such machines—whereafter she retires and then explodes the engines of destruction. Mr. Iwasaki's submarines are not attached to men-of-war, they work independently. They are made of exceptional strength and are built in compartments so that injury to one part of the hull is not fatal to the vessel. They too can enter harbours, torpedo or ram vessels, lay or destroy mines, cut submarine telegraphs, capture hostile ships without injuring them, survey the sea's bottom, raise sunken vessels, collect marine products and so on. But all those merits still rest on the unproved assertions of the inventor.

Glowing accounts come of the opening days of the herring fishing in Hokkaido. Telegrams received in Tokyo on the 7th instant show that at Yoichi the take has reached 25,000 *koku*, at Iwanai 6,000 *koku*, at Kou 8,500 *koku*, at Furuhiro 5,000 *koku*, and at Otaru and Takashima together 17,000 *koku*. There is every prospect of this rich harvest continuing. The fish are said to be all over a foot in length and full of oil. Large quantities will be sent fresh to the consuming districts.

It appears that the idea has been abandoned of damming Port Arthur and draining out the water so as to leave the sunken ships high and dry. This project sounded attractively audacious, but on closer examination it proved impractical owing to the number of rivers that flow into the harbour. More ordinary measures are to be adopted, and among them is the purchase of a specially constructed and equipped vessel which will assist the work of salvage.

Indirectly connected with this subject is a statement that the Naval Authorities will soon invite tenders for ships sunk

during the war, not, we presume, men-of-war, but only merchant steamers. Special conditions are to be attached in consequence of the experiences acquired after the war of 1904-5. It was then found that tenderers not unnaturally applied themselves solely to reaping the largest possible profits, consequently they broke up the sunken vessels for which they had tendered, carrying off only the valuable parts and leaving the rest to obstruct navigation, with the result that the Government had to incur considerable expense subsequently. It will now be explicitly stipulated that successful tenderers must remove the whole of the vessels for which they tender. The Minister of Marine will be empowered to draft conditions for acceptance by the tenderers and only men of substance will be entrusted with the work.

The *Official Gazette* announces the following payments from the Special Reserves on account of extraordinary expenditures in 1904:—

	Yen.
Foreign Department .....	2,643,350
Home do .....	906,450
Finance do .....	19,993,534
Naval do .....	160,000
Education do .....	100,533
Agriculture and Commerce Department .....	3,726,107
Communications Department .....	8,998,705
Total .....	36,528,679

In the same issue of the *Gazette* the following appropriations are announced from the Second Reserve, on account of the expenses of the troops garrisoning North China:—

	Yen.
Foreign Department .....	16,641
Home do .....	5,135
War do .....	857,676
Naval do .....	20
Total .....	879,472

With reference to the commercial convention between India and Japan published on the 16th of March, the *Keisai Zasshi* has some comments. In the first place attention is drawn to the great discrepancy between Japan's sales to India and her purchases from the latter. To illustrate this the *Keisai* publishes a table:—

Exports from Japan to India.	Imports to Japan from India.
Yen.	Yen.
1902 .....	49,302,789
1903 .....	69,894,195
1904 .....	68,111,994

The articles sold by Japan to India are camphor, refined copper, *habutaye*, umbrellas, tea-boards, *jinrikisha*, matches and cigarettes. On these the Indian Government does not, in any case, levy a duty of more than 5 per cent. *ad valorem*. Japan, on the other hand, levies comparatively heavy duties on her imports from India, as dried indigo, tin, india-rubber, skins and raw cotton. According to the new convention all these articles will henceforth enjoy most-favoured-nation treatment, with the result that the duties will be reduced by about one half, on the average, whereas Japan, since her products already enjoy that treatment in India, will not derive any corresponding benefit from the convention. The *Keisai* notes that some people condemn the convention for that reason, but the fact is that as import duties ultimately come out of the pocket of the consumer, the Japanese nation will benefit materially by the new system.

The declarations made by the Emperor of Germany at Tangier, combined with Count von Bulow's statements in the Reichstag and the explanations given in Washington,

show that Germany is now an unequivocal supporter of the open-door policy. It was not always so. Only a very few years have passed since Berlin deliberately excluded Manchuria from the range of this policy, and showed entire willingness to let these three provinces of the Chinese Empire pass under the control of a Power, which certainly does not stand for the open door. However, the processes of this change of front are of far less importance than the fact of the change. The latter is to be sincerely welcomed, for it means that Germany ranges herself in the Far East on the side of England, the United States and Japan. Germany belongs naturally to the Anglo-Saxon camp and we trust that she has entered it permanently.

London telegraphs that the Russian Government has placed with the Creuzot Company orders for war-material—guns and ammunition—representing a value of seven millions sterling. This seems to indicate a resolution to carry on the war with renewed strength. Large orders have also been placed for rails for the Siberian line. In connexion with this railway it is alleged that strenuous exertions are being made to double the line wherever necessary, and that Prince Khilkoff is about to make a journey to Harbin for the purpose of consulting with General Linevitch.

The *Asahi* has a telegram saying the party which favours an attempt to conclude an honourable peace has been temporarily effaced in St. Petersburg, meanwhile new rumours come of riots caused by reservists who refuse to join the colours.

There is a remarkable synchronism in the rumours of renewed Russian resolution that are now sounding in the ears of the world. We hear first of St. Petersburg's determination to carry on the war, a determination inspired by the amount of the subscriptions offered for a small domestic loan. Then we hear of Rojstvensky's sudden appearance upon the scene in an open and defiant manner very much at variance with the furtive nature of his previous proceedings. Then we hear of huge orders placed in France—especially at the Creuzot works—for arms and ammunition; orders amounting to seven millions sterling. And finally we hear of a telegram from Kuropatkin and Linevitch announcing that the Russian troops are in high spirits, that their devotion to the Emperor is unbounded, and that they feel absolutely confident of ultimate victory. Does it not look as though the hand of some Cadmus had been at work sowing this crop of armed apparitions? Seven millions sterling worth of arms and ammunition is a stupendous order; so big as to suggest intimidation rather than practical need; and if the soldiers of Kuropatkin and Linevitch are in such an elated and confident mood, they must be the most wonderful troops the world ever produced, to which pinnacle of distinction their deeds during the past fourteen months do not entitle them to mount. We are not saying that Russia does not mean to continue the war, but we do think that her methods just now have a ring of Castle Perilous. The immediate outcome of it all will be that Japan's supply of cotton from Bombay must be suspended so long as Rojstvensky is lurking around and that the insurance companies will reap a fine profit.

All the rumours of Russian preparations have produced a disastrous effect upon the Tokyo Share Market. The shares of the Stock Exchange have fallen by over 5 *yen*,

and those of the various electric railway companies by sums varying from 2.70 *yen* to 1.25 *yen*. This is evidently a reaction from the hopes of peace recently entertained. The Baltic Squadron's appearance, too, must have contributed largely, for though Rojstvensky's fleet was always a factor in the situation, people had learned to regard him as a kind of phantom, and his sudden materialization has produced no small effect.

There is in the Negishi jail at present a Pole by name Mionchinsky who was sentenced to death by a Japanese court martial at Dairen, having been convicted of acting as a Russian spy. Thereafter the execution of the sentence was postponed, or the penalty was reduced by one degree, we are not sure which, and the man was sent to be incarcerated in Japan. On the 5th instant he attempted to break out of prison, and had very nearly succeeded when the attention of the warden was attracted by the grunting of some frightened pigs. Mionchinsky was seized and re-consigned to durance. One almost regrets that the unhappy man's attempt proved a failure. The cause of his ill-success is certainly curious. History says that geese saved the capitol of Rome, but pigs have never previously figured as guardians of the peace.

It can not be said that Russia shows any liberality in her application of international law to the case of non-combatant prisoners. In that respect Japan has set her a striking example, for the practice of the Japanese has been to release all non-combatants taken prisoners by them, whereas the practice of the Russians has been virtually to detain all such persons in durance. We do not affirm that Russia acts *ultra vires* when she exercises her own judgement to determine whether non-combatants might, if released, be useful for promoting the enemy's belligerent operations. But we do say that the contrast between the practices of the two States is very conspicuous. Especially is this the case where neutrals are concerned. Thus the Russians retain still in custody four British subjects taken from the steamer *Sado Maru*, namely, Captain George Anderson, who commanded the vessel, Mr. John D. Dring, her first officer, Mr. William Kerr, her chief engineer, and Mr. Angus Carmichael, her first engineer. International law will have found enlightened precedents in Japan's practice during the war. The same can not be said of Russian practice.

It seems that repayments of the Bank of Japan's advances are taking place on an unusual scale. The amount of loans appearing in the Bank's books on the morning of the 6th was 51 million *yen*. Three millions had been returned by debtors on the 5th, and the amount paid in since the 1st instant had been 12 millions. Thus the volume of convertible notes in circulation was reduced to 232 millions, and the indications are that the reduction will continue. The money market is generally quiet. The rate of interest has not undergone any marked change, but in special cases a reduction of one *rin* daily is noted.

The *Katori* and the *Kashima* were both ordered at the same time, the latter from Messrs Armstrong & Co., the former from Messrs Vickers and Co. The *Kashima*, as our readers know, has already been launched, and it is expected that the launch of the *Katori* will follow in a few days. These will be the most powerful battle-ships in the Japanese navy.

## THE BOOKSHELF.

*Japanese Conversation in Six Months; a New Method*, by W. A. ADAMS, M. A.

Captain Adams is an officer in the British service, though as author of the volume now lying before us he eschews his cloth. He is one of a little band of men to whom an all-wise British Government assigned the impossible task of acquiring a working knowledge of the Japanese language in twelve months. This book of his proves its writer to be possessed of two faculties in a surprising degree: the faculty of forgetfulness and the faculty of discovery. His title indicates that the object of the publication is to expose "a new method" of acquiring Japanese conversation in six months, but as he shows no new method whatever, we must assume that when he devised the title he had forgotten the contents, or when he set about compiling the contents he had forgotten the title. The book is a vocabulary, the work of Captain Adams' Japanese teacher, whose labour he forgets altogether to acknowledge. There was a time, 35 or 40 years ago, when the distracted student of this incomparably difficult language had nothing but a vocabulary to aid him—Dr. Hepburn's vocabulary. Since then many admirable text-books have been written, yet Captain Adams would fain transport us back to the vocabulary era, and persuade us that this is "a new method." One might as well chain the toes of one's boots to one's knees and call it a new fashion. As to Captain Adams' faculty of discovery, it is even more remarkable than his faculty of forgetfulness. He has discovered two things; first, that the Japanese language is "exceedingly easy to pronounce," and secondly that it has no grammar worth mentioning, one part of speech being readily replaceable by another. With the exception of men born in Japan there has never yet been a foreigner who succeeded in acquiring the true pronunciation of Japanese; and without any exception whatever there has never been an earnest foreign student of the language to whom its grammar did not present heart-breaking difficulties. By all these men Captain Adams will now be hailed as a great discoverer. Perhaps not by all. Perhaps some jealous sceptics may deny his title to that distinction and may class him rather with those whom angelic diffidence does not fetter.

## L'ALLIANCE FRANCAISE

Quite the most successful meeting of the Alliance Française was held on Saturday at Van Schaick Hall. The paper of the evening was by Mr. de Cuers de Cogolin, who selected as his subject "Le Mariage de Chiffon" by Gyp, the Comtesse de Martel. In his hands the subject was broadly treated, the main feature being a "mariage de convenance," while the chief character in the book, l'Abbe Châtel, the good old priest, was brought out with appropriate prominence. Mainly throughout the lecture the wonderful portraiture and realism of the gifted writer were dwelt upon. Following was the programme:—

### I<sup>er</sup> PARTIE.

"Le mariage de Chiffon, de Gyp."  
Conférence par...Monsieur J. de Cuers de Cogolin.

### II<sup>eme</sup> PARTIE.

I. (a)—"Printemps qui commence"...de Saint-Saëns.  
(b)—"La vie est vaine"...de Seres del Riego.  
Chanté par...Mademoiselle Lloyd Thomas.  
Accompagné par...Mademoiselle E. B. Leach.

II.—Poésie de François Coppée.  
Lue par...Monsieur R. Jamia.

III. (a)—"Ninon"...de Tositi.  
(b)—"Sans toi"...de Guy d'Hardelot.  
Chanté par...Madame Harrison.

## THE BALTIC FLEET.

TWO steamers report having seen 28 or 30 war-vessels in the neighbourhood of Malacca on the 7th instant. Another report sent to the *Fiji Shimpō* from Singapore says that 38 vessels were sighted near the island of Carimon on the 8th instant at 3.30 p.m. This is confirmed in emphatic terms by a later telegram from the same place. To the *Asahi Shimbun* also come telegrams in a similar sense, one putting the number of ships at 39, another at 40.

There seems to be little reason to doubt that the Baltic Squadron has at last approached the field. Its appearance in the Straits of Singapore on the 8th instant indicates, it is true, a rate of speed inconsistent with its original movements, for previous reports showed that the Squadron was still in the vicinity of Madagascar on the 19th of March. Assuming that it left Madagascar on the 18th of March, it must have made the voyage thence to Singapore in 22 days, which is, of course, quite possible, but is not the leisurely kind of progress previously witnessed. It looks now as though the Squadron intends to proceed direct towards the China Seas. It may, of course, take a south-easterly route after passing Singapore, in pursuance of the policy suggested by the Military Critic of *The Times*, namely, the seizure of some Dutch island to serve as a basis. But, on the whole, the probability is that ROJESTVENSKY will steer northward in the direction of Saigon and Hongkong, and that he will put his fortune to the test of a big battle. Russia is looking for that. Indeed it seems that hope of recovering the command of the sea restrains her from proposing a peace which her condition on shore would strongly recommend. We do not entertain any doubt as to the result of the impending battle but, on the other hand, its importance is not to be ignored. There are many chance elements in a naval combat, where 12-inch shells are flying around. One of these huge projectiles, however ill aimed, may disable even a battle-ship, and the seven battle-ships under ROJESTVENSKY's command mount no less than twenty-four 12-inch guns. There has been some confusion about the Baltic Squadron in consequence of the fragmentary character of its movements, but the ships now nearing the China Sea seem to be as follow:—

Battle-ships.			
<i>Alexander III.</i>	13,516 tons	launched	1901.
<i>Borodino</i>	do	do	
<i>Orel</i>	do	do	1902.
<i>Kniaz Suvoroff</i>	do	do	1901.
<i>Ossliabya</i>	12,674 tons	do	1898.
<i>Novarin</i>	9,476 tons	do	1889.
<i>Sissoi Veliky</i>	8,880 tons	do	1894.
Cruisers.			
<i>Nakhimoff</i>	8,500 tons	do	1885.
<i>Aurora</i>	6,630 tons	do	1900.
<i>Dmitri Donskoi</i>	5,893 tons	do	1883.
<i>Svietlana</i>	3,828 tons	do	1896.
<i>Almaz</i>	3,000 tons	do	1903.
<i>Zemchug</i>	3,200 tons	do	1902.

The total displacement of the 7 battle-ships is 85,094 tons and their armament consists of twenty-four 12-inch guns; four 10-inch guns; seventy-three 6-inch guns and 176

smaller pieces. The total displacement of the six cruisers is 31,051 tons, their main armament being eight 8-inch guns and twenty-four 6-inch. The 13 ships have a complement of 7,451 officers and men. One perplexing element of the situation is the fact that ROJESTVENSKY's original squadron appears to be coming on without waiting for the re-inforcements which were supposed to be hastening to join him. Probably it has been found that these re-inforcements could not be despatched in time, or that, even though they joined ROJESTVENSKY, they would impair rather than increase his fighting power. But if that be so, why was not the discovery made sooner? For what purpose has the Russian Admiral loitered six months upon his voyage? From this latter point of view the theory of seizing a Dutch island for basis and rendezvous acquires some probability, since otherwise the third squadron—composed of units still unascertained—, which reached Jibuti a few days ago, becomes an entirely objectless fleet. It is possible, indeed, that the Russians may be calculating confidently on the virtual annihilation of the Japanese fleet, in which event vessels like the *Slava*, the *Sissoi Veliky* and so on might find themselves useful in these waters. But evidently ROJESTVENSKY—unless he intends to await the coming of his re-inforcements in some Far-Eastern harbour, by which plan he would expose himself to perpetual attacks from Japanese torpedoers—has made up his mind to put his fortune to the test with the 13 principal vessels tabulated above. It would have been incomparably wiser, in that case, had he crowded on all speed so as to reach the field of battle, if not before the fall of Port Arthur, at any rate before the Japanese ships had enjoyed full leisure to refit and complete all preparations to meet him. He will have to encounter a fleet not so strong as his own in battle-ships, but much stronger in cruisers, and possessing the incalculable advantage of a veteran personnel.

## MONEY SCATTERED IN MANCHURIA.

IN several of its recent issues the *Chuo Shimbun* has discussed the question of Japanese money scattered in Manchuria during the course of the war. It is a highly interesting problem. The people of the "Three Eastern Provinces" have assuredly suffered many terrible hardships owing to the presence of two immense armies within their borders, but, on the other hand, they have had extraordinary opportunities for earning money, and it is not in the habit of the wide-awake Chinaman to neglect such chances. Hundreds of thousands of coolies have been employed at highly remunerative wages; vast quantities of food-stuffs have been purchased; waggons and horses have been in perpetual demand; materials for railways and telegraphs have been bought up, and almost every house has served as a hostelry. What does it all amount to? Our readers have heard it said that 70 million

yen worth of military notes are in circulation in Manchuria. This, of course, does not by any means represent the total payments made by the military authorities. In many cases notes have already been exchanged for coin, and again put into circulation and in many other cases the people, being unwilling to accept paper, had to be paid in cash. Then there are the outlays made by individual officers and men, which must represent a goodly sum. It is known that the silver reserves of the Bank of Japan have been exhausted, and that the Treasury has been obliged to buy silver ingots in Shanghai and elsewhere, while at present extensive exchanges of military notes for cash are made at Ying-kow, Dairen and Tientsin. Altogether it may reasonably be assumed that 100 million yen have been paid out in Manchuria by the Japanese up to the present. Indeed that is a very moderate estimate. As for future outlays, the Japan Trade Union (*Nippon Boyeki Kyokai*) estimates that the Japanese army is now employing a hundred thousand Chinese coolies and ten thousand carts daily, which means an outlay of 180,000 yen, the pay of a coolie being 1 yen per diem and the hire of a cart 8 yen. Here we have an expenditure of 5,400,000 yen monthly, or 32,400,000 yen in the next half year, provided that the war lasts so long. The period of spring thaws will demand a still larger supply of labour for transport purposes, and very soon after the thaws the summer rains will set in, so that instead of 5½ millions per mensem the outlay may easily reach 10 millions. The *Chuo* arrives at the conclusion that another year of war will put 150 millions into the pockets of the Manchurian Chinese if to the cost of transport services be added all other various outlays. On that hypothesis there would have been scattered through the three provinces by the spring of 1906 no less than 250 million yen of Japanese money. Turning then to the question of other outlays abroad, our contemporary accepts the statement that, including the cost (17 million yen) of the *Nishin* and the *Kasuga*, 17 per cent. of the total war expenditures left the country during the fiscal year ended March 31st, 1904; in other words, a sum of 97,920,000 yen out of an aggregate outlay of 576,000,000. If the same ratio hold next year, when the total outlay is put at 776 millions, the sum sent out of the country will be 132 millions. But many purchases from abroad which were necessary at the outset of the war will not be required during the current year, and we may thus assume that the sum leaving the country will not exceed 100 millions, which would make, say, 200 millions for the two years from February, 1904, to March, 1906 (inclusive). Hence it would appear that Manchuria will ultimately be found to have swallowed up more of Japan's money than Europe and America, and that the total paid out to all foreign countries will be about 450 million yen if the war continues

until the spring of 1906. Now Japan has floated 3 foreign loans since the war began and they aggregate 52 millions sterling, out of which the sum that actually came into her hands was some 450 million yen. Farther, she sold one half of her last domestic loan to foreigners, so that, on the whole, she will have received some 500 million yen from abroad, and will have paid out 450 millions of it, if the above estimates be correct. There are also to be considered Russia's great outlays in Manchuria. No outsider knows exactly what Russia has been spending. Some speak of 10 millions sterling monthly; some put the figure at 15 millions. The Russian Minister of Finance recently stated that from March to October (inclusive) the Treasury had paid out 62 millions sterling. That is at the rate of 93 millions sterling per annum, a figure regarded as much too small by all critics. Assuming it to be a close approximation, however, we may put Russia's yearly outlay at 1,000 million yen, and considering the great distance she has had to bring her troops through Chinese territory, she must be spending much more in Manchuria than Japan spends. Thus the sums scattered among the inhabitants of the three provinces must have aggregated some thing like 250 million yen already, and will aggregate twice that amount if the war continue until next spring. The *Chugai* is naturally very anxious that some method should be devised for drawing back to Japanese coffers this large stock of hard money, but naturally it has no very definite plan to propose. Such devices as the opening of Manchuria to trade as widely as possible, the extension of Japan's commercial routes, the establishment of banks, the purchase of war stores and war material at home as far as is possible, the imposition of taxes in the regions occupied—all these are patent expedients but no others suggest themselves. The fact is that the policy of the open door in Manchuria will assume a keener practical interest than ever after the war.

#### MONTHLY SUMMARY OF THE JAPANESE RELIGIOUS PRESS.

It will be remembered by readers of these Summaries that a few months ago we epitomized several articles from the *Gokyo* (Methodist) bearing on the alleged indifference of educated laymen to the church. The letters published were too long to admit of being thoroughly dealt with in these columns. We hoped that Dr. Takagi, the editor of the *Gokyo*, would sum up the results of the discussion for the benefit of foreign missionaries generally. Dr. Takagi commenced to do this in the March 4th number of the paper, and his 5th article on the subject appears in the *Gokyo* of April 1st. Dr. Takagi is evidently most anxious to find out the truth on the real attitude of educated professing Christians to church teaching, worship and ceremony; and it seems to us that the discussion which he started on this subject should prove to be of great service to all interested in missions. We proceed to give the salient points of his first two articles on the discussion. (1) *Our reason for only publishing the opinions of laymen on this subject.* We have been informed that in certain quarters dissatisfaction has been felt because we did not ask pastors and other church officers to state their views on the question at

issue. The truth is that it seemed to us most desirable that the laymen should be allowed to speak for themselves first on a subject that intimately concerns them. We conjectured that they disapprove of many things done and said by pastors, and we thought it advisable that pastors should be enlightened as to what precisely these things are. But now that the laymen have had their say, we shall welcome any comments that pastors may wish to make on the problem under consideration. (2) *The question at issue is not one that concerns one or two Churches only, but one that concerns the whole Church of Christ in Japan.* We have observed that in certain comments of the press on this discussion there has been a tendency to belittle it by the remark, "In our Church educated laymen are not indifferent to the Church." Now in the case of a few churches this may be true, but it certainly does not apply to the Church as a whole, and Christians who only concern themselves with their immediate surroundings and are indifferent to what is going on in the great outside Christian world are not to be commended. (3) *Is it a fact that there is indifference to the Church among educated lay Christians?* Referring to the letters published in our columns, we find that 10 out of the 11 that appeared, in the most unmistakable manner, recognize the existence of the indifference complained of. Messrs. Andō and Nemoto take a different view. Mr. Andō says that the learned world has always treated Christianity with comparative indifference and that in this respect modern scholars have developed no new symptoms; therefore he sees no object in starting such a discussion as this. But he entirely missed the point of our question. It was not the attitude of the learned world generally to the Church that caused us solicitude, but the attitude of the Christian learned world, the attitude of men who have accepted Christianity and many of whom have Christian experience; hence Mr. Andō's remarks were irrelevant. Mr. Nemoto says that he sees no reason why educated Christians should forsake the church, that it is their duty to mix with their fellow-believers and instruct them on the things which through defective education many of them do not know. He goes on to enlarge on the duties of educated believers. But what Mr. Nemoto says Christians ought to do we say they do not do, and we want to know the reason why. If Mr. Nemoto had adduced evidence to show that the coldness alleged to exist does not exist in actual practice, he would have answered our question, but earnest as are his remarks, they are not to the point. Hence we may say that not one of the writers who took part in the discussion clearly demonstrated that there is no indifference to the Church on the part of Christian laymen, and most of the writers gave it as their opinion that it certainly exists.

In his second article, published on March 11th, Dr. Takagi continues his summary of the discussion in a very interesting manner. Leaving his subsequent articles for treatment next month we now proceed to give an epitome of this one. (4) *The indifference is not to religion, but to the Church.* This view is confirmed by the contents of the letters we have published. There is no indication that the laymen who show indifference to the Churches to which they nominally belong hold the opinion that churches are in themselves unnecessary. What they think is that the churches as now constituted and worked are unsuitable and ineffective. They are out of sympathy with them for these reasons only. That is a very important point. Looking out into the great world, it does not seem to us that there are any indications that people generally are losing their interest in religion, though some there are that affirm this to be the case. On the contrary, the tendency in all the other way—(*Mushiro sono hantai ni sekai no jinshin ga masumasu shakyo ni mukai tsutsu aru no keiko too nitomezumba arazu.*) Too much importance has been attached to Comte's remark that in every country the human mind passes from the Theological stage to the Philosophical and thence to the Scientific stage, its final resting-place. The prevailing idea throughout most of the nineteenth century was that science is all-sufficient. Religious influence waned; philosophy

failed to attract, science was the all in all to the educated world throughout Europe and America. But when thought turns to extremes in this way it has a happy knack of righting itself after a time, and already men are beginning to feel that science leaves an aching void that they would fain see filled and they are turning to Theology again. But what do they find? Theology that is altogether behind the age, Theology that can no longer retain its hold on the human mind (*Mochiron konnichi no Shingaku wa mohaya totei jinshin wo iji subeku mo arazu*).<sup>\*</sup> It is the duty of Christian scholars to reconstruct our Theology. This will no doubt be done in time, but in the meantime the lack of teaching suited to the age is felt throughout all our Churches. In Western countries the attention paid to religion by educated laymen is very marked. One sees men like Sir Oliver Lodge constantly stating their opinions in newspapers and magazines. Psychologists, scientists and other specialists approach the subject of religion from their various standpoints and throw a good deal of light on it. The notion that religion is nothing but superstition is no longer entertained by educated people in the West nor by educated people generally in this country. In these matters we follow very closely on the heels of Western thinkers. When science seemed all-sufficient in Europe and America it seemed all-sufficient here; but during the past few years a marked change has come over this country in regard to the attitude of educated men to religion. They are no longer indifferent to it by any means. But when we speak of religion we do not mean Theology nor the preaching and teaching carried on by the church. These are undoubtedly regarded with great dissatisfaction by the intellectual world generally. Theology expounds religion. If its exposition is unconvincing, though men may still hold on to their belief in the need of religion, they will lose all interests in Theology. The Church is a preaching organization. If its preaching is out of harmony with the spirit of the age it will most certainly lose the support of discerning people. This is the precise situation to-day. The interest taken in religion as such is very great, but the indifference shown to the teaching of those persons who are Christ's representatives in this country is most marked and deep-seated. The question of how this situation has been created and the steps that are necessary to be taken in order to better it will engage our attention in subsequent articles.

In the *Seikyo Shimpō* (Greek Church) of March 14th we find an editorial entitled "The Attitude of Protestants and Roman Catholics to the Greek Church during the present Situation," which contains some rather surprising statements. After commenting on the fortitude, good sense and true devotion displayed by the Greek Church Christians since the outbreak of the war, the *Seikyo Shimpō* proceeds to comment on the many evidences of sympathy with Greek Church Christians manifested by Protestants both in Japan and at the front. Yet there are black sheep in every flock, says this organ, and some few Protestants have deemed it impolitic to keep up their intercourse with Christians who are indirectly connected with Russia at such a time as the present. They may be called fine weather friends. But the number of such weaklings is small, and not a few Protestants have gone out of their way to show their fellow-feeling with us. These friends in the time of adversity are very precious and we feel boundless gratitude to them and to God for such a display of Christian feeling. The sympathy shown by a certain Protestant Bishop and his wife with our venerable prelate during the present crisis is an incident worthy of being recorded in letters of gold in the history of our Japanese Greek Church. But, turning now to the Roman Catholic Church, we are pained to have to give a very different record. It is one of the principles of that Church to conceal the motives which un-

<sup>\*</sup> It is a very striking fact that in almost every Protestant sect utterances of this kind are most frequent. A very large section of educated Japanese Christians undoubtedly studies the writings of the new school of theological critics with approval. (WRITER OF SUMMARY.)

delic actions and not always to make known to the public sympathy that exists in secret; so that it is possible that there may be fellow-feeling with us somewhere in the hearts of Romanists; but their outward actions and words are most antagonistic to us. In their literature we are misrepresented and denounced as the agents of political Russian aggression. Their organ the *Koye* is most persistent in its opposition to us. Even supposing that in the history of the Greek Church there are numerous facts which call for Roman Catholic adverse criticism, is this the time to be dwelling on these facts in order to stir up rancour and enmity in the breasts of Japanese Christians towards us in the way that certain Roman Catholic writers are now doing? Even prominent politicians have borne testimony to the noble conduct of our Christians during the war. The Romanists allow their enmity to other creeds to stifle within their breasts the growth of the most ordinary charity towards fellow-Christians. Among their pastors there are some whose ideas as to the manner in which sects should treat each other are on an infinitely lower level than those of ordinary worldly politicians.\* While then highly appreciating the extreme goodwill with which we are treated by the Protestants, we deeply regret the strong antipathy shown towards us by the Roman Catholics.

The *Seikyō Shimpō* earnestly appeals for more pecuniary help in the work of supplying the temporal and spiritual wants of the Russian prisoners in this country. Many of these men seem to be quite destitute, not having the wherewithal to purchase the necessities of life. It seems to be an occasion for an appeal to the general public. Detailed reports of the work being carried on by the Greek Church among the Russian prisoners are published in each issue of the *Seikyō Shimpō*, covering many closely printed pages. In one of these reports it is stated that certain Russian generals have shown great interest in the Japanese branch of the Greek Church. One of these Generals a short time ago put a series of questions to one of the Greek Church priests. We give the questions and answers below. What is the number of Greek Church converts in Japan? 28,000. How many of these are in Tokyo? About 5,000. How many Japanese priests (神品) are there? Over 30. The total number of workers is about 200. In our Divinity School there are about 80 students, in our Deaconesses' Training School about 100 young women. What was the cost of the erection of the Surugadai Cathedral? I don't know for certain, but probably about 300,000 yen. It could not be built for that now? Certainly not. It would probably cost three times that amount. Do you fill many offices in the Church? I do. I am a preacher, a member of the compilation department, and also one of the managing officers of the Greek Church Young Men's Society. How is the health of the Bishop? Excellent.

\* \* \*

The tone of the *Nichiyō Sōshi* (Protestant Episcopalian) is eminently sober. In a recent number it comments on the wild so-called religious excitement displayed by certain young men and young women in Japan and relevantly asks how much of this is spiritual and how much artificial—the result of overwrought emotions, religious hysterics. These young people dance and sing, confess their sins, laughing and giving thanks to God in turn. They say that medical assistance is not needed. Prayer will do all that is necessary. They have been named the "Christian Tenrikyō Sect."† We do not pretend to decide, says the *Nichiyō Sōshi*, whether the persons who exhibit these extraordinary symptoms are really moved by the spirit or are suffering from nervous weakness, as we have not sufficient acquaintance with their lives and proceedings, but it is important that somebody should determine this. We can not say

\* Oshū Kanai ronichi no Komakyōkai no shinsei naru kōyokusha wa kyōka-kan kaitōgai no tokugi wo omomazuru ten ni oite, ichi sokujintaru seijika no toku ni oyobasaru go foki mono ari.

† A sect in modern times noted for its wild, questionable proceedings, but which, according to Dr. D. C. Greene and other authorities, has many redeeming qualities. (WRITER OF SUMMARY.)

that there will be no second Pentecost in the Twentieth Century, but at the same time Twentieth Century religion must be kept from lapsing into mere fanaticism and aberration. Religion is not all emotion by any means any more than it is all intellect. There must be a blending of the two in order to have the real thing.

Mr. Imai Fudō, writing in the *Nichiyō Sōshi* under the title *Kokumin to Shita to Fude*, says that it is most gratifying to find that the nation as a whole has by no means gone crazy over the war. Lectures and preaching services have been well attended and there has been a spirit of inquiry abroad in various places. There is a general seriousness and a feeling that the nation is about to enter on a new era. This state of mind furnishes to all religious teachers a great opportunity for guiding thought into right channels. The tongue and the pen should both utilize the occasion as far as it is possible to do so. Great responsibility is attached to all teachers and preachers at this time.

The *Nichiyō Sōshi*, writing on "Church or no Church," says that more people are kept away from Church for moral reasons than for intellectual ones and adds that pastors do not need to be working themselves into a panic over the non-attendance of professing Christians as though it all resulted from the intellectual inferiority of ministers of the Gospel. Such is not the case.

\* \* \*

Writing in the *Fukūin Shimpō* on the "value of the doctrine of the Immortality of the Soul," Mr. Abe says that the question of the immortality of the soul cannot be treated satisfactorily either from a biological or an ethical standpoint. It is purely a question of philosophy. It is a fixed law that things which have a beginning have an end, worlds that take millions of years to form in the course of time approach nearer and nearer to destruction. To say that it is unlikely that the soul which has taken so many years to reach its state of perfection is not likely to be annihilated is inconclusive, as in nature the total destruction of objects which has taken centuries to develop is most common. The only basis for the doctrine of the immortality of the soul is the view that man's place in the universe is quite exceptional, and that owing to his superiority to all other existing animals his soul will survive death. Mr. Abe says that the saying of Christ, "Be ye perfect as your Father in Heaven is perfect," indicates that development of character will go on after death and that this hope suffices to induce a belief in immortality. Mr. Abe thinks that the arguments advanced in favour of immortality based on quotations from the scriptures are much weaker than those adduced from a consideration of man's character and destiny.

\* \* \*

After many years of close attention to the writings of Dr. Murakami Sensei we have come to the conclusion that he is one of the clearest thinkers among modern Buddhists and a man who is absolutely fearless in following his convictions wherever they may lead him. In the collection of Ethical Essays entitled *Rinri Kōyō-shū*, a number of which appears on the 15th of each month, at the close of a long essay discussing the position assigned to women in the canonical writings and general literature of the Eastern world (including India, China and Japan) in connection with the status she occupies in Christian countries, Dr. Murakami says:—Regarding this subject in the light of history and with a view of determining what course should be followed in future, I have come to the following conclusions. It makes no real difference whether we say the sexes are equal or whether we say that man occupies a higher position than woman, so long as the terms used are understood in a correct sense. In the point of general human qualities, of character, capacity, and so on, there is no necessary superiority in men as compared with women. And considered as human beings related to gods or divinities men and women are absolutely equal. But when we come to those human relationships with which especially ethics is concerned, the man is most certainly the head of the woman. In all the other relationships of life, for instance, that of monarchs to ministers, parents to children, re-considered as human beings

only the parties are equal. But it is an essential part of the ethical systems of the world that more authority should be attached to monarchs than to ministers, to parents than to children, to husbands than to wives. Without this condition harmonious life is inconceivable. Considering then the point of view of human relationships, woman is not on an equality with man. While the husband loves the wife, the wife must respect the husband (*jinrin* (人倫) to shite wa dan wa dan, jo wa jo to chitsujō ga nakereba naranu. Dan wa jo ni taishite ai no ichiji wo motte shi, jo wa danshi ni taishite kei (敬) no ichi ji ga hitsujō da to omoimasu) I cannot pretend to say what changes the future may bring, but however it may be in America, here in Japan the maintenance of this respect of women for their husbands will always be essential.

\* \* \*

The Shinriha under the superintendence of Dr. H. Haas has recently issued a translation of Dr. Edward Grimm's "Ethics of Jesus." This No. 9 of the useful series of Theological Works under publication by the General Evangelical Protestant Missionary Society to which Dr. Haas belongs. The Japanese translators are the Rev. R. Minami, so well known in the Christian world, and Mr. Kiyomizu Taishirō. Dr. Haas tells us in his preface that Dr. Grimm belongs to the critical school of Theologians, that he does not believe in the Divinity of Christ. Christ is regarded by him as a brother who has done much to lead men to God and to make them happy. The book deals with Christ's own conception of his mission and discusses the utility of his teaching to-day. Dr. Grimm is not a destructionist by any means, says Dr. Haas. Rather does he try to make us understand the moral teaching of Christ in such a way as to enable it to retain its hold on our minds despite the undermining influences of modern thought. Though the work is published as one of a series of books on Divinity, it is written in a style that should attract rather than repel ordinary readers, and Dr. Grimm is a warm-hearted friend of Japan and is interested in the progress of Christianity here. The work runs into 327 pages and constitutes a most thorough treatise on the subject discussed. It will no doubt be a revelation to many Japanese Christians who are unacquainted with the conclusions reached by the modern schools of Biblical critics. We have only space for a brief outline of Dr. Grimm's views. In his introduction he comments on the meagreness of the authoritative information possessed in reference to Christ's life and teaching. Like Shaka, Christ wrote nothing and not till a long time after his death were any of the sayings attributed to Him collected by his disciples. The Gospel of John Dr. Grimm rejects as an authority on Christ's life and teaching. The ethical teaching found in the other three Gospels no doubt has a common origin. But these Gospels are to be regarded as an embodiment of the belief of the Church when they were compiled rather than an actual, correct historical account of what took place when the Gospel was first preached.\* The words uttered by Christ were all in Aramaic. They are given to us in Greek by the compilers of the Gospels. The Aramaic spoken in Galilee was a dialect that had certain peculiarities; so that Peter's connection with Christ was discovered by its means (Mark XIV, 70). Christ used this language. Hence we have none of the words of Christ as they were spoken, and we can't be sure that in all cases the translation has brought out the real significance of the original. The fundamental characteristic of Christ's ethics is, according to Dr. Grimm, the love of truth. Being no scholar, Christ obtained his knowledge of truth

\* The most advanced of the modern Theological Critical Schools is that led by Professor Van Manen, whose celebrated article on "Paul" in the *Encyclopædia Biblica* has caused an immense sensation. Dr. Grimm in his criticism of the sources of the three Gospels does not go so far as Professor Schmiedel in the new *Encyclopædia Biblica*. Learned opinion on the sources of the New Testament has made most wonderful advances during the past few years. Archeological study of all kinds seems to have entered on a new era.—(WRITER OF SUMMARY.)

by intuition. Dr. Grimm dwells much on the immense importance attached to character by Christ. And in a very interesting manner he considers the Christian ethical standard, discusses the degree of altruism and egoism contained in Christianity, the relation of ethics to religion, rewards and punishments and general soteriology. The bearing of Christian ethics on national and social questions is gone into in a minute manner. The last chapter will no doubt possess special interest for Japanese readers as it treats of Buddhist and Confucian ethics, dwelling on their merits and demerits. This chapter was specially written for the Japanese edition of Dr. Grimm's work. Dr. Grimm says that whereas Greek morality was eventually optimistic and Buddhist eventually pessimistic, Christian morality combines in a very superior manner both characteristics. Dr. Grimm is of opinion that in these times there is a great demand for a manly type of Christianity and that there is much in Christ's teaching that sanctions the giving of more prominence to manly qualities than is usual with most preachers. Women go to Church more than men partly because feminine virtues, meekness, forbearance, patience, and the like, are dwelt on more than boldness, self-assertion, militancy, and the like. In his teaching and character Christ combined masculine and feminine virtues.

The series of Theological works published by the Shinriisha bearing the title of *Shingaku Sōsho* include, (1) Doubts on the Existence of God (over 300 pages) price 55 sen; (2) An Exposition of the Essential Elements of Christianity, price 50 sen; (3) Modern Views on Miracles, price 25 sen; (4) The Meaning of the terms Son of God and Soteriology; price 25 sen; (5) The Book of Genesis. A General Discussion; price 30 sen; (6) The Three Great Religions of the World, price 30 sen; (7) The Views of Noted Men on Christianity, 25 sen; (8) The Essence of Christianity, 55 sen. They are all translations of noted foreign Theological books. Nos. 3 and 8 are Dr. Harnack's works reproduced in Japanese. Dr. Haas is to be congratulated on commanding the services of such able translators, and his idea of placing intelligent Japanese Christians in possession of the latest German thought on exegesis, ethics and general theology is an excellent one and is being carried out in a manner highly creditable to the Mission with which he is connected. The style of these books as far we have been able to examine it, seems to us neither too classical nor too colloquial. We have come across no obscure passages and have read not a few sentences in the work now reviewed that struck us as quite impressive.

The *Kōye* (Roman Catholic) replies to the attack of the *Seikyō Shimpō*, maintaining that its sentiments are misunderstood and pointing out that the matter alluded to which gave offence to the Greek Church Christians was part of a long history of the Roman Catholic Creed entitled *Kōkyō Shinjō* (信條) *shi* written by a Mr. Yanagi some time before the war broke out. The controversy between the two writers is not of sufficient importance to be reproduced here. The tone of the *Kōye* is always somewhat militant and the *Seikyō Shimpō* editor, Mr. Ishikawa, is a born controversialist.

The *Kōye* has recently commenced to devote a few pages each month to replying to Christian Casuistry questions. This part of the magazine, headed *Shitsugi Ōdō*, makes rather interesting reading. It is an essential part of Roman Catholic teaching that converts when in doubt as to the course to be adopted should consult a priest and allow him to settle the matter for them. Judging by the large number of questions that are appearing, Japanese Christians are exercised about numerous difficulties arising from old customs and practices that militate against Church canons. The questions are sent up to Tōkyō from various quarters. Here is Question No. 9, propounded by an Awamori convert, and its answer.

Question.—It is a rule of the Church that a man who as an unbeliever has given up his first wife in favour of another woman, should when he becomes a believer give up this wife and

take his first one back again, though the second wife may have also become a Christian. What I wish to ask is, can the second wife under these circumstances marry again?

Answer.—Under these circumstances the first marriage alone was valid, the second was an irregularity. Though the marriages were effected outside the church, when the parties were not Christians, the inherent moral nature of the acts is not altered thereby. The man's connection with the second woman the Church does not recognize as a marriage at all. It was irregular. So we may say that the second woman has not been lawfully joined to any man. She is consequently free to marry anybody she pleases, unless it may happen that there is in existence a first husband to whom she is in duty bound to go back. This obligation only exists when the woman's connection with this man was strictly regular. But it is important to add that in case the former wife is not willing to become a Christian and the man is not inclined to marry her on this account, he need not do so, as St. Paul says (1 Cor VII.—15) "If the unbelieving depart, let him depart. A brother or sister is not under bondage in such cases." If the man in the case under consideration cannot get his first wife back, then he may be canonically married to his second wife or he may marry somebody else if he so list. *Sareba otto taru mono wa sentri wo uketaru nachi sono zensai ga jibun no moto (許、イヒナツケ) ni motoru tshi naki koto wo tashikamureba, gensai no isuma moshi-kuba hoka no onna to seiō naru konin wo musubu wo ubeshi.*\*

Question X.—Is a woman who has been guilty of illicit intercourse any number of times (*Ikutabi mo*) with one man or with various men allowed to marry after she has entered the church?

Answer. Yes. She is free to marry anybody she pleases.†

The questions put by various correspondents cover almost the whole area of ordinary life and some of them are by no means easy to answer. We cannot but think that some of the answers will be considered unsatisfactory. What authority these answers possess we are not in a position to say. If they only express the editor's opinion on the questions discussed, then of course they have no authority. Here is another question coming from a young convert in a tea shop. He discovers one of the other employees in the act of stealing his master's goods. To inform his master of this even privately would cause him to be hated by his comrades and exposed to retaliation on their part. Is he still under an obligation to report the affair to his master?

Answer. If this person has charge of the goods which have been stolen, or if they have been taken from a godown for which he is responsible, then it is clearly his duty to report the matter. Under other circumstances he is not under obligation to report what has happened, but since a faithful and loyal servant should guard his master against loss, it would be better for him to privately acquaint his master with what has occurred. But still if he is not directly responsible for the stolen goods and he is quite sure that his reporting the affair would lead to retaliation on the part of his fellow-employees, he may hold his tongue.

The *Dai Nihon* has an editorial in which it is argued that Christianity is a thoroughly revolutionary religion, and that it is as well that Japanese should realize this. The revolutionary nature of Christianity is thus set forth by the editor of the *Dai Nihon*. Christians should endeavour to make it clear to their fellow-countrymen how fundamentally different is the Christian view of life and society to that held in this country by almost everybody. What does the ordinary Japanese worship most? Rank and riches? With us the great are the titled part of the community. We worship power, and outward show. Those who have the most worldly

\*Astonishing liberty surely.—(WRITER OF SUMMARY).

† Hommon (本問) no shitsū (私通) seru koto aru onna ga shiujō to naru tōki wa, sara mi ta no mono to kekkan suru koto jiyū nari.

prestige are the most highly esteemed among us. But Christianity adopts a radically different view. According to it the most worthy of honour among men are the holy, the upright, the benevolent, the believing. Men and women are appraised not by what is thought of them by their fellow-creatures, but by what God thinks of them. According to Christianity a man may be poor, ignorant, and of low birth, yet if his heart be true and his life exemplary, he ranks first among mankind. The ideal man according to Christianity is he whose moral qualities are of a superior type. Whether he has property, knowledge, rank or any other worldly endowment is a matter of no consequence at all. It is this new conception of humanity that we Christians need to make known to our fellow-countrymen. We need to create new homes for our children and new women to superintend these homes. We are still suffering from ages of polygamy and all its attendant evils, jealousy, malice, discord and despair. If we can begin by purifying the home, all else will follow in due course. Christian customs, habits, tastes and ideals must be substituted for those now prevailing throughout the length and breadth of the land. Thus and thus only shall we create a new Japan.

### CUSTOMS PROTEST.

The Director of the Yokohama Customs delivered a decision on April 8th on a protest by Messrs. Illies and Co., No. 54, Yokohama. The firm imported a quantity of "worsted" yarn with certificate of origin on which the appraisers imposed a duty at the rate of yen 9.169 per 100 *kin* in accordance with No. 34 of the Conventional tariff between Japan and Germany. The importers contended that the duty should be yen 8 per 100 *kin* under No. 33 of the same tariff, as the material is provided for weaving purposes. The protest was sustained.

On the same day, another decision was given in the Yokohama Customs rejecting a protest lodged by Messrs. L. J. Healing and Co., No. 22, who imported jelutong on which the appraisers imposed duty at the rate of yen 5.855 per 100 *kin* under No. 412-A of the general statutory tariff. The complaint of the importers was that this was a material to manufacture a kind of rubber, mixing it with other substances, and the duty should be *ad valorem* 10 per cent. under No. 496 of the same tariff. This contention was not sustained on the ground that the material was a kind of raw rubber and No. 412-A of the tariff should be applied.

In the Yokohama Customs, a decision has been rendered on a protest instituted by Messrs. Oestman and Co., No. 76. The firm imported precious stones partly polished, with certificate of origin, on which goods the authorities of the appraising department imposed *ad valorem* duty of 30 per cent. in accordance with No. 470 of the tariff. The importers held that the stones had no value for ornamental purposes and that they should be treated under No. 497 of the same tariff. The protest was rejected.

### FIRE ON THE "GERMANICUS."

At 3.30 a.m. on April 10th, fire broke out in the second hold of the German steamer *Germanicus* (3,960 tons gross) which arrived on April 6th at Kobe and which was to leave there on the morning of the accident for San Francisco, having on board matches, *sake*, matting, cotton goods, etc., some 1,600 tons in all. The flames immediately spread to the first and third holds. The operation of pumps from the Harbour Police office and from Messrs Nickel and Co., the landing agents of the steamer, proving insufficient she was at 6 a.m. taken out of the harbour near to Wakihamu where workmen from the Kawasaki shipbuilding Yard made a large hole in the hull and pumped in water. This means also was ineffectual, and at the time when the telegram reporting the affair was dispatched the fire was still raging. The cause is not yet known. A telegram to the *Kokumin* says that it is believed to be due to incendiarism.

## BLOCKADE RUNNING.

## THE HARBERTON'S CREW.

The deadlock in the arrangements for the transference of the crew to England of the steamer *Harberton*, the captured blockade runner, referred to in these columns on Friday last has been removed, and the men left Yokohama by the Ocean Steamship Company's steamer *Tydeus* for Liverpool. The men had made a protest to the Captain that they would all adhere to their determination to contest the issue raised as to the payment of the wages, and representations were about to be made to the British Minister by a few of the more enthusiastic of them, but early on Monday cabled instructions were received, and the men were summoned to the Consulate. They then signed off the articles to be paid their full wages up to the time of their arrival in England, and with a small advance, for necessities during the voyage, the men boarded the *Tydeus* and left port as above stated.

## THE S. S. "HENRI BALKOW."

The capture of the Norwegian steamer *Henri Balkow* at the northern end of the Yunigiri Straits on the 7th instant was effected after a somewhat exciting chase. She was sighted at the first break of day steaming leisurely along having cleared the ice-bound coast to the south, and would, in the ordinary course have got through had she had another day's liberty. When seen she was signalled to stop, but proceeding onward a blank shot was fired at her. This also was unheeded, and a chase followed, the cruiser coming up to the runner almost abreast before she slowed down. Although a small vessel she was steaming at a fairly good rate, and when boarded the captain said he was bound to San Francisco. The *Henri Balkow* is owned in Shanghai, and is one of five chartered from Chinese treaty ports by the Russo-Chinese Bank to carry cargoes of provisions to Vladivostok with the stipulation that a sale of the steamers should be effected upon safe arrival. Most of the cargo in her hold is salt and corned beef, tinned meats of various kinds, and rice, while in the fore-peak a quantity of dynamite is stored packed for immediate transport. The capture is the first seizure from Chinese ports since in the earlier stages of the blockade the *Wilhelmina* and the *Negritia* fell into the hands of the Japanese and the barque *Osaka* became a total wreck.

## YOKOHAMA LITERARY SOCIETY.

Van Schaick Hall has seldom had to accommodate a larger audience than that which gathered on April 7th at the meeting of the Yokohama Literary Society. The great attraction, of course, was Mr. George Kennan, the American traveller, author and lecturer. He spoke—following a brief lantern lecture on the Modern Babylon, by Mr. R. Wallace, Secretary of the Society—upon a topic which had for title "A picnic in a Russian Graveyard." Mr. Kennan modestly described his lecture as a short talk, but his able handling of the theme lifted it out of the rut of the ordinary and commonplace. What he described was really the celebration of the Russian All Souls' Day in the great cemetery of Smolensk, outside St. Petersburg. The ceremony in its inception must have been deeply religious and very impressive—the visiting of the graves of the dear departed, the strewing of flowers upon the mounds, and the singing of requiems; but the passage of years has modified it so completely that now it resembles a rowdy picnic more than anything else. True, there are some among the thousands who storm the cemetery on this great memorial day who really go to mourn and weep and hold communion with the dead, but they are but a handful. The overwhelming majority devote themselves to the rudest form of jollification, grossly and entirely heedless of the religious significance of the day. Indeed, the chief impression which Mr. Kennan bore away from the affair was the callous, brutal, selfish indifference shown by nearly everyone. At the close of the lecture, Mr. Kennan was thanked by the President of the Society for his kindness in coming down

from Tokyo to speak. Some questions were then put to him and in response to one dealing with the possibilities of a successful outcome of the present political agitation, Mr. Kennan pointed out that there had been many changes since the French Revolution all of which tended towards making the chances of a successful revolution by the people more remote. Owing to machine guns and similar death dealing weapons, Russia would be safe from revolution as long as the army remained faithful. A small army with modern arms could dispose of a million undisciplined, irregularly armed peasantry. The lecturer, however, proceeded to comment on the growth of the revolutionary spirit in Russia which had now absorbed all the educated classes, not directly connected with bureaucracy and even the nobles. Though there might not be a successful bloody revolution yet there was every probability of another revolution, just as complete, ending in the convening of that ancient Russian assembly known as the Zemsky Sobor or other representative body. With regard to Georgia, about which another question was asked, Mr. Kennan said that he was imperfectly acquainted with recent happenings in that region of Russia. The Georgians were a warlike race—unlike the Russian peasantry who had been cowed by centuries of oppression—and they would be able to make things very unpleasant for the Russian Government, especially at the present time.

The musical programme which followed was slightly different from the printed form, Mrs. Brockhurst and Mr. Grimbly substituting a duet by an Italian composer for the piece by Beethoven originally set out. A new-comer, Mrs. Lee Lee, received a very warm and well-deserved welcome, her singing of "A Summer Night" (Goring Thomas) being one of the most delightful things heard during the present session of the Literary Society. Her voice is very lovely and her stage manners most charming. We hope to hear her again. As an encore on Friday she sang "The Carnival." Mr. Horne secured the only other encore accorded that evening, and in response he sang "Jimmy on the Chute."

Pianoforte Duet.... "Il Matrimonio segreto"..... Cimarosa.  
Mrs. G. W. Brockhurst and Mr. H. H. Gimble.  
Song..... "A Summer Night"..... A Goring Thomas.  
Mrs. Lee Lee.  
Violin Solo..... "Gavotte"..... Bizet.  
Miss H. Page.  
Song..... "She loves me"..... Edith Dick.  
Mr. N. G. Maitland.  
Song..... (a) "The Rose"..... Noel Johnson.  
(b) "The River"..... Noel Johnson.  
Miss Lloyd Thomas.  
Song..... "The Polka and the Choir Boy"..... Mr. Horne.  
Conney Grain.

## BALLAD CONCERT.

The fine weather and the attractions of a ballad programme assembled a good audience in the Public Hall on Tuesday evening to listen to the concert promoted by Miss Lloyd Thomas and other ladies and gentlemen in aid of Miss Holland's Factory Girls' Fund. It is agreeable to think that the very laudable object in view will, as a result of the affair, be substantially furthered in a financial sense.

The various numbers were all meritorious, and several were of a high order of quality indeed. Conspicuous among the latter, giving place to the ladies (who, it may be remarked, received beautiful baskets of flowers), were the two songs of Mrs. Harrison in the first part, of which the house expressed its appreciation so emphatically that she had to return and bow her acknowledgments, and her song in the second part which, being in splendid voice, she rendered so effectively as to provoke an irresistible demand for an encore, in response to which she sang another and almost equally pleasing selection. Miss Lloyd Thomas in her duet with Mr. Cooper was very successful, but her song in the second part "Sweet Pretty Maiden" was certainly one of the gems of the concert. Miss Helena Page's contribution was a pleasing solo.

The audience were delighted also by the

violinello numbers of Mr. E. Salinger, his solo being rendered with such admirable taste and feeling that he had to comply with a call for more and play a second number. The song of Mr. Cherfils, that gentleman being in excellent voice, was a most enjoyable contribution to the programme. The "Hindoo Love Song" of Mr. N. G. Maitland, who enjoyed the advantages of an excellent piano accompaniment by Mrs. Maitland and a cello obligato by Mr. Salinger, went exceedingly well. A feature of the concert was the "Factory Girls March" written by Mr. B. R. Berrick for the occasion and played by the composer and the members of the Bijou Orchestra who both in this and the selection that opened the second half acquitted themselves excellently as usual. Mr. Brady was in his customary vein and recited "Brierly Villas" so well that the audience would not be denied and he had to return and describe how Uncle Podger hung a picture. Mr. Horne was kind enough to play all the accompaniments with one exception, and contributed greatly to the success of the concert.

The programme follows:—

## PART I.

- 1.—Overture.... "Factory Girls March"..... B. R. Berrick.  
(Specially composed for the Concert.)  
MEMBERS OF THE BIJOU ORCHESTRA.
- 2.—Vocal Duet.... "Venetian Song"..... Tosti.  
Miss LLOYD THOMAS and Mr. COOPER.
- 3.—Violin Solo.... "Romance in F"..... Guido Papini.  
Miss H. PAGE.
- 4.—Song..... "Soupir"..... Remberg.  
Mr. CHERFILS.
- 5.—Songs..... "A Lover in Damascus".....  
A Woodforde-Findon.  
Mrs. HARRISON.
- 6.—Recitation..... "Brierly Villa"..... Anon.  
Mr. G. G. BRADY.

## PART II.

- 1.—Selection..... "Rahoczy March"..... Bertius.  
MEMBERS OF THE BIJOU ORCHESTRA.
- 2.—Song..... "Hindoo Love Song"..... Remberg.  
(Violinello Obligato, Mr. E. Salinger.)  
Mr. N. G. MAITLAND.
- 3.—Song..... "Sweet Pretty Maiden"..... Gomen.  
Miss LLOYD THOMAS.
- 4.—Violinello Solo  
"Holder Abendstein"..... Wagner,  
arranged by Dotsauer.  
Mr. E. SALINGER.
- 5.—Song..... "The Dawn"..... Guy d'Hardelot.  
Mrs. HARRISON.
- 6.—Song..... "Once in the Golden Past"..... Edith Cooke.  
Mr. A. E. COOPER.

## YOKOHAMA YACHT CLUB.

A Special Meeting of the Yokohama Yacht Club was held on Monday at the Masonic Rooms, No. 78, to consider certain alterations in the rules. Mr. G. H. Scidmore, the Commodore, occupied the chair, and there was a good attendance. The CHAIRMAN briefly directed the attention of the meeting to the purpose for which they were assembled and Mr. A. R. Catto then read the alterations proposed.

The proposals of the Committee were unanimously adopted and a vote of thanks to the revising Committee was also passed without dissent.

A vote of thanks to the Chairman brought the proceedings to a close.

## "THE COINS OF JAPAN."

Dr. Gordon Munro has just received the following letter of thanks from Italy:—

MINISTRY OF THE ROYAL HOUSEHOLD.

Rome, February 2nd, 1905.

I have had the honour to present to the King, my Sovereign, the distinguished copy of your own publication "The Coins of Japan."

His Majesty, although making only modern and mediæval numismatics the object of his study, nevertheless worthily appreciates your work and designed to give it a kind reception.

I am charged by His Majesty to thank you for this spontaneous testimony of the respectful sympathy shown through the courteous gift to the House of Savoy, and with this opportunity assure you of my perfect consideration.

E. PONZIO VALIA,  
Minister.

# THE FIRST ENGLISHMAN IN JAPAN: WILL ADAMS.

The following paper was read by Mr. Jas. Walter at the last meeting for the present season of the Yokohama Literary Society, held at Van Schaick Hall on Friday evening.

Mr. Walter began by saying: It was with considerable hesitancy that I promised to give you a short account this evening of Will Adams, the English Pilot, the first of his countrymen to set foot in Dai Nippon. I feared that his history was already a well-worn subject to most of you present, and anything that could be placed before you must of necessity be chiefly bare quotations from those early writers who were the first foreign visitors in Japan, and from others of more recent years who had made researches in the old archives of the Honourable East India Company in London, or into the reports of Portuguese, Spanish and Dutch, found scattered about Europe, and which give us a very good insight into the manners and customs of this great nation three centuries ago, which, to the majority of dwellers in the West were then but slightly known. I wish it, therefore, to be clearly understood that most of the information here given is chiefly copied from R. Hildreth's work, entitled "Japan as it was and is," a book published in Boston, U.S.A., in 1855; Kämpfer's "Japan;" Sir E. Maude Thompson's (Curator of the British Museum) "Diary of Richard Cocks, Cape Merchant, in the English Factory in Japan, 1615-1622," edited for the Hakluyt Society of London in 1883; the same author's article in the *Cornhill Magazine* of July, 1904, entitled "The First Englishman in Japan;" Will Adams' own letters written from Japan between 1611 and 1617, taken from the papers of the Hakluyt Society; the Voyage of Captain John Saris to Japan in 1613, edited from contemporary records by Sir Ernest M. Satow, formerly H.B.M.'s Minister to Japan.

Unfortunately few of these works are accessible to the general reader, and it is therefore my only excuse for this paper, but I shall be amply rewarded if there are a few points in Will Adams' life of 20 years in Japan which you will now hear for the first time. Hildreth, whose book was first mentioned, went to England to collect materials for a biography of the first explorers and planters of New England and Virginia, and to quote his own words:

I was carried to Japan, where I happened to arrive (in the spirit) almost simultaneously with Commodore Perry's expedition. My interest thus aroused in this secluded country has produced this book, into which I have put the cream, skimmed, or as I might say in some cases, the juices laboriously expressed from a good many volumes, the greater part not very accessible to the general reader, but still containing much that is curious and entertaining, and to most readers new; whose curiosities, novelties and palatable extracts those who choose will thus be enabled to enjoy without the labour that I have undergone in their collection and arrangement.

Hildreth goes on to say.

How little the history of Japan and its former relations with Portugal and Holland are known, even in quarters where information on the subject might be said to constitute an official duty, is apparent in the following passage in a letter addressed from the State Department at Washington to the Secretary of the Navy in explication of the grounds, reasons and objects of our late mission to Japan, and intended as instructions to the Envoy: "Since the islands of Japan were first visited by European nations efforts have constantly been made by the various maritime powers to establish commercial intercourse with a country whose large population and reputed wealth hold out great temptations to mercantile enterprise. Portugal was the first to make the attempt, and her example was followed by Holland, England, Spain and Russia, and finally by the United States. All these attempts, however, have thus far been unsuccessful; the permission enjoyed for a short period by the Portuguese, and that granted to Holland, to send annually a single vessel to the port of Nagasaki hardly deserving to be considered exceptions to this remark.

Why, in the year 1620 there came into the little harbour of Firado, in Spex Straits, Kiushiu, the following English vessels: "The James Royal," "Godspeed," "Moone," "Palsgrave," "Elizabeth," "Bull," "Unicorne," English

"Hope;" and of Dutch ships the "New Banam," "Trove," "Harlam," Dutch "Hope," "Indraught," "Swan," and "Expedition;" and we find Richard Cocks writing home to his company the East India Company,

I do verily think the furnishing and setting out five of their ships will stand your worships in above Pds. 10,000 sterling, but I cannot justly tell it.

So you see Japan was attracting a good deal of attention in 1620, just two hundred and eighty-five years ago. We all know now that there was a large storehouse of information about Japan hidden away in Europe, and to the American Hildreth is certainly due the credit of being one of the first to rake it all up and to place it before the reading public in a condensed and entertaining form. You will all certainly now wish to know who Will Adams was and all about him. There is a general impression about that he was quite an illiterate man, an ordinary seaman, or a step above that, a pilot. He certainly was a seaman, of the very best type, and pilot too, and was reckoned a man whose good will was very much sought after, not only by his friends but also by those who might almost be called his enemies. Well, he comes to our assistance, and in very simple and quaint old English, and tells us much about himself. It will help us to fix in our minds the epoch when Adams sojourned in this "vale of sorrowful pilgrimage," as he was wont to call it, if you remember that he lived about the same time as our immortal bard, Will Shakespeare, who died four years before Adams, at the age of 52, whilst Adams was probably somewhat over 60 when he died in Japan. The first information about Will Adams is obtained from his own letter, written in Japan on the 22nd October, 1611, when he had already been in the country eleven years, and was addressed to the Worshipful East India Company, which letter finally reached its destination, and is still preserved in the archives of that company. He writes:—

Upon hearing that certain Dutch merchants are in the island of Java, my reason that I do write is first that conscience doth bind me with love to my countrymen and country.

(Very good sentiments that cannot be improved upon.)

I give you to understand that I am a Kentish man, born in the town called Gillingham, two English miles from Rochester, one mile from Chatham, where the King's ships lie.

I have been to Gillingham, it is now quite a large place, and the residents there seemed to me to consist chiefly of naval men still serving their King, and the men seemed to be mostly abroad, for women and children appeared to preponderate. Continuing, Adams writes:—

From the age of twelve years old I was brought up in Limehouse, near London, being apprenticed twelve years to Master Nicholas Diggins, and myself have served for Master and Pilot in Her Majesty's Queen Elizabeth's ships, and about eleven or twelve years have served the Worshipful Company of the Barbary Merchants. Until the India traffic from Holland began, in which traffic I was desirous to make a little experience of the small knowledge which God had given me. (This accounts therefore for at least 38 years of his life.) So in the year of our Lord 1598 I was hired for Pilot Major of a fleet of 5 sail which was made ready by the Dutch India Co. The General of this fleet was a merchant named Jacques Maihore, in which ship he being Admiral I was Pilot.

They left the Texel, in Holland, on the 24th June, 1598, and on the 6th April, 1599, they had reached the Straits of Magellan. The names of the ships, or the English equivalents of the Dutch names, were the

"Hope"	of 250 tons and crew of 130 men.
"Charity"	160 " " " 110 "
"Faith"	150 " " " 109 "
"Fidelity"	100 " " " 89 "
"Good News"	75 " " " 75 "

You see, Mr. Scidmore's yacht compares favorably in size with some of them, and you could put them all, with their crews, inside of the "Minnesota," and Captain Rinder would have to telephone to his Purser to find out which particular hatch they were under. But the names of good omen did not save these small and over-crowded vessels from a succession of disasters too common in the maritime enterprises of those days. We learn that on the coast of Guinea, where the ships

touched, they lost over one hundred men by fever; it is further recorded that before reaching the Straits of Magellan the crews for five months previously were placed on short allowance, and at one time were driven to such extremity as to eat the calf-skins with which the ropes were covered. The winter had just set in, but Adams writes they were forced to spend the winter there, having lost six or seven days when the wind was from the N. E. and fair to get through; they missed the opportunity through refreshing the men and taking wood and water. They were not able to sail again and pass into the Pacific Ocean until the 24th September, in which time Adams says, "our victuals were for the most part spent, and for the lack of the same many of our men died of hunger." The "Faith," "Fidelity" and "Good News," after passing through the Straits, were caught in a violent storm and driven back again, so that Captain Wert, in command, decided to abandon the enterprise and returned to Holland; but only one of the three reached home safely. The "Good News" was captured by the Spaniards and another by the Portuguese, so only one reached Holland again. The "Charity," on board which ship Adams was, and the "Hope" then steered for the coast of Chile, where they had arranged to rendezvous in latitude 46 degrees. I would mention here that English navigators were greatly in request in Holland when the Dutch first fitted out their expeditions to the East Indies, and it was a very common practice for English mariners to take service with the Dutch; thus in the same fleet with Will Adams was his brother, Thomas Adams, about whom we will hear something later on.

The "Charity" on reaching the place of rendezvous found some Indian inhabitants, who at first furnished sheep in exchange for bells and knives, with which they seemed well satisfied; but who shortly after disappeared, probably through Spanish influence. Having waited twenty-eight days, and hearing nothing of her consort, the "Charity" ran by Valdivia to the island of Mocha, and thence to the neighbouring Island of Santa Maria. Seeing on the mainland near by a number of people, boats were sent for a parley; but the people would suffer none to land from the boats, at which they shot a multitude of arrows. "Nevertheless," says Adams,

Having no victuals in our ship and hoping to find refreshing, we forcibly landed some 27 or 30 of our men and drove the wild people from the waterside, having the most of our men hurt with their arrows. Having landed we made signs of friendship, and in the end came to parley with signs that our desire was to have victuals for iron, silver and cloth, which we showed them. Whereupon they gave our folks wine, with batatas (sweet potatoes) and other fruits, and bade them by signs and tokens to go aboard and the next day to come again, and they would bring us victuals.

The next day, after a council in which it was resolved not to land more than two or three men at once, the captain approached the shore with all the force he had. Great numbers of people were seen, who made signs for the boats to land; and in the end, as the people would not come near the boats, 23 men landed with muskets and marched up towards 3 or 5 houses; but before they had gone the distance of a musket shot they found themselves in ambush, and the whole, including Thomas Adams, the brother of William, were slain or taken.

So our boats waited long, says Adams, to see if any of them would come again; but seeing no hope to recover them our boats returned, with this sorrowful news, that all our men that landed were slain, which was a lamentable thing to hear, for we had scarce so many men left as could wind up our anchor.

After waiting a day longer they went over to the neighbouring island of Santa Maria, where they found the "Hope," which had just arrived, but in as great distress as themselves, having at the island of Mocha, the day before the "Charity" had passed there, lost their commander and 27 men in an attempt to land to obtain provisions. Some provisions were finally got, by detaining two Spaniards, who came to visit the ships, and requiring them to pay a ransom in sheep and oxen. It was proposed to burn one of the ships, as there were not men enough for both; but the new captains, of whom the one in command of the "Charity" was named Quacker-

nack, could not agree which of the ships to burn. At length, the men being somewhat refreshed, a council was called to consider what should be done to make the voyage as profitable as possible to the merchants. It was stated by one of the sailors who had been to Japan in a Portuguese ship, that woollen cloth, of which they had much on board, was good merchandise there; and considering that the Moluccas and most parts of the East Indies were not countries in which woollen cloth would be likely to be very acceptable, hearing also from the people on shore that Spanish galliards were after them, news of their intentions and force having been sent from Spain to Peru about the time of their departure from Holland, it was finally resolved to stand away for Japan. Leaving the coast of Chile on the 27th November, 1599, and standing north-westerly across the equator for three or four months, they had the trade wind and pleasant weather. On the 23rd February, 1600, the "Charity" was in 28 degrees north of the line, when Adams writes:

We had a wondrous storm of wind as ever I was in, with much rain, in which storm we lost our consort, whereof we were very sorry; nevertheless with hope that in Japan we should meet the one the other we proceeded on our former intention for Japan.

The "Hope," however, probably foundered in that storm, for she was never seen by the "Charity" or heard of again.

On this voyage across the Pacific, in somewhere about 16 degrees north latitude, a group of islands was encountered (probably the Sandwich Islands), to which eight men of the "Charity" ran off with the pinnace, and were eaten, as Adams supposed, by the islanders, who were reported to be cannibals. Just imagine a meal of eight attenuated Dutchmen, who for some time had lived upon the calf-skins with which the ship's ropes had been covered. There is grim satisfaction in the absolute certainty that good digestion did not wait upon their appetite. Adams was not given to exaggeration in any of his reports, and some weight is added to this story by the fate of the great circumnavigator of the world, Captain Cook, who, 179 years later, in 1779, we know was killed on the islands, and figured, so history tells us, as the "piece de resistance" at a subsequent banquet in the same place. However this may be, for as some people try to make out that Bacon was Shakespeare, and some American gentleman has tried to prove, with the laudable desire of whitewashing the now happily incorporated Hawaiian citizens of the United States, that Captain Cook was not eaten, I still refuse to believe that they did not eat the eight Dutchmen, and Captain Cook too. After this, to our minds appalling incident, but to Adams only one of many tales of woe that he had experienced, we find him steering his ship "Charity" for the Japan coast, and trying to make in all probability Cape Inuboye. He was looking for this in latitude 30 degrees, but, to use his own language, "found it not, by reason that it lieth false in all charts, and maps and globes, for this cape lieth really in 35½ degrees," which, as he says, is a great difference. "However, in the end on the 19th April, 1600, we came in sight of the land in 32½ degrees." This place where the "Charity" made port was in Beppu Bay, off the capital of the Province of Bungo, now called Oita, latitude 33.15, in the island of Kiushiu, and she had taken just 4 months and 22 days in her passage from the coast of Chile. She had been at sea 2 years short of 2 months, and is it to be wondered then, as Adams puts it:

We were then in great misery, with only a company of 24 men out of a complement originally of 110 men, and of these not more than six besides myself that could stand upon our feet, and as many more to creep on their knees, the whole expecting shortly to die.

Of these, nine finally died after being taken ashore. I often wonder where these poor fellows were buried, for if ever seamen deserved a monument they certainly did. This place where Adams landed brings to my mind a story of an old man-o-warman, who, I think, was either in Commodore Perry's or Lord Elgin's expeditions to Japan, and when interrogated by his shipmates as to where he had experienced the worst weather in his time, emphatically declared it was in the Bay of Bungo. "Oh, what a whopper of a bung," was the general incredulous shout, but

many of us who have passed through the Bay of Bungo know that the old man was all right, and had evidently been there before.

We will now see how it fared with Adams on his reaching the Japan coast. They were immediately boarded by numerous boats, which they had no force to resist; but the boatmen offered no injury beyond stealing what they could conveniently lay their hands on. This, however, was put a stop to the next day by the Governor of the neighbouring district, who sent soldiers on board to protect the cargo, and who treated the crew with great kindness, furnishing them with necessary refreshments, and giving them a house on shore for their sick, of whom, as I said before, nine died. For some days the only conversation was by signs, but before long a Portuguese Jesuit, with some other Portuguese, arrived from Nagasaki, on the opposite western coast of the island. The Dutch now had an interpreter; but what with religious and what with national antipathies, little was to be hoped from a Jesuit and a Portuguese. In fact the Portuguese accused them of being pirates, and two of their own company, in hopes of getting control of the cargo, turned traitors and plotted with the Portuguese. The charge of being pirates was not, I fear, so very far-fetched, for it was not an uncommon thing for Dutch as well as English ships to seize Chinese junks, for there was then no trade with China. It is not at all improbable that the growth of piracy on the China coast may be partly laid at the door of foreign nations. After nine days the Shogun Iyeyasu sent five galleys, in which Adams, attended by one of the sailors, was conveyed to Osaka, distant about 80 leagues. Here he found the Shogun "in a wonderfully costly house gilded with gold in abundance," who in several interviews, and by help of a Portuguese interpreter, treated him with great kindness, and was very inquisitive as to his country and the cause of his coming. Adams replied that the English were a people who had long sought out the East Indies, desiring friendship in the way of trade with all kings and potentates, and having in their country divers commodities which might be exchanged to mutual advantage. The Shogun then enquired if the people of Adams' country had no wars. He answered that they had, with the Spanish and Portuguese, but were at peace with all other nations. He also enquired as to Adams' religious opinions, to which he replied, "I believe in God that made heaven and earth." The Shogun next enquired the way in which he got to Japan, but when Adams by way of answer exhibited a chart of the world and pointed out the passage through the Straits of Magellan he showed plain signs of incredulity. Notwithstanding this friendly reception, Adams was ordered back to prison, where he was kept for 39 days, expecting, though well treated, to be crucified, which he learnt was the customary mode of execution in this country. In fact, as he afterwards discovered, the Portuguese were employing this interval in poisoning the minds of the Japanese against these new comers, whom they represented as thieves and common sea robbers, whom it was necessary to put to death to prevent any more of their freebooting countrymen from coming to the ruin of the Japanese trade. But at length the Shogun gave this answer: "that as these strangers had as yet done no damage to him nor to any of his people, it would be against reason and justice to put them to death," and sending again for Adams after another long conversation, lasting till midnight, and numerous enquiries, he set him of liberty, and gave him liberty to visit the ship and his companions, of whom in the interval he had heard nothing. He found them close by, the ship having been brought to Sakai, within seven or eight miles of Osaka. The men had suffered nothing, but the ship had been completely stripped, her whole company being thus left with only the clothes on their backs. The Shogun, indeed, ordered restitution, but the plundered articles were so dispersed and concealed that nothing could be recovered, except ten thousand dollars in silver, which had formed part of the cargo, and which was given up to the officers as a fund for their support and that of the men. Afterwards

the ship was ordered to be taken to a port near Yedo, supposed to be Uraga. All means were used to get her clear with leave to depart, in which suit a considerable part of the money was spent, till at the end of two years, the men refusing any longer to obey Adams and the master, the remaining money was for "quietness sake" divided, and each was left to shift for himself. The Shogun, however, added an allowance to each man of 2 lbs. of rice a day, besides an annual pension in money amounting to about 50 dollars. In Adams' case this pension was afterwards raised to \$280 per annum, as a reward for having built two ships for the Shogun Iyeyasu on the European model. In regard to these ships Will Adams writes:

The Shogun Iyeyasu called me at divers times, as he had done before. So one time above the rest he would have me to make him a small ship. I answered that I was no carpenter and had no knowledge thereof. 'Well, do your endeavour,' saith he; 'if it be not good it is no matter.' (I presume he used the word "shikataganai"). Wherefore at this command I built him a ship of the burthen of eighty tons or thereabout: which ship being made in all respects as our manner is, he coming aboard to see it, liked it very well, by which means I came in more favor with him, so that I came often in his presence, who from time to time gave me presents. Now being in such grace and favor, by reason I learned him some points of geometry, and understanding of the art of mathematics, with other things: I pleased him so that what I said he would not contrarie. At which my former enemies did wonder: and at this time must entreat me to do them a friendship, which to both Spaniards and Portugals have I done, recompensing them good for evil. So to pass myntime to get my living it hath cost me great labor and trouble at the first, but God hath blest my labor. In the end of five years I made application to the King (Iyeyasu) to go out of this land, desiring to see my poor wife and children according to conscience and nature. With the which request he was not well pleased and would not let me go any more for my country but must hyde in his land. Yet in process of time, being in great favor with the Shogun, I made supplication again, by reason we had news that the Hollanders were in Siam and Patania, on the east coast of Malaya, which rejoiced us much with hope that God should bring us to our country again, and boldly spake myself with him, at which he gave me no answer.

Adams pleaded that he would bring the English and Dutch to trade in Japan if Iyeyasu would let him go, but Adams says "by no means would he let me go." He then pleaded for leave that the Captain, Melchor van Santvoort, who came with him in the ship "Charity," should go, and this being granted he sailed in a Japanese junk for Patania, fitted out by the Daimyo of Hirado, and reached his destination there safely, but was subsequently killed in a battle with the Portuguese at Malacca. This was the first opportunity Adams had of getting a letter out of the country, and the following paragraph extracted from it is most pathetic:—

I do pray and entreat you in the name of Jesus Christ to do so much as to make my being here in Japan known to my poor wife; in a manner a widow, and my two children fatherless, which thing only is my greatest griefe of heart and conscience. I am a man not unknown in Ratcliffe and Limehouse to good Master Nicholas Diggins, Mr. Thomas Bert, Mr. Nicholas Isaac and William Isaac, brothers, with many others, also to Mr. William Jones and Mr. Becker. Therefore may this letter come to any of their hands, or the copy, I do know that compassion and mercy is so that my friends and kindred shall have news that I do as yet live in this vale of my sorrowful pilgrimage, the which thing again and again I do desire for Jesus Christ his sake; thus in brief I am constrained to write hoping that by one means or another, in process of time I shall hear of my wife and children; and so with patience I wait the good will and pleasure of Almighty God. Therefore I so pray all of them or every one of them that if this my letter shall come to their hands to do the best that my wife and children and my good acquaintance may hear of me; by whose good means I may in process of time, before my death, hear news or see some of my friends again. The which thing God turns to his glory. Amen.

The first Dutch ships arrived in Japan in 1609, after which there was more frequent communication with the outer world. It was from a letter written by Adams from Hirado, in Kiushiu, to a certain friend of his, Augustin Spalding, in Batavia, and dated the 12th January, 1613, which gave me the first clue for obtaining information about Will Adams direct from the Japanese, and

which enabled me to locate his tomb. This is his letter: "If it be that there come a ship near unto the easternmost part let them enquire for me; I am called in the Japan tongue Augiu Sama (meaning in Japanese, Consider of the needle or pilot). By that name am I known all the sea coast along, and fear not to come near the main," &c., &c. Now this seemed pretty easy sailing, and by turning the letters *m* of the name into *n*'s I got at the word Anjin Sama, and began to follow his advice and find out if he was known all the coast along by that name. I had not to go very far, for in May, 1872, a priest at the Dai-butsu told me that he had heard the name of Miura Anjin, and that he had heard there was a tomb called Anjin tsuka in the village of Hemmi, near Yokosuka.

In 1611 the English East India Company, which had been established in 1600, decided to send out an expedition of three ships to the Far East, under the command of Captain John Saris, a gentleman of a very good English family, from Tickhill, near Doncaster. These ships were the "Clove," "Hector" and "Thomas." They carried crews of 89, 110 and 55 men respectively. Captain Saris was in command and the "Clove" was the flagship, and on board was Richard Cocks as Chief Merchant, who remained after his arrival in Japan as head of the first factory, or agent of the company established here by the English, and whose diary in Japan between 1615-1520 was recently found and edited by Sir Maude Thompson, Curator of the British Museum, and printed for the Hakhyt Society of London. The captain of the "Thomas" was Tempest Peacock, who also stopped some years in Japan, and who was afterwards killed in Patania on one of the expeditions which Adams organised for Siam. (Our old friend, Mr. Pet Peacock, of Tokyo, so long with us in Japan, had therefore a namesake, if not an ancestor, nearly 300 years ahead of him in Japan.) This fleet sailed from the Downs on April 18th, 1611. The main objects of this expedition were the ports in the Red Sea, Socotra, Mocha, &c., but Saris had orders to push on to Japan, and proof positive that the East India Company knew at the time of Adams' being in Japan is found in Article 24 of the 43 Articles of Instructions given to Captain Saris on sailing, which reads:

Being arrived in Japan we desire you to use the best means to search out the most convenient and safest harbor to trade in, when you may sell cloth, lead, iron and such other of our native commodities as by your observation you shall find most vendible there, wherein you are to be very specially careful what colors and sorts of cloth will there be vendible. (What we English merchants have been trying to do ever since.) Also give great charge that your men offer no offence to the people there, and to consult specially with William Adams, an Englishman, now resident there and in great favor with the King, as we hear, to desire his opinion what course should be held for the delivery of the letter from His Majesty James First of England. And if at your departure from Japan the said William Adams shall importune you to transport him into his native country to visit his wife and children, we pray you then to accommodate him with as convenient a cabin as you may and all other necessities which your ship may afford him.

The "Clove" with Captain Saris arrived on the 12th June, 1613, having taken over two years for the voyage out. They were well received by the Daimyo of Hirado, Matsuura Hoin, or King Foyne, as he was always called by the foreigners of that time, and with whom he had very much to do in those days. Many years ago I made a visit to Hirado, and visited his tomb and those of his two retainers who had, it is said, committed *seppuku*, or *harakiri*, at the time of his death. Their monuments were still in excellent preservation. Although so many foreigners died and were buried (the place of burial was, I believe, at the other side of Spex Straits, at this place very narrow) I could learn nothing of the exact spot, and nobody knew anything about monuments to foreigners, so I presume they have all been destroyed. I visited Kawachi, or Kochi, as the English used to call it, and which was the outer anchorage for ships, and where our sailors used to live when ashore. Some of the old cambers, even wells and sides of houses, evidently built with foreign cement, still remain; one or

two foreign anchors from ships of that time were also seen by me, and there is an old tree close to the canal in Hirado which is still known as the Igrisu Matsu, or English pine, about which the legend is the ships used to tie up to. Further research would doubtless have led to interesting discoveries, but unfortunately my time was limited. Perhaps the Hon. Atsushi Matsuura, of Tokyo, a descendant of Hoin Sama of Adams' time, and who loaned a sketch of his ancestor to Sir Ernest Satow, which appears in the "Voyage of John Saris to Japan," edited by Sir Ernest, might have in his possession some papers which would be of great use to future explorers. This Daimyo Hoin was a grand old man and warrior, having fought in the first invasion of Korea by the Japanese. I would mention here that Saris' expedition was not the first English one that set out for the Far East, for in June, 1604, a license was granted to Sir Edward Michelborne and others to discover Cathaia, China, Japan Corea, and Cambai, and which sailed with, as pilot, our famous navigator John Davis, who gave the name to Davis Straits. It is, I believe, not generally known that Davis was actually killed in a desperate fight with Japanese pirates off the coast of the Malay Peninsula. There are any number of interesting stories about our old mariners of those days, but we have chiefly to do with Will Adams, and must therefore continue the narrative of his life out here.

Captain Saris on arriving immediately enquired for him, and was told that he was away in Yedo, and "King" Hoin put off reading the King of England's letter until Anji (or according to Adams' way of writing it Anjin) should come. Here you see again we are on the right track of the right man, and the very same night Hoin despatched letters to him, and also to the Shogun Iyeyasu. Adams arrived at last on the 29th July, having taken 17 days on the road from Sumpu, or Shizuoka, generally named as Surunaga by the English in writing about the place. His interview with Captain Saris was not of a wholly pleasant nature. Saris was probably haughty and overbearing in his manner to Adams, and though offering to him the hospitality of the English house, Adams declined it, preferring to lodge by himself in a Japanese house, whither he would not allow anyone to accompany him, and hung out his own flag, which was, we are told, the St. George's Cross. It appeared to Saris that Adams was more or less Japanese in his sentiments, and that he preferred the company of Dutchmen or Spaniards to that of his own countrymen. This we know was untrue and a libel upon poor Adams. After considerable delay, arrangements were made for Saris' visit to Court, and presents were chosen for Iyeyasu, who had nominally given up the reins of Government in favour of his son, Hidetada, the former residing in Shizuoka and the latter as Shogun in Yezo, to whom presents were also carried, as well as to the more important State officers. The Daimyo of Hirado, Hoin, lent a galley rowed by 40 men, and the mission got away on August 7th, the journey to Osaka being made by boat and taking 20 days. Saris took with him 10 Englishmen and his Japanese linguist, besides Adams and his two Japanese followers, and Hoin provided an escort of an officer and three men. Besides these there was a pike bearer "according to the custom of the country." Travelling at the rate of 28 miles a day they reached Sumpu on September 6th; on the 8th he had his audience with Iyeyasu, to whom he delivered the letter from King James First. The privileges which Saris desired to obtain for the East India Company he was told to abbreviate. This shortened memorandum was sent in through Adams on the 10th and approved by Iyeyasu. One of the objectionable clauses expunged was that the English should be permitted to bring their Chinese prizes into Japanese ports and there dispose of the cargoes. Considering that at the time we knew nothing about China, and had never declared war upon her, the attempt to insert such a clause is rather an eye-opener as to our methods of doing business with that country in those days. The Treaty signed by the Shogun Iyeyasu with his big seal is still, I believe, in London; the knowledge of its exis-

tence or importance was evidently unknown to Lord Elgin, for had it been brought out and laid before the Shogun Hitotsubashi we might have been saved the trouble of making any new treaty of commerce. The business of the mission having thus been concluded satisfactorily, Saris left for Yedo on the 12th, arriving there two days later, had an interview and delivered his presents to the Shogun Hidetada. On the 21st he accompanied Adams to Uraga, a small harbour at the entrance to the Bay of Yedo, near where Adams possessed an estate that had been granted to him by Iyeyasu. It appears that the latter had expressed a desire to see the English settle in Yedo, and in that case Uraga would have been the first port at which the English ships would touch. Adams, you remember, in one of his letters home urged that our ships should be sent to the easternmost port, Yedo or Uraga; a similar suggestion had before been made to the Dutch, but they had preferred to establish themselves at Hirado. Commodore Perry tried very hard to have Uraga made the treaty port, but the Japanese Government at the time suggested that awfully dangerous place, Odawara Bay, near Kamakura, which he knew to his cost was no use, having experienced great trouble in getting one of his ships off the rocks there, and finally agreed to that Land's End of that part of Japan, Shimoda; clearly a case of "Hobson's choice." Saris, in his journal, also expressed himself in favour of Uraga, the only drawback in his opinion being that Uraga was "not so well replenished with victuals and fresh meat." But on his return to Hirado it was decided to remain there, as the factory had already been established in that centre. Probably it would have been much wiser to have fallen in with the proposal of Iyeyasu; and doubtless Adams would have served the East India Company more zealously if he had been able to live close to his home, instead of having to travel and reside at the other end of Japan. Saris, on his return from Yedo, on the 26th September, 1616, also visited Adams' estate; in one case they state the name of the place to be Febe, and in the other it is spelt Phoebe. This appeared to me not so very unlike the name mentioned to me by the priest, namely, "Hemmi," and which Cocks describes as being eight or nine miles from Uraga, which is very nearly the actual distance. I had no great difficulty in finding the village of Hemmi, and with the aid of some children from the village, who were used to cutting the grass in that vicinity, I found Anjin Tsuka, the mound upon which the tombs rest, Yoshikawa-zaka. They were completely buried in high grass; this find and the grand view of the whole Bay of Yedo from this spot amply repaid me for all my trouble and steep climb. Having mentioned tombs brings me to a sad portion of Will Adams' history, which I would feign pass over without comment, but here alongside his own tombstone was another to mark the resting place of his Japanese wife. We know of his good qualities, and it is not for us, 300 years later, to criticise his failings; his Maker will no doubt judge him mercifully; he was but human; valid excuse of course there is none. For nine years he had no prospect of ever seeing home, and in that time had probably given up all hope of getting back to England. Prior to the arrival of the Dutch, Adams had chiefly resided in Yedo, for we find a well-known street named after him, and which still exists to this day, near Nihonbashi, and called Anjin-cho (Pilot Street), the Billingsgate of Japan's metropolis, as a friend of mine in Tokyo truly puts it; for it is the great fish market of the city. Mr. Griffis in "The Mikado's Empire," 1876, page 262, given the following interesting particulars respecting Adams and his last resting place:

Will Adams had a son and daughter born to him in Japan, and there are still living Japanese who claim descent from him. (This I have never been able to corroborate.) One of the streets of Yedo was named after him, Anjin-cho (Pilot Street), and the people of that street still hold an annual celebration on the 15th June in his honour, one of which I attended in 1873. When Adams died he, and afterwards his Japanese wife, were buried on the summit of one of the lovely hills overlooking the Bay of Yedo, Goldsborough Inlet, and the surrounding beautiful

and classic landscape; Adam chose the spot himself. The people of Yedo erected memorial stone lanterns at his tomb. Perry's fleet in 1854 anchored within the very shadow of the Englishman's sepulchre. In May, 1873, Mr. Walter, of Yokohama, after a study of Hildreth and some search, discovered the tomb which others had sought for in vain. Two head stone shafts in the characteristic style of native monumental architecture marked the spot. I visited it in company with the bonze in charge of the Shin Shiu temple of the village.

These stone lanterns (or toros) I found to bear the inscription "Yedo Nihonbashi Anjineho Kansei Jiumen;" Presented by the inhabitants of Anjineho, Nihonbashi, Yedo, year 1798. It would be interesting to know the reason why these good people waited so long after Adams' death before erecting these stone lanterns, which look quite new and fresh as compared with the tombstones. Upon the larger of the tombstones, that of Adams, I could trace no date; it had been obliterated by age and exposure to the weather, but with the aid of a pen-knife my Japanese companion easily made out the date on the wife's tomb; it read, Kwanyei 11 nen 7 gwatsu, 6 ka; or 30th July, 1634. It is said that she died at a good old age, and was given the posthumous name of "Kaikwa O-in Miyuman Rikuni." She was the daughter of Magome Kangetsu, an officer of Temmacho ward in Tokyo. The date of Anjin's death according to the priest of the Temple was Genna Rokunen, 4 gwatsu, 4 ka, or the 10th May, 1620, and his posthumous name was "Yurio Manin Genzui Kogi." Richard Cocks, as you will see from the following letter, places Adams' death six days later.

Richard Cocks wrote to the East India Company, dated Hirado the 13th December, 1620:

And our good friend Captain Wm. Adams, who was so long before us in Japan, departed out of this world the 16th May last and made Mr. Wm. Eaton and myself his overseers, giving the one half of his estate to his wife and child in England, and the other half to a son and daughter he hath in Japan. The copy of his will with another of his inventory (or assessment of his estate) I send to his wife and daughter per Captain Martin Pring, their good friend, well known to them a long time past. And I have delivered £100 sterling to divers of the James Royall's company (Pring was captain of this ship), entered in the purser's book, to pay two for one in England is £200 sterling to Mrs. Adams and her daughter, for it was not his mind his wife should have all, in regard she might marry another husband and carry all from his child, but rather that it should be equally parted betwixt them, of the while I thought good to advice your Worshipps, and the rest of his debts and estate being gotten in, I will either bring or send it per first occasion offered, and that may be most for their profit and according as the deceased put his trust in me and his other friend Mr. Eaton.

It was said that Captain Pring of the "James Royall," of 100 tons burthen, did not reach Japan until a few months after Adams' death, for they had been very old friends. Captain Pring had been kind to the family in England, and several remittances home had been paid through Pring. This Captain Pring was a navigator of some repute, and twelve years before arriving in Japan, in following up the discoveries of Gosnold, had entered and explored (the first Englishman to do so) Penobscot Bay and river on the coast of what has since been known as New England. If would seem that Pring had not forgotten his early voyages to the coast of America, for on his return journey from Japan at Saldanha, near the Cape of Good Hope, a contribution of £70 8s. 6d. was raised among the ship's company to endow a school, to be called the East India School, in the colony of Virginia. Other contributions were made for this school, and the Virginia Company endowed it with a farm of 1000 acres, which they sent tenants to cultivate; but this, like the Virginia University and many other public-spirited and promising enterprises, was ruined and annihilated by the fatal Indian massacre of 1622.

To return to the subject of Will. Adams, it has been rather unkindly suggested that perhaps after all Adams was not so very anxious to leave Japan, where he had lived so long and where he had a native wife and children, but this appeal of his to the Shogun Iyeyasu on the occasion of his taking Captain Saris, of the "Clove,"

up to Court does not give much weight to this suggestion. Adams says:

Finding the Emperor in a good mood, I took out of my bosom his broad seal concerning certain lands (he had given unto me) and laid it down before him, giving his majesty most humble thanks for his great favour unto me, desiring leave to go for my country. At which request he look earnestly upon me, and asked me if I was desirous to go for my country. I answered most desirous. He answered, if he should detain me he should do me wrong inasmuch that in his service I had behaved myself well, with other words of commendation the which I leave. So I think God I got my liberty out of my long and evil service.

And yet now that he had liberty to go he refused to take passage in the homeward-bound "Clove," alleging that though he desired to return to England, he must first make something, for he was poor. The true reason, however, for declining to sail with Saris he states, in his letter to the company, to have been because of divers injuries done to him, without, however, specifying what they were. He appears to have been somewhat shabbily treated in certain business transactions between him and the English merchants; but whether there was other cause for offence we do not know. At the same time he did not neglect his wife in England. The Company had advanced money to her, which Adams punctually repaid, and he arranged for further means to be supplied to her, "till it be the will of God I come home." He now took service with the Company, the negotiations as to the amount of his pay again unfortunately causing some friction between him and Saris; but the terms were finally settled at £100 per year, the engagement to last:

Such time as God shall send the "Clove" into England or answer of her arrival, and return of the Worshipful Company's answer whether they will discover to the north-west or not."

Mark the indomitable pluck and enterprise of the old English salt, after all the hardships he had gone through; he wanted to go and discover the N.W. passage. This project was continually in Adams' mind; he had often conferred together with Iyeyasu about it, and he enlarged on the present advantages for its accomplishment in the friendly attitude of Iyeyasu and his promise of assistance.

We saw this project accomplished only a few years ago, but the other way round. It was on the 2nd September, 1879, in the evening, I was accosted in Yokohama by a gentleman who said to me, "I am Nordenskiöld, of the 'Vega,' and have just completed the North East passage; can you direct me to the Swedish Consul." I was most happy to comply. The late M. Van Oort then filled the office.

Unfortunately there are very few relics of Will Adams that I know of which have been found in Japan. In the period of Genroku, between 1688 and 1703, the temple of Tokosan Godoshi in Hemmi was totally destroyed by fire, and the only things saved and now to be seen in the present temple is a Buddhist prayer on papyrus in the Siamese written characters, and a few small carved wooden images which appear to be of Siamese or Indian origin. Adams made two, if not three, voyages to Siam in Japanese junks in 1617 to 1619, and probably brought back many objects of interest with him. Not long after finding his tomb, a Japanese youth from Hemmi, or that immediate vicinity, came to Yokohama and sold to Mr. Vivanti, of this place, a silver watch of globular shape: the original double cover had been lost, it was otherwise in good order, the dial face had the time figures changed to the Japanese method of time reckoning. Inside it bore the name of the London maker, which I now forget, and date 1597. I examined the watch and consider it may very probably have been Adams' own watch; it is still in Mr. Vivanti's possession and goes all right when wound up. On my first visit to Hemmi, an old farmer presented me with a letter written in Japanese running hand, and which he said was written by Anjin from Yedo, and it certainly had the appearance of age, and it was signed Miura Anjin. Unfortunately I lent it to a friend and never got it back again; but I kept a copy of the Japanese text, which translated reads thus:

I have received the firewood, as well as gate decorations, pine trees, stakewood and strawmats, as usual end of year custom, for which you will express my thanks to the farmers, and at the same time I send a barrel containing 4 kegs of 2 sho each sake, which I am glad to give in exchange for firewood, and you will do so at the rate of 10 bundles for each sho. I send down two barrels of 2 to and 3 jo each with which you will feast the farmers as usual custom, also residue of shoyu which please distribute at my place and don't forget to entertain the farmers at a meal. P.S.—Also take out two bales of rice from the godown for the entertainment. MURAI ANJIN.

This letter is addressed to Heizaimon Rokuzaimon, and is dated 13th month, 25th day, but does not name the year. There are many more incidents of interest in Will Adams' career in Japan, but time does not permit to dwell upon them.

Touching Hemmi Mura, Adams describes it as a "living like unto a lordship in England in which 80 or 90 husbandmen, that be as my slaves or servants which or the like precedents was never herebefore given to any stranger." Richard Cocks, in reporting upon his visit to Hemmi, says, under date 26th September, 1616.

We left Yedo towards Uraga this morning about 10 o'clock and arrived at Hemmi some two hours before night, where we staid all that night, for that Captain Adams' wife and his two children met us there. This Hemmi is a lordship given to Capt. Adams by the old Emperor to him and his for ever, and confirmed to his son, called Joseph. There is above 100 farms or households upon it, beside others under them, all of which are his vassals, and he hath power of life and death over them, and he has absolute power over them as any Tono or King in Japan. Divers of his tenants brought me presents of fruit, as oranges, figs, pears, chestnuts and grapes whereof there is abundance in that place.

From thence they went on to Uraga, Misaki and Kamakura, and Cocks' description of Kamakura and Daibutsu is simply lovely. To use his own words:

I did never see such pleasant walks amongst pine and spruce trees as are about these pagodas, but that which I did admire more than all the rest was a mighty idol of brass called by them Daibooks and standeth in a valley betwixt two mountains. This idol is made sitting cross legged (tailor like) and yet in my opinion it is above 20 yards high and above 12 yards from knee to knee. The house above it being quite rotten away, it being set up 480 years past. I do think there may above 30 men stand within the compass of the head. I was within the hollowness of it and it is as large as a great house. I do esteem it to be larger than the Colossus of Rhodes, which was taken for one of the seven wonders of the world, and as report goeth did lade 900 camels with the ruins thereof. But for this it is thought 3,000 horses would nothing near carry away the copper of this. In fine it is a wonderful thing. (And so think we all of us Yokohama folk 300 years afterwards.) Some report this city to be destroyed with fire and brimstone, but I enquired of the inhabitants and they say they never heard of any such matter but only that it was burned and ruined by war.

No doubt about it that was the trouble, as we know. Only one or two matters of interest and I will close. In the autumn of 1608 a large Spanish galleon of 1,000 tons, the "San Francisco," carrying the Governor of Manila to Acapulco in New Spain or Mexico, was wrecked somewhere about Inuboye; 36 of the crew were drowned and 340 or 350 were saved. The Governor, Don Rodrigo de Vivers, who was saved and who stopped in Japan for two years, was finally shipped off by Iyeyasu in the second ship that Adams built, and he safely reached Acapulco and finally repaid the cost of the ship to Iyeyasu.

There is another street in Tokyo named after a Dutchman who came out with Adams in the ship "Charity;" his name was Jan Joosen and the street is called Fai Fostugashi to this day. This man's name frequently appears in Cocks' diary and I think he died in Japan.

On October 21st, 1616, Adams, in returning from Yedo to Hirado by the Tokaido, met with a nasty accident at the village of Fui, just beyond Kambara, where he had dined. His horse startled by a bird flying out of a hedge threw him and dislocated his shoulder; it was not properly set and he suffered, for it was frequently coming out of joint again.

*Temma-cho*, from whence Adams' Japanese wife came (it means Pack-horse-relay-street), is the oldest part of the city of Yedo. Here in ancient times was one of the numerous travellers' stations on the route from the northern provinces to the southern. In the villages containing relays of horses, coolies, kagos, &c., the Daimyos and lesser folk could rest or lodge, obtain entertainment for man and beast, and fresh reinforcements of either. At the present day the people born in the immediate neighbourhood of *Temma-cho* boast with pride of their birth in the oldest part of Japan's capital, believing themselves to be therefore Japanese of the Japanese, of specially pure blood and peculiarly children of the Empire of the Rising Sun.

Adams in his many journeys up and down the *Tokaido* was no doubt well known there, and thus probably became acquainted with the daughter of the officer of *Temma-cho* Ward.

In conclusion, I would like to say that our Japanese friends are at this moment taking a great interest in the matter of Will Adams, and wish to erect some permanent memorial to his memory. I am not in a position to state exactly what shape that memorial eventually will take, but the idea of making a park or public recreation ground in the neighbourhood of the tomb has been mentioned, and this seems most appropriate, and in any such scheme I am sure Englishmen in Japan, or those who have been here, would wish to be associated.

#### THE LAW COURTS.

##### CLAIM AGAINST THE O. & O. COMPANY.

A case instituted by a Chinaman named Lee Huan Tong, No. 146, Yokohama, against Mr. B. C. Howard, Yokohama agent of the O. & O. Steamship Co., claiming yen 108.90, came up again on April 7th in the Yokohama District Court before Judge Nakanishi, when a Chinaman named Lishung-chau was examined as a witness.

Lishung-chau deposed that he received a quantity of bananas by the *Gaelic* from Honolulu, which she left on Oct. 20th last. The fruit was putrid when the steamer arrived. He did not know whether she brought another lot of bananas bearing the mark of "B. Y. Rai." Previously, he imported the fruit two or three times, but on every occasion it was found rotten. For the putrid fruit, he did not pay duty.

Plaintiff's Counsel asked the Court to adjourn the hearing as it was necessary to have a certificate from the Finance Department for the duty which his client paid at the Yokohama Customs for bananas undelivered to him by the ship's agent.

The Court granted the request and adjourned the case till April 21st.

##### CLAIM FOR LANDING CHARGES.

This case, in which Capt. A. Weston claims yen 1,036.59 from the *Compania General de Tabaco de Filipinas*, came up again on April 8th in the Yokohama District Court when Judge Yasuda delivered judgment in favour of plaintiff with costs.

##### CLAIM AS TO DISTRAINT.

In the Yokohama District Court, the hearing of an action instituted by a Chinaman named Chao Fenshi and one other, who petitioned for the cancelling of the seizure of a house by Mr. P. Helm, began on April 8th before Judge Yasuda.

Plaintiffs were represented by Mr. Tanuma and defendant by Mr. Nagashima.

Plaintiffs' counsel stated that the house, situated in the compound of No. 121, Yamashita-cho, which was jointly tenanted by plaintiffs, five other Chinamen and Mr. Helm, so that defendant had no right to distrain upon the building for his own convenience.

Defendant's counsel contended that the property in dispute was connected with another case lodged by Mr. Helm against Su-fangchee, a Chinese merchant, claiming yen 248 in which proceeding his client had given sufficient explanation as to the reason of the seizure of the building.

Parties produced their evidence to the Court and gave explanations, after which the Court adjourned till April 20th.

In the Saseho Prize Court, two decisions were delivered on April 10th with reference to the British steamers *Roseley* (4,370 tons gross) and *Lexington* (4,421 tons gross) confiscating the vessels and their cargoes. The former was captured on Jan. 11th on her way to Vladivostok with 6,500 tons of Cardiff coal and the latter was captured on the following day en route to the same destination with some 6,000 tons of coal.

#### A BUILDER'S CLAIM.

In the Yokohama District Court, judgment has been given in a case instituted by Mr. C. B. Clausen claiming yen 1,182.69 against Mr. S. Komor, before Judge Nakanishi. The Court ordered defendant to pay yen 711.38 to plaintiff and dismissed the latter's claim for the remainder.

#### NEWS OF THE WEEK.

On April 4th, two floating mines were observed off Chefoo. One of them was exploded by the Japanese.

Viscount Yoshikawa, Minister for Home Affairs, left Shimabashi on April 12th by the 6 p.m. train for western cities.

Colonels Y. Tada and S. Nitahara have been promoted to the rank Major-General and thirty-four sergeants have been made ensign.

On April 11th, 1,117 Russian prisoners were brought from the front to Moji. After disinfection at Dai-ri, they were removed to Fukuoka.

On April 6th, 975 invalids returned from the front to Osaka and 331 to Sendai. Forty-three Russian officers from the Mukden region have arrived at Yamaguchi.

Mr. S. Ishida, Chief of the Yokohama Harbour Office, and Mr. A. Yato, an official of the same office, have been decorated by the King of Italy with the Fourth Class of the Crown.

At 2 p.m. on April 11th, a conference was held in the Military Staff Office. Marquis Yamagata, Chief of the Staff, General Terauchi, Minister for War, and other high officers of the Army were present.

An official telegram reports that on April 6th 594 Russians, including 4 officers, left Dairen and 97 left Yongsanpho all for Ninoshima. The transport of the captives from the Mukden region is now concluded.

A telegram from Takamatsu reports that a Russian captain of cavalry in detention at Matsuyama has assaulted one of the guards. On April 11th, he was removed to Marugame, where he will be tried by Court-Martial.

On the morning of April 6th, Prince and Princess Arisugawa arrived at Shanghai. They did not land there in consequence of the slight illness of His Highness. Mr. Odagiri and the foreign consuls visited the *Prins Heinrich*.

Sir Francis Jeune has not long survived his retirement from the Bench. As President of the Probate, Divorce and Admiralty Division of the High Court of Justice he filled a difficult position with great success, his scholarly attainments and his legal abilities being of a very high order.

A few minutes after 6 o'clock on Thursday evening a very severe shock of earthquake was felt in Yokohama. Fortunately it was not of long duration else considerable damage must have resulted. As it was many houses on the Bluff have to lament broken vases and ornaments and damage to wall and ceiling papers.

The Foreign Office, according to the *Official Gazette*, has received a telegram under date of April 11th from Mr. S. Morikawa, Japanese Consul at Vancouver, that a bill relating to Japanese, similar to that drafted in February last year, was submitted to the Legislature of British Columbia and was passed without alteration, being immediately sanctioned by the Governor. It was at once promulgated as a law. It may be

added that according to a telegram dated Jan. 25th from Mr. Nosé, Japanese Consul-General at Ottawa, which was published in the *Official Gazette* of Jan. 27th, the bill referred to in the foregoing message was drafted in February, 1904, and rejected on Jan. 20th by the Governor after it had passed the Legislature.

On Monday evening, April 10th, General Terauchi, Minister for War, entertained Sir Claude M. MacDonald, British Minister, and his staff at the official residence, when General Sakuma, Lieut.-General Haraguchi, Major-Generals Yamada, Takeuchi, Okazaki, Murata, and Nagaoka, and other officers of the Army were present.

According to the *Courrier d'Haiphong*, there is now no hope of saving the *Sully*. The position of the vessel is not ameliorated in any way, in fact news received from the scene of the wreck indicate the reverse is the case. The *Sully* is now in a worse position than before, being further on the rock, and water now reaches up to the fore-head turret. She cost £1,000,000.

Mr. Kaneko Yonekichi, one of the composers of the *Japan Mail*, has been drawn as a conscript of the Fifteenth regiment of Artillery, First Division. He left on the morning of April 9th for Tokyo being escorted by the usual band at the head of a procession carrying long flags bearing Chinese characters congratulating him upon going to take up an honourable duty. When the procession passed the *Japan Mail* Office bombs were discharged in the conscript's honour.

The wedding of Mr. Gerard A. Lowther, C.B., British Minister to Morocco, son of the Hon. William and the Hon. Mrs. Lowther, and Miss Alice Blight, daughter of Mr. Atherton Blight, of Philadelphia and Newport, U.S.A., and Cannes, took place at All Saints' Church, Ennismore-gardens, in February. Mr. Harold Lowther was his brother's best man. The Bishop of Bangor, cousin of the bridegroom, performed the ceremony, assisted by the Rev. W. Inge.

A case of plague has appeared among the inmates of the military hospital at Ujina. He was a soldier named M. Ishihara, and died at 8 p.m. on April 10th. All the other patients who are under treatment for wounds or illness have been removed to another place, where they are segregated. A Hiroshima telegram to the *Asahi* adds that Ishihara was suffering in January from dysentery at Fentanien and was removed to a hospital at Antung. Having left there on March 29th he arrived on April 5th at Ujina.

The 14th annual meeting of the Nippon Cocoon and Raw Silk Society was held on April 9th, in the Sankwaido Club, Akasaka, Tokyo, when Baron Kiyoura, Minister for Agriculture and Commerce, Governor Senke of Tokyo-fu, Mr. Soyeda, President of the Bank of Industry Encouragement, and some two hundred officials were present. Mr. Edward de Bavier, of Switzerland, was elected an honorary member of the society. Baron Kiyoura and other officials of the Department of Agriculture and Commerce gave speeches on the subject of the industry.

The marriage was celebrated on Saturday at Union Church of Miss Adelheid Glahn and Mr. W. R. Devin, of the American Trading Company. The bride, wearing white satin, with veil and orange blossoms, was given away by her father, Mr. C. Glahn, Miss Christiansen being bridesmaid and Mr. P. H. Wootton best man. The ceremony was performed by the Rev. J. L. Dearing, Mr. W. K. Vincent being at the organ. The Church was very tastefully decorated. Afterwards a reception was held at No. 66, Bluff, where many friends assembled to meet the newly wed couple.

Telegrams from Moji and Kokura say that the Tokyo Commercial Navigation College's training ship *Trukishima Maru*, which has been missing since November, 1900, is reported to have been found on April 4th among the steamers sunk at Port Arthur. She was repainted in Russian style. It may be remembered that this ship left Muroran, Hokkaido, on Nov. 13th, 1900, with 7 officers,

79 naval cadets, and 36 seamen for Shimidzu, where she was expected to arrive on the 20th. Since then she has been missing and consequently it was feared that she met a storm on her way south and that she must have been destroyed or have stood out into the Pacific. On Dec. 7th, of that year the warships *Musashi*, *Tokitsuna* and *Yoshino* were despatched from Kure to search for her, but all efforts proved in vain.

The March number of *The Missionary Review*, published by Funk and Wagnalls Company, New York, contains several articles that will be read with interest by people in the Far East. There is a very informing and suggestive contribution on the Welsh revival—or Pentecost, as it is called—to which we have already made reference; a good story as to Henry M. Stanley's enthusiasm in connexion with mission work in Africa; a paper by Rev. Dr. G. W. Kuox, "Do the Japanese need Christianity?" another on "Japanese Progress and Purpose" by Rev. Dr. S. L. Culick, and still another by Dr. W. E. Griffin on "Past and Present Christian work for Japan." The Magazine has also other articles of general interest.

According to official investigations made on April 7th, Russian prisoners in Japan are as follow:—

Division.	Non-Commissioned officers.	
	Officers. & men.	Total.
1st	Narashino..... — 3,000	3,000
	Sakura..... 10 3,110	3,120
	Takasaki..... 11 511	522
2nd	Sendai..... 37 2,215	2,252
	Shidzuoka..... 109 110	219
3rd	Toyohashi..... 40 40	80
	Nagoya..... 111 1,108	1,219
	Hamadera..... — 27,925	27,925
4th	Otsu..... 20 1,510	1,530
	Fushimi..... 20 1,529	1,549
	Ninoshima..... 47 1,927	1,974
5th	Yamaguchi..... 46 500	546
6th	Kunamoto..... 20 1,968	1,988
9th	Kanazawa..... 37 4,485	4,522
10th	Himeji..... — 2,185	2,185
	Fukuchiya..... — 1,100	1,100
11th	Matsuyama..... 393 3,280	3,673
	Marugame..... — 350	350
12th	Osato..... — 1,963	1,963
	Kokura..... 20 30	40
	Fukuoka..... — 1,805	1,805
	918 57,841	58,759

The foregoing figures do not include men still at Port Arthur and who are kept in hospitals in Mukden on account of serious wounds or illness or those on their way from Dairen to Japan. Meanwhile it is added that on April 10th, 15 officers and 402 men were brought to Ujina and were removed to Yamaguchi or Matsuyama.

#### AMERICAN TOPICS.

Mr. Secretary John Hay is suffering from nervous exhaustion, due to overwork.

The U.S. War Department finds that it will be obliged to decline to send regular troops to the encampment of State militia organizations for the reason that funds for transportation are not available.

The Coroner's jury appointed to inquire into the cause of the death of Mrs. Stanford, found that death was due to strychnine poisoning, the poison having been introduced into a bottle of bicarbonate of soda with felonious intent by some person or persons to the jury unknown.

Speaking at a recent meeting of the American Tract Society, President Roosevelt said:—

"No greater work can be done by a philanthropic or religious society than to stretch out the happy hand to the man and woman who come to this country to become citizens and parents of citizens, and therefore to do their part in making for the future of our land. If we do not take care of them; if we do not try to uplift them, then, as sure as fate, our own children will pay the penalty. If we do not see that the immigrant and the

children of the immigrant are raised up most assuredly our own children, and our children's children are pulled down. Either they will rise or we shall sink. The level of well being in this country will be a level for all of us."

Washington correspondents appear to believe that Mr. Roosevelt is approaching an open break with his party leaders. The correspondent of the *New York World*, under date of March 5th, says: "President Roosevelt begins his administration with the hostility of congress well developed, and the indications are that before the close of his four-year term he will be more bitterly antagonized than was Grover Cleveland, who retired with only three Senators of his own party left to defend his policies. The Fifty-eighth congress, at the three-month session, which closed at noon yesterday, ignored and rebuked the President as no previous body of legislators has ever done. Nearly every recommendation made by the chief executive was ridiculed and rejected. Apparently all that required to defeat a measure was the knowledge that the President urged and approved it."

The annual report of the Bureau of Statistics of New Jersey shows that the making of silk goods had maintained its place as the State's leading industry, and New Jersey still holds a position far in the lead of all other states in the Union. The census of 1900 gave the value of the product of silk goods in the United States at \$107,256,258, of which New Jersey mills produced \$39,966,662, or 37.3 per cent. of the total. The figures for 1903 show a very great increase in the industry, and there seems to be good reason for believing that New Jersey silk mills are now turning out a far greater proportion of the country's output of silk goods than was credited to them in 1900. The average number of persons employed in 1903 was 28,281; amount paid in wages, \$11,328,537; the total value of material used, \$29,415,112, and the total value of goods made \$49,835,589.

All is not well in the U. S. State Department, and gossippers are busy asking whether Secretary Hay or Assistant Secretary Loomis will withdraw from the department. They are said to have quarreled violently lately, and it is reported that Secretary Hay has intimated to the President that Loomis will have to go, or that he himself will retire. Loomis has left for California, where he will spend some time on his ranch. It is said he desires appointment as an Ambassador or some other equally important place, and that this arrangement may be made in order to bring about peace in the State Department. Current talk in the Senate is that Loomis, and not Hay, drew up the treaty with Santo Domingo, and that recent developments requiring Hay to give out interviews supporting and defending the treaty have been intensely distasteful to him. Nothing official can be learned in this connection, all of Secretary Hay's utterances being loyal to the President and giving no indication of the quarrel that exists between himself and Loomis. Many things have occurred, however, within the knowledge of Senators, who do not hesitate to tell of them, showing that there must be a change in the department before long.

In accordance with custom, statements regarding the appropriations made by Congress at the session just closed were laid before the country by representatives of both the majority and the minority. There is no conflict as to the amount of the appropriations. For the fiscal year ending June 30, 1906, they amount to \$318,478,914, which represents an increase of over \$37,300,000 as compared with the preceding year. The total is large and the increase is not an insignificant one, but Mr. Hemenway, speaking for the majority of the House Committee on Appropriations, says that the figures represent the governmental operations of a great and rich nation. For the current fiscal year Mr. Hemenway expects that the deficit will not exceed \$18,000,000, and Senator Allison says that the deficit for the fiscal year beginning next July will be no greater than that for the current one. Mr. Livingston, speak-

ing for the minority, points out that against the total of appropriations mentioned above for the fiscal year ending in 1906, the predicted revenues amount to only \$725,590,515. There is here a wide margin, as will be seen, amounting to over \$27,800,000. In explaining the difference between the two estimates as to the net result of the fiscal year, Senator Allison says that of the permanent appropriations \$30,000,000 was for redemption purposes and \$57,000,000 was for the sinking fund, neither being expenditures in the usual sense of the word.

The franchise under which all the surface traction companies in Chicago now operate have expired and the lines are being carried on under licenses until a settlement with the city shall be effected. This issue is paramount in the mayorality election to be held the first Tuesday in April. A Chicago correspondent of the *New York World* says that the indications point to Judge Dunne's election, and adds: "Mr. Patterson's attitude is held to be indicative of the turning of thousands of younger republicans and the younger voters of Chicago generally to Judge Dunne and the campaign to save Chicago's streets from the J. Pierpont Morgan and Wall street traction crowd, to whom Harlan has surrendered. R. W. Patterson said: 'I have great respect for the sincerity of my son's convictions, but I think he has acted without giving the subject all the consideration its importance deserved. The *Tribune* will continue to give its hearty support to Mr. Harlan.' Judge Dunne said: 'Mr. Patterson, jr., has for a number of years been interested in the practicability of municipal ownership, and on finding himself convinced in regard to the question he has shown himself strong enough to break away from the influences of his gilt-edged surroundings. He is a type of the young American with lofty convictions from plutocratic environments and capitalistic surroundings.'"

In the appropriation bill as it passed the Senate, Mr. Roosevelt gets the two new battleships, but Walter Wellman, writing in the *Chicago Record-Herald* says that this appropriation is "accompanied by the warning that this is the last for some years to come." Referring to this action by the Senate, Mr. Wellman says:—"The Senate has served notice upon the President and the country that the growth of the navy must now be stopped. It appears to be the consensus of senatorial opinion that the American navy is now really the second navy of the world in fighting efficiency, ranking next to the British navy and ahead of the French navy, and that this is enough. Here is the place to pull up. The future naval policy of the United States should be simply to maintain the present strength, replacing old ships and keeping the efficiency of the establishment up to the mark of to-day. Thus another of President Roosevelt's policies strikes an obstacle in the Senate. The thing he has done most talking and writing about since he became president is the need of going on with the upbuilding of the navy. He has championed the big navy in almost every public address he has delivered as president, but here comes the Senate—republicans as well as democrats—with the plainest sort of notice that the limit has been already reached. The navy is big enough. Henceforth we should simply maintain what we have. And so far as the Senate is concerned there are to be no more big battleships, no more additions to the fighting line."

Over half a million dollars will come back to Hawaii from the United States Treasury as a result of the decision of the United States Court of Appeals in the State of New York in what is known as the sake cases. These cases had their origin in Honolulu, though for convenience of testing the matter a small importation of sake was made at New York, and an appeal taken from the assessment of duty made by the Collector of Customs in New York. The Collector at Hawaii classified it as a light wine, dutiable at 50 cents a gallon. The importers, acting on the advice of H. J. Johnston, a customs broker, formerly of San Francisco, appealed from the classification, claiming that it was not a wine, but a beer, and

should pay a much lower rate of duty. The Board of General Appraisers decided against the importers, sustaining the Collector. Then the importation was made at New York, and an appeal taken to the courts. Two courts have now decided that it should be classified as an unenumerated article and duty should be assessed at the rate of 9 cents a gallon. The Hawaiian importers have been paying duty under protest, and under this decision will be entitled to draw back the difference between 9 cents a gallon and 50 cents a gallon on all that they have been importing during the four years or more that the litigation has been pending. These duties, which must now be returned, amount to over \$500,000.

## CORRESPONDENCE.

## RELIGIOUS SENTIMENTS OF ENGLAND AND AMERICA.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In the columns of your valued journal we have of late been treated to some views of the religious sentiments or tendencies prevailing or supposed to prevail in England and America. After reading newspapers for over 30 (thirty) years I have been impressed by the fact that secular newspapers and especially their editors discuss religious topics more frequently and freely and more sympathetically I believe, than they used to do some 15 years or so ago. Formerly religion and religious topics were thought of as tabooed subjects for discussion outside certain clearly defined circles. Now we find papers, the secular daily newspapers, which have no connection with any church or religious organization, discussing religious topics in their editorial columns just as they discuss other topics which are of interest to the great mass of their readers. Some of them in fact have a leader on some social-religious topic in their columns regularly once a week. May I ask you to insert the enclosed clipping, which is an editorial from the *Montreal Witness*, of Feb. 21st, 1905. The *Witness* is a daily and weekly independent newspaper of wide circulation and influence and this editorial will be of interest to many readers of the *Japan Mail*, not simply because of what it says but also because of the fact to which I have referred above. At least so your humble servant thinks.

April 5th, 1905.

D.

## THE AGNOSTIC REVIVAL.

For some little time a movement which has been dignified with the name of an "agnostic revival" has been on foot in England. Cheap editions of books of a materialistic tendency have been placed upon the market, and old, threadbare and discredited arguments against religion in general, and Christianity in particular, have been furnished up and displayed to the wondering gaze of "the man in the street," as the latest and best word philosophy and science have to offer regarding man, his origin, character and destiny. Some one has likened the progress of mankind to that of a great army, in that the ground traversed by the pioneers one day is trodden by the rank and file the next. The arid waste of materialism and agnosticism was passed by many devotees of science a generation ago. Then, such men as Darwin and Huxley sought satisfaction in it, but discovered none. Herbert Spencer before he completed his "Synthetic Philosophy" perceived its inadequacy, and men like Sir Oliver Lodge declare their passionate belief in the spiritual character of the universe. Those who join their faith to Haeckel and his school place themselves with the "camp followers" of thought thirty years "behind the times." Religion is one of the primary and essential instincts of the human soul, and it is unscientific to eliminate it from any survey of the race and its history. Tolstoy, who is a free thinker if there is one anywhere, describing the conditions which surround him, says, some men, seeing the discord between modern science and religion as it is preached, have decided that no religion is necessary, and live without it. "Yet a religion which answers to the demand of our time does exist, and is known to all men, and in a latent state lives in the hearts of men of the Christian world. That this religion should become evident to and binding upon all, it is only necessary that the educated classes—the leaders of the masses—should understand that religion is necessary to man, that, without religion, man cannot live a good life, and that what they call science cannot replace religion."

It is doubtful if a genuine materialist ever existed. To be logical he must be moved only by "enlightened self-interest" and disown every claim of honour, patriotism, love and all those sentiments which continually lead mankind to sacrifice physical advantage to the welfare of others or even an idea. This belief that our true end is not to taste sweet things, but to do public and true things, is

rendered involuntary homage every day by thousands who have a suspicion that they have touched the bottom rung of the ladder whose top reaches to heaven. The "street Arab" who pores over the veriest novel or gazes open-eyed on some dramatic delineation of outlawry and violence in his heart worships his "hero," not because he is a criminal, but because he is strong or clever—sometimes because he presents a dim vision of the chivalry which "rides abroad, redressing human wrongs," fearless of the cost to itself. It is upon this instinct of "hero-worship, heartfelt, prostrate admiration, submission, burning, boundless, for a nobler godlike form of man" that Carlyle found "all religion" founded, and it is this element which has its fullest exemplification in Christianity. This faith among all others which have ministered to the needs of men, has dared speak of self-sacrificing love as the temper most truly god-like and to see the divine glory centre around a cross. It is also a strong presumption in favour of Christianity to see how, as the message of the gospel is becoming more fully understood, the eyes of good men of every religion and of no religion are turning to Christ as the desire of all nations. Jewish philosophers to-day, while rejecting the Athanasian formula, are glad to acclaim Jesus as the Messiah. In the Eastern world the clearest thinkers are beginning to see in Christianity the fulfilment of the longings of their own prophets. Roman recognized in the teachings of Christ the "eternal religion of humanity—in one word, absolute." Tolstoy finds in God, whom he "cannot comprehend, but yet can love," rest, strength and consolation, and while denying the supernatural in the Gospels, finds in them the only salvation for the individual or the race. Martineau, who sounded the depths of every philosophy, "saw in Christ the supreme vision of what God is in Himself, and of what he designs for his creature man, to become, in short, the accepted interpreter of heaven and life."

But strong as are such testimonies there is a greater, that of experience. Stevenson tells us how in a crisis of his life he was awed by finding himself "come about like a well-handled ship," for then he found that unknowingly he had on board "that unknown steersman whom we call God." Those good people who say to us that the Bible is "the only word God ever spake or ever will speak," seriously misunderstand its import. "As the Lord God of Israel liveth before whom I stand," is a "confession of faith" as applicable in these days as in those of Elijah. He who accepts it will see in the grand and orderly procession of nature and of history one great and unbroken miracle. In his own nation he will discover a "chosen people," dignified by the reception of inspired teachers, psalmists, heroes and statesmen. In his own life he will find the hand of God, as really as in that of Moses or St. Paul, and as the promised presence goes with him he will find questions of faith and conduct solved by a sacred "alchemy of influence." This is an "evidence" which cannot be gainsaid. It is attainable by every one, but not always without a struggle. Upon how this battle is fought much depends. There is all the difference in the world between the "Where is now thy God?" of the scoffer, and "Oh, that I knew where I might find Him!" of Job—between the cynical "What is truth?" of Pilate, and the "Tell me now Thy Name," of Jacob. With the latter spirit a man becomes a "prince with God," and the darts of scepticism will fall harmless from his shield, for, sooner or later, he shall learn to say "I have heard of Thee by the hearing of the ear, but now mine eye seeth Thee."

## THE MUKDEN INCIDENT.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In to-day's issue of the *Japan Daily Mail* it is stated that according to the reports of Chinese 120 Japanese captured at Haikaitai were paraded through the streets of Mukden after the manner of condemned criminals; it is further pointed out that their story must be taken at proved because there has been no Occidental witness to refute it.

As I, however, was present at Mukden at this time and saw very well the bringing in of the Japanese prisoners may I state that they in no way were escorted like criminals; they walked freely, without fetters; they only were accompanied by Russian soldiers just as Russian prisoners are escorted on their way by Japanese troops. The prisoners went straight to the military prison and there was no mention of parading them through the streets.

A correspondent should carefully test the reports of so-called Chinese eye-witnesses before wiring them.

On the other hand the situation of the newspaper men in this war is so miserable that I can understand why they feed their readers with insignificant stories of cruelties, breach of neutrality, and acts of heroism of single men, etc. Serious military reports are prohibited by the censorship.

With regard to the feelings of the Manchurian people towards the Japanese, I had a most striking

experience. Asking several Chinese at Liaoyang and Yentai whom they like better, the Japanese or the Russian, they unanimously replied: "The Japanese don't beat us but they pay very little."

Asking you kindly excuse my bad English I have the honour to be,

Dear Sir, yours obedient servant,

BARON KRIEGLSTEIN.

War Correspondent formerly with the Russians.

Tokyo, April 10th, 1905.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—In reply to your item concerning the Mukden "Outrage" in to-day's issue I can only once more assure you in the strongest terms that there has never been any parading of Japanese prisoners through Mukden after Haikaitai. Who knows the Chinese knows very well that they, in time of conflagration and war, immoderately exaggerate the facts and that they always tell those stories which are disgraceful to the absent and the weaker party.

Before the Battle of Mukden many Chinese were firmly convinced that they would be killed if the Japanese should reach Mukden. Many of them, men and women, asked me to protect them. I, as a neutral and equitable man, laughed at them and gave them advice to confidently remain in their houses.

I once more state in the strongest terms that Japanese prisoners never have been ill-treated by the Russians as far as I know, they were looked at with great curiosity and consideration, presented to the commanders and then carefully conveyed to their quarters. The Russians are by no means brutal and malicious people, but very good-hearted and gentle, even too gentle in my mind.

You state that this story seems to have satisfied the Japanese Staff and therefore you publish and republish it; well, I, in sending you my article yesterday, thought that it would be agreeable for the parents of the Japanese prisoners at Haikaitai to know that their sons had not been outraged at Mukden. I believed it to be my duty as a neutral to lessen, as far as one can and knows, untrue reports disturbing the people at home.

But as I see that, on the contrary, the outrage blunder is "satisfying" the Japanese Staff and, of course, the *Japan Daily Mail* too, I have nothing more to say and may close the investigation on my side.

I have the honour to be, Dear Sir, your obedient servant,

BARON KRIEGLSTEIN.

Tokyo, April 12th, 1905.

[Our correspondent must know that the Chinese are not alone in the propensity he attributes to them. His denial will be accepted in the spirit that dictates it, but he understands as well as we do that a simple negative does not suffice to overthrow many affirmatives. We may note also that the Chinese story was told long before the battle of Mukden.—ED: J.M.]

## Y. M. C. A. ARMY DEPARTMENT.

Fungwanchen (Hoojo). The following are extracts from reports of Secretary Hibbard.

March 13, 1905.

"We have opened a branch at the hospital. A good room 12 by 36 was set aside and put in excellent shape for our work. Benches, tables, hibachi, etc. were all provided and a man detailed to look after the place. We provide magazines, giban shogiban, phonograph, tiffin, decorations, barber tools, post-cards, etc. Yesterday was the first day of our work there. Takabatake and Chiba san took charge here (the Chinaman does our cooking) and I went to the hospital. The men crowded in at once, hopping and limping and crawling. Such a crowd you never saw. Here is a man shot through the thigh. The surgeons cut away his trousers and drawers above the wound, but the leg still being good needed trousers and the patient wears the amputated portion of his trousers stocking-fashion, with a string tied round above the knee. There is a man shot through the calf of the leg and his trousers ripped up to the knee, so that as he limps across the court one leg has an odd nautical look, while the other is strictly "rikugun." Here again is a familiar face, all smiles in reminiscence of frequent meetings in Antung. Shot through the hand and almost well. All are long-haired and the greatest luxury we can give is a hair cut. We have each become fairly proficient with the clippers and while I clipped the men chatted freely. "Hello! have you got so you can walk?" This as a new figure dragged itself across the court. "Hello don't you belong to regiment?" Yes. "Well what became of—?" "I thought he was hit pretty hard. Is he dead, do you know?" "Where did they get you?" "Oh in my chest, but it's getting along all right." "Did the ball go clear through?" "No, it stopped inside and the surgeon left it." "Say

you," this to me, "where does this Guntairokwa come from?" Follows a brief statement of the principles of Christianity. "Do you make many converts?" "No, we don't have opportunity for sufficient teaching here, but we hope that some of you fellows will have enough interest to follow it up later." "Narahodo!" Well, most of us haven't enough religion to hurt us. It looks like a good thing. Religion is a good deal in demand with us over here. About four o'clock I brought the phonograph back here. Seven hours with a lunch snatched by mouthfuls is enough for one dose. I think the work at the hospital will nearly double our efficiency.

March 18th, 1905.

Yesterday the usual daily installment of wounded from the front rose to four hundred. When a little after nine I reached our branch at the hospital, I found the man who is usually on duty there had been withdrawn for special hospital duty and there were fires to build and other preparations to make. Already the patients were coming in and soon I was busy clipping heads. By noon I had finished thirty and came back here for lunch. After lunch Takabatake went to the hospital and I took his place in the rooms, passing out soap, patches, and continuing the hair cutting. Late in the afternoon one man spoke to me as I was crossing the yard and asked me to please wash his face. A glance and I had no thought to refuse. Both hands torn by a field gun they were neatly dressed and hung in slings from his neck. His hair which had not been cut since before Christmas was all down over his face and ears. His face, which he said he had not been able to wash for five days before he was wounded, had naturally not been washed in the fifteen days since and was unspeakable. I cut his hair, shaved him, washed head and face and as much of his body as I could without undressing him, and found a more than usually fine face under the grime. He said frankly that he could not speak his gratitude and he wouldn't try.

While eating supper a man came in with a question about the correspondence room and lingered to ask me if I would pray with him. So he shared the remains of the supper and then we prayed together as well as my Japanese would permit. Just above his temple was the mark of a rifle ball, showing how close he had walked to death. As we count up the totals for the day, we find 501 different men writing letters, total about 1500 letters; 150-160 haircuts (of which 90 are on my score); 100 doing laundry work. These are counts, not estimates, and on these and other data we base the estimate of 2,000 visitors during the day. Among the callers were the Chief of Staff of the Yalu Army and his chief aide, who called to pay their respects and express their thanks for a dinner to which we invited them a couple of days ago. Other commissioned officers called and in one or two cases took special pains to express their appreciation of the work. It is not too much to say that we are getting all the appreciation we have any right to expect.

Yingkow. The following is taken from a report of Secretary Gleason.

March 18.

Mr. Kawasumi has just returned from his third tour to the front. He was away from here nine days, and in that time he visited five different hospital points, and was in Mukden three days after his fall. He spent one day in investigation, but, as anyone might imagine, the officers were so busy that although he met one of the generals he had no time to speak of the opening of the work. But many here, farther from the front, are often telling us that we ought to aim for Mukden next, and only do visiting work at the hospitals in Liaoyang. Everywhere he was welcomed in the hospitals, giving cheer to the sick and dying with the gramophone and a Christian talk and prayer, distributing postal cards, writing last messages for those who would never see their dear ones again, and in one case writing one poor fellow's will. Two nights in hospitals where the men were in too much pain to sleep, he stayed with them until one o'clock in the morning, giving what help he could to make them forget their pains. He used the gramophone until every pin he could get hold of in this part of the country was more than worn out. And now he is on his way back to Japan. We hope that he may be used to stir up such interest there that plenty of men and supplies of gramophones, tracts, testaments, magazines, picture books and stationery may be sent at once so that we may work faithfully until the last wounded man has returned to Japan, or recovered here.

Yesterday after hearing Mr. Kawasumi's thrilling report, I urged Mr. Fujii to leave me in charge of the work here and go to the hospital at Tashichao and Haichang, which are only a short train ride from here and write letters, give out tracts and magazines, and in every possible way comfort those who need it sorely. He at once took up with the suggestion and has gone. It is our hope that we may have enough men here so that any time we can send out at least two to visit wherever there is need.

There seems to be a probability that the need will last for some time yet.

Tokyo Headquarters. Written permission has been received from the Manchurian authorities to open work in Port Arthur, and a suitable building has been granted. This point will be occupied as soon as supplies and men can be put on the ground.

Six secretaries have been secured and are to sail within the next week. For Yingkow: Kimura Saimatsu, Miyake Aibi, J. G. Dunlop. For Dairen (Dalny) Sekihara Kiyomatsu.

#### TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

#### LIBERAL ELECTION VICTORY.

London, April 7.

The bye-election at Brighton has resulted thus: Villiers, (Liberal) 8209; Loder, (Conservative) 7392. The result was received in the House of Commons with the wildest enthusiasm on the part of the Opposition. At the conclusion of the sitting Mr. Lloyd George and others demanded dissolution, declaring that the election was an expression of the disgust of the country with the Government. Mr. Balfour's absence was also criticised.

#### GERMANY AND MOROCCO.

The German Ambassador at Washington has called upon Mr. Taft at the War Department and left a memorandum stating that Germany stands for the open door in Morocco as well as in the Far East, for the preservation of the *status quo* and the safeguarding of the commercial interests of all nations. France was not mentioned in the memorandum, which has been communicated to President Roosevelt.

#### THE KING'S MEETING WITH LOUBET.

Later.

Although the meeting between King Edward and President Loubet was mooted prior to the Emperor William's visit everywhere to Tangier, it is regarded as an unmistakable affirmation of the Anglo-French *entente* with special reference to Germany's interposition in Morocco.

#### GERMAN DIPLOMATIC CHANGE.

The German Minister at Morocco has been recalled. Dr. Rosen, the negotiator of the recent treaty with Abyssinia, has been appointed as his successor.

#### POBYEDONOSTSEFF RESIGNS.

Privy Councillor K. P. Pobiedonostseff, the reactionary Procurator of the Holy Synod, has resigned. The Patriarch (? Antonius, Metropolitan of St. Petersburg) has been elected head of the Church. This is the outcome of the new reform tendencies in the Church.

#### ALLEGED BONAPARTIST PLOT.

London, April 7.

A sensation has been caused in Paris by the seizure in the suburbs of stores of military uniforms and cartridges, believed to be in connection with a Bonapartist plot to seize the President and Ministers and overthrow the Republic. Two arrests have been made, including a half-pay captain.

#### FRANCE AND MOROCCO.

Later.

M. Delcassé, the French Minister of Foreign Affairs, has made a brief statement in the Senate, explaining carefully, in chosen phrases, that France will continue to give advantageous advice to Morocco as a friend, seeking to injure none and ready to discuss any possible misunderstanding with anyone.

#### A RUSSIAN REPORT.

General Kharkevitch reports that the Japanese have been forced to retire from Erdaheze to Salushu.

#### THE EARTHQUAKE IN INDIA.

During the earthquake, 140 Ghoorkas were killed owing to the collapse of stone barracks at Dhamasala, and 71 are reported as missing. Up to the present it is known that sixteen English people have been killed there.

London, April 9.

Five hundred Gurkhas were killed at Dhamasala. Three missionaries perished in the ruins of the mission house at Kangra.

#### RUSSIAN DOCTORS ARRESTED.

Several members of the Moscow medical congress have been arrested.

#### BRITISH POLITICS.

Mr. Gerald Balfour, speaking at Leeds, said the present British Government were resolved to remain in office as long as it possessed the confidence of the House of Commons.

#### TERRIBLE DISASTER IN SPAIN.

The face of a huge reservoir under construction near Madrid has collapsed. It is believed that there are 400 casualties. The King and his Ministers hastened to the spot and His Majesty is directing the rescue operations in person.

#### A FIGHT NEAR CHINGTU.

General Linevitch reports that a fight of 12 hours' duration occurred on the 4th inst. north of Chingtu. The Japanese losses were considerable.

[Note—According to the Japanese official report their losses are 26 and the Russian losses 200.—Ed. J. B.]

#### TO CHEER THE TSAR.

London, April 10.

On the occasion of the regimental fête Generals Kuropatkin and Linevitch telegraphed to the Emperor reporting the splendid bearing of the troops, whose devotion to the Throne was unbounded, while their confidence in ultimate future victories was fervent and unshaken.

#### THE BALTIC SQUADRON.

No further news has been received of the Baltic fleet since passing Singapore.

#### ANOTHER CHINESE OUTBREAK ON THE RAND.

Five hundred Chinese broke out of the compound at Jumpersdeep Mine yesterday, making for Johannesburg, but were driven back by mounted police, whom the Chinese stoned for three hours. The casualties were not serious. The Kaffirs assisted the police and twenty-eight of the Chinese were arrested.

#### THE BRITISH BUDGET.

In the British Budget for 1905-6 twopence per lb. has been taken off tea.

London, April 11.

The British budget shows a surplus of £1,414,000 for 1904-05, while the estimated surplus for 1905-06 amounts to £2,972,000. The tea duty is to be reduced after July 1 next, but the sugar and the income tax remain unchanged. The Government proposes to devote a considerable portion of the surplus towards redeeming the national debt.

#### THE RUSSIAN FLEET.

London, April 12.

A portion of the Baltic squadron, presumably that under Rojestvensky's command, with most of the battleships, are at Muntok, in Banca.

#### PARISIAN SYMPATHY.

The Municipal Council of Paris has sent King Edward condolences on the earthquake in India.

#### BRITISH TEA DUTY.

The tea-duty resolution has been adopted by the House of Commons.

## THE U. S. AND NEUTRALITY.

A Washington despatch says that the American cruiser *Raleigh*, with destroyers, has been ordered to Palawan to ensure neutrality. Neither belligerent will be allowed to use the Philippines for the convenience of his operations.

## THE ENTENTE CORDIALE.

London, April 13.

Extraordinary preparations are being made at Brest for the reception of the British fleet. The Municipal Council has voted unlimited credit for entertainments and the population are organizing independent fêtes.

## BRITISH POLITICS.

The British Government's majority in the House of Commons fell to 12 on the vote on a motion relating to education in Ireland.

(Received at the Military Head Quarters, on the afternoon of the 6th.)

## AT THE FRONT.

About 2 companies of the enemy's infantry, which had moved westward from the direction of Taulu, halted at the western extremity of Taiseiyo (about 10 miles west of Taulu and 27 miles east of Wei-yuan-pa-mun) at 11 a.m. on the 5th. There was no appearance of their subsequent advance.

A large part of the enemy defeated on the 4th instant near Kinkiatun changed direction towards Sumienching, and some retreated by the Zenghwa road.

On the evening of the 5th no signs of the enemy were seen south of Hsinlitun (about 7½ miles north of Kinkiatun).

(The first of the above telegrams appears to apply to the region where the Hsingking Army—otherwise called the Yalu Army—is operating.—ED. J. M.)

(Received at the Military Head Quarters on the afternoon of the 8th instant.)

## FIGHTING NEAR CHANGTU.

From about 3 p.m. on the 5th a battalion of the enemy's infantry and some six companies of his cavalry attacked Tsulushu (about 20 miles north of Changtu) but were driven back by our troops. The following day (6th) about 24 sotnias of his cavalry with guns advanced against the same place, but being counter-attacked by us, the greater part of them retired in the direction of Panmienching and one section halted at Chokayo (about 4 miles north of Tsulushu). Our losses in this engagement were 10 (including a non-commissioned officer). The enemy's casualties, judging from the number of carts used by him to carry off his wounded and from the number of bodies left on the field, can not have been less than 60.

(RECEIVED AT THE FOREIGN OFFICE.)

## KING EDWARD'S TRIP.

The newspapers announce that King Edward, who is to leave London for Marseilles on the 6th instant to meet the Queen, will have an interview with the President of the French Republic *en route*. All the English journals welcome this Intelligence with profound satisfaction, and declare that the meeting of the two potentates is not merely an indication of the strength of the Anglo-French *entente*, but also that, being arranged immediately after the German Emperor's visit to Morocco, it has a deep political significance.

The *Daily Telegraph* says:—This affair is not really an answer to the articles and hypothesis which have appeared in German newspapers with respect to the visit.

Other newspapers see in this meeting of the two potentates a demonstration in force against the German Emperor's action.

## THE HOUSE TAX.

The permanent President of the Hague Tribunal has informed Mr. Miyaoka, Japanese Minister in Paris and Representative on the House-tax Tribunal, that the latter will meet again at The Hague on the 15th of May.

## JAPANESE STEAMER LINES.

The Japanese Consul in Foochow telegraphs that the Osaka Shosen Kaisha's Fuchow-Shanghai-Hongkong line was opened on the 4th instant, and its Tamsui-Fuchow line on the 6th.

A Reuter telegram quotes a report from General Harkevitch to the effect that some Japanese troops have made their appearance in front of the Russian army on the Mukden road and on the Changtu-Maimai road.

The *Daily Mail's* Jibuti's correspondent, telegraphing under date of the 6th instant, says that Niebokotoff's squadron coaled from German steamers at a place ten miles from the shore. Visits paid to the various ships showed that the majority of the officers are young men without sufficient education. The squadron expects to leave Jibuti in three days. The four German coaling steamers have received orders, it is said, to await the coming of the ships of the Fourth Squadron.

The British steamer *Tara*, which arrived at Singapore on the 8th instant under the command of Captain Herring, reports that on the 7th at 1 p.m. she met the Russian Squadron of 47 ships in the Straits of Malacca. The Squadron included eight four-funnelled vessels, together with hospital ships, colliers, torpedoers and auxiliary cruisers. It was steaming eastward at a speed of 11 knots.

At 2 p.m. on the 8th the Russian Fleet passed the Singapore strait steaming leisurely. The outlines of the ships were seen distinctly from Singapore.

A telegram sent from Jibuti on the 8th to the Austrian Reports Bureau says that Niebstokoff's squadron left that place on the 7th steering south-east.

The *Novoye Vremya* writes as follows:—Not only did Russia not desire to fight, but it was sincerely her intention to make concessions so as to avert bloodshed. But the negotiations with Japan lasted 8 months and yet the Russian diplomats failed to achieve this purpose. On whom does the responsibility for that failure devolve? That is the question which has arisen. Does it devolve upon the Russian Representative in Tokyo at the time? Or does it devolve upon Alexieff? Or does it devolve upon the Foreign Office? Public opinion greatly wants to know who is blameworthy, and the only way to ascertain it is by means of the documents concerned.

## REVIVING TRADE.

Yingkow, 7th.

Since the opening of the river the steamers that have come from Japan total 30, and their cargoes have consisted chiefly of wines, bean sauce, *miso*, vegetables, salt-fish, fruit and charcoal. It is believed that other steamers coming afterwards will import similar articles. But among these things only those carried to order have found a market. Even the question of storing them is causing difficulty in some cases. There will be little demand hereafter for charcoal, and since vegetables, fruit and fish are perishable articles, heavy losses will be unavoidable unless dealers exercise great caution.

Further, since the opening of the port, some 700 Japanese subjects have arrived, and the 46 Japanese inns are now full of them. At present the stocks in the market consist of 200,000 pieces of bean-cake and 150,000 *koku*, of beans, but as these have been laid in since last year at

high prices, business has not yet been done, and exports to Japan are consequently small.

The Chinese have of late gained confidence, and in consequence Japanese war-notes have gone into circulation, and have risen to about par with Mexican dollars. Thus on the 6th instant 53½ *Kaikwan* taels were exchanged for 63.90 *yen* or 63 Mexican dollars.

## THE RUSSIAN FLEET.

The movements of the Russian Squadron are attracting great attention. It is generally believed that the squadron has not much chance of success in an encounter with the Japanese. Some of the Berlin papers say:—Russia has the advantage in the number of battle-ships but in cruisers and torpedo-craft not only is Japan superior numerically, but also the speed and homogeneity of her squadrons make up for her deficiency in battle-ships. The Russian fleet will be hampered by the transports accompanying it, and even if it temporarily repels the Japanese attack, it can not possibly reap the advantages that should accompany such a result. On the contrary, the Japanese fleet can bring on a fight at any time that it thinks convenient. Besides the Russians have been experiencing reverses only whereas the Japanese have experience and the spirit inspired by previous victories. Rojstvensky's venture is a most perilous affair. Finally, even if the Russians get their ships into their sole base, Vladivostock, no special change favourable to Russia will thereby be produced in the general situation. The only way for the Russians to recover the command of the sea is to engage the Japanese in a decisive action.

A Wolf's telegram from the Hague says that the Russian Squadron is anchored at a point 10 miles N.W. of the Anambas Islands, and that the Dutch squadron has been ordered to proceed there.

(RECEIVED IN TOKYO.)

## THE RUSSIAN FLEET.

The Russian Second Pacific Squadron, consisting of 41 vessels, passed the Straits of Malacca on the afternoon of the 8th instant.

(Received by the Naval Department.)

## ANOTHER SEIZURE.

The Norwegian steamer *Henry Balkow* (1,006 tons) was seized by a Japanese war-vessel on the 7th instant.

(RECEIVED BY THE "ASAHI SHIMBUN.")

## RUSSIAN AFFAIRS.

London, April 5.

The disturbances continue in Russia. Reports of riots and bloodshed arrive perpetually. The severity of the secret police has produced the horrors of a reign of terror. Cholera too has broken out, so that the trouble is worse than ever.

The advocates of continuing the war have again gained the ascendancy in the Russian Government. Such of the Ministers as advocate peace are strongly opposed.

The greater part of the new Russian domestic loan is to be spent on buying up the 4-per-cent. securities to arrest their depreciation.

(RECEIVED BY THE "JIJI SHIMPO.")

London, April 5.

The Russian war loan has been subscribed nearly 3 times over. The great part of the proceeds are to be applied by the Government for purchasing the 4-per-cent. bonds so as to check their fall.

## SAVE YOUR HAIR

## With Shampoos of Cuticura Soap and Light Dressings of Cuticura.

This treatment at once stops falling hair, removes crusts, scales, and dandruff, soothes irritated, itching surfaces, stimulates hair follicles, supplies the roots with energy and nourishment, and makes the hair grow upon a sweet, wholesome, healthy scalp when all else fails.

## MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, and for all the purposes of the toilet, as well as by millions of women in the form of washes for ulcerative weaknesses, and many sanative, antiseptic purposes which readily suggest themselves to women and mothers.

## COMPLETE TREATMENT FOR EVERY HUMOUR,

Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales, and soften the thickened cuticle; CUTICURA OINTMENT, to instantly allay itching, inflammation, and irritation, and soothe and heal; and CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. A SINGLE SET is often sufficient to cure the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, with loss of hair, when all else fails. Sold throughout the world. Australian Depot: H. Towns & Co., Sydney. British Depot: 27-28, Charterhouse Sq., London. French Depot: 6 Rue de la Paix, Paris. POTTER DAVE AND CHEM. CORP., Sole Props., Boston, U. S. A.

## CUTICURA RESOLVENT PILLS

(Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket flasks, containing 60 doses. CUTICURA PILLS are alternative, antiseptic, tonic, digestive, and the purest, sweetest, most successful and economical of blood and skin purifiers, humour cures, and tonic-digestives.

## WASTE SILK.

There has been a moderate daily business. Prices decline in sympathy with the Raw Market.

## LEA & PERRINS' SAUCE

The Original and Genuine Worcestershire.

## HOLLOWAY'S OINTMENT

IS A HOUSEHOLD NECESSITY

It cures Rheumatism, Sciatica,  
Stiff Joints,  
Glandular Swellings,  
Sore Throat, Quinsy, Mumps,  
Burns, Piles, Fistulas, &c.

AND EVERY  
FORM OF SKIN DISEASE.

Manufactured only at 78, New Oxford St. (late 535, Oxford St.),  
London. Sold by all Chemists and Medicine Vendors.

## The Bovril Bottle

is familiar in the homes  
of Britishers the world  
over—in Great Britain  
itself Bovril is looked  
upon as the great national  
“stand-by” in case of  
failing strength. Bovril is  
the very embodiment of  
nourishment. It imparts  
strength in a most effec-  
tive manner, and is, at the  
same time, extremely  
palatable.

## NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, APRIL 22ND, 1905.

## MARRIAGE.

ABBEY-RANSOME.—On the 20th April, at H.B.M.'s Consulate, by John Carey Hall, Esq., H.B.M.'s Consul, and afterwards by the Rev. W. P. G. Field, Mrs. MAUD M. RANSOME, daughter of Captain W. H. Walker, to TOM ABBEY, eldest son of Richard Abbey, Yokohama.

## DEATHS.

At his residence at Hayama, Dzushi, on April 15th, 1905, HENRY LOTZ, a native of Germany, late Secretary of the German Consulate at Kobe and father-in-law of H. Clair, Esq., of Yokohama, aged 67.

At The Hague, on the 17th February, after a long illness, VROUWE F. A. H. VAN MARLE, the beloved wife of J. J. van der Pot.

At his native town, Frauenfeld, Switzerland, ARNOLD DUMELIN, aged 61, formerly Swiss Consul-General in Yokohama, and partner in the firm of Siber, Wolff & Co. [By telegram.]

## SUMMARY OF NEWS.

Snow fell on April 14th and 15th in Sapporo.

The torpedo boat *Kiji* was launched at Kure on April 18th.

The YOKOHAMA Specie Bank intends to open a branch at Mukden.

The new destroyer *Arare* has been attached to the standing squadron.

The *Hochi* says that about 150 tons of coal are being procured daily from Ventai, near Lia-

yang. The quality of the mineral is similar to British coal.

A SEVERE shock of earthquake was felt on the night of April 17th in Kure.

TRAFFIC on the Electric Railway between Kobe and Osaka was opened on April 18th.

On April 14th, a thunderbolt fell at Fujietsu-machi, Shidzuoka. An old man was killed.

A SNOW storm was experienced on April 19th in the district of Takai, Nagano prefecture.

THE sick or wounded in hospitals in Tokyo, Atami, etc., are: 310 officers and 12,011 men.

SOME socialists were arrested in Tokyo on April 13th while delivering speeches at Yurakucho, Kojimachi.

A CHINAMAN named Ah Hwa (59), has been arrested by a Kagacho policeman while smoking opium in his house, No. 148, Yokohama.

It is reported by telegram from Moji that the price of coal is continuously advancing and on April 13th first class coal knocked *yen* 7.

THE opening of the Seoul-Fusan Railway will take place on May 25th. The *Hochi* says that Prince Fushimi will be present on the occasion.

THE YOKOHAMA *Boyei* reports that the Toyo Kisen Kaisha intends to raise a loan of some five million *yen* through a British firm in Yokohama.

At 7.50 p.m. on April 13th, fire broke out at Uchi-Saiwaicho, Tokyo, destroying six houses including the office of the Imperialists and a church.

A TELEGRAM from Moji reports that on April 8th, three floating mines were seen 3 nautical miles south-east of Hsiai-kin-island, one of the Miao group.

PRINCE and Princess Arisugawa arrived at 2 p.m. on April 16th at Singapore in the *Prins Heinrich*, and left at noon on the following day for Penang.

On the morning of April 18th, fire occurred at Tanaka-machi in Shimomoseki destroying fifteen buildings, including one school and one Buddhist temple.

TELEGRAMS report that on April 17th, heavy storms were experienced in Formosa, Uwajima, and other places, while in Fukushima, Yamagata, etc., snow fell.

An official telegram says that at 8.30 p.m. on April 16th fire broke out in the compound of the Yahata-machi Iron Works, Fukuoka prefecture, burning eight buildings.

ACCORDING to a Parliamentary return the British National Debt was reduced during the year ending March 1903 by over eight millions, the debt then standing at £762,629,776.

MR. A. ASAMI, Director of the Iwamisawa Post Office, Sapporo, committed suicide on the morning of April 14th by cutting his throat with a sword. The cause is not stated.

COUNT H. MUTSU (first son of the late Count M. Mutsu, ex-Minister for Foreign Affairs), who was recently appointed attache of the legation in London, will shortly leave for his post.

THE hatching of silk worm eggs has commenced in the district of Matsuzaki, Idzu peninsula. The temperature being favourable, the hatching will be finished about April 20th throughout the province. A telegram from Nagasaki says that the

growth of mulberry leaves is good and sericultural work this year seems to be more prosperous than last year.

MR. T. HAMADA, Chief of Police of Kanagawa prefecture, has been removed to Nara, and Mr. T. Inouye, chief of police of Shiga prefecture, has been appointed to succeed to the vacancy.

A RUSSIAN soldier who is detained at Shidzuoka was removed on April 29th to the Court martial for trial on a charge of having stolen money and articles belonging to the detention office.

ACCORDING to the *Official Gazette*, the Kobe Regatta and Athletic Club has been registered in the Kobe Local Court as a juridical person. The capital was put at *yen* 87,678.10 on the day of registration.

SERGEANT ALEXANDRE BATLOFF, from Port Arthur, now in Nagoya, has been sentenced by court martial to six months' imprisonment with hard labour. The charge was an assault upon one of the guards.

A COMMERCIAL museum was opened at Fusan on April 16th. To celebrate the occasion, Mr. Ariyoshi, Japanese Consul, Mr. T. Komuchi, M.P., and other Japanese and Korean notables were present.

At 10.25 a.m. on April 14th, a freight train on the Sanyo Railway was derailed at Himeji with the result that a carriage was smashed and the line was damaged. The cause was the negligence of a pointsman.

OWING to a gale, the sailing vessel *Meiji Maru*, with 150 bags of Newchwang beans, was wrecked on April 19th off Sudzuga-mori on her way from Yokohama to Tokyo. The crew were saved by the steamer *Kwanon Maru*.

THE King has been pleased to approve the appointment of Mr. Maurice William Ernest de Bunsen, C.B., to be his Majesty's Envoy Extraordinary and Minister Plenipotentiary at Lisbon, in the room of the late Sir Martin Goselin.

On Thursday, at 1 p.m., the funeral of Sub-Lieutenant Inouye took place in the Baptist church, No. 75, Bluff, Yokohama, the interment being in Kuboyama cemetery. This officer was killed at 203-metre Hill, at Port Arthur, on Nov. 28th.

THE steamer *Urajima Maru*, formerly the Russian *Progress*, arrived at Yokohama on April 16th to undergo repairs. This ship collided with the *Tokai Maru* in 1903 and sank her. She was subsequently sold by auction to pay her own dock bills.

MUCH minor damage was done on the Bluff by the earthquake of Thursday evening. In two cases chimney stacks fell, while several big retaining walls were displaced or knocked out of alignment. The police have received no reports of serious damage.

On the morning of April 18th the steamer *Wakasa Maru* collided with the steamer *Hokushin Maru* in Moji Strait, the result being that the latter sustained severe damage on the star-board side above the water-line. Both vessels entered Moji. The passengers and crews are safe.

THE funeral of Lieut-General Murai, who recently died at Yokosuka Naval Hospital, took place on April 13th in Aoyama cemetery, the cortege leaving the Kudan Military Club at 1 p.m. Marshal Yamagata, Admiral Ito, and other high officers of the Army and Navy, and some foreign notables were present.

## MOVEMENTS OF THE BALTIC FLEET.

Friday, April 14.  
Various reports of the movements of the Baltic Squadron are published. Two British steamers agree in saying that a part, at any rate, of the Squadron was seen near Saigon at 1 a.m. on the 11th. Another story comes from Batavia stating that the Squadron would probably pass Hongkong on the 14th or 15th. Shanghai sends word that a steamer which left Hongkong on the 8th sighted the Squadron on the 12th, but this tale may be classed with Shanghai canards, for certainly the Baltic Squadron did not pass Singapore until the 8th and it can not possibly have been hundreds of miles north of Hongkong on the 12th. The *Asahi*, however, has a telegram from Hongkong saying that the *Iphigenia* sighted some 42 Russian ships between Singapore and Hongkong. This is most important news, but unfortunately it is not accompanied by any date and the statement "between Singapore and Hongkong" is too vague to be illuminating. It is supplemented, however, by another telegram to the same paper from the same place, which alleges that the *Iphigenia*, having left Hongkong on the 8th instant—as we believe she did—sighted the Russians steering north on the 12th. Yet another telegram dated Hongkong the 13th says that the *Sissoi Veliky* with some other cruisers and transport vessels had been seen near the Anambas Islands. Finally, the *Asahi* has news from Hongkong that the belief there is that Rojestvensky will not go to Saigon but will steer direct for Vladivostok. We have elsewhere given our own reasons for thinking that such will be his plan.

Meanwhile the wishes and hopes of the Russians are beginning to materialize into stories of victory already won, and a Dutch journal lends its voice in support. But we must be prepared for a numerous flight of canards before the fleets actually join issue.

The *Russ* publishes a letter from an officer serving on Rojestvensky's flag-ship. The writer says that the Russian officers and men have resolved to die at their posts.

The Peking Government, at the instance of Mr. Uchida, has issued instructions to all the provincial authorities enjoining the utmost vigilance in preventing any violations of neutrality, and has specially warned the Shanghai Taotai to be careful as to the ships and men interned there. The Japanese Consul at Shanghai has also made urgent representations to the Taotai on the same subject, and has informed him that should China be unable to enforce her neutrality, Japan will undertake the task.

Of course Holland's attitude attracts much attention. Holland is almost in the same position as China with regard to ability to enforce her neutrality. She has an East-Indian squadron, and it has been more than once mentioned in the telegrams. It consists of a coast defence vessel, an armoured cruiser, six smaller cruisers, twelve gun-boats, four river gun-boats, and six torpedo-boats. Among these only two, namely, the coast-defence vessel and the armoured cruiser, are of any account. They represent 8,000 tons out of the squadron's total displacement of 37,000. In the face of such a feeble squadron Rojestvensky, supposing him to be guided solely by the principle of might is right, will be able to follow the dictates of his own sweet will. But it may be taken for granted that the Government of The Hague will employ all the resources of diplomacy to safeguard

its sovereign rights, and it may also be taken for granted, we think, that Rojestvensky will not deliberately flout a European Power, however small, Russia has some respect for Occidental opinion. We observe, however, that there is a very strong feeling in Japan on this subject, not merely because of the facilities the Russian Admiral might obtain in Dutch waters, but also because it is felt that if Rojestvensky adopts a high hand in dealing with Holland, he may be expected to treat China similarly, and in that event all the pains hitherto taken to limit the area of the war would be rendered futile. A very grave obligation rests therefore on The Hague Government at this juncture. Japanese leading journals intimate in the clearest language that whatever patience Japan may have shown towards violations of neutrality in Russia's interests westward of Singapore, this Empire can not possibly suffer a repetition of such incidents at its very doors.

Saturday, April 15.

There is absolutely no certain information this morning as to the movements of the Baltic Squadron. The one fact, telegraphed on the 14th, namely that the Squadron had been sighted on the 11th in a latitude and longitude which suggested calling at Saigon—this one fact remains uncontradicted but also unconfirmed, and whether the vessel that sighted the Russians was a British man-of-war or a merchantman is obscure. Yet the point is almost vital, for whereas a man-of-war's account would be absolutely trustworthy, that of a merchant vessel is open to much doubt. The impression in Tokyo newspaper circles seems to be that Rojestvensky is steadily forging northward, but no one ventures to predict whether he will head eastward before reaching Formosa or whether he will come up through the Formosa channel. If, as we believe, his purpose is to try to make Vladivostok by steering up the Pacific and *via* Tsugaru Strait, it would certainly seem that his wisest course would have been to run through the Strait of Macassar. As for the report that a naval fight has taken place near the Anambas, it is said to have been traced to a Russian source, namely, the hospital-ship *Orel* which has put into Saigon. The report includes a statement that six Japanese vessels have been sunk. With such rumours are the Russians seeking to comfort themselves, according to the latest advices. But it remains to be seen whether the *Orel* or Shanghai is the seed-plot of lies in this instance.

Singapore sends word that two English war-vessels report having seen the *Sissoi Veliky* and several small cruisers and transports engaged in coaling at a point near the Anambas.

A naval officer, speaking through the columns of the *Yomiuri Shimbun*, expresses in almost identical words the opinion put forward in our own leading columns on the 15th instant, namely, that Rojestvensky will try to avoid a fight and will make for Vladivostok *via* the Tsugaru or the Soya Strait. The Pacific is wide, and so long as he steams over its broad bosom he may fairly hope to escape observation. No commanding officer deliberately invites a combat under unfavourable conditions, and the conditions would be distinctly unfavourable to Rojestvensky if he had to go into battle with such a fleet of mixed elements as now follows his flag, and without any haven for his wounded ships. There is a reasonable chance of his getting through one of the northward passages without falling under

Japanese observations, and that is probably the chance he will take.

Should this forecast be verified by events some 8 or 9 days must pass before the crisis is reached, and during that time the public will be kept at a high pitch of expectancy. The Japanese have to watch Tsushima, Tsugaru and Soya; a difficult task which they may easily fail to achieve successfully. In their favour, however, is the fact that if, as we have already observed, the Russians disappear from view during a space of six or seven days, it will follow almost certainly that they are sailing up the Pacific for Tsugaru or Soya. Rojestvensky's undertaking would be much simplified if he could maintain his most economical rate of progress for a week or ten days, and then crowd on all steam so as to rush through whatever passage he chooses. But the trouble is that his speed is limited by that of his transports and colliers. He must continue his leisurely procession throughout. That fact greatly militates against his chances of reaching Vladivostok unobserved.

There is one thing to be noted, namely, that if Rojestvensky succeeds in reaching Vladivostok safely, it will be much more difficult to seal him up there than it was to seal up the Port Arthur Squadron. For Vladivostok has two exits, and to watch both simultaneously with sufficient force is a task somewhat beyond the comparative capacity of the Japanese navy. Every effort will therefore be made to cripple the Russian Admiral before he reaches his haven. The *Tiji Shimpō* recalls Togo's celebrated order on the eve of the first torpedo-attack against Port Arthur—*Somō no ketsu kono ikkyō ni ari kaku in doryoku seyo*—and reminds the Navy that the fate of the Empire is in their hands.

Sunday, April 16.

There are three reports this morning. One is that the Squadron is steaming north-east at a speed of 10 knots, presumably from the position where it was sighted on the 11th instant at noon, namely, north latitude  $8^{\circ}27'$  and east longitude  $108^{\circ}55'$ —a position nearly off Hue. The second report is that an insurance office in Yokohama has a telegram in the sense that three of the Russian ships with some colliers were sighted near Saigon, steaming slowly towards the south-east. And the third report is that the hospital ship *Orel* has entered Hongkong or Saigon. If the ships had held a north-easterly course from the 11th instant, they would pass eastward of Hongkong about the 16th instant, and they would certainly have been sighted by some of the many steamers frequenting those waters. The fact that they have not been sighted suggests that they are taking a course eastward of the regular route of vessels, and that Rojestvensky's purpose is to steer southward of Formosa and out into the wide Pacific, whence he can shape a course either for the Tsushima Straits or for the Tsugaru Straits. Our original supposition—that he would reach the Pacific by the Straits of Macassar—seems to have been mistaken: probably difficulties of navigation deterred him. But that he is heading out into the Pacific, as always seemed probable, is the theory most consistent with the absence of definite reports. There is an idea in some quarters that he will make a temporary base in the Ladrões at Guam. From the Anambas to Guam the distance, *via* the south of Formosa, is some 3,000 miles, and from the Anambas to Tsushima *via* the China Sea is 2,600 miles. But at Guam Rojestvensky would be within 1,600 miles of

Tsushima and within 2,000 miles of Tsugaru. The place is therefore conveniently situated as a base, and possibly he may think of lying there until the Third Squadron joins him, six weeks or two months hence. But the owners of the Ladrões—America and Germany—are not likely to suffer anything in the shape of a violation of neutrality. The Russian Admiral will have to reckon with that fact, and unless he violates neutrality it is hard to see how he can find any convenient anchorage in the Ladrões for any length of time.

Of course trade circles are somewhat disturbed. Goods shipped for the voyage across the Pacific are seen to be in some danger, and consignments of raw-silk and *habutaye* are being hastened forward or delayed. It may be doubted whether Rojestvensky will pay any attention to the business of commerce-destroying. His desire to reach Vladivostok safely will forbid all dalliance of that kind. But if a prize comes directly in his way, he will probably stretch out his hand.

Rumours continue to be heard of a battle in the neighbourhood of the Anambas, but there can be no doubt that they are false rumours, based solely on the fact of the hospital ship *Orel* having entered Saigon. There seems to be no doubt that the *Orel* has actually put into Saigon, but her purpose is said to be the landing of some of her sick and the procuring of medical necessities.

Of course it may be expected that the Vladivostok cruisers, whether two or three, will presently emerge and seek to coöperate with Rojestvensky, perhaps by again resorting to commerce destruction.

April 17, a.m.

A more detailed account of the news brought to Hongkong by the S. S. *Poona* on the 15th instant says that she saw the Russians sailing in single column line ahead. They extended to a length of 10 miles, namely, the 7 battle-ships, the 8 cruisers, the 3 auxiliary cruisers, the 8 destroyers and the 11 torpedo-boats—34 fighting ships in all. In the middle were the transports and colliers. The *Almaz* was in her place in the line, so that the statement as to her having met with some injury is evidently unfounded.

This statement about the *Almaz* had not reached us. It will also be observed that nothing is said in the above as to the place where the Squadron was sighted, but the previous report suggested that it was steering for the Paracels. The Paracels would be a sufficiently likely place for coaling purposes preparatory to heading out into the Pacific between Luzon and Formosa.

The canard as to an engagement having taken place near the Anambas Islands and 6 Japanese ships having been sunk, is said to have been put about by the people of the hospital ship *Orel*, which spent 36 hours in Saigon. If so, the first exploit of the Russians is not very creditable.

It is evident that Rojestvensky has no intentions of exposing the neutrality of any nation to a violent strain. He has passed Saigon, as he passed the Dutch East Indies, and though his attitude towards Chinese ports is not yet quite definite, the strong probability is that he will avoid giving material for any new diplomatic troubles. In that respect at least his action is to be commended.

The military expert of *The Times*—according to a telegram in the *Fiji Shunpo*—thinks that Admiral Togo will probably make large use of his minor craft, in which he is much superior to Rojestvensky.

By the evening of the 18th at latest some definite idea should be obtained as to Rojestvensky's route. That he aims at reaching

Vladivostok there can be little question. The only doubtful point is whether he will sail direct up the China Sea and essay the passage of Tsushima Strait, or whether he will steer eastward into the Pacific and then bear up for Tsugaru. It is not considered possible that he should attempt the Soya passage unless he defers his voyage north for some weeks, inasmuch as these extreme northern waters are still hampered by floating ice. At Vladivostok, it is said, there are 60,000 tons of Cardiff coal and 50,000 tons of briquettes in spite of the numerous seizures of steamers made by the Japanese during the past three months. In favour of the Tsushima Strait there is the fact that it is short, and therefore easily passed. Rojestvensky may perhaps count on being able to run through at night and thus reach the Sea of Japan without serious loss and without bringing on a general engagement. But he is always confronted by the difficulty that so long as he keeps with him his transports and colliers his speed is necessarily limited, and though he might effect the passage of the Tsushima Strait without encountering serious opposition—already a large hypothesis—he could not hope to cover the 600 miles between Tsushima and Vladivostok without being brought to bay. We continue to believe, therefore, that the Tsugaru strait will be his objective, and that, though he may be sighted as he passes southward of Formosa into the Pacific, he will then disappear from public ken for some days.

Things are said to be perfectly quiet in Formosa. Although the island has been declared within the zone of defence, the inhabitants are not at all disturbed, and business is going on in its usual grooves. When the Vladivostok cruisers made their raids last year, a run took place upon the banks in Taipei, but there are no signs of anything of the kind now.

It is reported that the Russians, acting through secret agents, have bought up at great prices all the coal available in Hongkong, Saigon and Singapore, and that some ten steamers laden with fuel are at Rojestvensky's disposal. The coal is of three kinds, Japanese, English and Australian. Great prices have been paid, and the Russians are said to have insured the carriers, granting rewards also in the case of vessels showing exceptional alacrity. Japanese journals speak of a foreign firm at Moji and a native firm also by which considerable quantities of coal have been sent southward during the past few weeks. That kind of thing is virtually inevitable.

This is the critical time for all steamers leaving Japan for South-Chinese ports. From the evening of the 15th such traffic was suspended.

The *Nippon* remarks that the pending fight will probably be the heaviest naval battle of the war. Admiral Togo has hitherto been necessarily careful of his ships. There is no source from whence he can recruit his Squadron, and the Baltic Fleet was always a menace in the background. But he now feels that if he destroys or cripples the Balticks, Russia will have shot her last naval bolt, and therefore it is probable that his manner of fighting will be correspondingly modified. We (*Japan Mail*) do not entirely share that view. Togo has still to regard the future, for although Japan is beginning to build big cruisers and even battleships for herself, the Russian yards are ahead of her, and Russia can obtain from Germany and France more abundant materials with greater celerity than the Japanese can.

April 17, p.m.

According to the news published by the Naval Department Rojestvensky and his ships are in Kamranh Bay. This place, the Naval Authorities state, is about 160 nautical miles north-east of Saigon and is one of the best harbours in Annam. There are two ports, an outer and an inner. The outer has a length of 3 nautical miles and a width of 2 miles; and the inner is 11 miles long and from 1 to 3 miles wide. The place is excellently adapted for Rojestvensky's purpose.

Kamranh Bay lies almost on the 12th parallel of north latitude, and is only 750 miles from Saigon. Rojestvensky passed the latter place at 2 p.m. on the 8th instant, and assuming that he reached Kamranh Bay on the 14th, it would appear that he is progressing at the rate of only 5 or 6 miles an hour. From Kamranh Bay to the avenue between Luzon and Formosa the distance is 1,000 miles approximately, and it is by that avenue he will travel supposing him to be bent upon making his way into the Pacific with Tsugaru for objective.

But now the question arises, will France allow him to remain in Kamranh Bay: is there to be a second Madagascar there? If not, we must hear very soon that the Russians have been sighted steaming north, for they were at Kamranh on the 14th. Kamranh offers many facilities of anchorage but labours under the great disadvantage of being remote from any centre of foreign trade or residence. It is unlikely that any stores have been collected there for Rojestvensky's use, and certainly none could have been collected without the cognizance of the French authorities. The situation is becoming very interesting. Now that the Japanese have located Rojestvensky, they are not likely to lose sight of him again.

Thursday, April 20.

Russia is said to be elated at Rojestvensky's "daring and skill," but it is not so easy for outsiders to detect as yet the exercise of these qualities. Rojestvensky must have known throughout that French ports were at his disposal. Had it suited his convenience he might have made Saigon his base just as readily as Kamranh. There is no difference politically speaking—no more difference than there would be between Portsmouth and Plymouth under similar circumstances. The fact of this accessibility of French harbours changes the whole complexion of affairs for the Russian Admiral. He could be morally certain that the Japanese would not attack him before he reached Kamranh. To do so would have been to forego all the advantages of fighting in their home waters. Kamranh is a thousand miles south of Formosa. Up to that point neither daring nor skill was needed on Rojestvensky's part. So soon as France threw neutrality to the four winds of heaven and became an active ally of Russia, the difficulties of the situation were radically mitigated for the latter. It is a shocking outrage of international law. No other term applies to it. And the same telegram which informs the world of Russia's elation at the daring and skill of Rojestvensky, tells us that, according to Russian statements, he is coaling and cleaning his fleet in Kamranh prior to engaging the Japanese. He is, in fact, equipping himself within French territory for war against a country with which France is nominally at peace. The Russians apparently see nothing wrong in that; the Russians who have been perpetually crying aloud against the pettiest and most shadowy violations of Chinese neutrality by

the Japanese. Nothing more shamefaced stands on record in the pages of history.

A telegram from Singapore says that the Baltic Squadron was comfortably at anchor in Kamranh Bay at noon on the 15th inst. Plainly Rojestvensky has no intention of leaving this convenient harbour until he is entirely ready.

It is small wonder that the Japanese press is profoundly moved. How can Japan look on calmly while France lends this wholly unlawful aid to her enemy? The *Fiji Shimpō* justly says that no conceivable interpretation of the law of civilized nations can be reconciled with such action. France has hitherto shown some semblance of respect for her neutrality, but she has now, for some inexplicable reason, become altogether reckless. Upon her shoulders will rest the heavy responsibility of pulling down the barriers which have hitherto limited the area of this war. She is deliberately constituting herself a belligerent, and if the Anglo-Japanese alliance has hitherto saved her from having to assist Russia, its effect will now be that she will find herself confronted in the lists by England and Japan, for the latter can not tamely endure such treatment and the former can not ignore the duties solemnly imposed by the treaty of alliance. The *Nichi Nichi Shimbun* does not yet definitely assume that France has abandoned her neutrality, inasmuch as it has not yet been clearly proved that the Baltic Squadron is making more than a 24 hours' call at Kamranh. But if that be proved, then the *Nichi Nichi* also gravely declares that the whole character of the war will be changed, and that its limits will receive deplorable extension. France must not suppose that Japan will be content with an academical protest such as was allowed to suffice in the case of Madagascar. Madagascar was too distant to become a ground of serious trouble, but Annam is at the very doors of the Japanese empire, and if France gives to this country's enemy a naval base on the coast of Annam, the most serious consequences must ensue. The *Kokumin Shimbun* speaks more reservedly but scarcely less clearly. It notes that France pretexted the three-mile limit with regard to Madagascar; she claimed that Rojestvensky's ships were not within her territorial waters. It was a mere subterfuge, but it might be allowed to pass pending some explicit and honest interpretation of neutral duties. In the case of Kamranh, however, no such plea can be formulated. It is a French port, a French military station, and within it the Russian Fleet is lying. France does not prescribe the 24 hours' limit adopted by European nations, but she does enact in the most explicit terms that the hospitality of her ports shall not be abused for belligerent purposes. A belligerent's ships may not reconnoitre from them nor may they issue suddenly to attack an enemy. They may not receive provisions other than such as are absolutely necessary to sustain the lives of their crews, and they may not undertake repairs except in so far as is needed to make the vessels sea-worthy. Obviously the intention of such laws is to prevent precisely what Rojestvensky is now doing, namely, using a French port as a base of naval operations against Japan. If the Russian Admiral had called at Kamranh merely to take in coal for the purpose of reaching Vladivostok, he should have emerged already. What amount of licence is France about to grant? Is he to be allowed to proceed from one French port to another, treating Annam as though it were Russian territory for all practical purposes.

A very grave crisis will arise unless France discharges her neutral duties in a manner more consistent with obvious right. The *Asahi Shimbun* points out that the Madagascar excuses and pretexts are impossible in this case. What is happening is happening before the eyes of the whole world, not in distant waters beyond the range of general vision. There is not a conceivable excuse. If France is determined to range herself on Russia's side and enter the lists against England and Japan, upon her will rest the responsibility of extending this terrible struggle far beyond its present limits. But it may well be doubted whether she has such a determination. Meanwhile England's views have to be ascertained. Until they are known, the *Asahi* refrains from final comment. The *Yomiuri Shimbun* is persuaded that Rojestvensky left Madagascar with a full understanding that he could use the French ports of Cochin China as bases not only to equip but also to rendezvous, namely, to await the coming of the Third Squadron. It is of no use appealing to diplomacy under such circumstances. The naked facts are there before the eyes of all. Let the matter be placed in the hands of the navy. There is a law which lies at the very root of human intercourse, the law of self-protection. Never was a country more imperatively called than Japan is called to obey that law.

That the presence of the Baltic Squadron in Far-Eastern Seas must have an effect upon Japan's foreign commerce is indisputable. The *Shogyo Shimpō* writes interestingly on the subject. Rice and raw cotton, it observes, would naturally be the staples specially influenced, since both are imported from regions inaccessible without passing the zone where the Baltickers may be expected to operate. In the case of rice, however, it happens fortunately that large importations have already been effected, and there is further the fact that owing to last year's magnificent harvest the country is exceptionally well provided with the home-grown product. Hence no special inconvenience need be anticipated in connexion with a temporary cessation of supplies from Rangoon and Saigon. Cotton, however, has no such compensations. Russia originally attempted to include raw cotton among unconditional contraband of war, but in deference to American remonstrances she subsequently modified her views so far as to admit conditions, and thus only cotton suited for use in the manufacture of explosives is now on the condemned list. Our Tokyo contemporary does not expect, however, that Russian naval officers will exercise a very clear-sighted distinction in this matter. The probability is that cotton-shippers will not take the risk of relying on Russian judgment. During the present month 90,000 bales have been shipped, or should be shipped, from Bombay, and during May 100,000 bales. Insurance might have been high in any case, but that is a small matter compared with the total cutting off of the supply. It has to be noted, however, that exceptionally ample importations of raw cotton took place during the first three months of the present year. The following comparative figures are given:—

IMPORTS OF RAW COTTON FROM JANUARY TO END OF MARCH.

	Yen.
1902.....872,135 piculs valued at.....	19,754,727
1903.....758,570 piculs valued at.....	19,406,874
1904..... —	32,106,423

It will be observed that figures relating to weight are not forthcoming for the current year, but in point of monetary value there was an increase of over 60 per cent., and as

cotton ruled cheap there must have been a very large increment in the quantity imported. On the other hand, this heavy importation was not due to belligerent circumstances. It was mainly attributable to exceptional activity on the side of the spinners. These generally use about 4 million *kwan* (33½ million lbs.) of cotton monthly, but of late their figure has shown an increase of from 30 to 40 per cent., which would absorb the greater part of the margin shown in the above table. Then, again, the high price of cotton at the fall of last year prevented any inlay of large stocks, and there is here a need which has not yet been fully supplied. In 1902 and 1903 the cotton in stock at Osaka and Kobe aggregated, at the close of March, from 80,000 to 90,000 bales (of 360 *kin*), without including the quantities held by the mills themselves and in foreign godowns. But this year, even including the mills and the foreign godowns, there were only 120,000 bales in stock at the close of March. The cotton-spinning industry is just now giving excellent results in Japan and steps are being vigorously taken to increase the number of spindles, so that the consumption of raw material would have developed greatly just at the very time when an interruption of supplies seems inevitable. It is much to be regretted in the interests of the industry. There have not yet been any instances of merchantmen being seized or sunk by the Russians since they passed the Straits of Malacca. But these vessels of the Baltic Squadron have an evil record already, and though they may devote their attention for the moment to something more vital than commerce destroying, the strong probability is that if they lose coherence as a squadron, and cease to be able to fight stoutly for the mastery of the sea, they will have recourse to the semi-practical methods that have hitherto marked the doings of Russian war-ships throughout the present campaign. That is the *Shogyo Shimpō's* view.

Friday, April 21.

Rojestvensky's ships seem to be still complacently lying in Kamranh Bay, preparing themselves for the conflict which they know to be inevitable and apparently waiting for the arrival of the Third Squadron. Not a word about them has been heard from Saigon. This significant fact is noted by the *Asahi Shimbun*, and is taken as proving that the French authorities are deliberately controlling the telegraph service in order to secure secrecy in the interests of Russia. Meanwhile it is to be observed that nothing definite has been heard of Rojestvensky's movements since the 15th instant. At this moment of writing (Thursday morning) he may be steaming for the Bashi Strait, if he has not already passed it. If he be still in Kamranh Bay he will not have much longer to wait before the Third Squadron joins him, for supposing that it passed Ceylon on the 17th, it should make Kamranh about the 28th or 29th. The *Kokumin Shimbun* alleges that up to the 17th instant the presence of the Baltic Squadron in the French port was certain, inasmuch as they had visited passing steamers. Rumour also alleges that Rojestvensky's transports are steaming to and fro between Kamranh and Saigon under commercial flags. That is precisely what the Russian Admiral did at Madagascar, unless numerous corroboratory accounts be all incorrect. He kept his war-ships outside the farical three-mile limit, but he maintained regular communication with the shore whence he obtained

supplies of every description. In Cochin China his procedure is still more flagrant should it prove true that his transports are plying to Saigon. But above all flagitious is his conduct in visiting neutral or Japanese ships as they sail the China seas. That means that he is using a French port as a base of direct operations not only against Japanese commerce but also against the commerce of neutrals.

The Japanese Government, according to the *Kokumin* and the *Shogyo*, has presented a very strong protest to the French Government, but has not yet received any answer. No protest can be too strong. The case is one that does not admit of a moment's discussion. France is violating her neutrality in the most deliberate and unequivocal manner. It is all very fine to talk of latitude as to a 24-hours' limit, and about the Russian Squadron's right to receive coal enough to carry it to its nearest port, which is now Vladivostok. Persons advancing such arguments know full well that neither did France frame her municipal regulations nor did juriconsults enact international law with the intention of providing loop-holes to evade plain obligations. In this matter the assistance that France is rendering to Russia is the assistance of an active ally; assistance absolutely invaluable to Russia, for most assuredly the Baltic Squadron could never have entered the arena against Japan had not France disregarded the obligations of neutrality and considered only those of friendship. The one thing to be said in palliation of France's extraordinary conduct is that she has not herself been a direct party to Russia's lawless doings, but that her ally has taken undue advantage of the relations existing between the two countries, and is abusing a friendship by which France romantically considers herself bound. The *Yomiuri Shinbun* suggests that solution, but sagely observes that sentiment can not be allowed to rule where the safety of empires is at stake. France's delicacy towards her ally is one thing; her plain duty towards neutral Powers and towards the peace of the world is another.

We need not give any detailed analysis of the writings of the minor Japanese journals. They all without exception echo the sentiments already expressed by the leading newspapers, with, of course, varying degrees of vehemence. Only once, namely on the eve of the rupture of diplomatic relations with Russia, have we seen such unanimity displayed by the Japanese press and heard such emphatic language expressed by it. If French officials mistake the situation they will be very much to blame. They may argue that Japan can not face France and Russia in combination, and that, consequently, they are free to interpret international law as they please where Japan is concerned. They may also argue that in view of the very strong *entente* existing between their country and Great Britain the latter will not step into the breach on this occasion. We do not believe, however, that they deliberately consider the question in either of those lights. It is a case of drifting. The Government in Paris has been inclined to stretch the letter of the law in Russia's favour, and thus by little and little a situation has been created which is as illegal as it is intolerable. One of two plain duties confronts France. She must either order Rojestvensky to leave Kamranh Bay at once, or she must disarm his ships. There is no middle course. If we know Japan at all we warn the French that they have pushed things perilously near to a catastrophe.

A meeting representing nearly all the newspapers throughout the empire was held on Thursday at 5 p.m. in the Kairakuen, Nihonbashi. All the Tokyo newspapers, with the exception of three, were represented and editors were present from many of the provincial papers. They unanimously passed the following resolution: "We consider that by allowing the Russian fleet to remain in French territory the French Government is disregarding the obligations of strict neutrality and call upon the Imperial Government to take immediate steps in the matter." In order to give effect to this resolution it was decided (1) that a lecture meeting should be held; (2) that a strong circular should be published in the newspapers throughout the empire; (3) that strong representations should be addressed to the authorities; (4) that the French Minister should be approached; (5) that a telegram on the subject should be sent to the French Government.

#### SPOILS.

It was expected that the Japanese Authorities would publish a detailed statement of the spoils taken in the battle of Mukden and of the number of Russians buried. Apparently, however, there is no immediate intention of doing so, and we are not, therefore, in a position to compile an absolutely exact list of spoils taken up to the present time. Nevertheless it will interest our readers to see how the official figures thus far published stand, and we have accordingly prepared a statement:—

Battle.	Guas.	Gun Ammunition.	Rifles.	Rifle Ammunition.	Ammunition of all kinds.	Transport Waggon.	Horses.	Teats.	Embracing Teats.	Fuel Stuff (Koku).	Horse-fodder (Koku).
Yalu .....	29	38,717	1,021	33,005	70	10	63	541	—	1,736	—
Fenghuang .....	78	37	—	181,000	—	—	—	—	—	—	—
Narshan .....	16	1,121	958	37,233	46	—	—	—	282	—	—
Tehsiaz .....	—	—	300	980	3	—	—	—	180	1,380	—
Hsihoyen .....	6	570	63	—	—	—	—	—	—	—	—
Tomuching .....	—	—	—	—	—	—	—	—	—	—	—
Yushulingz and Yangtzing .....	2	—	600	1,638,730	129	—	70	400	—	2,000	13,620
Liaoyang .....	8	10,956	3,478	78,000	37	—	—	85	—	—	—
Shaho .....	45	6,970	5,474	2,266,800	290	—	1,920	—	1,171	—	—
Port Arthur .....	546	82,670	35,323	—	—	606	2,000	—	—	29,280	56,000
Helaudai .....	—	—	2,000	26,640,000	800	—	—	—	14,000	—	—
Mukden .....	66	227,700	62,200	31,202,748	1,375	2,016	4,033	1,026	39,942	34,406	69,620
	796	368,091	111,446								

There can be no doubt that the above figures are considerably below the truth. For example, in the absence of a later report we are obliged to set down 66 as the number of guns captured in the battle of Mukden, though the Russians themselves speak of having lost some 500. However, so far as it goes the list is interesting.

#### KOREA.

Telegrams from Seoul (*Nichi Nichi Shinbun*) state that regulations have been promulgated with reference to land reclamation. Korean subjects to whom the privilege of reclaiming land has been granted, are forbidden to sell or pledge the privilege to foreigners under severe penalties. This veto is supposed to have been inspired by the fact that certain Korean subjects have obtained permission to reclaim land, and mortgaged the permit to Japanese projectors.

The *Asahi* has a telegram that on the 12th inst. an order was issued by the Emperor of Korea in the sense that no time should be lost in reforming the military system. On that day the Minister of War had presented and obtained imperial sanction for a scheme under which the future military establishment will be 3 battalions in Seoul and 1 in each of the 8 provinces. A battalion's strength being 1,000 of all arms, the whole Korean army will be 11,000 strong.

It is expected that Mr. Hayashi, Japanese Representative in Seoul, will start for Japan on the 21th inst., his presence in Tokyo for a brief period being required for the purposes of a consultation about Korean affairs.

The Korean Prince who arrived in Tokyo on the 4th carrying his Sovereign's congratulations, left the Japanese capital on the 17th inst. at 6 p.m. His Highness is to spend two days in Kyoto before resuming his return journey.

There was a skirmish on the 10th inst. between a detachment of Japanese troops and some 40 Russians at Kilju, north of Songjin. The Japanese, after a fight lasting some hours, drove back the Russians who left several dead upon the field. The Japanese casualties were two killed and two missing.

It is reported in Tokyo that Messrs. H. Colbran and H. E. Bostwick, of Seoul, have been instrumental in forming a water-works company with a capital of £250,000 and debenture-issuing capacity to the same amount. Their idea is to raise a sum of £235,000 in London at 6 per cent., but it appears to be thought improbable that the project will succeed.

#### THE PROGRESSISTS.

The Progressists are evidently of the opinion that the time calls for some political activity. Their Council held a meeting on the 18th inst. and on the motion of Mr. Oishi Masami, adopted a resolution in the sense that investigations into certain subjects should be commenced at once. The subjects were, first, the Anglo-Japanese Alliance, its continuance and the extension of its limits and objects. Secondly, the movements of the Baltic Fleet, and the steps that should be taken to impose responsibility for breaches of neutrality. And thirdly, the necessity that exists for Japan to make known her arguments and her attitude towards the Russian contention as to continuing the war.

## THE MILITARY SITUATION.

Saturday, April 15.

Collating the reports from various parts of the field, the *Asahi* says that the situation in Manchuria is this:—

## HSINGKING REGION.

The enemy who retired in this quarter rallied temporarily at Hailung but subsequently retreated thence to Kirin, leaving only a strong rear-guard of some 13,000 men at Hailung. The outposts of this rear-guard are pushed south-ward as far as Heitsuitsz, which is about mid-way between Hailung and the Japanese position at Shanchintsz. This last named place is some 33 miles from Hailung.

## THE KAIYUAN REGION.

Here the Russian rear-guard, numbering some 8,000, has its head-quarters at Itungchou, and its outposts are pushed southward to Horzhsupienmun and Shilipan. In this quarter the Japanese advance has been carried to Kuyushu, which is 55 miles south of Itungchou.

## THE CHANGTU AND FAKUMUN REGIONS.

In these regions the Russians seem to have retreated as far as Changchun, leaving a rear-guard at Fenghwa. This rear-guard numbers 13,000, and one part of it, numbering 3,000, is at Pamienching. It was this last body that delivered the attacks against Kinkiatun and Tsurushu on the 4th, 5th and 6th.

In explanation of the above it may be added that after leaving Mukden the Japanese advanced northward by four main routes. Two of these—those from Fakumun and Changtu—converge at Fenghwa, whence a highway of some importance leads along the west of the railway to Changchun. Another of the three routes—the central route—starts from Kaiyuan, and trending away from the railway on the east, leads to Hungchan and thence to Kirin or Changchun. The third, or most easterly, route is from Yingepienmun *via* Hailung to Kirin.

A *Kanjo* has been granted to the late Count Nambu who was killed at Chingkauling on the 4th of March, when engaged in a most gallant attempt against one of the enemy's positions. This officer had the honour to command a troop which was first to encounter the Russians at Chongju, and he subsequently distinguished himself at Fengshwilung as well as at Changson on the Yalu.

Monday, April 17.

There are conflicting accounts alike of the Russians' strength in Manchuria and of their plan of campaign. Some attribute to them the intention of making a resolute stand along the Kirin-Changchun line, while others believe that they will not attempt anything southward of the Sungari. It is of no use to discuss these theories in detail. The *Asahi Shimbun's* correspondent says that the Russians are busily fortifying both banks of the Itung River and also the ground in its rear. They are also exercising great caution in Changchun where many of the Chinese inhabitants are supposed to be Japanese spies.

Peking telegraphs that the Governor of Kirin complains of the irruption of a large force of Russian soldiers from the Amur region, who have seized all the official buildings and are cutting down all the trees for the purpose of constructing forts. It would appear that the Kirin officials have to face an ordeal resembling that endured by their Mukden *confreeres*. The Governor has asked Peking to aid him,

Peking has had recourse to its usual device, a protest to M. Lessar.

The railway has been for the most part repaired by the Japanese engineers, but one large bridge, presumably that over the Hun at Mukden, will not be ready for traffic before the 20th instant.

Apparently some of the Russian troops in the Hsingking region have retired in the direction of Vladivostok. The latter would probably be found to possess a very large garrison in the event of a siege.

M. Lessar is said to have telegraphed to St. Petersburg—and the fact seems to be established since the telegram appears in the Russian *Official Gazette*—to the effect that the Japanese authorities at Port Arthur are behaving in a most arbitrary manner. In fact the accusations he prefers against them are such as have seldom been formulated by a responsible diplomat. He says, in effect, that in order to prevent private persons from carrying off their property, they are not allowed to leave the port by sea, the purpose of this veto being to retain their possessions in Japanese hands. He further says that, according to rumours which he does not altogether discredit, the Japanese are keeping the Russian sick and wounded at Port Arthur amid insanitary conditions with the object of reducing by death the number of prisoners to be sent to Japan and supported there. M. Lessar's physical condition has of late been described as one of much suffering and it is charitable to assume that his mind is afflicted as well as his body since he allows himself to prefer such wild and disgraceful charges. As to the question of leaving Port Arthur by sea, he must be well aware that all maritime traffic is suspended, pending the removal of the innumerable mines placed in the sea—recklessly placed—by his own countrymen. And as to the forcible detention of the sick and wounded, if M. Lessar paid the smallest attention to the records with which all the world is familiar, he would not return evil for good by endeavouring to discredit the extraordinary care and kindness uniformly displayed by the Japanese towards wounded men and invalids of the enemy. He allows himself to speak of Japanese civilization, but he ought to pause and reflect to which side belongs the honour of having shown true civilization in this war. His Government will of course have to act upon his suggestions. They have already, it is said, invited the French Minister to present M. Lessar's accusations to the Japanese Authorities. It is unfortunate for France that she should have such offices to discharge.

Tuesday, April 18.

The Governor of Kirin continues to despatch complaints about the doings of the Russian troops which have flocked into the region under his jurisdiction from the Amur district. They are treating the country and the people without the slightest regard for anything except military convenience, and the Governor wants to have them summarily punished. Who is to punish them? Application has been made to M. Lessar and has probably been pigeon-holed by him with several notes of admiration. The inhabitants of Kirin, unhappily for themselves, have now been brought within the sphere of active operations and their hardships are inevitable.

What is chiefly interesting in this connexion is that Russia is drafting her Amur forces into the Manchurian field. She may find that a dangerous game, for it will open the Amur water-way to Japanese adventure,

and if Rojestvensky is successfully disposed of the Amur is not unlikely to become a field for Japanese enterprise.

It is stated that the Foreign Representatives in Peking have urged the Chinese Government not to accept the resignation of Governor Tseng, of Mukden. No reasons are given for this interference, and we can only attribute it to a preception that international questions may arise hereafter in connexion with the doings at Mukden during Russian occupation, and that Tseng's official availability would be essential for the intelligent discussion of these problems.

Japanese military notes are now at a premium as compared with Mexican dollars in Manchuria. They were at a discount of 11 per cent. before the fall of Mukden. Then they rose to a discount of 3 per cent.; then to par and now they are quoted at a slight premium.

Many stories of fine acts on the part of individual Japanese soldiers or Japanese detachments have been related of late by correspondents of Tokyo journals. One of these accounts refers to first-class trooper Nishimura Toyama, a native of Nagasaki. He was sent bearing an important despatch from the head-quarters of one division to those of another during the battle of Mukden, but a bullet pierced his head from front to back and he fell dead. When the corpse was found, it was seen that he had torn up the despatch in his last moment of life, and had swallowed some of the fragments, retaining the rest in his mouth.

## THE BUSINESS OF RAISING SUNKEN SHIPS.

The *Official Gazette* of the 12th instant contained the following:—

Departmental Announcement No. 5 of the Department of the Imperial Navy.

Persons desirous of taking part in the competition for the purchase of sunken ships of the Navy, will be required to have the following qualifications:—

I.—The qualifications as to property will be as follow:—

(a.) In the case of individuals, a payment of direct national taxes of at least 50 *yen* annually for a continuous period of two years previously.

(b.) In the case of commercial companies, if an ordinary partnership, then the combined taxes of the members; if a limited partnership, then the combined taxes of its business representatives, must amount, in direct national taxes, to the sum indicated in the preceding paragraph.

II.—The qualifications as to business will be as follow:—

(a.) The possession of practical experience in works of engineering, ship-building or diving.

(b.) The employment of a principal engineer to whom the work is entrusted; such engineer to have a record which satisfies the Bureau of Material of the Naval Department that he has had personal charge of or managed the raising of a vessel of at least a thousand tons, that he has raised her or disposed of her within a proper period; or has undertaken submarine operations of corresponding magnitude. But if the person desirous of taking part in the competition himself possess the qualifications here indicated and will himself assume charge of the business, an engineer need not be employed.

## DEATH OF VISCOUNT TORIO.

Viscount Torio, after a long illness, expired at his Atami residence on the 14th instant at 9.10 a.m. His body was transported to Tokyo the same day, and the funeral will take place on the 18th instant, the cortege leaving the deceased's Tokyo residence, Sekiguchi-machi in the Koishikawa suburb, at 1 p.m. and proceeding to the Hongwan temple in Tsukiji.

Viscount Torio was a samurai of the Choshu clan. It is said that in his youth he was remarkable for an insubordinate disposition, and his father, in consequence, removed the lad's name from the family register, whereafter ceasing to be called "Nakamura," he took the name of "Torio." He became an earnest advocate of the *hinno* policy (restoration of the Imperial authority), and travelled hither and thither propagating his views, thus making the acquaintance of many men already or subsequently distinguished, and organizing a party of youths which received the appellation of *Torio-tai*. In the battle of Fushimi he showed conspicuous bravery, fighting on the side of the Imperialists, and in 1870 he received an appointment in the War Office (*Hiyobusho*). A year later at the early age of 25, he was promoted to be Major-General; then, in 1874, he was given the command of the Osaka garrison, and in 1876 he became Lieut.-General, holding at the same time the post of Vice-Minister of War. When the Saigo rebellion occurred and General Yamagata took the field, Lt.-General Torio officiated as Minister of War in General Yamagata's place, and gained such credit for his discharge of the duties of the office that the Emperor conferred on him the Second Class Order of Merit and granted him an income of 600 *yen* yearly. Thereafter he served on the Head Quarter Staff and became commander of the Guards, but in 1880 he resigned all his offices and retired to Osaka. It was from that time that he gradually acquired the reputation of a statesman dissatisfied with the condition of the era, and this phase of his character exhibited itself with special prominence in 1886, when, returning from his travels in Europe, he threw himself heart and soul into opposing any scheme of treaty revision which involved the appointment of foreigners upon the Japanese bench. Indeed it may be said that he contributed materially to wreck the programme which had been under discussion for nearly three years and was then on the point of assuming practical shape. The motive that prompted him in this instance was undoubtedly a vehement objection to the wholesale Occidentalization of Japan. Indeed from 1886 he figured as the most prominent enemy of the *Okawa Shugi*, as it was called, and thenceforth stood as the leader of the very small band of genuine Japanese conservatives. Yet he was by no means a conservative in the sense of opposing progress. The basis of his objection to the radical changes advocated by some of his countrymen was that the egoistical element of Occidental civilization gave it a repellent aspect in his eyes, and Christianity, which appeared to him as an ethical system based entirely on the doctrine of rewards and punishments for the individual, could not be reconciled with the altruistic creed which he deemed the highest morality. He himself was an ardent follower of Buddhism—the Zen sect—and it must be recorded that his life represented a splendid type of practical religion. But his character lacked the flexibility essential to success, as the world counts success. A member of the House of

Peers and a Privy Councillor, he necessarily took a large part in legislative affairs, but it appeared as though no policy was capable of altogether commending itself to his judgment. He figured perpetually in the opposition, being entirely without that adaptability of disposition which Confucius has well described as a willingness to swallow the clear and the turbid together. Thus though undoubtedly a great general, he never became a Yamagata or an Oyama, and though unquestionably a politician of clearest judgment, he never gained admission to the ranks of Ito, Inouye and Okuma. He appeared now to have been born before due time, again to have been left behind by the age, and in recalling his career one can not but regret that nature to such nobility of disposition and brilliancy of intellect had not allied the element of adaptability.

## DEATH OF DR. TAGUCHI UKICHI.

With great regret we announce the death of Dr. Taguchi Ukichi, the eminent economist, which took place at 1.15 p.m. on the 13th instant. He was only 51 years of age. The funeral takes place on the 17th at 1 p.m., the cortege leaving his house in Nishikata-machi, Hongo, at that hour and proceeding to the Christian Chuo Kaido in Haruki-machi. The burial will be in the Yanaka cemetery. Professor Taguchi was a man universally beloved and respected. Equally in the world of science and in that of politics he attained distinction without provoking a single voice of reproach. Though of an ancient *Samurai* family, he was brought up amid very straitened circumstances. He received his early education in the military school in Shizuoka, whither his mother retired at the same time as the Tokugawa family, of which his father had been a retainer. Subsequently—1870 to 1878—he served in the Department of Finance, and then started the *Keisai Zasshi*, in which he advocated the doctrines of free trade, never wavering from them in the smallest degree. Thenceforth his connexion was mainly with journalism, but he took an active part in other regions of public life, and in 1894 he was elected a representative of Tokyo in the Lower House, retaining his seat thenceforth uninterruptedly. For a time he belonged to the Progressist Party, but he ultimately left its ranks in conjunction with Mr. Shimada Saburo, like whom he was a Christian. In 1899 he received the degree of doctor of law in the Imperial University. He was the author of several works, all treating of economical and political subjects with an unvarying spirit of enlightenment and liberality. His early demise is a profound loss to his country.

## PORT ARTHUR.

The clearing operations are said to be proceeding vigorously at Port Arthur, but so great is the number of mines laid by the Russians that they still constitute a prohibitive obstacle to navigation. It appears that the Japanese are exploding them *in situ* instead of attempting to raise them, the former method being found quicker and safer.

Surveys have now been completed and it has been decided which of the Russian war-ships are to be raised and which are to be broken up. The removal of the guns and other important parts has commenced, but we do not find any clear indication of the number or the names of the vessels which there are hopes of utilizing.

It is related that the Chinese are busily

pursuing an avocation practised by them on many previous occasion, namely, digging up and stripping the bodies of officers and soldiers buried in the neighbourhood of the fortress. There is not time to make deep graves for the dead, and of that fact the Chinese are taking full advantage. It may be hoped that the Japanese administrators will adopt very severe measures to check this barbarity. But how suggestive it is of the poverty that afflicts many of the lower orders in China.

The various forts have now been put in order, and visitors are allowed to inspect them. Here and there among the grass and brush-wood Russian hand-grenades are still lurking, and the public are consequently warned not to wander from the beaten paths. A correspondent who has just inspected Golden Hill (Hwang-kinshan) says that the Russians handed over this great fort in an almost intact condition. The big guns—five of them, each over 24 feet long—are in position, uninjured, and so are the machine guns, the quick-firers and the search-lights.

## JAPANESE PRISONERS IN RUSSIAN HANDS

Colonel Emerson contributes to *Le Monde Illustré* an interesting article entitled "Les Prisonniers de Guerre au Japon." In the course of the article, after speaking of the kind treatment extended to Russian prisoners by the Japanese, he says:—"The treatment of these prisoners formed a marked contrast to a scene of which I had been witness in the Russian lines at Mukden, where two Japanese prisoners, non-combatants, were dragged forcibly by means of cords attached to their necks, to be photographed by a newspaper correspondent." Colonel Emerson qualifies this incidental recital by saying:—"This last fact ought, however, to be considered an isolated case, of which the responsibility rests entirely on the ferocious Circassians then charged with the guarding of the prisoners."

A correspondent recently addressed to this journal two letters insisting that there had been no ill-treatment of Japanese prisoners in Mukden, because he himself had not been a witness of it. We have now a writer who did actually witness, not indeed the special incident of the parade through the streets of Mukden, but an incident scarcely less brutal. How can we tell that the "ferocious Circassians" whom Colonel Emerson observed, were not subsequently engaged marching Japanese prisoners through the streets of Mukden by way of spectacle?

## GENERAL DRAGOMIROFF.

Another version (*Fiji Shimpō's* telegrams) of this officer's representation to the Tsar is less extravagant than that reported in our last issue. He is said to have stated that so long as the Russian army in Manchuria is not completely annihilated, hope should not be abandoned, and the war should be continued even though it last five years. In four years Russia would have a new navy and her situation would be correspondingly improved.

It was this Dragomiroff who opposed the war at the outset and severely criticised those that precipitated it. He apparently thinks that since the evil has been incurred it must be suffered to the full. But to us it appears that the talk of Russia continuing the campaign indefinitely is a reversal of the natural order of things. She would still be under-rating Japan's capacities as egregiously as she did at the outset.

## DR. HEPBURN.

We republish below from the *Princeton Alumni* and the *Orange Chronicle* portions of articles with reference to Dr. Hepburn. There are mistakes in both the articles. The writers err egregiously in the matter of Japanese Orders, and we are confident that Dr. Hepburn, when speaking of Japanese houses, never attributed the sickening and dying of Occidental ladies to "the filth of the Oriental homes they were in"; that remark would be quite ridiculous as applied to the residences of the cleanest people in the world. Every foreigner in Japan, however, will be delighted to hear of the honour conferred on Dr. Hepburn by the Emperor of Japan, who in this, as in all affairs, shows enlightened liberality of view.

The *Alumni*, of Princeton, Vol. V., No. 23, contains the following:—

Dr. James Curtis Hepburn '32, of East Orange, Princeton's oldest living graduate, celebrated his ninetieth birthday anniversary this week. On that felicitous occasion, the Emperor of Japan conferred upon Dr. Hepburn the decoration of the Third Class of the Imperial Order of the Rising Sun. In transmitting the Mikado's decoration, Mr. Takahira, the Japanese Minister at Washington, telegraphed Dr. Hepburn as follows:—

"It is my pleasing duty to announce to you on this anniversary of your ninetieth birthday that His Majesty, the Emperor, has been pleased to confer upon you the third class of the Imperial Order of the Rising Sun, in recognition of the valuable services you rendered to Japan while you lived there, by making important contributions to the advancement of English education among our people, and also of the friendly interest you have since then continually exhibited in the progress of the empire. I also take this opportunity to express on my own behalf the most sincere congratulations upon this happy occasion."

In the *Orange Chronicle*, of Orange, N.J., we find the following autobiographical notes:—

Dr. Hepburn was born in Milton, Pa., March 13, 1815. His father was a prominent lawyer in Pennsylvania. At the age of about thirteen, James went to Princeton college, of which he is at present the oldest living graduate, being of the class of 1832. On the occasion of the Princeton Alumni dinner in East Orange last November, Dr. Hepburn was given a rousing reception.

Mrs. Hepburn, now eighty-seven years of age, is the daughter of Governor Leete, first governor of Connecticut, and was born in that State, though brought up in North Carolina.

"We were married in November, 1840," said Dr. Hepburn, "and started in the same year for our labour in a foreign field, but we missed the ship which was to take us and so had to wait till March, 1841, when we finally sailed from Boston in a little old, old whaler, on which we were the only passengers. We stopped at Batavia in Java, and then went on to Singapore, where we remained for two years, working among the 40,000 Chinamen settled there at that time. There I learned the Malay or Philippine language—for they are really the same. At that time," and the doctor paused reminiscently, "it was not safe to go out on the island, because of the many tigers. But now it is very different; the island is beautiful and well built up."

"We were here, as I said, two years; during that time England and China were warring against each other; when the war closed, England had gained possession of five ports, and these were opened to residence and commerce, and so in 1843 we left Singapore and went up to a little island by the name of Kulangsu, directly opposite the city of Amoy, China."

"After we had been there about a year four others came there, Doty, Stronach, Pohlman and Boone; but the wives of these four men, four beautiful, lovely women, sickened of the fever, and died within two years. The husbands too, are dead now, and so none of them remain."

In 1846 we came home because my wife had been taken ill with neuralgia, and could not recover over there, and we settled in New York city, where I practiced medicine for thirteen years. I built a lovely home on 42d street, and built up a fine practice, but in 1859 the Presbyterian Board of Foreign Missions asked me to go out to Japan, which had just been opened by Perry. While in New York we had

lost three sons, who are buried in Rosedale cemetery. When we planned to go out again, we had but one son living, and we placed him at a good school, sold our home, I gave up my practice and we went to Japan, leaving here in April, 1859, and reaching our destination in October.

"Here, as in China, we were pioneer missionaries, and so encountered many hardships. We found it almost impossible to get a place fit to live in; ladies sickened and died because of the filth of the Oriental homes they were in, so we went to Kanagawa, and took up our abode in a Buddhist temple near Yokohama. Then Yokohama was nothing but a fishing village, with a dozen fishing houses. We lived in this temple, which has been cleared of its idols, for three years, and then at the insistence of the Japanese government we moved over to Yokohama, and there we lived until 1862, when we came home, and made our home here in East Orange, because we wanted to be near the graves of our boys, who lie in Rosedale cemetery."

Mrs. Hepburn was the first American woman in Japan, and started the first school for girls there.

Dr. Hepburn was one of the three men who made the first translation of the Bible into the Japanese language, and a copy of this Bible is among his treasured possessions. His associates in the work were the Rev. Dr. Samuel Rollins Brown, now dead, whose name stands out prominently in the history of Presbyterian missionary work in Japan, and the Rev. D. C. Greene, who is still labouring in the Land of the Rising Sun as a missionary. Dr. Hepburn also published the first Japanese-English dictionary.

The aged missionaries have one son living. He is settled in Nagasaki, and is an agent for the Standard Oil Company. His wife came from Lock-haven, Pa. They expect to come to this country in the spring. Dr. Hepburn's nephew, Samuel B. Hepburn, lives at 334 Park avenue, East Orange, and the physician has two sisters in Pennsylvania, both of whom are over eighty years old.

## A JUST TRIBUTE TO THE MEMBERS OF THE BRITISH DIPLOMATIC AND CONSULAR CORPS.

At the seventh ordinary general meeting of the Bradford Dycers' Association, held on the 28th of February, the Chairman, speaking of the two journeys upon which Mr. W. S. Kinch had been despatched to the Far East for the purpose of investigating trade conditions, said:—

It is a prevailing custom to decry the methods and work of Government departments and the Consular service. Consequently, it is the more meet that we should express our indebtedness to the Foreign Office and to the Ambassadors, Consuls-General and Consuls, to whom the Foreign Office furnished letters of introduction, for their valuable services in facilitating the efforts of our missionary directors.

Mr. Kinch himself, when seconding the adoption of the report, made use of the following words:—

I have pleasure in seconding the adoption of the Report and Balance Sheet, and I should content myself with that simple form of words, but for one paragraph in the Chairman's speech, to which I will venture to refer in a few words, in acknowledgment of my personal feelings of satisfaction, and in justice to a very important public department. My own experience in the East and elsewhere enables me to give an assurance that in all matters of over-sea business, consuls, colonial and foreign office secretaries, legation secretaries and commercial attachés are not simply willing, but anxious and eager to give help to all concerned in British trade. Of course it is not reasonable to go to a consul for information that is easily attainable in directories and other similar books of reference, but for my part I have found that I had only to indicate in what way I desired to be helped, in order to find that these gentlemen were absolutely enthusiastic in their exertions to satisfy, and in the great variety of knowledge required in consuls they were not always thoroughly masters of details of the specialised industries concerned, they were always ready to show the way, the place, and the persons from whom such information could be best obtained. I was unwilling to let this opportunity escape me, as I have from the very beginning of foreign travel felt a most sincere debt of gratitude to these officials in the parts of the world I have visited, and in London also, to which I have now the satisfaction of giving expression.

It is agreeable to find that the groundless complaints made from time to time against British diplomatic and consular officials are thus emphatically controverted by a respon-

sible man speaking from his own experience. The fact is that there are no more helpful persons, nor any better equipped to help, than these very officials. And a word may be said here about the charges of incompetence which Englishmen habitually prefer against the members of their diplomatic service everywhere. Does it occur to these critics, we sometimes wonder, to look carefully at the British Legations in Peking and Tokyo, for example, and to consider whether the Legations of any other Power are equally, or even approximately as well furnished with staffs of the highest qualifications, and to reflect whence it is that nearly all the really substantial information and research emanate about both China and Japan?

## THE FIFTH DOMESTIC LOAN.

It is expected that the fifth domestic loan of 100 million yen will be a success. Circulating in the hands of the people are considerable quantities of money paid out by the Government on account of the war, and many of the holders of this money will be glad to find an investment. The rate of interest being 6 per cent., the issue price 90, the period 7 years, and the number of installments six, the actual interest works out at 8.25 per cent. It is announced that the time for making applications will be from May 1st to May 5th, and that each application must be accompanied by 4 per cent. of the amount applied for, which sum will be devoted to the payment of the first of the six installments in which the money is to be called up. In all respects the terms are identical with those of the fourth loan. The Treasury's intention is said to be that the proceeds of the foreign loans are to be devoted to making payments abroad so as to obviate any undue drain of the hard-money reserves which form the basis of the currency system.

The periods and amounts of the various installments are:—

## Installment.

First.....	4 per cent. at time of application.
Second.....	10 yen from 16th to 30th June.
Third.....	16 " 17th to 26th July.
Fourth.....	10 " 16th to 25th August.
Fifth.....	30 " 16th to 25th September.
Sixth.....	20 " 16th to 25th October.

The only difference between the method pursued in the present case and that pursued in the case of the fourth loan, is that all applicants will now be on the same footing. In the case of the 4th loan the authorities aimed specially at providing facilities for small investors, and they consequently made allotments to all applicants in the 25-yen bond category, without considering the premium offered. That will not be now the method. Allotments will be regulated strictly in the order of the bidding, the highest bidders getting the largest proportion of the stock. For the rest, the dimensions of the bonds will be as before, namely, 25 yen, 50 yen, 100 yen, 500 yen, 1,000 yen and 5,000 yen.

## THE "ARARE" AND THE "KIJI."

The destroyer *Arare*, which was launched at Kure on the 5th instant, has since then been receiving her armament at the same place, and much progress having been made, it is expected that she will be fit for duty by the 10th of May.

The torpedo-boat *Kiji* was launched at Kure on the 18th instant. It is evident that Japanese dock-yards are working very actively.

## THE CAPTURED STEAMERS.

From the *Nichi Nichi Shimbun* and from our own records we have compiled the following table showing the tonnages and cargoes as well as the insurances effected in the case of the 24 steamers captured by the Japanese during the period from January 11th to April 4th:—

Ship's Name.	Nationality.	Tonnage.	Cargo.	Insurance on Hall.	Insurance Cargo.	Total Insurance.	Date of Capture
<i>Rosalie</i> .....	England.....	4,370.....	Cardiff Coal .....	45,000	25,000	70,000	11/1/05
<i>Redington</i> .....	" .....	4,421 .....	" .....	45,000	25,000	70,000	12/1/05
<i>Wilhelmina</i> .....	Holland .....	4,295 .....	" .....	40,000	33,000	73,000	16/1/05
<i>Bawtry</i> .....	England.....	2,407.....	Food Stuffs .....	18,000	60,000	78,000	17/1/05
<i>Oakley</i> .....	" .....	3,798.....	Cardiff Coal .....	40,000	30,000	70,000	18/1/05
<i>Burmah</i> .....	Austria .....	3,071 .....	" .....	22,500	19,000	41,500	25/1/05
<i>M. S. Dollar</i> .....	" .....	4,216.....	Forage .....	37,000	59,000	96,000	27/1/05
<i>Wyfield</i> .....	England.....	3,235.....	Various .....	55,500	42,000	97,500	30/1/05
<i>Siam</i> .....	Austria .....	3,180.....	Cardiff Coal .....	22,500	19,830	42,380	31/1/05
			Ship-building material				
<i>Palos</i> .....	Germany .....	2,398 .....	and food-stuffs.	20,000	80,000	100,000	10/2/05
<i>Abollo</i> .....	England.....	3,829.....	Cardiff Coal .....	23,000	28,000	51,000	14/2/05
<i>Scotsman</i> .....	" .....	1,677.....	Rice .....	10,000	42,000	52,000	14/2/05
<i>Silvania</i> .....	" .....	4,187.....	Cardiff Coal .....	30,000	25,000	55,000	19/2/05
<i>Powderham</i> .....	" .....	3,019 .....	" .....	22,000	23,000	45,000	19/2/05
<i>Severus</i> .....	Germany .....	3,307 .....	" .....	—	—	85,000	23/2/05
<i>Romulus</i> .....	" .....	2,630 .....	" .....	—	—	—	25/2/05
Grand Total .....		54,022		430,550	510,830	1,026,380	

The following have also been captured but details as to their insurance are not forthcoming:—

<i>Easby Abbey</i> .....	England.....	2,963.....	Cardiff Coal .....	—	—	—	27/3/05
<i>Vegga</i> .....	Sweden .....	2,562.....	(?) .....	—	—	—	3/3/05
<i>Venus</i> .....	England.....	3,558.....	Cardiff Coal .....	—	—	—	4/3/05
<i>Aphrodite</i> .....	" .....	3,049 .....	" .....	—	—	—	(?)
<i>Tucoma</i> .....	America.....	2,812.....	(?) .....	—	—	—	14/3/05
<i>Harborton</i> .....	England.....	3,256.....	Cardiff Coal .....	—	—	—	18/3/05
<i>Industrie</i> .....	(?) .....	198 .....	(?) .....	—	—	—	28/3/05
<i>Henry Balkow</i> .....	Norway .....	1,006.....	(?) .....	—	—	—	7/4/05
Grand Total .....		74,326		—	—	—	

If we apply to the last 8 vessels the average value of the preceding 16, it appears that the 24 ships with their cargoes represent about 15 million yen worth of property.

## THE MEAT PROBLEM.

Residents of Yokohama should be keenly interested in the condensed report, which we print below, of a recent meeting held by the members of the Kobe Meat Club. The question of meat prices has become quite serious locally. It may be remembered that when a crisis of this kind occurred some years ago Messrs. Curnow & Co. undertook the supplying of meat to the community, with the result that the butchers' monopoly went to pieces. We are hardly in a position to say, however, whether the enterprise was wholly satisfactory to the firm, and there seems to be no prospect of a renewed attempt to defeat the Guild. Yet residents have before their eyes the example of Kobe. For three months an unpaid, an honorary, Committee have conducted a butchery at prices greatly lower than the local guild, and have done so in such a satisfactory manner that the members of the club have resolved unhesitatingly to give them a free hand in the matter of prices. Moreover the question of cold storage has been taken up boldly. Estimates have been made and there certainly appears to be an opening for a business undertaking. We wonder whether Yokohama people will be content to tamely leave themselves in the hands of the butchers?

A meeting of members of the Kobe Meat Club took place at the Gymnasium on Friday, April 14th. There was a large attendance—in fact, according to the *Kobe Herald*, the largest at a business gathering in Kobe during the past three years. Mr. Cornes, the President of the Meat Club, was in the chair, and was supported by the entire Committee, consisting of Messrs. Aiton, Whymark, Oldenburg, Cabeldu, Hansell, Shea, and Young.

A report was submitted by the Committee from which we extract the following:—

"The Club has now been running for three months, and has, as will be seen from the Balance

Sheet, succeeded in supplying members with meat at rates considerably under the Butchers' Guild prices without having made any encroachment so far on the members' subscriptions, which form the working capital of the Club. As the members' accounts for March, however, totalled upwards of ¥3,200 while the stock on hand on March 31 cost ¥624.48, it will readily be seen that the Committee have not been able to carry on and pay cash for daily supplies without getting accommodation from the Bank; this might be obviated, and the Club placed in a much better position, by the members subscribing a further sum of ¥10 each, while the subscription for future members would then be raised to ¥20.

"The most serious question, however, which the Club now has to face is the constantly advancing price of cattle. Early in March a rise of 2 sen per lb. was advertised, while before the end of the month a further and larger rise had to be met. Meat was actually distributed at a loss for the last few days of the month, the Committee intending to publish a new price list to hold good for April. On the 5th April, however, another heavy rise took place, and prices even now paid may not hold good for many days. The Committee are thus unable to make up a price list which they can say will hold good for half a month or even a week, and they therefore feel that they cannot continue unless the great majority of the members of the Club are willing to place themselves unreservedly in their hands, in the matter of prices, and are prepared for those heavy rises which existing circumstances render probable. The Committee would draw the attention of members to the fact that the rises referred to have nothing whatever to do with the question which existed between the Community and the Butchers' Guild at the inception of the Club; they are due to the large quantity of beef that has been, and is being, canned for army rations, and to the consumption of a large quantity by the Russian prisoners now detained in Japan. The difference between the wholesale price of carcasses of beef at the time the Club started and the present is 11 sen per lb. which represents 10 to 11 sen per lb. when cut up and retailed. The Committee after making enquiries are convinced that this rise is a perfectly legitimate one, occasioned by the scarcity of cattle, owing to the increased demand, and that it is not the result of the scheming of interested parties to raise values in an unfair way.

The Committee recommended that attention should be turned to the promotion of a company for the importation of frozen meat and other articles of food from abroad. They estimated that yen 20,000 would be sufficient to provide a cooling chamber 25 feet by 10 feet, and leave yen 5,000

for working capital—the cost of running it being put at yen 200 per month. This enterprise, however, would have to be carried on as a business undertaking and not by an honorary committee as in the case of the Meat Club.

The provisional balance sheet referred to in the report shows the capital of the Club to be yen 2,490 which, together with an overdraft at the Bank of yen 664.18 and a profit of yen 1.11 makes a total of yen 3,155.29. Against this there are yen 3,201.21, uncollected bills due from members, an item of yen 60.00 brought forward from Equipment Account, plus yen 624.48 value of stock in hand, minus yen 750.41 for unpaid meat bills. The profit and loss account shows that the Committee have been wonderfully successful in running the business without either making or losing any appreciable sum of money.

After some remarks by the Chairman and others it was decided on the motion of Mr. Gill seconded by Mr. Happer to subscribe the additional yen 10 asked for and to give the Committee a free hand in fixing prices without previous notification. It was stated that the Club used monthly about 40 head of cattle and 30 to 40 sheep. A sub-committee—Messrs. Melhuish, Davidge and Campbell (Bowden Bros.)—was appointed to investigate the cold storage question.

The following statements, which have been placed at our disposal, may, perhaps, serve to throw some light upon the meat question:—

Invoice of ten live sheep shipped per ——— by ——— to ——— of Yokohama.

10 sheep..... at 12.30 123.00

CHARGES.  
Freight on 10 sheep ..... at 4.50 45.00

Consular Fees..... 2.15  
Commission ..... 5.15

March 1st, 1905. 177.30  
Invoice of five live sheep shipped per ——— by ——— to ——— of Yokohama.

5 live sheep..... at 12.30 61.50

CHARGES.  
Freight on 5 Head at 4.50.....22.50  
Shipping and Coolie Hire..... 50  
Consular Fees ..... 2.20  
Commission ..... 3.07.28.27

Mex..... 89.77

## THE LATE MR. DUMELIN.

Old Yokohama residents of every nationality will learn with deep regret of the death in Frauenfeld, Switzerland, his native town, of Mr. Arnold Dumelin, who was Consul General for Switzerland here for several years. Mr. Dumelin first came to Japan in May, 1866, to Messrs. Charles Thorel, Ziegler & Co., and upon that firm dissolving partnership he joined Messrs. Ziegler & Co., with whom he remained until 1875, when he joined Siber & Brennwald, subsequently becoming partner and retiring in 1898. Mr. Dumelin was President of the Club Germania and for many years was on the Committee of the General Hospital and on the Gas Committee. He always took a great interest in public matters conducive to the welfare of this settlement, and was widely known for his geniality and generosity, being ever willing to give a helping hand to those in need of assistance. Much sympathy is felt for his widow and young daughter, to whom a telegram of condolence has been sent by his many friends in Yokohama.

Four Chinamen of the crew of the Norwegian steamer *Henri Balkow*, which was brought on April 13th to Yokosuka after capture, having trouble with the captain, have been removed to the Yokosuka Police Office. The crew say that the captain engaged them at Shanghai on a promise to make a voyage to Hongkong only, but after leaving port he changed the route to Vladivostok.

## CHINA.

The *Jiji Shimpō's* Peking correspondent wires that he has had interviews with Sir Ernest Satow and Mr. Wu Ting-fong, on the subject of the Tibetan arrangement. It will be remembered that quite recently a circumstantial statement was published, emanating from Shanghai, to the effect that Great Britain and China were to assume the joint protectorate of Tibet. The actual terms of the alleged agreement were published. But Sir Ernest Satow and Mr. Wu both deny most emphatically that any such agreement has been concluded. The thing, they declare, is a pure invention conceived and circulated by the Russian agency in Shanghai which makes the fabrication of falsehoods its chief business. We do not imagine that either Sir Ernest or Mr. Wu used quite that language, but they certainly seem to have denounced, as it deserves to be denounced, the Shanghai factory of falsehoods. The Tibetan convention is now in process of negotiation, and the Shanghai Munchausens are doing what they can to arouse Chinese suspicions and thus impede the agreement.

We learn from the *Jiji Shimpō's* Peking telegrams that the long-disputed question of the Indemnity has been settled. The sums hitherto outstanding on account of exchange and interest are to be definitely assessed at 8 million taels, for which the Chinese Government will be liable, and which will carry 4 per cent. interest from the 1st of January last. On the other hand, 4 per cent. interest will be allowed to China on her monthly payments of the Indemnity. These are the principal points.

A telegram to the *Nichi Nichi Shinbun* from Shanghai says that the *Chinghsing-pao*, having inserted matter severely criticising the Chinese Government and applying an opprobrious term to the Empress Dowager, has been suspended by the Taotai, acting under orders from Peking, and its office and plant have been sealed.

Yingkow wires that the Russians are sending emissaries to Shankaikwan and even as far as Tientsin in search of recruits for a body of Hunglutsz which they are forming for the purpose of undertaking a raid against the Japanese communications. This recruiting operation is apparently not meeting with much success, the Chinese freebooter not having any great inclination to take the field against the Japanese even in consideration of a salary of 60 taels monthly.

We read in the *Jiji Shimpō's* Shanghai telegrams that sub-marine mines have drifted as far as the island of Chusan and that several Chinese fishing boats have been blown up by the explosion of one of these engines of destruction. If this be true it is plain that the whole China Sea is in a more or less dangerous condition. The next congress at the Hague will have to consider whether sub-marine mines should not be placed in the same category with dum-dum bullets.

On the 3rd instant there took place at Fushun the official opening of a horse tram connecting that place with Machuntan and Sanlungku, and thus bringing the Fushun-Mukden permanent railway into communication with Hanchang. There is also a train from Hanchang to Fenghwan, and from thence to the Yalu. Thus it may be said that the Japanese have now an auxiliary line of railway from the sea to the front.

It is stated that numbers of Japanese continue to flock to Yingkow, in spite of warnings from the Authorities and in spite of the unsuccessful experiences of their predecessors. There is certainly no lack of adventurous spirit among the Japanese.

Mr. Justice Rennie has retired for so long a period from the view of his countrymen in the Far East that it seems necessary on the occasion of his death to recall his career. We quote "Who's Who":—

Rennie, Sir Richard Temple, Kt., *cr.* 1882; *b.* London, 17 May 1839; *s.* of late George Rennie, M.P.; *m.* Marie (*d.* 1874), widow of Thomas de la Rue, 1867. *Educ.*: privately. Barr. Inner Temple, 1860; appointed Judge of H.B.M.'s Court for Japan 1878; Chief Justice of the Supreme Court in China, Japan, and Shanghai, 1882; retired on pension, 1891.

The Governor of Hsinking reports to Peking that Russian troops have entered the territory under his administration and that they refuse to take their departure. He asks Peking for instructions.

The report of Messrs. Lane, Crawford & Co., Ltd., of Shanghai, for the year ended the 28th of February last shows a divisible balance, after deducting the interim dividend of 5 per cent paid last November, of \$64,509. It is to be proposed to pay a final dividend of 7 per cent, and a bonus of 2 per cent, making 14 per cent, for the year, and to carry forward the balance, \$42,009.

According to a Peking dispatch, translated by the *N.-U. Daily News*, the Imperial Resident at Urga, Mongolia, has reported to the Grand Council that there has been some trouble in persuading the ex-Dalai Lama to leave Urga for Tibet owing to the intrigues of Russian agents who want to get him to escape into Russian territory, so that they may use him at some future time for their own political purposes. In consequence, however, of the strict watch kept upon the ex-Dalai Lama's movements by the Imperial Resident, Yen Chio, who, by the way, was in 1900, Taotai of Amoy, the ex-Pontiff of the Buddhist faith has been unable to effect his escape and has given a promise to leave for Tibet via interior towns of China Proper and Szechuan province by the middle of the present month. The Chinese Government will breathe more freely once the Pontiff has left Mongolia.

A most successful Red Cross "Charity" performance, arranged by Mrs. von Hanneken, was given at Tientsin on the 31st March. The receipts were about \$3,500.

About three hundred so-called Russian red-cross nurses and attendants have arrived at Yingkow from the front, and been sent on to Chinwantao. There was a strong suspicion that the men were really combatants.

A Peking despatch, remarks the *N.-C. Daily News*, stated that the Russian Minister, Mr. Lessar, has been lately giving the Chinese a great deal of trouble by demanding that a Belgian engineer be put in charge of the construction work of the Peking-Kalgan railway, and also offering to lend funds to assist the Government in building the line. The Waiwupu, however, has maintained a firm front and absolutely declines to listen for a single moment to any proposition referring to using foreign funds, or placing a foreigner in charge of the proposed line, and that Board has further replied that it has every confidence in the ability and experience of its own engineer, Taotai Jeme Tien-yow, Ph.B. (Yale University), A.M.I.C.E. (London), etc., to undertake everything necessary with regard to the railway. We also hear that two other Chinese who have lately completed their studies in the U.S. have been sent for to assist Mr. Jeme Tien-yow in his work in constructing the Peking-Kalgan Railway.

The report of Hall and Holtz, Ltd., for the year ended the 28th of February last shows a divisible

balance, after paying an interim dividend of \$1 per share, of \$38,453. It is proposed to pay a final dividend of \$1.50 per share, making 12 1/2 per cent. for the year, and to carry forward the balance, \$7,551.

The West River steamer *Kongnam* ran ashore in Pirate Bay, beyond Capsuimun Pass, on the 5th April. She had 6 feet of water in her fore-hold.

The Rev. John Robinson, of the English Methodist Mission, Tientsin, died on the 3rd inst., aged 61.

It is reported from Peking that the members of the Waiwupu are in a pitiable state through their inability to prevent the Russians from violating neutral territory, by using the route between Kurunta (Mongolia) and Pétune (Manchuria) for the transport of supplies and contraband of war for the use of the Russian forces in the latter province. Pushed by the Japanese Minister on the subject, the Waiwupu appealed to the Russian Minister to stop this violation of neutral territory. Of course, the latter declared his inability to do anything in the matter, so resort had to be made to St. Petersburg through the Chinese Minister there, but also to no purpose. The spectacle of the Waiwupu being sharply censured on the one side by the Japanese Minister and on the other seeing that Board "bucking against a stone wall," to use an Americanism, is a pitiable sight indeed.

A Swatow letter reports the death, a short time ago, at his home in Chaiyingchow, province of Kuangtung, of H.E. Wang Kung-doo, late Minister-designate to Japan, at the age of fifty-two. The foreign community, says the *North China Daily News*, will remember him as the person who, during the eventful period following the coup d'état of the Empress Dowager in September 1898, was inveigled by the then Shanghai Taotai, Ts'ai Chun, into the Bureau of Foreign Affairs on the Bubbling Well Road, and imprisoned there as a Reformer and suspected member of Kang Yü-wei's Reform Party. It will also be remembered that when it became known at the time Wang Kung-doo (Huang Chun-hsien) was to be transferred by Tsai Taotai into the native city, probably to be decapitated by orders from Peking, several foreigners tried to make a raid one night on the Bureau of Foreign Affairs with the object of liberating the Reformer, unfortunately without success. Finding his efforts at removing his prisoner into the native city ineffectual, Tsai Taotai kept him in the Bureau of Foreign Affairs, until a Rescript arrived from Peking setting him at liberty. From Shanghai Wang left on the South, to return to his home in Chaiyingchow, which he never left, although restored to his former rank and titles by the "Grace" decree issued by the Empress-Dowager on her seventieth birthday anniversary, last November, whereby "all who were degraded or proscribed for being implicated in the reform movement of 1898 are pardoned and restored the respective ranks and titles each held at the time of his proscription, or degradation." The deceased was Chinese Consul-General at Singapore in 1893, and an M. A. (Chijien) in literary rank. In 1895 he returned to China and in January of the following year was appointed Chief Secretary of Admiralty Affairs in Tientsin. In Nov. of the same year he was appointed Minister to Germany, but did not proceed, his place being taken by H.E. Lü Hai-huan, now Treaty Commissioner here and President of the Peking Board of Works. In June 1897 he became Salt Intendant of Hunan and then Acting Provincial Judge, in which post he became the right-hand man of the late Chen Pao-chên, the enlightened Governor of that province, in his reforms. In August 1898, a month before the famous coup d'état, the deceased was appointed Minister Plenipotentiary to Japan, but before he could proceed thither he, as well as Governor Chen Pao-chên and other enlightened officials, was engulfed in the cataclysm which Kang Yü-wei's influence over the Emperor produced. Coming to Shanghai, the deceased was arrested

by the Shanghai Taotai of the time as already noted.

Among the interesting notes on Native Affairs which form a most readable feature of the *North China Daily News*, we find the following:—

It is an open secret in Mandarin circles that ever since the coup d'état of 1898 any person towards whom His Majesty Kuang Hsi may show the least particular regard has been marked out for slaughter, as it were, by those belonging to the reactionary party. Again and again it has been found that nobles and high ministers, or officials of lower rank, who have been either cashiered, degraded, or removed from office, suffered for no other reason than because the Emperor had evinced interest and a measure of friendliness to these unlucky persons at one time or another. The latest coup against one of the Emperor's friends has been the case of Duke Tsai Tshih, a cousin of his Majesty and one whom the Emperor particularly liked because of his energetic disposition, honesty of purpose, and advocacy of reform on Japanese lines. The Duke was appointed at the beginning of the year Superintendent of the Ching Ling, or the great Mausoleum of the late Emperor K'ang Hsi, the second Sovereign of the present dynasty. On taking over his duties the Duke found that, owing to the inattention of his predecessors, the officials and Imperial guardsmen in charge of the great mausoleum had cut down a great deal of the ancient timber around the domain and taken off the heavy and massive copper and silver ornaments in the buildings surrounding the Imperial tomb, which they had sold with much profit to their purses. Naturally the new Superintendent desired to know what had become of all these things, and was occupied with his personal staff in taking an inventory of trees and things that had been stolen when, frightened of the consequences which would entail upon themselves, the permanent staff on the premises set the place on fire to conceal the ravages of themselves and their predecessors. Readers of the Imperial Decrees published from time to time in this column may perhaps remember an edict in which it was commanded (by the Empress Dowager, of course) that the Duke should be handed to the Imperial Clan Court for determination of a penalty for negligence, and others of his staff were ordered to be arrested and sent to the Board of Punishment for trial. A Peking correspondent writing on this subject states that he has learned that the setting fire of the mausoleum was really due to advice received from opponents of the Emperor in Peking, this being one of the means for putting a friend of his Majesty in the background for some years to come. Had the Duke held his post without mishap for a year, he would have been in the ordinary course promoted to a higher and more responsible post in Peking next year. As matters now stand he is in disgrace through no fault of his own—unless being zealous and energetic in his duties be considered a fault.

#### DEATH OF MR. OBATA TOKUJIRO.

The death of Mr. Obata, whose dangerous illness was announced some time ago in these columns, took place on the 6th instant. We take from the *Japan Times* the following notice:—

Born in 1842 in the family of a samurai in the Nakatsu clan, the deceased showed from his early youth a strong inclination towards learning. At the age of 16, he was appointed the head of a school established by the feudal lord of Nakatsu. In 1864 Mr. Obata came up to Tokyo in order to study English under the late Mr. Yukichi Fukuzawa. This was the beginning of his association with the "Sage of Mita," which only ended on the death of the latter in 1901. Since the time he first entered the school opened by the late Mr. Fukuzawa and afterwards enlarged by the present Keiojijuku, Mr. Obata had strenuously assisted the late Mr. Fukuzawa in the accomplishment of the latter's educational work. He was soon made the head of the school. In 1877 the deceased went to Europe and America to study the educational systems there. After staying abroad for a year or so, he returned home and was elected a member of the Gakushi Kaiin (association of savants), from which he subsequently resigned. In 1890 His Majesty the Emperor was pleased to appoint him a member of the House of Peers, in recognition of the services rendered by him to the country. At the death of Mr. Fukuzawa, he was appointed Chancellor of the Keiojijuku.

The deceased was the author of several works on political economy and literature, and also translated works on similar subjects by celebrated English and American authors. These publications have contributed much toward the promotion of the welfare of this country. The educational work of the late Mr. Fukuzawa also could not have been successfully

crowned had it not been for the untiring assistance given by the deceased. At the demise of Mr. Obata, the country has lost one of the foremost figures in its educational and literary circles.

The funeral service will be held at the Shounji Temple at Hiroo, Azabu, on the 19th inst. at 1 p.m.

#### NOTES ON CURRENT EVENTS.

It appears that the Japanese authorities have actually taken steps to provide educational facilities for the ignorant among the Russian prisoners at Himeji. We learn this from a letter addressed to one of the prisoners by his family in Russia, and published in Japanese newspapers. The writer of the letter acknowledges with unbounded delight the receipt of the first epistle ever penned by the prisoner in question. "For more than thirty years," he says, "you lived in your own home utterly ignorant of writing or of reading, and now by the kind aid of the Japanese you are enabled, with difficulty but still legibly, to indite your first letter to your family. I can not express the pleasure and astonishment caused by this incident. You are a fortunate man and we pray for your safe return. It is difficult to credit such benevolence on the part of your captors, and they deserve unbounded gratitude. Write to us all particulars of your life, your employment and your food."

A farewell entertainment to Mrs. Wood, of the United States Legation, was given on the afternoon of the 13th instant by the members of the Shussei Gunjin Kazoku Imonkai in the Korakuyen Park. There was a very large attendance of ladies, and among them were Princess Mori, Marchioness Nabeshiina, Marchioness Oyama, Marchioness Kuroda, Lady MacDonald, Madame la Baronne d'Anethan, Mrs. Griscom, Baroness Sannomiya, Countess Itagaki, etc. Marchioness Oyama, speaking in English, expressed in warm terms the gratitude of the various charitable societies on behalf of which Mrs. Wood had laboured so benevolently and so assiduously, and assured her that she would carry away from Japan the gratitude and admiration of Japanese women. Mrs. Wood replied in feeling words, declaring that the friendship of the ladies of Japan had been invaluable to her and that she deemed it a great honour to be counted as one of them. This speech was excellently translated into Japanese by Mr. Zumoto. Unfortunately the proceedings were somewhat marred by inclement weather, but the party was otherwise a great success.

On the whole the Spring Exhibition of Art Products in Uyeno Park (*Bijutsu Kyokai*) is at least as good this year as it has ever been. In fact its general level is higher than that of any previous display, for there is not one exhibit of a distinctly inferior grade: every one has some points of excellence. Bronzes, carvings, jewelry, metal work, porcelains, lacquers, enamels, embroideries, textile fabrics and articles of every-day use—all are represented by beautiful specimens. Many of the bronzes and of the carvings in wood and ivory show a remarkable degree of achievement, and though the porcelains are not quite the *me plus ultra* of Japanese ceramic art, they are very charming and give evidence of much skill both technical and decorative. No one with any taste for art objects should fail to see the exhibition.

This Exhibition is now going on in Uyeno Park. There are 120 pictures in all, 100 relating to the Army and 20 to the Navy. They are from the studio of Mr. Ogawa,

which fact alone suffices to guarantee their excellence, but we may add that they are of very large dimensions, and, being coloured, they convey a most vivid impression of the scenes and persons represented. It is the most intensely interesting display of the kind we have ever witnessed. The visitor knows that he is looking at incidents which actually took place in the war, and by going round the pictures carefully, descriptive catalogue in hand, an exact idea can be obtained of every kind of fighting, as well as of the horrors of the battle-field and the siege. We strongly recommend a visit.

The *Official Gazette* of the 13th instant places the Pescadores under martial law.

Some Poles are determined that General Kuroki shall be numbered among their nationals. A certain Mr. Toronsky, a Polish haberdasher of Ohio, has sent to the General a letter eulogizing his deeds and professing a common hostility towards the Russians. Enclosed in the letter are two Polish coins, dating from the early part of last century. The writer says that if General Kuroki examines these monetary tokens they will probably awaken some recollections of his native land. Whether the letter be a genuine expression of sentiment or whether it is the effusion of an autograph fiend, must remain doubtful. M. Toronsky asked for a reply and for some fragments of Russian uniform, and he obtained his desire, for the General sent him a photograph, a few lines of acknowledgment and three Russian shoulder-straps.

On Saturday afternoon General Terauchi, Minister of War, entertained in the Korakuyen Park at Koishikawa a large party of ladies who had been conspicuous in good offices on behalf of the armies in the field. The number of gentlemen present was not large. A fine afternoon rendered this historical park a beautiful scene, and it need scarcely be said that the distinguished host and the officers supporting him dispensed most graceful hospitality.

Eight hundred and fifty Russians from Port Arthur have been carried to Chefoo and handed over to the French Consul. Apparently the bulk of these were persons crippled and therefore no longer fit for service, who had been under medical treatment at the fortress since its surrender. But there are some non-combatants. Five women are spoken of, and one has just become a mother.

The Tokyo Municipality, through the Mayor, Mr. Ozaki Yukio, has addressed a telegram to King Edward, expressing condolences in connexion with the earthquake in India.

A subscription on behalf of the families of the sufferers has been started by the *Jiji Shimpō*, and has reached the amount of 1659 yen. We observe that Baron Iwasaki (Hisaya) contributes 1,000 yen.

The Russian Government has sent out a sum of fifty thousand roubles for the support of the members of the Russian Red Cross still at Port Arthur. This money was forwarded to the Japanese Consul at Chefoo, and has been sent on by him to Port Arthur.

The *Official Gazette* announces that defence zones have been established around the Pescadores, the Liukiu Islands and Oshima (in Kagoshima Prefecture).

It appears that three among the ships recently seized *en route* for Vladivostock were

the property of a Mr. Robert Lee, a British subject, who chartered them to a Russian agent in England. The vessels are the *Rosalia*, the *Reddington* and the *Oakley*. In the charter-parties it was provided that these steamers, carrying coal, should proceed to Hongkong, Shanghai or Kiaochow. They all called at Hongkong, and having cleared thence for Shanghai, made no call at the latter place but steered direct for the Tsushima Straits, where they were seized.

According to the *Nichi Nichi Shimbun* the following submarines are at Vladivostok:—

The *Forel*—This craft has been in the port since the commencement of the war. She is a very small vessel.

The *Delphin*—Celebrated as connected with the strange incident last summer when the boat was anchored at the mouth of the Neva.

The *Protector*—Sent from America through Russia.

The *Fullerton*—Sent by a British ship to Vladivostok.

There are two others of the *Delphin* type, improved. They were sent by the Siberian railway.

On the 16th instant the workmen of the Koishikawa Arsenal organized a procession in the Hibiya Park to celebrate the victories hitherto won by their country. 25,000 men paraded and sang the national anthem as well as several war-songs in chorus. There were also fire-works and the demonstration was most effective. Work at the Arsenal was entirely suspended for the day.

It is stated that the guns abandoned or hidden by the Russians in the battle of Mukden are gradually being unearthed and that the total now reaches two hundred. This report is dated the 8th instant and seems to be credible.

It is noteworthy that in spite of the withdrawal of such a great number of steamers from the regular carrying service in home waters, Japanese shippers have not experienced any inconvenience during the present war. The *Nichi Nichi Shimbun*, writing on this subject, says that in consequence of the requisitioning of steamers by the Government, no less than 70 vessels aggregating 262,732 tons have been purchased by Japan since the outbreak of the war, to replace those requisitioned, and 52, aggregating 101,529 tons, are chartered. The chartered ships are:—

	Ships.	Tons.
British .....	17	48,576
German .....	5	8,324
Norwegian .....	22	41,271
Swiss .....	1	1,637
French .....	1	694
Korean .....	6	1,027
Totals .....	52	101,524

Thus there has been an aggregate addition of 122 vessels representing 364,261 tons.

A telegram to the *Hochi Shimbun* from London says that Mr. Chamberlain's speech about the Anglo-Japanese Alliance attracted much attention in Berlin. In the German capital it seems to be now considered that Germany committed an error of statesmanship in 1886 when she joined the triple demonstration against Japan, and it seems to be further considered that the extension of the scope of the alliance would certainly guarantee the peace of Asia. As to the latter point, there can not, we think, be much doubt. And we should hope that Germany might herself be found in the camp of the allies.

It will be remembered that the Admiralty, some time ago, purchased the Omine Mine in Yamaguchi prefecture, with the purpose

of manufacturing coal briquets for naval use. Chief Engineer Takeda of the Navy now reports that the machinery recently imported from England has been placed in site and the other necessary arrangements made, so that on the 25th instant it will be possible to commence the manufacture. A railway has been built, over a distance of 10 miles, connecting the factory with the Kyushu system, and the total expenses incurred are said to have been 1,060,000 yen. Under normal circumstances the factory will turn out 150,000 tons of briquets per month, but if work be carried on night and day, the figure may be raised to 250,000 tons. The Navy has hitherto had to rely almost entirely on imported coal costing at least 20 yen per ton, but the briquets will cost only 9 yen, so that a very great saving will be effected, to say nothing of the obvious advantage of the country being self-supplying in such a vital matter. It is also claimed that the briquets give better results for steaming purposes and in the matter of non-fouling than even Cardiff coal.

The Baltic Fleet having now been definitely located, it is seen that the danger to ships plying from Japan to Formosa is not as imminent as was originally imagined, and the service will therefore be continued for the moment. The Nippon Yusen Kaisha's Seattle steamer will also sail as originally advertised. It is further stated that three steamers laden with cotton which had been lying in Singapore watching the movements of Rojstevsky, have now left for Japan.

It is stated that the females and children residing on the Pescadores were withdrawn to Formosa on the 10th instant.

The *Official Gazette* of the 18th instant declares the Tsugaru Straits to be within the Zone of Maritime Defences. The lines of defence are:—

On the East, from Ama-zaki on the Main Island to Shiokubi-zaki on the opposite coast of Hokkaido.

On the West, from Tappi-zaki on the Main Island to Shirakami-zaki on the opposite coast of Hokkaido.

The above shows that the Strait is blocked from both the East and the West. The Western entrance is 27½ miles across and the Eastern is 25 miles.

Telegrams to the *Jiji* from London say that the Baltic Fleet is being mobilized and that Russia is about to raise the question of the Dardanelles in a vigorous form. In her hour of desperate need Russia can not be expected to show herself very circumspect towards treaty obligations. But there can be no doubt that England will not quietly suffer the emergence of the Black Sea Squadron. If Russia has any such intention serious complications must ensue. The only thing to be said is that if Great Britain stands firm, no violation of the Treaty of Paris is conceivable.

This being the 25th year since Bishop Nicolai was appointed to the bishopric in Japan a ceremony in celebration of the event was held in the Surugadai Cathedral of the *Seikio-kwai* (Greek Church) in Tokyo on the 12th inst. After the *Te Deum*, at 8 o'clock a.m., Father Chiba, representing members of the church, congratulated the Bishop on the results of his labours. Mr. Iwasawa, D.D., delivered a speech in which he praised the work of Bishop Nicolai, after which 302 telegrams of congratulation were read. The Bishop answered in brief self-depreciatory words. Some 500 members were present on occasion.

A Cabinet Council believed to be of an exceptionally important character was held on the 19th instant and was attended by all the Elder Statesmen. Subsequently Marquis Ito proceeded to the Palace and had an audience which lasted for nearly two hours. It is supposed that the doings of the Baltic Squadron and the active assistance rendered to Rojstevsky by France were the topics of discussion.

We regret to learn that Major Yamaoka has lost the sight of both eyes from a wound received in the Battle of Mukden on the 10th of March. He has returned to Japan and is now in the hospital at Hiroshima. Major Yamaoka was a most promising officer and the greatest sorrow is felt that a career so brilliant as that apparently lying before him should have been thus fatally marred.

Prince Karl and Prince Kanin left Dairen on the 19th instant by the *Aki Maru* and were to arrive at Shimonoseki on the 20th. After a night's rest at Shimonoseki, the two Princes are to come on to Tokyo, where Prince Karl will take up his quarters in the Shiba detached Palace. The Prince will probably pay a visit to Hakone.

On the 19th instant a meeting of thirty journalists was held in the Newspaper Club at Tora-no-mon, Tokyo, when the following resolution was unanimously passed:—"We consider that the French Government, in violation of its declaration of neutrality, is assisting Russia's belligerent acts." It will be observed that the journalists framed their resolution in the briefest and simplest possible terms. It is none the less significant. We should be acting wrongly if we attempted to under-estimate the feeling that exists in Japan with reference to this question. From what we know of the Japanese we are compelled to say that there is great and just excitement, and that France, should she persist in her present course, will earn the permanent enmity of the Japanese nation.

The death of Sir Richard Rennie at the comparatively early age of 65 is sad news to his many friends in the Far East. Yokohama and Shanghai knew him best, for in both settlements he occupied the Bench during several years, in Yokohama as Judge and in Shanghai as Chief Justice. He was a man of eminently high judicial abilities and as a friend it was impossible not to be attracted by his genial disposition and many charms of manner and conversation. He obeyed and improved the best traditions of English justice; he was always foremost in works of charity; he knew no distinction of persons; he dispensed the widest hospitality; and whatever was for the benefit of the community found in him an active supporter.

A London telegram received on April 18th in Tokyo says that the price of Japanese loan bonds is falling. Quotations were: 4 per cent, yen 83½; war, yen 101.10.3; 5 per cent, yen 98; 1st 6 per cent, 100; and 6 per cent, yen 100; and the premium on new bonds, 1½ per cent. The message adds that the prices of Consols and Russian bonds have generally fallen.

A procession organized by newspaper agents in Yokohama took place on Saturday starting at 11 a.m. from the Public Garden. It proceeded by Nippondori to the Kencho where *bansai* were given and the band played three times the national anthem. Afterwards it passed through Japanese town and the foreign settlement. Before dispersing two telegrams were sent, one to Admiral Togo and another to Marshal Oyama, congratulating them on their successes at the front.

## THE SIMPLEST VIEW.

[T] is generally true of even the least usual events that the simplest and most obvious explanation applies to them. Is not that the case with ROJESTVENSKY'S squadron and its eastward coming? When the Baltic Fleet left Russian waters its immediate objective was to relieve Port Arthur. But by the time the sections of the Fleet had combined, Port Arthur was in Japanese hands. Thenceforth one of two courses had to be adopted. Either the Fleet must be recalled or its objective must be changed to Vladivostock. The former would probably have been more injurious to Russian prestige than even a crushing defeat on the water. It would have been a world-wide proclamation of inability to regain command of the sea, and it would have also been a declaration that Vladivostock and the ships lying there were considered hopelessly beyond the reach of naval aid. Therefore the latter alternative was chosen. But the choice entailed considerable delay. Had ROJESTVENSKY come on at once, he would have found Vladivostock frozen, and also the straits of Tsugaru and Soya blocked by ice. The Tsushima passage alone would have been open to him, and it is not necessary to discuss the advantages that would thus have accrued to the Japanese. Accordingly, he received instructions to wait at Madagascar, or in its vicinity, until the voyage could be prosecuted so as to synchronise his arrival in the Far East with the opening of Vladivostock as well as of the passages giving access to it. The second part of April would satisfy these conditions, and so he timed himself to pass the Malacca Straits during the first ten days of this month. He did not wait for the Third Squadron because the ships composing it are, for the most part, of such a type that their conjunction would have weakened his Fleet by impairing its homogeneity.

All that is very simple and very comprehensible. It follows, then, that the Russian Admiral must before everything endeavour to reach Vladivostock. That is his prime purpose, to the attainment of which all else must be subordinated. What considerations will guide his selection of method? In the first place, it is quite essential that he should keep his colliers with him. Vladivostock does not contain the large store of coal which the Russian authorities hoped to accumulate there by the time of ROJESTVENSKY'S arrival. Captures of coal-carrying steamers since the beginning of January have resulted in intercepting some sixty thousand tons of fuel which would otherwise be now lying at the northern port. At first it looks a feasible plan that ROJESTVENSKY should divide his Squadron, taking with himself the five best battle-ships and the three first-class cruisers, and sending the other two battle-ships, the five cruisers, the torpedo-craft, the colliers and the auxiliary cruisers by a more circuitous route to Vladivostock. But such a manoeuvre would be

exceedingly hazardous. For, in the first place, it is precisely in second-class cruisers that the great superiority of the Japanese consists. Supposing them informed of ROJESTVENSKY'S plan, they could detach such a number of second-class and third-class cruisers as would annihilate his collier squadron. And it is fairly assumable that they would be informed, for the movements of the collier squadron would necessarily be slow. In the second place, ROJESTVENSKY would thus expose the cream of his fleet to the combined attack of all the Japanese battle-ships and first-class cruisers. He might take that hazard, though the probabilities are all against it. In the third place,—and this objection is specially imperative—his own ships, the very back-bone of his fleet, would have to depend entirely on their bunker coal not only for the engagement which they could not hope to avoid, but also for the purpose of subsequently continuing their voyage. If Togo forced them greatly out of their northward course, as he would surely aim at doing, disaster would then stare them in the face. On the whole then it must be ROJESTVENSKY'S desire to keep his colliers and transports with him. But that involves the further conclusion that he will strain every nerve to avoid an engagement, for if he be forced to give battle with his colliers transports and auxiliary cruisers in the fighting area, the duty of protecting them will condemn him to defeat. We conclude then that since he must reach Vladivostock—the only port open for his permanent stay—and since he must endeavour to escort thither his colliers, his transports, and his auxiliary cruisers, which carry his supplies of spare ammunition as well as coal, he will endeavour to shirk a fight and to creep up to Vladivostock without firing a shot. Is such a thing possible? Hardly. It is not conceivable that a squadron of forty odd vessels steaming at the leisurely pace of 10 knots an hour through carefully watched seas, should escape observation altogether. But it is conceivable that ROJESTVENSKY may take such a route as will enable him to get out of easy reach before he is discovered. To effect that he would steer at a considerable distance from the east coast of Japan and then head due west for Tsugaru Strait, hoping to reach within 20 miles of the Strait before being sighted, and then to dash across the north of the Sea of Japan before the Japanese fleet, waiting for him at Tsushima, could steam up to intercept him.

If this forecast be correct, ROJESTVENSKY will presently pass out of sight. He will steer through the Straits of Macassar, and heading north-east through a distance of 3,500 miles, will then bear due west for Tsugaru, thus covering some 4,000 miles before entering the Sea of Japan. That would mean his disappearance for some 17 or 18 days. But, on the other hand, if he steamed up the China Sea, he would be more or less under observation all the time. Evidently there is one obvious ob-

jection to the former plan, namely, that if he pass the Straits of Macassar and be not seen or heard of for 10 or 12 days thereafter, there would be no room to doubt that he was bound for the Tsugaru or the Soya passage, and there he would find the Japanese waiting for him. There is another objection, namely, that the Tsugaru and Soya avenues will probably offer obstructions even more dangerous than war-ships. Still ROJESTVENSKY has to accept some risks. His simplest and most straightforward plan would be to give battle and either clear a path for his fleet or perish in the attempt. But that solution is apparently the least likely in view of the embarrassing element of the transports and colliers.

## THE BALTIC FLEET.

[I]t is generally believed that the Squadron entered Kamranh Bay on the 12th instant in the forenoon, and as it was there still on the 14th, provisioning and coaling, the unwelcome conviction is forced upon the mind of the public that France has no intention of observing strict neutrality. On the 11th the Squadron was sighted in 8° 10' north latitude and 108° 30' east longitude. From that point to Kamranh Bay the distance is 240 nautical miles, so that evidently ROJESTVENSKY entered the Bay on the 12th, and it is certain that he was still there on the 14th. Moreover it would appear that stores of coal and provisions had been previously collected for him at Kamranh, which, of course, can not have been done without the knowledge of the French authorities since there is a French military station on the Bay. It is not beyond the range of possibilities that the Squadron lay in the open sea from the 12th to the 14th, and did not enter Kamranh until the latter day. But had it done so, it must have been sighted by one of the many steamers passing northward or southward in these much frequented waters, and as no vessel sighted it, the only rational hypothesis is that Kamranh Bay was entered on the 12th. The French Government does not adhere to the principle adopted by other Powers, the principle that the use of neutral ports not allowable to a belligerent squadron for a longer period than 24 hours. But it does adhere to the spirit of neutral obligations, and in this case there can be no pretence of neutrality if ROJESTVENSKY be permitted to have recourse to French harbours, thus avoiding one of the greatest disadvantages under which he labours in his warlike enterprise against Japan. The distance from Kamranh Bay to Vladivostock by the most direct route is 2,300 miles, and if the Squadron coals at Kamranh, it will not have to fill its bunkers again before reaching its final destination. No one need be told what that means, and the French, who are nothing if not logical, must know well that if they grant such facilities to ROJESTVENSKY, they cease to be neutral and become, in effect, belligerent. Such a result would be infinitely regrettable, but the Japanese are fighting for

their lives, and it is not to be imagined that they will tamely endure such flagrant injustice. The *Jiji Shimpō*, an eminently pacific and sober journal, a journal which represents the views of the best section of the Japanese nation, writes in the strongest possible strain. It admits that so long as this question presented itself only in distant waters like those of Madagascar and Jibouti, some margin existed for toleration. But the case is very different, radically different, when France allows her ports at Japan's very doors to be used as bases of naval operations against Japan. In such circumstances there is no longer any room for hesitation. This empire must obey the supreme law of its own safety. The time for words has passed and that for action has come. France has broken her neutrality and joined Russia. It is now the plain duty of the Japanese Government to notify France that diplomatic relations must cease, and to notify Great Britain that the conditions indicated by the alliance exist since that Japan is confronted by two enemies. Such is the *Jiji Shimpō's* view. It is supported by the *Chuo Shimbun*. The latter writes in less vehement terms but to the same purport, and the *Yomiuri Shimbun* adds its voice to the protest. There is still room to hope, however, that although France, for some inexplicable reason, has chosen to stand alone in refusing to acknowledge the 24-hours' rule, to the justice of which all other civilized Powers have subscribed, she will at least show that this technical difference does not extend to her interpretation of the plain duties of a neutral. To grant the unlimited use of her Cochin-China ports to ROJESTVENSKY at this juncture, is to range herself on Russia's side just as effectually and unequivocally as though her own Squadrons supported the Russian admiral in his attack on the Japanese. No kind of special pleading, no kind of equivocation, can obscure that broad fact. A great Power has certain obligations, and France will be flagrantly neglecting those obligations if she pursue the course now apprehended. But we can not believe that she will pursue it. Much allowance is to be made, and has been freely made, for the sentiment she entertains towards her ally. There is a limit, however, beyond which such sentiment must not be carried. The Paris Cabinet can not possibly imagine that Japan will commit suicide in the interests of France's European politics or for the sake of French sentiment. Everything goes to show that the Japanese nation sincerely desires France's friendship and would make large sacrifices to secure it. France must be sensible of that disposition, and must also be sensible of the extreme unwisdom of permanently alienating Japan's goodwill, as she certainly will alienate it should she persist in her present course. Until, therefore, still more definite evidence of neglected obligations are furnished, all lovers of peace and international friendship must cling to the hope that France will still display the sense of justice which has uniformly marked her conduct of foreign relations in modern times.

## THE STUDY OF ENGLISH IN JAPAN.

WE publish elsewhere a letter from a Japanese correspondent, signing himself "T. T. S." on the subject of "How English should be taught in Japan." This letter is presented to the public exactly as it came from the pen of the writer; we have not altered or amended one solitary word. Our readers will therefore agree with us when we assert that the admirable knowledge of English possessed by "T. T. S." fully qualifies him to say how the language should be studied, since the method pursued in his own case has been so eminently successful. But what a terribly sad picture he draws of the unhappy Japanese student! We know it to be a true picture. Many a time has our heart bled for these poor lads, and many a time has our profound admiration been excited by their splendidly gallant struggles against cruel difficulties. We have always had the fullest confidence in the future of Japan. It should not be necessary for us to say so now; the fact must have been patent to the public throughout the whole twenty-five years of our editorship of this journal. But if we were asked to indicate the bed-rock of that confidence, we should not point to her statesmen, able as they have showed themselves; nor yet to her financiers, adroit and far-seeing as have been their measures; nor yet to her legislators, liberal and luminous as has been their work; nor even to her soldiers, incomparable as is their spirit of devotion. We should point to her students. It was by observing these lads closely that we first acquired a strong perception of the great achievements lying in the lap of Japan's future. Such students it had never been our fortune to witness elsewhere. The Duke of WELLINGTON said that Waterloo was won on the play-grounds of the English public schools. Had he known the Japanese he would have detected clear presages of Port Arthur and of Mukden in the school-rooms where, with unconquerable courage and inexhaustible patience, the lads of Japan struggle on, verily opposing the *fortia pectora* of the poet to adversities such as would crush any spirit not of the finest calibre. We have known lads who willingly undertook menial household drudgery to earn such a pittance as would pay for their school fees. We have known lads who garnered the petty means of supporting themselves throughout years of education by drawing *jinnikisha* during daylight that they might turn to their desks and their night-classes after sun set. We have known lads who ran about the streets in all weathers selling newspaper extras to win the *sen* needed for their frugal fare during scholastic days. And we have known hundreds of lads who toiled at their studies with feverish eagerness inspired, not solely by selfish ambition, but largely by an absorbing desire to raise the rank of their country. From such youths it was impossible not to derive confidence in the

future of the race to which they belonged, and when we find flippant compilers of books or penners of paragraphs inviting the world to laugh at "English as she is Japped," or at some such shallow conceit intended to bring ridicule on the uncouth outcome of all this heroic application, we have thought, "if only these shallow critics knew the truth, how deeply they would regret their own thoughtless inhumanity." It certainly should be Japan's aim to make the most of the fine material she possesses, and not to condemn it to uneconomical processes which waste its potentialities. But as to the method of studying English or any other foreign language, it seems to us that, however minutely the matter be considered, however elaborately discussed, it resolves itself into one thing only, due and timely provision of opportunity. We entirely agree with "T. T. S." that youth is the time, the only really favourable time, to acquire a strange tongue. Up to the age of fourteen or fifteen a child need never be troubled with abstruse studies: he can not profit by them. But it is in these early years that his faculty for acquiring a foreign language is at its best, and it is then that facilities should be provided. But for young and old alike in Japan the facilities are very defective. In ninety-nine cases out of every hundred impecuniosity precludes the learner from access to a foreign teacher, and we all know what is involved in attempting to learn a language from one who is not a native of the country where it is spoken. Japan will have to grow richer before her children can be more happily circumstanced in that respect. We see no other remedy. But from that point of view how essentially selfish must be pronounced the criticisms lately penned in the columns of a local contemporary against missionary instructors in English. Those that condemned the missionary for giving his services at rates which spoil the market for professional teachers, never for an instant took cognisance of the charitable side of the problem; never appeared to attach importance to anything save the selfish interests of the teacher. What is the end that has to be compassed? Is it the provision of good and cheap educational facilities for the children of Japan, or is it the provision of lucrative berths for a few foreign teachers? When we think of the painful and health-breaking struggles that the youth of this country have to make, tens of thousands of young people, because straitened means deny them the advantage of foreign teachers of language, it astounds us that the reduced emoluments of a few dozens of professional instructors should be allowed to weigh in the opposite scale. Every one who is in a position to bring relief should be welcomed, and to abuse the missionary because he engages in this most beneficent work for small material reward, is to strike at the root of all generous effort.

## CROSS-COUNTRY RUN.

The Cross Country Run, held under the auspices of the Y. C. & A. C. on Saturday, the 15th inst., took place under most favourable conditions of wind and weather. A pleasant breeze was blowing, and the sun was not too strong at the hour of starting, 4 p.m. The course was in excellent order, the sun of the morning after the previous day's rain, making the hill-paths of exactly the right hardness for the runners, and the paddys, on the one or two occasions when they had to be negotiated, were soft but not muddy.

The starters were more numerous than last year's event brought forth and much surprise was expressed when it was seen that W. B. Mason, who won the race last year, was not running, as, although the Cup is not a Challenge Cup, there was a good deal of speculation as to whether he could beat E. W. Kilby on a long run. However, we hear that there is to be another run in a month's time, and doubtless he will then don his running attire and try conclusions with the winner of Saturday's race. At the start E. W. Kilby was the favourite, unless any accident occurred to his ankle, in which case H. W. Kilby was thought to have a good chance.

The following lined up before the Starter:—A. Bishop, R. C. Bowden, H. J. Hearne, W. Graham, J. Helm, G. Kenderdine, E. W. Kilby, H. W. Kilby, T. W. Kilby, L. Stornebrink and R. Wallace.

Dr. Moon, R.N., officiated as starter and time-keeper, and at the drop of the handkerchief the runners went off together, E. W. Kilby showing the way, with V. A. Hearne, T. W. Kilby, J. Helm and H. W. Kilby in close attendance. This order was maintained until the turn to the right, when H. W. Kilby displaced Hearne, T. W. Kilby, and Helm, and Hearne dropped behind. J. Helm now began to find the pace too hot for him, and at the turn towards the Race-course to the Japanese cemetery the three leaders were in a bunch, and Helm some forty yards in the rear. A competitor was seen from the Grand Stand wandering far out of his track, although on a nearer course than on the correct path, and on investigation this turned out to be H. J. Hearne, who had missed one of the small paths to the left, and had taken the broad path leading to the Mark just before the Japanese cemetery. On passing the Race-course E. W. Kilby put in the first appearance, followed by H. W. and T. W. of the same ilk, with J. Helm next, and Bowden and Bishop in close order. Most of the runners had a trying time through the new Golf Course, and soon after striking the hill paths again, just before the Wattle Fence Marker (Mr. J. E. Drummond) H. W. Kilby took the lead from his brother, and, so far as we could ascertain, kept it until heading for Snake Lake. T. W. Kilby by this time had dropped a little behind, and it was seen that, barring accidents, the race for the premier position lay between E. W. Kilby and H. W. Kilby, as they had established a comfortable lead by this time. Passing the Fort Marker (Mr. D. Cameron) H. W. Kilby was still making the pace, with E. W. Kilby at his heels, T. W. Kilby three minutes later, Bowden and Bishop 5 minutes, Helm & Stornebrink 9 minutes, Wallace 10 minutes, Kenderdine 11½ minutes, V. Hearne 18 minutes, coming up in the order mentioned. From the Fort to the Paddock Marker (Mr. F. Pollard) the spectators with running spikes were seen to be stepping very gingerly, the road being very hard and the soft edges much sought after. From this point to Home appears to have been "the most unkindest part of all" as the times at the tape are very different to the time taken at the Fort. At the Snake Lake marker (Mr. W. Bagnall) E. W. Kilby had again resumed the lead, and coming down to the Shrine was seen to be ahead. When the Race-course was reached for the last time, E. & H. Kilby were abreast, with H. W. on the inner track, and it was thought by some that he had more left in him and might pull off the event; but about 100 yards from the tape, E. W. Kilby put on a spurt, to which his brother could not respond, and came in the winner by about forty yards, thus winning the handsome gold medal

presented by Mr. G. G. Brady for the first prize. T. W. Kilby next put in an appearance, followed by Bishop and Bowden (and Bowden's dog), and Helm and Stornebrink brought up the rear, with Wallace, Kenderdine and V. A. Hearne somewhat later. W. Graham, and H. J. Hearne did not finish.

The times were: E. W. Kilby 41 min., H. W. Kilby 41 min. 8 secs., T. W. Kilby 49 min. 27 secs., Bishop, 52 min. 5 secs., Bowden 52 min. 11 secs., Helm 61 min. 35 secs., H. Hearne, 63 min. 31 secs., Stornebrink 63 min. 32 secs., R. Wallace, G. Kenderdine, V. A. Hearne. Last year's winner did the course in 42 mins.

On the Sealed Handicap being announced, it was seen that H. W. Kilby had won this event, being 52 seconds inside his handicap of one minute from his brother, none of the other competitors finishing in time for their handicap to be of any benefit to them.

The prizes were presented by Dr. Wheeler, the genial President of the Y. C. & A. C., and three cheers were given for Mr. Brady and his family, hopes being expressed that his eldest son would compete in the race next month.

Dr. Wheeler acted as Judge, and Dr. Moon R.N. as time-keeper, and Messrs F. Pollard, J. E. Drummond, D. Cameron and W. Bagnall undertook the important but not very exciting duties of Markers.

The Race attracted some considerable attention from the Japanese who had been watching the N. R. C. galloping, and we put it forward as a suggestion that the Japanese schools be invited to compete in the next race, which we understand will be open, and not limited to members of the Y. C. & A. C.

## THE COMING YACHTING SEASON.

There is every prospect that the yachting season, just about to commence in Yokohama, will be productive of very good sport. Last season was good, and the two local Yacht Clubs were able to put on record more races sailed than ever before in the history of yachting in Japan. It is quite reasonable to expect that this year will be as good, if not better.

Some of the older yachts will not race this year, but to replace them some promising craft are being built. At Morita's yard a fine 39 rater is being constructed to the order of Capt. Weston, one of Yokohama's seniors in yachting matters. She is a fine able boat of approximately the following dimensions:—Length over all, 57 ft.; length on load-water-line, 36 ft.; beam, extreme, 13 ft. 4 inches; displacement about 13 tons. She is of the type familiarised to the readers of American yachting publications by Crowninshield, the designer of *Independence*, and of many other more successful yachts in American waters. Capt. Weston evidently intends to depose *Mary* from the proud position of Champion, which she has held for such a long time, and the issue between the two yachts will be watched with great interest.

In the same yard they are building a new 21 rater similar to *Pele*, and as the latter is to be given a new suit of sails this season, the races for the Interport Challenge Cup, between the Kobe Sailing Club and the Mosquito Yacht Club can be sailed in sister boats. *Pele*, as originally designed, had a balance rudder, but this was replaced last year by a rudder hung from the deadwood, and the change was found to be beneficial. *Edna* is having the same change made at Cook's yard, and as she is now in the hands of a keen sailing owner, she will doubtless put up good racing with the others in her class.

A new scow is also being built for the 21 rating class, to the top of the measurement, and should make it very interesting for her competitors in comparatively smooth water racing. She is to be fitted with a pair of bilge boards instead of a centre-board. The *Witch*, a scow 19½ rater, built last year, was not altogether a success. She seemed to be deficient in lateral resistance, and did not show up to advantage when there was anything of a sea running. There was a rumour that she would be fitted with bilge boards instead of a centre-board for this season. In spite of

their undoubted merits in American waters, the scow designs do not appear to be able to hold in these waters the 21 raters designed by Mr. Laffin. For all round racing here the *Pele*'s design is pretty useful, and as a boat in which to enjoy a short afternoon's cruising in this part of the Bay, this type has not yet been equalled.

The Cruising Class will lose *Spray*, as she is not to be put in commission, and *Daimyo*, bought by Mr. W. W. Campbell of Kobe. This class, racing on arbitrary handicaps, had very good fun throughout last season, and as *Surprise* is to be put in commission again, there will be free yachts ready to get under way for a race in any weather.

## TRAINING NOTES.

From the number of people gathered on the Lawn at the Race Club on Saturday afternoon it may with confidence be stated that considerable interest is being taken in the training of the Australian mares and China ponies for the Races which take place early next month.

Nearly all the old racehorses are in good condition and these may safely be expected to equal their autumn performances, if given an equally good track. Those that show marked improvement are Phyllis, Ohgon (late Kagon), Rose de France and Texas, whilst those which appear to have disappointed their admirers are Miyoshino and Folly (late Tokyo). Violet, now named Parma Violet, of whom great things are expected, is going fairly well, but she is probably a bad feeder and difficult to train.

There appear to be some nice horses in the last batch of Australian Griffins, although there are also some which are quite useless for racing purposes. But this will always be the case and a subscriber who is lucky enough to draw a good one in three attempts may consider himself fortunate. Hyacinth, Flash, Kurama, Iwate, Daybreak and Daylight now appear to be the best of the batch, but one or two more good horses may be found in the next two weeks.

Dekimas is said to be fast, but as she is seldom ridden not much can be expected from her in the Races, however naturally fast she may be.

Of the old China ponies May Duke, Ashitaka, May King and C.O.D. are fit and well, but neither Hanabusa nor Torpedo show any improvement since the autumn; Raubgraf is going well and may improve before the Races.

The China Griffins are an interesting lot. These are all untried ponies, a new departure for the Club, and although there does not yet appear to be amongst them a really first-class pony this was not to be expected from the moderate price at which they were supplied. These ponies will provide, however, interesting racing and at the moment Gulyash, Pagoda and Petit Canard are fastest, but The Miller, Kobe and one of the white ponies may do better with more training.

QLD SPORT.

## CUSTOMS APPEAL.

According to the *Official Gazette* of April 17th, Baron Sone, Minister for Finance, has given a decision in an appeal lodged by Messrs E. H. Hunter & Co., Kobe, against a judgment of the Kobe Customs. The firm imported a small quantity of antimony ore from China on which the Kobe Customs imposed duty at the rate of *sen* 39.1 per 100 *kin* in accordance with No. 202 of the tariff. The importers contended that the duty should be *ad valorem* 5 per cent. under No. 270 of the same tariff. The appeal was not sustained.

The Minister also delivered a decision rejecting an appeal instituted by the same firm in Kobe. The complaint was that the firm imported 5 tons of phosphate to be used for manure on which the Kobe Customs imposed duty at the rate of *sen* 6.4 per 100 *kin*, but the firm held that the article should be exempted from duty under No. 514 of the import tariff. The appeal was dismissed on the ground that the phosphate could be used for other purposes than manure.

## BREAKING-UP.

Mrs. E. C. Irwine's school broke-up for the Easter holidays on Wednesday, when occasion was taken to review the year's work, award prizes and give an entertainment for the delectation of parents and friends of the pupils. The whole affair passed off very successfully and the heartiest congratulations are due to Mrs. Irwine, Miss Burdett Leach, and the pupils for the delightful afternoon's amusement provided.

Mrs. Irwine opened the proceedings with a short speech in which she welcomed the visitors, referred to the work of the past year and the earnestness and keen sense of rivalry displayed by the pupils. In regard to the entertainment which was to follow, Mrs. Irwine said that at the last moment two young ladies had been stricken with illness, but their places had been taken by Miss Alice Walter and Miss Jeanne Sibiodon. The Prize List was then read, as follows:—

## PRIZES FOR ENGLISH.

- Class I. Donors.
- 1 Term and Examination prize, C. Brockhurst... (Mr. Talbot).
  - 2<sup>nd</sup> Term Prize and Certificate, A. Walter... (Mr. H. Irwine).
  - 3 Examination Prize Certificate, term, A. Talbot... (Miss Leach).
- Class II.
- 1 Term prize and certificate, R. Harris... (Mrs. Walter).
  - 2<sup>nd</sup> Term prize, M. Box... (Miss Leach).
  - 1 Examination Prize certificate, term, G. Colton... (Mr. H. Irwine).
  - Certificate, term, H. Harris... (Mrs. Irwine).
  - Certificate, term, M. Sibiodon... (Mrs. Irwine).
  - Prize for general improvement, J. Sibiodon... (Miss Leach).
- Class III.
- 1 Term, H. Cowan... (Mr. Talbot).
  - General Improvement, M. Abel... (Mr. H. Irwine).
  - General Improvement, H. Lefeber... (Mrs. Irwine).
  - Good Conduct, D. Blake... (Mrs. Irwine).

## PRIZES FOR FRENCH.

- Class I.
- 1 Term; 1st Examination prize, C. Brockhurst... (Mrs. Irwine).
  - 2 Term; 2nd Examination prize, I. Irwine... (Mde. Frique).
- Certificate for Term, A. Walter.  
Certificate for Exam., A. Talbot.
- Class II. (Division 1).
- 1 Term; 1st Exam. prize, R. Harris... (Mrs. Irwine).
  - 2 Term; certificate, G. Colton... ( " ).
  - Cert. for term and exam., M. Box... ( " ).
  - Cert. for term, J. Sibiodon... ( " ).
  - Cert. for General Improvement, M. Sibiodon... ( " ).
- Class II. (Division 2).
- 1 Term and 1st Exam. prize, Harvey Colton... (Mrs. Irwine).
  - 2 Term and cert. exam., Helen Harris... ( " ).
  - Certificate for term, M. Cowan... ( " ).
  - Prize for general impr., Hope Payne... ( " ).
  - Certificate for general impr., J. Hartland... ( " ).
- Class III.
- 1 Term Prize, R. Bickart... (Mrs. Irwine).

The following programme was then gone through, the little performers acquitting themselves admirably:—

## RECITATIONS.

- "Madame Sans Souci" ..... H. Lefeber.  
 "L'Enfant et le chat" ..... H. Cowan.  
 "Rataplan" ..... R. Bickart and H. Cowan.  
 "La Grenouille" ..... M. Abel.  
 "A Little Gentleman" ..... R. Bickart and H. Cowan.  
 Song—"Play-Time."  
 "Les deux Voyageurs" ..... G. and H. Colton.  
 "The Swing" ..... J. Sibiodon.  
 "Le Pencons et la Pie" ..... H. Payne.  
 "The Land of Nod" ..... J. Hartland.  
 "Le Soldat" ..... R. Harris.  
 "The City Child" ..... M. Cowan.  
 Song—"The Swing."  
 "The boy and the star" ..... G. and H. Colton.  
 "The Kaiser's Questions" ..... Helen Harris.  
 "Pour les Pauvres" ..... A. Walter, A. Talbot, Iris Irwine.  
 Song—"Le Carillon."  
 "Ou est Minette" ..... M. Abel and H. Cowan.  
 "Quelle heure est-il?" ..... J. Hartland and H. Harris.  
 "Qui a pris mon cerceau" ..... H. Payne and H. Colton.  
 "Bonnes Nouvelles" ..... Class II.

## SCENES FROM SHAKESPEARE.

- "As You Like It," Act III. Scene II.  
 Rosalind ..... Iris Irwine.  
 Orlando ..... A. Walter.

## ACT. IV, SCENE I.

- Rosalind ..... A. Walter.  
 Orlando ..... A. Talbot.  
 Celia ..... I. Irwine.  
 "LA VISITE."  
 Grand Maman ..... R. Harris.  
 Bébé ..... G. Colton.  
 Mde. de Grand Maison ..... G. Sibiodon.  
 Mde. de Bébé ..... M. Sibiodon.  
 Rosalie ..... H. Payne.  
 "Monologue au Téléphone" ..... Alice Walter.  
 "Chez le Photographe"  
 Le Photographe ..... A. Walter.  
 Bébé ..... I. Irwine.  
 Grand Maman ..... A. Talbot.  
 The National Anthems, "La Marseillaise," "My country 'tis of Thee," and "God Save the King" brought the proceedings to a close.

## THE LAW COURTS.

## CLAIM FOR DAMAGE.

In the Osaka Appeal Court, an appeal of the Nippon Yusen Kaisha against a judgment given in the Kobe District Court, came up on April 12th. The case was that three hundred bales of cotton brought by a steamer of the Nippon Yusen Kaisha from America consigned to the Naigwai Cotton Company, were found stained at the time of taking delivery. For the damage the consignees lodged a claim of yen 2,500 against the shipping firm in the District Court where judgment was given in favour of the claimant. In the present Court, the appeal was heard after which the parties produced their evidence. The next hearing will take place on April 18th.

## THE "NIPPON" PUNISHED.

Mr. Y. Otani, nominal editor and publisher of the *Nippon*, has been sentenced in the Tokyo District Court to a fine of two hundred yen in accordance with the Naval Secrets Preservation Regulations and Arts. 22 and 31 of the Press Regulations. The gist of the charge was that the paper published a report with reference to the movements of the squadron under Admiral Dewa.

## AN INTERESTING CASE.

Mr. A. Pavlov, formerly Russian Minister at Seoul, has lodged a case in the British Supreme Court, Shanghai, against Baron Ward claiming taels 100,000. The complaint, according to a Shanghai correspondent of the *Yiji*, is that defendant was working with Mr. Bennet Burleigh, a correspondent of the *Daily Telegraph*, on board the steamer *Thomson* during the time of the naval engagements off Port Arthur. This ship was recently sold to the Shanghai Tow-Boat company through Baron Ward for taels 80,000. Plaintiff contends that the vessel is his property and that the sum received by defendant through the purchase as well as taels 20,000 which is damage sustained by plaintiff in having lost the ship, should be paid to him.

On April 13th, the Sasebo Prize Court gave a decision regarding the British steamer *Oakley* (3,798 tons gross) confiscating the hull and all her cargo. This ship was captured on Jan. 18th in Tsushima Straits on her way to Vladivostok with 5,900 tons of Cardiff coal. She was the 30th captured ship.

The Sasebo Prize Court delivered a decision on April 18th regarding the British steamer *Negretia* (2368 tons gross) confiscating both hull and cargo. This ship was captured on Dec. 19th, 1904, in Tsushima Strait on her way to Vladivostok with contraband goods, and on board were found the Commander and another officer of the Russian destroyer *Ryesitelini*, which was captured on August 12th by the Japanese at Chefoo, where she had proceeded after her escape from Port Arthur. At the same time the Prize Court dismissed a petition lodged by the Mitsu Bishi Company asking for confirmation of their preferential claim for expenses incurred over repairs to the *Negretia* before she was captured.

## CLAIM AS TO DISTRAIN.

The hearing of an action lodged by Cheong Fenshi, a Chinese merchant and one other, who petitioned for the cancelling of the seizure of a house by Mr. Helm, was resumed on April 20th

in the Yokohama District Court before Judge Yasuda.

The Court asked a few questions of the parties as to the lease of the house in dispute, after which plaintiffs' counsel asked the Court for leave to examine Mr. P. S. Bent, No. 246, Yamashita-cho, as a witness. The Court granted the request, and adjourned the case.

## CLAIM FOR RENT.

In the Yokohama District Court, a case in which Mr. Paul Helm claims yen 348 from Song Hwan-Chee, a Chinese trader, No. 119, Yamashita-cho, came up again on April 20th before Judge Yasuda, when a Chinaman named Cheong Kukin was examined as a witness.

This witness being concerned in another case instituted by the same plaintiff, the Court did not order him to take the usual oath. Cheong Kukin stated that two brick buildings now in occupation by defendant were the former's property, but the occupants were his tenants.

The Court—Did the houses originally belong to Mr. P. Helm? And did you not sub-let them to defendant? Witness—The land belongs to Mr. Helm, but the buildings are mine because I built them. I leased them to defendant on a lease of twenty years.

The Court—Well, Mr. Helm instituted a case on Aug. 31st, 1904, in this Court against you asking the Court to confirm the possessive right in the buildings in the present dispute, in which action judgment was given in favour of Mr. Helm. How do you insist that the property is yours? Witness—Judgment was rendered for Mr. Helm, but I appealed against the decision in the higher Court where the examination is now going on.

Witness further stated that defendant rented the buildings on March 18th, 1904, from him for a rent of yen 80 per month and the lessee paid yen 500 in advance, which was rent covering six months and seven days. The houses, however, were not owned by witness only, but by two other Chinamen as joint owners. One of these Chinamen left for home and another is dead. In January, 1898, the joint owners built the houses for about twenty thousand yen. Witness invested a larger amount than the other two, and in consequence he received the rent from the lessee. The rent was then divided among the partners according to the sums which they invested. Defendant paid to Mr. Helm the rent after the months covered by the advance of yen 500.

Plaintiff's Counsel asked witness whether there were houses on the ground before he built the two brick residences. Witness replied that there were some but he removed them in accordance with the terms of the lease between himself and Mr. Helm. Counsel further asked what the contract was.

At this stage, defendant's Counsel contended that the question was not relevant to the present case but was an important point in the appeal case between Mr. Helm and witness.

Witness further stated that he did not return the ground to Mr. Helm; he was keeping it and of course also the buildings as they were his own property.

The Court will give judgment on April 22nd.

A provisional attachment on the property of Mr. F. J. Bardens was executed on Monday evening on the application of Messrs. Samuel Samuel & Co. in relation to an alleged liability of yen 30,000 says the *Kobe Herald*. The same firm have laid a complaint in the Kobe Chihō Saibansho in regard to a sum of yen 8,000 belonging to the Company, which it is alleged that Mr. Bardens applied to his own purposes in May, 1902. It is understood that certain other matters are now under investigation. Mr. Bardens was summoned to appear at the Public Procurator's office at the Kobe Chihō Saibansho on Tuesday and was examined by Public Procurator Mitsuhamu, who also heard statements from Mr. J. H. Fawcner, of the Rising Sun Petroleum Co., and Mr. R. M. Stirling, of Messrs. Samuel Samuel's Yokohama office. It is stated that Mr. Ikegami, the Chief Procurator of the Kobe Chihō Saibansho, went to Osaka on Wednesday to consult the Chief Procurator of the Appeal Court there with regard to the measures to be adopted in the matter.

## YOKOHAMA LITERARY SOCIETY.

The Yokohama Literary Society brought its 20th session to a close last night with a well-attended meeting in Van Schaick Hall. The committee are to be congratulated on having sustained the interest of members all through the season by arranging most diversified programmes, introducing many new performers, instrumentalists, singers and reciters, to the public and by securing lectures or addresses at every meeting. The address given at the closing meeting by Mr. James Walter was worthy of its predecessors. Taking as his subject, Will Adams, the first Englishman in Japan, Mr. Walter described the old pilot's voyage to Japan, with all its adventures and vicissitudes, then followed with some details of his residence in Japan abstracted from Adams' letters, old diaries in the archives of the H. E. I. C., and elsewhere, his death and burial. Mr. Walter discovered, in 1873, the memorial erected to Adams' memory at Hemmi by residents of Tokyo, and besides has visited Gillingham, the old mariner's birthplace in Kent; Hirado, and other places in Japan associated with Adams, so that he was able to give many personal touches to his narrative.

A hearty vote of thanks having been accorded the lecturer, the musical programme was proceeded with. The first part of the evening, we should mention, was devoted to a short illustrated lecture on the Western Mediterranean, Mr. W. K. E. Vincent, the Vice-President, describing the pictures as they were thrown on the screen. Programme:—

- "The Western Mediterranean." (Illustrated.)  
The Vice President.
- "The First Englishman in Japan: Will Adams."  
Mr. James Walter.
- Song ..... "Time's Lullaby".....Herman Heydrich.  
(With piano and organ accompaniment)  
Mrs. James Walter.
- Piano Solo ..... "Anna Bolena".....Sydney Smith.  
Mrs. R. J. Ward.
- Song ..... "Les Rameaux".....Faure.  
(With piano and organ accompaniment)  
Mrs. E. C. Irvine.
- Violin Solo ..... "Narcissus" .....Nevin.  
Mr. C. H. Thom.

## A DISTINGUISHED PARTY.

The Bureau of Insular Affairs of the War Department of the U.S. gave out on March 25th the following information relative to the trip of the Secretary of War and party to the Philippines:—Following is the personnel of the official party: Secretary Taft, Elihu Root, ex-Secretary of War; Senators Allison of Iowa, Daniel of Virginia, Dubois of Idaho, Foster of Louisiana, Long of Kansas, Newlands of Nevada, Patterson of Colorado, Scott of West Virginia, Stone of Missouri, Warren of Wyoming, Speaker Cannon, Representatives Bourke Cockran of New York, Cooper of Wisconsin, Crumpacker of Indiana, Curtis of Kansas, DeArmond of Missouri, Foss of Illinois, Gillett of Massachusetts, Grosvenor of Ohio, Hepburn of Iowa, Hill of Connecticut, Howard of Georgia, Jones of Virginia, Longworth McKinley of Illinois, Payne of New York, Scott of Kansas, Sherley of Kentucky, Smith of Illinois, Watson of Indiana, Colonel Edwards, chief of the Bureau of Insular Affairs, and F. W. Carpenter, private secretary to the Secretary of War. Following are the members of the families and others who are to accompany the party at their own expense: Miss Roosevelt, Miss Boardman and Miss MacMillan of Washington; Mrs. Dubois, Mrs. Stone, Mrs. DeArmond, Mrs. Clark, Mrs. Hepburn, Mrs. Hill, Mrs. Payne, Mrs. Smith, Mrs. Jones, a son of ex-Secretary Root, William Reyburn, Major W. Austin Wadsworth, Mrs. Wadsworth and R. K. Wetmore. They will take passage on the Pacific Mail steamer *Manchuria* on the morning of July 1. The steamer will touch at Honolulu, Yokohama, Kobe and Nagasaki, and then go straight to Manila, where the party will remain ten days. In addition to the other questions, the determination of railway problems made possible by the Cooper law, which was passed at the last session of Congress, will be accomplished. Secretary Taft, ex-Secretary Root and Colonel Edwards have had much

to do with this question and it is expected that the details will be worked out and a definite proposition submitted for the approval of the Secretary of War by the time the party returns. The party will then take a Government transport and spend twenty days visiting the points of interest, especially the commercial ports in the southern islands, and, returning on the Pacific Mail steamer *Korea*, which will touch at Manila and take the party home, stopping at Hongkong and probably at the same Japanese ports in reverse order and sail from Honolulu, arriving at San Francisco about October 1. It is said that the members of the party will pay their expenses to and from San Francisco except the railroad fare. The expenses of the trip will be borne by the Philippine Government, as the party visits the islands as the guests of that Government.

## ST. ANDREW'S CHURCH SHIBA.

The Rev. Armine F. King has issued a statement of accounts for 1904 of St. Andrew's Church, Shiba, from which we extract the following:—

The total amount of the offerings for 1904 falls short by yen 75.22 of what was collected in the previous year, though it exceeds the amount collected in 1902 by yen 252.30.

The Rev. A. E. Webb has acted as Treasurer, and the statement of accounts, which he has drawn up, has been audited by F. P. Purvis, Esq., and E. L. James, Esq. The third member of our Church Committee, Lt.-Col. C. V. Hume, is still away at the seat of war.

It will be seen from the statement now presented that a total sum of yen 481.65 has had to be taken from the offerings made in time of Divine Service to meet ordinary Church expenses. It has been suggested that for the future we should try to meet part, at least, of these expenses by voluntary annual subscriptions from members of the congregation; and the proposal has the hearty support of Sir Claude McDonald. It will, of course, be recognized that, if we can meet our ordinary expenses in this way, we shall be able to use the offerings given in the time of Divine Service much more exclusively than hitherto for various good objects that need our help.

The congregation have made grants for Missionary and charitable objects aggregating yen 659 45; and close the year with a balance in hand of yen 18.43.

## NEWS OF THE WEEK.

Prince and Princess Arisugawa left Penang on April 19th and are expected to arrive on the 22nd at Colombo.

An official telegram from Iwate prefecture says that early on the morning of April 15th, about two hundred houses in Iwayadomachi were destroyed by fire.

That the memory of Lord Beaconsfield was not forgotten in Yokohama was borne witness to on Wednesday by the wearing of primroses by several British residents.

The Rev. C. H. Irwin has become assistant secretary of the Religious Tract Society, whilst retaining the editorship of the *Sunday at Home*. Mr. Irwin's secretarial duties will mainly be occupied with the Continental work of the Society.

S. Sagita (43) who was sentenced to death in September last on a charge of having murdered a rice merchant named B. Kawai, on the mountain of Kwasan, Yamanashi prefecture, and robbed him of yen 29, was executed on April 18th in Ichigaya Jail, Tokyo.

Many foreign residents assembled at the Pier on Saturday to "send-off" Mr. and Mrs. J. P. Mollison, who are going home for a long holiday, and Mrs. Williamson Jones who with her two children is also proceeding to England. Many baskets of flowers were sent by friends.

We understand that Mr. Victor Heller, of Messrs. Heller Bros., who recently returned from Europe, has received the 5th Class Order of the Sacred Treasure from the Emperor of Japan. Mr. Heller's friends will unite with us in congratulating him on the honour shown him.

## CORRESPONDENCE.

## FOR LOVE OR MONEY.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—Apropos of the translation of "For love or money," I would suggest a well known phrase, *Kane zuku de mo giri zuku de mo*, as being fairly accurate and of much more force than *ika ni shite mo*. Enclosing my card,

Yours sincerely,

Aoyama, Tokyo, April 12th, 1905.

## A TRIBUTE TO THE LATE DR. TAGUCHI.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—The John Bright of Japan is dead. Dr. U. Taguchi was one of the very few men who unite to originality of thought practical business ability. His death causes Japan to feel as if she had learned of the loss of one of her battleships. In these days when there are too many empty-headed politicians and too many unproductive scholars in this country, the gap caused by his removal will not easily be filled. Courteous, witty, communicative, yet sticking to his convictions with bull-dog tenacity, he was a man after the pattern of the typical English gentleman. With the blood of great Chinese scholars of modern Japan (his father and grandfather) running in his veins, he early betook himself to the study of the English language and of Political Economy. To his credit it must be remarked that it was he who first in this country made the study of Political Economy his speciality. In his opinions he was a staunch advocate of free trade and never swerved from his principles to the last. His career as a member of the House of Commons was like that of John Bright. A blue democrat, yet entirely free from partisan bias, he thundered forth his denunciations both in and out of Parliament whenever he thought either the Government or the people were acting in a way detrimental to the good of the nation. His political career alone would have ensured him an everlasting name in the history of New Japan. But his talents were many-sided to a wonderful extent. Besides being the proprietor and editor of the well-known *Economist*, he distinguished himself as an original writer on Japanese and Chinese literature as well as a publisher of voluminous encyclopedias. His well-known history of Japanese civilization, which he wrote when a lad of about twenty, throws a new light on the life and manners of the earlier Japanese people. The same may be said of his short history of Chinese civilization. The independence which characterizes his political views is to be observed in his opinions on other subjects, though this sometimes caused him a good deal of trouble. More than ten years ago, Mr. K. Kume, a professor in the Imperial University, wrote a little book on the origin of Sun-Worship in Shintoism. This book unfortunately provoked the indignation of the authorities, and the result was the author's loss of his chair in the University and the suppression of the work. The publisher was none other than Dr. Taguchi. Dr. Taguchi was a humourist. Now humour is a quality of which his countrymen cannot boast, but he had more than the common share of it. We were amused to read of the witty dialogue held with the Korean Emperor last summer, when he, as one of the passengers on board the *Manchu Maru*, was admitted in audience by the latter. The story, I think, bears repetition here in the form of a quotation from the letter from "H" on board the ship to the Editor of the *Japan Mail*. "The members of Parliament," says the letter, "were similarly asked about their experiences, and Dr. Taguchi humorously informed His Imperial Majesty of the guessing sweepstake that had been held on board the ship as to the probable date of the fall of Port Arthur and of his own ill-fortune in having selected June 25th, the very day on which they were being admitted to his Majesty's presence. The Emperor remarked that Dr. Taguchi should not despair: it was little more than four o'clock yet." The dialogue between Caesar on his way to the Capitol and the soothsayer who reminded him that the Ides of March had not gone, cannot be more interesting than this friendly chat. Dr. Taguchi is no more among us. The news of his comparatively premature death filled the minds of his countrymen with sorrow of a personal character. Japan can ill spare such a man at a time when she is labouring in such a troubled sea of national emergency. As the late Dr. Kei Nakamura once said of him, he was truly a great man in every sense of the words.

Yours, etc.

YAICHIRO ISOBE.

Tokyo, April 15th, 1905.

## HIGH PRICES OF MEAT.

(TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—The Yokohama Butchers, have issued a price list, dated 10th inst., which indicates another

material advance all round in the already greatly inflated prices, choice joints reaching as high as 72 sen per pound.

This advance, like half a dozen others which have occurred at intervals of a month or two regularly for the past year, seems to be wholly without justification, which is attested by information of a trustworthy character from Kobe and vicinity from whence the supply of beef cattle for this market comes, that there has not been over 8 per cent. advance in cattle in that district for the past six years; that the supply of cattle is equal to the demand, and that the pretext of the Butcher's Guild for high prices, scarcity and enhancement in the price of cattle, is a sham. This has recently been fully exposed in Kobe where the Guild undertook to play the same game of advancing prices upon the same pretext. This expose showed up the Guild properly, resulting in the establishment of living prices for their meat which to-day is quoted at from 50 to 75 per cent. below Yokohama prices. With these facts before us it would seem that some steps should be taken. Surely there are public-spirited men in our community who could call a public meeting after the manner of the Kobe residents and inaugurate a co-operative Society such as they have done?

Yours, etc.

HOUSEWIFE.

Yokohama, April 14th, 1905.

#### TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Referring to "Householder's" letter in your issue of yesterday, and the comments on the meat question made by you this morning, it would appear that something should be done by the residents of Yokohama to stop the squeezing by the Butchers' Guild. Most of those with whom I have spoken on the subject have expressed the opinion that it would be more difficult to organize a successful Meat Club here than in Kobe on account of the lack of public spirit among foreigners in Yokohama. It seems to me, however, that if some one of influence in the community would call a meeting on this subject we would not be found behind our Kobe neighbours in evidence of public spiritedness.

I understand that ships in the harbor are still supplied with meat at about the same prices as before the war commenced, as they, of course, could secure provisions elsewhere if this were not the case. Now, it would seem that if there is such a scarcity of meat as is argued in support of the recent rises in price, the butchers would be glad to have the steamers get their meat elsewhere so as to leave more for domestic consumption.

Furthermore, there is a rumor, apparently well substantiated, that the price of meat is to be raised a further 5 sen per pound next month.

Under these conditions it would certainly seem that something could, and should be, done to show the Butchers' Guild that there is a limit to the patience of the *Seiyūjin*, for the matter is one that concerns everyone—except the vegetarians.

If there is some action taken I will volunteer my services for such of the actual work as I may be able to do (you may divulge my name if called upon in this connexion), and feel sure of other young men with public spirit enough to do the same.

Enclosing my card, and apologizing for my encroachment on your space, I am

Yours faithfully,

BACHELOR.

Yokohama, April 18th, 1905.

#### (TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—Referring to the meat problem, permit me in a few words to say that the unacceptable rise in prices imposed on Yokohama residents by the local Guild is most unfair. Moreover a reasonable explanation cannot be furnished for such a rise. I know, for instance, that sheep cost per head *yen* 12, the expense of slaughtering, etc., amounts to 3 *yen*, —, whilst the amount obtained by the retail dealers is not less than 50 *yen*!! Yokohama foreign residents ought to combine and appoint a committee to study the matter and take the necessary steps to put an end to the butchers' exactions. I beg to suggest that a list of residents willing to serve on such a committee should be opened. I would very gladly give my name if seconded. Enclosing my card,

I remain, dear Sir, yours faithfully

L. S.

Yokohama, April 18th, 1905.

#### TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In order to ascertain how far the rise in the price of meat affected both foreign and Japanese residents I visited some of the leading butchers' shops in Yamashita-cho, yesterday and, in company with a Japanese who spoke English pretty fluently, called upon a number of the smaller vendors in Japanese town, with the following result.

The enhanced prices are distinctly prohibitive as against foreigners, and while it has always been a rule to charge a higher price for meat in the Settle-

ment than in the neighbouring outskirts no perceptible difference is made to-day in the rates for third quality beef and pork and the various odds and ends which are put into the scale as stewing meat for Japanese consumption, for the reason, as one of the butchers observed, "the foreigners can well afford to pay more than our people who are poor and heavily taxed." It required considerable tact in ascertaining information leading up to this deduction as, at the outset, it was evident that the butchers' combination were determined to adhere to their preferential tariff despite all protests from their foreign customers. The first one visited declared that it was "Rusky fight" which brought about a scarcity of meat, and that although there was enough for the foreign supply of Yokohama, the great demand of the War Department had to be met, and the additional prime cost per head of cattle had to be made up somehow, falling finally upon the consumer. A second said that the enhanced price was altogether insufficient, and should be further increased. "Meat," he declared, "at even forty cents a pound was cheaper than foreigners could buy it in their own countries. They came to reside in Japan to make good livings, and amass enough to live in retirement, and very few thereafter live in the country to spend the money they have earned." "Good Kobe beef at 36 cents a pound, is very cheap," said a third, "and if this war continues we will charge more, for there is an additional freightage to pay, and beef is now becoming scarce." "Foreigners don't patronise our small stores where all the miscellaneous articles for household use are imported. If they want anything that is not eatable they go to their own shops in the Settlement. They don't study us, why should we study them."

These, and many others, were the answers to the questions put to the dealers as to the cause of the increased rates of provisions. In one shop bacon which a week ago was sold at twenty-five cents was priced at twenty-eight, and Japanese ham at thirty-five cents. In the Japanese suburbs pork was purchased for twelve cents a pound, in Chinese town at fifteen cents to the Japanese buyer, while there was a rise in the price asked for the same quality of three cents in the one and five cents in the other to the foreign buyer. In both cases the reason given was that "foreigners have plenty of money."

Stewed beef in Japanese town was given for fifteen cents a pound to the Japanese buyer; the foreign purchaser was asked twenty-five. In Chitose Sancho, where within a radius of half a mile there are only two butchers' shops, the foreigner was asked twenty-five per cent. more for beef than that quoted to the Japanese to be the price for residents round about. One of the retail dealers in this neighbourhood who had an altogether fairly good supply readily agreed to sell to the Japanese buyer at twenty-five cents a pound any quantity of beef steak, but, five minutes later, refused to sell it at all to the foreigner. He subsequently explained as his reason that "his master" had so instructed him.

One of the butchers who is said to have a fairly good run of foreign trade denied that there was any discrimination between foreigners and Japanese, and said that not only had the original cost of the live stock been increased but that they had to pay additional slaughtering charges coupled with the prospect of an immediate scarcity of cattle in the market. Informed as to the probable importation of Australian meat with cold storage at the different seaports he opined that commercially it would be a failure for the Japanese would never assist in its consumption, and there were insufficient foreigners to create a paying demand. He said it was a matter immaterial to the butchers themselves, who were at the very best only barely making a living when it was considered that they too had to take the "lean with the fat." Fish was cheap, and if the foreigner did not like to pay for the beef they could live on fish and eggs. And, smiling as he proceeded to cut up the half side of a bullock, the chubby little butcher added, "This is battle time, we must all feel the point of the sword." It was, however, only at one of the shops in the Settlement where any definite statement could be obtained as to the future to be adopted by the Guild, and that was in a bald manner by the words, "We are not going to impose any additional charge upon our meat unless absolutely compelled by the present military demands being increased. Of course we shall then have to protect ourselves."

Yours sincerely,  
April, 19th, 1905.

VIATOR.

#### HOW ENGLISH SHOULD BE TAUGHT IN THIS COUNTRY.

##### (TO THE EDITOR OF THE "JAPAN MAIL.")

SIR,—I have read in some papers lately several views as to the best method of teaching English in this country. The problem, apparently so simple and easy, forms in reality one of those weighty questions on whose issue may hang our national prosperity.

And if the Golden Scales that measure our fate turn upon this pivot, language study, let them turn, by all means, in our favor. But first you may ask, has language study, in reality, much to do with our welfare? Most decidedly it has, as those new students annually admitted by hundreds and thousands into the seven Koto-Gakko amply testify. When they first come, their English is already spoiled, and German is crammed down their throats, so to speak in the most hurried—I was going to say, cruel-manner. And they, poor fellows, struggle on hard—forsooth a life and death struggle! Nervous prostration, pulmonary diseases of all sorts, short sight, long sight, dyspepsia, apoplexy, and premature death even are partly due to this dudgey of words and sounds. But what is worse, if anything could be worse, the boy's intellectual powers get materially injured in two ways—over study, and lack of study. I have often heard students confess that they are wrestling with dictionaries, English as well as German, chiefly the latter, when they are free from mathematics. As for the rest of the lessons, they bestow upon them only those two or three holidays before each examination! Thus they study languages at the expense of other lessons which are not only important in themselves but also essential in helping the intellectual as well as the moral development of the young mind. But what is the result of all this fuss and ado over languages? Why most of those poor over-worked lads who have acquired almost nothing except languages in their three long years of schooling, on entering the university can hardly understand a single lecture delivered in a foreign tongue nor can they read with ease a single book of reference. In the face of these facts can we reasonably hope to compete, intellectually at least with other nations? I have often heard it said that a good many of the university graduates are of little value, and now I am not at all surprised. Their intellectual growth has been nipped and stunted at the very time when free nurture should be given, with the best results. In the isolated Japan of yore, such drawbacks might be tolerated with impunity but now we can not. The whole system of our language-teaching must undergo a thorough reform, else it may end in our moral and intellectual bankruptcy. Seen in this light, the true light too I dare say, does not the simple question of "a, b, c," turn out after all, to be something momentous?

It is indeed high time, as you see, that something should be done to remedy these evils. To begin with, I would have children taught English while young and taught thoroughly. One year of English training at ten may count for three years or more at twenty; and for a beginner correct grammar and pronunciation are as easy (or as difficult) as false syntax and bad prosody. Moreover what is well learned in childhood, whether good or bad, will hardly ever be forgotten through life. Twenty-eight years ago—pardon egotism.—I (a mere boy in the employ of the Mitsui Bank as interpreter) could speak and write English as well as I do now. I had already mastered the language without much difficulty. But alas! I was taught carelessly, or at least, I studied carelessly. Ever since my struggle, I tell you, has been not so much to learn more, as to forget all: in which effort I have not, as you see, very well succeeded. A good deal of time and energy might be saved by engaging careful efficient teachers in some Koto-Shogakko where the need of good English teaching is great. Would that we could secure for this work well qualified English ladies or gentlemen! But now-a-days we can ill afford the expense. Still the defect might be remedied by setting up a few schools, something like the normal schools where English alone is taught. Or perhaps it might be better for the time being to start special English branches in some of the normal schools. But into such institutions only those boys who have some talent for languages should be admitted, and that on conditions similar to those imposed on the other students, i.e. to say that they must serve in the Koto-shogakko for a certain number of years, etc. As to the curriculum no high flown scheme is needed. Say two series of good readers up to the 4th, a few works on English conversation and letter writing, with the addition of one good grammar. It is however quite essential that a deal of memorizing be done. Dictation as well as composition must be given pretty often. In short, what is taught, must be taught clearly and with thoroughness so far as it goes. I dare say these students of English need not drink deep of the Pterian spring or any other spring of letters. On the contrary, their knowledge should, like a rivulet, flow shallow but clear. One thing more might be done to encourage them in their work. There might be a higher course for them to take, when they had completed their contracts. This course should be of such a nature as would enable them to obtain the diplomas qualifying them as teachers in the middle schools or other schools of a similar standing. This course should, moreover, cover enough ground to enable those who have completed it to go into business as a clerk or an

interpreter. It may be advisable also to have a few itinerant teachers (foreigners, of course) who take charge of so many Koto-Shogakko and visit them, one by one, encouraging and guiding the Japanese teachers there; the graduates of the above mentioned institutions. And if such institutions were provided, and due precautions taken, for the study of the English language, then, and not till then, would tolerably good English be spoken and written throughout our land with much less injury to our interests. Then, and not till then, could the nation hope to compete successfully with the rest of the civilized world, and would the golden balance of the impartial love turn for the first time in our favor.

It is, as you know, the pride of some Englishmen, especially of those in business, that they speak but one language. They may well afford to be proud of that, for their dominion spreads over the whole world, and their tongue is the tongue of the world. Who doubts but that the immense wealth and power of the English-speaking nations, that is to say the United Kingdom and the States, is due partly to this pride and the benefits accruing from it? But with us it is different. Every Japanese who would be understood abroad must know English *volens volens*. He would probably be required to learn Chinese and German also, if not Korean, French, and Russian to boot. Since such is our fate at present, the greatest economy of time must be practised by lessening the toil of drudgery. It is true that the Russo-Japanese war may temporarily raise this country to a first rank power, but if the present system of language study be still carried on, her intellectual, and consequently her moral and pecuniary resources must in the long run become exhausted. Thus Japan may fall again—and great will be her fall!

Yours, etc.

T. T. S.

#### A VOLUNTEER FLEET.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR.—The formation of a fleet of Volunteer Cruisers has been greatly supported by every class of people in this country. The chief impulse, which animated even those of humblest means, causing them to economize their daily expenses, seems to have been caused by the disastrous incidents by which many of our brethren were shamefully cast to the bottom of the sea by the Russian cruisers. If, then, this is the case with the inhabitants of country towns and villages how much more should the people of Yokohama be animated by such feelings, who have much greater interests, directly or indirectly, in maritime affairs than people of remote parts of the country? A rumour is current to the effect that some of the most wealthy gentlemen in this port have donated as much as two hundred or three hundred yen each towards the funds of the movement.

Is this the largest possible sum of money that can be taken out of the pockets of a millionaire for the sake of the public welfare, while a man living from hand to mouth is willing to sacrifice a greater part of his day's earnings? Nothing is more base than to be absorbed in money-making, quite independent of any higher object than its accumulation.

Let me hope that the rumour will prove groundless and that the possessors of money-bags and acres will try their best to emulate their poorer brethren.

Yours, etc.

"A COMMONER."

Yokohama, April 18th, 1905.

#### RELIEF WORK TO MEET THE PRESENT EMERGENCY.

The development of the present national emergency has rendered the nation's sympathy towards the men at the front and their families profound. The spirit of brotherly love and mutual assistance has embodied itself in the formation of "relief societies" in towns and in villages, and the feeling of chivalry and public service has manifested itself in various accommodations which demonstrate the reality of the nation's backing. Sympathy and enthusiasm flow in every direction, and nothing seems lacking that could be done to this end. And these relief accommodations are planned and projected not only by those who are willing among the people, but also by the State itself, which has issued "The Imperial Ordinance concerning the Relief of Soldiers' and Sailors' Families," and has established the means of helping those who have no relatives and friends to help them or those who are beyond the influence of the relief societies.

Particularly our Imperial Household has deeply felt the necessity of such help, and has recently granted a certain sum of money to the "Association for the relief of those serving in the Army and Navy," the "Ladies' Patriotic Society," the "Seamen's Families' Endeavour Society" and so forth. The nation should be deeply grateful towards the Imperial Household.

Hitherto most of the work of relief has been nothing but mere alms-giving. But at present,

either at the centre or in local places, the utmost caution is taken to do relief by furnishing employment to those who need relief, so as to preserve and develop the spirit of independence and self-help in the heart of the relieved, and thus the abuses of giving out ready money are carefully avoided. This is a remarkable progress in the work of relief.

Now to enumerate the model cases of relief works in different localities, let us observe those of the cities first.

The "Ladies' Chivalrous Society" of Saga city, Saga prefecture, and the "Tokyo Ladies' work-Furnishing Society" are among those pioneers that adopted very appropriate methods in accomplishing relief through employment. The founder of the "Ladies' Chivalrous Society," one Teisei Kiyama, is a monk of the *Shin* sect. During the late Japan-China war, Mr. Kiyama felt, from his personal observation of a soldier's conduct, both the importance of the relief of the soldiers' families and also the influence such relief exerts on the spirit of the soldiers at the front. This time, on the opening of the Japan-Russia War, he pioneered to establish the society, the principal work of which is to let the women of the soldiers' families do sewing-work; and in addition, useless things which are naturally found in every household are gathered together and sold to merchants. In this way, not only the money needed to pay the necessary expenses of the society is obtained and no need is left for begging alms of anybody, but on the contrary a certain sum of money was already contributed out of the common treasury, to the Soldiers and Sailors' Comfort Board. The Tokyo Women's Work Furnishing Society gives such work as sewing and washing of soldier's clothes as the means of earning a livelihood, and also the work of taking care of young children is carried on. Can we not see the deep significance in such method of relief?

Moreover, the manufacture of straw *sanada* (tape) in Takamatsu city, Kagawa prefecture, and that of *kyogi-sanada* (shaving-tape) in Takasakicity, Gumma Prefecture, and in Fukushima town, Shinobu County, Fukushima Prefecture, are not only the means of furnishing work to the soldiers' families, but also the means of advancing local industries and of offering a means of livelihood to the poor at large. Thus the work of relief has ceased to be a mere work of relief, but has become the means of encouraging industries in various localities.

That which most recently has made a very remarkable progress in the work of relief by furnishing employment, is found in the relief society of Osaka. The society has to supply clothes for soldiers, and we see that recently it has made the soldiers' families start stores in the reserve hospitals to meet the demands of the patients in them.

Now coming to the relief works in the towns and villages, we have to mention the Secret Plowing Society of the young men of Nakagawa village, Gumma County, Gumma Prefecture. Either at night or when nobody knows, these young men go out and plow for those who are away at the front the farms which lie unplowed and unsown on account of their cultivators' absence, and thus help the labour of their families left behind. In Meiji village of the same county in the same prefecture, and also in Ashikaga town, Ashikaga County, Tochiki Prefecture, tillage was helped and agricultural work was satisfactorily accomplished. In Kuzo county, Kyoto Prefecture, the school-children helped in the tillage of the farms of those who are at the front, after their school was over. In some places, farms are gratuitously lent out to the soldiers' families for tillage, or manure and other things are bought together at wholesale prices and distributed to them, or capital is either lent out or given, so that they could devote themselves to the manufacture of straw articles which are by-products of farming, or some work in tea-making or silk-worm raising is found and given to them. Can we not see the beautiful spirit of help and co-operation in these farming villages?

In Tsuda village, Kita-Kawachi County, Osaka Prefecture, and in Awaga village, Kanazaki County, Hyogo Prefecture, the villagers gave the monopoly of selling matches, soaps, *tofu* (bean-curd), and other household articles to the soldiers' families, and are glad to get their supply only from these licensed families. Is this not a case of the recognition of a monopoly founded purely on the mutual agreement of the parties concerned and of the utilization of such monopoly as a means of relief? Moreover, the cases of developing local industries and at the same time availing of these as the means of helping the soldier's families, are found in the manufacture of *kyo-gasuri* (a kind of patterned cloth) in the Chivalrous Society of Matsuyama city, and in the selecting work of *Naruto-wakame* (edible seaweed) in Satoura village, Itano County, Tokushima Prefecture. To furnish as much work as possible, things needed in the army are endeavoured to be supplied out of home-made articles, and in the marine products laboratory of every prefecture and in both public and private factories of canned goods, the preference of employ-

ment is given to the soldiers' families and some special increase of wages is promised to them. Moreover, in certain sections in the army where articles needed in the army are made and supplied, special favors are offered to the soldiers' families, and the spirit of diligence is encouraged and the formation of character is aimed at, in addition to the work one has to do, whether one belongs to a soldier's family or not. This is worth noticing.

To turn to the navy, the importance of relief through work has been also recognized and plans have been made to this end. Take, for instance, the "Naval Endeavor Society," which exists in every place where a naval station is situated, and whose members are the families of sailors serving the navy. In time of peace, the society supplies employment to these families and endeavors not to leave anybody idle, and in addition, it teaches the principles of self-culture and house-keeping, and aims at the ennoblement of character and the perfect happiness of home. At the time of war, the society supplies a strong backing to those at the front and thus exerts not an insignificant influence on the military spirit of those who are fighting. At first this society was started by a wife of a high naval officer of the Yokosuka Naval Station; but soon its importance and good results having been recognized, similar societies were also formed at the Kure, Sasebo, and Maizuru Naval Stations.

Together with relief through employment, a few words must be added about the arrangement lately started of taking care of young children during the daytime for the sake of those who cannot devote themselves to work on account of their children. "Tokyo Kyobashi-Ku Nursing Place of Young for those serving at the Front," "Osaka Women's Charity Society," "Osaka Philanthropic Relief Society," "Kobe Women's Public Service Society," and "Hiroshima Women's One Heart Society" are reaping good results in this line.

Besides these societies of local relief, there are those of universal relief, such as the "Association for the Relief of those serving in the Army and Navy," the "Ladies' Patriotic Society," and so forth. The former association, which is under the leadership of Count Inoue and Count Matsugata, and supported by the well-to-do classes, both native and foreign, has already its own property amounting to more than one million yen, and is a very powerful endowed institution at this moment of national emergency. The purpose of the society is, in co-operation with public and private institutions of similar nature, to help the families of the killed and wounded, or those soldiers who become invalid or disabled, or the families of such, or the needy families of those who are called away from their homes to the seat of war. As to the practical mode of operation, the Society has asked the Home Department to make necessary investigations for its sake. The "Ladies' Patriotic Society" is a permanent body established by some patriotic ladies, and its purpose is to help the needy families of the killed in battle and also to comfort and relieve invalid soldiers.

Moreover, we know that the "National Backing Society" has appealed to the whole country for a contribution of blankets for the soldiers at the front and has already handed over those collected to the Soldiers and Seamen's Comfort Board; that women's societies of all sorts and girls' schools of various localities are zealous to get and sew clothes for the soldiers and offer the time and labor and everything for the comfort and other relief of the soldiers; that the members of the Young Men's Christian Association are giving comfort and convenience in their tents, which they have pitched for that purpose, to the soldiers at the front; and that some graduates of girls' school of higher grades and also ladies' societies of various sorts have made and offered what they call "Soldiers' Comfort Bags" to the men who are fighting for their country. These and similar noble and patriotic deeds are beyond enumeration.

In a word, we see that, on one hand, the organs for relief to meet the emergencies of the present moment are forthcoming everywhere, both in large cities and in small villages, and that their work of relief through employment is succeeding remarkably well. This cannot be anything else than the outburst of the spirit of brotherly love and mutual assistance and of the zeal of patriotism and public service, and indicates a remarkable phase of the people's attitude towards their nation as belligerent. In accomplishing the work of relief at this critical moment, all the people, whether the families of soldiers or not, both old and young, high and low, are well cognizant of the pains and sufferings of those at the front, have their spirit transferred and their own energy doubled, and are thus paying the way for the development of industries. Is this not the most appropriate thing to be done, not only under the present circumstances, but also in advancing the principle of prosperous housekeeping and developing the national wealth and strength. Indeed it is the best course to be followed not only in the time of the war but also after the war is over and past.

## TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

ANTI-ORIENTAL AGITATION IN  
BRITISH COLUMBIA.

London, April 13.

White settlers are forcibly resisting the introduction of Chinese and Japanese labourers into Salmon Valley, British Columbia. The police are protecting the Orientals, and more trouble is feared.

The Japanese Consul at Ottawa has protested against the renewed anti-Japanese legislation in British Columbia, and Sir Wilfrid Laurier has promised to disallow it if it is represented as detrimental to Imperial interests.

MR. J. CHAMBERLAIN ON THE  
JAPANESE ALLIANCE.

Mr. Chamberlain, speaking at the Liberal Unionist Club, said the conclusion of the Anglo-Japanese alliance displayed foresight, courage and readiness to take a certain risk, but the policy of *laissez faire* was much more dangerous. I think, he continued, the opinion of the country, and I am sure of all Liberal Unionists, is settled thereon. We approved of the treaty, which has already justified itself by limiting the area of the present terrible conflict, and we shall support Lord Lansdowne in his determination to fulfil the treaty both in spirit and in letter. May I say that we would gladly follow him further if he thought the policy which he has initiated could be further extended. (Applause.) I myself believe in a mutual defensive understanding between Japan and Great Britain which would secure indefinitely the peace of the Far East and give security in our possessions.

## THE INDIAN EARTHQUAKE.

The total loss of life by the Indian earthquake was 20,000.

## THE BALTIC SQUADRON.

London, April 14.

The *Sutlej* passed the Baltic Squadron 35 miles to the N.-E. of Singapore. Hence the Dutch report of fighting at the Anamba Islands is discredited.

## ANGLO-FRENCH COURTESIES.

In connexion with the visit of the French fleet to London, the Corporation will entertain the French officers at the Guild Hall. Arrangements are being made for the blue-jackets to march through the city. The Atlantic Squadron will visit Brest early in July.

## BRITISH FISCAL POLICY.

London, April 14.

At a meeting of tariff reform members of the House of Commons, a deputation was appointed, headed by Mr. Chamberlain, to wait on Mr. Balfour, the Premier, with a view to arranging a *modus vivendi*. It is understood that Mr. Chamberlain has decided to confine for the present his fiscal programme to the policy of Mr. Balfour. The Duke of Devonshire and his supporters are regarded as irreconcilables.

## ANOTHER RUSSIAN RAID.

London, April 15.

General Linevitch reports that the Russian cavalry raided the railway near Kaiyuan and demolished telegraph lines.

"POSITION OTHERWISE UN-  
CHANGED."

Marshal Oyama reports that the enemy are gradually retiring along the Kirin road and that the position is otherwise unchanged.

## THE HOSPITAL SHIP "OREL."

London, April 16.

The hospital ship *Orel* remained 36 hours

at Saigon and shipped 900 tons of coal besides food and medical supplies.

## CAPT. CLADO.

Capt. Clado has been severely reprimanded for his criticism on Russian naval administration and been given an opportunity of rehabilitation by commanding the service of the river steamers in Manchuria.

## GERMANY AND FRANCE.

Later.

Some relaxation of the tension between Germany and France concerning Morocco has been noticeable during the last few days.

STRENGTHENING ST. PETERSBURG  
GARRISON.

In view of an apprehended renewal of demonstrations in St. Petersburg the garrison has been strengthened by several sotnias of Don Cossacks.

## THE PEASANT MOVEMENT.

The Russian peasant movement is again causing serious apprehension. Large numbers of land-owners and their families are taking refuge in Moscow.

## THE BALTIC SQUADRONS.

London, April 17.

It is announced from Port Said that the Fourth Baltic Squadron, under Vice-Admiral Bassaroff (r) consisting of the battleship *Alexander II.*, the armoured cruiser *Pamyat Azora*, the second class cruiser *Admiral Korniloff*, the battleship *Slava* and the battleship *Paul I.* will pass the Canal in July or August.

## RUSSIAN REFORMS.

London, April 18.

The Constitutional Conservative Party which is being formed in Russia includes seven members of the Council of the Empire, besides Senators and prominent Government officials, is contended by prominent men and is issuing several thousand invitations throughout Russia to a conference at St. Petersburg on the subject of reform. A scheme has already been drawn up for the composition of a representative assembly.

## ROJESTVENSKY'S FLEET.

London, April 18.

The Russians are elated at the daring and skill of Admiral Rojestvensky. They state that he is coaling and cleaning his fleet at Kam-ranh, prior to engaging the Japanese.

## REPORT FROM LINEVITCH.

Linevitch reports that the Russian Left on the 11th inst. attacked the village of Pou-houl, five miles eastward of Meial, and enveloped the flanks of the Japanese, who retired to Meial, which is the Japanese advanced post on the Kirin road.

## POLISH AFFAIRS.

London, April 19.

The Governor-General of Poland has summoned a conference with a view to the establishment of a system of local government in the rural districts of Poland similar to the Russian Zemstvos. It is announced that the Government is considering the advisability of introducing the Polish language in official transactions.

## FRENCH NEUTRALITY.

London, April 20.

The *Temps*, of Paris, demands proofs that France is violating her neutrality in the case of Kam-ranh Bay. It declares that the Baltic Fleet while at Madagascar was never within the three mile limit and that there is nothing to show that Rojestvensky is less careful in Indo-China.

## FRANCE AND SIAM.

A later telegram says that a hitch has

arisen with regard to the Franco-Siamese delimitation, under the last convention, owing to the fact that the French commissioners have declared that they have discovered errors in the geographical data supplied by Siam.

## SEAMEN AND CONTRABAND.

Eleven seamen belonging to the steamer *Riverdale* having refused to sail from Bombay to Kobe because the ship was to carry a cargo of cotton, were prosecuted but were acquitted by the magistrate who held that Russia had declared cotton contraband of war and the accused were justified in declining to run the risk of capture and imprisonment. The crews of the *St. Helena* and *Battersea* at Hongkong were arraigned for a similar offence. The matter is attracting considerable attention in England.

(Received at the Imperial Head Quarters.)

## THE FRONT.

Our troops advancing eastward of Fushun and Hailung yesterday (12th) forenoon at Rhohu (about 7½ miles east of Yingpau) came into collision with a force of the enemy consisting of about a regiment of infantry with some 6 sotnias of cavalry and 4 guns. Driving him back, our troops to-day occupied Tsangshih (some 20 miles east of Yingpau). The enemy retired in the direction of Hailung resisting step by step.

The enemy on the Kirin highway have been steadily retreating since the 11th inst. Part of their force has halted at Kuyushu.

In the Changtu and Fukumun direction there are occasional skirmishes between his cavalry and ours. Otherwise there is no notable change.

(Received at the Military Head Quarters; 14th p.m.)

Our troops advancing eastward of the Hailung highway to-day in the forenoon (14th) drove back the enemy from Heishihnu (about 10 miles east of Tsangshih) and pursued him in the direction of Pakiatz (about 25 miles east of Tsangshih).

This morning our troops which had advanced northward from Hsingking, encountered a body of the enemy encamped some 5 miles south of Pakiatz and attacked him.

There is no special change in other directions.

(Received at the Military Head Quarters; 15th instant p.m.)

The Japanese force which had advanced north from Hsingking steadily drove the enemy before it and at 1 p.m. on the 14th instant occupied Yingching (some 35 miles north of Hsingking). A detachment of this force, coöperating with the cavalry of our troops which are advancing eastward by the Hailung high-road, completely occupied Pakiatz at 6 p.m. The force of the enemy at Pakiatz, consisting of about one regiment of infantry with 6 or 7 sotnias of cavalry and a battery of artillery, had retired at first in the direction of Yingching, but returned again to Pakiatz and thereafter retreated in great confusion through Pehling (some 2½ miles north of Pakiatz).

Otherwise there is no special change at any of the positions.

(Received by the Military Head Quarters on the afternoon of the 16th instant.)

During the night of yesterday (15th) about 5 sotnias of the enemy's cavalry advanced to Sanyenching, on the high road from Fakumun to Fenghua. Our troops attacked them during the night and drove them far north. They retired in great confusion leaving 8 dead and one horse. Our casualties were 2.

There were other cavalry skirmishes in various quarters but no special changes.

(Received at the Military Head Quarters, April 19)

Our troops, which advanced in the direction of Tung-hwa, some 50 miles from Hsinking, completely occupied the former place on April 15. The enemy in this region is gradually retiring north. There is no other notable change at any of the positions.

(Received at the Military Head Quarters, on the 18th instant.)

## PORT ARTHUR.

The result of investigations shows that the prisoners, provisions, arms and ammunition taken at Port Arthur when the fortress capitulated were as follows:—

## I.

Grand total of prisoners 41,641, including 15,307 sick and wounded.

Number of those released on parole 1,398.

Included in the above were 17 General officers, of whom 10 were released on parole; and 1,439 officers of rank below that of General, among whom 133 were sick or wounded and 526 were released on parole.

Number of rank and file 40,185, including 15,174 sick or wounded and 862 released on parole.

## NAMES OF OFFICERS OF GENERAL RANK.

Rank	Name
Lieut.-General	Anatori Stoesel.
do	Mitorosan Nadein.
Major-General	Vladimir Gorbatsky.
do	Michael Kosutinko.
do	Victor Reis.
do	Vladimir Souikky.
Rear-Admiral	Michael Rantvisky.
do	Ivan Grigorovitch.
do	Prince Paul Wuktomsky.
Engineer in Chief	Alexander Rindebeck.

The above 10 General Officers were released on parole; the following 7 were constituted prisoners:—

Lieut.-General	Vladimir Nikitin.
do	Alexander Fock.
do	Constantin Smirnov.
Major-General	Samiyod Sofumandaloff.
do	Vladimir Irmann.
do	Washiri Berui.
Rear-Admiral	Robert Willen.

## II.—PROVISIONS AND FODDER.

Article	Quantity	Number of days' provisions for one man
Flour	177,000	690,000
Split barley	16,000	80,000
Indian Corn (ground)	2,800	11,200
Rice	270	1,125
Twice-baked bread	120,000	666,666
Tinned Beef	7,000	175,000
Salt (table)	70,000	22,333,333
Sugar	4,000	1,333,333

In addition to the above there was horse fodder for 56 days.

## III.—GUNS (Serviceable).

Total Number of Guns ..... 528

The above consisted of the following detail:—

## GUNS ON FIXED PLATFORMS.

25-cent. Canet	5
24-cent. Canet (Krupp)	1
23-cent. Canet	12
15-cent. Quick-firers	30
15-cent. Canet	16
12-cent. Quick-firers	5
10.7-cent. Canet	51
57-m.m. Quick-firing Canet (on naval carriages)	23
75-m.m. Quick-firing Canet in caponiers	5
47-m.m. Quick-firing Canet	94
37-m.m. do	37
37-m.m. Gatling	15
25-m.m. Mitrailleuse	2
28-cent. Howitzers	8
23-cent. Mortars	22

## GUNS MOUNTED ON REVOLVING PLATFORMS.

15-cent. Canet	14
15-cent. Howitzers	15
10.7-cent. Canet	12
10.7-cent. Canet (Krupp pattern)	13
8.7-cent. Heavy Field-guns	48
8.7-cent. Light Field-guns	9
8.7-cent. Krupp Field-guns	9
7.8-cent. do do	2
7.5-cent. do do	20
7.5-cent. Quick-firing Field-guns	38
57-m.m. do (Krupp)	7
64-cent. Naval Guns	10
Maxim Machine Guns	4

Total ..... 528

## IV.—AMMUNITION.

Gun Ammunition ..... Rounds. 206,734  
Of which the detail is as follows:—

	Rounds.
28-cent. Howitzer	47
25-cent. Canet	130
24-cent. do	34
33-cent. do	31
23-cent. Mortar	105
15-cent. Canet	719
15-cent. Quick-firing Canet	2,241
15-cent. Howitzer	267
15-cent. Canet Siege-guns	1,199
12-cent. Quick-firing	827
10.7-cent. Canet	1,282
10.5-cent. Canet	441
8.7-cent. Field gun	13,449
7.8-cent. do	98
7.5-cent. Quick-firing Canet	7,148
7.5-cent. Field-gun	39,395
6.5-cent. Naval-gun	4,074
57-m.m. Quick-firer	21,592
47-m.m. do	20,372
37-m.m. do	67,813
25-m.m. Mitrailleuse	420
Maxim Machine-gun	24,550

In addition to the above ammunition is being unearthed.

[The quantity of gun ammunition originally stated by General Nogi to have been found in the fortress was only 82,670 rounds, whereas the above figures show that there were really 206,734 rounds.—Ed. J.M.]

V.—RIFLES AND PISTOLS ..... 36,598

[The number of small arms originally returned was 35,252. It is nevertheless evident that many thousands must have been thrown into the harbour.—Ed. J.M.]

The detail of the above is as follows:—

Infantry Magazine Rifles	25,708
do Non-Magazine Rifles	2,220
Cavalry Magazine Rifles	7,765
do Non-Magazine Rifles	114
Various	369
Pistols	370
Chinese Rifles	60

## VI.—SMALL ARM AMMUNITION.

Rifle ammunition	5,436,240 rounds.
Pistol	7,000

[The rifle ammunition was originally stated at 2,266,800 rounds.—Ed. J.M.]

(Received at the Naval Department.)

## THE RUSSIAN SECOND SQUADRON.

17th instant.

A trustworthy report has been received that the Russian Second Pacific Squadron was at anchor on the 14th instant in Kamranh Bay in Annam, which is French territory.

(RECEIVED AT THE FOREIGN OFFICE.)

According to a Reuter's telegram Linvitch reports as follows:—"On the 9th instant the Russian cavalry cut the telegraph and the railway at Machientai. They performed a similar operation at the crossroads on the highway from Changtu to Kaiyuan. On the 10th instant the Russian cavalry scouts cut two telegraph lines near Kaiyuan."

## HARBOUR PRECAUTIONS.

The Yuensan harbour officials have published a warning to ships, of which the following is the gist:—"Vessels habitually entering or leaving the port must pass at a speed of not more than 5 knots the line joining the south-west of Yo Island and the south of Syosin Island. Further they must not, without the sanction of the port officials, enter or leave between sunset and sunrise. If they fail to comply with this warning, their safety is not guaranteed."

## INDIAN TRADE.

Bombay, April 17.

Trade conditions remain almost unaltered this week as compared with last. The effect of the Baltic Squadron's arrival in the East is merely to increase insurance rates. The stocks of raw cotton amount to 679,014 bales.

## THE BALTIC SQUADRONS.

A London telegram dated the 17th is published by a Berlin journal. It says that the Third Russian Squadron has been signalled as passing Ceylon.

(SPECIAL FROM OUR KOBE CORRESPONDENT.)

## THE BARDENS CASE.

Kobe, April 19.

The property of Mr. Bardens has been provisionally attached. On Monday a suit by Messrs. Samuel Samuel & Co. (against him) for liability to the extent of yen 30,000 was laid, the complaint being that he had misappropriated yen 8,000 since May, 1902. Mr. Bardens was examined yesterday by the Public Procurator, when Messrs. Fawcner and Stirling made statements. Other matters are now being investigated by Messrs. Samuel Samuel & Co.

(RECEIVED BY THE "ASAHI SHIMBUN.")

## THE BALTIC FLEET.

Shanghai, April 15.

The Shanghai Times publishes a Hong-kong telegram saying that the S.S. Kona (?) sighted the Baltic Squadron on the 11th off Condore Island. One of the Russian cruisers came and inspected the steamer's manifest, inquiring also her destination, and then departed. The Squadron was protected by fast guard-ships. The battle-ships and the cruisers formed an outer line protecting the transports and the colliers, which were in the centre. The Squadron seemed in good condition. It was steaming at 10 knots, and the story that yards of sea-weed were attached to the vessels is false. The Squadron seemed to be heading for the Paracels to coal there.

## RUSSIA'S FUTURE POLICY.

London, April 15.

General Dragomiroff has made the following statement to the Tsar:—"An honorable peace has failed. The war must be continued indefinitely. Were not wars continued in ancient times for 7 years, for 30 years, or even for 100 years? Until Russia can double the carrying capacity of the Siberian Railway she must carry on the war in the most economical way. At the same time she must build a large fleet of modern ships. If she proceeds thus for four years, she will finally be able to inflict a heavy blow upon Japan."

(RECEIVED BY THE "HOCHI SHIMBUN.")

## OPERATIONS IN THE SOUTH.

April 18.

A telegram from Saigon says that the Japanese have captured a number of Russian colliers some distance from Saigon.

(RECEIVED IN TOKYO.)

## THE BALTIC SQUADRON.

The master of the French S.S. Fuen (?) which reached Hongkong on the 18th inst. in the morning, reports that on the 15th, when passing Kamranh Bay, a torpedoer of the Baltic Squadron came out, and inquired us to his ship, his passengers, his cargo and his destination.

The master of the German S.S. Koshichan (?), which reached Bankok on the morning of the 18th, reports that on the 14th when in the neighbourhood of Kamranh Bay, his ship was visited and inspected by a Russian torpedo boat.

(The reports make it quite plain that Admiral Rojensky is using a French port as a base of operations against neutral commerce. The audacity of such a proceeding places it in the same rank with the North-Sea outrage. It is impossible to imagine what France means by allowing these monstrously unlawful acts.—Ed. J. M.)

Singkat	2.88

## SUGAR.

The market is inactive.

Brown Takao	PER PICH.
Brown Manila	Y. 10.30 to 10.60
Brown Daitong	10.80 to 11.80
Brown Canton	9.10 to 9.60
White Java and Penang	10.50 to 12.50
White Refined	13.40 to 14.40
	15.40 to 18.00

## INDIGO.

Nothing doing.

Java, Medium to best	PER PICH.
Calcutta, Medium to best	210.00 to 260.00
Madras (Kupah), Medium to best	140.00 to 220.00
Madras (Dry Leaf), Medium to best	100.00 to 140.00

## EXPORTS.

## RAW SILK.

Quiet market continues. Prices nominally unchanged. Good silks are in demand, but inferior qualities can be had the turn cheaper. The future course of the market will depend on the new crop prospects. It is yet too early to predict with any certainty, but so far the late and cold spring has done no material damage.

## WASTE SILK.

A few daily transactions, but the market generally does not show much life. Prices are a little irregular in sympathy with those of the Raw Market.

# BAD COMPLEXIONS

Dry Thin and Falling Hair and Red Rough Hands Prevented by

## CUTICURA SOAP

MILLIONS use CUTICURA SOAP, assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes, for ulcerative weaknesses, and for many sanative, antiseptic, cleansing purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. CUTICURA SOAP combines delicate emollient properties derived from CUTICURA OINTMENT, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated soap is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the best skin and complexion soap, and the best toilet and baby soap in the world.

### COMPLETE EXTERNAL AND INTERNAL TREATMENT FOR EVERY HUMOUR,

Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales, and soften the thickened cuticle; CUTICURA OINTMENT, to instantly allay itching, inflammation, and irritation, and soothe and heal; and CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. A SINGLE SET is often sufficient to cure torturing, disgusting humours, eczema, rashes, and irritations, with loss of hair, when all else fails. Sold throughout the world. Australian Depot: B. TOWNS & CO., Sydney. British Depot: 17, 23, Charterhouse Sq., London. French Depot: 5 Rue de la Paix, Paris. POTTER DRUG AND CHEM. CO., Sole Props., Boston, U.S.A.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated Hagedorn's Resolvent, as well as for all other blood purifiers and humours cures. Put up in screw-cap pocket vials, containing 60 doses. CUTICURA PILLS are alterative, antiseptic, tonic, and digestive, and beyond question the purest, sweetest, most successful and economical blood and skin purifier, humours cure, and tonic-digestive, yet compounded.

## NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, APRIL 29TH, 1905.

## SUMMARY OF NEWS.

PRINCE AND PRINCESS ARISUGAWA left Colombo on April 23rd for Aden.

THE Emperor is reported to be slightly indisposed. He is suffering from a cold.

A RUSSIAN officer and 138 men were brought on April 26th from Dairen to Moji.

RUSSIAN officers in detention at Shidzuoka are now permitted to walk about the streets.

PROVISION has been made for the accommodation of Russian prisoners at Sabae in Fukui prefecture.

A RUSSIAN in detention at Himeji escaped on April 22nd, but was arrested on the following day.

JAPANESE gold coins amounting to yen 257,990 were brought on April 26th from Shanghai to Kobe.

It is reported by telegram from Ujina that the steamer *2nd Denshin Maru* ran ashore on the

night of April 24th near Nasami. Measures for floating her are being carried out. Details are not yet given.

Two men were arrested on April 24th at Ujina on a charge of having circulated counterfeit 5 yen notes.

THE Crown Prince and Princess and their third son, Prince Teru, removed on April 23rd from Numadzu to Hayama.

RUSSIAN prisoners now in Japan, according to official investigations made on April 26th, number 60,190 including 913 officers.

THE Emperor has decided to give a thousand yen yearly for ten years commencing this year, to the Okayama Orphan Asylum.

SAMPLES of new tea from the districts of Shimidzu and Itohara, in Suruga province, were brought on April 24th to Yokohama.

MAJOR-GENERAL Y. TADA has been appointed Commander of the Tokyo Defences. He arrived on April 25th at his office in Yokosuka.

ON the morning of April 24th, frost prevailed in the districts of Ise province causing more or less damage to the mulberry and tea trees.

A MAN named Fukuda, an official of the Moji Post Office, was arrested on April 26th on a charge of having stolen yen 800 belonging to the office.

THE Seoul-Fusan Railway Company intends to construct a branch line between Fusan and Ulsan—about 26 miles. The survey will shortly begin.

THE equipment of the Nippon Yusen Kaisha's new steamer *Tango Maru* (7,400 tons) having been completed, she left Nagasaki on April 26th for Ujina.

THE *Nichi Nichi* has a telegram from Okayama stating that C. Nishimura, a policeman belonging to the Ishii Police Station, and eight others have been arrested on a charge of robbery.

THE death is reported in Shanghai on Sunday of the Rev. J. Eddins, one of the most learned sinologists in China. In years gone by he was a frequent contributor to the *Japan Mail*.

A SHIDZUOKA telegram reports that Mr. T. Nakamura, residing in the village of Maki, Abe district, has invented a machine gun which can discharge one thousand projectiles per minute!

THE Bronze statue of the late General Viscount Kawakami, Chief of the Staff Office, at Kudan, Kojimachi-ku, Tokyo, will be unveiled on April 28th. Many officers of the Navy and Army will be present.

ON the afternoon of April 22nd, the *Yokohama Nippo* gave a dinner party in the Yokohama public garden to the families of the soldiers who are now at the front. Mayor Ichihara and other gentlemen were present and made speeches.

Two steamers the *Crown MacArthur* and *Ujina* with twenty thousand bales each of cotton from Bombay, which had taken refuge at Singapore owing to the appearance of the Russian fleet in those waters, arrived on April 25th at Kobe.

At the recent meeting the directors of the Tokyo Chamber of Commerce were elected as follow:—Mr. B. Nakano, President; Mr. S. Ohashi, Vice-President; Mr. S. Iwade, Vice-President; Standing

Committee:—Mr. K. Ito, Mr. S. Hoshino, Mr. A. Fukuhara, Mr. R. Okada, Mr. Z. Miwa, Mr. T. Machida, Mr. K. Makoshi, Mr. A. Amenomiya, Mr. C. Matsumoto, Mr. K. Mayeda, Mr. K. Yoshida and Mr. Z. Nishisawa.

A TELEGRAM from Taipeh reports that the Baltic squadron is generally expected to proceed through the Formosan Channel for Vladivostok. The junk service between Formosa and South China is very much reduced and the price of food stuffs has risen.

THE crew, forty in all, of the Norwegian steamer *Henry Balkow* (1,006 tons gross) captured on April 7th, were brought on the 22nd from Yokosuka to Yokohama, and released at the Kencho. The ship is undergoing examination by the Yokosuka Prize Court.

A TELEGRAM has been received in Tokyo to the effect that the Nippon Yusen Kaisha's chartered steamer *Venus* arrived safely on April 24th at Hongkong on her way from Europe to Japan. This ship, it was rumoured, had been stopped by the Russians during the voyage.

CAPTAIN KELLER, who was released on parole at Port Arthur, arrived on April 26th at Yokohama from Shanghai on his way to Vancouver. This officer is a son of General Keller who was killed on August 1st at Yushulintz when a counter-attack was made upon the Japanese.

LIEUT.-GENERAL MIYOSHI left Ujina on April 25th for a certain destination. Lieut.-General Tsuchiya, having recovered from wounds received by him at Port Arthur, will, on May 5th, leave Zentsuji, where he has been undergoing treatment, for a similarly undicated destination.

A TELEGRAM from Kanazawa says that on the night of April 24th, a plot by about fifty Russian prisoners to burn the prison, to steal the rifles of the guards and to escape, was discovered. Two companies of infantry appeared before the plan could be carried out and so defeated the project.

THE Yokohama Specie Bank received a telegram on April 26th from London to the effect that the price of Japanese bonds has slightly fallen, present quotations being as follows: 4 per cent, £83½; first 6 per cent, £101½; second 6 per cent, £100½; and third 6 per cent, 1 per cent premium.

A TELEGRAM from Chiba says that a man armed with a sword on the night of April 25th entered the house of a wealthy farmer named M. Hagikawa, at Kogane-trachi, in the district of East Katsushika, and inflicted severe injuries on him and killed his mother, after which the intruder appropriated money and other valuables. The culprit is still at large.

ON April 21st and 22nd, at 1 p.m. fencing and *jujitsu* contests took place in the Isezaki-cho. Police Station as to which Mr. Yuasa, Superintendent of the Harbour Police Office and Mr. Ikariyama, Superintendent of the Kagacho Police, were umpires respectively. The matches, which were all successfully carried out, were watched by many foreign gentlemen.

A TELEGRAM from Maebashi reports that on April 24th, thirty-four soldiers belonging to the fifth company of the Takasaki regiment fell into the Tone river owing to the collapse of a bridge while they were crossing it on their way to Maebashi, the result being that four men are missing and a number of rifles, etc., were lost. The bridge was a temporary structure made for military use.

## THE BALTIC FLEET IN CHINA SEAS.

Friday, April 21.

*Le Temps*, according to Reuter's telegrams, asks for proofs that Rojestvensky is within French territorial waters, and the English press believes that France is anxious to observe the obligations of strict neutrality. No one doubts that France would be pleased to do her duty could she, at the same time, satisfy her sentiment. But present appearances suggest that her defenders are endeavouring to justify an unjustifiable act by a subterfuge unworthy of Frenchmen. What the French Government itself says we do not know. Recent experience has taught us to expect that whatever course a French Cabinet pursues with regard to foreign affairs will be at once circumspect and just. But the Madagascar incident damaged that fine record. If ever there was a case of beating the devil round the bush, the Madagascar episode seemed to be such a case. For though it may be true that Rojestvensky's ships lay outside the now unpractical three-miles limit, there is conclusive evidence that he was all the while in communication with the shore; that he received large quantities of supplies from Madagascar itself and that supplies were carried thither for his ships by French mail steamers. If the letter of the law was complied with so far as concerned the actual berth of the war-ships, surely its spirit was violated? Matters are even worse with regard to Kamranh Bay. Everything goes to show that Rojestvensky is lying actually within the islands which constitute the breakwaters of the Bay. Outside these islands there is, we believe, no good berth for vessels, and inside them the waters are essentially French territory. To get inside them a narrow passage has to be negotiated. Moreover, there is also evidence that ships are passing to and fro between the Russian Squadron and Saigon, and that Rojestvensky is receiving supplies from the latter place. How can such doings be reconciled with any theory of strict neutrality? The obligations of neutrality become of little value if they can be eluded by these manoeuvres. France is not a Power like China. She has ample means not only to ascertain precisely what is going on within her territorial limits, but also to enforce her will. What is now happening under her auspices and with her tacit consent, is difficult to reconcile with the law of nations or with justice to Japan, her nominal friend. But for the assistance rendered by France Rojestvensky's Squadron could scarcely have made its way to the Far East. May we not even say that but for the assistance rendered by France Rojestvensky's Squadron would not have attempted to make its way to the Far East? These two propositions sound harsh, but we are unable to perceive that any other version of the facts is possible. It is only necessary to reflect calmly for a moment in order to see that had not Kamranh Bay or some other French port been available to Rojestvensky, he must have either offered battle under most disadvantageous conditions, or run out into the wide Pacific where he would have been an almost insignificant factor in the situation. The world's sense of justice is higher than its appreciation of legal quibbles, and the world will judge unerringly, between France and Japan in this matter, unless the Government in Paris takes speedy action. It is a most lamentable incident, and its consequences will be so far-reaching that we shrink from considering them at this juncture.

The Governor of Hainan is said to have telegraphed to Peking that a portion of the Russian Squadron is lying off that island and is engaged coaling. Moreover, telegrams have been received in Tokyo saying that the bulk of the Squadron is still lying within—not without—Kamranh Bay, and that guard-ships are patrolling the approaches to the Bay.

With regard to the demand of *Le Temps* that proof should be furnished, the *Fiji Shimpō* again remarks the significant fact that Saigon is silent. The Saigon telegraph does not speak at all. Can anything be more suggestive? With what object and by whose authority are the Saigon wires dumb? But if proof be needed, it is abundantly furnished by the fact that Russian torpedoers are issuing from the Bay and visiting merchant steamers as they pass. These steamers are not suborned witnesses. Their log-books tell the story.

Perhaps it may be well to recall the proofs that do actually offer. They are three. In the first place those on board the German mail steamer *Prinz Heinrich*, by which Prince Arisugawa and his suite travelled, actually saw the Russian Squadron anchored within—not without but within—Kamranh Bay. How can the testimony of these witnesses be reconciled with any pretence that the ships were lying outside French territorial waters? In the second place two steamers, one a German and the other a French, were visited by Russian torpedo-boats steaming out of the Bay. The visiting of neutral ships constitutes belligerent action, and it follows conclusively that in thus proceeding the Russian Squadron made Kamranh Bay a naval base. In the third place, though according to France's municipal laws it is not a violation of neutrality for the ships of a belligerent to remain 24 hours or upwards in a neutral port, the 24 hours' limit is a custom approved by all Powers. Granting, however, that France has her own municipal regulations in such matters, it is essential to note that her regulations contain the proviso that no acts of war may be performed by belligerent ships thus enjoying the hospitality of her ports. But Rojestvensky's Squadron is performing acts of war. The visiting of neutral ships belongs essentially to that category.

Having, as we have, the utmost faith in the fairness and prudence of French statesmanship, our conviction is that when the Cabinet in Paris becomes fully advised of what is going on, it will take immediate steps to remedy a state of affairs which is at once discreditable to France and intolerable to Japan.

Shanghai reports that the *Askold* and the *Groszovoi* have been re-painted. The former ship has attached the breech-blocks of her guns and has had her machinery overhauled so that she is now ready for sea. So are the *Groszovoi* and the *Manjur*. They appear to be only waiting a favourable opportunity to leave the river. This news, however, must be received with great caution.

The *Fiji Shimpō* is at some pains to refute the subterfuges advanced by *Le Temps*, *Le Matin* and other defenders of France's apparent indifference to her neutral obligations. It is an insult to public intelligence that any such arguments should be necessary. Rojestvensky has come eastward to attack Japan. He has only one object, and that is to attack Japan. He is using a French port for the purposes of his expedition, and it is a French port within convenient striking distance of the enemy he seeks to crush. What need is there to quote the text of laws

or discuss the exact terms of their conditions in the face of such facts? Japan, as the *Fiji* justly says, can not be expected to endure this outrage tamely. The duty of self-protection forbids her to waste time over academical frivolities. The *Nichi Nichi Shimbun* is equally strong. After recapitulating the evidence, it declares that not in one solitary point does France show respect for her friendship with Japan, and that she is acting as an open enemy. The crisis admits of no delay. Within ten days the Third Russian Squadron will join the Second, and the junction will have been effected by France's direct connivance. Not an hour is to be lost. The *Nippon* uses almost the same language. It is astounded at France's conduct, and it declares that nothing so short-sighted was to have been expected of her. As to Rojestvensky, it is now evident that he has no intention of fighting if he can possibly avoid it. At any rate, by the kind assistance of France, he will be enabled to wait until the Third Squadron joins him.

Saturday, April 22.

The line taken by French journals, as represented by the *Temps*, seems to be that Russian vessels will be allowed to use French ports freely and for any length of time, provided they do not use them for warlike purposes. For what purpose is Rojestvensky using Kamranh Bay? Is it not for the purpose of getting ready to attack Japan? There can not be the least doubt about that, and we can only express profound astonishment that a great journal like the *Temps* should descend to such subterfuges. An argument so totally lacking in logic ceases to be even commonly honest. Russia is at war with the Japanese. The fleet she had in Far-Eastern waters at the beginning of the war has been virtually annihilated. She sends out another fleet to replace it and, if possible, to wrest from her enemy the command of the sea. That second fleet makes use of French ports *en route* to coal, provision, clean its ships and overhaul their machinery; in short, to get them ready for battle. Yet we are invited to imagine that such a use is not for warlike purposes! The thing is a veritable farce. Were the situations changed, were France in Japan's position and Japan in Russia's, we should find the *Temps* and all other French journals vehemently and justly denouncing such a flagrant breach of neutrality. The French Government, we are persuaded, will not adopt the view of the *Temps*. It will recognise that there is such a thing as human intelligence, and that the world can not have the smallest difficulty in discerning where justice lies. The arguments of the *Temps* are humiliatingly inconsistent with any recognised canons of sincerity.

There was for a moment some hope that the Baltic Squadron had left Kamranh Bay, a conjuncture which would have been heartily welcomed as relieving the tension of an unendurable situation. Two German steamers—apparently called the *Tangrin* and the *Bengrow*—were reported to have met a part of the Squadron steaming northward of that place, and this positive evidence was supplemented by the negative fact that no clear indications could any longer be detected of the Squadron's presence at Kamranh. But the *Tangrin* is a steamer which has been engaged carrying provisions for the Russian fleet and therefore her allegations were not to be trusted. Some authorities consider that a part of Rojestvensky's ships have moved up to Honko, a port of the Cochin-Chinese coast 40 miles north of Kamranh.

In Shanghai the rumour of the Russians having left Kamranh is not credited, its source being obviously tainted, and we now know it to be unfounded.

The Viceroy of the Liang-Kwang having applied to Peking that a portion of the Peh-yang Squadron should be sent south in order to assist in enforcing China's neutrality, Viceroy Yuan has replied that the Squadron is too weak to undertake such a duty and that the best policy is not to attempt to employ force in this matter.

From Shanghai rumours continue to arrive that the *Askold* and her consorts are preparing to leave the harbour. They are now said to be taking in coal. Considering how recklessly indifferent Russia is showing herself towards French neutrality, it would not be at all surprising if she adopted an equally lawless attitude towards China. As to the breech-blocks which, we presume, were removed from the *Askold's* guns at the time of her disarmament, it is reported that substitutes have been furnished by a certain Mr. William Holliday (?), and that the Taotai has been officially informed in that sense by the Japanese.

Several of the officers of the *Diana* are said to have secretly proceeded to Kamranh Bay to join Rojestvensky. The ship herself is not fit for service, but her officers labour under no such disadvantage, and if France allows her ports to be freely used by Russian war-ships, she may easily have failed to take precautions sufficient for effectually restraining the interned officers and men.

The leading Tokyo journals refuse to believe that Rojestvensky has left Kamranh. It is confidently stated that on the morning of the 18th instant the tops of the masts of several vessels were observed behind the hills that encircle the Bay. As a matter of fact, if the Russian ships are in the inner harbour, a vessel passing at a distance of some miles seaward, would have much difficulty in detecting their presence.

Here, it may be observed, that the French journals seem to have abandoned the myth of the three-miles limit. They now frankly claim that Rojestvensky is free to use French ports so long as he does not employ them for warlike purposes.

Concerning the call for proofs, the *Asahi* ridicules such a demand. There in the port are the Russian ships. They have been seen by numerous credible witnesses. If the French deny Rojestvensky's presence in their territorial waters, then the simplest form of proof is for the Japanese to attack him there. After that there could no longer be any doubt nor could France claim that her neutrality had been violated by the Japanese.

We need scarcely say that the Tokyo journals laugh to scorn the pretext that Rojestvensky is not using a French port for warlike purposes. He has no other purpose but a warlike purpose. He is performing no acts that are not warlike acts. Even the eminently circumspect *Nichi Nichi Shinbun*, now under the control of one of Japan's ablest statesmen, declares that in granting Rojestvensky free access to Kamranh Bay, France is openly and unequivocally violating her neutrality. The *Fiji Shimpō* continues to write in a very strong strain. It notes M. Rouvier's statement that France will do everything necessary to assure her neutrality in the Far East, but unfortunately France has done nothing thus far, and there now exists a situation which is manifestly a flagrant breach of her neutrality. The *Shogyo Shimpō*, which, true to its commercial character, has hitherto refrained from discussing the matter editorially, now writes in trenchant terms. It blames

Japanese diplomats for allowing such a situation to arise, and it insists that the only way to deal effectually with the crisis is for the Japanese navy to extend the field of its operations to French waters where the Russians are taking refuge and getting ready to fight. The *Kokumin*, however, drops the question of neutrality altogether and confines itself to belittling the potentialities of the Baltic Squadron.

The *Fiji Shimpō* and the *Shogyo Shimpō* say that France has replied to the Japanese protest, and the *Hochi Shinbun* alleges that the reply is a declaration that the French Government has not yet received any official information supporting the facts alleged by Japan. We can scarcely believe that such a reply has come.

London telegraphs that M. Delcassé, replying to Japan's remonstrance, has promised to give a detailed answer, but premised that delay may be necessary.

The *Times* observes that as goodwill and clear judgment exist on the side of both Japan and France, they may be expected to easily settle this question.

Yes, but in the meanwhile the mischief is in progress. Very soon Rojestvensky will have no more use for Kamranh Bay, and while M. Delcassé delays, the Third Squadron will arrive upon the scene.

Sunday, April 23, forenoon.

The general impression is that in spite of the statement attributed to M. Rouvier in the French Chamber, Rojestvensky's Squadron is still lying snugly in the harbour of Kamranh. Numerous telegrams from Hong-kong indicate that he is still there, and that he is receiving large supplies of coal and provisions from Saigon. Steamers are said to be plying in the most open manner between the two places, and it is added that a stock of coal amounting to over 40,000 tons had been accumulated at Saigon before the Baltic Squadron arrived in Far-Eastern waters. Moji sends word that Rojestvensky is endeavouring to confuse the proofs of his breach of neutrality by anchoring a few of his ships outside the three-mile limit, but that beyond all question his principal vessels are in the harbour, the approaches to which are duly patrolled by his cruisers and torpedo-craft.

Among all the Tokyo journals the only one that believes in the speedy departure of the Russians from Kamranh Bay is the *Asahi Shinbun*, which journal was the recipient of the telegram reporting M. Rouvier's statement in the Chamber. The other newspapers deal with facts as they actually are, and speak in a more indignant tone than ever. Thus the *Fiji* says that the French Government appears to be seeking to procrastinate matters under the plea of investigation, but inasmuch as this breach of neutrality is taking place openly within French territorial waters at a place where a telegraph station exists as well as a military post, and inasmuch as Rojestvensky and his ships have now been over ten days at Kamranh, it is intolerable that delay should be permitted for purposes of investigation. "This is no longer a question of right or wrong, of proper or improper. It is a question of the safety, the very existence of a state. Not one hour's delay can be tolerated." The *Asahi* is equally emphatic. It places its reliance solely on the very circumstantial telegram published on the 22nd instant by the Imperial Naval Department, it declares that France's intentions as to neutrality are now absolutely clear, and it calls upon the Foreign Office and the Naval authorities to be guided by the know-

ledge. The *Yomiuri Shinbun* affirms that by granting the use of her Cochinchina harbours to the Baltic Squadron, France has given new life to that force and has done a corresponding wrong to Japan. The French have trampled under foot the obligations of neutrality. As to M. Rouvier's so-called "polite" reply to Japan's protest, politeness is very welcome, but all the world is familiar with the hackneyed diplomatic device of gaining time under pretext of investigation. Time is out of the question on this occasion. Every day's delay is so much addition to the potentialities of the Baltic Squadron. Turning to England's attitude, the *Yomiuri* thinks that, unimpeachable as has been England's manner of discharging her duties of neutrality, she has showed some regrettable hesitation in approaching this question. It would now appear, however, that the British nation has awoken to the gravity of the situation and that the press has declared it better to break with France than to purchase Japan's ill-will. Possibly the English newspapers did not at first appreciate the facts, and evidently the newly established entente between Great Britain and France could not but seriously hamper freedom of utterance on this occasion. The *Chuo Shinbun* declares that Japan desires nothing less than to be France's enemy and France, it may be presumed, does not seek Japan's hostility. But when in time of war a nominally neutral state lends to one of the belligerents such assistance as is manifestly of the greatest injury to the other, that other ceases to have any choice: it must include among its foes the giver of such assistance. The French Government, the Government of a military Power, must well know the supreme value of time at such a juncture. While M. Delcassé is deliberating, the Third Pacific Squadron is drawing near and the Second is supplying all its necessities and deficiencies. The time has come to carry the case to the tribunal of the world's opinion or to act independently as circumstances dictate. The *Nippon*, under the heading of "France's unsightly attitude," asks by whose intervention it is that Russia has been able to float a new navy in Far-Eastern waters. Every one can answer the question. One of Russia's supreme difficulties, one of the obstacles which Japanese statesmen included in the forefront of their calculations when they drew the sword in defence of their country against Russian aggression was that she did not possess any ports between Europe and East-Asia and that she consequently could not send out a new fleet without almost insuperable embarrassment. That factor in the situation has been removed. French ports have been placed at Russia's disposal from first to last, and she has been enabled to bring a powerful squadron to Japan's very doors. It is idle to talk of the obligations of neutrality in such a context. No one has any right to find fault with France for espousing in a quarrel the side which she considers most conducive to her own interests. That is within the rights of every Sovereign State. What is reprehensible is her attempt to preserve Japan's friendship while materially assisting Japan's enemies, and her pretence of performing neutral obligations when she is manifestly trampling them under foot. Japan has long sought to be friendly with France. When during the course of this war French newspapers said hard things of Japan and the Japanese, the journals of this country refrained from replying. But there are limits to patience and bounds to sentiment. Japan is not disposed when her right cheek is

smitten to turn her left also to the smiter. The law of self-preservation is imperative.

We think it right to place before our readers the views entertained by Japanese journalists at this great crisis. Our own belief is that France is not deliberately pursuing the extraordinary course now clearly attributable to her, but that in her case also, as in Russia's, the man at the front, whose sympathies are entirely with St. Petersburg, has acted heart and soul in collusion with Rojestvensky, and thus a situation of the gravest nature has been created without the cognisance of M. Delcassé or his Cabinet. Facts have been suppressed, all kinds of facilities have been tacitly placed at the disposal of the Russians, and there has been a deliberate conspiracy of silence on the part of French local officials. Paris, therefore, on receipt of Japan's protests, finds itself somewhat bewildered. Such considerations do not remove France's responsibilities, of course. She has been guilty of a great wrong towards Japan. She has acted in such a manner that the complexion of the campaign is materially altered in Russia's favour. But we can not imagine that all this has happened with the deliberate connivance of Paris. One thing, too, does not appear to have been fully noticed. It is that the terms of the Anglo-Japanese Alliance bind England to "use her efforts to prevent other Powers from joining in hostilities against Japan." France, by lending her ports to Rojestvensky, is manifestly joining in hostilities against Japan, and therefore England is bound to "use her efforts." That she will use them, or has already used them, we entertain no doubt, and that they will be successful seems equally certain. But who will undo the mischief that has already been done?

Monday, April 24.

The articles published by Japanese journals this morning are perplexing, as it is impossible to discern whether several of them were not written before the receipt of the latest news as to Rojestvensky's Squadron having left Kamranh Bay. The *Asahi Shimbun*, speaking on the strength of evidence which it regards as unimpeachable, alleges that the Squadron was still in Kamranh Bay on the 22nd, and the *Yorozu Choho* makes a similar affirmation with regard to the 21st. In fact we gather from the latter journal that the official statement published by the Naval Department on the 22nd described conditions actually existing on the 21st. Hence it would seem to follow conclusively that the squadron was in the French port up to the 21st at all events, in which case the news that it was coaling at Hainan on the 22nd or 23rd becomes plainly incredible. On the other hand, we have a Reuter's telegram sent from London on the 23rd which asserts positively that the squadron left the Bay on the 22nd for an unknown destination. On the whole we believe that it has actually left the French port but we do not believe that it is at Hainan. We may mention that in addition to Reuter's telegram there is the evidence of a German ship-master who declares that he actually saw the squadron leave Kamranh Bay on the 22nd.

The *Nichi Nichi Shimbun* observes that the relations between France and Japan have been saved from rupture when they hung by a single hair. But it is impossible to deny that there have been granted to the Baltic Squadron in a French port facilities quite inconsistent with neutrality. Not only has Rojestvensky been enabled to re-coal and re-provision, but also he has been furnished with an opportunity to effect a union with

the Third Squadron. France's responsibility is very heavy. Our contemporary notes that the telegrams contain several dubious statements, suggesting that the shadow of neutrality may now be invoked while its substance is ignored, but as these comments were evidently made under the impression that Rojestvensky had not yet quitted Kamranh altogether, we need not reproduce them.

The *Fiji Shimpo* notes that the French Government declares its determination and its desire to observe strict neutrality, but asks how such declarations can possibly be reconciled with the fact that the Baltic Squadron was allowed to remain for 10 or 11 days in Kamranh harbour, recruiting after its long voyage and making preparations to attack Japan. Within a few hours' steaming of Kamranh is Saigon, the principal seat of French administrative authority in the Far East and her principal naval base in these seas. If she has competence to enforce her neutral obligations at any place in East Asia, Kamranh Bay ought to be such a place. It is most regrettable that she should have suffered such a conjuncture to arise. She now promises that her observance of strict neutrality shall in future be a genuine observance. The Japanese nation looks for the fulfilment of that promise. Protests and discussions will henceforth be entirely out of place. Should Japan be again treated in such a manifestly unfriendly and unjust manner, it will be for her to adopt a more rapid course.

The *Nippon* contrasts England's manner of treating her ally with France's manner. England does everything she can for Japan, but always within the limits of strict neutrality. France does everything she can, but within the limits of possible evasion of neutral obligations. France's rule appears to be that whatever can be contrived without incurring actual responsibility, that is lawful. On the other hand, when Japan wants money, England helps her to get it, whereas France has now closed her purse-strings to Russia. Which is the genuine and straightforward kind of ally? Perhaps these doings at Kamranh Bay were unwelcome to France. Possibly she would fain have prevented them. However that may be, facts are facts. If this Baltic Squadron, hitherto regarded as a dream, a phantom, has materialized and become a real menace, it is by French aid that the metamorphosis has been accomplished.

The *Yomiuri* and the *Chuo* contain the opening parts of articles burning with indignation. These are published, but their conclusion was interrupted in the case of both journals by the receipt of the announcement given out by the Foreign Office on the 23rd. Therefore the editors have stayed their pens, and declared that they now await further developments.

We publish all the above notes, partly as a record and partly for the sake of showing clearly what Japanese sentiment was in this crisis. France, though at the eleventh hour, has relieved the tension and averted the danger by an act worthy of herself.

The *Fiji Shimpo* has a Singapore telegram which says that a Russian hospital ship reached Batavia on the 22nd and is believed to belong to the Third Squadron under Nebogatoff. One day previously the Squadron was said to have reached the Straits of Sunda, so this last telegram is what might have been expected.

The *Fiji Shimpo* further says that according to news received from trustworthy

sources, Nebogatoff's ships reached Sunda on the 21st. But the *Asahi's* information is that Nebogatoff passed the Straits on the 23rd. Our own information says the 22nd, which we believe to be accurate. Whichever date be correct, the junction of the two squadrons may now be regarded as a virtually accomplished fact. From the Straits of Sunda to Kamranh Bay the distance is a little over a thousand miles, which Nebogatoff can easily negotiate in 4 days. Therefore he should be with Rojestvensky by the 27th at latest, and Rojestvensky, thanks to French hospitality, can now supply his junior with plenty of coals and provisions.

Tuesday, April 25.

From the Saigon intelligence forwarded by Reuter, it appears that the Governor-General of Indo-China is conforming rigidly with the instructions sent to him from Paris. Not only are French ports closed to Russian vessels seeking to use them for warlike purposes, but also neither belligerent will be allowed to procure supplies of coal or provisions from French territory should operations in that sense come to the notice of the authorities. The Governor-General, we are told, has prohibited four Russian steamers from embarking large quantities of coal consigned to them and has permitted them to take only sufficient for the purposes of their own voyage. Such prohibitions are difficult to enforce without infringing the rights of legitimate commerce, and the fact that the Governor-General is endeavouring to enforce them shows that he is thoroughly in earnest. Rojestvensky will be not a little embarrassed by these proceedings, and one can not but reflect that had they been adopted earlier his position would now be very different. It may not be supposed, however, that he will be cut off from supplies of coal and provisions. If the Russians are willing to pay enough, as they certainly are, they will find people to serve them, and such service can be performed provided that risks are not too closely scrutinized. Even from Hongkong, where the British authorities must be assumed to have exercised the utmost legitimate supervision, five steamers laden with stores for Rojestvensky, are said to have proceeded to Saigon immediately after his arrival at Kamranh Bay, and there can be no doubt that these stores all found their way to his hands. What is evident, however, is that France is now frankly determined to permit no further violations of her neutrality, and may we not also add, that what has already taken place at Kamranh Bay should be regarded rather as an abuse of France's good-will by an unscrupulous friend than as a deliberate disregard of her duties on her own part.

Wednesday, April 26.

There is nothing definite as to the whereabouts of Rojestvensky. We observe a tendency to believe that he has moved only some of his cruisers outside the harbour of Kamranh and that the bulk of his squadron is still anchored inside, but in view of the French Government's explicit announcement nothing of that kind can be credited. At all events it is evidently unimagined that the Second Squadron has pushed north, or is pushing north. With the Third Squadron within a few days' steaming Rojestvensky will not deliberately deprive himself of the advantage its accession would give him. Therefore that he will make a junction with that squadron his chief objective, seems to be generally accept-

ed. But for the rest all is bewilderment. The *Fiji Shimpō* dubs Rojestvensky's armada the "Speculation Squadron," and notes that ever since it left the Baltic its doings have perplexed the public. There is nothing for onlookers except to wait patiently. Only the Admiral himself and perhaps his staff officers know whether he intends to resolve himself into a piratical force having for sole object the impeding of Japanese and neutral commerce, or whether he intends to come on boldly and fight for the mastery of the sea. One of two things seems certain; namely, that having effected a junction with Nebogatoff, he will either move up the China Sea and challenge Togo at Tsushima, or head out into the Pacific and essay the northern passages. Evidently he is in no hurry. To give battle is not an end that he burns to bring about speedily. And the longer he continues to loiter around in Far-Eastern Seas without a legitimate base of his own, the greater are the dangers to which he exposes the peace of the world. He can not subsist for any lengthy period except by violating the neutrality of some State, and the Japanese have shown that they will not tamely suffer such violations.

There is one not impossible solution of the Rojestvensky mystery, and that is that he wants to induce the Japanese to come in search of him. Could he inveigle Togo out of Japanese waters and bring on a running fight in comparatively remote seas, his chances of escaping to Vladivostok might be materially increased, and at any rate the combatants would be equally handicapped by distance from their bases. But against that theory there is the obvious fact that a trial of speed is the last thing Rojestvensky should be disposed to challenge. Some of his ships are very fast, others are very slow, and the speed of the slowest is the speed of the squadron. The Japanese beat him conspicuously in that important point. Thus even this conjecture brings us no nearer to solid ground.

The *Nippon* conceives a pretty simile. It says that Rojestvensky is like a rat running around a house. No one fears the rat, but every one fears that it may gnaw the furniture or break the utensils. It is so with the Russian Admiral. He is careering round, hiding himself in any hole he can find, and though not formidable as a fighter, he may be very troublesome to peaceful merchantmen. But the *Nippon* does not attempt to predict what his final course will be.

Nagasaki reports that the Russians are perplexed to utilize a mountain of coal—said to be 50,000 tons—accumulated by them at Hongkong for the use of the Baltic Squadron. The coal is held in the name of a Chinese subject, and the Russian Consul at Hongkong was working the matter in conjunction with a Russian Rear-Admiral in Shanghai. But the Hongkong Authorities have discovered the project and taken steps to prohibit it. Such transactions evidently deserve short shrift, for to supply a belligerent fleet with coal does not practically differ from supplying it with gunpowder.

Thursday, April 27.

There is still no definite news of Rojestvensky's whereabouts, but a very general conjecture is that he has merely steamed up from Kamranh Bay to Natrang, a place 30 miles further north along the same coast. He could there find a safe anchorage in a position outside the three-mile limit, and he might wait in safety for the coming of the Third Squadron. As to this Third Squadron, its arrival at Sunda was reported on

the 22nd, as our readers know, but the Japanese authorities are said to be without any information on the subject, and certainly it can not but be considered curious that if the squadron passed Sunda on the 22nd, it should have thenceforth disappeared from sight so completely as it has done. Supposing it to have steered northward with the intention of joining Rojestvensky at some point along the Indo-Chinese coast, it would have been steaming through much frequented waters, and some craft must have encountered and reported it. However, whether it has actually passed the Sunda Strait or not, we may reasonably assume that Rojestvensky will not take his final step—whatever that may be—until Nebogatoff joins him, which means that another week of uncertainty must be anticipated. The *Nichi Nichi Shinbun* thinks that the Russian Admiral will not hesitate to abuse French neutrality if he finds it convenient to do so. Northward of Kamranh on the Indo-Chinese coast there are numerous excellent anchorages, as Natrang, Binkan, Honko and so forth, at each of which Rojestvensky might put in for one or two days, waiting till a French "policeman" came to warn him off. Thus it would be very possible to pass 10 days or a fortnight without any inconvenience. From Kamranh Bay to Tsushima Strait the distance is 1,700 miles, which could be easily accomplished in 70 hours. From Kamranh to Tsugaru the distance is 2,700 miles, and from Kamranh to Soya is 3,200 miles. Thus, supposing that the squadron lingers in the neighbourhood of Kamranh, as it seems to be now doing, until Nebogatoff's ships join it, it will have thereafter a 7 days' voyage to reach the Tsushima Strait, an eleven days' voyage to Tsugaru and a 13 days' voyage to Soya. From 2 to 3 days would bring it to the Pescadores.

It need scarcely be said that Japanese newspapers express much uneasiness lest Rojestvensky should be violating French neutrality again, and lest he should be relying on the same leisurely diplomatic protests which enabled him to equip himself so thoroughly at Kamranh. Both the *Fiji Shimpō* and the *Nichi Nichi Shinbun* write very strongly on this point. They disavow any desire to bring about fresh international complications, but they regard this problem as of the highest importance from the point of view of self-protection, and they suggest, though not in very explicit terms, that should another delay occur like that at Kamranh Bay, Japan must take the law into her own hands.

It is to be observed with regard to this that the French Government having given its explicit assurances as to enforcing its neutrality, full reliance may be placed on its intention. There is always a possibility that local officials, sympathising with the Russians as they probably do, may refrain from any close scrutiny of Rojestvensky's doings, and that he may be counting on this deliberate perfunctoriness. The situation is therefore very difficult for Japan, but any hypothesis of deliberate bad faith on the part of France ought to be excluded except in the face of the most overwhelming testimony. As to Japan taking the law into her own hands, that must be a matter mainly of strategical convenience. It may be taken for granted that Togo is now free to attack Rojestvensky at any of the latter's resting places. France having publicly avowed her adherence to the principles of strict neutrality, the Russian Admiral must be assumed to be always outside the pale of her territorial protection,

and thus his attack by the Japanese would not concern her sovereignty. But Admiral Togo has his own plans and will not allow them to be disturbed by any of Rojestvensky's manoeuvres. It is very unfortunate for France to have a distressed friend who, by lingering in the shadow of her portals exposes her to suspicion and even serious complications. The Russian Admiral, however, has so much at stake that he may perhaps be excused if, disregarding all considerations of sentiment, he takes everything he can get wherever and however he finds it.

Hongkong sends a perplexing telegram to the effect that one section of the Baltic Squadron re-entered Kamranh Bay on the 24th. Very likely Rojestvensky has one or two fast cruisers in the immediate neighbourhood of Kamranh, but that they are lying within French territorial waters is scarcely credible.

The French steamer *Phuyen* arrived from Saigon on April 18th with a cargo of rice, said the *Hongkong Daily Press*. At 7 a.m. on the morning of the 15th instant she saw about twenty ships of the Baltic Fleet in Kamranh Bay, to the north of Padaran; and many other ships, it was concluded, were out of sight in the inner bay. Torpedo boats and destroyers were actively steaming about at the approach to the harbour. They appeared in very good condition. As the little craft pitched in the sea, no sea grass could be seen on them. At Saigon rumour had it that the vessels of the Baltic Fleet were very dirty, but the vessels, according to one of the *Phuyen's* officers looked "just as if they were leaving port." At Saigon some people thought that a Japanese Fleet near Singapore would get sandwiched between the main and third squadrons of the Baltic Fleet. The French sailors on the *Phuyen* gave three cheers when the Russian warships were close, and they met with a loud response. No other signals were made.

The steamer *Isleworth*, from Saigon with a cargo of rice, sighted the Baltic Fleet in Kamranh Bay on the 15th instant. The Russians signalled "What is your destination?" and the *Isleworth* replied "Hongkong."

The steamer *Lincolnshire* arrived from Rangoon yesterday (April 16th) with a cargo of rice destined for Japan. To a *Daily Press* reporter, Captain Alfred G. Clark thus related the circumstances of a very narrow escape from the Baltic Fleet:—"At four o'clock on the morning of the 9th instant, in Latitude 2.22 North, Longitude 104.45 East, we sighted twenty-two steamers' mast-head lights. That was enough for me. My cargo was rice for Japan, so I thought I had better keep out of the way. I altered our course to the westward, so as to allow the Russian Fleet to pass east. At daylight the Fleet was out of sight to the eastward, but I could see their columns of smoke rising above the horizon.

Next morning (on the 10th instant) at five o'clock, having gone on a parallel course, we again sighted about thirty mast-head lights of the Fleet, and again I kept away, for, as you can imagine, I did not want to see more of the Russians than I could help. My position then was Latitude 5.3 North, Longitude 106.20 East.

The P. & O. steamer *Poona* was in Singapore when the forty-two ships of the Baltic Fleet passed through the Straits of Malacca on Saturday the 8th instant. The *Poona* left for Hongkong on the following day (Sunday).

At about two bells in the first watch (5 a.m.), daybreak, on the 11th instant (Tuesday), the Chief Officer being on watch, three vessels were sighted low down on the horizon. Two hours' later it was discovered that they were the rearguard of the Baltic Fleet.

The *Poona* continued to gain on the Fleet, and shortly after eight o'clock the greater part of it was well in sight, the position then being a little to the eastward of the Anamba Islands.

The British warships *Iphigenia* and *Sutlej* then passed right through the Fleet, steaming westward. The Russian cruiser *Almaz* then altered her

course and signalled the *Poona* to stop, asked her name, cargo and destination. Being satisfied, the *Almas* then signalled "Pleasant voyage," and the *Poona* replied "Thanks."

From noon observations the *Poona* was found to be in 8.30 North Latitude, 109 50 East Longitude, the Baltic Fleet then being about four miles distant. When first sighted in the morning the Fleet appeared to be in no sort of order, but this later was found not to be the case. From the vanguard in the rearguard cruisers of the Fleet was a distance of about ten miles. Three cruiser scouts were ahead, and three in the rear. The formation was excellent. The ships were drawn in long lines with two lines of colliers, transports, training ships and hospital ships in the centre. There were upwards of twenty non-fighting vessels altogether, all heavily laden. The battleships were on the outside right and four torpedo boats on the inside; five Volunteer Squadron boats and the cruiser *Oleg* on the outside left, and torpedo boats inside. The rearguard cruisers were the *Almas*, *Dmitri Donskoi* and *Aurora*, and those ahead the *Katserin Maria Theresa*, *Seiellana* and *Columbia*. The flagship appeared to be the battleship *Kniaz Suvaroff*. The cruisers during their scouting manoeuvres showed that they were very fast vessels. The ex-Hamburg America Line ships are twenty-three knot vessels.

The fleet seemed in exceptionally good trim, and was steaming easily at 9 3/4 knots, and the scouting vessels going at least fifteen knots an hour. The hulls of the various ships were not so foul as reported. As the ships rose and fell in the sea the red paint showed up brightly.

As far as could be discerned by the officers of the *Poona* the fleet was comprised as follows:—Seven battleships, eight regular cruisers, three other cruisers, being converted Hamburg America liners, eight destroyers three hospital ships, colliers, transports and training ships, in all forty-three vessels.

The *Poona* kept in company with the Fleet all day, the course being about E.N.E., steering for Hongkong. Before sunset the Fleet altered its course a little north, apparently making for the Paracels. At night-fall all the regulation lights were displayed by the various vessels, but at nine o'clock they suddenly disappeared.

#### THE EFFECT OF FRANCE'S ANSWER ON JAPANESE PUBLIC OPINION.

The *Kokumin Shinbun*, discussing France's answer, writes in a very moderate and appreciative strain. It is persuaded that there never was any intention on the part of the French Government to allow its neutrality to be violated to Japan's disadvantage, nor ever any feeling of deliberate unfriendliness towards Japan. The whole trouble was that France's ally abused her good-will in a manner and to a degree for which she was not prepared. It is indeed most regrettable that earlier action could not be taken, but sight must not be lost of France's exceedingly delicate situation and of the complications already confronting her with regard to Morocco. She has acted worthily and justly if somewhat tardily, and in analysing the factors which have brought about this happy result, three present themselves. The first is naturally Japan's vigorous protest. The second is the sense of justice animating France herself. She did not entertain any unfriendly feeling towards Japan nor had she any deliberate idea of allowing her neutrality to be abused. Therefore she did not hesitate ultimately to take due steps. The third factor is the Anglo-Japanese alliance. England, painful as it must have been to turn her back upon the welcome *entente* established with her great neighbour, did not hesitate in choosing between her duty to her ally and her sentiment towards her friend. British public opinion declared frankly that, unwell-

come as the selection was, the French *entente* must if necessary be sacrificed to the Anglo-Japanese alliance. France took note of this, and she too being anxious to maintain her kindly relations with England, felt it all the more imperative to see that Japan was not subjected to injustice. Thus once more the Anglo-Japanese Alliance has served to narrow the limits of this deplorable war, and to avert a world-wide catastrophe. All the more plainly imperative is it that the Alliance should be continued in the future.

The *Nippon* says that the clouds have rolled by. France has done the right thing. Her declaration is implicitly trusted by Japan. The Japanese nation recognises now that the dangerous affair was a mere passing incident, and that France did not seriously contemplate any injury to this country. Happily therefore the old friendly relations are restored; a happiness not for the two countries alone but also for the whole world. It can not be doubted that England exercised her great political influence on this occasion in the cause of her ally and of humanity at large. The one thing now recommended by the *Nippon* is that France, in her own interests, should hereafter adopt and enforce the 24-hours' limit which other Powers have found such an effectual means of preventing complications.

Other journals like the *Jiji*, the *Nichi Nichi Shinbun* and the *Asahi*, while welcoming France's action and expressing more or less qualified confidence in her resolution to prevent future complications of a similar nature, are evidently unable to forget at once the great facilities Rojestvensky enjoyed at Kamranh Bay.

#### THE RUSSIAN CRAFT IN CHEFOO.

The Russian craft in Chefoo, like their comrades in Shanghai, have been causing some uneasiness. They are six; the destroyers *Skori*, *Statni*, *Vlasny* and *Selguchui* (?) and three torpedo-launches (*kansai suiraitei*). Rumour alleges that of late they have been making preparations to run, their plan being to get towed out of the harbour under cover of darkness. The Chinese, however, are credited with a determination not to suffer any such violation of their neutrality. Orders are said to have been given to the cruiser *Haitan* and her consort, which are lying at Chefoo, to open fire at once should the Russians attempt to move out. It is conceivable, however, that the Russians might not be deterred by that prospect if physical danger were the only obstacle to their enterprise. What is not likely, however, is that such a gross and deliberate abuse of China's neutrality would be approved by the St. Petersburg Government. So long as the neutrality of nations can be abused with some hope of concealing the abuse, doings like those of Rojestvensky may be expected, but the exit of interned war-vessels from a neutral port would be an open act of war. From that the Russian Government will shrink.

It was nevertheless evidently believed that the ships at Shanghai contemplated a sortie. The Chinese Admiral at that port stationed two warships at Woosung, three at Shanghai, and 4 torpedo-boats also at Woosung. But everything goes to show that there was no solid reason for these precautions. The three thousand tons of coal which the Russians were said to have shipped, turned out to be 300, for everyday use—which amount, as our readers doubtless remember, is duly sanctioned. The re-

painting of the vessels proved to be merely a climatic precaution. And when an expert visited the ships, he found that no attempt had been made to replace the removed parts of the armament and the machinery. These sensational rumours may probably be regarded as an offspring of the neurotic condition existing in the Far East just now.

#### DEATH OF M. LESSAR.

M. Lessar, Russian Minister to Peking, died at his post at 12.30 a.m. on the 21st and was buried on the 22nd. It appears that up to the forenoon of the day of his death he was engaged writing despatches for his Government, so that he may literally be said to have died in the active discharge of his duties. Mortification seems to have set in, and blood-poisoning finally carried him off. We have no particulars of M. Lessar's career, but every observer of his policy in China must admit that he showed at once great talent and great activity. There is something that appeals forcibly to public admiration in the fine courage that enabled him to remain at his post throughout a long and wearing illness, for when he resumed his duties in Peking just before the war, he was known to be in an almost desperate condition. He has given his life for his country as devotedly as those that have been fighting her battles in the field. Rumour alleges that M. Pavlov, of Korean fame, is not unlikely to be his successor. It is known that M. Pavlov has been using all his influence to secure the reversionary interest of the post, and there are those who say that the knowledge of this prospect was one of the incentives which kept M. Lessar in harness to the very last moment, and induced him to hide the precarious nature of his tenure of life.

A telegram to the *Kokumin* from Peking says that the Chinese Government has intimated its unwillingness to receive M. Pavlov as successor to M. Lessar, and that St. Petersburg will probably pay attention to the intimation. It would be conclusive, of course, were Peking an Occidental capital, but China has not yet received this full measure of inter-state recognition. Rumour says that among the candidates for the post are Colonel Wogack, M. Pokoitiloff and M. Plancon.

#### KOREA.

Telegrams from Yuensan show that the Russians have assumed the offensive in north-eastern Korea. They have crossed the Tumen and some eight thousand of them are moving toward Songjui. This operation has very likely been planned in conjunction with the coming of the Baltic Squadron. Rojestvensky's presence, could he safely reach the Sea of Japan, would greatly hamper Japan's ability to send re-inforcements to Yuensan. But Rojestvensky is not yet in the Japan Sea, and he has a difficult task to perform before he can get there.

Another account puts the Russian force collected near the Tumen as one Division, which would be at least twice eight thousand men.

The disbanding of the Korean troops has taken place. Each disbanded soldier has received a present of 18 *yen* and a piece of cloth. There are said to be apprehensions that the men may prove victors and strict instructions have been sent by way of precaution to the various localities.

## AFFAIRS IN MANCHURIA.

Sunday, April 23.

The occupation of Tunghwa by the Japanese on the 15th instant was necessitated by the fact that a portion of the Russian extreme left had remained in that place, forming a *point d'appui* from whence a turning movement could have been subsequently made against the Japanese right. Moreover, Tunghwa is itself a town of some magnitude, being a centre of supplies and having a considerable population. The Russians made no attempt to hold the place. They retreated precipitately without fighting.

The Chinese Government has decided to prolong the Shanhaikwan railway from Hsinmintun to Mukden and from Hsinmintun to Fakumun. These lines will enter into competition more or less with the original Russian road, and for that reason their construction was opposed by the Russians so long as they remained in authority. Engineers have been sent to survey the routes, and it is expected that work will be undertaken very shortly.

Thursday, April 27.

With reference to the official telegram published elsewhere, our readers, by consulting the map issued from this office on the 23rd, will see that the Russians, on the 24th instant, made an attempt on a somewhat large scale to drive the Japanese from their advanced positions in the West of the field. The Russians employed about 15,000 troops for this purpose. They moved in three bodies, one down the Kirin-Kaiyuan road, one down the railway against Changtu, and one down the Changchun-Fakumun road against Hsiaotatz, which will be found on the map 11 miles north of Fakumun. The strongest of these forces, numerically, was the one that marched down the railway—4,800 infantry and 2,400 cavalry—but this body had no artillery, whereas the force—4,000 infantry and 2,400 cavalry—which attacked Kaiyuan had 8 guns. The Hsiaotatz force consisted of cavalry (1,800 sabres) and 8 guns but had no infantry. Doubtless the Russian plan was to deliver the three attacks simultaneously, but apparently by some miscalculation they pressed home the Kaiyuan enterprise prematurely, and suffered such a crushing defeat there that the other two columns retreated at once. At Kaiyuan the Japanese had 38 killed and wounded, whereas the Russians left 200 dead, and must therefore have suffered about 1,000 casualties altogether. This is the first operation of any importance since Linevitch assumed the command-in-chief, and it does not enhance his reputation.

The *Asahi Shimbun's* information is that the Russians, as anticipated, have chosen the Changchun-Kirin line for a new defensive position, and that they are now assiduously getting up reinforcements and carrying out works of defense. The reinforcements that have reached the front hitherto number about an army corps, and these are the troops that have been moved up to Pamien-ching, Taolu and Hailunching, which are the advanced positions of the enemy; Pamien-ching being on the Changchun-Fakumun road, Taolu on the immediate east of the Kirin-Kaiyuan road, and Hailunching on the Kirin-Hsingking road. This army corps was *en route* for Manchuria at the time of the Mukden fight. The van of the troops sent out from Russia to fill up the vacancies caused by the big battle, has only just reached Harbin and is not yet in the fighting line. Hence it would seem that at least four months must elapse before Russia sends

out sufficient reinforcements to restore the army to its pre-Mukden strength.

That is the *Asahi's* view, but we can not wholly endorse it. According to the reckoning of *The Times* Military Expert, the Siberian Railway will be entirely occupied until the end of April carrying troops which were detailed for the front before the Battle of Mukden. Hence the line will not be available until May for the transport of reliefs, and thenceforth its utmost carrying capacity will be 35,000 monthly. Still by the end of August Linevitch may expect to be at the head of as big an army as Kuropatkin had at Mukden. If nothing untoward happens in the interval.

Returning to the *Asahi*, we are told that the defensive works are along both banks of the Itung River, which flows southward from Changchun (*vide* map 23/4) and at Rhshihlipau, Shihlipau, as well as at various masked positions in the vicinity of the railway. At Kirin the right bank of the Sungari, the highlands on the north-west, Rhtaoling, a pass on the Kirin-Changchun road, are all being entrenched in great haste. Moreover, the enemy's rear-guard at Hailunching are also busily constructing defensive works.

Friday, April 28.

Japanese newspapers regard the last affair in Manchuria as a reconnaissance in force. If so, they justly say that it was carried out most clumsily. When a General orders a reconnaissance in force he is necessarily prepared to suffer some loss. But it is the very essence of a reconnaissance that it should reconnoitre, instead of falling into such a plight as overtook the Russians at Kaiyuan on the 24th. They must have had something like a thousand casualties and so far from discovering anything, they were themselves surprised. The official report uses the term *engeki* to describe the manner of the Japanese attack. We have always understood that this word signified "envelop" or "outflank," but our Tokyo contemporaries, evidently speaking in the sequel of inquiries, attribute to it the included significance of "ambush," and if that be so it would seem that a force of some 7,000 Russians, advancing to reconnoitre Kaiyuan, found themselves ambushed by the Japanese and had to retire with a loss of 13 or 14 per cent. of their number.

The *Asahi Shimbun's* correspondent telegraphs from the front that according to the most trustworthy investigations, the Russians now in Linevitch's lines number 150,000 or at the very most 180,000, if those that fled without arms be included. Linevitch is at Kungtuling (written also Kuchuling as *vide* our map of 23rd instant) which is a place of great importance, the railway station and its adjoining buildings being on a larger scale than those at Mukden or Tieling. Kungchuling is 68 miles north of Changtu, which is the most advanced post held by the Japanese in the west of the field, and the distance from Kungchuling to Changchun is 40 miles. It will be seen, therefore, that so soon as the Japanese advance is resumed, events will crowd upon each other quickly. The same correspondent says that Linevitch is much embarrassed for want of provisions, and that the Russian force at Kungchuling is one army corps under General Zastrov. In Kirin there are about ten thousand Russians, and at Itungchou there is a division, which preserves touch with Fenghua, and uses a considerable body of cavalry as feelers. Kungchuling would thus seem to be the principal point of concentra-

tion, as there are said to be about a hundred thousand men massed there. Northward of Changchun the country is very poor and offers no facilities for defence. Kungchuling also has no considerable advantages as a military position. It is said that six trains arrive there daily from Harbin with provisions, and that the surrounding country has no resources for feeding the troops, raid it as they may. There are some 80 sotnias of Russian cavalry covering the Russian lines. They are very active, and Mischenko seems to have resumed the command. The Chinese, it is said, are acting as guards of the Japanese telegraphs and are showing much good will. Vladivostok appears to be causing the Russians great anxiety. Despite their reduced forces, they are detaching bodies of men to strengthen its garrison.

## PRINCE KARL.

On the 25th instant at 9.30 a.m., Prince Kanin and Prince Karl von Anton returned to Tokyo from the front. They were received at the station by Their Imperial Highnesses Prince and Princess Kacho, Prince Yamashina, Prince Kitashirakawa and Princess Kanin; by Field-Marshal Marquis Yamagata, General Viscount Sakuma, General Baron Okazawa, Admiral Viscount Ito, Admiral Count Kabayama, the Ministers of State, the Chefs de Mission, the Vice-Ministers and many others. Prince Karl proceeded at once to the Shiba Detached Palace.

Prince Karl von Anton proceeded on the 26th to the Palace and was received in audience.

On the day of his return, the Prince lunched at the German Legation. Among those invited to meet him were Marquis Yamagata, Count Matsukata, Count Katsura, General Terauchi, Baron Yamamoto, Baron Komura and Baron Sanmomiya.

On the evening of the 28th instant Mr. Ozaki, Mayor of Tokyo, entertained the Prince at the Kameseiro, Yanagi-bashi. The German Minister and the Staff of the German Legation, Baron Komura and Mr. Chinda were among the guests, and Mr. Ozaki was supported by the chairman of the City Assembly and the City Councillors.

## THE CHINESE ASSISTANT-RESIDENT AT LASSA.

A telegram from Shanghai to the *Jiji Shimpo* says that according to a wire from Darjeeling there has been a disturbance in Tibet, and the Chinese Resident's *locum tenens* as well as his aide-de-camp have been assassinated. The Resident further telegraphs to Peking that there has been an outbreak at Lassa, and that several Chinese officials have met their death. We are not clear what is meant by the Chinese term corresponding to *locum tenens*, but we presume that the chief Secretary of Legation is indicated.

The facts of the case were as ascertained to be: A species of revolt having occurred at Putan on the borders of Tibet and Szechuan, the Assistant-Resident proceeded thither to quell it and to rescue some French priests who had fallen into the hands of the rioters. But the latter proved too strong for the Chinese official, who, with several of his subordinates, was killed. Orders have now been issued to the Viceroy of Szechuan to take effective steps for quelling the disturbance and succouring the Frenchmen.

## THE TALK OF PEACE.

We can not discover from news published in London that any idea of peace was entertained in St. Petersburg after the battle of Mukden. The views held there in highest circles seem to have been summed up in a statement made by Admiral Dubassoff, which the Paris correspondent of *The Times* reports:—

It is on his return from London to Paris that Admiral Dubassoff has once more spoken with crude frankness on the burning questions of the moment. He began by characterizing as "absolutely false" the news that Admiral Rojestvensky had renounced his voyage to the Far East and would shortly return to the Baltic. "Admiral Rojestvensky is at present engaged in war manœuvres with his ships in the vicinity of Madagascar, while awaiting the arrival of the third division under the command of Admiral Niebogatoft. There has been no change in the dispositions of Admiral Rojestvensky, who is waiting till his squadron is complete before continuing his voyage to the Far East and engaging with Togo's forces. My opinion is that, with a man of the experience and determination of Rojestvensky and with officers and crews ready to shed their blood, we have a chance of beating the Japanese at sea in spite of our numerical inferiority."

In answer to M. Huti's inquiry as to the prospect of peace now that Mukden had fallen, Admiral Dubassoff declared emphatically that Russia would not and could not accept peace under such conditions. He added that, in saying so, he expressed, not only his personal feeling in the matter, but "the impression made upon him by the conversations he had had with all the competent personages with whom he had spoken in London and Paris. Russia cannot think of peace at the present juncture. . . . Russia is not defeated. She has considerable resources. The further we advance towards the North, the greater will be the distance of the Japanese from their base. We are determined to win, and we shall be victorious at any cost. . . . Peace after a Russian victory? Yes. After a retreat? No." Another argument for the relentless prosecution of the war was that in "four or five months" the Japanese themselves would be exhausted both in men and money. "I know the Japanese, and five or six months hence they will be the first to begin *pourparlers* for peace. . . . I do not hesitate to declare that we can mobilize an army capable of assuring our success on land, and I have confidence in the fighting value of Rojestvensky's squadron."

The comment of *The Times*' military correspondent on this news is worth considering:—
